With reference to your circular No. 9R—L, dated 24th April last, I have the honour to report that among all whom I have personally consulted, the concensus of opinion is against the Bill, as being one-sided, and having a tendency to lower the status of the zemindar. The sub-divisional officers, with the exception of that of Ranaghat, have been unable, for press of other duties, to consider the Bill, and have not therefore favoured me with an expression of their opinion. They have forwarded, however, the written opinions of the few among the several consulted, who have responded to their call, and these I now beg to submit for your perusal.

2. My own opinion of the Bill is, that it will have the effect of putting a stop to existing abuses on the part of the zemindar, and affords to the zemindar a speedy means for the recovery of arrears. At the same time I consider that portions of it are, as it now stands, unsuited to this district, that they deprive, unnecessarily, the zemindars of privileges which they have long been enjoying, and to which they are entitled, without necessarily conferring on the old ryots at least any corresponding advantage, and only benefitting new comers who have no claims on the estate. On the other hand, some of the benefits conferred on the ryots appear to me of a very doubtful nature, notably the power of transfer of occupancy rights by sale.

3. The sections which seem to me to call for special remark are the following:—

Sections 5 and 6.—These appear to me to be inapplicable to this district, in which the utbandi system prevails to a very great extent. Lands let out on this system have hitherto been considered to belong exclusively to landlords as their private property, and landlords, other than proprietors, invariably retain such lands as khas. Under the Bill such lands will become ryoti, and it seems questionable whether privileges so long enjoyed, and from which no injury to the ryots accrued, should be taken away. Planters too frequently let out their khas lands to ryots for a season or two—a practice which is advantageous to the ryots as well as themselves, but which must be put a stop to unless the Bill is changed.

Section 25.—No right of pre-emption is given under this section. I think this should be allowed as in the case of occupancy rights.

Section 45.—The utbandi system, which only in this and one or two other districts will make almost every ryot a settled ryot of the village, and hence under Section 47, almost every ryot will have a right of occupancy in the lands he may be holding since March. It cannot be the intention of the Bill to take advantage of a special system such as this, and hence I consider some special proviso is needed to meet the special circumstances of this district.

Section 50.—The right of transfer by sale seems a very doubtful privilege. The greater number of ryots are greatly indebted, and are so improvident, as a rule, that to stave off present urgent demands on their purse, they may sell their rights and thereby ruin themselves. It seems to me, that among the poorer ryots at any rate, the greatest safeguard against absolute ruin would be the fact, that they had their lands to fall back upon from which they could not be deprived, either by their own, or the action of others, so long as they paid due attention thereto.

Section 56.—In a great measure nullifies the benefits conferred by the previous sections. A landlord can certainly keep out land jobbers and others who are not likely to improve the lands, but, notwithstanding that he pays for the right of occupancy, he is forced to give it up again, if he lets out the lands to ryots. I could better understand this if it were a certainty, that he would let it to old ryots of the village, but he may desire to lease them to new comers, or to retain them for lease under the utbandi system; and I cannot see why they should be debarred from carrying out such a wish, without being obliged to give a right of occupancy at the same time.

Section 93.—I presume the court has to decide whether the claim for enhancement is just, fair, and in accordance to the law, before ejecting the ryot. In that case, it seems hard that landlords should have to grant compensation for disturbance which would never have occurred but for the obstinate rejection of such just claims by the ryot.

Sections 139 and 140.—The commonest mode of surrender and abandonment of lands is by flight: in such cases, from whence is the landlord to get his rents for the following year.

4. No mention is made in the Bill whether lands thus surrendered will continue to be ryoti, or will be considered as the exclusive private property of the landlord. It seems to me that all lands which come in any way in the hands of the zemindars should be liable to be dealt with by the zemindar in the way he thinks best. The ryot to whom the lands belonged cannot be injured by such lands being declared "khamar," and next to him, it seems to me the landlord should be considered and not the new-comers on those lands.

No. 208, dated Ranaghat, the 20th May 1883.

From—BABU RAM CHURN GHOSE, Sub-Divisional Officer of Ranaghat,

To—The Collector of Nuddea.

In reply to your No. 449G., dated 16th instant, I beg to submit herewith the following report.

Almost all the respectable zemindars of the sub-division were written to for an expression of their opinions on the Tenancy Bill. The only two reports received up to date from Babus Girindro Nath Mukerji and Kalika Nund Roy, are submitted herewith in original.

I have very attentively gone through the Bill. The provisions are quite full. All necessary safeguards against the illegal exactions of the zemindars and harassing enhancement suits have been provided in it.

The reports of the zemindars show that slightest encroachments on their rights have been objected to.

All that I venture to remark is that more than sufficient privileges have been granted to the tenants. It would have met the present requirements adequately if there had been only a simple mode of speedy recovery of arrears due prescribed, and alterations made to protect the tenantry from illegal exactions, and *abwabs*, and harassing enhancements.

While the privilege of creating occupancy tenures has been made easily feasible, the outcome of it, I apprehend, will be the creation of multiplicity of intermediate undertenures, which in the long run would prove detrimental to the interests of actual cultivators of the soil.

It will prove to be of doubtful expediency, and, I am afraid, will foster litigation, and not establish that good feeling which prevailed between the tenants and lords which have been disturbed since the operation of Act X of 1859.

The Bill is a very complete one, and I am unable to offer any suggestions.

Dated Subarnopur, the 7th May 1883.

From—BABU KALIKANUND ROY,

To—The Deputy Collector of Ranaghat.

In complience with your serial No. 145, dated 3rd instant, to copy of letter from the Secretary to the Board of Revenue, I have the honour to send the report on the Bengal Tenancy Bill; but in doing so, I beg to premise that I have not had the occasion to read the fifteen chapters of the Bill, as I am not a subscriber to the Gazette referred to in the Secretary's letter. Imperfect as my knowledge of the Bill is, and the time allowed, *viz.*, two days, however, may be too short for such an important subject, I shall, however, be glad if the views contained in the report coincide with that of yours. If we differ, I beg to request you will be kind enough to submit the report to the Secretary to the Board of Revenue in order that I may have the satisfaction to learn that my report will have a chance of hearing.

The scope of the Rent Bill may be summed up as follows:—

(1.) That it does not remove some of the clauses of the present Rent Law which trench upon the property rights of the landlords, and such as are considered obnoxious.

(2.) That it confers on tenants certain rights and privileges which they do not enjoy at present.

(3.) That the standard of enhancement proposed to be fixed is not uniform, and the limit assigned in certain cases is arbitrary.

(4.) That the compensation allowed to tenants-at-will is inequitable, and not customary in India.

(5.) Speedy recovery of arrears of rents.

1. The sections which interfere with the proprietory rights of the landlord are :—

Section IV of Rent Act VIII of 1869.—This section, though evidently based on the law of *prescription*, is opposed to Section LII, Regulation VIII of 1793, and considering the relation that subsisted between the landlord and tenant formerly it is wholly inapplicable to cases of rent. While it confers no benefits on the tillers of the soil, it has created a class of men whom the law never intended. (14, W. R., p. 168.)

Sections V and VI.—There has been a great deal of contention as to who are the persons that should enjoy right of occupancy; whether the right should be conferred on *khood kasta kudmi* (hereditary resident), or simply *khood kasta* ryots. The class of ryots described in paragraph 2, Section LX, Regulation VIII of 1793, are the latter. It has been also a subject of great dispute whether by ryots are meant cultivators or holders of land, or both. There is no such definition in the regulation referred to above; we therefore safely conclude that if the right is given to *khood kasta* cultivator for that portion of land which he cultivates, the ends of justice will be sufficiently met. It serves no purpose to vest a tenant with the right over that quantity of land the improvement in which he is not directly concerned, but then which merely forms part of his holding, unless it be the intention to lower the value of the proprietory rights of the landlord.

The Sections which are considered obnoxious are the following:—

Section XXI.—Although Government at the time of the permanent settlement has fixed, the payment of its land revenue by instalments for the proprietors, it has left the latter under

a great disadvantage to realize their dues from their tenants by the same mode of instalment. The established usage is a myth, and is never proved, or if proved, it is never considered satisfactory. We think that every tenant be made to pay his rents by monthly instalments though no interest shall run until the tenant shall have failed to pay his quarterly dues before a week the same is payable by his superior landlord.

Section XXXI.—Deposits of rents, although made on oath that the same were tendered at the mal kutchery of the landlord, are not *bonâ fide* transactions. The tenants now-a-days think it a degradation to go to the landlord's place, avail of the benefit of the law, and make the deposit. The law on false oath is never enforced in such cases. The limitation, *viz.*, six months, fixed for claims for further balance seems to us quite arbitrary, considering that similar claims of abatement for rent and all others are barred after three years.

Proviso of section LXVIII.—While the sharer in a joint, undivided estate is made to attach first the moveable property of the judgment-debtor (Section LXIV), he is debarred from distraining the same description of property under this proviso. Ninety-nine out of every hundred estates in Lower Bengal are joint, undivided, in which no division of land has taken place; consequently the provisions of the distraint clauses are not availed of. The procedure in respect to suits by sharers of joint estates, *mutatis mutandis*, may be made applicable to sharers who are in receipt of their rents separately.

2. Already the impetus given to the undertenure by making it heritable and transferable has contributed to the rise in value of that description of property much above the value of the proprietory rights of the landlord. And if further concessions be made, the value of one will continue to rise, while that of other will fall, as one might anticipate, in either arithmetical or geometrical progression to such an extent that Government may eventually find it difficult to satisfy its own demand from the sale-proceeds of such estates in case they are brought to the hammer for arrears. The wholesome principle laid down in Section 52, Regulation VIII of 1793, and in the decision of the High Court (20, W. R., page 139) should not be overlooked, or power be given to turn arable land into an orchard or homestead or offices of manufactory, &c., without the express sanction of the landlord (12, W. R., page 495; 18, W. R., page 19). Such power may be advantageous to the individual tenants, but positively injure other tenants who may have lands adjoining. The landlords will suffer without receiving any adequate benefits. That such power is opposed to native idea of wealth needs not be shown. According to the native idea, paddy is wealth (dhana dhanya). Whatever contributes to the increase of that wealth, contributes to the well-being of native society. The saving of written contracts under section 7 is one which should not be dispensed with.

There can be no doubt that the value of undertenure will be greatly enhanced at the expense of the proprietory rights of the landlord, but no one who has carefully read the preamble to Regulation XLIV of 1793, will deny that the object of the Legislature has never been so.

It is therefore sufficient for all purposes that *khood kusta* cultivator of 12 years' standing to have right of occupancy in the land he cultivates; that the right be made heritable, provided successors follow the same mode of occupation; the right be made transferable: but as the Bill provides, the landlord is to have the right of pre-emption.

3. Considering the different rates of rent which prevail in the same village and in the same district, and in some which are paid in kind, the standard, *viz.*, one-fifth of the gross produce, is not an unreasonable one. But the limit fixed for new engagements seems to us quite arbitrary and unsuited to India, where the people are generally indolent, and low rate of rent never induces a cultivator to exert himself to derive the utmost the land could fetch. It would therefore be indirectly encouraging indolence. In Nuddea, where comparatively with Hooghly and Burdwan, very low rate of rent prevails, the agriculturists are content with a single crop which requires no great labor, and is easily obtained.

4. *Ashu Dhanya.*—The tenants-at-will are quite aware of the nature of contract they enter into. So far as our own experience goes, no improvement of any kind is made by tenants of very long standing unless they are indemnified by the annual product. Even when they apprehend any loss they relinquish the lands. If compensation, such as is proposed, be once introduced in India, landlords may hereafter claim compensation from their tenants when lands are relinquished by them, and which may lie fallow.

5. The procedure adopted in the Rent Bill will greatly help the landlords in realizing their rents without having recourse to summary procedure.

Dated Ula, the 8th May 1883.

From—Babu Girindra Nath Mukerjee,

To—The Deputy Magistrate of Ranaghat.

In reply to your favour No. 138, dated the 3rd instant last, I beg to record the following as my deliberate opinion in respect of the Bengal Tenancy Bill. Hope you will kindly condescend to go through it, correcting and altering whatever may seem to you frivolous or incoherent, and apprise me of it in time that I may take a lesson.

THE BENGAL TENANCY BILL.

Before entering into any discussion of the Bill, I beg to state at length the relative position of the landlord and tenant as now obtains in these parts. Men quite unacquainted with

the habits and mode of life of the peasant class are seen to come forward with loud and boisterous denunciation of landlord and the mahajan. Looking at facts from a distance, their young raw hearts become affected at seeing a poor ryot scantily clad and scarcely provided with the bare necessaries of life, and they at once conclude that the landlord and the mahajan are to blame for it. If they will please throw off a little of their lethargy and take the trouble to sift the cause to its very bottom, they will be convinced that it is the ryot who is to blame. In days gone by, when the soil was more fertile, and produce quite abundant, ryots could be seen in very prosperous and affluent circumstances, their granaries full of grains, and their cow-sheds teeming with healthy animals, though the grains then fetched but half their present price. This state of things has quite vanished; and what is the cause of it? Not the oppression, extortion, or the illegal exactions of the landlord, or the all-absorbing greed of the mahajan certainly, but the idle and improvident habits of the ryot, his utter disregard to agricultural improvements, and his extreme willingness to depend on his mahajan for the payment of his rents and supply of even the necessaries of life. He would not take into head the idea of manuring or irrigating his lands, though the means to it were ample and available. His only care seems to be simply to keep his mahajan well satisfied about his earnestness to pay off his debts, by showing that he has broken up his lands for purposes of cultivation. The mahajan with this guarantee in his favour undertakes to keep him up and afloat up to harvest time, and lends him money and paddy in the hope of recovering something of his old dues over and above that let out in the current year. Now imagine his chagrin, when at the hervest time, he comes to know that owing to the partial failure of rain and the comparative exhaustedness of the fertility of the soil, the produce of the year cannot be expected to realize even so much as half his dues of the current year. His remedy now lies in a court of justice, and what awaits him there? Loss, heavy unmitigated loss! The law protects the ryot. His single plough and bare pair of bullocks have been declared to be such on which the mahajan cannot fix his clutches. His home is no property that can be attached in execution of a decree, and his lands are primarily liable for the rents due by him. The little that had been saved by eluding the mahajan's vigilance had long been converted into paltry ornaments, and given over to his wife or daughter. The mahajan, with no other solace except a prolonged sigh and a sincere wish of ruin to the man who has given him so much trouble, discontinues his transactions with him. The rents of his (ryot's) lands have already begun to fall into arrears, and the landlord is now brought on the stage. The ryot is called upon to pay, but he pleads inability, simply because he has no mahajan. The landlord waits for three consecutive years, and being hampered in diverse ways in realizing his dues from the ryot, he ultimately goes to court, where after endless postponements, and illegal and unrecoverable expenses he is favoured with a decree. The costs of the original suit, together with those of the execution proceedings, augment the demand to four times its primary amount. The ryot who could not at first pay the simple rent due can never be expected to meet this heavy demand. He hides his movables so effectually that the attaching peon gives a return of no movables, and the landlord is obliged to proceed against his lands. He becomes thus deprived of his agricultural life, and his hand-and-mouth sort of life brought on by his own faults is made the stand-point whence the declamators vilify the landlord. There can be no remedy to this state of things so long as the ryot does not appreciate the advantages and importance of an easy, independent, agricultural life; no amount of protective legislation can better the condition of the ryot, and too much court-interference will only hasten on his ruin. However circumscribed and hemmed-in might become the landlord's rights under a legislative enactment, something must remain to him, and the enforcement of that something in a court of justice, where myriads are waiting to prey upon the poor ryot, would bring on misery and destitution to the latter. In olden times, a defaulting ryot would have been brought over to his landlord's kutchery, where after piteous cries and cunning evasions he could get release with some corporal punishment perhaps; thus with a slight bodily inconvenience he could contrive to save his home and his means of living. But now, protected from any such punishment by the criminal law, he becomes utterly ruined in defending himself. The greatest oppression that a landlord can now-a-days inflict on his tenant is to sue him in a court of justice.

With these preliminary observations I beg to proceed to consider the Bill. First of all, I shall beg leave to ask, is the Bill wanted? To this question I should return an answer in the negative. The system of agriculture in vogue needs substantial improvement; else no good outturn can be expected. The same lands are being cultivated continuously for the last hundred-years, and have consequently lost much of their productiveness. Experience has shewn that improvements calculated to secure a good harvest do not pay even the interest of the capital laid out. Under this state of things, ordinary ryots are seen to give up agricultural pursuits, and embrace the more lucrative calling of selling labour dear. The price of labour has increased fourfold, and the inducement to pursue an unprofitable agricultural life has greatly diminished. Moreover, the agitation given birth to by the passing of Act X of 1859 is gradually subsiding, and the landlord and tenant are, after long and protracted struggles, becoming reconciled to the provisions of the Act. It is not at all politic to disturb the present state of peace and equanimity. Creation of new rights in the tenant will certainly be strongly and strenuously opposed by the landlord, and the sequel of the proposed measure would be setting one class against the other anew. The second question I would ask, is the Bill, as framed, calculated to ameliorate the condition of the ryots in any perceptible way. I must confess that I cannot answer this question even in the affirmative. The Bill simply attempts at conferring certain rights on the ryot, but it does not contemplate securing them to him. He is too often required to appear before court against his landlord, and it is more than certain that what may be

pastime to the one will be rain to the other. I intend to notice all these particulars as I proceed with the different sections of the Bill.

Section 17 is not easy to be understood. If the scope of the section be to declare that separation or amalgamation of lands and consequent decrease or increase of rent will not operate as a change of rent within the 20 years immediately preceding, there is not much to be said against it. If it means that mere separation from or amalgamation to a holding will not entitle a landlord to enhance his rent, it is objectionable.

Section 18 (a).—If it is a fact that the rent of a certain tenure has undergone two or more enhancements since the permanent settlement, though there is no special custom to that effect in the district, is it equitable to debar the landlord from claiming enhancement when the land is shewn capable of affording it?

Sections 14 to 20 confer on a certain class of ryots some privileges which will turn them into middlemen. They may prove as oppressive to their under-tenants as their landlords had been to them. It is nowise bettering the position of the actual cultivators. I do not see what may be the good of this policy of creating a middle class who will entail on the poor cultivator a double burden. The first landlord has secured certain profit at the time of letting his lands, and the new landlord, that is, the middleman, will not let his lands to the cultivators without keeping a good margin for himself.

Sections 21 to 24 award to the tenure-holder a high percentage of profit. His collection expenses are already taken into account, and he ought not to be allowed very much more than that. It is sufficient that he does not pay anything from his own pocket, and has ample means to keep himself and family in easy circumstances. The percentage recommended by the section is feared to provide him with means and leisure which he may be tempted to employ to the oppression of his ryots.

Section 28.—This is quite uncalled for. Section 32 provides for cases where the landlord refuses or neglects to register, so that Section 28 can be dispensed with. The less the court's interference the better.

Section 30.—A fee at least must be made payable for registration of a third person's name. The purchasers in this as well as in Section 29 are in the same predicament, and should, in equity, be made equally liable to a fee.

Sections 45 and 47.—A settled ryot, who had been cultivating or holding bromhotor or lakhraj lands in a village or estate for 11 years continuously, is seen in possession of some ryoti land pertaining to the village or estate during the last year which does not expire before the 2nd March 1883. Shall this man acquire occupancy right in that land? It is absurd that a man having had so small a concern with the land should be considered to have acquired a right in such land. Considering the present deplorable state of agriculture, it is desirable to confer on the ryots, that is, the actual cultivators, certain rights which may induce them, to hold to land, and introduce improvements in the system of cultivation. Though the idle habits of the tenant class do not warrant such a conclusion, still I would not grudge a trial, especially when my rulers would have it. But then I should here state a principle on which the landlords, in recognizing any rights in the tenant, are entitled to a certain premium. It is invariably the custom and practice everywhere that when the landlord transfers any of his own rights unto any of his tenants, or a third person, he gets something as consideration. Now under the proposed law some rights which but for the Act had been vested in the landlord, are wrested away from him and conferred on some third person. It is but meet and just that this third person should pay to his landlord something as premium. If, however, the tenant is unable to make any immediate payment, it should be made payable by instalments bearing interest not above one per cent. What I have said of occupancy rights is equally applicable to the tenure cases.

Section 50(e).—Occupancy rights should be made to accrue in respect of lands which a ryot would absolutely require for cultivation. When once the right has accrued to a person, he shall not be divested of it so long as he continues to cultivate the lands. If in any year he neglects to cultivate any portion of the lands, he loses his occupancy rights in that portion, provided that no physical disability has overtaken him during or before the year. Any settled ryot taking that portion for purposes of agriculture will have occupancy right in respect of it. Creation of a middle class should be very much discouraged. The less their number the more good to the cultivator.

Section 61.—Court interference without need. Serve the notice personally on the landlord, or if there be any reason to believe that the landlord will not recognize service of notice, it can be served by means of registered letters.

This and the four following sections deal with the right of pre-emption of the landlord in cases of sales, gift, or bequest. Much has been made of this provision as if something quite new and unheard-of is being secured to the landlord. But let us see what it really means. It simply means nothing more than this, that the landlord shall buy up a thing which originally belonged to him, but had been given away to a third person without getting his consent or giving him any consideration in return. All that I have said here and elsewhere respecting premiums and considerations applies only in cases of zemindars or actual proprietors. Tenure-holders are landlords only under the present Bill. But if tenure-holders are to be taken into account, the premium or consideration should be divided between him and his landlord according to the proportion of their rents.

Section 70.—Considering the variations in the gross produce and the value thereof, no table can be allowed to hold for more than three years.

Section 73 (c).—It would not be fair that the proprietor or the holder of a superior right

should equally share with his inferior the difference obtained. Tenure-holders as landlords are under this section entitled to enhancement when the prepared table of rates shews the ryots' rate to be below it, without being made liable to any such obligation under similar circumstances. Since the tenure-holder acquires his right without paying any consideration, it is equitable that he should share with landlord the profit obtained without his agency.

Section 75 (c).—The above remarks apply here equally well.

Section 78.—Suppose a rent enhanced a year or two before the proposed Act comes into force. If this enhanced rent is still less than the rate shewn in the table of rates prepared under the proposed law, shall not the landlord be entitled to enhancement, simply because 10 years have not elapsed since the rent was last time enhanced?

Section 93 (b).—Why the landlord is thus saddled with a compensation amount? He merely seeks to oust a tenant-at-will for his refusing to pay a just demand. If such a provision be allowed to prevail, no ryot will agree to pay the enhanced rent.

Section 96 (2).—The percentage is very high.

Section 100 (d).—It is desirable to have the following words added, *viz.*, the quantity and quality of the lands comprised in the holding. It may obviate many difficulties in a subsequent suit.

Section 101.—The landlord should be allowed a small fee for each statement furnished. Unless extra amlahs were kept, these businesses could not be rightly and punctually performed. (*a*) The quality and quantity of land in the holding.

Section 103 (a).—Mere belief should not be made the criterion for deposit. Where a tenant believes that his rents would not be accepted and receipt granted therefor; he should at least serve a notice on his landlord, say, by registered letter, that unless his rents were accepted within ten or fifteen days from the date of the notice, he would deposit the amount in the court.

Section 110.—There must be conclusive proof that there was not a reasonable or probable cause. Bearing in mind the strong predilections of courts in favour of the ryots, this section seems to be dangerous on the whole.

Section 128.—This section empowers an ordinary ryot to erect on his holding dwelling houses and suitable out-offices without the permission of his landlord. This is not just. The ordinary ryot has no sort of right in the soil, and the improvement does not in any way benefit the land. If he is ejected, he is entitled to compensation; but anyone stepping into his shoes and standing in no need of such an improvement would not take the holding at his rent. This is conferring too much privilege on an ordinary ryot. Improvements not absolutely necessary for the purposes of the tenancy should be made subject to the landlord's permission.

Section 133.—In the statement of Objects and Reasons the desirability of empowering a landlord to measure all lands in his estate, whether lakraj or otherwise, has been expressly stated. But the section seems to exclude lakraj lands from its operation. This is anomalous.

Section 135.—Some punishment must be inflicted on the obstructing tenant; else he would not be induced to desist.

Section 142.—The appointment of a manager is made dependent on certain conditions. I should recommend it to be made compulsory in all cases of co-sharers. It will bring infinite relief to the ryot, while it will materially benefit the landlord.

Section 167.—Landlords who collect their rents by means of agents, *i.e.*, naibs and gomastahs, should be exempted from any obligation to verify a plaint. The verification by the naib or gomastah well cognizant of the facts stated in the plaint in such cases and duly empowered on that behalf should be accepted. Though Section 189 provides something of the sort, the law is not explicit enough.

Section 168.—The procedure is feared to become too much dilatory. Every documentary evidence should be filed along with the application, and the deputation to distrain should be immediately ordered to issue. If the ryot has any objection, he can come in after the distraint, but before sale. Otherwise if he becomes apprised of any attempt at distraint, he will fail to take advantage of the delay by promptly gathering and hiding securely his crops in some safe place.

Section 195.—It is not stated anywhere in the Bill in what sort of cases the court should grant leave to file a written statement. It is desirable not to give to the court any discretion and to make the rule absolute. If, however, the court is satisfied that the defendant has just and reasonable cause of complaint, it may require him to deposit the amount claimed, together with the probable cost, before being allowed to file a written statement. When the register, record of rights, table of rates, receipts, and statements are required to come into play, no serious injustice may be feared in case the ryot is debarred from filing a written statement. If the case is decided against the defendant, the deposit shall be at once made over to the plaintiff, and thus an execution proceeding can be dispensed with.

In conclusion, I shall beg to notice that neither in the case of a tenure nor in that of occupancy right any provision is made in the Bill when more than one person succeeds to the tenure or the occupancy holding, and partition it among themselves. The landlords' sherista contains the name of the one man who was a tenure-holder. His successor in interest has been made liable to pay a fee, but when there are more than one successor, no provision is made as whether each and all shall be liable to a similar fee when they wish their names to be separately registered according to their respective shares.

Memorandum of Opinion on the new Tenancy Bill by RAI JADU NAUTH, ROY BAHADOOR, *dated 31st May 1883.*

This Bill being the outcome of a settled purpose on the part of the Government to ameliorate the condition of the ryots by improving their status, and taking away certain rights which the zemindars from the time of the permanent settlement understood to have belonged to them, it is needless to enter into any discussions or comment upon the principles of the Bill. I shall, therefore, address myself chiefly to some of the prominent changes in the relation between the landlords and tenants, and how they are likely to affect the interests of the party concerned.

The word *khamar* in this district is known to mean such lands only as are kept for storage of crops just before threshing, and it is not known in the sense the term is used in the Bill. Perhaps in former times zemindars used to compel ryots to store their crops in lands belonging to them as private lands, and did not allow them to take away the grains without paying the rents. Besides this, I am not aware of any zemindar or landholder, keeping any records or paper shewing the areas of khamar lands in their villages; it would therefore be not a matter of little difficulty to ascertain the area of khamar lands as distinct from the ryoti lands in the way proposed by the Bill; in fact, no distinction between khamar and ryoti lands had been observed since a very long time in our districts, and so many conflicting rights and interests have, during this long period, accrued to one party or the other, that, far from the executive authorities being able to ascertain this question, it would take the Civil Court a full generation to decide them.

Nothing has prevented the zemindars for this long time to convert into khamar or private lands any unoccupied ryoti land, nor was any claim set up by a ryot for lease of any land left vacant by a fellow-ryot; on the other hand, the zemindar has always let out lands of his villages without observing any distinction between khamar and ryoti lands. The zemindars of this district know of two kinds of land only, the *zami*, or lands held by tenants, and *lokshan*, or lands not held by any tenants. Under this latter description of lands is included all uncultivable, uncultivated jungle lands, village roads, lands the zemindar might retain for his own private use, as well as lands that were at one time leased out to tenants, but has since reverted to *lokshan* lands, having been deserted by the tenants. The well-known *utbandi* tenures of the Nuddea district are formed out of these *lokshan* lands. Now, the definition given in the Bill of *khamar* lands will not include all these descriptions of lands; consequently it is doubtful whether the *lokshan* lands of the zemindars will be called *khamar* or ryoti lands. The definition of *khamar* land, therefore, in my humble opinion, ought to be clearer and wider, so as to include all the so-called *lokshan* lands retained to be let out as the zemindar pleases.

Sections 15—20.—In suits for enhancement of rent, the present rule of 20 years' presumpton is, that a ryot must shew payment of uniform rent for a period of 20 years immediately preceding the time of the enhancement, whereas the new Bill proposes to introduce by allowing uniform payment of rent to be proved for *any* period of 20 years. Now, the effect of this change would be to give the ryot an undue advantage over the zemindars in *more* successfully contesting his just right of enhancing the rent, for it will be easier for the ryots to fabricate *dakhilas* so old as not to require of their being proved in law courts, and as those alleged to have signed them might not be alive, it will be impossible for zemindars to rebut the presumption either by witnesses or by *jumma-wasilbaki* papers, the latter being not always available in consequence of the frequent change of zemindars by sale, gift, or otherwise.

Section 14 enacts that tenures held at fixed rent since permanent settlement is not liable to enhancement; and section 18 provides for the enhancement of such tenures when not so held, but the changeableness of the rate of rent is to be proved by the landholders; a mere allegation that the rent is changeable will help little or nothing in getting the rate changed. The provision in Section 18, with regard to further proof in respect of the custom of the district, is vague in itself, and will naturally give rise to the question as to what the landholder should have to prove. This section may, further, tempt ordinary and other ryots to set up equal claims with the tenure-holders, described in Section 14, in the absence of pottahs and kubulyuts, the interchange of which, until very lately, was not much in practice. In this respect, therefore, the present law may be allowed to stand as it is.

In sub-section 3 of Section 21, the words "gross rents payable to him" are objectionable inasmuch as they may not include the rents of the lands which the tenure-holder holds for his own private use.

Section 25 makes all permanent tenures *saleable*, but no provision has been made for preventing from their being purchased by inimically-disposed rival zemindars. The principles underlying the right of pre-emption with regard to occupancy tenures should be the guide in cases of permanent tenures also, and the right of pre-emption ought to be given in these tenures.

With regard to occupancy rights, so much has been said and discussed, that it is unnecessary here to repeat the arguments advanced against the most objectionable sections of the Bill. I mean sections 45 and 47. It needs only be observed that the freedom of contract taken away by these and many other sections of the Bill is of essential necessity in all relations between the landholders and the tenants. The various advantages derivable from the land depend not only upon the soil, but upon numerous conditions of the soil, its situation, its drainage, its scenery, fertility, &c., &c., combining to complicate the question as to how to ascertain the value of the land for the purpose of settling the rent payable in respect of it. Upon a rough calculation, therefore, of any one of the numerous conditions—say, for instance, the gross produce—it will be simply an arbitrary measure to make any attempt to fix the rate of rent payable by the ryots.

The ryot to whom the land is to be let out is likely to prove the best judge of what would suit his convenience, and notwithstanding all his shortcomings—inferiority of intellect, an absence of education—the ryot is most sensibly alive to his interests, and well understands the advantages he derives in lieu of the rents he pays for the same. It would therefore not be unwise to leave to the ryots to enter into agreements in the way they choose; and any attempt to take away from them and the landlords the right of contracting legally (though out of law), would be inconsistent with the broad liberal policy of the present as well as of the past Governments. In discussing upon matters of the local self-government scheme, the Government has recognized the possibility of honest and intelligent votes being given by far a greater portion of the ordinary run of people, and upon the face of such recognition in respect of difficult matters of policy it will be quite inconsistent on the part of the Government to deny the possibility of a current appreciation by the ryots of the nature of the contracts they enter into in far easier relations with their landlords. The idea therefore to make the law imperative, and to prevent the ryots from contracting out of law, is not in harmony with the age and principles of Government.

Having made these observations in respect of some of the prominent changes, as they appear to me, from the stand-point of my own experience as a zemindar, I shall conclude this note with one word more. The agreement entered into between the zemindars on the one hand and Lord Cornwalis' Government on the other, is of the nature of a voidable contract. The zemindars understood themselves absolute proprietors of the soil in quite a different sense from that intended by the Government. Their conduct, and the way in which they have been dealing with their proprietary rights since the permanent settlement, are sufficient for my purpose to say that the zemindars did not for a moment consider that they were made *proprietors* in such limited sense of the term as explained by Mr. Ilbert. If from the rent literature of the time of the permanent settlement it appears that the weight of evidence is in favour of the contention that the Government has reserved the right of legislating in the manner in which it now exercises, I should possibly have no claim to be heard in what I have said upon some of the provisions of the new Bill. If that is so, I should rather say that it would rescind the permanent settlement altogether, and reconvert the zemindars to tehsildars, or convert him to a pensioner, for then we might look for peace in the land.

Dated Katdaha, the 12th May 1883.

From—Babu Bedhoo Bhoosun Bose,

To—The Officer in Charge of the Sub-division, Kooshtea.

With reference to your notice, dated the 2nd instant, I most respectfully submit to your information my views on Rent Bill embodied in the enclosure.

I further beg to state that Babu Bepin Behari Bose, to whom the same notice was also given, has been confined to bed from a severe attack of rheumatism since the month of January last.

Views on Rent Bill.

A certain portion of produce or of profit from land which its occupier pays to its owner for its use, is called rent.

A mouza, or a certain large area of land, whose name is entered into the Government land register, is called an estate.

The rent that is paid to the Government for an estate by its proprietor is called revenue.

A holding is a small piece of land, or is composed of several such pieces, for the use of which rent is paid.

The occupier of land who pays rent is called a tenant. When the tenant dwells in his own holding or in the village where that holding lies, he is called a khood kasta tenant.

The owner of land who receives rent is called a landlord.

So the term tenant includes all, from the actual cultivator or the occupier of the land to estate proprietor, in their capacity of paying rent. And the term landlord includes all the various proprietors of an estate, from the zemindar to *miadi* ijardar, and also all the various proprietors of a holding, from the mokraridar to the lowest korfadar, in their capacity of receiving rent.

Since the time the views of the Legislature in any Rent Bill appeared in any public print, the landlord begins to guard his interest; while the ignorance and the poverty of the tenant keep him back even from knowing what has been laid down for his good.

On the occasion of breaking out into a difference, the landlord, thinking himself as the paramount power, generally takes law into his hands, and continues to do so till his tenants are goaded to form a powerful combination. Then he begins to be paid in the same coins as he used to do them heretofore. Yet, he is not without hopes to crush them down if he succeeds to get some fellows to uphold his version in court, as he fails not to assail them on all the various sections and clauses of the Rent Law which he finds there are in his favour. This course, though slow, is sure and safest of all. But when he is unable to produce any evidence, he is sure to be deprived by tenants in combination of his just dues.

The tenant, on the other hand, during the time of his broil with his landlord, has the disadvantages of his field being neglected, and those of being advised and led either by an unscrupulous village scribbler, or by a wily mooktear, but neither of whom feels the least compunction to rob him right and left.

Again, when the landlords' myrmidons or the tenants' combination headmen become unscrupulous, the peaceful, though reluctant, are dragged into a strong compact to commit or aid perjury and other crimes by the threats of injuries to be inflicted to their property, persons, and family. These threats are turned into actions when the reluctant become resolute. The injuries thus brought on are rather augmented than mitigated by the present system of administration of justice, since the difficulties and the troubles that meet the injured in the way are :—

(1) The want of money for the stamps or court-fees required.
(2) The incapability of procuring the required evidence when it is under the sole control of their influential opponent, who can, at all risks, dare say anything in open court against a tyrant landlord, or a ruffian tenant, to bring him into grief.
(3) The loss of time and such moneys as are not allowed by law during the various stages of law-suit, not only in the court of first instance, but in those two of the appellate ones. This loss is so enormous that it entices the affluent to adopt the conducting of bad suits as one of the means to ruin their antagonist.
(4) The failure of justice from absence of such evidence as the court requires.
(5) The want of means to pay the decreed costs consequent on such a failure.
(6) The execution of costs decree through all its processes, which add to the decreed sum an amount equal to several times of its actual value.
(7) Multiplication of crimes when one is let off unconvicted. The Government, having arranged to meet the expenses of the administration with proceeds from stamps or court-fees, gains by these quarrels and loses by their absence. But quite contrary should be the case. India being an agricultural country, the land disputes which have reduced it to wretchedness and penury must at once be got rid of, and measures of peace and prosperity are to be admitted in their stead to make the Government powerful as any under the sun.

To remove the grievances alluded to, and bring without loss to any all the several interests in land, from the Government to the cultivator, into a harmonious whole, should be the sole object of the new Rent Bill if any real reform is intended by it. To replace a few obnoxious clauses in the existing Rent Laws by some salutory ones without any radical change in the administration would merely contribute to fan the dying embers of the litigation, enhance the stamp revenue, and make the court's file cumbrous without the desired effect.

The points that require reforms in the Rent Bill are :—

(1) To uphold the contracts between the landlord and tenant.

Whether written, verbal, or implied, the valid ones are to be respected, and one-sided ones rejected, and thus not to allow either the landlord or the tenant to encroach on the just rights and privileges of the other under the plea of time, &c. As for example, it is not reasonable to create an occupancy right to a temporarily settled or utbandi land on occupying it for a certain period of time, or to oust a resident or a khood kasta tenant if he fails to complete his that period; and also to permit the tenant to appropriate the wood of the fruit trees which were in existence before he was admitted into his holding, or to deprive him totally of it when the trees are planted by himself.

(2) To develop the resources of land.

This is the hinge around which the incomes of all its interested parties turn. The work is now left to the cultivator whose poverty and ignorance render him incapable to bestow on it any improvement whatever. With a view to aid him in the matter the Government, as the paramount landlord, should make an advance to the intermediate ones, to be refunded at the close of the year with interest at the rate not exceeding 6 per cent. per annum. The intermediate ones should in their turn advance the amount to the cultivator, to be refunded after each harvest with interest at the rate not exceeding 12 per cent. per annum. Besides this the cultivator should be permitted to secure any kind of tenure for the improvement of his fields on payment of proper costs. These and similar other deeds towards the development of the soil should entitle the landlord to the enhancement of his tenant's rent.

(3) To adjust rent.

The average of ten years' net income from each sort of land in a holding is to be ascertained. Of such income (that is, income after deducting from the gross produce all sorts of expenses except the Government revenue) (½) half is due to the proprietor of the estate and (⅜) three-eighths in equal portions to the intermediate tenant landlords as the rent to be annually paid for ten years at the least, and the remaining (⅛) one-eighth to the cultivator at his profit. The reasons for such divisions are, that the estate proprietor has to pay the Government revenue from his half (which is equal to nearly (¼) one-fourth of the gross produce), and the remainder he has to share with the others of his class according to their mutual contract, as the tenant landlords are to divide among themselves their (⅜) three-eighths. Whereas the cultivator, his (⅛) one-eighth none to part with; besides he gets all the expenses of his cultivation, including his own labour which would cover, at some crops, (½) half and, at others, more than half of the gross produce. So where the tenant holds his land direct from the estate proprietor, and cultivates himself, he gets (½) half of the net income and the whole expense which equals sometimes (¾) three-fourths, sometimes more than that of the gross produce. The rent should be left as it is if it is not enhanced by the above rule. An annual return of the average produce and expense of each crop in a village prepared by its panchayets, tenants, and landlord together; in case of difference by the canoongoe or by the sub-deputy, and tested by the sub-divisional officer, if preserved in a sub-divisional office, would help the adjustment of rent without difficulty.

According to the principle laid down, above (¼) one-fourth of the wood of fruit trees planted by the tenant is due to the landlord unless the latter relinquishes his right by a tenure.

4. To ascertain the time of paying rents.

Rent should be due after each harvest. But the amount should never exceed what might be claimed by that time according to the prevailing instalment. A corresponding grace should be conferred on the landlords with respect to their payment of Government revenue as is done on the occasion of drought and famine.

5. To facilitate the collection of rent.

In every village the panchayet should prepare a list of undisputed rents in the presence of the landlords and the tenants. A copy of such list should be submitted to the sub-divisional officer. The tenant should not take the proceeds of his fields till his undisputed rent, cesses, and rent decree and advance, if any, are paid in cash or kind. But if the tenant thinks it convenient, he may with the knowledge of the punchayet and landlord keep for a month at the most a quantity of the proceeds deposited with a third party adequate to meet the dues from him. If from want of adequate productions any sum remains unsatisfied, it should be realized from his other properties in the following year by legal processes.

6. To protect a tenant from the Small Cause Court decree.

The money-lender takes advantage of his debtor's indigence to extort from him an exorbitant interest, generally amounting to 37½ per cent. per annum. Therefore the decree in question should neither affect his person nor his holding, but the yields of his lands that remain after the payment of his rent, cesses, or advance if any, and also the residue of the sale money of his holding when it is sold on a rent decree.

7. To make the tenant's right transferable.

If he be protected from the Small Cause Court decree as stated above, his right should be transferable as he is understood to spare neither labour nor money to improve his land. The right of pre-emption should lie with the landlord as any transfer without his consent is not the general practice.

8. To confer on the tenant the blessings of law and good government.

The existing obstacles are :—

1. The court-fees.
2. The other heavy expenses and troubles attending a case in its different stages of progress from the court of first instance up to the final court of appeal.
3. The absence from the fields during the enormous length of time generally occupied by a case till its final decision.

If a cess imposed on those who are likely to be benefitted by law takes the place of court-fees to maintain the machinery of administration, the first obstacle might be removed without any loss to Government. This cess will likewise decrease in proportion as the fines imposed on the aggressors in the shape of costs will increase. If two copies of plaints are made on plain paper, and one of them is submitted to the Judge by post, registered, and another to him by the police through the panchayets. If summonses and all other processes of law are served through the police by the panchayets and chowkidars. If the services of pleaders are utilized as paid arbiters.

If those among them nominated by the contending parties are allowed to settle all of their disputes on the spot. If in difficult and important cases the arbitration is presided over by the Judge himself. If private investigation is held before taking the evidence. If the witnesses are made to account for their disagreement and coincide their version with the natural sequences of fact. If in case of difference among the arbiters a reference with due remarks is made to the courts composed of the judicial officers of the sub-division. If intricate questions of law are referred to a similar court in the district, and on their difference to the Honourable High Court. If fine in the shape of cost is imposed on the aggressor to an amount adequate to deter him from further interference. And if protections from criminal aggression are similarly bestowed on by the superintendence of the efficient police and the supervision of the sub-divisional officer.

The second and third obstacles will be removed, and not only the favoured few, but all the people of the country will enjoy the benefits of law and good government, and advance under peace towards wealth and prosperity which will bring on all the improvements in the country, as well as make the Government as firm and powerful as ever.

Dated Kishnagur, the 20th May 1883.

From—BABU PRASANNA CHUNDER ROY,

To—BABU RAKHAL DASS MUKERJEE, Deputy Collector of Chooadangah.

In compliance with your memorandum No. 60, dated the 18th April 1883, endorsed on a copy of the letter No. 351A, dated the 29th March 1883, from the Secretary to the Board of Revenue, to the Commissioner of the Presidency Division, I have the honour to submit herewith a few remarks on the Bengal Tenancy Bill.

It is stated in the Statement of Objects and Reasons that when the permanent settlement was effected, Government did not part with its "right as sovereigns of being the guardians and protectors of every class of persons living under it," but reserved the power of enacting "regulations for the protection and welfare of the dependent talookdars, ryots, and other cultivators of the soil," and that the zemindars were called upon to "shew implicit obedience to all regulations which had been or might be prescribed by Government concerning the rents

of the ryots and the collections from under-tenants and agents of every description, as well as from all other persons whatever." It is accordingly argued that apart from the inherent right of Government "to regulate from time to time as occasion might require for the protection of the inferior occupants of the soil," these provisions of the permanent settlement regulations also empower it to enact laws in that direction. The first question that arises is whether Government has got this power. It would be presumptuous on my part to pass any opinion definitely on so grave a question. But it seems to my humble judgment that the proposition that Government has an unlimited power to pass any law for fixing the rates of rent payable by a ryot, or for defining his status can hardly be defended. Supposing that the permanent settlement of an estate was effected after taking into calculation a particular rate of rent then payable by the ryots, will the Government be justified in fixing a *lower* rate of rent, however necessary it may be from an administrative point of view, without either making a proportional reduction in the revenue assessed on the estate, or giving compensation to the owner thereof? The same remark would apply if any alteration in the law is made by which the ryots' status would be different from what it was at the time of the permanent settlement. I am perfectly aware that the proposed law does not contemplate any such alteration at all, but nevertheless the cases supposed shew that it would be unjust to claim such a right in every case. If the state of things that existed in 1793 could be accurately ascertained at the present time, and customs now prevailing in agricultural communities were in most cases not at variance with the same, any legislation based thereon could not properly be objected to by the zemindars. But when this cannot be done, and a law is proposed the provisions of which are at variance with the *existing* state of things, and which are alleged to be mainly based on the general principles of equity that *should* govern the lands of an agricultural population, the zemindars, I humbly submit, have every right to complain when from some cause or other as certain state of things has been allowed to exist for nearly a century, and thousands and thousands of estates have changed hands on the belief that it would not be disturbed in any way, and when the passing of the Acts of 1859 and 1869 could not but strengthen this belief, it would not be equitable to the zemindars to pass a law entirely opposed to the same. The changes proposed are so great that in many cases they would surprise the ryots equally with their landlords. The provision regarding the acquiring of a right of occupancy by a settled ryot by his "holding as a ryot" a piece of ryoti land for even a single day, and which he would be entitled to dispose of whenever he wishes to do so, and some of the incidents of this right, will be considered startling to both parties.

It would appear from the above that, even if the Government has the right, under old regulations, to make such laws, which is a doubtful point, it would be on no account equitable to do so under the existing circumstances. On the other hand, however, the condition of the agricultural population of Bengal should be improved. That a considerable portion of the ryots is deeply involved in debt and is not in a position to withstand the difficulties brought about by a season of scarcity, withal extraneous help, is a fact that cannot be denied, and everybody ought to be thankful to Government in its attempt to improve their condition, either by reducing the incidence of taxation on them, or by resorting to other means at its disposal. But this improvement of their condition should not be effected at the expense of the zemindars *alone*. I would, in pursuance of the suggestions already made on the subject, humbly suggest, that if all the interests in land above those of a right of occupancy are bought up at their market value by Government, and then a ryotwari settlement be made on conditions calculated to improve the status of the ryots, it would be desirable in every way and no one can reasonably object to the adoption of such a course; nor would such a plan, in my humble judgment, be attended with any great difficulty. On an average the capital which the Government will have to empty for this purpose would bring in a profit of about 5 to 5½ per cent. per annum, and if the credit of Government be taken as equivalent to 4 or even 4½ per cent., there would be left a reasonable margin to justify the adoption of this course. There is another point of view from which this question may be considered. It has been often asserted that the permanent settlement was a great mistake of the Government of 1793, and that, had it not been for this, the financial condition of the Indian empire at the present day would have been far different. If the permanent settlement has really produced any injurious effect on the financial condition of the empire, the adoption of the suggestion referred to above will prevent the recurrence of the evil in future. It is an undeniable fact that the value of, and profit from, land will increase in course of time, and it would then be optional with Government either to allow the ryot to reap the full benefit of this increase, or take a portion thereof to improve the finances of the country. If the former course be adopted, it will certainly have the effect of improving the condition of the agricultural population of Bengal to a great extent. Besides, there would be no difficulty or clashing of interests at all in enacting laws that are calculated to raise his status, and enable him to withstand the effects of bad seasons.

Although a ryotwari settlement is advocated above, this is not incompatible with the arrangement for making collections of rents through farmers. If Government feels any difficulty in organizing a machinery for making the collections, the present landed proprietors may be utilized in doing the same by a farming system.

I shall now proceed to make a few remarks with regard to some of the sections of the Bill.

In section 3, it is provided that a person who holds any land for even horticultural purposes is to be deemed to hold it as a ryot. This is an unnecessary innovation. Persons who engage themselves in horticultural pursuits are not generally of the class that is supposed to be in need of special protection at the hands of the Legislature. The incidents of

horticultural holding should not be the same as those of an agricultural one. Separate provisions should be made for the same in the Bill.

Section 5.—Khamar land is defined to be the private land of the proprietor. This definition is not explicit enough, and, if not altered, will give rise to a great deal of litigation. It ought to be expressly provided that khas possession should not be considered as essential in shewing that a land is khamar. In Lower Bengal generally, and in this district specially, all trace of the khamar lands of an estate is gone, and it would indeed be a matter of great difficulty to make out what lands are to be considered as such. In this section the word "proprietor" only is used. But as it is evident that the Legislature does not intend to deprive the putnidars and others of that class of their rights to these lands, the words "tenure-holders" should be added. It would also be better to provide expressly as to how the new-formed chur lands are to be classified.

The provision about making a survey of the khamar lands is well calculated to prevent a great deal of unnecessary litigation.

In Section 15, as the words stand, they imply *any* twenty years before the institution of the suit. But a particular time should be fixed, immediately before which the ryot will have to shew that he held for 20 years continuously at a uniform rate of rent. There is one thing to be noticed in connection with this section. Auction-purchasers are placed at a very great disadvantage by the operation of this clause. They have not generally in their possession the collection papers of their property, by which they can shew either that the rent was different from what is stated by the ryot at some time prior to the institution of the suit, or that the tenure came into existence at a time subsequent to the permanent settlement. This difficulty was overlooked when Act X of 1859 was passed. But when the entire law is going to be remodelled, this opportunity should be availed of to remove the great hardship the auction-purchasers labour under.

Section 18 (b).—This clause restricts the right of the landlord to enhance the rent; only when the tenure-holder has obtained *reduction* of rent, and if the sections are allowed to stand as they are, it will be a matter of doubt whether the landlords will have a right to obtain enhanced rent in cases in which he once enhanced the rent of a tenure-holder. This clause apparently seems to be at variance with the provisions of Section 14. As I believe no alteration of the law on this subject is contemplated, it ought to be clearly provided that, when a tenure has been held from the time of the permanent settlement, any change of rent, either in the way of enhancement, or abatement thereof, would entitle the landlord to sue for enhancement.

Section 44.—When a right of occupancy has been acquired by any particular *custom*, all the incidents attached to that right by the Tenancy Bill should not be made applicable to the right thus acquired. If the custom gives birth to the right, it seems only reasonable that it should also regulate its incidents.

Section 45.—It is not clear whether holding as a ryot any ryoti land includes or excludes the occupation of any land under a ryot. This should be made clear to prevent unnecessary litigation.

Section 47.—It has been already remarked that this provision would appear startling both to the landlord and to the tenant. If a proprietor wants to keep a piece of ryoti land in his khas possession, it would preclude him from leasing it out to any resident ryot even when he may not require it. There are landlords, such as indigo planters and others, who keep a large portion of the ryoti lands of a village in what is called *nijabad;* but they lease them out at times to tenants for short periods when they do not require them. If this Bill be passed into law, they will be, as a rule, precluded from leasing them out to resident ryots, for fear least they may not get them back when required. The landlord in such cases, as also in every other case in which he may have a wish to occupy any land himself from time to time, will always be on the look-out for a farmer, or other person who will not acquire a right of occupancy by remaining in possession for a temporary period, and the resident ryot will, as a rule, be deprived of the advantage of cultivating such lands. Thus, besides being unjust to the zemindars, the law would prove detrimental to the interests of both parties. In my humble opinion, any such wholesale alteration in the law is not needed to raise the status of the agricultural population. It will create a very bad feeling between landlords and tenants, and in the struggle to prevent a right of occupancy from accruing on one side, and to acquire that right on the other, both parties will suffer. It is not so much the law that requires 12 years holding as necessary for the acquisition of a right of occupancy that has produced any evil effect, it is the uncertainty about the incidents of that right and of the law for enhancement of rents that has produced the evil consequences complained of. Had attempts been made at the time of the passing of Act X of 1859, as are being made now, to *define clearly* what the privileges of the occupancy tenants would be, and under what conditions and circumstances their rents could be enhanced, this question about the further extension of the right of occupancy would not have been considered so very important at present. I believe both parties were satisfied with the law on that subject, and as far as I am aware, of its operation as far as conferring a right to hold for ever at a fair rental has not been productive of any evil consequences. The ryots never wanted to have right of occupancy conferred on them in the manner provided in this section. Such an idea never had any place in their mind. I humbly beg to submit that instead of introducing such a fundamental change in the existing law, it would be better if the incidents of the rights of occupancy were clearly defined and the law made clear and definite on various other points.

Sections 52 to 55 are certainly calculated to counteract the evil effects which an unrestricted right of sale would have otherwise produced. But those landlords in whose estate-

occupancy rights are not now transferable by custom will still have a right to complain that the ryots are allowed to sell their holdings and appropriate the proceeds of the sale to themselves; whereas under the existing law, if they did not require the holdings themselves, they had to relinquish them in their landlord's favour. To prevent all grounds of complaint it would be better if a record of the prevailing custom in connection with this matter in each local area were prepared by the revenue authorities, and full effect given to these sections as also to Section 50 (clause *f*) only in places where the right of transfer of the occupancy right is already recognized. In places where this custom does not prevail now, the same rights might be conferred on the condition that the landlord would be entitled to a certain percentage of the value of the holding whenever a transfer takes place, and this should be given him whether he wants to buy the holding himself or not.

Section 56.—When the landlord has paid a fair price for the holding he has bought, it would not be desirable to deprive him of the privileges which a third person would have enjoyed. He ought to be placed on the same footing with the other purchasers. If this sectioned be allowed to stand, it will indirectly nullify the operation of the preceding sections; for no landlord will give any price for a holding which he cannot, as a rule, keep in his *khas* possession, and which when leased out to a resident ryot, even for a short time, will go out of his lands for ever; nor would he be entitled to any higher rate of rent than what he could have claimed prior to his purchase. In many cases, the price that he would have to pay would be a total loss to him.

Section 59.—In my humble opinion it will be quite sufficient if the revenue officer's duty be confined simply to see that the ryot acts as a free agent, or that undue advantage is not taken of his position. If he is allowed to interfere further, it will injuriously affect the interests of both landlords and tenants A ryot may be inclined to pay a slightly higher rate of rent to secure a particular piece of land, and the arrangement may be of great advantage to him, but if such a provision is made in the Rent Law, he might be deprived of this advantage.

The provisions regarding the preparation of a table of rates and so forth will prove highly beneficial to both parties, and will have the effect of preventing unnecessary and prolonged litigation between them.

I am very sorry that there is no time for me to make whatever remarks I had to make in some of the remaining sections of the Bill. This letter containing an expression of my opinion ought to have been sent long ago; but owing to circumstances over which I had no control, I could not send it earlier, and I hope you will be kind enough to excuse me for the delay.

No. 307.

Opinion of BABOO NUFFER CHUNDER PAL CHOWDHURY, *on the Bengal Tenancy Bill.*

I have been requested to give my opinion on the Bengal Tenancy Bill. The subject is so very wide, comprehensive, and affects so vast a class of our country, that, considering the responsibility which rests upon anybody, one would shrink to give any opinion within so short a time; but as there is no alternative, to lay down a few remarks which, though not a complete review of the Bill, will, I hope, render some important suggestions from the landlords' and tenants' point of view.

2. The present Bengal Tenancy Bill if enacted into law is of no benefit, but on the contrary a loss to the country. The landlords complained that the machinery of the Civil Courts was not sufficiently effective to enable them to realize their rents in time to pay the Government revenue, and that either the provisions of the Rent Law were too strict, or the construction which the courts have put upon them too narrow, to enable them to enhance the rent of their ryots as readily and as largely as the Legislature had intended. The complaints of the ryots were not so well defined. They appear to have been brought to the notice of the Government not by the ryots themselves, but for the most parts by executive officers whose duty it was to quell the disturbances which arose from time to time in the agricultural districts, and to enquire into the causes which led to them. The realization of abwabs and illegal cesses, illegal attempts to enhance rent, abuse of power, refusal to give proper receipts, are all that was brought to the notice of Government by these executive officers. This Bill, although introduced under the disguise of affording relief to both parties, virtually relieves none from the sufferings they are undergoing, and though it affords uncalled for privileges (the want of which ryots neither asked, felt nor dreamt of) to the ryots at the cost of the landlords, yet in important cases it gives no material help to any class when landholders are losing greater portion of their privileges and long-enjoyed just, and fair rights. Now to begin with the contents of the Bill. According to Section 5 khamar land means land situated elsewhere than in Behar which a proprietor has held whether under the name of khamar, nij-jote, sir, or otherwise, as his private land for 12 years before the commencement of this Act. All lands (accruing to Section 6) which is not khamar land of same estate shall be deemed to be ryoti land until the contrary is proved. It is not difficult to say from these definitions under what class the utbundi lands of the districts of Nuddea, Moorshedabad, Jessore, &c., should be included. It is evident that under Section 6 utbundi lands are ryoti lands. The landholders have all along enjoyed the privilege of possessing and holding utbundi lands as their own, improved these at their own cost, settled with the ryots to their mutual advantage, and profited largely, nay extensively, without injuring the ryots to the least. Now by a mere stroke of pen from the authority they are going to lose almost all the rights and privileges which they have enjoyed since time immemorial, and which enjoyment was loss to nobody, but a source of profit

to the landholders; nor can there be assigned any reason why the landlords will be deprived of their long enjoyed, just, and fair rights. I would therefore strongly protest against the enactment of these two sections, or even if these two sections are allowed to enact, a special clause should be inserted for the utbundi lands which is found nowhere else, but in Nuddea, and partly in Jessore and Moorshedabad.

3. Again, if we consider Sections 45 and 47 along with the above two sections, we find almost all the ryots will have a right of occupancy the moment they enter to cultivate the utbundi lands, for by Section 45 any person who for a period of 12 years, whether before or after the commencement of this Act, has continuously held as a ryot ryoti land situate in any village or estate, shall, notwithstanding any contract to the contray, and though the land so held by him at different times during that period may have been different, be deemed to have become, on the expiration of that period, a settled ryot of that village or estate, and by Section 47 every settled ryot of a village holding after the 2nd day of March 1883 as a ryot any ryoti land comprised in that village or estate shall, notwithstanding any contract to the contrary, be deemed to acquire or have acquired in that land a right of occupancy under the law for the time being in force. But what advantage do the ryots derive from this? Is it the case that ryots do not get lands when they want to cultivate? Do the landholders reserve utbundi lands for their own private use, and refuse the ryots when they want? Then what is the use of depriving the landlords of their just rights and privileges, the deprival of which will make them loser to no small an extent. Furthermore, I should beg to state that not only the landholders will suffer if these sections are enacted into law, but the agricultural improvement of the country will to a great extent be restrained. It is the landholders and not the ryots who are to look after the agricultural improvements of the country. If landholders are not allowed the privilege of utilizing the utbundi lands, there will be no equal distribution of land among the ryots. Some of the ryots will hold to no useful purpose, while others will be deprived to the disadvantage of the country. The landlord is empowered to certain improvement, yet in the majority of cases he is quite dependent on the ryot; for instance, a piece of land which a settled ryot holds for a month or two for cultiviting rice is required by another for making it a homestead or orchard, then the value of the land will increase, and the country will derive a greater benefit in case the land is allowed to be improved as required.

4. *Section 15 of the Bill is the Section 4 of Act X of 1859.*—The presumption of 20 years' payment of rent before the institution of a suit for enhancing rent was then more important than it is now. During the last 20 or 25 years, ryots have understood their rights, and I think, if the force of this presumption is to continue at all, it should be 20 years before 1859 and down to the time of the institution of the suit. Section 23 limits the enhancement of rent; when the rent of a tenure-holder is liable to enhancement, the enhanced rent fixed under Section 21 shall not be more than double the rent previously payable. It is difficult to say how far this is fair and equitable. The Legislature, Section 21, (1) fully explains his views when he says:—"When the rent of a tenure-holder is liable to enhancement, it may, subject to any contract between the parties, be enhanced up to the limit of the customary rate payable by persons holding similar tenures in the vicinity." Again in Section 21, (2) when no such customary rate exists, it may, subject as aforesaid, be enhanced up to such limit as the court thinks fair and equitable. By this what are we to understand? When the rent of a tenure enhanced according to the customary rate payable by persons holding similar tenures in the vicinity, or according to what is fair and equitable, or according to both, as the court thinks fit, exceeds double the rent previously payable, will the court decide according to the customary rate and what is fair and equitable; or will the court decide, according to Section 22, *i.e.*, not to exceed double the rent previously payable? Instances of these are not of rare occurrence; so it will not affect the landlord to a small extent. Is it right that the landlords will be deprived of what is fair and equitable? Is it the intention to be kind to the ryots at the cost of the landlords who should be deprived of what is just and right and equitable and fair? I need not go further to shew the unjustness of such an arbitrary rule. Section 22 of the Bill should, in my humble opinion, be struck out of the Bill.

5. About the transferability of occupancy rights, Section 50, clause (6), gives the right of transfer of occupancy right. There is not a rule more detrimental to the interests of both landlords and ryots than this one. On a cursory view it may appear that by empowering the ryots to transfer their occupancy right the Legislature puts some value on such holdings, but if we go deeper we find that such a power not only deprives the ryot of his means of subsistence, brings him and his whole family to ruin, but also places the landlord in a precarious position, often to run into disputes with a class whom he fears. As a general rule the ryots never wish to dispose of their holdings but to cultivate it and thereby maintain themselves and their families; they are never speculators, so nothing but extreme pressure and dire necessity will oblige them to part with their holdings; and is it at all likely that *bonâ fide* ryots—the poor cultivators of the soil—will be able to purchase these occupancy rights? The peasantry as a class, and specially of this district of Nuddea, are heavily involved in debt, and if this Bill is enacted into law, will the mahajans allow chances of this kind to slip through their fingers?

The consequence has been already pointed out by many of the officers who have been consulted upon the Bill, and I am sure if it passes into law, the mahajans and speculators of lands will soon be paying up all the occupancy rights, and what will then be the condition of the actual cultivators of the soil? They will be virtually robbed by the mahajans who have no position or character to lose, who have had little or no education, and who would buy up these rights for the very purpose of securing the last piece out of the cultivating classes. By

setting a value on their properties, will it not be ruining them? I think 75 per cent. of the cultivating class of this district are involved in debt. If opportunity be given to the mahajans and other creditors, will they not exert their most to realize their dues by buying up the holdings of their debtors which they consider and really is the best of all their movable and immovable properties? From my practical experience of 15 years I am in a position to say that the mahajans never look after the interest of the ryots; whatever good they seldom do to the ryots are always on account of their own interest, and if this right of transfer is allowed by law, then within a short time greater portion of the lands now occupied and enjoyed by the ryots will go into the hands of mahajans and other land-jobbers. So much for the ryots. About the landlords, they are going to lose the right of settling the utbundi lands according to their mutual advantage, which is always a source of increasing their income without putting their ryots to the least inconvenience. Secondly, they will have to deal with a class of people with whom they are not acquainted, with regard to whom they have not cherished a good feeling, as they have done with their ryots since the time when they first became landlords; and what more, both parties being on the same footing, and there existing no good feeling between them, as is generally the case, there will be no end or troubles. For these reasons I am of opinion that this section if passed into law will not only be cruelly unjust to the landlords, but will operate most injuriously on the very class which it is intended specially to benefit.

6. Section 59 (2) should be omitted or at least that part of it which deals arbitrarily. It is not easy to understand why the rent if enhanced more than 6 annas per rupee fairly and equitably and with the consent of the ryot will not be approved or registered by a revenue officer. What is just and fair should have effect, and nothing else.

7. Section 60 should also be omitted. It increases litigation. It is beyond the power of any reasonable man to understand why a suit for enhancement should be instituted, and both parties harassed and made to suffer when the ryot agrees of his own accord and at his own will to pay an enhanced rent of more than 6 annas per rupee which is a just and fair and equitable demand of his landlord.

Section 76 is also objectionable for the reasons stated in paragraph No. 7.

Section 93 (*b*) runs as follows:—"A further sum as compensation for disturbance, equal to ten times the yearly increase of rent demanded." The landlord institutes a suit of enhancement only when the ryot does not agree to pay his demand. The court in passing a decree consider the fairness of the claim of the landlord, and if satisfied with the evidence of the plaintiff issues order for ejectment. From this it is clear that the landlord's claim is right and just, and he is entitled to what he claims; on the other hand, the ryot wilfully neglects to appear in the court, or appearing before the court, unjustly and unfairly, and perhaps with some wicked intention, refuses to pay enhanced rent. Is this equity, that the landlord to get his just dues should pay ten times, or what he should have received as his own year by year from a time long anterior to what he claims? It can fairly be said that the disturbance is caused not by the landlord, but by the ryot; for who cannot claim his just dues? And such claimant can never be a disturber, but he who refuses to pay what is justly due to the claimant. So this penalty equitably cannot be imposed upon the landlord. If it is argued that the landlord is going to get possession of the holding for which he can easily pay ten times the yearly increase of the rent demanded, I must say it is a mistake: the landlord is seldom a gainer by getting khas possession of the holding; and if, for argument's sake, it is admitted that he may be a gainer, even then why the landlord will be made liable for ten times the yearly increase when he claims his just dues, and the ryot loses his holding through his own fault or wickedness. I think every reasonable and unbiassed person will object to the passing of this section into law.

8. *Section 140.*—There is one difficulty to be met with in this section. When a tenant forsakes his holding, and the landlord cannot enter into and settle the land for a year, how is the landlord to get rent for that year? It is true that the ryot will be liable for the rent, but it is not an easy thing to realize from him when he is not in his village or estate. I think not even 10 per cent. of such rent is ever realized: I would therefore propose that the section may be read as follows.

9. Any tenant of a holding which is not transferable, who leaves his holding uncultivated, *but does not leave his dwelling-house*, and the rent of the holding unpaid for a period of one year, shall, at the expiration of that period, be deemed to have surrendered the holding.

I am sorry that the time allowed enables me not to go minutely on the Bengal Tenancy Bill; however, I think, the important points have been touched, and I think an impartial reader will be astonished at the partiality of the Bill: it is all for the ryots and nothing for the zemindars; not even the slightest facility is given for the settlement and realization of rents, although this Bill originated, as noted above, at the request of the landlords. I think this Bill, if passed into law, will effect a redistribution of property on the communistic principle, for the ryots are to be raised to the status of co-partner, and the zemindars reduced to the position of only one-fifth shareholders in the estate, though their responsibilities as owner will remain the same. It is not for me to contend against the modern interpretation of the rules of the Permanent Settlement, but I think I have the privilege to say that for nearly a century successive governments and legislatures and courts of justice decided according to its dictionary meaning, and, depending upon their solemn assurance, almost all the zemindars of the present day invested their capital on land. Now, I would ask if it would not be extremely hard and unjust to the zemindars of the present day, who have laid out large sums of money in the purchase of landed property, which they have hitherto been led to believe their entire property, to be told that they are only one-fifth shareholders in the estate, and that too under certain

conditions and limitations. The zemindars of the present day (for the number of zemindars by purchase afterwards is not even one in 100) have actual *boná fide* and under an honest conviction, in which they have been confirmed by the highest authority, laid out their entire property in the purchase of soil, and now to deprive them by a single stroke of the pen without any compensation of rights which rightly they have been permitted to enjoy for ninety years or upwards—the longest period for the *accrual of a prescriptive* right being only 60 years—would, in my opinion, be little short of confiscation; and now I would further question, for whose benefit are the zemindars' interests being sacrificed? The actual cultivators of the soil hardly gain much under the present Bill, but it is the mahajans, the jotedars, the land jobbers, and the middle-class men who will be most benefited, or, in other words, a class of petty landowners is to be raised in the room of large zemindars. Is this a wise policy? I believe it has been practically proved, and an accepted doctrine, that the big landholders are the most lenient, and that it is the petty landowners who have the greatest temptation to press hard upon their tenancy, and besides the country is expected to derive greater benefit from big landholders than from petty landowners.

Under these circumstances I am strongly against the Bengal Tenancy Bill, and consider it to be my duty to protest earnestly against the encroachment of our just rights and interests, and to exert by all lawful means to avert the threatened blow.

Dated Sindooree, 9th May 1883.

From—W. Shirreff, Esq.,

To—Baboo Rakhal Dass Mookerjee, Deputy Collector, Chooadangah.

I have the honour to acknowledge receipt of your communication No. 58 of the 18th April, asking me for the expression of my opinion on the proposed Bengal Tenancy Bill. I have gone over the proposed Bill as published in the *Calcutta Gazette* of the 7th March last, and looking at it from the landlord's point of view, I don't approve of it at all. The one great grievance that the landlords had to complain of was the difficulty of getting in their rents speedily through the courts, but I do not see that the new Bill gives any facilities in that way. It takes away to a very great extent the rights of the landlords as hitherto possessed by them, and leaves them mere rent collectors for the Government, with all the responsibility of having to pay up the Government rents on the appointed "Lot" day, as formerly.

It seems to me be a most complicated Act, and that there will be considerable difficulty in working it. I believe it will lead to an immense amount of fresh litigation, and though it seeks to benefit the ryots at the expense of the landlords, yet the real people who will benefit by it will be the mooktears and pleaders about the Moonsiff's courts; while the ryots will impoverish themselves by litigation, and a bad feeling will be established between them and their landlords, which will go far to undo any good they might have got by this new measure.

I have to apologize for not having replied to your communication sooner, but I have been so busy attending to our indigo-sowing, at this season that I have not had time to do so earlier.

No. 328G, dated Berhampore, 18th May 1883.

From—Herbert Mosley, Esq., Collector of Moorshedabad,

To—The Commissioner of the Presidency Division.

With reference to your circular No. 9R.-L., dated the 24th ultimo, I have the honour to inform you that in my opinion the new Rent Bill goes much too far, and will result in difficulties to zemindars which may have a prejudicial effect on the Government revenue.

2. Generally the effect left on my mind after reading the Bill is that it has been drawn up for the purpose of supporting an ignorant and easily deluded peasantry against zemindars who are always trying to get the better of them. In some parts of the country it may be that the ryot is generally unable to look after himself, but this is certainly not the case everywhere. In this district, as in many others, the zemindars generally have by no means the best of it, and little more is wanted than a much cheaper and very much more expeditious mode of deciding suits than exists at present.

3. I proceed to notice the different chapters of the Bill.

CHAPTER I.

4. *Section 3* (5).—I would strike out the latter part of this clause. I do not see why in a law for the protection of the cultivator, the same protection should be extended to him after he ceases to be one, though he may have come into possession (either by himself or through his ancestors) of land for cultivation, and is therefore a ryot; he should, I think, cease to be a ryot when he ceases to cultivate, using the land for other purposes.

5. In the same section I would strike out everything relating to sub-letting, for reasons given further on. (Under-ryot would thus go.)

CHAPTER II.

6. I would strike out the words "before the commencement of this Act" wherever it occurs in section 5. I do not think the chapter is a good one at all, but if it be thought necessary to have it, I do not see why the zemindar should not be in as good a position as the ryot as regards right of occupancy. And while this chapter absolutely prevents land becoming

khamar in future, section 49 provides for present khamar land ceasing to be such, which seems decidedly unfair to the zemindar.

CHAPTER III.

7. *Sections 22—24* might, I think, be dispensed with; they make arbitrary fixtures which might better be left to the courts: no court, for instance, would entertain prayers for re-enhancement soon after enhancement unless for very strong reasons, and I really cannot see why they should be unable to entertain the prayers even immediately if those strong reasons exist. And suppose a ryot holding poor sandy lands in a hollow, for some reason has his rent raised from 4 to 5 annas a bigah in 1883 and in 1884, a flood comes which fills up this hollow with rich alluvial soil, making the land worth Rs. 2 a bigah; why should that ryot reap all the benefit for nine years and the greater part for next ten, &c.?

8. These may be extreme cases, but why should law prevent justice even in extreme cases?

9. And while these restrictions are put on enhancement, the ryot is perfectly unrestricted as regards reductions.

10. In *sections 32* (3) *and 33* (3) the word "sufficient" should be inserted before "cause."

11. In *section 35* (2) it might be well to insert what authority is to inflict the fine, and how it is to be realized.

CHAPTER IV.

12. It would be well if in this chapter something were inserted to remedy a most inconvenient state of things that exists as regards registration. Some penalty is required, or some other remedy in the case of non-registration. Section 39 enables the zemindar to refuse registration in default of security; but what is the consequence of the refusal? And how will refusal force the new patnidar to give security? And what is the consequence of a private transferee never asking for registration. The only consequences apparent are that the zemindar loses fees which he is entitled to, and is sometimes utterly ignorant of who is his real tenant. Of this I have practical experience; in the case of some patni estates in a neighbouring district rents have been paid into the treasury on account of one of my wards' estates in the name of the old patnidar, though private transfers had occurred, and this is only found out when on a default our sole remedy is objected to, because the notices have not been served on the real (new and unknown) patnidars.

13. The law should, I think, insist on every new holder registering and giving in a new kabulyut under disability penalties. The disabilities should be twofold, that is, an unregistered holder should be unable to recover rents, and he should by law be expressly deprived of right to object in any court to any steps taken by his landlord to recover rent. I still also adhere to my formerly expressed opinion that after a certain time non-registration should entail forfeiture of all rights to the zemindar (and I would extend this to all tenures and holdings of any description whatever).

14. And when zemindars are forced to coercion to get in their rents, the extra costs ought to be granted to them by law.

15. The next chapter (V) treats of occupancy ryots, and I think that the further concessions made to the ryots are most unnecessary. This creation of the law was bad enough in the eyes of zemindars already, though I believe as a general rule the objection was a theoretical more than a practical one. As a matter of fact (excepting perhaps a few districts) a long standing tenant was seldom interfered with so long as he paid his rent.

16. Now, however, there is a further drawback. The new "settled ryot" taints every particle of land he touches, and there is no washing out that taint, for if a landlord buys the occupancy right, he cannot extinguish it; it passes with the land to any one who takes it. The "settled ryot" will become a marked man, never to have land given to him, &c.

17. There is in sections 45, 47, 50, the same disabling of a certain class to make contracts, which I think so objectionable throughout the Bill; this is, I think, likely often to inflict hardship. For instance, it is often highly advantageous to the ryot to hold certain lands for a year or two, and this may suit the zemindar too, except for this new law which would void any contract to give it back after the term, and so the ryot will not get it.

18. Section 47 will cause injustice by handing over as occupancy land which has been expressly let for a term only.

19. In Section 50 I would alter clause *a* to one expressing that he may only use the land for cultivation, and clause *e* I would eliminate. If, as I think is the case this Bill is intended to protect ryots, I fail to see why it should allow subletting. A ryot ceases to be a ryot when he ceases to cultivate; when he sub-lets, he becomes that most oppressive of all landlords, a petty middleman. To protect the actual cultivator of the soil is well; to put a man between him and the zemindar can only injure one or the other. If the sub-tenant only pays a fair and equitable rent to the middleman, it is very evident that the latter pays a less than fair and equitable rent to the zemindar, which would be contrary to clause *c*, and if the ryot turned middleman *does* pay a fair and equitable rent to the zemindar, then it is evident that the sub-tenant, the actual cultivator, pays an unfair and inequitable rent, and how does this improve the condition of the cultivating class.

20. Section 56 destroys all advantage a zemindar might gain by buying an occupancy right, which would be held under clause *c* at fair and equitable rates, for immediately he lets

another ryot on, he loses what he bought. He cannot re-let at a higher rate, for the new tenant jumps into the right of occupancy, and would say, "the rents before were fair and equitable, and you cannot make me pay more notwithstanding any contract I made."

21. Sections 59 (2), 61 (2), and 64 proviso, limit rent to one-fifth of estimated average value of crops, while section 81 makes it one-half. I confess that I am unable to see how this is equitable. One-fifth of the produce of an exceedingly good year may be equal to half that of a bad year, but if an average is to be taken, I should say that one-half of the average produce would be about the equivalent of one-half of the produce year by year, taking a number of years, and section 82, allowing a commutation of rent in kind on an average of five years, making a reasonable deduction as in clause 3, that is to say, the money rent may by this be nearly one-half of the average value of the produce, while the above sections make the maximum one-fifth.

22. As regards the sections providing for tables of rates, I can only say that I do not believe such tables could possibly be prepared accurately. My experience in settlements shews that no two villages are alike, or can fairly have one table of rates assigned to it, and the special officer who was sent up here to enquire about this matter told me that his enquiries led to exactly the same result.

23. I also doubt very much whether such a list as that contemplated in section 83 can ever possibly be prepared with any accuracy, and without accuracy the provision would be very mischievous. I do not see how the Collector can ensure getting truthful returns.

24. Turning now to ordinary ryots, I see by section 90 a zemindar cannot let land for a term at all, and section 95 will effectually stop a zemindar from spending money over improvements wherever rents have been enhanced a short time previous.

25. And letting for a short term at a nominal rent to improve the land will be put a stop to, for the ryot, when he is called on for an enhanced rate, will refuse, and then by section 93 the landlord *may* have to pay compensation for improvements, and *must* have to pay compensation for disturbance, though all this was allowed for in the shape of nominal rent. If it be said that this instance does not apply as 91, and the following sections do not apply to holdings fixed for a term by agreement, then I fail to see how the zemindar can get back his land at all, for section 90 bars all contracts to give up land.

26. Section 101 will throw on zemindars a burden so heavy that I doubt whether it will be carried out. For a large estate full of small ryots the work would be enormous; the registration or something like it, though more simple, should be kept, but to furnish each ryot with a copy would entail enormous labour and great extra expense, which if the receipts are properly given seem hardly necessary.

27. To section 119 (as to others fixing proportions of estimated value of gross produce in staple crops as the limit of rent) I rather object, but it is difficult to say anything positively till it is known what crops are to be considered staple. But the creeper producing the pân leaf would not be a staple crop, I suppose, in which case a most profitable crop might be grown, and the zemindar gain next to nothing, for where the pân plan grows, rice or corn would produce next to nothing.

28. I should think it would be well to have some mode of deciding the question which might arise as to whether certain works are improvements [Chapter X (A)], and whether the zemindar or ryot wishes to do the work, the other side should by an express section have the power of putting him to the proof as to whether the work is an improvement or not. Otherwise there is a possibility of land being permanently injured to the loss of one side or other.

29. I have little more to remark on, except that I think section 171 should itself specifically declare how the cost of cutting, &c., (clause 2), is to be met, and that, as I remarked at the commencement of this letter, I should prefer to see a simpler and quicker procedure for suits. And I cannot but again say that I am afraid the Bill if passed will result in ruin to many zemindars, and I may add that the agitation among the ryots that, you may remember, occurred to the south of this district some time ago when a Bill was being prepared shadows forth pretty distinctly what may be expected if this Bill passes.

30. I have received only one reply to the call I sent out for opinions on the Bill, and enclose a copy of it. If more come in, they will be sent as they arrive.

Dated Berhampore, the 5th May 1883.

From—BABOO GOPAL CHUNDER MOOKERJEE, Vakeel,

To—H. MOSLEY, Esq., C.S., Collector of Moorshedabad.

In obedience to your requisition, I have the honour to submit the following opinion on the Bengal Tenancy Bill now before the Supreme Legislative Council.

The necessity for legislation, at least on some portions of the law of landlord and tenant, has been too generally admitted to remain any longer an open question. The want was, however, felt from the landlord's, rather than the ryot's point of view. A simpler procedure for the realization of rent, and a speedier way of enhancing rent, and with greater success, were felt among the wants for the interests of the landlords. The Bengal Legislature was at first moved to remove this want, but the matter has now assumed a different aspect. A considerable portion of the law on the subject has been recast, and the relative rights and positions of the landlords and their tenants have been redistributed; the general scope of the proposed bill is to take away from the landlords some portions of what they consider as their vested rights, and

improve the position of ryots at their expense. Nor is the Bill calculated to promote harmony and peace between landlords and ryots; occasions for law suits and official interferences have been increased, so as to excite bad feelings between the parties. We think, so far as the landlord is concerned, he would rather like to be subjected to the inconveniences of the present state of the law on the question of realization and enhancement of rent than accept the provisions of he present Bill.

The position of the ryots has undoubtedly been improved by the Bill. How far this has been consistent with the pledges given to the zemindars at the times of the permanent settlement is a debatable point. If the Bill succeeds in raising the *status* of a very large portion of the community, and protecting the helpless, that is a point greatly in its favour. Some of the important provisions of the Bill, however, are open to just criticism.

In Chapter II provisions have been made for measurement and registration of khamar lands, with an object of preventing the zemindars from increasing such lands at the expense of ryoty lands, in which important rights are to accrue in favour of ryots. With regard to Lower Bengal at any rate, it may be said that there has not been on the part of the zemindars any degree of anxiety to extend their khamar lands. If their ryots abandon lands, then only some lands are cultivated *khas*, not so much to prevent the accrual of the right of occupancy, but as a speculative measure to keep up the rent-roll of the mehal. The provisions of this chapter are unnecessary, inquisitorial. They will lead to discontent, and wake up the zemindars to separate as khamar a larger area from ryoty lands, apprehending loss from a different line of conduct.

In Chapter V important changes have been introduced as to the growth of occupancy rights and certain incidents attached thereto. A settled ryot holding lands in a village continuously for 12 years is to acquire a right of occupancy over other ryoty lands, however, short may be the period of his occupation of these latter. Such rights again have been rendered transferable against the consent of the zemindar, giving him a right of pre-emption. Such changes are serious encroachments upon the rights of the proprietors of the soil, and not justified by circumstances of the cases. If the occupancy right is considered important enough to be made transferable, it ought to have all the incidents of a transferable interest. The zemindar's right of pre-emption renders it a half measure neither satisfactory to the landlord nor to the tenant. It will, moreover, increase litigation, and introduce want of harmony between the landlord and his tenant.

The question of enhancement has been dealt with in Chapter VI. We cannot say that this matter has been put on a srtisfactory basis. There are no uniform pergunnah or customary rates prevalent over a large area. The circumstances of lands and nature of their holdings vary to a considerable extent, and so also the rates. Preparations of tables will be very difficult and expensive, if not impracticable, to be accurate; they should require a degree of investigation not shorter or simpler than what would be requisite to decide enhancement suits for the area under investigation. The process is, moreover, to be repeated in a Civil Court when a particular holding comes under assessment. Distinctions and differences will be pleaded to take it out of a given rate in the table, and the Court must decide if it wants to do justice therein, by a fresh investigation and enquiry which will by no means be shortened or facilitated by the table of rates prepared. The case will remain where it was, with or without the table.

We are of opinion, therefore, that a speedier and more successful remedy for re-adjustment of rent has not been secured for the zemindar by the proposed Bill.

A contract between a landlord and his ryot, to be binding and effective, needs the approval of revenue officers (section 59). Certain statutory rights conferred upon "ordinary ryots" cannot be modified or superseded by any agreement between the parties (section 90).

These are unnecessary interferences with the freedom of action. The existing laws respect such contracts. This change is against the policy of a civilized Government which has abolished the usury law, and respected individual liberty of action in every other transaction.

A summary procedure has been demanded on behalf of the landlords to realize their rents. The delay and costs incident to a rent suit, like all other suits tried now by the ordinary procedure, have been considered a grievance. Where the zemindar's claim is not disputed, the ordinary procedure does not delay the passing of a decree, and a more summary procedure cannot shorten the time. If the claim be contested, a summary procedure cannot do justice between the parties. Objections made must be fairly decided, and experience tells us that rent claims are contested by ryots when there is a pre-existing want of harmony between the parties, and want of fair play is apprehended. We fully approve of the principle of the Bill regarding this matter. Expenses are incurred by adjournments and heavy process fees. The former may be avoided by a better arrangement in the judicial service; the latter, if an evil, by an amendment of the Court-fees Act. If the justice of the case needs an adjournment, that must be granted rather than justice should suffer.

But we fear the broad principles of the Bill have been determined upon. I have some observations to make upon some of the sections.

CHAPTER I.

1 *Section 3, clause (5)*.—The word person has not been defined in the Act. A question often arises whether an indigo concern or a firm like Messrs. Watson & Co., not registered, nor having a corporate existence, can be called a ryot, and entitled to the right of occupancy

with reference to lands held or cultivated by them for indigo. The High Court of Calcutta has denied them such rights—*vide* I. L. R., 4, column 957; 25, S. W. R. 117.

The Legislature ought to define their true position.

CHAPTER II.

2. A section ought to be added to this chapter analogous to section 89, Bengal Land Registration Act (VII of 1876 B.C.), providing that registry under this chapter of khamar lands must not affect the rights of third parties, or their remedies by suits in Civil Courts.

CHAPTER III.

3. *Sections 14 and 15.*—In some parts of Bengal, quantity of land held varies from year to year, but the ryot is assessed at the same *rate*. Benefits of these sections are intended to be given to such ryots (*vide* section 17). After the words "at a rent" insert "or a rate of rent" in the third line of section 14 and section 15, and amplify section 17 to cover such a case still more clearly.

4. *Section 25.*—Add "sub-let" after "bequeathed." "Transfer" as defined in section 3, column (16), does not include sub-letting. And this right is vested in tenure-holders subject to other provisions in respect of sales for arrears of rent of the superior tenures, &c.

5. *Section 32* (1).—After "any Civil Court having jurisdiction" insert "to entertain a suit to recover possession of the subject-matter of such transfer or succession," and strike out down to "situate." The section, as it stands, does not provide for the class of courts to which such an application is to be made in so far as the pecuniary jurisdiction is concerned.

CHAPTER IV.

6. *Section 41* (1).—Civil Court in this section is probably limited to the court of the District Judges, as by the present patni law (Regulation VIII of 1819) jurisdiction ought to be extended to any Court having jurisdiction in a suit to recover possession thereof. This will afford greater facilities to the parties, and Civil Courts in general ought to possess greater confidence now.—(2) Strike out this: the right of appeal would be a sufficient check against arbitrary orders.

CHAPTER V.

7. *Section 46.*—The period of one year is too short to justify the inference of abandonment. This ought to be extended at least to three years. This "ceasing to hold" should also be without paying any rent. Hence put "three" for "one," and add "without paying any rent" after "with others."

8. *Section 47.*—Proviso, for "owner" substitute "proprietor." As defined in the Act, owner is very vague; an occupant ryot may be the *owner* of his own land.

CHAPTER VI.

9. *Section 59.*—The limit of one-fifth of the estimated average annual value of the gross produce in this and other sections of this chapter is too low; it ought to be one-fourth.

CHAPTER VII.

10. *Section 85* (2).—A sub-section should be added to this section providing for abandonment. If a ryot owning any *basto* land leaves the village without any intention of returning, and does not pay rent, the landlord may take him to have abandoned his holding, and should be entitled to settle with another ryot.

CHAPTER VIII.

11. *Section 93* (*b*).—The compensation on this head is too high, nor is this founded upon any legitimate claim that the ryot can put forward. This clause ought to be left out.

12. *Sections 90 and 95.*—Ordinary ryots should occupy lands, and leave them off according to the contract between the parties. The two sections ought to be amended accordingly.

CHAPTER IX.

13. *Section 104* (1).—The right to deposit is often a nice question, and must be left to be determined by a Civil Court if occasion arises. This section unnecessarily gives the officer to whom a deposit is made a right to see whether the ryot is entitled to make the deposit. His functions ought to be limited to receive deposits if accompanied by a declaration of the ryot containing the ground upon which he can deposit under section 103.

14. *Section 125* (2).—If the tenure is sold subject to the charge, the rent ought to be realized from the tenure in the hands of the purchaser.

If sale-proceeds fall short of the rent due, is the tenure sold to be held liable for the balance? The section ought to be amplified to provide for all cases if rent be considered a first charge.

Dated Saidabad, the 8th June 1883.

From—Baboo Baikunt Nath Sen,

To—Herbert Mosley, Esq., c.s., Collector of Moorshedabad.

I have the honour to send herewith my notes on the Bengal Tenancy Bill. I hope to be excused for the delay that has been made in forwarding the same to you.

No. 485G, dated Berhampore, the 11th June 1883.

Memo. by—The Collector of Moorshedabad.

Copy forwarded to the Commissioner of the Presidency Division in continuation of this office No. 328G of the 18th ultimo.

Notes on the Bengal Tenancy Bill.

CHAPTER I.

Section 3, clause 5.—In the definition of ryot it ought to be clear whether firms and companies have been meant to be included or excluded.

CHAPTER II.

Section 5.—Uncultivated or unculturable waste lands, and not in the actual occupation of any ryot, ought, in my opinion, to be treated as "khamar land."

CHAPTER III.

Sections 14 and 15.—Difficulties would arise and litigation would be the result if the holdings contemplated in these two sections be treated as tenures. In furnishing receipts and statements of accounts to tenants much difficulty would be felt.

CHAPTER IV.

Patni tenures.—Express provision ought to be made for protection of patni by any person interested, besides holders, by payment of arrears.

CHAPTER V.

Section 45.—Provides that occupation even of different lands at different times, notwithstanding contract to the contrary, creates a right of occupancy. This is a great encroachment on zemindar's rights, and implies a denial of liberty of action. Contracts under the Contract Act can only be avoided on certain grounds, which do not include the present case, when a zemindar merely secures a clause or condition to his benefit in a perfectly legal way under the existing law. Violation of the laws of personal rights and status would be the direct result if such a measure be adopted, and consequently the principle involved would be a dangerous one.

Again if a ryot with his eyes open enters into a contract, why should he be permitted to repudiate it? Or why should the Legislature shew any anxiety for the protection of the interests of the ryot on the ground that "such is the power of the zemindar, &c., &c., &c., defeat and failure," *vide* paragraph 33, Statement of Objects and Reasons.

If the ryot be induced by any misrepresentation or concealment of fact, the contract itself would be bad in law, but if the contract be otherwise good and valid, legislative interference declaring the same to be null and void is quite unjustifiable. Good policy must be based on equitable principles, and equity is equality; therefore, the interests of both ought to be taken into consideration.

Apart from this consideration of legal rights and privileges, a more comprehensive view ought to be taken as to the consequences which would ultimately result. Ryots know they have to depend much upon the zemindars, who again, generally speaking, at least in Bengal, look after the welfare of the tenants on a consideration of their dependent state. The feeling that is likely to be engendered amongst tenants and zemindars in ignoring contracts, deliberately entered into is almost sure to be of an unhappy nature, and would, I apprehend, lead to results disastrous to the ryots.

The means and powers contemplated in the Government letter No. 6 of the 21st March 1882 in the hands of the zemindars, if they do really exist, would in all probability be so made use of that the ryots would be compelled to give up their lands, and thus the measures proposed to be adopted by the Legislature for the improvement of the condition of the ryots would be entirely frustrated.

If the occupation of different lands give a right of occupancy, ryots would neglect the improvement of the soil, and so the agricultural interest and advancement of the country would be affected. If the ryots know, as they do know now, that continuous occupation for a certain period of the same land would give them a right of occupancy, they would, having no choice or option, adhere to the land, and try to improve its fertility, and thus make it profitable; very different would be the case when they would have the option of cultivating different lands with no fear of losing their right of occupancy.

Sections 50—55.—The transferability and heritability of occupancy right have properly been recognized with certain qualifications and conditions.

Section 56.—The provision in this section seems objectionable. This is to guard against the possibility of a landlord buying up on a great scale the occupancy rights existing on his estate or tenure with a view to locating ordinary ryots on the land. The question is, is such a measure proper and necessary? If a zemindar or a tenure-holder purchases an occupancy right, he ought to get the fullest benefit and advantage of his purchase; he has to pay the money equivalent for the right, and there being no reservation in favour of the ryot, the propriety of putting a legal restriction seems to me questionable. Then, again, where is the necessity for the precautionary measure? What if the zemindar or tenure-holder buys up all occupancy

rights in his estate or tenure? So long as he himself cultivates the lands by his servants or hired labourers, it is admitted there is nothing to fear; but where is the harm if he brings in new tenants, and locates ordinary ryots. The rights of these ordinary ryots would in the course of time ripen into occupancy rights, and whatever extra profits or advantages the zemindar or tenure-holder might derive before the development of the right of occupancy may fairly be looked upon as a return for the money he had to pay for reclaiming, as it were, the lands from the hands of any ryot having an occupancy right.

CHAPTER VI.

Section 59 (1).—An agreement by the ryot submitting to an enhancement of rent ought to be considered as valid and good; the approval of the same by a Government officer specially appointed ought to be dispensed with. Legislative interference with the freedom of action of parties is only justifiable under certain circumstances which make an agreement void, and for which sufficient provision has been made in the Contract Act (IX, 1871). Any agreement not otherwise bad ought to be considered as good and valid. In the uncertain state of things which must necessarily follow if agreements be declared valid contingent on the approval of a Government officer, I apprehend not only the zemindar and tenure-holder would be put to inconvenience and loss, but the ryot, also, would have to suffer a good deal. If there is misrepresentation or coercion antecedent to the agreement, the contract would be void by the operation of law. It ought to be conceded that ryots in Bengal are now quite able to protect their interests, and that when they enter into contracts with their eyes open, any attempt at further protection under the guardianship, as it were, of a Government officer would lead to results which are sure to prove prejudicial to the interests of the cultivating class as well. (2)—In cases of enhancement, one-fifth of the estimated average annual value o the gross produce of the land in staple crops has evidently been treated as fair and equitable rent. This seems to be objectionable; more than a fifth share has all along been recognized as the rent due to the zemindar or tenure-holder.

In the latter part of sub-section (2), sections 59 and 61, "that it is fair and equitable and" ought to be left out. The validity of the contract ought to be made dependent on free agency only.

CHAPTER VII.

Section 62.—A table of rates and produce, if correctly and carefully prepared, might be of very great use in settling questions regarding enhancement of rent; but it is necessary that special care should be taken for the preparation of the table. The revenue officers to be employed ought not to be below the rank of a Deputy Collector, section 74. With regard to tracts for which a table of rates and produce is not in force, the grounds for enhancement of rent seem to be fair and reasonable.

Provision ought to be made in this chapter for the enhancement of rent on the ground of occupation of land in excess of that for which rent is paid.

The limit of one-fifth of the estimated average annual value of the gross produce of the land in staple crops, calculated at the price at which the ryots sell at harvest time, seems to be too low; it ought to be raised to one-fourth, if not one-third. Bhagjotedars in Bengal generally pay half the produce, and sometimes more.

Section 83.—As a great deal will depend upon the price list to be annually prepared, opportunity ought to be given to the public for proper representations to the Collector to enable him to prepare the list correctly.

CHAPTER VIII.

Ordinary ryots having no right of occupancy ought to be left to themselves for securing their interests by agreements with their landlords. Though the desirability of interfering as little as possible between tenants of this class and their landlords is admitted, yet I venture to think that the provisions of the Bill in this chapter take away the undoubted right of the landholders to deal with such tenants. This chapter should, in my opinion, be left out altogether.

CHAPTER IX.

Section 6.—Land might not be added to a holding by alluvion or otherwise, yet on measurement it may be found that a ryot is in possession of lands in excess of the quantity of land for which he actually pays rent. This may be owing to gradual encroachment on waste lands or owing to mistake in the first measurement. The case of encroachment might come under the purview of section 96, but the other case, I think, does not. Some provision for payment for such excess lands ought to be made. This provision may be incorporated in this section or might be made a ground for enhancement of rent.

Section 98.—The limitation of instalments by which rent is to be paid in to not more than four, I venture to think, will tell very hardly on some tenure-holders, who by agreement have bound themselves to pay by monthly instalments. The provision therefore ought to be made prospectively, to affect future settlements or engagements. The existing contracts or customs regarding instalments ought not, in my opinion, to be interfered with.

Section 101.—The preparation and supply of the statement will entail some expenses on the part of the zemindar or tenure-holder. It is proper, I think, to make the ryot pay a small fee sufficient to cover the expenses before getting the statement.

Section 103.—Clause (*a*), sub-section 1, is not very definite; it is elastic enough to include any case in which a ryot might choose to deposit. Something definite ought to be laid down.

The application ought to be verified.

A provision ought to be made for rent being paid by money and in kind; in some parts of Bengal both money and part of the produce of the land are paid as rent.

CHAPTER X.

If transferability of right of occupancy be recognized, complications are not likely to arise in cases of improvements by occupancy tenants.

Improvements by ordinary ryots should be made at their risk; such ryots must take care to protect their own interests by proper agreements.

Section 133.—Cases of utbundi tenures should be excepted; in the cases of those tenures annual survey would be necessary.

CHAPTERS XI AND XII.

In my opinion, those two chapters contain sufficient and adequate provisions for meeting special cases.

CHAPTER XIII.

The provision regarding the distraint of the produce of land in the occupation of ryots for the realization of rent do not appear to me to be productive of any good.

Sub-section (2), section 167, makes every application for distraint liable to the court-fee which would be payable in a suit for arrears of rent, and this application may be refused at the discretion of the officer entitled to receive the same. Under such circumstances the application is not likely to be made often, if at all.

Then again section 186 makes it a penal offence on the part of the person owning or claiming any land for whose benefit or on whose behalf the offence mentioned in section 185 is committed, if having reason to believe that the offence was likely to be committed, he has not used all lawful means in his power to prevent its commission. Any abuse of power regarding restraints on the part of a gomastha might, under the provisions of the said sections, put the person entitled to the rent to great troubles and difficulties; I think, therefore, no zemindar or tenure-holder entitled to receive rent from a ryot would venture to distrain the produce of the land when he has such risk to run.

The chapter should, in my humble opinion, be either left out altogether or be recast.

CHAPTER XIV.

Section 192.—A statement of boundaries or a sufficient description for identification in the plaint for suits for rent should, in my opinion, be dispensed with; otherwise, I apprehend many complications and difficulties which ought to be avoided as far as possible in rent suits.

CHAPTER XV.

The provisions for the protection of certain encumbrances seem to me to be unnecessary. If the highest amount bid for defaulting tenures and under-tenures be insufficient to liquidate the decree, the said tenures and under-tenures would be sold free of encumbrances after the observance of certain forms. Such being the case, it is complicating matters by declaring such tenures and under-tenures as liable to be sold subject to the encumbrances in the first instance.

BOIKUNT NATH SEN.

The 8th June 1883.

No. 246-A, dated Dacca, the 23rd/29th June 1883.

From—N. S. ALEXANDER, Esq., Officiating Commissioner of the Dacca Division,
To—The Secretary to the Board of Revenue, L. P.

With reference to your letter No. 351A, dated 29th March last, I have the honour to submit the following report on the Bengal Tenancy Bill now under the consideration of the Legislative Council of the Governor-General, and to say that, though the Collectors of this division were requested to send in their reports before the 1st instant, the Collector of Furreedpore has not yet sent in his report up to date.

CHAPTER I.

2. *Section 1 (3).*—The Collector of Dacca, Mr. A.W. Paul, writes:—"Many provisions of the Bill are most essential for Behar and are not needed, and would even create confusion in Eastern Bengal; yet, the Bill is to be general throughout the province (with small excep-

tions). I would therefore suggest that a general clause, somewhat similar in operation to section 187, be introduced instead of section 1 (3), somewhat to this effect: the whole or any portions of this Act shall extend to such local areas as the local Government may, by an order published in the official gazette, determine. I would point out that originally it was ntended to have two parts in the Act, one for Behar and one for Bengal."

I quite agree with Mr. Paul. Eastern Bengal differs *toto cœlo* from Behar, and both from Orissa: no general rent law is applicable.

3. *Section 9.*—The work of registering khamar lands will be very heavy, and will require the entertainment of special establishment in most districts at a large cost: it is doubtful whether the work when done will be worth the trouble and expenditure. The Collector o Dacca states.—" I presume a separate revenue staff is contemplated for the purpose of carrying out this Bill, as in many districts, such as Dacca, it would be impossible for the Collector to supervise operations."

CHAPTER III.

4. *Sections 22 and 24.*—" The Burrisaul zemindars," Mr. Dutt writes, " object to sections 22 and 24 of the Bill, and argue that no limit, either of amount or of time, should b set in the matter of enhancement of rents payable by tenure-holders. The provisions o those sections, however, seem to me to be equitable: to enhance rent over a hundred per cent would be exceedingly unfair under any circumstances, and frequent enhancements, or even suits for enhancement, should certainly be stopped."

I agree with Mr. Dutt in thinking that there is no great hardship to the landlords in the enactment of these sections.

5. *Section 28.*—The Honorary Secretary to the Eastern Bengal Landholders' Association, at Dacca, writes:—" The relief contemplated by this section might easily be obtained by application to the zemindar: why then should the ryot have power to apply direct to a revenue officer? If the landholder refuses to register such transfer, then the tenant may apply to a civil court, as provided for in section 32." I agree in these remarks.

6. *Section 32 (d) &c.*—I do not see the necessity for this reference to the civil court. The offence of neglect to register should be made punishable by fine to be levied by the Collector; the procedure in these sections seems an unnecessary cumbrous one.

CHAPTER V.

7. *Sections 44-47.*—These sections will not make any very radical change in Eastern Bengal.

8. *Section 50.*—Mr. Waller, Officiating Collector of Mymensing, reports:—" The right of transfer of occupancy tenures has not been hitherto, I believe, admitted in this district. I think the landlord's right of pre-emption at sales in execution will not be much protection to him unless some limit be laid down as the maximum to which the holding may bid up; and, I think, the landlord ought not to be bound to register any one as his ryot who is not a *bonâ fide* cultivator. The right of occupancy is for the protection of the cultivator, and the land was originally let to the cultivator for cultivation, it seems to be inequitable, therefore, to allow a non-cultivator to be thrust upon the zemindar as an occupancy ryot."

9. I quite concur with Mr. Waller in his views on this point.

10. *Section 50 (f).*—The chief objection to the transferability of the occupancy tenure is, I think, the likelihood that the land will, in the course of years, become split up into an infinity of very small holdings; the people of this country cling so much as it is to their native villages, that, with the barest subsistence given them, they will not migrate, it will more than ever tend to produce a home-sticking poverty-stricken peasantry depending on agriculture for a livelihood. Of late years many artizans, such as weavers, smiths, &c., have abandoned their hereditary trades and gone in for agriculture, and this provision of the law will, I think, draw more away from trade and other pursuits and turn them into agriculturists.

11. *Section 51.*—Mr. Dutt says:—" For many reasons, I object to section 51. In the first place, the provisions are too elaborate to be properly workable, and will never be complied with. A ryot who wishes to sell a bit of land on an urgent emergency (*e. g.*, to celebrate a marriage) will not go to the Collector, nor wait for the time prescribed: ryots generally do not sell their jotes, except on such urgent necessity, and to hamper them with an elaborate procedure would be virtually taking away the unrestricted right of sale which he now enjoys by custom. Then again there is no reason why, if a ryot wishes to sell his homestead to a brother, or his plot of land to his daughter's husband, the landlord should have a right of pre-emption at all, and should be allowed to disturb the domestic plans of the cultivator. To invest the landlord with such right would enable him to harass the cultivator at his will; all that the landlord needs for his own protection is to be able to veto a sale when it is really objectionable or detrimental to his interests. Lastly sub-section 4 of section 51 will sometimes prove injurious to the landlord. A ryot may make a really objectionable sale and the thing may not come to the notice of the landlord for six months; he is then debarred from taking any action in the matter, although the sale may be really injurious to his interests, and may have been meant by the ryot to be so."

12. *Section 59.*—The Secretary to the Eastern Bengal Landholder's Association, Dacca, objects to the limit of enhancement of money rents by contract provided for in this section, and thus illustrates his objection by an example:—" Suppose the average annual value of the produce of a bigha of land is Rs. 12-8, and the present rent of the ryot is one rupee. Under

this law the landlord can claim to enhance up to Rs. 2-8, as being ⅕ of Rs. 12-8, but cannot expect to get more than double, or Rs. 2; and even if the court should deem it to be fair from the evidence before it, to give him the Rs. 2, it cannot pass a decree for that amount, as section 59 provides that in no case shall the enhancement exceed 6 annas per rupee, or, in other words, the landlord cannot get more than Re. 1-6. Hence it is evident that the landlord can never expect to get the full benefit of the provision of the law; for even if the land should continue fertile, it would take at this rate, at least 50 years to get his Rs. 2-8, for the rent once enhanced cannot be disturbed for 10 years, as provided for in section 78: so much for the justice of this provision."

13. *Section 64 (d) proviso.*—The provisions of this section will admit of a very fair rate of enhancement being obtained by landlords. If a bigha of rice land produces 12 maunds of rice at the average of Rs 2 per maund, that would give Rs. 24 per annum as the gross profits on a bigha of rice lands; if we put it down at Rs. 20 in round numbers, that would give Rs. 4 for the landlord. At present the rent is only Re. 1-8 to Rs. 2; thus a margin of enhancement, to the extent of 100 per cent., is allowed by the section, which should be sufficient. The remarks of Mr. R. C. Dutt on this point are entered below:—"These sections (62-72) provide facilities for the enhancement of rent when rent in an estate or a tract of the country is unduly low. I entirely agree with the principles embodied in these sections. There is little doubt that zemindars ought to have a share in the general prosperity of the country and in the price of food-grains; that they have not always been able to get this share is due to the difficulty of getting an enhancement of rent under the present law. The zemindar has to prove in court that the value of produce has risen, and this he finds it impossible to do in nine cases out of ten —I may almost say, in ninety-nine cases out of a hundred. It is proposed that a revenue officer will now do this for him; the revenue officer will prepare a table of equitable rates, and if the revenue officer's rates are higher than what the zemindar gets, the latter has simply to show this in court in order to obtain an enhancement. The revenue officer in preparing his table shall take into consideration any rise which may have taken place in the value of the produce. When, therefore, there has been any such rise, the zemindar will have no difficulty in obtaining his proper and equitable share of the profits.

"There will, no doubt, be some practical difficulty in working this scheme, but such difficulty will be overcome under proper instructions. No officer of a lower rank than a Deputy Collector should be deputed for such work, and such Deputy Collector should act under the orders of the Collector of the district. When the same class of land does not pay one uniform rent, minimum and the maximum should be recorded.

"Rule (*d*) of section 64 should be modified thus:—

"(*d*) To the following rule, namely that the rate of rent for any class of land should be raised only on account of an increase in the value of the average gross produce of land of that class, and when the rate of rent is so raised, the new rate shall not bear to the old rate a higher proportion than the increased value of the produce bears to the former value.

"I beg to invite your careful attention to this very important matter. My reasons for suggesting this modification are obvious. Under the existing law, the increase in the value of the gross produce is the only ground (except when the land is found on measurement to be larger than what the rent is paid for; and this ground has been provided for elsewhere in the Bill) on which rent can be enhanced; while every possible facility should be given to the zemindar to enhance rent on this ground. We should carefully provide against enhancement on any fresh grounds. Occupancy ryots have for nearly a quarter of a century been secured against enhancements, except on this one ground, and it would be taking away from them the right which they have so long enjoyed, if fresh grounds of enhancement were now created. Probably the Bill does not contemplate creating any other grounds as it does not speak of any other ground; but the point should be definitely cleared up in order to avoid unnecessary litigation. As I have stated before, every facility should be given to enhancement of rent on the ground which the law has recognised for the last 25 years; but I am confident you will agree with me in thinking that to add fresh grounds for enhancement would be unfair to the cultivators of the soil."

14. *Section 82.*—Mr. Dutt quotes the following passages from a report of the zemindars of Burrisaul:—

"*Section* 82.—This section will be exceptionally hard upon petty talookdars and tenure-holders. In very many cases petty talookdars and tenure-holders keep certain lands with certain ryots, or let them out from year to year, or for a fixed term of years, on condition of receiving a certain share of the produce, or a fixed amount of produce, and solely depend upon this produce for the support and maintenance of their family; it will be simply starving them and their family if the receipt of the produce is now commuted into money rent. The legislature ought not to lay its hands upon such contracts freely entered into between the parties, sanctioned by the custom of the country, and prevailing from the earliest traditions of India. It may not be out of place here to remark that the sharing in the produce was the only way in which rent would be received in good old times, and that money rent is but of recent origin." Mr. Dutt says:—"There is some force in these remarks, especially in reference to talookdars and tenure-holders on a small scale, who let their limited property on condition of getting one-half of the produce for the maintenance of themselves and their family. A free right of commuting such rents into money rent cannot be bestowed on ryots without causing some hardship on them; on the other hand an express provision is necessary

to prevent commutation of money rent in rent in kind without sanction of some revenue officer. The maximum limit of rent payable in money by occupancy ryots is one-fifth the value of the produce, while the maximum limit of rent payable in kind is half; many zemindars, especially in Behar, will therefore be under a temptation to commute money rents into rent in kind wholesale, and an express provision of law is necessary to stop this."

15. *Section 83*(1).—I do not exactly understand the provisions of this section. Are the lists to be prepared for each separate market? If so, the work to be done annually will be enormous in some districts: the marked prices in the mofussil are very diverse.

16. *Section 98.*—Mr. Dutt remarks:—"Section 98 contains an excellent and very necessary provision. I have consulted some civil court officers on the provisions of this section, and they all entirely agree in thinking that they are necessary and sound; they go further, and say that, though the number of instalments may be four, a suit for arrears should not be allowed to be instituted so often, and indeed should not be entertained till after the close of the year; thus, if Ashar, Aswin, Pous, and Choit be fixed as the time for the instalments, the ryot failing to pay the portion of his rent due by the Ashar kist, or by the Aswin kist, should not be sued immediately on the following month, but after the close of the year. When a decree is given, the interest may be calculated from the very month on which the instalment for rent was due, and such a provision will keep a ryot punctual in payment according to instalments; but to allow four suits to be brought in the year will be needlessly harassing the cultivators, and needlessly increasing the work of civil court officers. In these suggestions and arguments I entirely agree.

17. In my opinion, the instalment for paying rent should be so fixed that there should be three payable in the year, two large and one small; thus, taking the rent to be 16 annas, seven annas might be made payable in September-October, as then the ryot has got in his autumn rice and his jute; seven annas in January, as then the ryot has got in his winter rice and cold-weather crops generally, and at these two above periods he will (if ever) be best able to pay in his rent: a small instalment of two annas might be made payable in June.

CHAPTER IX (*c*).

18. The Dacca zemindars object to the details which the receipt is to specify and write:—This will not facilitate the collection of rent, but will throw such obstacles in the way of ordinary village putwaries and gomastahs that they will obey the rule more in the breach than in the observance thereof, and will oftentimes commit such blunders as to throw everything into confusion. Some simple facts connected with the rent of the holding should only be stated, such as the name of the tenant, the date of payment, the name of the landlord, the amount paid as arrears and current rent, &c. I agree in these remarks, and am of opinion that the forms should be as simple as they possibly can be made.

19. *Sections 103-107* (*d*).—Occupant and ordinary ryots cannot, it appears, deposit rent under these sections.

20. *Section 103* (1) (*a*).—I agree with the remarks made by the Burrisaul zemindars that "the money ought to be tendered to the landlord before making a deposit to the officer appointed to receive the deposit."

21. *Section 119.*—The Burrisaul zemindars say:—"This section is very hard and inequitable; the limitation put to money-rent is altogether uncalled for, and will work prejudicially to the real interest and improvement of the land." But Mr. Dutt entirely differs from them, and says:—"It will not only not be injurious to improvement of land, but it is essential to such improvement that the actual cultivators are not rack-rented, and that there is a limit set beyond which their rent should not go: that limit, with reference to ryots and under-ryots, *i.e.*, with reference to all the cultivators of the soil who do not enjoy occupancy right, has been fixed at $\frac{5}{16}$ths of the gross produce of the land, and I do not see what objection could be taken to this: zemindars will not be affected by this section at all, the only class of men who will be affected by this section are lazy superior ryots, fast drifting into the status of middlemen, who sublet their lands and try to exact a high rent from the actual cultivators in order to obtain a large margin of profit to themselves after paying their landlords. It is only proper that this lazy class should be discouraged, and that a limit should be set to their profits and exactions from the actual cultivators: it is only proper that the actual cultivators should be protected. I have remarked in paragraphs 3 to 6 that, under the present provisions of the Bill, a very large class of ryots will be unable to acquire the right of occupancy; it is all the more necessary therefore that some protection against undue exactions, such as is comtemplated in section 119, * * * should be bestowed on this large class of the actual cultivators of the soil."

I quite agree with Mr. Dutt in his views. Five-sixteenths of the annual value of the estimated gross produce would give a figure some four times the amount of rent now paid by ryots, and should therefore be sufficient.

22. *Section 128.*—Mr. Dutt states, in opposition to the Burrisaul zemindars, that:—"As agricultural prosperity and the improvement of the soil are the main objects of the present legislation, section 128 should, I think, stand as it is. Under the provisions of the present Bill, a large class of the actual cultivators will be incapable of acquiring occupancy rights, and it would be ruinous to agricultural progress if this large class were stopped from

making any improvement at all without the landlord's permission; it is well known such permission is seldom given without a heavy and almost prohibitive *salami*."

23. The only restriction I would impose is on the digging of tanks. This, if not looked after, may cause serious damage to landlords. A ryot in a fit of enthusiasm or recklessness will dig a tank in the midst of some first class lands, and then when the fit is off him leave the tank to be covered with rotting vegetation, and take no more trouble for or care of it, thus causing an eyesore and nuisance instead of goods. I have seen many such cases in my long experience in Eastern Bengal.

24. *Section 129.*—The Dacca zemindars say:—"If a ryot is evicted from a holding in default of payment of rent, there is nothing in this section which will prevent his demanding compensation from the landlord. This is very unfair. This is encouraging a defaulter; while it is the duty of Government (considering the stringent sun-set law) to afford every facility to landlord in the realization of rent."

Government must afford all possible facilities.

25. *Section 133, proviso.*—Mr. Dutt writes:—"The second clause of the section wisely provides that lands should not be measured oftener than once in ten years. The zemindars' desire an exception to be made in case of chur and jungle lands: I think the zemindars' contention to be reasonable and fair."

I agree with Mr. Dutt in thinking that chur lands in this part of India should be excepted. This section would prove a cause of heavy loss of revenue to Government, if applied to Government khas estates, which are nearly all chur lands.

26. *Section 134.*—In Mymensing tenants often refused to come forward and point out their holdings when the landlord was measuring. Zemindars very often are wholly ignorant of the exact lands held by their tenants.

27. *Section 142 (e).*—These sections will entail on Government a good deal of cost, and the Government pleader will have to attend, and his fees to be paid. I do not see why the Collector should not have the power of issuing the notice and making the order. The Collector is generally quite as experienced an officer as the Judge.

CHAPTER XI.

28. The provisions of this chapter appear to me to be good, except those in the proviso to section 160. This proviso should, in my opinion, be cancelled, as it will apparently admit of the whole thing after it has been settled by the local Government being re-opened, and the whole quarrel or dispute begun over again under some pretext afforded by these four clauses. This, if passed as it is, will, in practice, probably, render the whole chapter null and void.

29. *Section 179* (1).—As distraint will be made by the civil court, I would substitute the words "High Court" for the "Board of Revenue," as entered in this section.

30. *Sections 191-206.*—Mr. Dutt reports that the civil court officers with whom he discussed the matter "are of opinion that very great facilities are afforded. They say that the majority of the suits could be disposed of still more speedily, if section 196 was so modified as to allow evidence to be recorded in a summary manner in non-appealable cases. Zemindars, whom I consulted in the matter, expressed a desire that the same simple procedure, which was adopted by Deputy Collectors under Act X of 1859, may be followed by munsifs in rent suits. I mention these suggestions in accordance with the wish expressed in paragraph 117 of the Statement of Objects and Reasons.

These suggestions are good.

31. *Section 198 (b).*—The Sub-divisional Officer of Manickgunge, Babu Bepin Behari Mookerjea, says:— "If the local Government be authorized to empower officers, as provided in this section, to exercise final jurisdiction in suits for arrears or for penalty when the amount claimed does not exceed Rs. 50, the power is very likely to be vested in munsifs. I think this will be of great advantage to landlords, as it will enable them to have their rent far more speedily realized than at present. The proviso to this section, however, empowering District Judges to call for the records, and deciding the case on motion would be calculated to delay the ends of justice by enabling a party against whom a decision is passed in the court of the first instance to appeal in effect from that decision. This would defeat the very object for which the section has been framed. If the courts can be entrusted with the powers of a Small Cause Court without any such proviso, it is difficult to see why similar confidence should not be placed on them in matters of simple arrears of rent and penalties."

32. The Dacca zemindars say:—"The limit of Rs. 50, in clause (6) of this section, is very high. This amount will cover the majority of rent suits, and as such cases will, in the first instance, be tried by a Munsif, an appeal should lie from his decision to the Judge or Subordinate Judge."

I do not see why the provisions of Act VII (B. C.) of 1880 should not be extended to zemindars in cases where rent is due (there being no dispute as to the rate); the zemindar might apply to the Collector in the same manner as is now done by a manager of a court of wards estate, the cost of an extra Deputy Collector to do the extra work, might be paid for out of fees to be levied at so much per cent. on the amount of rent to be realized.

33. *Section* 199.—The Dacca zemindars say:—"Section 199 is new, but is not likely to be of any use, and will certainly be limited in its application. The ryot who disputes the plaintiff's claim, is not likely to act so foolishly as to admit that the arrear is due to him; such cases will be very rare, and will not be of any help to the generality of landlords. What

would really facilitate the realization of arrears would be to provide for the absolute forfeiture of the right of occupancy on non-payment of arrears of rent, either on the due date, or, at the latest, on the fifteenth day before the last day of the next payment of the Government revenue, provided the arrear be established to the satisfaction of the court where the suit will be tried; or let it be provided that the ryot should deposit in court the amount sued for before filing his defence, if the suit be a contested one, of course, reserving his power to sue the landlord for damages, should the claim turn out to be false, or should the claim be for a greater amount than he is entitled to get. Without some such stringent provision, it is vain to hope that the ryot will be regular in his payments. The provisions relating to distraint are, no doubt, favourable to landlords, but distraint is almost unknown in East Bengal.

No. 3356—C, dated Chittagong, the 30th June 1883.

From—E. E. Lowis, Esq., Commissioner of the Chittagong Division,

To—The Secretary to the Board of Revenue, Lower Provinces.

With reference to your No. 351 A, dated the 29th March 1883, I have the honour to submit the following remarks on the proposed Tenancy Bill.

2. I have obtained the written opinions of the Collectors of Noakholly and Tipperah, as well as of Sub-Divisional Officers and others, and I have personally conferred on the subject with the Collectors of Noakholly and Chittagong. The Chittagong land-owners have also favoured me with their views, which they desire should be laid before the Board. I accordingly forward their petition in original.

3. Speaking generally, I may say that the introduction of this measure is viewed by all whom I have consulted on the subject with the gravest apprehension, as tending to embitter the relations between landlord and tenant, and likely to lead to a crop of litigation, with all its accompanying frauds and chicanery, which must in the end injure and not benefit the ryot. These views have been expressed, not only by landlords, but by native officials unconnected with land, and they are based mainly on the conviction that the provisions of the Bill do not deal with facts as they really exist, but seek to evolve and insist on theoretical privileges, as appertaining to the ryot, which that class have never enjoyed, and which they are for the future to enjoy at the expenses of the landlord.

4. These apprehensions, I may add, are not allayed by the remarks contained in paragraph 10 of the Statement of Objects and Reasons, that the present Bill is a mere prelude to what may be expected to follow, when the whole law on the subject comes to be codified; and it is urged that, if this measure is not to be considered as in itself complete, it is hardly worthwhile introducing it, since the effect will most inevitably be a crop of litigation and general disturbance of the agricultural community.

5. I believe, however, that the present Bill does enunciate the principles on which any future codification of the law will be based, and indicates the lines which future legislation will follow. I do not therefore share the apprehensions noticed above, as to want of finality in the proposed measure, though I do most certainly concur in the opinion that its provisions are quite inapplicable to the condition of things, and the system of land tenure existing in this division, and more particularly in the districts of Noakholly and Chittagong.

6. I would, however, wish to guard my remarks from misapprehension, by saying that I discuss the Bill and record opinions regarding its provisions, only so far as these refer to that part of the country with which I am more intimately acquainted; with the applicability of the proposed law to other parts of Bengal, with their varying conditions, I will not deal, but will confine my remarks to that tract of country with the administration of which I have had most extensive practical experience. As regards Behar I have nothing to say; I have never served in that part of the country. I know nothing practically of its system of landed tenure, and I cannot say whether some relief to the cultivating classes is urgently demanded or not; but as regards this division, I feel sure that any change in the existing law is not urgently called for, and that the provisions of the Bill which appear to have been drawn to meet the case more especially of Behar, do not apply to this part of the country. In so saying, I do not for one moment wish to detract from the ability which has been displayed in drawing up this Bill, or from the soundness of the arguments wherewith its provisions were so ably supported by the speeches in Council; but at the same time, I cannot help observing that the proposed measure is intended to meet a want arising in another province, and presupposes a different condition of things; though this is an objection that, in dealing with revenue matters, must always arise, since it is almost impossible that any law dealing with tenant-right could be framed, comprehensive enough to include the different systems prevailing in Tirhoot and Chittagong. Almost as well might we expect one law to govern the landed interests in England and France; the former with its large landed proprietors, the latter with its minute peasant proprietary holdings.

7. The present Bill having been apparently framed mainly to meet a difficulty in Behar, its provisions are, I presume, based on data supplied by the existing state of things there; the arguments in support of it therefore fail, when we seek to apply them to another part of the country, as they assume a system of tenure which does not exist in these parts, and treats certain privileges as attaching to classes which do not in fact enjoy them now, and which never have enjoyed them in time past.

8 The essence of the Bill is the protection of the ryot; and though no definition of a ryot has been given, it is plain that, in the proposed law, the term is almost synonymous with cultivator, any one in fact who holds land for the purposes of agriculture, horticulture, or pasture; every such ryot who holds land in a village for a period of 12 years is a settled ryot, and every settled ryot has rights of occupancy. In other words, certain very considerable advantages are held to accrue to the person holding the position of a khudkhast ryot, that is, of a villager who cultivates land in his own village. These khudkhast or settled cultivators, it is said, were the persons whom it was the policy of the earlier Legislators, at the time of the decennial settlement, to protect; it was in their favour that a reservation was made when the State lands were made over to the zemindars; and for their benefit that Act X, and subsequent legislation, has been undertaken.

9. An important element in the idea of a ryot, as thus expressed, is personal cultivation; and, I take it, personal cultivation, as distinguished from causing the existence of cultivation, is a distinguishing feature in the khudkhast ryot, as understood by the supporters of the proposed law. I therefore propose to enquire to whom in this part of the world the status of khudkhast ryot may be held to apply, though the word itself is not, I may add, in present use. In pursuing this enquiry, we will derive much assistance from a consideration of the record of the survey and settlement of this district, undertaken in 1765, very soon after this tract of country was ceded to the British; the more so, as those proceedings were carried on, we may be perfectly certain, in strict accordance with native methods, and afford a picture of what the Mahomedans themselves would have done under similar circumstances, for we were, at the time, not the paramount power, but administrators of the revenue for the Mahomedan rulers of the country. Under these circumstances, it is instructive to notice on what class the assessment was then imposed; to discover who was held responsible for the State share of the produce of the land. The following note on the early history of the district, which I reproduce from a separate report on another subject, will tend, perhaps, to elucidate this subject.

10. The district of Chittagong is a long strip of country, about 120 miles long, with an average breadth of 20 to 25 miles, lying along the sea coast, and bounded to the east by ranges of hills, which run back into the Burmese territory. It is bounded to the south by Arracan, and to the north by Hill Tipperah. Although the district is narrow, it is intersected nearly throughout its length by a range of hills; and there are but few places that are not in the vicinity of broken or hilly country. Before its occupation by the English Chittagong was hemmed in on all sides by Burmese territory, and at no time, I fancy, was the hold of the Mahomedans on it, anything but slender.

11. In the reign of Akbar, the province of Chittagong seems to have been overrun though it was probably not properly annexed. It was assessed in his time, by estimation as yielding a revenue of Rs. 2,85,607; there is nothing to show, however, that this amount was ever realized. This was in 1552, and subsequent to that, the country was again overrun by the Arrakanese. From the end of the sixteenth century, however, a tide of emigration seems to have set in from Bengal, and more particularly, it is said, from Gour, the old capital of Bengal. These emigrants settled on, and cleared plots of jungle, and were known as khoshbash ryots. In the then disturbed state of the district, and favoured by the jungly and hilly nature of the country, most of these khoshbash settlers, very probably, paid little or no rent to any one, and thus there was developed amongst them a spirit of independence which enabled them, later on, to assert their right to separate recognition. I may add that there is no trace of any village community ever having existed, but each plot of clearance in the jungle, or series of plots, came to be claimed by the person, through whose exertions or influence reclamation had been effected. There never was any village community with resident cultivators, entitled to privileges, as against non-resident cultivators, but mere aggregates of scattered reclamation, the owners of which held together no doubt for purposes of mutual support and defence, but who were quite independent, so far as possession of the land went.

12. Chittagong was again overrun by the Mahomedans, for in 1658, it again figures in the rent-roll of Sultan Shah. It must, however, have again lapsed into the hands of the Burmese, for we find it was again conquered by Alumgeer in 1665. During all this time emigration seems to have continued, and small settlements of "khoshbash" ryots appear to have sprung up in the different directions. The districts continued under the Mahomedans till 1760, when it was ceded to the English.

13. As soon as the Mahomedans finally established themselves in the country, the first step, of course, was to collect rents from the "khoshbash" ryots, already settled, and these men, to save themselves from the annoyance and trouble of visit from the revenue underlings, attached themselves to some person having influence at the Nawab's court, and paid their revenue through him, and so these self-elected agents came to be called tarafdars طرفدار from the Urdoo طرف on the part of a partizan. Hence it is that each taraf, or permanently-settled estate, is even now a mere aggregate of talooks, as these khoshbash holdings came to be called, the component parts of each being scattered in different villages and different thanas. Such a thing as a compact estate is unknown in Chittagong. The talookdars must have chosen their own tarafdar, otherwise we would not find every estate, whether large or small, scattered piecemeal over the district. Had the tarafdars obtained the land and settled talookdars, or had Government farmed out the collections to tarafdars, it is quite clear that

such a fragmentary division would have been avoided, opposed as it is, to all facility for collection. Looking to the facts as they stand, it seems to me perfectly clear, that the popular belief is the correct one, *viz.*, that the talooks were the original clearances, and that, for their own convenience, these talookdars elected to pay revenue through the agency of certain individuals, known as tarafdars, an aggregate of such scattered holdings forming a taraf.

14. In short I believe the tarafs to have been recognized only as affording a means of collecting revenue from the scattered independent holders, the tarafdars having at first no proprietary title, nor being vested with any authority over waste, which was open to any one to settle on and clear, the only condition being sanction in the shape of a pottah, not from any tarafdar, but from the Nawab, or representative of the Sovereign, such clearances being assessed in due course by Government officials, but paying revenue so assessed through some tarafdar. After some enquiry, I have been fortunate enough to discover one of these old Nawabi grants; it is in the possession of one of our noabad talookdars, one of whose ancestors was an officer at court, and at one time possessor of much property. I have not been able to trace the particular talook or talooks that arose out of this permission to cultivate; but it seems to indicate the manner in which these talooks continued to come into existence, even after the Mahomedans had finally conquered the country, and to prove that these holdings were not created by, or under authority of, the tarafdars, but held directly from Government.

5. I give below a translation of the pattah alluded to:

"According to the kabulyat executed by Mamea Ashek, this pattah is granted to him on the following terms, for the jungle land situated in mouzah Shuluk, in chakla Rangonia of Islamabad, within the boundary noted on the margin, exclusive of the land contained in the pattahdars of pergunnah Nezam Nagar that he will bring the land into cultivation by inviting settlers who have no fixed abode for themselves. He will receive an allowance of three kanis and four gandas for each droon of waste which he makes culturable; and remaining quantity of land will be settled with him, and he will have to pay the Government revenue. It should be remarked that the khanabari and nankari lands will be settled at noabad rate, besides he will not have the responsibility of making bridge, &c.

South by Gur Cherry, north and east by Kazi Mahomed Sagri's abad land, Raktchery and Qekonea nala, and west by Shopleja dhebee and Hatia tank.

	RATE.	Rs. A. P.
First year, 1120M.S.	Map	(Rent free.)
Second year, 1121M.S.	Ryoti	1 8 0
	Unintelligible	0 12 0
	Khamar	0 8 0
Third year, 1122M.S.	Ryoti	3 0 0
	Unintelligible	1 8 0
	Khamar	1 0 0
Fourth year, 1123M.S.	Khamar	2 0 0
Dated 22nd Joomadil awal, 1120M.S.	Ryoti	6 0 0
	Unintelligible	3 0 0

The pattah bears no signature, but is stamped with a Government seal, and bears date 1120 Maghee, equivalent to 1758 A.D., or only two years before the cession of the province to the East India Company. It will be observed that the intention evidently was to allow the grantee to bring as much land as he could under cultivation; such land to be hereafter subject to measurement and assessment, a proprietory allowance of more than one-fourth, or over four kanis, being granted for every droon of land then found to be under cultivation. The allusion made to the noabad rate, on the khanabari and nankari lands, means that they are to go rent-free; at least such rent-free allowance was made when we come to measure the district a few years later, a measurement which was probably undertaken in strict conformity with Mahomedan usage.

16. It would appear that the Mahomedans merely confirmed the usage which they found prevailing, and without going down to the actual tiller of the soil, contented themselves with assessing the customary rate of rent on the reclaimer of waste, and looking to him for the due discharge of the Government demand, left him to make what arrangements he could to meet it The position thus assigned to the khoshbash ryot was, however, something more than what any one supposes to attach to that of ryot now, for the former were allowed a deduction, free of rent, of one-fourth as khanabari and nankar or pattahdari, *i.e.*, space for a house and offices, and allowance as proprietor or holder of the Government permission to cultivate. These men were something more than what we would call ryots, but it is evident that the Government did not look below them, or seek to record or regulate any rights below theirs. By custom and tradition the privilege to hold at a customary rent has attached to the person bringing land under cultivation, and he is the person entitled to consideration, and not the actual cultivator. The same idea prevails to this day; and in discussing this matter with talookdars, I have been told that the right to the land is vested in the person who, by his exertions, causes cultivation (chash kerwata), and not in the person who merely tills the ground (chash karta).

17. It is suggestive also to note how even to this day, in popular estimation, a distinct proprietary title is held to attach to a talook; ask almost any respectable looking Mahomedan villager you meet what he is, and he will answer a zemindar; by which he means that he has a share in possibly a small talook, only a few acres in extent. A tarafdar is not a zemindar, in popular estimation, but only a tarafdar; while the real zemindar, the proprietor of the soil, is the talookdar. The retention of this popular belief is all the more singular, as

the policy of our Government, for the last century, has been to exalt the tarafdars into the position of land owners and absolute proprietors.

18. By such means as I have described, the large tracts of jungle existing in Chittagong were taken up, in the first instance, by talookdars, or "khoshbash" settlers; while the work of subsequent reclamation went on by the agency of the same class; the cultivation, when discovered, being assessed, but assessed less one-fourth, granted rent-free as an allowance for the talookdar, under the designation of khanabari and pattahdari, *i.e.*, for homestead lands and allowance due to the holder of the pattah; these *bu-asi* proprietory ryoti-holders being the only recognized ryots, the only persons who were liable for the share of the produce of the country which Government was entitled to claim. Had this district never been measured, much of what I have asserted might be held to rest on mere surmise; but fortunately the district was measured, and the records of that measurement afford proof of the status and position accorded to the talookdars.

19. As I have said, the district of Chittagong was ceded to the British in 1760, and measures were at once taken to ascertain the resources of the country, and the revenue derivable therefrom. To do this, it was of coure necessary to ascertain what amount of land had been brought under cultivation at different times by the reclaimers of waste, what was the proper amount payable, and by whom. Accordingly, in 1765-69, the entire district was measured, and engagements entered into with the tarafdars for the amount of revenue assessed on the talookdars. Undertaken as it was, immediately on our assuming charge of the administration, we may safely assume that this measurement was made in strict accordance with native ideas, and that the state of things which records reveal was such as would naturally appear to the native mind without any admixture of European notions.

20. I need not enter into a minute description of these old records; suffice it to say that they show the assessment to have been made on the tolookdars or khoshbash ryots; the rents paid by actual cultivators are not recorded, their names only appearing in the chittah or measurement paper, which merely shows that when the amin came round, a certain person was in possession of certain plots, as cultivator, subordinate to some talook. The tarafdars again were liable for the assessment imposed on the aggregate of talooks, which went to constitute the taraf. The prominent feature in the proceedings is the khoshbash ryot or talookdars.

21. At the time of the decennial settlements, the engagements with the tarafdar became fixed and permanent, and it was the intention of the Government of Lord Cornwallis to fix also the demand against the talookdars, for reference is made to them, in the correspondence of the period, as our fixed jumabandi ryots, while the necessity of seeing that the zemindars do not exact from them sums in excess of their engagements, is insisted on. I have no doubt, that, *in fixing the demand against the tarafdars or zemindars*, it was the intention of Government *that the rents payable by the jumabandi ryots should be limited also, and that they should not be called on to pay any amount beyond that entered in the jumabandi*; but, at the same time, I do not find that any limit was implied, or intended to be laid, on the amount payable by the cultivators to the talookdar ryot; and as a talook might comprise land in half a dozen villages, it follows that the privileges of the ryot attached not to the cultivator, but to the person who personally, or whose predecessors, caused land to be reclaimed.

22. The authorities of the time evidently regarded these talookdars as the true ryots, and indeed they were khud-khast ryots in the fullest sense of the word, for though they could hold land in more villages than one, the lands so occupied were really *khud*, their own, that in which they had a most undoubted right, though the cultivation might be carried on by paikasht or pahikhasht ryots, *i.e.*, by non-resident cultivator, or migratory tenants-at-will. The land in a state of nature belongs to the State, but it was held that whoever cleared it, acquired a *quasi*-proprietary title, even though he might not be the actual cultivator; there was clearly no intention of relegating such a person, simply because he had cultivators under him to the position of an intermediate holder; for the responsibility of the payment of the State revenue rested upon him and not on the cultivators, who, in the first instance, must generally have been migratory and non-resident.

23. Gradually, however, some of the rights attaching to original reclaimers have passed to their subordinate tenants, not, however, in virtue of long occupation by the latter. At first, as I have mentioned, the khud-khast ryot generally maintained cultivation by means of migratory tenants, who held on to the land only so long as was convenient to them to do so—a system at once troublesome, uncertain, and involving risk, which the original ryot was only too glad to escape, by letting to permanent tenants. In order, therefore, to secure such permanent tenants, it became necessary to grant permanent leases to persons of the cultivating class, who took the places of the original reclaimer, and by payment of a fixed rent, relieved the former of all the trouble and risk of dealing with the migratory pahikashts. These holdings were called itmams, and did not necessitate actual residence in the village where the land of the itmam might be situated.

24. The itmam is only a modified form of the original holding, bereft of its *quasi*-proprietary character. The original conception of the lease includes fixity of tenure, and fixity of rent, but I do not find that the privileges of khanabari and pattahdari were ever handed on, or could be handed on, to an itmamdar. An itmamdar can grant a dur itmam, or a "kaimi" (permanent) ryoti lease, but in the chain, from the original reclaimer downwards, there must always be a lease, which is generally permanent; mere occupation of the land or residence in the village goes for nothing. The root of all sub-divisions is the 1,765 talookdars, from him they descend, partaking at any rate of his privilege of fixity of tenure and rent. Below these again come the mass of karsha cultivating ryots, who are practically

tenants-at-will, sometimes holding on a pattah, often on mere verbal agreements, who settle year by year the amount of land they intend to take up and the rate of rent, and who may cultivate the same lands, if it suits them, for a series of years, but who are not responsible for more than the year's rent, and may cultivate more or less land at pleasure.

25. It will be obvious, from what I have said, that the system in existence here is very different from that contemplated by the proposed law: here we do not find the cultivator acquiring certain privileges in virtue of his residence in a village, and continuous occupation of the village lands; but a khud-khast ryot here is one who derives his title from original reclamation, and enjoys certain privileges in return for the risk he incurs in keeping land under cultivation.

26. In Chittagong there is great variety in the tenure of land; some talookdars hold as of old, dealing directly with "chashas," and making settlements year by year, for more or less land, at higher or lower rates, according as the season is good or bad, promising or otherwise; others cultivate a portion and have cast the burden and responsibility of treating with chashas on to itmamdars; again some itmamdars cultivate with their own hands, some do not; some treat with chashas, some have granted dur itmams; but whatever may be the arrangement, the introduction of the new Act would be most disastrous, for every chasha could then lay claim to occupancy rights in lands belonging to half a dozen different estates. Every village comprises, as a rule, lands of several estates; without changing his residence, therefore, a cultivator could cultivate fresh land every year, and at the end of twelve years claim occupancy right in them all. It is not the zemindar who arbitrarily shifts his ryots, but the cultivators who change their holdings. It is almost impossible, for one who has not had practical experience of this district, to understand the way in which land is mixed up in it; a kaini ryot, in addition to his own patch, cultivating, as "chasha," lands belonging to a neighbouring talookdar; an itmamdar letting his lands which are at a distance from his house, while he cultivates as "chasha," land belonging to some one else nearer home.

27. The Chittagong landlords in their petition have alluded to this marked peculiarity, and referred to some figures given in Sir Henry Rickett's report on noabad, foot note to page 26, volume I of printed selections, which show the extreme diversity of tenure, which may be found, even in a very small village. Sir Henry Rickett writes:—

"The village contains 356 acres only; the tenures are distinguished by different colours. It is to be borne in mind that each description of tenure is held by many proprietors. There are no less than 213 holdings in this small village as follow:—

Tarafs	35
Talooks under khas tarafs	33
Noabad talooks	30
Noabad plots left unsettled	29
Lakhiraj mehals resumed and under enquiry	73
Ghosals' talooks	3
Confirmed rent-free	10
TOTAL	213"

In this village, I have no doubt that an interchange of lands, such as I have noticed, takes place; and that the small proprietors should regard the introduction of the proposed law, with apprehension is not surprising. The Bill is, in its principle, unsuited to the existing state of things here, and should not be extended to this district.

28. In Noakholly the state of things is much the same as here; estates are everywhere split up into talooks, and these again into howlas and nim-howlas, which latter very much resemble our itmams and dur itmams; there is no such allowance in this district as khanabari and pottahdari; but the talookdar has his land measured by a longer rod than he allows to the cultivating ryot; the howladar has the privilege of a longer rod than the nim-howladar, and so on.

29. As to Tipperah, that district has not been long enough under me to enable me to master, as fully as I could wish, its peculiar system of landed tenure, which, though it differs in some respects from that of Chittagong and Noakholly, is still not the same as that which prevails further north. I find here a system of charcha measurement in vogue, whereby the proprietors discover, through charcha amins, the amount of land for which each particular ryot is liable to pay rent. So far as I can ascertain, the rate prevailing in the village is accepted for all, but the amount of land under cultivation appears to vary, the agreement between the cultivator and his landlord being often verbal. On the whole, I do not consider that the new Act should be extended to any part of my division, since its provisions are clearly unsuited for application in Chittagong and Noakholly, where their enforcement must lead to a subversion of the relations existing between landlord and tenant.

30. Besides the inapplicability of the principles of the Bill, to the conditions of this division, there are one or two of its provisions, that appear to be open to objections on general grounds.

The provisions of chapter (IX) C as regards receipts for rent, statement of account, &c., could under no circumstances be introduced into this district, where a large proportion of the holders of talooks, and even of permanently-settled estates, are illiterate people who cannot and do not keep accounts properly so-called, for whom it would be quite impossible to carry out the provisions of the law. Many of the permanently-settled estates are exceedingly small, an acre or two in extent, and the owners, often women, are really peasants, from whom it is quite hopeless to expect elaborated receipts and statements of account.

31. Then, again, as to the voiding of contracts the proposed law appears to introduce a dangerous precedent. In certain cases the provisions of the law are to be held to override contracts entered into with deliberation; and this without any enquiry whether the contract was voluntary or not. So far as my experience goes, the ryots are very well able to look after their own interests, and hardly require to be thus hedged round with protective enactments, as appears to be thought necessary; they are only too ready to evade their contracts, if it is to their interest to do so; and are quite prepared to support such evasion, by every artifice that the law renders possible, as well as by means not strictly lawful; it seems hardly expedient, therefore, to teach such men that the law does not recognize the keeping of contract, and that self-interest can be held to be a valid excuse for contravening the terms of an agreement. Cases may arise where it is evident that an unjust and one-sided contract has been entered into, as the result of deception or force, but surely such cases may be left to be dealt with by the application of the laws of equity.

32. Objection has also been taken, and with some reason, to the constant reference of every petty dispute to the civil or revenue authorities. One native gentleman writes: "A country, of which the members cannot settle their disputes without the intervention of third parties, is a country which is on the high road to ruin."

"The landlord must take no enhanced rent; the ryot must agree to no enhancement unless a revenue officer or a civil court allows them to do so. These sections altogether prevent the possibility of mutual understanding between the two parties on the question of enhancement; and I am of opinion that their tendency cannot but be highly mischievous.

"The first principal objection to the Bill, as it stands, is the impossibility of doing anything without taking the aid of revenue officers or civil courts. The work of the executive and judicial officers will immensely increase, but that is nothing to the spirit of antagonism that will arise, and the state of chronic warfare which must ensue. Let landlords and ryots have recourse to registration or litigation only when they do not agree among themselves; but let us throw no obstacle in the way of their doing so. Let us not sniff fraud in every agrarian transaction.

"It is not those who are protected all round, but those who are left mostly to grapple with difficulties that succeed in life. It is not those nations that were protected by the State that are the most enterprizing; it is those who were most left to their own resources that have become the most enterprizing. Let the ryots be protected against force or violence, let them be protected against the more serious and gross forms of fraud, but in their own future and lasting interests, I say let us not try to save them against their stupidity, carelessness, or want of activity.

"The second principal objection is the way in which contractors are treated. A contract which purports to forego a right, arising from the mere lapse of time, should perhaps not be enforced; but a contract which purports to forego a right accruing on a certain contingency, must never be ignored. Truth and honesty must be taught to the nations of India before they can reach back the place which they believe they once occupied, or before they can become really civilized. The morality which considers covenants to be duties that must be performed has still to evolve in India, and it would be dangerous to override contracts and teach the tenantry that considerations of personal convenience are paramount over considerations of moral obligation.

"Clause 2, section 73, says that a contract in a certain case made in favour of the ryot must be enforced, while section 50 protects him from contracts which are against him. Clause 2, section 74, enforces a contract which is against the zemindar, while sections 87 and 90 repudiate contracts which are in his favour. These instances will teach the ryot that there is no moral obligation in promises, and that he must always consider his own convenience in dealing with others. This is a dangerous doctrine to teach to half barbarous people. If 90 per cent. of the tenantry have been able to acquire tenant rights under a system when contracts have been held valid, there is no need now to make them invalid; the pleas urged for the proposal in paragraphs 33 and 48 (objects and reasons) do not hold good.

"Customs also, when in favour of landlord, must be ignored, and, when in favour of ryots, must be enforced, clause 2, section 73, and clause 1, section 81, lay down, &c."

33. There is much truth in the above remarks, and I feel sure that in the event of any dispute arising between landlord and tenant, in any part of the country to which this Bill may be introduced, it will be found impossible to carry on work with existing establishments, even if such agency can stand the strain of applying the provisions of the law in ordinary times.

34. In conclusion, I may remark that I have not overlooked the saving clause as regards custom, but that clause is evidently meant to apply only to exceptional cases; and when the whole set of tradition and custom in a tract of country is against the fundamental principle of the proposed law, it seems to me inadvisable to extend such law to that tract, and have most of the cases decided outside its provisions.

35. There is, however, one provision of the Bill, which must be extended to this division, and that is the one regarding record-of-right. There is no district in Bengal where the right to land is so mixed and confusing, or where we know less of the laws which govern the relations existing between the different classes of cultivators; the division of the lands is infinite, the interchange of holdings constant, and we have too long regarded the varied tenures which exist, as governed by the same laws as those of the rest of Bengal; in fact, they differ in nature and working, and nothing would tend more to strengthen the adminis-

tration, and render possible the successful working of the numerous Government estates here, than a survey of the district of Chittagong, with a public and authoritative record-of-right, and a proper understanding of their relative value.

Dated Chittagong, the 11th June 1883.

From—NITHYANUND ROY and others, Zemindars and Talookdars, Chittagong Division,

To—The Commissioner of the Chittagong Division.

WE, the undersigned land-owners of Chittagong, beg respectfully to make this petition, for consideration of Government, in connection with the Rent Bill.

2. We submit that the provisions of the Rent Bill are generally unsuited to this district. In regard to land proprietorships and tenures, Chittagong is not like other districts. It has some peculiarities which deserve notice.

3. A reference to Sir Henry Ricketts' report, page 22, Vol. I, Noabad correspondence, will show that in 1848 there were in this district 663 *mehals*, of which the revenue was below 1 anna.

2,571	2 annas.
5,878	4 annas.
8,979	8 annas.
7,955	1 rupee.
26,046	

The number of each of the above descriptions of *mehals* must have considerably increased after that time.

4. Sir Henry Ricketts in the same report stated that in a small village, containing 356 acres, there were not less than 213 proprietors, holding the following descriptions of *mehals* :—

Taruffs	35
Taluks under *khas taruff*	33
Noabad taluks	30
Noabad plots left unsettled	29
Lakheraj mehals reserved and under enquiry	73
Ghoshals' taluks	3
Confirmed rent-free	10
	213

No note was taken at the time of the number of tenants under the 213 proprietors, but every one acquainted with this district can easily imagine that large number of tenants of different descriptions must have existed under each proprietor.

5. As an illustration of the proprietary holdings, we quote the following paragraph from Sir Henry Ricketts' report :—

"It is no exaggeration to say that such is the sub-division and enlargement of property, that in some parts a man cannot go to his field or from his field without committing a trespass. In other parts, small tenures are found divided into narrow strips, a few feet wide, one end of each sub-division joining a common pathway by means of which each petty proprietor may reach his possession. * * *"

6. The above description refers to a state of things which existed 30 years ago, but matters have gradually become worse.

7. The numerous petty proprietors, under the existing law, have no adequate relief for recovery of rents. They cannot sue for rents annually, the amounts being very small and the costs of suits being very high. They have to pay Government revenue by borrowing money. It is not only they, but the few big proprietors that we have here, who also, not being able to realize their rents, pay revenue by contracting debts, and many families have ultimately been ruined by so doing.

8. Your Honor is aware that at every revenue-sale a large number of *mehals* are advertised for sale. The proprietors in many cases submit to that being done for no other reason than that thereby they hope to induce their tenants to pay rents. They sometimes run the risk of losing their *mehals* by adopting such a course.

9. Among the big proprietors there are many here who have expressed their willingness to make over their estates to the Court of Wards. Their inability to realize rents is a great inducement for their doing so.

10. It is a fact that the ryots of this district have the upper-hand. The Government and the Court of Wards, with the exceptional procedure for realization of rents, are not able to realize rents with facility. Under the existing law we cannot obtain enhancement from tenants. When they combine we cannot even recover what is due at existing rates.

11. The enhancement law is a dead letter here. The proprietors have not been able to enhance rents according to the principles laid down in the law; the civil courts always adhering to the strict letter of it.

12. Here there is a class of proprietors, who are also tenants. They not only cultivate their own lands, but also those of others. Their position is comparatively safe.

13. But as regards the class whose lands are cultivated by others, we appeal to your own experience, and to that of Mr. Manson, to say whether they or their tenants are in need of protection here. These tenants abandon our lands in bad seasons and enjoy our lands in good seasons; we cannot realise our just dues from them by any summary mode.

14. In this state of our helplessness, the Rent Bill, instead of proposing to grant

adequate relief, proposes to make restrictions and limitations in respect of the existing remedies. There is to be no summary procedure for the recovery of rent.

15. The Bill certainly will be hailed by the tenants as a great boon. We continue responsible to Government for various duties as proprietors, and our lands remain liable for periodical sales for non-payment of Government revenue. But the tenants are now to be raised to the status of co-partners with us in our lands. They are to enjoy powers and privileges which we are bound to respect.

16. The Bill aims at a redistribution of property but not of liability. It does not propose periodical sales of all tenancies for non-payment of rent. It proposes to make occupancy ryots' rights transferable. There will be little objection to periodical sales of ryotees when these become transferable.

17. The Bill proposes to do away with private contracts, to put a limit to *khamar* land, to make ejectment practically impossible by limiting the *khamar* to its present extent, to give a new status to the tenants-at-will, and to make distraint entirely a process of court—all this is an interference with the just rights of the landlords.

18. The Bill makes a distinction between *khamar* or private land of the zemindar and ryoti land or land destined for occupation by ryots. It provides that the existing stock of *khamar* land cannot hereafter be increased. (Chapter II.)

19. It provides that there can be no contracts over-riding the incidents attaching to the right of occupancy. These incidents are—(1) That the ryot may use the land in any manner which does not render it unfit for the purposes of the tenancy. (2) That he may make improvements on it as provided by the Bill. (3) That he must pay rent at fair and equitable rates as determined by the Bill. (4) That he cannot be ejected except under a decree passed for breach of certain conditions, &c (5) That he may sub-let the land. (6) That his interest is to be transferable, subject to the certain rights reserved to the landlord. (7) That his interest is to descend. (Section 50.)

20. The bill gives the landlord a right of pre-emption in respect of occupancy tenure. The landlord so acquiring occupancy land may keep it for *nij* cultivation, but if he lets it the tenants shall have occupancy right. (Chapter V.)

21. The Bill prohibits all contracts for enhancement of rent by which a ryot engages to pay a rent more than six annas in the rupee higher than the existing rent, or more than one-fifth of the estimated annual value of the gross produce of the land, where the improvement is neither due to the landlord nor to the tenant, the tenant shall share half-and-half, but the rent shall not be raised in any case beyond one-fifth or 20 per cent. of the value of the gross produce. (Chapter VI.) Existing rents shall not, in any case, be more than double. (Section 76.)

22. The Bill allows sub-letting by occupancy ryots, an ordinary ryot or tenant-at-will shall be subject to rents agreed between himself and his landlord, but if he does not pay, he shall not be liable to be ejected, unless the landlord makes good the value of improvement made by him and gives compensation at ten times the annual increase for disturbance. In addition to this a landlord shall not eject an ordinary tenant except (*a*) for arrears of rent; (*b*) on the ground that he has broken some conditions; (*c*) or that he has refused to agree to an enhancement. (Chapter VIII.)

23. The ryots under the Bill shall have a preferential right to make improvements and to receive value of improvements when ejected. (Chapter X.)

24. The power of distraint is retained in a modified form, but it must be made entirely a process of Court. (Chapter XIII.)

25. In rent cases there shall be no appeal against Munsif's decree when the amount decreed does not exceed Rs. 50. (Section 198.)

26. A suit for relief by forfeiture shall not be unless the landlord has allowed the tenant opportunity to pay compensation for breach of conditions. (Section 202.)

27. In cases of large occupancy holding, they may be first put up for sale in execution with incumbrances, but if the sale proceeds do not cover the amount decreed, then without incumbrances. (Chapter XV.)

28. Section 45 defines how the status of a settled ryot shall be acquired notwithstanding any contract to the contrary.

29. We submit that the provision as to *khamar* is against all customs and usages of the district. We do not see why Government should tell the zemindars that they should keep so much land and no more, and that others should have the rest?

30. It appears that a settled ryot, as described in Chapter V, may have a right of occupancy in any land in the village without any reference to the period of his occupation, and in spite of any contract under which he held it. This is a radical change in the existing law.

31. The Bill for the first time creates a new kind of tenants-at-will. They are to have compensations for improvements and for disturbances amounting to ten times the yearly increase, which is excessive and unjust. This is an idea quite novel to our land system.

32. The value of *noabad* land in this district has already fallen from another cause. If this Bill become law, the value of other lands will also fall. Instead of inflicting us therefore with this Bill, the Government, if it considers the zemindar class unnecessary, may do away entirely with that class by granting reasonable compensations to them.

33. In fact, the proposal for further extension of occupancy right, for their transferability and the various restrictions to freedom of contract as also the limit of the maximum of enhancement to a fifth of the value of the produce if carried out, will totally interfere with the vested rights of the zemindars.

34. The zamindars' rights have been enjoyed by them at least for the last 90 years. These have been acknowledged by the law and the courts of British India; on this acknowledgment the zamindars have spent their capital; are these rights to be now interfered with on entirely insufficient grounds?

35 If a tenant made contract with any of us under Act X that his occupation should never give him any occupancy right, why should Government now declare that that contract is null and void? Then, again, if we have *khamar* land which came into our possession by a former tenant's relinquishment, why should it become the property of a ploughman, because it was let out wholly or partly for one or two years, and was not held by us continuously for 12 years?

36. According to the Bill, if one landlord purchase an occupancy ryoti and then let it, the tenant shall have occupancy right Then why shall the landlord pay the price as a fine? In the second year, if that tenant again wish to sell, shall the landlord pay another fine?

37. In this district the value of the rent-suit is generally below Rs. 50. The restriction imposed upon appeals is quite unsuited to this district.

38. The changes proposed are generally objectionable. The Bill has filled the Chittagong zamindars with great apprehensions. If the Bill is to be law, they cannot hope to be free from litigation to an alarming extent.

39. We pray, therefore, that should the Government finally decide upon passing the Bill in its present shape, Your Honor will be pleased to recommend the exclusion of this district from its operation.

No. 586 T. R., dated 24th August, 1883.

From—Under Secretary to Government, Bengal.

To—Secretary to Government of India, Legislative Department.

In continuation of Mr. Bayley's letter No. $\frac{2172}{787}$ C. R., dated the 13th August, 1883, I am directed to submit, for the information of His Excellency the Governor General in Council, the accompanying copies of reports* on the provisions of the Bengal Tenancy Bill, 1883, from the Collector of Bankura and the Deputy Collector of Howrah.

* Letters from the Collector of Bankura and the Deputy Collector of Howrah, enclosed with letter No 477, dated the 30th July, 1883, from the Commissioner of Bardwán.

No. 477, dated Chinsurah, the 30th July 1883.

From—John Beames, Esq, Commissioner of the Burdwan Division,

To—The Secretary to the Board of Revenue, Lower Provinces.

In continuation of my No. 339, dated 22nd June 1883, I have the honour to submit the reports noted on the margin regarding the Bengal Tenancy. The other reports received by me contain nothing worthy of notice.

Copy of Bankoora Collector's report and Mr Sealex' report in original, and Covenanted Deputy Collector of Howrah's report.

2 The Collector of Hooghly has, I find, quite unnecessarily sent a copy of his report direct to the Board.

No. 298G. dated Bankoora, the 21st June 1883.

From—C. A. Samuells, Esq, Collector of Bankoora,

To—The Commissioner of Revenue for the Division of Burdwan.

In accordance with your order, communicated in your No 38 of the 14th instant, I beg to offer the following observations on the revised Tenancy Bill.

The Bill is said to be an amending and consolidating measure; but it appears to contain certain principles, which, though beneficial, are certainly novel—such as the landlord's right of pre-emption of the occupancy right and the principle of compensation for disturbance. It will be advisable to review the provisions in order, offering such remarks as occur to me on each, and finally giving my opinion on the measure as a whole, and its probable effects.

CHAPTER II.

From the use of the term "zeraat," as applied to khamar lands, in the Statement of Objects and Reasons, I am inclined to think this chapter has reference chiefly to Behar. I believe khamar lands were not very common in Bengal. The chapter and definition is almost superfluous alongside of chapter X, under the provisions of which the ryot's interest merges in that of the landlord, unless he declares to hold as a ryot within three months. Neither chapter will prevent the zemindar who purchases occupancy rights from holding the land khas if he wishes; and it is much to be feared that, as that will be the only method open to him of barring occupancy rights, he will now largely resort to this practice, and the result will be a large increase of khamar land—being just the result which the Bill is designed to prevent. There are other ways in which khamar land must come into existence despite the wishes of the zemindar and the Act, namely, where a ryot dies, or vacates his holding or surrenders, and no one can be found to take his place. These lands must remain in the possession of the zemindar as his khas land; and it is therefore scarcely a subject for enactment. Even if the register is made the land is subject to decrease, and, as I have shown above, to increase also, so that the

survey will be merely waste of time, and prove a fertile source of litigation. Another point requiring decision will be, whether all lands held by "bhag-jotedars," or cultivators, who pay a share of the produce as rent, is to be considered "khamar" under the Act. It is generally so considered by the natives, but the tendency of this Act is, if I understand it properly, to regard them as ryots by whom rights of occupancy may be acquired.

CHAPTER III.

Section 16—Seems to go too far, for the reasons above stated. A bhag-jotedar is after all only a labourer under another name. This means of cultivating land is simply employed in lieu of wages, being preferable to wages in giving a man an interest in his work; and no one will be more surprised at the sudden change in his condition than the bhag-jotedar, who is quite accustomed to be changed at the pleasure of his landlord. These people really exist, because the zemindar cannot find a ryot, and that because the land will not pay for cultivation on any other way.

Section 17.—The separation spoken of in this section should be valid only if made with the consent of the landlord. The remaining sections of this chapter seem to be unobjectionable, and will guard the ryot against excessive enhancement: all hard-and-fast rules are liable to act harshly in particular instances.

D.—I look on the provisions regarding registration as very necessary, if they are only enforced; but I am afraid if this is left to the ryot they will be ignored. The District Officer should have power to call for, and examine, these registers, to ensure their being properly kept up. The rate in clause (*b*), section 27, is exorbitant, considering the ignorance that prevails regarding the law.

Section 29.—I see no provision for allowing the landlord to refuse compliance if he objects to the order, either on the ground that the nature of the tenure is improperly stated, or, if he objects to the amount of rent, as incorrect.

CHAPTER V.

This chapter, concerning rights of occupancy, requires no apology at the present time. It is now apparently admitted that only ryots of long standing (kadime) are entitled to these rights. The twelve years' rule is certainly maintained, but the principle involved in section 47 seems to me an almost ludicrous way of making it out. There is to be a perfect transformation scene on a day yet to be fixed. In this draft it is 3rd March 1883. On that date villagers who may be mere tenants-at-will, and may never have held one piece of land for more than three days at a time, will suddenly become ryots with rights of occupancy in the plot last held, *all* contracts to the contrary notwithstanding. This is directly opposed to the law as laid down in section vii of Act VIII of 1869, and renders all contracts under that Act mere waste paper. They would, probably, convert this right into cash at the first opportunity; but I cannot think the circumstances of the case will justify such flagrant infringement of the rights of the zemindar.

Section 49.—Appears to be the result of a confusion of ideas—that is, a confounding of khamar land as it is and as it ought to be. It is a contradiction of terms to speak of any one holding khamar land as a ryot, unless a bhag-jotedar is considered such; and I have pointed out that he is not looked on as a ryot, but as another form of labourer. Khamar land ceases to be khamar land once it is let out to a ryot. The tendency is to let out khamar lands, not to retain them, except, perhaps, in indigo factories.

Section 50—Bestows a number of valuable privileges, along with this right, on the ryot: would it be too much to ask that one provision be added on behalf of the man at whose expense, and, perhaps, in spite of whom we are so generous, would it be too much to add, as an incident, that the occupancy right is liable to be revoked for non-payment of the "fair and equitable rent" on the due date? We have taken great trouble to ensure the ryot against exaction. We have gone so far as to interfere with the liberty of contract between him and his master, and it will surely be only just to the zemindar that we insist on punctual payment from the ryot, as we insist on his punctually paying the revenue. If the zemindar is liable to lose his whole estate for non-payment of revenue on a fixed date, there can be no injustice in holding this right and interest conferred on the ryot as liable to sale for the same reasons. If some such provision is not made, I fear it will be considered that the Act is one-sided. It is all for the ryot. I hope no such impression will be allowed to prevail.

Section 51, clause 4.—Any sale of the right in contravention of the law should be held invalid.

Section 56.—This is an innovation on present practice; the right, in this case, is acquired by the landlord and not by the ryot. We may be sure if the ryot comes in he will have to pay for his right what it cost the zemindar; and, under those circumstances, he should be considered as having purchased his title. No legislation is required for this. The effect of the section in other cases will be to cause the zemindar to hold the land as ryot and cultivate by hired labour. It will be a bad day for the country when the landlord makes up his mind to have no more tenants, only labourers; and yet, it looks as if we might come to this.

CHAPTER VI.

Section 59.—I am glad to see the liberty of the subject recognized; but the effect is completely spoilt by clause 2. Even when they agree, which is not often, a Revenue Officer must needs interfere. We legislate for the ryot on the principle that he is a man, but we treat him as if he was a child.

Section 61.—This section is again subversive, of all the laws of political economy and everything else. If the land is capable of bearing a higher rent, why should the zemindar be compelled to let it at a lower rent?

As regards clause 2 and the one-fifth limit, I shall have something to say later on.

B.—Admitting that rents are no longer to be fixed by consent, the next best thing is a table of rates. It is another question how such a table is to be prepared, and it pre-supposes a certain dead level in the outturn of lands, as if improvement and industry were of no account. It is, however, the only substitute for contract; and though a rough system, will answer, where we can err in favour of the tenant without injuring ourselves. Judging by the rents prevailing in this district, a rate, the maximum of which is fixed at one-fifth of the annual value of the gross produce at harvest time, would lead to a general reduction of rents, except in a few cases of "do" lands, or lands producing more than one rabi crop. Baboo Sitikanto Ghose, Deputy Collector, has, at my request, drawn up a statement showing the effect of such a rate on the various classes of land in this district. It has been very carefully compiled. and is based upon settlement records, road cess papers, and the nirikhbandi of Mr. Keating. The latter has for a long time supplied the place of a table of rates for this district, and so little change has occurred that it might be adopted almost as it stands. It has been followed in all settlement cases, and is regarded by the local zemindars and people as an authoritative document. It is dated 1791, and shows different rates for different tarafs, as contemplated in the Bill.

Section 76.—I can see no reason for an arbitrary limit. The only recognized limit should be what is fair and equitable; and it is not necessary it should bear any relation to previous rent. In some tracts in this district the bigha rate is not prevalent, and blocks of land are held at a merely nominal rate, and neither landlord nor ryot has any idea of the area so held. In these cases it would be most unfair to him, a landlord, not to accept more than double even if offered, *see* section 59, clause 2.

Section 78.—This section will compel zemindars to enhance, once for all, to the highest possible figure. As I said before, if it can be proved that an increased rent can fairly be paid, it should be exacted. A railway through a remote part of the country would treble the value of land and be due neither to zemindar nor ryot, why should the latter reap all the benefit.

CHAPTER VII.

Section 86.—The ryot being liable to ejectment only on breach of conditions under which he holds should not be entitled to any compensation. He will virtually eject himself; and what is of value to the ryot may be of no value to the landlord. He might be allowed to sell, and his successor recognized by the landlord.

CHAPTER VIII.

Section 89.—The ordinary ryot who most requires protection appears to get very little, and yet, to be competent to make an agreement which the landlord will respect. He acquired a certain fixity of tenure, and cannot be called on to pay more than $\frac{5}{8}$ths of the value of the produce (section 119); but he can, apparently, exercise his discretion. The rate for such a ryot has usually been fixed at $\frac{3}{16}$ths, so that, in his case also, we may look for a general reduction of rent, unless he agrees to pay more, which is not likely, once he is in possession, and not liable to ejectment as long as he pays at the rate of $\frac{5}{8}$ths. If not "bound" to pay more than $\frac{5}{8}$ths can be legally compelled to do so on an agreement.

CHAPTER IX.

The provisions of this chapter are very wise, especially as regards receipts; but section 101 is scarcely practicable if we consider that one zamindar may have thousands of ryots.

Section 100 clause 4.—I would not feel disposed to put a further permission on forged receipts.

As Government has prescribed a form, it would greatly tend to its being adopted generally, if receipt cheque-books could be bought at a public office, and would further operate as a restraint on fraud.

Sections 112 to 117.—I would make the civil court the arbiter, and not the Collector. The expense of the former would do more than anything else to check these petty disputes.

CHAPTER X.

Section 129.—This section would be harmless, as any class of improvements is concerned; but it will afford a spur to law suits founded on imaginary improvements, and supported with all the wit and ingenuity shewn in such cases by a people prone to litigation.

Section 144.—In case of tenures the Judge should appoint, and the word tenure be excluded from clause (*a*). Further, I consider that the section will be made use of by landowners to get their estates managed by the Court of Wards. Some penalty should be devised to prevent this. I think, on the whole, it would be better if the Judge appointed a manager in all cases.

CHAPTER XI.

Provided the revenue officer's decision is final, I think great benefit will result from this procedure. These officers, however, have not much spare time to devote to intricate disputes, and it will involve an increase of establishment, for which the parties benefited should pay.

CHAPTER XIII.

I am glad to see the law of distraint has not been abolished as was proposed. There is nothing that calls for special remark in this chapter.

The rest of the Bill has reference to the procedure of the civil courts. I have not been able to obtain any opinion from zamindárs. They have not read the Bill; and appear to take a languid interest in a measure which so vitally affects their well-being. I think it must be allowed that the position of the zamindar under the Bill will be scarcely better than that of a mere rent charger. Neither he nor his tenants can effect a compromise in future; they must be ranged in hostile camps; and the rules of the contest are rigidly fixed. The need for a law of this severe nature does not seem quite clearly made out. A member of council has stated that 90 per cent. of the ryots in Bengal have occupancy rights. In another place I find it stated, that "it is on all hands admitted to be the fact that, with or without right, the great peasant population of Bengal has for long held the land at very low rates, *far below* the market rack-rent:" these are Sir George Campbell's own words. If the above statements on good authority be correct, then the mere fact of a few riots in Pubna, due, perhaps, to an overzealous officer, are not sufficient excuse for legislation. The condition of Behar has long formed the subject of complaint; but I am inclined to think the land laws are not entirely to blame. Tenancy bills are of little use to a ryot in Bettia sub-division, if he has to trudge all the way to Mozufferpore or Chupra for a hearing; and, therefore, a more paternal system is required, by which the people could be gradually inoculated with certain rights: and once understood and enjoyed, they would be sufficiently tenacious of them to baffle the most grasping zamindar. This is an idea which will be considered out of date; but I equally regard an act which abolishes freedom of contract between landlord and tenant as a backward step in legislation. I have nothing more to add, except that I would not have offered an opinion on the subject, unless I had been called upon to do so. I cannot help observing in conclusion, that the zamindars suffer from a daily increasing difficulty in the collection of their rents and cesses; and I think it behoves us to strengthen their hands to the utmost. Let us, if we will, restrict the demand on the ryot, if we can do so without breach of faith with the zamindar, but afford the latter some sure means of collecting that little. Consider the large arrear in Government estates where the manager is armed with an exceptional procedure and the whole power of Government, what must be the difficulties of a private individual, whose only remedy is a civil suit, which is worthless as a resource if his ryots combine against him.

I should have stated that Mr. Sceales, Agent for Messrs. Gisborne and Company, has favoured me with his views, and his letter is forwarded in original.

Dated Bankoorah, the 16th June 1883.

From—J. O'B. Sceales, Esq., Zamindary's Manager for Messrs. Gisborne and Company, Calcutta,
To—The Magistrate and Collector, Bankoorah.

I have the honour to acknowledge yours of the 9th May, requesting my opinion on the subject of the Bengal Tenancy Bill, No. 5 of 1883.

The act of confiscation (for such it is) bearing the above title honestly looked at, has scarcely a redeeming feature to recommend it; it fails to improve the status of the ryots, that is the cultivator or kurpa ryots, and on the other hand is an act of robbery as far as the landlord is concerned.

The advantages, but none of the liabilities the zamindar now possesses, are to be transferred to the occupancy ryot. He is not to be responsible for revenue. Sunset law will not affect him; he will put in his rent when quite convenient; he will pay his road and Public Works cesses also, when it happens to suit him. As fresh taxes occur the same form will be gone through, *viz.*, the landlord will be made to pay the money into Government, and collect if he can (?) at his leisure; but pay the landlord must, and on a given date and hour. His source of income, the tenant, not only pays when he chooses, but the present Rent Act is such that it discourages punctual payment. Under the present law, from the date of institution of a balance of rent-suits to the date of decree, interest ceases, and after that the decretal money is recoverable at Rs. 6 per cent. interest. Hence, the position of landlord *versus* ryots is this: the former, unable to collect from his tenant, must borrow to pay revenue, paying any interest his mahajun may choose to ask him—usually Rs. 36 per cent. per annum, and frequently much more. The occupancy ryot, who is often a money-lender, loans out the rent to his constituency at, say, Rs. 36 per cent. that by rights should go to his landlord. After a year's litigation the landlord gets his decree for balance of rent without interest, the occupancy ryot getting Rs. 36 per cent. during this period for money not really his: why should he pay? To remedy this, I would suggest that, upon the landlord producing three years' jumma-wasil-bakies and thoka, and in fact making out a *primâ facie* case, the sum sued for be decreed; the ryot may then become plaintiff in his turn for, say, a re-hearing; but should his case fail, *i.e.*, prove frivolous and vexatious, he should be made, not only to pay Rs. 12 per cent. from the date of instituting the suit to the date of decree, but the same interest. Rs. 12 per cent. should run till date of collection, not Rs. 6 per cent. as at present decreed, and to this damages at 25 per cent. should also be enforced. As it is, a clause (44) exists in Act VIII of 1869 to this effect. The lower court has it in its power to decree damages to the plaintiff, supposing the defence to be frivolous; but the weak part of this otherwise sensible condition is, that it is optional; it should be made compulsory upon the court.

If the above suggestions were carried out the Bal of rent-suits would be reduced by three-fourths. The present state of the law encourages ryots not to pay.

What applies to the tenant would apply equally to the landlord: he likewise would be punished for instituting unjust suits, and it is so provided in section 45 of the same Act.

The Government puts itself to a deal of trouble to satisfy itself that zamindars are not landlords in the true sense of the word—that they are in fact mere rent collectors. For the sake of argument admit this I am rent collector for a Calcutta firm: what would describe the conduct of the said firm if, instead of putting every facility in my way and giving me every help in their power, they were to lay themselves out to thwart and discourage my efforts?

This, however, is the policy pursued by Government, they say in effect:—"At sunset on such and such days we want our rents, we are perfectly indifferent as to whether you collect or not—indeed, we put every obstacle in the way of your collecting—but pay or be sold up." I ask if the above is a fair description of the law and procedure as it now stands, and if so, is it just?

Another mode of insurance against a false defence on the part of a ryot, in a Bal of rent-suits, would be to insist upon his depositing at least half the amount he is sued for as Bal of rent; this would, in the first place, secure the zamindar against loss, and invariably lead to a settlement of the landlord's claim, the argument on the part of the ryot being that, as he had to deposit half the amount under any circumstances, it would not be worth his while to set up a vexatious defence.

As to enhancement suits, I concur in thinking they might be handed over to the Collector. A little broadness of view and common sense is sadly required by moonsifs in dealing with them. The idea has got about that the High Court discourage enhancement, however reasonably it is sued for, and the result is that every subordinate officer seizes upon the merest and meanest quibble, in both questions of law and fact, to dismiss the suit.

Independence and common sense in the department are much required.

As to road and public works cesses they press with terrible severity upon the poorer landholders; and the Government should find a means of relieving them of this duty. As to the truth of what I state, let me call your attention to the fact that every estate in this district is in arrears on account of these cesses—witness Samsoonderpore, Phulkeeswa, Ambicanagore, and other pergunnahs—all have been up for sale on the above account, and the money has been with great difficulty deposited by the landholder to save his estate—that he will ever recover his debt from the tenantry is hopeless. These cesses mostly consist of small sums, to be got from hundreds of tenants. None but men of the largest means could plunge so largely into law I have been long puzzled to know why Government have shown such marked dislike to the zemindar: he is supposed to rack-rent and tyranise over the occupancy tenant. It appears to me that this view of the question is an entirely mistaken one.

The curse of Bengal is not the zemindar (I do not know what Government will do without him), but the occupancy ryot, whose responsibilities are nil, and whose emoluments are of the largest. The kurpa ryot is the victim, whose interests Government should look to. Occupancy ryots, taking them all round in this district, pay rent at the rate of from 3 to 10 annas per bigah to the zemindars, but they cruelly rack-rent their undertenants. From Rs. 2-8 for good paddy land to Rs. 8 and Rs. 10 per bigah for sugarcane land is charged on the cultivating ryots, and these are common rates all over the district. In the face of this the zemindar is told that he tyranises and rack-rents; if so, what term is to be applied to the occupancy ryot, acting as I have described—the occupancy ryot is the annuitant, not the landlord.

The political feature of the question, or its legality, with reference to the permanent settlement, I do not attempt to discuss. Various associations are at work all over the country, and they will doubtless make themselves heard in good time. But as to necessity for such a Bill, as the one proposed, I have a word to say. Could it be proved that the proposed alteration in the law of landlord and tenant was to be of sufficient benefit to anyone as to warrant such a stupendously important step as the Government propose to take, one might welcome the alteration; but as a matter of fact, the evil greatly counterbalances the good. Government will lose, because it chooses to dispossess its rent-collectors (zemindars) of the little power they at present have to collect the Government revenue. The zemindars lose in having their property and rights made over to the occupancy ryots. The kurpa ryots will be dissatisfied, because the stronger the position of the occupancy ryots, the more the kurpa ryot will be rack-rented. Even the occupancy ryot will suffer; the more easy it becomes to transfer holdings, the more easily they will be to alienate, so that, as a matter of fact, no one gains. I confess I look upon the present proposals to alter the law as a mistake. Act X of 1859 and Act VIII of 1869 were doing the work well, and matters settling themselves fast. The present proposal, if carried out, will lead to a renewal of litigation of the same costly and cumbrous nature that went on for 15 years after the passing of Act X of 1859.

Affairs between landlord and tenant have of late been remarkably amicable, and the law on the subject, known as Judge-made law, was sufficient, and fairly sensible. Statistics declare that thousands, not to say millions, of mourasi pottas were being given out yearly, and as each mourasi holding means a complete cessation of hostility between landlord and tenant, indeed, implies the most amiable relations, why disturb such a state of affairs.

To quote the Pubna disturbances as necessitating a change in the law is childish. The same agitation took place ten years ago, and might easily have been stopped by a strong executive.

Pre-emption means that the landlord having already purchased the zemindari at 20 year's

purchase, will have the right of again purchasing a portion for another 20 years' purchase—a valuable boon—having paid twice for what was probably not worth the fresh payment. He must either cultivate it himself (figure to yourself Hatua, Durbhunga or Burdwan cultivating a jumma), or give an occupancy right at an equitable rent to a tenant to cultivate: freedom of contract is non-existent under the new law. Maximum enhancement should not be limited to Rs. 25 per cent., but should be left to the discretion of the courts.

Reams might be written on the above subject, but I, for one, have not the time. Briefly, I think, the proposed alteration unnecessary, and likely to cause the most serious disturbance of the present amiable relations existing between landlord and tenant.

The facility for the recovery of rent by the zemindar is required; and this might be carried out somewhat in the way I have suggested. As the remainder of the Act appears to be no improvement on Act VIII of 1869, I can see no occasion for any change.

The Government insisting on zemindars collecting road and public works cesses, they are bound in common fairness to afford them facilities for doing so.

No. 467, dated Howrah, the 23rd July 1883.

From—E. V. Westmacott, Esq., Collector of Dacca, Officiating Deputy Collector of Howrah,
To—The Commissioner of the Burdwan Division.

From the Board of Revenue, No. 342A. of 13th June 1883.
From the Secretary to the Government of Bengal, Revenue Department, No. 322T.—R., undated.

With reference to your circular No. 38 of the 14th ultimo, with enclosures as per margin, calling for a report on the Bengal Tenancy Bill, I have the honour to submit that my views have already been laid before the Government of India at some length as regards the proposed legislation, and that the principles of the Bill being assumed, I have not much to say regarding its details.

2. My personal experience as a revenue officer has been gained principally in the Rajshahye, Dacca, and Chittagong Divisions. I know scarcely anything of the Burdwan or Presidency Divisions, and what I have learnt respecting the tenancy question in Behar, has been from information at second-hand, supplemented by such enquiries as I have been able to make while on tour in several of the Behar districts.

3. In the part of the country which I know well, if any legislative interference is required, it is rather on behalf of the landlord—I use the term loosely for the receiver of rent—than on behalf of the tenant. In Behar I understand that whatever the historical position of the tenant may have been with reference to his rights in the soil, the landlord has practically a monopoly in the land, and competition among the tenants has rendered him master of the situation. Very few ryots appear to have been able to maintain a right of occupancy. This appears to be due entirely to the pressure of population on the land which is less fertile than Bengal, and to the habits of the people, which led them to look to agriculture alone for a livelihood. The ryots feel that it is absolutely necessary that they should obtain land, and they close their eyes to the possibility or impossibility of fulfilling the terms to which they agree in order to obtain it, and, at the same time, of being able to maintain themselves and their families. The result of this is unreasoning competition for land, and hopeless poverty for the cultivator. Even when the Behar ryot is in possession of land, I find that the landlord is able to dictate to him what crops he shall grow, and that indigo, for instance, cannot be grown without consent of the landlord. In the eastern districts such interference is impossible. The cultivation of jute has greatly extended of late years, as being a more profitable crop than rice, but the landlords in vain endeavour to secure a share in the increased profits of the ryot. It appears a monstrous thing that a tenant having taking land on certain terms should not be able to cultivate that land as he thinks most to his own advantage. The English question of exhausting the soil, and leaving it impoverished at the end of the tenancy, does not arise in India, and the landlord's interference arises only from a wish to share in the ryot's increased profits besides receiving the stipulated rent. The weakness, however, of the Behar ryot appears to arise from the fact that there is less land than the cultivators require, even as in Eastern Bengal the ryot is strong, because there is more land than the ryots can cultivate, so that the landlord who endeavours to extort from his ryots more than they are willing to pay finds his land uncultivated altogether. It is not only the number of persons per square mile that must be considered, but the inferior fertility of most of the land in Behar, as compared with that in Bengal. I should say that population would press less heavily on the soil in Rungpore with 600 persons to the square mile than in Behar with only 400.

4. It must then be considered whether the natural law which impoverishes an agricultural population when too numerous for the land, can be counteracted by legislation, and whether the same legislation will not produce more evil than good if applied to tracts in which fertile waste land is carrying out for cultivators.

5. It may be possible to place restrictions on the power of the present landlords of Behar, and there may be historical grounds for believing that the ryots once enjoyed such rights in the land as would justify such restriction, but it would have been impossible for the landlord to improve his own position and to destroy the rights of the ryot had he not been aided by the action of a natural law, the law that an increasing population on a limited culturable area must impoverish an exclusively agricultural people. It is possible to restrict the power of the present landlord, and to strengthen the position of the present tenant, but during the continuance of the action of the natural law, to which I have referred, it will be impossible to improve the position of the rent-paying cultivator at the expense of the rent-receiver. In

curtailing the powers of the present rent-receiving landlord, you can only transfer them to another person, namely, to the rent-paying ryot, but the consequence will be that the said ryot will become a rent-receiver, and will sublet his land to cultivators who will be poorer than the present cultivators, because their competition for land will be absolutely unchecked by any traditional respect for rights of the ryots in the soil. The profits of the present landlords will be curtailed, the rent-paying ryots of the present will become rent-receiving middlemen, and the land will be cultivated by a class absolutely unprotected by any feeling that the cultivator has rights in the soil, and at the mercy of rent-receivers whose attention is confined to a limited area, and who are, therefore, able by closer supervision to screw more out of their tenants than the landlord of extensive estates. I quite admit that it is possible, and perhaps just, to make the present Behar ryot into a wealthy and thriving man at the expense of the zemindar, but those who think that such a step will make the actual cultivator one whit less wretched than he is now, will find themselves grievously disappointed. So long as there are too many people for the land, to support, and so long as the only means of supporting those people is derived from the land so long will rents be forced up by competition, and the cultivator be a pauper. The action of the proposed law will only be to make the occupancy ryot the rack-renter instead of the present landlord, and the actual cultivators will be none the better for it.

6. I may illustrate the change in the position of the occupancy ryot by a passage in a report on rents which I received from one of my Deputy Collectors a few days ago. He said that a certain rate of rent was so high that it was impossible for the ryot to make a profit except by cultivating the land himself. The Deputy Collector evidently considered that for a ryot to be obliged to cultivate his land himself was a hardship, and that he had a right to a position in which he could sublet the land, or hire ploughs and labourers to cultivate it for him. The present pauper ryot of Behar may be raised to such a position as this by curtailing the powers of the zemindar, but there will still remain the mass of struggling cultivators, ready to promise any rent, as long as they can secure a crop from the land, and, the rights of occupancy being vested in those to whom they promise their rent, they will be themselves absolutely unprotected. I believe that the proposed law will personally benefit the present generation of ryots, but I do not think it can contribute anything to the solution of the problem which meets the statesman in Behar.

7. To resort to the emasculating interference of legislation on behalf of the weaker in free bargain between man and man has been tried over and over again in the history of the world, and has as often failed in its object. The weak cannot be made strong by law because the strong will find means of evading the law. The evil, however, is not without a remedy, and that remedy is already in course of application. I may say that there are two such remedies. One of them is the diversion of the surplus labour of Behar from agriculture to other spheres, and the other is emigration. I find men working in Howrah in mills and factories, as carters, grooms, or labourers, and easily earning six or seven rupees a month, while employers tell me that they want more hands. I question these men, and find they come from Behar districts, in which the Magistrates have told me that three rupees per month is far more than it is necessary to pay as wages to the village watchman. Few of the emigrants as yet bring their families with them, and most of them return to their homes after a few months' work, but the number of permanent settlers is increasing, and the demand for labour is such that it must continue to increase. I have seen how the position of the English farm-labourer has improved in consequence of emigration, till a farmer in Sussex has told me that he has difficulty in hiring a carter for a guinea a week and a free house, and I feel confident that emigration will gradually raise the position of the Behar ryot.

8. I observe that most of the Behar labourers attracted by British capital to Howrah and Calcutta come from the districts south of the Ganges, served by the East Indian Railway. There is a striking absence of men from the districts north of the great river. From this I argue that the statesman who desires to raise the position of the masses in Behar should push on railway communication between those districts and the great manufacturing centres, and with the districts, such as Dinagepore and Dacca, in which thousands of acres of fertile land are lying waste for want of hands to cultivate them. I believe that emigration would be stimulated by a continuous line from Chumparun through Purneah and Dinagepore to the Northern Bengal Railway, and parts of such a line are already made or in course of construction.

9. I have purposely abstained from all comment on the proposed regulation of relations between landlords and tenants in Behar, with reference to supposed rights of the latter, because I do not consider that my experience qualifies me to speak on the subject. I can only say that I do not believe the proposed law will have any effect whatever in raising the condition of the masses.

10. Turning to the parts of Bengal with which I am well acquainted, I find that the proposed law is all in favour of the ryot, who is already so strong as to be able to withhold from the zamindar that to which he is justly entitled. In Behar, if a zamindar deprives a ryot of his land, I persume the ryot must starve. In Bengal it would be the zamindar that would starve, and the ryot would migrate gaily to another estate, of which the proprietor would welcome an additional tenant, and an increase in his rent-roll. I use the term Bengal with reference to the divisions of Rajshahye, Dacca and Chittagong, in each of which I have gained some experience. Not only is the zamindar unable to enhance the rent beyond what a reasonable ryot thinks it just that he should pay, but in many instances dishonest ryots maintain their position on the land without paying any rent whatever, and the result is litigation and violence.

11. I believe that it is less the pecuniary necessities of the zamindars that have led them to create tenures intermediate between themselves and their ryots, than the difficulty of realising rents without more detailed supervision than the proprietor of extensive estates can exercise. In order to secure an income without direct collection from the ryots, the Maharaja of Burdwan has granted *putnees* to middlemen, and they again, I believe, have created tenures over lesser areas subordinate to their own. The Paikpara zamindars in Noakholly have promoted all their ryots to be petty talookdars, so that the rents may be collected by sale procedure in the court of the Collector. The Maharani of Dinagepore grants villages in farm for five years to one or more of the principal residents in them, while individual ryots often hold lands for which they pay more than a hundred rupees as rent. The foundation of the strength of the ryots' position is the quantity of land available for cultivation beyond what the existing population can cultivate, and the zamindars are too short-sighted to offer sufficiently liberal terms to encourage that immigration which would increase the competition for land. To speak of the wretchedness of Bengal ryots as notorious, argues absolute ignorance of the facts of the case, and can only excite ridicule in those who know anything of the ryots of Dinagepore, Backergunge or Noakholly, to say nothing of other Bengal districts.

12. I have no wish to represent the Bengal zamindar as an injured innocent who wants no more than his just due; on the contrary, I know that he is ready enough to grasp at all he can get, and the only reason that he has not reduced his tenantry to the condition of the Behar ryots is that the natural law of the pressure of population on the land has been too strong for him. At the same time, I think, he now in most instances gets somewhat less than his due, and if legislative interference is warranted, and likely to prove efficient, it should be in the direction rather of helping the zamindar to obtain his due than of further strengthening the position of the ryot.

13. I think the ryot generally recognises that there are at least two just grounds for enhancing his rent, one being the discovery by measurement of more land in his possession than he has been paying rent for, and the other a permanent increase in the money-value of the produce of the land. I do not mean to say that a ryot will not resist enhancement on these grounds as well as on any other, but if defeated, he will look on it as the fortune of war and not as an injustice. As regards the first ground of enhancement there is no doubt whatever, and many Dinagepore ryots are paying a cess, or *mangon*, in consideration of the landlord's foregoing the right of measurement, rather than submit to any enhancement of the substantive rent, which nominally remains unchanged. The second ground of enhancement, permanent increase in the money-value of produce, would be disputed more often than the former, but I have many a time known ryots year after year pay a *mangon* which varied with the goodness or badness of the crop, in addition to their rent, and I have heard of many cases in which ryots contumaciously withhold payment of rent, and yet pay their *mangon* cheerfully. If a ryot has been paying a rupee a *beegha* for fifty years, and knows that fifty years ago his grandfather in the best of times could get no more than eight annas a maund for paddy, he feels that now, when he can always get a rupee, the zamindar may justly ask for a *mangon* every year in addition to the rent. The rent, however, must not be enhanced—once alter the substantive rent, and the ryot feels that he will be safe no longer. I have no doubt that the ryot's feeling as to the justice of enhancement with reference to the value of produce, is a traditional survival from the days when all rents were paid in kind. It is a grave error to look on all *mangons* as illegal cesses. They are virtually enhancements of the rent, to which the ryot has agreed, because he feels that the zamindar is justly entitled to them, and it is a mistake and a robbery of the zamindar for the legislature to disallow them.

14. The question of enhancement on the ground of increase in the money-value of produce was a tolerably easy one so long as rice continued to be the principal staple. Sugar-cane does not appear to have disturbed it, but now the enormous extension of the cultivation of jute has introduced serious complications. Tracts which once grew rice enough for export, in addition to what sufficed to feed its population, have now so large an acreage under jute as actually to be importing rice from elsewhere. The zamindars see how the jute trade enriches the ryots, and desire to share in the profits, while the ryots deny the zamindar any right to enhance, except upon a rise in the value of rice, which was the old staple. In the proposed law I find no attempt to do justice between landlord and tenant in this matter.

15. One great difficulty in dealing with the agricultural question is the co-parcenary system. The proposed law takes some cognizance of this evil as it applies to the landlord, but none whatever as it applies to the tenant. I have known instances in which a petty ryoti holding belongs to over thirty co-sharers, many of them widows, many married to husbands who are not co-sharers. I believe I could find instances where the co-sharers were twice as many. Such a tenantry as this is very difficult to deal with, no co-sharer considering himself responsible for more than his own share of the rent, and the tenants suffer from it as much as the landlords. The laws of inheritance, both Hindoo and Mahomedan, have by many intelligent natives been admitted to me to be the curse of the country, and their effect on the question of tenancy is well worth a statesman's attention.

16. I will now proceed to comment in detail on some of the features of the proposed law.

CHAPTER II

17. C

has little, if any, practical application in Bengal.

18. *Sections 14 to 16.*—This is not new, but in the case of ryots I have always thought it unjust as regards money-rents, and whereas the decennial settlement alienated all right of

Government to share in increased money-value of produce, I have always considered that it compared most unfavourably with the commutation of tithes in England, a system under which the rent-charges vary from year to year on a sliding scale regulated by the average price of corn for seven years. I think it unjust to zamindars, and inconsistent with the feelings of the people, that money-rents should be fixed without reference to changes in the value of produce. The rent was originally a proportion of the produce, and this should in my opinion be borne in mind.

19. Government deliberately gave up all right to share in the proceeds of any increase in the money-value of the ryots' crop, and in so doing gave up revenue to which the State was entitled. It is not now the question whether the equivalent secured by fixing the revenue in perpetuity was sufficient compensation for the future loss to the revenue, but it does not appear that this action with reference to the revenue justifies the State in compelling the zamindar to make similar sacrifice. Rents in India are based on a division of the crop, and it is opposed both to equity and to the traditions of the people to allow the cultivator to monopolise all benefit from increase in the money-value of his crop. If a ryot pays a certain rent when he only gets eight annas per maund for his rice, he should pay so much more when he gets double that price.

20. *Section 21.*—A number of tenures are created at the same time, on the same rates of rent, covering a considerable area. The time comes when enhancement is legitimate, and a landlord in the centre of the said area proceeds to enhance. He cannot enhance beyond the customary rate, and he finds that every tenure, for miles round, is paying at the same rate, so that he is precluded from enhancing. If no landlord can enhance until the majority of his neighbours have enhanced, it is clear that enhancement can never be commenced, and therefore the right of enhancement becomes a dead letter.

21. *Sub-section (4).*—The reference is to *jungle-booree* tenures. A tenant taking land on a *jungle-booree* lease looks to recouping his expenditure on reclamation during the period of his lease, and to allow him to continue to hold on exceptionally favourable terms after the expiry of the lease is inequitable and contrary to all the customs of the people, so far as I know them.

22. *Section 22.*—Where a tenure has been granted rent-free for a term, what is to be the limit of the rent at the expiry of that term? The double of nothing is nothing.

23. *Sections 23 and 24.*—I think very fair.

24. *Section 27.*—It would be to the advantage of both landlord and tenant that all transfers should be registered; but as each party wishes to defraud the other, if possible, both endeavour to avoid registration or any definition of the terms of tenures. The interchange of *pottas* and *kabooliyats* prescribed by law has always been steadily evaded by whichever party was strong enough to avoid it. Registration can only be secured by the courts rigidly refusing to take legal cognizance of any right which has not been registered, and it is not safe to leave it to the dishonest amla of the zemindar's cutcherry, who will always burn their books when advisable. Just as notice of relinquishment is given to the Collector, so must notice of transfers be given to the same officer, who will give notice to the landlord, and no ryot or co-sharer in a ryoti tenure should be recognised as possessing any rights unless his succession to the holding has been registered. The fee on registration, to which I consider the landlord entitled, can be paid by stamp to the Collector at the time of application. The proposed law appears to contemplate registration as being solely for the benefit and protection of the tenant. Having had extensive dealings with tenantry in estates belonging to the State or to Court of Wards, I can certify that registration of transfers would be a great boon to a landlord. For years rents are paid in the names of dead tenants, until a day comes when rents are withheld, and then it is a matter of difficulty to find out who is in possession of the holding. There may be a score or two of co-sharers, male and female. This is only one exemplification of the principle on which the proposed law appears to proceed, namely, that it is the tenant alone who requires protection, and that the landlord is only a tyrant, whom it is necessary to control. If registration is carried out by the State, and not left to the landlord, I would apply it to all ryots as well as to tenure-holders.

25. *Section 37.*—I have been informed that there are *putni* tenures which are not permanent, and I think this provision of the law uncalled for.

26. *Section 45.*—I believe this provision is necessary to protect ryots in Behar; it is not required in Bengal. The right should be confined to cases in which lands have been held in one village or *mouza.* To bring an 'estate' into the question is quite a new idea, not warranted by any custom of the country.

27. *Section 50 (a).*—This provision appears to open the door to endless litigation to determine what renders land unfit for the purposes of a tenancy. I do not consider rural moonsifs by any means likely to decide justly in such a matter from what I have known of their modes of thought.

28. Free transfer may not always have been an essential feature in a ryot's occupancy right, but, so far as my experience goes, it has become recognised as customary, and ought to be legalised. Giving notice to the landlord, and giving the landlord a right of pre-emption, is not the custom, and I do not think it necessary. There are many practical difficulties in the way. For instance, shares in ryoti holdings are often transferred, and transfers sometimes give a right of re-entry on repayment of a loan.

29. *Section 51.*—It appears to be supposed that the owner of an occupancy right is always a tangible individual. I have already pointed out that such a right is frequently subdivided among a number of male and female co-parceners, and these co-sharers sometimes dis-

pose separately of their shares. There are peculiar difficulties with reference to the women in Mahomedan families who inherit fractional shares and marry out of the family. Of these I think a rent law should take cognizance.

30. *Section 53.*—What would be the landlord's right when a ryot raises money on mortgage, giving the mortgagee possession for a term with right of re-entry? This is not infrequent.

31. *Section 58.*—The presumption is a false one. If a ryot has held for a considerable number of years at a fixed rent, and the average money value of produce has permanently risen in the interval, the presumption is that the rent has ceased to be fair or equitable, and that it is just that it should be enhanced.

32. *Section 59(2).*—In Dinagepore, where there are large areas of waste land, a ryot frequently holds twice or three times as much land as he nominally pays rent for, and no one would attempt to prove that he was not liable to pay rent for the whole if it were measured. Why should the law step in and say that he was only to pay rent for ⅗ths in addition to what he nominally holds? Section 60 does not meet the case. If, as is probably the case, the landlord cannot prove when the excess land was added to the holding, and when the area of the holding was originally understated by a dishonest *ameen*, I am quite sure that a Moonsiff would hold that no addition had been proved. Whatever may be stipulated as to rates of rent, the landlord ought to be allowed to recover rent for every foot of land which a ryot holds.

33. *Section 64.*—The rates of rent ordinarily paid are no clue to what rents ought to be if they were fixed at a time when produce was cheaper on the average than it is at the time of inquiry, and I think the provisions of this section very just. They will, however, be easily evaded by raising questions as to the classification of specific plots of land.

34. *Section 75(c).*—Instead of saying that the landlord and ryot shall each have one-half of the benefit, I think that the increased rent should bear the same proportion to the old rent that the increased prices or the increased produce do to the old.

35. *Section 79.*—Why should a ryot be allowed to apply for reduction year after year, when a landlord cannot apply for enhancement, even on proved increase of area, oftener than once in ten years?

36. *Section 83.*—These lists to be of any use must be far more carefully prepared than at present. In one district I found that because the returns for one or two outlying thannas never came in, in time to be entered in the fortnightly return, there had not for years been any entry made in the returns of the prices in those thannas. I had important settlements in hand in those thannas, and was very desirous to observe the fluctuations in prices, but found nothing on record. The original police reports had been destroyed, and the returns were blank.

CHAPTER VIII.

37. I would prefer looking on the occupancy ryot as the ordinary ryot.

38. *Section 91.*—Any law fixing the rent of a ryot without a right of occupancy will always be a dead-letter.

39. *Section 92 (2).*—Ten weeks is a short time I think to allow a Moonsiff to dispose of a contested case, and, as a general rule, a landlord must let his land in April at latest, or he will not let it at all for that year. The question should be settled absolutely before the end of *Choitro.*

40. *Section 93 (b).*—I think this compensation to a ryot, who has no rights of occupancy, is iniquitous. I cannot understand on what grounds it can be considered just. If a ryot does not agree to pay the enhanced rent, and does not give up his holding, he is considered liable to pay the enhanced rent for the next year. I do not see why the law should change this. The ryot has no right of occupancy, and I do not see why he should be allowed to hold on if he does not mean to pay the rent. The present arrangement seems a very just one, and I think the landlord has reason to complain if section 93 becomes law. If a ryot has no right of occupancy, I think the landlord has as much right to enhance his rent after due notice given, as the owner of house property in Calcutta. You will never be able to distinguish practically between ryots and under-ryots, or tenures and subletting ryoti holdings.

41. *Section 96 (a).*—The language of this clause scarcely applies to the very common cases in which a ryot holds originally more land than the nominal acreage of his holding, by the dishonesty of the zemindars' servants, or for the cases in which there is no proof that the holding was ever originally measured, but in which the ryot has imperceptibly added pieces from the waste, or from abandoned holdings. The landlord's right to measure and to assess all land at full rates is always admitted, but it might be difficult to prove that land held in excess of the nominal area of a holding was an addition to the holding. The landlord might be called on to show when and how it was added. I therefore think that the wording of this clause might be improved.

42. *Section 100.*—The name of the person making a payment should be added in every receipt.

43. *Section 101.*—How would this provision apply to the case to which I have already drawn attention, in which a ryoti holding belongs to a number of co-parceners? Who is entitled to the receipt?

44. *Section 114.*—It appears objectionable that litigious persons should be allowed to re-open a question in court when disposed of by the Collector's commissioner with assessors. I think it would be enough that the Collector should have powers of revision.

45. *Section 119.*—I think it objectionable to pass a law which will in practice be evaded, as will certainly be the case with the limitation of the rent to $\frac{5}{16}$ths of the gross average produce. In Noakholly there is a quantity of land which remains uncultivated for years together, and is only taken up when the price of rice is exceptionally high. The men who then take it up are called *jotedars*,—not to be confounded with the substantial ryots called *jotedars* in Dinagepore and Rungpore—and I think it impossible to interfere with the free contracts which they make. I have never had any trouble in the settlement of any questions arising from such free contract, and the rents are often very high indeed. There is no average annual produce in lands only occasionally cultivated, and I think that any attempt at legislative interference with free contract in these cases will hinder cultivation, if not practically evaded.

46. *Section 123.*—I think there would be very grave injustice to zemindars in such a provision as this. It is possible that in Behar it may be required, but in Bengal it would deprive the zemindar of what is really rent to which he is fairly entitled, and which the ryots have agreed to pay, because they recognised the justice of the demand. The ryots have always opposed any alteration of their nominal rent, even when admitting the zemindar's right to receive more. In Dinagepore it is extremely common for the ryots, fully aware that they hold much more land than they nominally pay rent for, to agree to pay the zamindar regular cess of so much on every rupee of the nominal rent on condition of his foregoing his right of measurement. This is a compromise made with the full consent of both parties. It prevents litigation and possible rioting, and is in accordance with the feelings of the people. If the law declares that the zemindar shall not receive such a cess as this, he will be driven to actual measurement, very much to the dissatisfaction of both parties, cultivation will be interrupted, and it is very probable that agrarian riots would ensue. In other cases, independently of the question of measurement, the ryot pays a similar cess, in consideration of the increased money value of the produce of his holding, rather than allow his nominal rent to be enhanced. With such a compromise as this, again, it appears to me neither politic nor equitable to interfere. On the other hand, there are fees levied by zamindars as market dues, mooring dues, taxes on sales of cattle, and the like, often levied, as at the sudder station of Dinagepore, at markets for which year by year the zemindar draws money from Government as compensation for the abolition of *sayer* duties. With such cesses as these I would most certainly interfere, and advocated interference eleven or twelve years ago.

47. Between these two classes of cess, one which I consider absolutely mischievous, and the other which I consider quite unobjectionable, there is a third class respecting which I think very full enquiry should be made. I refer to contributions made by the ryots on the occasion of the zamindar's marriage, or when it becomes necessary to reinforce his fleet of elephants. The question to be decided is how far such contributions are voluntary and how far compulsory. In Dinagepore they are certainly voluntary. If a zamindar asks his ryots for more than they think just, he will not get it, and if he makes any attempt at compulsion they will either leave his land or perhaps even resist him forcibly. There is some remainder of feudal feeling among the ryots, and they would consider it derogatory to their own self-respect to refuse a reasonable contribution on a special occasion. With such a state of affairs I should object to interfere. There is no evil requiring redress. Then there is the universal tax of *tohreer* paid by ryots as a percentage on their rents to the cutcherry *amla* and *piyadas*, whose pay received from the zamindar is nominal. The ryots do not complain of paying this, and when I enquire about it, even in wards' estates, they try to conceal the fact of payment. Officers without revenue experience will ridicule my statement, but it is a fact that the ryots like making these irregular payments, and even when in an attitude of combined resistance to all demand of rent, fighting their zamindar both in the law court and in the field, they continue cheerfully to pay the cesses which it is proposed to declare illegal. Whatever they may think it just to pay they will pay, so long as it is not legally recoverable, but if the zamindar relies on the courts for the realization of his dues they tell him to go to the courts, and make the most he can out of it. The natives cling to custom, and abhor legal definition of rights, and therefore legislative interference disturbs the peaceful relations between landlord and tenant.

48. It must be remembered, however, that I speak of ryots who have a strong position, from which they can successfully defy any attempt at injustice on the part of the zamindar. If the ryot of Behar is so utterly powerless as I am led to suppose, I admit that legislation may be necessary to protect him. If the zamindar has power enough to compel the ryot to pay illegal cesses against his will, I do not object to the interference of the State, but where both landlord and tenant are content with the indefinite relations between them, understood and freely accepted by both parties, but indefinite when brought before the tribunal of the moonsiff, I think that very serious economic evils are likely to ensue from any attempt at legal definition, or limitation, however attractive to a theoretic and sentimental statesman. The result of such an attempt will be to set class against class, where relations are now friendly, as following the cherished customs of the country and the natural economic laws. The proposed provision may be beneficial for Behar, but in Bengal would be positively mischievous.

49. *Section 126 (2) f.*—In waste land, it is very just that the reclaiming ryot should be allowed to erect a dwelling-house, but in settled estates I doubt the justice of it. Where the ryots holding, generation after generation, becomes the property of an ever-increasing number

of co-sharers, the extension of homestead land may very seriously curtail the arable area, and consequently the power of the holder to pay its rent. The landlord will not be allowed to assess the newly converted homestead lands at the increased rent, which homestead lands generally pay, and it has further been proposed that a ryot ejected from his holding cannot be ejected from his dwelling house. If the holding adjoins an increasing bazar, I think this provision would enable the ryot to obtain an unfair advantage.

50. *Section 133.*—I fully approve of the concluding proviso in this section, but am unable to see why the holder of *lakhiraj* or revenue-free land should be deprived of his right to measure. There appears to be some omission in this chapter. I presume it is intended to allow the landlord to assess rent on all land found in a holding, but I do not see that this is stated. Measurement would be of very little use without it.

51. *Section 139.*—Application to the court or the Collector should be allowed in any case. The ryot generally lies when he says he has tendered to the landlord, and if he really has done so, the zamindar's amla will always deny it. It is objectionable to retain a provision which is practically null and void.

52. *Section 142.*—It should be clearly stated what constitutes actual possession of an interest. I have known it ruled that a co-sharer who had obtained a decree for possession of a share, but who had never succeeded in getting any share in the rents, was not in actual possession.

CHAPTER XIII.

53. The only cases in which I have known distraint much employed in Bengal has been where ryots from the main land, cultivating land in the islands, sell the crop on the spot to merchants who come with their boats, and return to their homes, perhaps never cultivating the same land again. The ryot cannot pay the rent until the moment of sale, and will not pay if once the crop is removed, and therefore it seems just that the zamindars should be allowed to prevent removal, and unfair on both parties that he cannot do so without the expense of litigation. As regards settled ryots I have no objection to the proposed restrictions on distraint.

54. *Section 208 (c).*—Gives the tenant power very seriously to injure the tenure while reserving to himself all real profits by *benamee* alienations. Much litigation might also rise from the disposal of the dead, or planting a *toolsee* plant.

55. I have not observed any points beyond what I have noted, which appear me to call for adverse comment, and I have made no remark upon provisions which appear unobjectionable or beneficial. I think the proposed Act generally will do more harm than good in the Bengal districts with which I am well acquainted.

Description of Land.	Description of staple crops grown on the land.	Average amount of produce per beegha.	Price at harvest time.	Present average rate of rent per beegha as far as known.	One-fifth of the average value of the produce.	Remarks.
			Rs. A. P.	Rs. A. P.	Rs. A. P.	
Sali jole (low-lying rice land), 1st class.	Haimanti rice	3½ mâps or 14 maunds	8 12 0	2 12 0	1 12 0	The existing rates of rent vary from Rs. 2 to Rs. 3.
Ditto ditto, 2nd class	Ditto	3 mâps or 12 maunds.	7 8 0	2 4 0	1 8 0	The existing rates of rent vary from Re. 1-8 to Rs. 2-8
Ditto ditto, 3rd class	Ditto	2 mâps or 8 maunds.	5 0 0	1 12 0	1 0 0	The existing rates of rent vary from Re. 1-4 to Rs. 2.
Sali kanali (strip of low-lying land between two high lands), 1st class.	Ditto	3 mâps or 12 maunds.	7 8 0	2 4 0	1 8 0	The existing rates of rent vary from Re. 1-9 to Rs. 2-12.
Ditto ditto, 2nd class	Ditto	2 mâps or 8 maunds.	5 0 0	2 0 0	1 0 0	The existing rates of rent vary from Re. 1-3 to Rs. 2-5.
Ditto ditto, 3rd class	Ditto	1¼ mâps or 6 maunds.	3 12 0	1 10 0	0 12 0	The existing rates of rent vary from Re. 1 to Re. 1-14
Sali mat aul (flat rice land next in quality to the kanali lands), 1st class.	Ditto	2 mâps or 8 maunds.	5 0 0	1 13 0	1 0 0	The existing rates of rent vary from Re. 1-7 to Rs. 2-5.
Ditto ditto, 2nd class	Ditto	1 mâp 6 salis or 7 maunds.	4 6 0	1 8 0	0 14 0	The existing rates of rent vary from Re. 1-1 to Rs. 2.
Ditto ditto, 3rd class	Ditto	1½ mâps or 6 maunds.	3 12 0	1 4 0	0 12 0	The existing rates of rent vary from annas 13 to Re. 1-13.
Sali danga or high land on which only rice is grown, 1st class.	Ditto	1½ mâps or 6 maunds.	3 12 0	1 2 0	0 12 0	The existing rates of rent vary from annas 14 to Re. 1-4.
Ditto ditto, 2nd class	Ditto	1 mâp or 4 maunds	2 8 0	0 14 0	0 8 0	The existing rates of rent vary from annas 10 to Re 1-2.
Ditto ditto, 3rd class	Ditto	4 salis or 2 maunds	1 4 0	0 9 0	0 4 0	The existing rates of rent vary from annas 8 to annas 12.
Ausha danga or high land on which only aush or early rice is grown.	Aush or early rice	6 salis or 3 maunds	1 14 0	0 10 0	0 6 0	The existing rates of rent vary from annas 6 to Re. 1 1.
Do. karpa or high land on which karpas (cotton) is especially grown, 1st class.	*Karpas* (cotton)	3¼ maunds	14 0 0	7 2 0	11 0 0	These are exceptionally good lands, and are to be found in *tarat* Balsi, thana Indus, and in village Telliberia, and in the neighbourhood thana Ouda, and in certain parts of thana Bishenpore, such as Hatia, &c. The existing rates vary from Rs. 3 12 to Rs 9
	Til (oilseed)	3¼ "	7 0 0			
	Jab (barley)	2½ "	5 0 0			
	Gum (wheat)	2½ "	7 8 0			
	Boot (gram)	2 "	5 0 0			
	Musori (a kind of pulse).	1½ "	4 8 0			
	Sharisa (oilseed)	3 "	12 0 0			
		Total	55 0 0

No. 686 T. R., dated 3rd September, 1883.

From—C. W Bolton, Esq., Under Secretary to the Government of Bengal,

To—The Secretary to the Government of India, Legislative Department.

In continuation of my letter No. 586 T. R., dated the 24th August, 1883, I am directed to submit, for the information of His Excellency the Governor General in Council, the accompanying copies of report* on the provisions of the Bengal Tenancy Bill, 1883, from Dr. Ram Das Sen, zemindar of Berhampur, submitted through the Commissioner and the Board of Revenue.

* Received with memorandum No 267K.L., dated the 1st August, 1883, from the Commissioner of the Presidency Division.

Dated Berhampur, the 15th July, 1883.

From—Dr. Ram Dass Sen, Zemindar, Berhampur,

To—The Collector of Moorshedabad.

With reference to your circular No. 91G., dated the 7th April last, I have the honour to submit the following opinion on the Bengal Tenancy Bill. The delay that has occurred in sending this in was unavoidable. The matter is important and required study, and I was waiting to hear and read what the press and public had to say upon it.

That legislation has become necessary upon the subject it is now too late to deny. The zemindars to whose class I belong, have moved for some amendment of the existing law. But what is wanted just now, in my opinion, is legislation providing an easier scheme for the settlement of rents and increased facilities for collecting the same without changing the substantive law on the subject What changes have been effected in that law by Act X of 1859, and judicial interpretations of the provisions of that Act, though trenching upon the vested rights of landlords, constitute a sufficient fulfilment of the promise held out to the ryots at the time of the permanent settlement; and it would be going too far to say that to redeem that pledge the legislature are bound to unsettle a state of things that has obtained for three quarters of a century by what has been called by some of the speakers of the Legislative Council a redistribution of property at the expense of the zemindars and to the advantage of the ryots.

Before proceeding to comment on some of the leading principles and details of the Bill, I beg to observe that the framers of the Bill, in their anxiety to secure the advantage of the subordinate tenure-holders at the cost of the zemindars, have overshot the mark by conferring all the benefits of the proposed measure upon intermediate tenure-holders or middlemen instead of upon the actual cultivators in whose interest it professes to have been framed. These latter, if holding under a superior tenant, will not acquire the right of occupancy and will have to pay a higher rent than if they held directly under the zemindars.

CHAPTER II.

Sections 5-13.—This chapter is highly objectionable. Perhaps the provisions of the chapter are based on the supposition that in the interest of the Government revenue the largest quantity of land appertaining to each mehal should be let out to ryots, and that therefore, the right of the zemindar to increase the extent of his khamar or zerati land should be closely curtailed. But as a matter of fact, so far at least as Bengal is concerned, land is not so much in demand, and competition for it is not so sharp as would justify the theory upon which this chapter rests. But even if there were such competition, and there were strong economic reasons for the change, I believe that the Legislature could not, in the face of the permanent settlement, effect the change without laying itself open to the charge of breach of faith towards the zemindars. What means proprietary right if the zemindar could not be allowed to exercise actual ownership over lands which are not in the possession of occupancy ryots or ryots of any description, which are just now lying fallow, but which the zemindar has not used or may not have had occasion to use continuously for 12 years next before passing of the Act. I do not object to a cadastral survey of land in Bengal, and let ryots in actual occupation be protected in their rights, so far, of course, as such rights are consistent with the rights of the zemindars. But would it not be fair to the latter to let them deal with the remainder at their pleasure? It is a mistake to suppose that zemindars do not, or cannot, make as good or better use of land than ryots. We have khamar lands in our mehals and we can bear testimony to such lands being the best cultivated.

CHAPTERS III AND IV

embody and re-enact the law as it stands at present, but section 17 introduces a change which cannot be supported upon a construction of the present law or upon principles of equity, for a separation, unless made with the sanction of the zemindar, would involve a distribution of the rent and amalgamation with other land, for however short a time would attach permanency to the tenure in respect of the additional lands.

Section 22 puts a limitation upon enhancement by declaring that in no case more than double the rent previously payable can be demanded. Why so, if more than double be considered to be a fair and equitable rent? I should think the Legislature had better leave it to the courts to decide what would be fair and equitable rent in any particular case, without providing any arbitrary limitation in that behalf.

CHAPTER V.

The changes sought to be introduced by this chapter are quite novel, and open to serious objection. One most remarkable feature of this chapter is that it takes away the power of private contract between zemindar and ryot whenever such contract is opposed to its provisions. Do the framers of the Bill suppose that the ryots, specially the ryots of Bengal, are so ignorant of their rights that stringent provisions in restraint of the power of contracting should be introduced? If so, they are mistaken, and even if not mistaken, it is opposed to the principles of the law of contracts, and to the principles of political economy also to impose such restrictions. The provisions as to the acquisition of occupancy rights ought to be so framed as to leave the power of private contract untouched.

Section 45.—The words in this section "and though the land so held by him at different times during that period may have been different" ought to be omitted. There could be no

harm if the ryot commenced with a quantity of land, and at the close of the 12th year it was found to have been reduced. But it wou'd not be fair to give the ryot the status of a settled ryot in respect of additional land which has come under his cultivation during the 12 years, say, for instance, a large addition made in the 11th year.

Section 47.—The objection as regards section 45 applies to this section also. The settled ryot ought not to be held to have acquired the right of occupancy in respect of lands which he has held for less than 12 years.

Section 56.—This section appears to be a necessary corollary to Chapter II, for if the zemindar cannot extend his khamar or zerati land beyond its present limits, all ryoti land, though it might revert to him by purchase, would continue to retain its character of ryoti land. But it goes further, and proposes to give to the ryot with whom zemindar may settle it, after such purchase, the same status which the previous tenant acquired after 12 years' occupancy, notwithstanding any contract to the contrary. While if a ryot acquired it he could sublet it, the sub-lessee acquiring no right of occupancy. Under the present rent law the right of occupancy is a personal right, accruing to a tenant under certain conditions and being transferable only according to custom. But this section proposes to declare to be a quality attaching to the land and inseparable from it after a certain tenant has acquired the right of occupancy in respect of it. In short, it is to be a personal right in regard to the first occupancy tenant, but a right attaching to the land after that tenant gives up, or the zemindar acquires it otherwise. This section neutralizes the effect of the foregoing provisions as to right of pre-emption of zemindar, for no zemindar would choose to lay out capital in the purchase of such tenures with the incident of the right of occupancy inseparably attaching to it.

This section and the six sections preceding it are calculated to create different grades of tenures intermediate between the landlord and the actual cultivator, who will acquire no right of occupancy, and whose position, which the Bill professes to ameliorate, will remain the same as it is.

CHAPTER VI.

The restraint upon the freedom of contract is inequitable, and the objection upon this ground to the provision of Chapter V applied also to this chapter.

The limitation of the zemindar's demand when rent is paid in money to a fifth of the average annual value of the gross produce of the land in staple crops (article 59, column 2, section 61, clause 2, section 64 and section 75) is opposed to the spirit of the permanent settlement, and finds no support either from reason or history. While the Hindus were the ruling race the ordinary *pyekast* ryots were entitled to 50 per cent. of the produce, and the immigrant *khadkastas* to 45 per cent. Numerous authorities might be quoted in support of this proposition, but I consider it useless. The original *khadkastas*, however, paid a higher rent than either the pyekastas or the immigrant khadkastas, their share being less than 45 per cent. But the present Bill, by fixing the share of the occupancy ryot at 50 per cent., would place him at a higher position than his forefathers, the original *khadkastas*, enjoyed. The supporters of the Bill would say that under British rule a strong competition for land has come into existence and the khadkasta now pays a lower rent than the pyekast. To them my reply is that, while they recognise competition by rendering all occupancy tenures transferable, they ought to recognise the same by leaving rents payable by ryots open to be determined by competition. They tell us, zemindars, whatever may be extent of demand for land, and however strong the competition for it, you will not be entitled to more than a fifth of the value of the produce if paid in money, and to a half if paid in kind (which half by the way may be commuted to money rent at the instance of the tenant, section 82), and all the profits arising from increased competition must go into the pockets of the innumerable intermediate tenure-holders, petty taluqdars in their own way, whom we want to introduce, but we will take good care that the actual cultivators are not rack-rented, and we provide section 119 for that purpose. But if there be any competition, it will be strongest amongst cultivators, and section 119 will, I fear, be found to be quite inoperative, for, as pointed out by Rajah Siva Prosad, there will be nothing to prevent tenure-holders from insisting on the payment, in an underhand way, of more than the amount limited by section 119. By the permanent settlement, the State share of the produce was given to the landlords, and the revenue assessed represented that share. Looking at the state of things at the time of the settlement, we find that the State share of the produce, and consequently the revenue, represented more than half. How can the Government now go back and settle money rent at one-fifth?

Section 81, clause (a), limits the zemindar's demands when paid in kind to a half. As a matter of fact, in Behar $\frac{9}{16}$ths is now willingly paid by the ryots. Why interfere with rates settled by custom, specially when serious consequences will follow from the discontent that will necessarily be created among the land-holding classes?

Sections 82-84.—The same objection on the ground of restraint upon the freedom of contract, though payment in kind is very rare in Bengal, and Bengal zemindars are never unwilling to receive payment in money.

CHAPTER VII.

The present rent law does not contain any specific provision in regard to bastu land, but judicial decisions have declared such holdings to be the subject of contract, express or implied. Section 85 is directly opposed to the current of such decisions. In this section also we meet with the words "notwithstanding any contract to the contrary." But in section 86 it is provided that a bastu ryot shall be liable to ejectment on breach of any condition of a written contract between himself and his landlord, consistent with the provisions

of this Act. I for one cannot concur what such a contract may be. There is the Act itself between the landlord and the tenant, and a contract consistent with its provisions is a misnomer. But such contract or no contract, even if the court decrees ejectment, the landlord must pay compensation for houses, &c., which he may not require, and the materials of which the ryot might sell or remove at his pleasure.

CHAPTER VIII.

This introduces novel changes, which even official Members of Council characterized as dangerous. The non-occupancy ryots or tenants are granted privileges which they never enjoyed: they shall not be ejected notwithstanding any contract to the contrary, except as provided in clauses A, B and C of section 90, and if ejected on refusal to pay enhanced rent, they shall be entitled to compensation for improvements, and a further sum for disturbance equal to ten times the yearly increase of rent demanded; their rent shall never exceed $\frac{5}{16}$ths of the value of the gross produce (section 119). The compensation clause introduces a provision which is quite opposed to the spirit of the law of land tenures of this country. It is an offshoot of foreign law sought to be engrafted upon the historical land law of this country with a view perhaps to try an experiment. But experiment in this direction will never succeed, as it has perhaps in matters of adjective law, evidence and contract. As regards the rent payable, a distinction is attempted to be made between occupancy and non-occupancy ryots, a distinction which has never been countenanced by the law of Bengal.

CHAPTER IX.

Sections 100-102 will greatly increase the cost of collection, and to prepare a full statement at the close of the year will be found impracticable in many cases. Then again the expression *close of the year* is not clearly defined. Does it mean the 30th day of Choitra where the Bengali year prevails? If so, it would be impossible to expect adjustment of accounts with the tenants on that day. As regards the penalty provided in sub-section 3 of section 102, what if gomastas or niabs neglect or contumaciously refused to do the needful? Suits against gomastas and tehsildars are of so frequent occurrence that the framers of the Bill ought to have taken note of it.

D. Section 103, sub-section (*a*) is calculated only to create disputes between landlords and tenants on trifling causes. Where tenants have combined against landlords it will add strength to such combination. Under the existing law, refusal on the part of the zemindar to receive rent only entitles the tenant to deposit, but under sub-section (*a*) the tenant will be able to deposit if only he has reason and not even *bonâ fide* reason to believe that payment will be refused.

F. Section 117.—The penalty is opposed to even current decisions which lay it down that there can be no criminal trespass in respect to joint property. And when the landlord is entitled to a share of the crop it would be inequitable to hold him guilty of that offence. It may so happen that there may be no time to proceed under section 112, while it may be highly necessary that the landlord should cut and store the crop.

G. Section 119.—It is arbitrary and impolitic to fix the rent payable by under-ryots and non-occupancy ryots at $\frac{5}{16}$ths. This provision will be merely a dead letter, as explained above.

CHAPTER X.

Section 126, sub-section (*f*).—Dwelling-houses are always erected by ryots; and leaving the holding they leave the dwelling-house, unless by special arrangement with the landlord, they are allowed to retain the dwelling-house. To include dwelling-houses in the definition of improvements for which the zemindar, in case of ejectment, will have to pay, is improper.

CHAPTER X.

With reference to this chapter, I beg to repeat what I have already said above, that an unnecessary and inequitable limitation is sought to be imposed upon the right of private contract, section 132, and that the proposed compensation for disturbance introduces a strange innovation into the land law of this country. If you want occupancy and other ryots to make improvements, let them do so under contract with their landlords.

CHAPTERS X AND XII.

Not quite objectionable, though extensive powers are proposed to be conferred on Settlement Officers.

CHAPTER XIII.

This chapter is highly objectionable in taking away from the landlords the powers to distrain without the intervention of the courts, which they have enjoyed for a considerable length of time. The power of distraint is said by the supporters of the Bill to be an offshoot of the English law. But it has also been shown that the power is exercised in Native States, where the old land law of the country is still in force. The intervention of the courts will render the provisions as to distraint not only ineffectual, but expensive in the highest degree. To the best of my knowledge very few cases of wrongful distraint have been brought before the courts, and the restrictions upon the power in the shape of penalty in case of wrongful distraint is a sufficient guarantee that no unwarrantable use would be made of that power.

The remaining chapters of the Bill deal with the adjective or procedure part of it. It is, however, the substantive part of it that is chiefly objectionable, the procedure portion being necessarily but a sequel to it.

No. 810G., dated Berhampur, the 24th July, 1883.

Memo. by—The Collector of Moorshedabad.

Copy forwarded to the Commissioner of the Presidency Division, in continuation of this office No. 698G., dated the 10th instant.

No. 267K.L., dated Calcutta, the 1st August, 1883.

Memo. by—J. MONRO, Esq., Commissioner of the Presidency Division.

Copy submitted to the Board of Revenue, Lower Provinces, in continuation of this office letter No. 188R.L., dated 2nd July last.

Notes by Hon'ble T. M. Gibbon.

CHAPTER. I.

Section 3 says:

"The following definitions and rules shall apply in the construction of this Act unless there is some thing repugnant in the subject or context:—

In the Bengal Rent Commission's Bill this clause stands as follows:—"In this Act the following words and expressions are used in the following senses unless a different intention appears from the context." The clause as it stands in the Bill is not an improvement on the above. In reference to any rights belonging to a landlord likely to be affected, the definition here given is ample, but it is worth while considering how far the interests of the raiyats would be affected by it. To do so it is necessary to read 43B with it.

"(1) 'Estate' means land included under one entry in any of the general registers of revenue-paying lands and revenue-free lands prepared and maintained under the law for the time being in force by the Collector of a district."

43B says:—"Where two or more estates have been created by one or more partitions taking place since 1st January 1853, the area comprised in the parent estate of which they would have formed part if no such partition had taken place shall be deemed to be a single estate."

Section 45 (1) says:—"A raiyat who has continuously held any land for a period of 12 years shall become a settled raiyat of that estate."

Section 47 says:—"Every settled raiyat of an estate shall have rights of occupancy in all land held by him on that estate." As I read the Act, the raiyat of a landlord holding his estate registered under two or more towjee numbers may have occupancy-rights in land situated in one portion of the estate, and not in another.

"(3) 'Tenure' includes an under-tenure and the interest of every tenant of the class referred to in section 14.

The definition should, I think, be so far modified as to embrace the whole estate (as one estate) of one proprietor. No direct definition of the term "tenure" is here attempted. Section 14 and the illustrations here given are intended to cover all classes of tenures.

"*Illustrations.*—(*a*)—A dar-patní or si-patní interest or a mokurreree holding is a tenure, (*b*)—A dar-ijarah or a farm for a term of years is a tenure."

Although a jághir is a service-tenure and liable to be cancelled at the will of the landlord, it may be necessary to modify the above definition in such a way as to cover such and all tenures, or raiyats holding from tenure-holders may be deprived of their holdings.

Section 14 says—"Where land has been held by a tenant and his predecessors in interest at a rent which has not been changed from the time of the Permanent Settlement, then, subject to the provisions of this Act, the rent shall not be liable to enhancement, and the tenant shall be deemed a tenure-holder for the purposes of this Act.

The Rent Commission defined a tenure (1) "as a rent-paying interest in land immediately subordinate to that of a proprietor and superior to that of raiyat; (2) a revenue-free or rent-free interest in land when there exists no rent-paying interest in the same land between the proprietary interest and such revenue-free or rent-free interest." The definition given by the Rent Commission of the term, modified in so much as to include all mokurrerees, all holdings under section 14, would be preferable to the one given in the Act.

"(5) A person shall not be deemed to be a raiyat in respect of any land, or to hold that land as a raiyat, unless he holds it for the purposes of agriculture, horticulture or pasture, or he or his predecessors in interest came into possession of it for such purpose: Provided that a person shall be deemed to hold as a raiyat any bastu or homestead land included in the same holding with other land held by him as a jote.

A negative definition such as this is, is not sufficient; we require a positive one. It is not sufficient to know who "is not" a raiyat, we require to know who is to be considered one. Either the term "raiyat" should be properly defined, or an English term that is generally known used throughout the Act. The general meaning of the term "raiyat" is a "subject," also a "cultivator." It should be so defined as to include all persons engaged in agriculture, &c.; it should include European as well as Native cultivators of the soil.

It should not be left open to every moonsif in the country to put his own interpretation on the term

"*Explanation.*—A person may hold land for a purpose mentioned in this clause though he has sublet it."

"raiyat," or to deem a planter to be a raiyat or not as he thinks right. If not deemed a raiyat under the Act, all occupancy rights the planter may have already acquired would be forfeited.

The Rent Commission properly defined a raiyat to be "a person who holds land, or who occupies and cultivates land, if such person or his predecessor in title was originally let into possession of such land for the purpose of cultivating it or bringing it under cultivation. A person cultivates land or brings land under cultivation within the meaning of this definition when the cultivation is carried on by himself or by members of his family, or by servants or by hired labourers, or by persons to whom he has sublet the land or any part of it, or partly by some and partly by others of these persons.

The word "person" should be substituted for "tenant."

Sub-section (6) *says*:—"'Under-raiyat' means a tenant holding land whether immediately or mediately below a raiyat."

Sub-section (8) *says*:—"'Tenant' does not include any person who is not a tenure-holder, raiyat or under-raiyat or the tenant of a bastu holding."

Here, again, we require a positive instead of a negative definition. If the term "raiyat" is hereafter so defined as to include planters, a definition that would cover the parties mentioned will be sufficient. If any English term is hereafter substituted for the term "raiyat," the definition of the term "tenant" should be so altered as to cover whatever term may be used.

As it stands, it would appear as if we were to be left out in the cold. The Rent Commission defined a "tenant" as "a person liable to pay or deliver rent."

"(14) 'Agricultural year' means, where the Bengali year prevails, the year commencing on the first day of Bysakh, and, where the Fasli year prevails, the year commencing on the first day of Assin."

In Behár, for all purposes of agriculture, that is to say, in reference to charge of lands, possession of lands, &c., the agricultural year ends on the last day of Jeth and commence on 1st day of Assar. The rents become payable from Assin. Sections 45 (2) and 57 declare that a person shall be deemed to have held as a raiyat any raiyatí lands held as a raiyat by a person whose heir he is.

"(17) 'Succession' includes both intestate and testamentary succession."

If it is possible to use the word "succession" in reference to property acquired by purchase, assignment or transfer, the definition should be so drafted as to allow of its being done, so that it may be taken for granted that the transferee succeeds as a matter of right to all the rights owned by the transferer.

In reference to the words "class" and "staple."

The word "class" is often used in the Act in reference to raiyats, tenants and lands; the word "staple" in reference to produce. Is it necessary to define the terms, or are their meanings made sufficiently clear from their context?

In reference to "class," I would ask this particularly, as to the effect section 74 (1) will have on our interests. In reference to "staple," I would ask whether a definition should be given to the term, or it be left to the Board of Revenue, as the Act says, to declare what shall be declared "staple" for the purposes of the Act.

When criticizing the provisions of chapter VI, I will again refer to the subject.

Remarks on Chapter II.

Section 5.—"'Khamar land' means—

"1st, land situated elsewhere than in Bihar which a proprietor has held, whether under the name of khamar, nij-jote, sir or otherwise, as his private land for 12 continuous years before the commencement of this Act; and, 2nd, land situate in Bihar which (*a*) is recognised as zerat by a village-custom established before the commencement of this Act, or (*b*) is proved to have been held by a proprietor as zerat for 12 continuous years immediately before the commencement of this Act."

Khamar lands, spelt in the old Regulations as komer or khomar lands, are throughout this Bill looked upon as one and the same as nij-jote, sir or zerát lands.

Does a Bengal ryot look upon them as such? If there is a difference, where lies the difference? Bell, in his glossary to Act VIII of 1869, says "'khamar' land, of which the revenue was paid in kind, or of which the produce was divided in determinate shares between the cultivator and the revenue-payer or zemindar, applied also to lands originally waste, but which, having been brought into cultivation, were retained by zemindars or were let out at a very small rent." "Khamar" is defined in Wilson's glossary as "a threshing-floor; the general threshing-ground of a village, to which all the crops are brought to be cleaned, and from which they cannot be removed until the landlord's claim is settled; land of which the revenue was paid in kind, or

of which the produce was divided in determinate shares between the cultivator and the revenue-payer or zemindar." "applied also to lands originally waste, but which, having been brought into cultivation, were retained by the zemindars in their own hands or were let out at grain-rent. At the decennial settlement, these lands, previously unassessed, were declared subject to assessment."

If the above definitions are correct, "khamar" lands cannot in any way be considered nij-jote or zerat, but are to all intents and purposes the same as our "bhaoli" lands; and, under the present law, it would not be necessary to show direct possession by the landlord to constitute them "khamar."

I believe in Bengal all lands lying waste, all drains, "duggers," roads, water-courses are looked upon as "khamar."

It is now proposed that a landlord shall have a right to claim such lands only as khamar, nij-jote, sir or zerat as he has held as his private land for twelve years continuously before the commencement of this Act.

What is to constitute "his having held as private land for twelve years continuous?" Is the possession of the ryot to be looked upon in these cases as the possession of the landlord, or is he to be allowed to retain in his possession only such lands as he has held and cultivated at his own expense for twelve years? Act VIII of 1869, section 6, says:—

"Every ryot who shall have cultivated or held for a period of twelve years shall have a right of occupancy in the land so cultivated or held by him" .... "but this rule does not apply to khamar, nij-jote or sir lands let by him on a lease for a term, or year by year."

That is to say, if lands were once declared zerat or nij-jote, whether they were let to ryots or held directly, and cultivated at the zemindar's expense, they still remained zerat.

Is it the intention of the Act to dispossess the landlords of all lands they may have leased to others on the faith of this Act? If such is the intention, landlords should be allowed at least a twelvemonth to resume such lands after the present leases lapse.

Under section 27 of Act VIII of 1869, a ryot who had been ejected from his holding was compelled to bring his suit within a twelvemonth from the date on which cause of action accrued.

In sections 224 and 225, and schedule IV, which determine the periods allowed for the institution of suits under the Act, no mention is made of the period such a suit would run. Is it intended to compel the landlords to prove their titles to all lands they at present hold, to set aside titles perfected by the lapse of time; in fact, to allow ryots to challenge the claims of zemindars to lands in their possession, by increasing the term allowed for bringing such suits, from one to twelve years, with a retrospective effect?

Whatever time may be allowed to persons claiming in the future to be wrongfully or forcibly ejected from their lands, the present law should hold good as regards the past.

Section 6.—"All land which is not khamar land of some estate shall be deemed to be ryot land, and all land shall be presumed to be ryot land until the contrary is proved."

By casting the onus of proof on the zemindar, ryots will be directly encouraged to encroach on the landlord's rights.

A ryot is entitled to the possession of only such lands as he may have fairly received possession of, with the consent direct, or implied consent, of his landlord, and on which he pays rent.

Hitherto all waste lands, all alluvion (other than land reformed on old holdings), all jungle, have been considered at the disposal of the landlord; but from the Statement of Objects and Reasons, published with the Bill, it would appear as if the landlord's rights to hold land was to be limited to the land he may show that he has held for 12 years; the rest is to be considered destined for the occupation of the ryots.

At the time of the Permanent Settlement, the discussion arose as to whether the land lying waste was to be considered the property of the Government or the property of the landlord, and decided in favour of the landlord; there was never any question as to whether it should go to the landlord or to the ryot.

To cast the onus of proof on the zemindar and not on the ryot is wrong in theory, and will be equally inoperative in practice. The Rent Commission, under section 81 of their Bill, define zerat land "as land the cultivation of which has been carried on for 12 years continuously wholly on behalf of the proprietor, and at his sole risk, with his own stock, or by his servants, or by hired labourers, or partly by some and partly by others of those persons."

This definition, excepting in so much that the landlord must prove 12 years' continuous holding, and only refers to proprietors, not landlords in general, is correct.

In North Bihar, and I believe in Bihar generally, the custom was formerly that zerat lands leased to the ryots on the "bhaoli" system reverted to the landlord whenever he required them, but, once leased on a money-rent, they were merged in the rest of the ryoti lands, and the landlord had no more right to resume them than he had to resume other ryoti holdings.

Acts X of 1859 and VIII of 1869, contrary to custom, declared lands once zerat, always zerat. In this respect they have done much to unsettle ryoti holdings, and I would gladly see the former custom reverted to. A landlord at present holding land and cultivating it himself as zerat should be confirmed in his title.

Any landlord who has, in accordance with the provisions of Act VIII of 1869, leased to ryots any zerat lands that he has cultivated at his own expense any time during the last five years, should be allowed to resume those lands within a given time after the expiry of the term for which they are at present leased; lands not resumed within the terms allowed to be ryoti.

If necessary, claims to land, the leases of which do not expire for some time after the passing of the Act, might be registered. A ryot claiming land that he has been forcibly dispossessed of to be allowed one year to file his suit, in cases where the lands have been given to other ryots, and three years in cases where his lands are held directly by the landlord; that is to say, one year to perfect ryot's title, three years for zerat, after passing of Act. All lands lying waste should be at the disposal of the landlord, to cultivate himself, reserve as grazing-grounds or to lease to ryots.

The word "khamar" may cover these in Bengal; zerat certainly does not in Bihar.

These sections refer to lands held by the "proprietors;" they say nothing of lands held by landlords generally.

Section 7.—"The Local Government may direct that a register shall be made of khamar lands situate in any district or part of a district."

Sections 7 to 13 inclusive direct that a register of khamar lands shall be made.

I do not object to these sections as they stand by themselves, but, coupled with the foregoing, they will lead to endless litigation.

The Act does not say who is to pay for the preparation of the register.

CHAPTER III.

Of tenure-holders.

A.—The Right to hold at fixed Rents.

Section 14 says—"Where the land has been held by a tenant and his predecessors in interest at a rent which has not been changed from the time of the Permanent Settlement, then, subject to the provisions of this Act, the rent shall not be liable to enhancement, and the tenant shall be deemed a tenure-holder for the purposes of this Act."

Section 15 says—"Where land has been held by a tenant and his predecessors in interest at a rent which has not been changed for 20 years, then, subject to the provisions of this Act, it shall be presumed, until the contrary is shown, that it has been held by them at that rent from the time of the Permanent Settlement."

Sections 14 and 15 of the proposed Tenancy Bill are the same in substance as sections 3 and 4 of Act VIII of 1869. They equally allow all ryots, who have held their lands at one rental from the time of the Permanent Settlement, to hold their lands at such rental in perpetuity. By creating a presumption of law in favour of the ryots, they throw the onus of proof on the zemindars.

They differ in so much only that section 14 of the Tenancy Act says, where the ryot has held at "a rent" which has not been changed, section 3 of Act VIII of 1869 says "at fixed rates of rent."

They are wrong in principle and injurious in practice, and the legislature, in decreeing to the ryots a right to hold their lands at fixed rates in perpetuity, in granting them the means of acquiring further rights in the future, has exceeded the powers it reserved to itself at the time of the Permanent Settlement. It has transferred the proprietary right in the soil from the landlord to the tenant. They are injurious in practice, as they have destroyed the landlord's faith in the consistency of our laws, and compelled many landlords, who might otherwise have been lenient to their ryots, to raise their rents every few years, for fear of losing the power to do so for ever: they have rack-rented many estates. In my humble opinion, although the Government, at the time of the Permanent Settlement, distinctly reserved to itself and to its successors the power to enact such laws as they might deem necessary for the protection and welfare of their subjects, it nowhere reserved to itself the power of, or the right to transfer the proprietary interest in the soil from one class of people to another; and unless it can be shown from the laws then passed that it was intended that the rents then paid for land by ryots was not to be enhanced at any subsequent period, the Government of 1859 went beyond the spirit of the Settlement in providing ryots with the means of acquiring a right to hold at fixed rates in perpetuity.

It may be open to dispute as to the extent the Government of the day intended zemindars to participate with the ryots in the future prosperity of the country; but to me there is no doubt whatever that they did intend them to participate proportionately in it, and that they had no intention whatever of reducing them to the position of annuitants on their estates.

Many of the able men who have lately written on the right to enhance have quoted despatches and correspondence which passed between members of the Government to show the "intention" of the legislature at the time; but, for us planters, our brief is confined to the regulations and the rules laid down for the guidance of the Revenue officers; beyond these we cannot tread. Not one in a hundred of us, who will be affected by the law, have an opportunity of perusing the correspondence, nor would it, if produced in a Court of law, affect our rights in the slightest degree.

When the subject of enhancement of rents was discussed by the Bihar Rent Commission, I was not able to attend. When I wished to re-open the question at a subsequent meeting, it was decided that the question of the zemindar's right to enhance had been fuly discussed, and the question would not be re-opened.

The Bengal Rent Commission in their report say:—"*Section 24.*—We have also retained the presumption, provided by the existing law, that, when the rent of a tenure is proved not to have been changed for a period of 20 years before the commencement of the suit, it shall be presumed that such tenure has been held at that rent from the time of the Permanent Settlement, unless the contrary be shown or it be proved that such rent was fixed at some later period. It has been decided that this presumption may be rebutted by evidence of the creation of the tenure at some period subsequent to the Permanent Settlement, and we have introduced words to that effect into the section of the Bill. It has been pressed upon us that this presumption bears very hardly upon zemindars; that, if a tenure-holder succeeds in proving payment of rent for 20 years at the same rate, it is very difficult, if not impossible, for his landlord to rebut the presumption which upon this is raised by the Act; that it thus becomes dangerous to allow tenure-holders to remain undisturbed, paying the same rent for 20 years; and that zemindars are in consequence forced into litigation, lest their rights should pass away *sub-silentio*. We have considered these arguments, and they failed to convince the majority of us that a case has been made out for altering the law, especially now that more than 20 years have elasped since the statutory presumption was created. If the law were now changed, the change would destroy titles which have become perfected by the presumption. The zemindar has it in his own power, by preserving a proper record of transactions affecting tenures not entitled to the benefit given by the presumption, to prevent prejudice to his own interests in the future. Looking at the question from another point of veiw, it is very much more difficult for a tenure-holder to prove a title from the time of the Permanent Settlement than for the zemindar to prove that the tenure was created or the rent fixed at a

later period, or that the rent has been changed on one or more occasion since the Permanent Settlement."

The above arguments refer to tenure-holders under the present law. Under paragraph 27 they have made them equally applicable to ryots. It will be observed that the Commission makes no attempt to show that ryots were accorded the right to hold at fixed rates in perpetuity at the time of the Permanent Settlement. It simply says that, were the law now changed, the change would destroy titles which have become perfected by the presumption.

If I understand the object of the new law rightly, it is to reinstate people who have suffered at the hands of the legislature in their rights; and, although it would be an injustice to destroy titles perfected by the presumption, it is only an act of justice to the zemindars to cancel the ryot's power of acquiring fresh rights in the future. Unless it can be shown that Act X of 1859 only confirmed the ryots, in their rights, or that the legislature of the day reserved to itself the right to fix the amount to be received by the zemindar as rent for his land in perpetuity, the zemindar will have a grievance and a right to ask for redress. If the law remains in force, it would surely and certainly undermine the zemindar's title, or rack-rent the country or, the instant an attempt is made to prepare a record-of-rights, ruin both ryot and zemindar with litigation.

Regulation I of 1793, better known as the Act of Permanent Settlement, does not, as far as I can judge, contain one word to show that, in settling the zemindars' jamma in perpetuity, it was intended to fix the rents then paid by ryots for their lands in perpetuity also; whereas much in many Regulations passed subsequently goes to show that the legislature had no such intention.

Some writers have founded the ryot's right to hold at fixed rates on the wording of some of the clauses of Regulation VIII of 1793, overlooking the fact that Regulation VIII was simply a reprint of Regulations passed in 1789 and 1790; that, if Regulation I of 1793 had never received the sanction of the Court of Directors, Regulation VIII would still have been the law of the land, and the term allowed to zemindars for revising and consolidating *abwabs* and issuing pattas had expired two years before the clause was embodied in Regulation VIII of 1793.

Had the legislature of the day intended the ryots to hold at fixed rate in perpetuity, it would, I think, have taken measures to ascertain at what rates the ryots were really holding their lands, to keep some record of them, and not forbidden their officers to enquire into the subject, as was done under the circular orders issued to the officers making the settlement and also under the Regulation.

In making the settlement with zemindars, no attempt was made to ascertain at what rates ryots held their lands: the farming jammas or rent paid by the mootahids was alone called for. It was only in 1817 that it was thought necessary to keep a record of the ryots' holdings, and that Collectors were allowed some control over patwaris' accounts.

If it had been intended that ryots should hold at fixed rentals in perpetuity, section 56 of Regulation VIII of 1793 would not have remained law, nor would the term of the leases to be given to ryots have been limited to ten years.

Had the legislature intended to allow the ryots to hold their lands at fixed rents in perpetuity, they would not have allowed purchasers at revenue-sales to set aside all previous engagements made by the defaulters with their ryots; if they intended to do so, they were guilty of great injustice. Under Regulation VIII of 1793, only a certain class of mukarari tenures were upheld; the rest were declared illegal.

I am sorry to say I cannot see the force of the arguments advanced by the Rent Commission for allowing the 20 years' presumption in favour of the ryot to remain law. I do not believe that the lawyers who sat on the Commission would, if sitting in judgment on a case, allow them to hold good in reference to a dispute regarding any other class of property.

Because one party to a dispute has it in his power to prove his side of the question more easily than the other party, it is no valid reason for casting the whole onus of proof on such person; if one person were to lend a thing to another, and that other were to say he had given it to him, and not lent it, I do not think the judge would enquire who could most readily prove his assertion, and cast the onus of proof on that person.

I may say at once that I do not think it possible for any ordinary ryot to trace his holding back to the time of the Permanent Settlement: men holding mukarari leases under mukarari sanads would be able to do so, but, never anticipating, being able to acquire a right to hold at fixed rates, they would naturally be careless of their proofs. I do not think they could in many instances trace their pedigrees, or tell who were the heads of their families at the time. It has been repeatedly stated that it is very easy for a landlord, by producing the records in his office, to prove his right to enhance the rents of the land. Before they repeat the assertion, I would recommend the persons who make it to try and produce evidence that will satisfy a Court of Law. Heaps of documents may be lying among one's records which are perfectly trustworthy and believed to be true by the person in whose possession they are, but of no value in a Court of law, because their *bona fides* cannot be proved or authenticated.

The Hon'ble Mr. Evans, in his speech in Council, states—"Any number of papers may be produced,—jammabandis, jammawasilbakis and the like,—but they are worth nothing. I don't say the zamindars have anything to do with the presentation in Court of untrustworthy documents; many of them are very respectable people; but the naibs or managers think nothing of fabricating a set of papers." And this I believe to be the opinion of every Judge in the country.

When once the Judge commences to try one's suit, believing any evidence one will bring forward has been fabricated, it is hard work to persuade him of the justness of one's claim.

It may be replied that, if the zemindar cannot lodge evidence that will be accepted as trustworthy from among his own records, it might be easy to procure copies of village-records from among the records filed in the Collectorates. When tested, this source also fails us. If all the earlier Regulations and reports of the Settlement officers are carefully perused, it will be seen how careful the Government of the day was to satisfy the zemindars that they did not wish to pry too closely into their private transactions with their ryots. The Collector of Sarun, sending in his report dated May, 1793, after first saying that all the records in the Sarun Collectorate had been burnt, and none were procurable for Sarun from kanungos, states that the kanungos furnished him with a very particular account for Chumparun for 1196, 1198 and 1199, &c., which he considered as sufficiently minute for the purposes required as far as relates to that part of the district.

In paragraph 4 of his report he says:—" The accounts kept by the Mufassal kanungos of Chumparun are always referred to on occasions of any difference between the landlords and farmers and ryots; and, as I have never seen their authenticity disputed by either party when produced in evidence, I considered them as entitled to perfect credit. It is necessary to observe, however, that the amount specified in their accounts is neither what is actually paid by the ryots to the farmer, nor by the farmer or thikadar to the proprietor, but the amount of the engagement contracted by the under-farmer, to whom, according to a very general practice in this district, the lands are rented by the person who holds in farm immediately from the proprietor. Of course, the jamma specified therein includes no part of the collections, which comes under the description of Mufassal akrajat." And, when we find the same officer later on excusing himself for being obliged to act contrary to the spirit of the 46th article of the Regulations and for calling for " abstracts " of their accounts from the patawris, I think we may take it for granted that no detailed jammabandis were taken at the time of the Permanent Settlement.

For 20 years after the Permanent Settlement the Collectors were forbidden to enquire too closely as to what rents were received by zamindars from their ryots. In what year the order was passed to lodge copies of jammabandis in the collectorate I do not know. The earliest jammabandis I have ever seen are dated 1229 Fasli, &c., or 1822 A.D. Until 1873 the Government insisted on their patwaris filing their yearly accounts, and much valuable information was collected. A few years ago there was a new departure; the records of years were looked upon as rubbish and burnt.

We can now only fall back on the road-cess papers, which in many instances afford little or no information of the kind required, and are modern.

Section 16.—" When a tenant has paid as rent a fixed share or the value of a fixed share of the produce of the land, the rent shall not be deemed to have been changed within the meaning of sections 14 and 15 merely by reason of the amount paid having varied from year to year, or by reason of the rent having been commuted to a fixed money-rent."

I do not quite realize the effect the last words—" or by reason of the rent having been commuted to a fixed money-rent "—will have.

If sections 14 and 15 are to hold good, the first portion of section 16 should also hold good: the latter portion of the section will create (I think) great confusion, and should be struck out.

Sections 17 to 24.—I do not think they call for any remarks from me. If 14 and 15 are hereafter modified or withdrawn, some of these sections will require to be altered; if 14 and 15 are to remain law, these should remain as they are.

C.—Of the Incidents of Permanent Tenures.

Section 25 says: " Every permanent tenure shall, subject to the provisions of this Act in respect of registration, be capable of being transferred and bequeathed in the same manner and to the same extent as other immoveable property."

Ryots claiming to hold from the time of the Permanent Settlement are, under the provisions of sections 14 and 15, tenure-holders. Unless the legislature is prepared to alter the present registration law and make the registration of wills compulsory, or specially provide for the registration of ryots' wills, I do not think it advisable to give the ryot the power to bequeath his property to others; and I think some distinction should be made here between tenure-holders whose titles are undisputed and ryots who claim to hold at fixed rates, but whose claims have never been directly acknowledged in a Court of Law or by the landlord.

D.—Of the Registration of Transfers of, and Succession to, Permanent Tenures.

Section 27 to section 35, sub-section (2).

Section 27.—" Landlord bound to register voluntary transfer or succession on application."

Section 28.—" Application may be served through a Revenue officer."

Section 29.—" Registration in case of transfer by sale in execution of decree other than decree for rent."

This I believe to be a very important chapter—of importance to the zemindar as well as to the ryot—a necessity to us as traders.

Its utility should be increased—

1st, by laying down some rules for the guidance of the zemindars in cases of disputed titles;

2nd, by giving zemindar some power to make a temporary division among heirs;

Section 30.—" Registration in case of transfer by sale in execution of decree for rent or by summary sale."

Section 31.—" Effect of omission to register voluntary transfer."

Section 32.—" Application to Court to compel landlord to register."

Section 33. —" Application by landlord to compel registration."

Section 34.—" Landlord to give copies of entries in the register."

Section 35.—" Board of Revenue to make rules regarding registration."

3rd, by declaring the effect a certificate of registration from the zemindar's court is to have; whether it is to carry the same value as a decree of possession passed by a criminal court, or what?

The payment of all arrears of rent due to the landlord at the time of transfer should be compulsory.

It should also be declared that any right of pre-emption the landlords may claim under subsequent sections of the Bill shall not be vitiated by registration of transfer being compulsory under this chapter.

Section 33, sub-section (*3*), should carry costs.

CHAPTER IV.

OF PATNI TENURES.

Section 36.—" Patni tenure means a tenure of the kind described in schedule II annexed to this Act, and includes the dar-patni and other similar under-tenures referred to in that schedule."

Section 39 says: " When a patni tenure is transferred otherwise than by sale in execution of a decree, or by summary sale under section 42, the landlord may refuse to register the transfer under Chapter III of this Act until the security required under section 38 is furnished."

Section 42 allows " recovery of rents by summary suit."

The zemindars should, I think, have the power to refuse to register unless all arrears of rents are paid; but I hardly think it necessary to demand security from this class of tenure-holders; the tenure itself is security sufficient. The tenure-holder's duly authorized agent should also have power to register.

I am also of opinion that the procedure laid down in regard to patni tenures should be extended to all permanent tenures other than ryoti tenures referred to in sections 14 and 15.

CHAPTER V.

OF OCCUPANCY-RYOTS GENERALLY.

" Village" and " Estate."

Section 43 with sub-sections (*a*) and (*b*) interpret the terms. I have already referred to the interpretation put on " estate." I will only now say that I think a ryot holding lands in two villages the property of one person should acquire occupancy-rights in both. Because the two villages are entered under different towjee numbers should make no difference to the ryot.

Section 44.—" Every ryot who, immediately before the commencement of this Act, has, by the operation of any enactment, by custom having the force of law, or otherwise, a right of occupancy in any land, shall, when this Act comes into force, become, for the purposes of this Act, an occupancy-ryot of that land."

Section 44 is intended to confirm all who have acquired occupancy-rights under any custom or law now in force in those rights. It speaks for itself.

Section 45 (1).—" Every person who for a period of twelve years, whether before or after the commencement of this Act, has continuously held, as a ryot, ryoti land situate in any village or estate, shall, notwithstanding any contract to the contrary, and though the land so held by him at different times during that period may have been different, be deemed to have become on the expiration of that period a settled ryot of that village or estate."

(2) " A person shall be deemed for the purposes of this section to have held, as a ryot, any ryoti land held as a ryot by a person whose heir he is."

The period of 12 years' continuous holding, necessary to acquire a right of occupancy, is, in my opinion, too long a term. Ryots receive leases usually for five years; it therefore necessitates the ryot taking three leases of his lands before he can acquire an occupancy-right; but, as the Supreme Government has definitely accepted the 12 years' test, there is nothing to be gained in discussing the subject. Seven years would, in my opinion, have been preferable—five years for the usual lease and two years over to show tacit consent of landlord. On the other hand, it is necessary to take precautions against allowing ryots to acquire occupancy-rights in lands they have not fairly leased from their landlords, and I do not think sufficient precautions against trespass have been taken in the wording of this section.

The same should be said of the person purchasing the rights of an occupancy-ryot and transferees in general. The Act, as far as I can remember, nowhere defines the position of a transferee.

Section 46 says: "If a settled ryot of a village or estate has ceased for a period of one year, whether before or after the commencement of this Act, to hold ryoti land as a ryot in that village or estate, either alone or as a co-sharer with others, he shall be deemed to have ceased on the expiration of that period to be a settled ryot of that village or estate."

The word "estate" should, I think, be left out of the section. The section should also say that the landlord may take possession of the land without suit.

A ryot may hold in several villages of a large estate paying rents to different landlords or ijaradars or tenure-holders; it may suit his convenience to abandon the lands in one tenure and not in the others, and yet, as the section is worded, the landlord would be debarred from taking possession of the land.

Section 47.—"Every settled ryot of a village or estate holding after the second day of March 1883, as a ryot any ryoti land comprised in that village or estate, shall, notwithstanding any contract to the contrary, be deemed to acquire, or have acquired, in that land a right of occupancy under the law for the time being in force:

"Provided that a person shall not acquire a right of occupancy under this section in respect of any land held by him alone as owner, tenure-holder or ijaradar."

Great exception has been taken by sundry persons who have advocated the cause of zemindars to the words "notwithstanding any contract to the contrary" being entered in sections 45 and 47.

In my opinion, they are absolutely necessary to prevent the ignorant from contracting themselves out of their occupancy-rights.

In the majority of such cases, the ryots contract themselves out of their rights without receiving any consideration, compensation or equivalent in return.

The word "solely" should be substituted for "alone," or "alone" should be placed at the end of the sentence.

Section 50 says: "When a ryot has an occupancy-right in respect of any land, the following provisions shall, notwithstanding any contract between him and his landlord to the contrary, apply, namely:—

To the ryot this is infinitely the most important part of the Bill, and the only portions of it that I would wish to be altered are the following:—

"(*a*) He may use the land in any manner which does not render it unfit for the purposes of the tenancy.

"(*b*) He may make improvements on the land as by this Act provided.

Sub-section (*b*) to have the words "for the purposes of his tenancy" added. My reason for wishing to see this alteration made, is that I think the ryot should be allowed to do anything to his land that he thinks will add to its productive powers, but that he should not be allowed to constitute himself the judge of other people's requirements.

"(*c*) He shall pay rent at fair and equitable rates, determined as by this Act provided.

"(*d*) He shall not be ejected by his landlord from the land, except in execution of a decree for ejectment, passed in accordance with this Act, on the ground that he has used the land in a manner which renders it unfit for the purposes of the tenancy, or that he has broken a condition consistent with the provisions of this Act, and on breach of which he is, under the terms of a written contract between him and his landlord, liable to be ejected.

"(*e*) He may sub-let the land or any part thereof.

Sub-section (*e*) to have the words "in accordance with the provisions of this Act" added.

The ryot should be allowed to sub-let under three restrictions: the first is, that he should be allowed to sub-let only for a term of years; the second, that he does not sub-let his lands for a less sum than will cover his land lord's rents; the third, the land he sub-lets must be free of incumbrances.

"(*f*) His interest in the land shall, subject to the rights reserved to the landlord by this Act, be capable of being transferred and bequeathed by will, in the same manner and to the same extent as other immoveable property.

Sub-sections (*f*) *and* (*g*).—The power to bequeath should not be accorded to him.

" (g) His interest in the land shall, if he dies intestate in respect of it, descend in the same manner as any other immoveable property; Provided that, in any case in which, under the law of inheritance to which he is subject, his other property goes to the Crown, his interest in the land shall go to his landlord."

From the wording of sub-section (g) it would appear as if it were intended that the power to bequeath should over-ride the ryot's right to inherit, and this I think contrary to the Hindu law of inheritance. The power to bequeath should not be allowed unless registration of ryots' wills is made compulsory; and I am not sure but that the power of gift in the case of absconding ryots will not be a hardship to the landlord.

Whether the ryot should be allowed the power to transfer or sell his holding has of late been a very disputed point. I myself believe it has now become a demand that cannot well be withheld from the ryots. In the interests of zemindars and traders, it should be legalized and controlled. All over the country we see ryots selling their holdings, mortgaging them for paltry sums. We see them daily being sold up for debt by decrees of Court, and the zemindars powerless to prevent them. We see the ryots compelled to part with their holdings at one-quarter of their proper value, owing to the uncertainty of the purchaser's tenure. We see zemindars selling up their ryots' occupancy-rights under decrees of Court for rents, and still declaiming that such sales should be declared illegal.

The landlords' interests have, I think, been amply cared for in the Bill. In the interest of the trader, I think the ryot should be allowed to transfer, subject to incumbrances. In the interests of the ryot, the person in whose name the holding stands should have the sole power to transfer, and some provision should be made for the management of minors' estates.

The most landlords can now claim is, that the law shall be left in its present state; anything more deplorable could not well be conceived.

What they now deny to the ryots as a right, they will soon ask the legislature to accord to the ryot as a favour to themselves.

Section 51 declares landlord's right of pre-emption, and requires of ryot to give one month's notice to landlord prior to sale. Section 54 and sub-section declares landlord's right to purchese in case of gift by ryot.

The ryot should be obliged to state in the notice the terms on which he intends to transfer.

Under sub-section 4, the landlord must declare his intention to purchase within six months rom date of gift. It would be better that his right to purchase should run from date of aplication to register.

Section 56.—" Notwithstanding any contract to the contrary, when the landlord of an occupancy-ryot acquires, under the foregoing section or otherwise, the occupancy-right in any land comprised in the holding, any person thereafter holding the land as a ryot shall have a right of occupancy in respect of it, and, if immediately before the acquisition of the right by the landlord, the rent of the land was a money-rent, shall be entitled to hold at a money-rent fixed in accordance with the provisions of this Act."

There is nothing in this section to prohibit the landlord holding the land himself, and cultivating it by his own servants or with hired labour. If the landlord leases the land to a ryot who already has occupancy-rights on his estate, by all means allow the ryot to whom he makes over the purchased land to acquire occupancy-rights in that land.

But why a ryot who did not previously possess occupancy-rights on the estate should acquire them with the land over made to him I do not see, nor can I understand why the landlord should not be allowed to make his own terms with the imcoming ryot regarding the amount of rent he is to receive for it.

CHAPTER VI.

OF THE RENT PAYABLE BY OCCUPANCY-RYOTS.

A.—Of money-rents generally.

Section 58 says: " A money-rent payable by an occupancy-ryot shall be presumed to be fair and equitable, and shall continue to be paid by him until it is enhanced under this Act, or reduced."

Under this section it would be open to a ryot to repudiate every condition under which he held his lands at a low rate of rent, and yet claim to hold the lands at the former money rental. It would be more just to declare that a ryot shall be presumed to hold his lands on the same terms and under the same conditions that he has previously held them on, until they are changed under the provisions of this Act.

Section 59. (1) " A money-rent payable by an occupancy-ryot may be enhanced by a contract in writing approved of and registered by a Revenue officer appointed by the local Government in this behalf."

Interference with the private affairs of individuals could not go much further than it is proposed to go under the provisions of sections 59 and 61. Better at once declare that the Revenue officers are to make a complete settlement of all estates, and that their will is to be the law.

(2) "A Revenue officer shall not, under this section, approve or register any contract by which a ryot engages to pay a rent more than six annas per rupee greater than that previously payable, or more than one-fifth of the established annual value of the gross produce of the land in staple crops calculated at the price at which ryots sell at harvest time, or any contract, until he has satisfied himself that it is fair and equitable, and that the ryot in entering into it acts as a free agent."

Under section 59 (1) a money-rent payable by an occupancy-ryot may be enhanced when approved of by a Revenue officer. By implication it may also be vetoed. Sub-section (2) positively forbids the Revenue officer to register any lease the rent of which is more than six annas per rupee greater than that previously payable, or more than one-fifth of the estimated average yield in staple crops.

That is to say, if the landlord, claiming his right of pre-emption, recovers possession of any ryoti lands, or purchases the occupancy-rights of any ryot sold up under a decree of Court, he cannot, whatever the market value of that land may be, re-let it on his own terms, but if he lets it at all, he must let it at an increase of only six annas in the rupee.

The lower the rates at which the ryot holds his lands the better price they will fetch at auction. If this section remains law, no landlord can afford to bid against an outsider for land: an outsider can do whatever he likes with the land: the landlord will only receive so much interest on his purchase-money as six annas in the rupee increase on the former rental will represent.

We need not discuss whether the one-fifth share of value of produce allotted to the landlords is sufficient or not, or whether they have a right to claim a larger share; nor is it necessary to discuss here what should be considered a rack-rent, as the Government have declared that the one-fifth proportion is at present only tentative.

Sections 59 and 61 also forbid the Revenue officer approving of any contract until he has satisfied himself that it is fair and equitable, and that the ryot in entering into it acts as a free agent.

The legislature of course have every right to declare that its officers shall satisfy themselves, before registering documents, that all parties to a contract act as free agents; but to do more than this I should hardly think necessary. If the Act allowed the Revenue officers to cancel the agreement, placing the two parties to the contract in the same positions they were previously in, the one keeping his land, the other his money, there would be some show of fairness in the transaction; but to dispossess one party of his land, and allow the other to keep both land and money, goes, I think, a little beyond fair play.

The wording of section 60 might be slightly altered with advantage. It might run—"Except as provided by section 59, or on account of the land being proved by measurement greater than the nominal area of the holding, a money-rent payable by an occupancy-ryot," &c., &c.

B.—Of the preparation of a table of rates and produce, and of suits to enchance money-rents where such table is in force.

The whole chapter is admirable in theory, but will, I am afraid, be found to be unsuited to the genius of the people—in fact, impracticable.

Had the basis of our present assessment of the rents of the country been founded on any given system, there would have been something to work upon; but with a dozen rates current for each class and quality of land in each village, it will be impossible to draw up any table of rates that will satisfy the parties concerned.

That the Government of the day have the right to declare what shall be considered a rack-rent in the future, as it has done in the past, we may at once concede; but, before it can enforce the provisions of this chapter, it must be prepared to remodel the whole rent-system of the country, and be prepared to hear that parties who may suffer by it will have a tangible grievance and claim compensation. Any ryats who may now be paying more than the declared rack-rent of the country have a right to demand that their rates shall be reduced to the present rack-rent without the landlords having any claim to compensation.

Should the rack-rent rate of the country be reduced, to be consistent, all ryots who may be paying a higher rate for their lands would have a right to claim a reduction in rent; but the landlords would have a fair claim to compensation for any loss they might suffer from such reduction. Unless Government are prepared to settle all claims in a fair and liberal spirit, it would be politic to leave the rack-rent limit where it is.

To carry out the provisions of this chapter in their integrity the executive must ride roughshod over the feelings and prejudices of all concerned.

It is now proposed, under the provisions of this chapter, to reduce the rackrent limit to one-fifth of the estimated average annual value of the gross produce in "staple" crops.

The Bill, under section 84 (c), leaves it to the Board of Revenue to determine what shall be considered staple crops. Although we may not all agree as to the exact shares into which the produce of the land had to be divided, between landlord and ryat, we are, I think, all agreed that under Native rule, and afterwards under English, the Government of the country was entitled to collect through its zamindars a fixed share of the produce of all lands, first as revenue, afterwards as rent.

This share or portion of the crop the Government of the day claimed as their right, without any reference to the quality or value of such crop; the more valuable the commodity,

the greater its revenue; and, although Government could, before the Permanent Settlement, and did actually in the instance of sugarcane, waive its right to claim an increase in rents on account of the greater value of the commodity, it does not seem to have reserved to itself the right to prohibit zamindars from enhancing rents on that account.

At the Permanent Settlement the Government omitted, as far as I am able to judge, to make any such reservations; in fact, there is nothing to show that it intended to continue the prohibition after a settlement was come to with the zamindars.

Article 46, Regulation VIII of 1793, says: "It is expected that in time the proprietors of land, dependent taluqdars and farmers of land and raiyats will find it for their mutual advantage to enter into agreements in every instance for a specific sum, for a certain quantity of land, leaving it to the option of the latter to cultivate whatever species of produce may appear to them likely to yield the largest profit."

The sanads granted to zamindars as late even as 1840 enjoin the issue of pattas to raiyats, and the taking of kabuliyats or counter-agreements from them at money-rents; but they also say that, in a case where the raiyat fails to lodge a kabuliyat, the landlord may claim 22½ seers out of every 40 as his by right.

Regulation IX of 1805 went a step beyond this, and allowed nine-sixteenths of the produce to be collected from all lands three years under cultivation in the Peshwa's territory.

That the legislature of the day intended zamindars to exact the last farthing permitted by law I do not for a moment wish to say; in declaring the landlord's share of the produce to be 22½ seers out of every 40, it only meant to declare that it was to be the rackrent limit; that is to say, when a raiyat positively refused to come to a settlement for his lands at a fair rental,—the rate current in his pargana,—the landlord was allowed to claim his full rights.

As long as the landlord could claim a fixed share of the produce of the land, he would necessarily bring some pressure to bear on the raiyat to grow the most valuable crops, the more so as all special knowledge and care required for their growth, all extra cost, would fall to the share of the raiyat.

No fixed rules were laid down for the assessment of a money-rent; but landlords were urged to come to a money-rent settlement with their raiyats. Money-rents were intended to be, and were, a compromise between the value of the landlord's share of the more valuable commodities and the ordinary cereals of the country: the money-rent per bigha was in most instances greater than what the landlord received from the yield of his bhaoli lands. By fixing a money-rent for the land a zamindar waived his right to dictate to his raiyat the crops he should grow. It was nowhere intended that the landlord's power to enhance should be regulated by the relative value of cereals alone, but by the market-value of all crops grown.

Until one knows what crops the Board of Revenue would consider staple crops, or what rules it would lay down for the guidance of the Revenue officers in order that they may make out a list of staple crops, we can form no opinion as to the extent the zamindars' or raiyats' interests will be affected by the rule: if only cereals are to be accepted as staple crops, many claims for reduction in rents may be made: if all "marketable" commodities are included under "staple," zamindars will have no valid reason to complain if one-fifth or one-fourth of the gross value of crops be declared the rackrent limit. A serious matter such as this is should not be left to the caprice of others. In speeches in Council, in reports of Revenue officers, our landlords are accused of rackrenting their estates and arbitrarily enhancing the rents of their raiyats; the province, in fact, is declared to be already rackrented. I have gone carefully through the speeches in Council, and, when I have had the time, perused the correspondence published with the Bill; but, as well as I am able to remember, little or no attempt has been made to show what is at present a rackrent under the law. In one able speech—and the only one—a rackrent is described as a rent trenching on the actual labour-wage of the cultivator. In another a comparison is made between the value of the crop per head in each province to show that others are better off than we are; but no mention is made of the area of land per head or pressure of population. I think it might be found on enquiry that the value of the produce per acre is greater with us, but that there are more to feed on it. Mr. Finucane, whose reports are largely quoted, enters more fully into the subject. He has taken the relative prices of edible crops now and some forty years ago as the basis of his argument; but he has made the mistake of considering staple crops to consist of cereals only. He has omitted to take the area under opium, potatoes, tobacco, cotton-fibres of sorts, dyes of sorts, turmeric, ginger, sugarcane, oilseeds, &c., &c., into consideration; and he has failed to take into consideration the extraordinary increase that has taken place in the cultivation of these crops since the Permanent Settlement.

In 1840, Government distributed 37 lakhs of rupees throughout India for opium; in 1881-82, it distributed nearly six times that sum. To make an exact estimate of the value of the gross produce of the country in 1793 and now I presume to be impossible, and, until it is done, all comparisons between the average value of lands at the time of the Permanent Settlement and now must be deceptive. We planters, without any access to figures, can but form our opinions from what we see going on around us; we can but see that the province has made most extraordinary strides in prosperity of late years, and we believe that it was the intention of the legislature that the zamindar should share in it with the raiyat.

Whether nine-sixteenths, half, one-fourth or one-fifth of the produce is to be the rackrent limit in the future remains for the Government to decide, but any limit that does not take under consideration all crops that may be grown will be faulty.

That some raiyats on each estate may be rackrented is not only possible but very probable;

some estates may be in a like condition; but, until we know what is to form the basis of a rackrent limit, it will be impossible to know with certainty to what extent they are so. Some lands may be rackrented at two rupees an acre, whereas lands in their vicinity may be cheap at ten rupees. It is difficult to believe that a district which is able to pay the greater portion of its landlord's rents from the produce of any one crop grown in it is rackrented, and that it requires the drastic remedies people have recommended for it.

Chumparun, which pays its landlords in round figures some 24 lakhs of rupees, and has a million and a half acres of land under cultivation, receives from 16 to 18 lakhs of rupees per annum for 70,000 acres under poppy. Shahabad and Gya might meet their landlords' rents from the proceeds of their sugarcane crops alone; the value of the sugar carried by the Gya State Railway from the town of Gya was valued at 37 lakhs for one season.

Tirhoot and Darbhanga might pay their rents from the proceeds of their tobacco crops.

That sudden, arbitrary and excessive enhancement of raiyats' rents are a very great hardship to raiyats is certain; with the evidence placed before us, there can be no doubt that such have taken place; in fact, I have no doubt that we could all give many more instances of such enhancements.

Every effort should be made to put a stop to such practices, but I do not think the measures recommended will be effectual. The fault with most of the measures recommended lies in their punishing the innocent with the guilty. The remedy lies in encouraging landlords to give long leases instead of frightening them into giving short ones; encouraging the interchange of registered documents, instead of prohibiting their issue by making them too costly; above all, we should not hedge round the registration of documents with so many restrictions as to make the act of registration a nuisance and a trial to one's temper. In reference to the Tirhut cases cited, I cannot speak from personal knowledge; I would only say that they seem to me to have occurred on estates where the landlords had previously kept the rents very low, in order to secure a permanent settlement on easy terms from Government, and then jumped the rates; but for all that it was none the less hard on the raiyats to do so.

In reference to the Dooho Sooho case cited, I will only remark that the bigha mentioned is equal to 2½ acres, which would bring the average rental to Rs. 3-4 per acre.

Section 119 we will discuss in its proper order. I will content myself with calling attention to the fact that, under its provisions, the rackrent limit for ordinary raiyats and sub-raiyats is five sixteenths, instead of one-fifth, of the produce.

Of Suits to enhance Money-rents where a Table of Rates and Produce is not in force.

Section 74 (1) says—"The landlord of a holding held at a money-rent by an occupancy-raiyat, and situate in a local area for which a table of rates and produce prepared under the foregoing sections is not in force, may, subject to the provisions of section 78, institute a suit to enhance the rent on one or more of the following grounds, namely:—(1) that the rate of rent paid by the raiyat is below the prevailing rate payable by the same class of raiyats for land of a similar description and with similar advantages in the vicinity."

Section 156 (a) divides "tenants" into classes, and says the class to which he belongs is a tenure-holder, occupancy-raiyat, tenant of a bastu holding, ordinary raiyat or under-raiyat." Section 207 (b) divides "tenants" into the same classes as the above. Section 74 (1) gives the landlord power to enhance the rent of a "raiyat," provided it is below the prevailing rate payable by his "class," but does not denote what is to constitute a class among raiyats. It is very necessary to declare what is intended to denote a class among raiyats, and, when defining a class, to see that planters do not form a class in themselves. On my part, I object to raiyats paying according to their "classes;" they should pay according to the value of their lands.

D.—Rules applicable to suits to enhance money-rents generally.

Section 76 allows no enhancement beyond double the rent previously payable. Section 59 (2) allows only six annas in the rupee enhancement. Section 77 gives the Court power to order progressive enhancement.

Section 77 should hold good, but section 76 should, I think, be struck out. Cases may occur where the landlord's interests would suffer under a hard-and-fast rule as this is; and, so long as the Court has the power to declare progressive enhancement, the raiyat will be protected.

F.—Special rules regarding money-rents payable for pasture lands.

Section 80. (1) "Sections 62 to 79, both inclusive, shall not apply to land fit to be used, or which in accordance with local usage is used, only as pasture; but, when such land is held at a money-rent by an occupancy-raiyat, the landlord may, subject to any contract between the parties, institute a suit to enhance the rent on the ground—

"(a) that the rent payable by the raiyat is below the prevailing rate payable by the same class of raiyats for land of a similar description and with similar advantages in the vicinity; or

I would be very glad to receive any information our friends are able to afford me in reference to the terms on which raiyats and others are allowed to graze their cattle in their respective districts.

The question of cultivator *versus* grazier is a very important one, and becoming more urgent every day; but, whether the question has as yet been sufficiently ventilated to permit of its being authoritatively settled, or whether it is possible to settle it under the provisions of this Rent Bill, I am not sure.

The raiyats of this district, as a rule, pay nothing to the landlord for being allowed to graze their cattle, which they keep for "agricultural" purposes, on the purtee lands, excepting their skins when dead; they usually feed their cattle from the proceeds of their own fields grazing them on any lands lying fallow, or on stubble,

"(b) that, having regard to the increase of rent on arable land in the vicinity since the rent payable by the raiyat was fixed, it is reasonable to enhance that rent.

"(2) Where an enhancement is applied for on the ground mentioned in clause (b), the Court shall fix the rent at such rate as it thinks fair and equitable."

some few, but very few, and they well-to-do raiyats, lease an acre or two of grass lands from their landlords, which they set aside for their cattle.

The professional grazier, on the contrary, leases no land for his herds, nor is any land specially set aside for his use; he as often looks after herds belonging to other people as he looks after his own.

The land leased to the "raiyat" as grazing ground is usually leased to him at a very low rate, but I have never heard of a raiyat claiming an occupancy-right in that land.

In the civilized portion of the district, the grazier pays a certain amount per head of cattle; on the *dearahs* the same. In the jungles they pay a certain charge per buffalo, and a certain charge is made per "bhuthan," or cattle-shed, for the rest of the cattle in their charge. Many persons, I know, are anxious to see a certain quantity of land set aside in each village as pasture, some even going so far as to think the zamindars should be compelled by law to see that land is set aside for the use of their raiyats' cattle; but I would ask such to tell us how they propose limiting the number of cattle that shall be allowed to graze on it, how they propose preventing the graziers bringing the cattle belonging to outsiders to graze on it, or how they propose preventing a few sturdy *gwalas* from appropriating it to their own use, and dispossessing the people for whom it should be set aside. Many landlords would, I believe, be glad to set aside a portion of their lands for the use of the cattle belonging to *bonâ fide* raiyats and used for agricultural purposes; but the grazier stands in their way.

Numbers of Chumparun herdsmen make a living by pasturing Sarun and Gorakhpur* cattle on Chumparun lands.

The Bill, I presume, intends raiyats paying for pasture lands to have a right of occupancy in those lands. I cannot see any hardship in giving rights of occupancy in such lands, but the raiyats ought in all instances to be obliged to pay the same rents for such pasture lands as they do for the rest of their holdings.

If the landlord allows them to hold them at privileged rates, they should not have a right to claim occupancy-rights in them; care should be taken that the rights of the landlord in *purtee* lands are not alienated by the Bill, by turning all *purtee* into "common."

If a raiyat is to be permitted to have occupancy-rights in pasture lands, and to hold them at privileged rates, some provision should be made in the Bill for cases in which the raiyat turns pasture into arable land. Should he forfeit his title to the land, or should the landlord have the right to claim extra rent from him?

G.—Of rents payable in kind, or varying with the crop.

Section 81 and its sub-sections forbid the landlords taking more than one-half the produce as their share of the crop.

Some landlords divide the crop on the threshing-floor. Very many others in North Bihár send out amíns, and have the crops assessed on the fields. The latter proceeding is very lenient to the raiyats, as the raiyats usually manage to get their crops assessed at one-half their value.

On all crops assessed a small percentage is added for the patwárí and gumástáh. If this percentage is declared illegal by the Courts, the consequence will be that all landlords will elect to divide and not assess.

Section 82 allows "commutation of rents."

Sub-section (2) says: "The money-rent shall be fixed at the discretion of the Court—

"(a) according to the prevailing money-rent payable by the same class of raiyats for land of a similar description and with similar advantages in the vicinity;

"(b) according to the average value of the rent actually received by the landlord during the preceding five years."

"(3) When a money-rent is fixed under clause (b), a reasonable deduction shall be made by the Court from the average value aforesaid, in consideration of the whole risk of cultivation being taken by the raiyat."

Under this clause all the raiyat has to do is to take little or nothing out of his lands for the next five years to get them for nothing. Not satisfied with running counter to the custom of the province, a deduction is to be made in favour of the raiyat for running a risk the landlord is happy enough to take upon himself.

If this section is to hold good in favour of the raiyat, why should the landlord not be allowed an equal right to have the rent commuted into a money-rent; why should he not be allowed to bring some pressure to bear on the raiyat to cultivate properly?

This section is one-sided.

H.—Supplementary provisions.

Section 84 allows "the Board of Revenue to lay down rules—

" (*a*) for the guidance of officers engaged in the preparation of the tables of rates and produce under this chapter;

" (*b*) for the guidance of officers engaged in the preparation of price-lists under section 83;

" (*c*) for determining what crops shall be deemed to be staple crops for the purposes of this chapter in any local area;

" (*d*) for the guidance of any Revenue officers registering contracts under sections 59 and 61;

" (*e*) for the guidance of Revenue officers and Courts in estimating the average annual value of the gross produce of land for the purposes of sections 59 and 61 and 75, clause (*d*)."

These supplementary provisions place the fate of every man who has anything to do with land in the hands of the members of the Board of Revenue, without appeal. With a stroke of the pen the Board may reduce the rent of a district, by omitting some of the most valuable produce of a district from the list of its staple crops.

If " staple " crops are to regulate the rents of a district, we require some more exact definition of the term.

In the vernacular translation of the Bill, it is translated by the word " *khás*."

The powers allowed to the Board under sections 59 and 61 I objected to in a former memorandum.

The power of the altering the registration-rules as the whim takes them I object to most strongly. The inconvenience we are now put to, by having the rules altered every few weeks, is immense. We should have something definite to work upon.

I am strongly of opinion that the recommendation of the Bihár Rent Committee should be adopted; and the simpler the procedure the better for us all.

CHAPTER VII.

Of the Rights of a settled Raiyat in Bastu Lands.

Section 85. (1) " A person who is under Chapter V a settle raiyat of a village or estate as defined in that chapter, shall, notwithstanding any contract to the contrary, have a right, permanent, heritable and capable of being transferred and bequeathed, in any *bastu* or other homestead land in that village or estate which is not comprised in an occupancy-holding, and which is held by him as the site of, or for purpose of, erecting a dwelling-house suitable for himself and his family, together with all necessary out-offices.

(2) " A person having a right under sub-section (1) in any land in a village or estate shall not lose that right merely by reason of his ceasing to be a settled raiyat of that village or estate."

Section 87.—" When a person has, in respect of any land, a right under section 85, and the rent of the land has not been enhanced during the previous ten years, the landlord may, unless barred by any contract between the parties, enhance the rent, so that it may be equal to the rent paid by other tenants for land in the neighbourhood, having similar advantages and used for similar purposes, or, at his option, so that it may be equal to five per cent. of the market-value of the land."

A cultivating raiyat pays us rent for his *bastu* land and cannot transfer it. He is left in possession of it as long as he resides on it, when he leaves it, it lapses to the landlord.

The house he builds on it may be sold up under a decree of Court, but the purchaser is bound to take away the materials with which it is built; the purchaser can only reside in it, or allow it to remain standing, with the consent of the landlord. The cultivating raiyat who has been sold up under a civil Court decree may build another house on the same spot.

The *bastu* lands of cultivating raiyats do not go with their "jotes," and should, therefore, be non-transferable, non-purchasable, without power being allowed the landlords to evict them from them. If the raiyats abandon their land, it should lapse to the landlord; the raiyats should not be charged rent for it, but they should not be allowed to use it for any other purpose than the one for which it is set aside, namely, to reside upon. If the raiyat builds a house and resides on land for which he pays rent, his *bastu* land would then go with his holding. Traders pay for the land they reside on.

In towns where the majority of the residents belong to the non-agricultural class, rent is demanded for the land, and the land is to a certain extent transferable.

The purchase-money is usually divided between the tenant and the landlord, the tenant receiving three-fourths, the landlord one *zur chowt*. The Bill deprives the raiyats of a very substantial right.

CHAPTER VIII.

Of Ordinary Raiyats.

Section 89.—" An ordinary raiyat shall, subject to the provisions of section 119, pay such rent as may from time to time be fixed by agreement between him and his landlord."

Section 119 limits the landlord's demand to five-sixteenths of the value of the gross produce in staple crops of all lands leased to raiyats after the 1st March 1883.

I do not object to the rackrent limit here given, but I cannot understand on what principle one-fifth of the

gross produce is to form the rackrent limit of an occupancy-holding and five-sixteenths for that of an ordinary raiyat, or what is to be considered the rackrent when the ordinary raiyat acquires occupancy-rights.

I think, when the landlord in the first instance leases land to a raiyat, he and the raiyat should be allowed to make their own bargain. If the landlord afterwards wishes to enhance the raiyat's rents, he should be bound to keep within the rackrent limit whatever it may be.

Section 91.—Notice, of enhancement must be served through the Court—such notice to be served six months before the commencement of the year for which enhancement is to be demanded.

The six months' notice required under section 91 is too long a period; three months are sufficient.

93. (2) "If the defendant does not appear, or if, on appearing, he does not agree to pay the enhanced rent demanded, the Court may pass a decree for his ejectment on condition that, within 15 days from the date of decree, the landlord deposits in court—

"(*a*) such a sum as may be declared by the decree to be payable to the raiyat as compensation for improvements; and

"(*b*) a further sum as compensation for disturbance equal to ten times the yearly increase of rent demanded."

Compensation for improvements and compensation for disturbance I do not approve of.

If the raiyat does not appear to answer for himself in court, I do not quite see how the Court can be in a position to assess the cost of his improvements. If the ordinary raiyat, who holds under a terminable lease, is allowed compensation for improvements and also for disturbance, compensation cannot justly be withheld from sub-raiyats who are ousted from their holdings at the end of their leases.

It would be preferable to reduce the number of years a raiyat must continuously hold land to be constituted an occupancy-raiyat.

I am not sure that it would not be preferable to allow the ordinary raiyat to purchase occupancy-rights of his zamindar, by paying down, say, a couple of years' rental as a bonus.

Why a landlord should be compelled to pay a raiyat compensation for demanding a rent that the Court considers fairly demandable, I do not understand.

Section 95.—"Fresh proceedings not to be taken for ten years."

If this section holds good, the raiyat agreeing to pay the enhanced rent would acquire occupancy-rights at once.

CHAPTER IX.

A.—Of alterations of rent consequent on alterations of the area of the holding of a tenure-holder or occupancy-raiyat.

96. (1) "Notwithstanding anything in Chapter III or VI, every tenure-holder shall, in the absence of a contract to the contrary, and every occupancy-tenant shall, notwithstanding any contract to the contrary,—

"(*a*) be liable to pay additional rent for all land added to the area of his holding by alluvion or otherwise, unless he can show that the land has re-formed on the site of land which was formerly included in that area, and for the loss of which he has had no abatement of rent; and

"(*b*) be entitled to a reduction of rent in respect of any diminution," &c.

(2) "The amount added to the rent shall be calculated at the rates payable by occupancy-raiyats for lands of a similar description and with similar advantages in the vicinity, less a deduction in the case of a tenure-holder of thirty per cent. for profits, risk and cost of collection."

By implication this section as it stands allows tenure-holders, raiyats entitled to hold at fixed rates and occupancy-raiyats to claim all alluvion as theirs by right, whether they have suffered by diluvion or not, unless they have previously forfeited their right by receiving abatement in rents for diluvion. Under sub-section (2) of this section, the occupancy-raiyat would pay rent for these lands at the same rate as other occupancy-raiyats pay for lands of a similar description and with similar advantages in the vicinity.

The tenure-holder and the raiyat who holds at fixed rates (who is also a tenure-holder under the Bill) would be entitled to claim a deduction of 30 per cent. on the above rates for risk and cost of collection.

Under clause (*b*) they would be allowed a deduction in rent for all land lost by diluvion.

Under sub-section (3), "the amount abated from the rents shall bear the same proportion to the rent previously payable as the diminution of the total yearly value of the holding bears to the previous total yearly value thereof, or, in default of proof of the yearly value of land lost, shall bear to the rent previously payable the same proportion as the diminution of the area lost to the previous area of the holding."

Regulation VIII of 1793, clause 51, implied that zamindars might claim extra rents from tenure-holders for all alluvion. Section 17 of Act X of 1859 and section 18 of Act VIII of 1869 permitted the landlord to demand enhanced rents from his raiyats, provided "the quan-

tity of land held by the raiyat has been proved by measurement to be greater than the quantity for which rent has been previously paid by him."

Raiyats who lose lands by diluvion should be allowed to claim abatement in rents: where any special rate is payable for the land lost, at that rate; or where a table of rates is in force, at the rates entered in the table of rates; if no special rate is payable for the land lost, at the average of their holding. If they elect to continue paying rent for the land lost by diluvion, they should be entitled to claim the land again when it re-forms by accretion.

But more than this should not be allowed. To allow them to claim all accretions by alluvion is to introduce a very dangerous principle, a fruitful source of litigation. In Bengal and some parts of South Bihár, the land when thrown up may be brought under cultivation at once and be very valuable: in North Bihár it may lie useless for years, and in some instances the right to hold some hundreds of acres may be at stake.

If the raiyat is to claim a right to all alluvion, how long is the landlord to await his pleasure before charging him rent for it?

There is nothing to prevent a raiyat claiming all alluvion, only to dispose of it to the highest bidder.

Raiyats holding at fixed rates run no extra risk in collecting their rents; there is, therefore, no reason for allowing them a deduction of 30 per cent.

The law as it at present stands is sufficient protection to the landlords as against encroachment on the part of "raiyats;" it is unwise to afford raiyats further facilities for encroaching on the landlord's rights.

In reference to tenure-holders, other than tenures under section 14, it is necessary to define their rights in alluvion.

C.—Of receipts and accounts to be given to tenants.

Sections 100, 101 and 102.—Section 100 entitles a raiyat to demand a receipt from his landlord, declares what it shall specify, declares the landlord must keep the counterpart of it, declares that any receipt which does not state the particulars required by law shall be an acquittance in full.

Section 101 entitles a raiyat to receive a copy of his yearly account from his landlord.

Section 102 and sub-section imposes a penalty on the landlord for not delivering receipts and accounts to his raiyats.

Section 100 should have the words "from his duly authorized agent" added.

The landlord will be compelled under the Bill to keep a counterpart of the receipt he gives to the raiyat. One might have some object in view in insisting on the landlord keeping a "counterfoil" of the receipt he gives the raiyat, but none in keeping a counterpart of it only: as evidence it would be valueless.

In the interest of both landlord and raiyat, any one, not duly authorized, found collecting rents from raiyats should be liable to prosecution either on the initiative of the landlord or of the raiyat. Power should be given to the landlord to tender the receipts and accounts to his raiyats through the Courts, and not leave him at the mercy of the raiyat.

If this is not allowed, the raiyat may at any time, whether he has received a receipt or not, put his landlord to great inconvenience by bringing a suit against him. Six months allowed a raiyat is too long a period to allow him; he should be obliged to claim a receipt within a month from the time he paid the money.

D.—Of the deposit of rent by a tenant in a public office.

Sections 103 to 107.—The difference between the procedure laid down in sections 46 and 47 of Act VIII of 1869, and the procedure laid down in sections 103 to 107 of this Bill, lies principally in the power given to the Court to decide to whom the rent deposited is actually due.

I think the Collector should have the power to call upon the raiyat wishing to deposit rent under 103 (*c*) to show from whom he received the land, or under what lease or right he was entitled to pay rent for the land or be in possession of it; otherwise it will be in the power of every raiyat in the country to set neighbouring zamindars quarrelling under section 106.

E.—Arrears of rent taken by division of crops.

Sections 108 to 118.—I would only remark that some limit should be put to the expense landlords and raiyats are to incur when applying to the Courts for assistance as provided under the provisions of these sections.

G.—Further provisions regarding rent.

Section 119 says a raiyat or under-raiyat shall not be bound to pay more than five-sixteenths of the value of the gross produce of his holding in staple crops, notwithstanding any contract made after the second day of March 1883. I do not think it necessary to make this rule applicable to under-raiyats.

Section 120.—"The rent payable by a tenant in any agricultural year shall be presumed to be the rent payable by him in the following agricultural year, until the contrary is shown."

The raiyat should not have the right accorded to him to hold his lands at the same money-rents, ignoring the conditions on which he held the land.

CHAPTER X.

A.—Of improvements on raiyats' holdings and compensation therefor.

I look upon this chapter as quite unnecessary.

A raiyat with a permanent interest in his holding, and a raiyat with occupancy-rights in, his holding, can only be ejected from their lands in execution of a decree of a competent Court

passed in accordance with this Act, on the ground that they have used the land in a manner which renders it unfit for the purposes of the tenancy, or that they have broken a condition consistent with the provisions of this Act, and on breach of which they are, under the terms of a written contract between them and their landlord, liable to be ejected (*vide* sections 25 and 50 (*a*)).

The Bill has taken every precaution to secure to the raiyats the proceeds of their labour, by debarring landlords from claiming enhanced rents owing to improvements made at the expense of the raiyats.

A raiyat with occupancy-rights can only be ejected on the above two grounds; if he is ejected by the Court because he renders his holding unfit for the purposes of his tenancy, I cannot imagine under what circumstances he would be entitled to compensation for improvements.

If he is liable to be ejected for breach of contract, as described above, he knows the risk he runs; let him fulfil the conditions of his lease. The law is, I believe, very lenient, and will allow him every opportunity to fulfil such conditions before it enforces the penalty.

The new Agricultural Holdings Bill does not go so far as it is proposed to proceed in this Bill; it makes no mention of compensation to tenants who can claim fixity of tenure, and who make themselves liable to ejectment; it allows the landlord to claim a set-off for waste; and it compels the tenant to return to the fields, in the shape of manure, all straw, &c., the produce of the farm. All that it is necessary to declare is, what may be considered an improvement under the Act, that the landlord and raiyat may know where the boundary lies between improvement and rendering the holding unfit for the purposes of his tenure.

Section 126, clause (3), is, I think, totally wrong in principle. It declares: "A work which benefits several holdings shall, for the purposes of this chapter, be deemed to be, with respect to each of them, an improvement." It is wrong, insomuch that it allows one raiyat to be the judge of other people's requirements. If a raiyat's occupancy-rights are sold up under a decree of Court, it is to be presumed the value of his improvements are taken into consideration by the would-be purchasers.

"If" compensation for disturbance is to be allowed, the tenants of holdings under a certain area should be barred from claiming it. If a precedent is required for this, it is to be found in section 23 of the English Agricultural Holdings Bill. "If" compensation is to be allowed, it should be for improvements made after the passing of the Bill.

"If" compensation is to be allowed to any class of raiyats, it should be allowed to ordinary raiyats, in preference to raiyats with assured tenures: but if it is allowed to ordinary raiyats, it cannot be well withheld from under-raiyats, and an allowance should be made for measures, &c., in preference to compensation for the unseemly holes made all over the country dignified by the name of tanks.

I believe compensation for improvements unsuited to the genius of the people, will be misunderstood by them, and may in time become the means of persecution.

B.—Of the landlord's right to measure land.

Act VIII of 1869, sections 25, 37 and 38, respectively declared the landlord's right to measure his estate; in case of opposition, allowed a competent Court to permit the measurement; and, under certain circumstances, allowed the Courts to order the measurement to be made by their own officers. Act VIII of 1869 was faulty, insomuch that neither landlord nor tenant could apply to the Courts for the appointment of an amín to measure the lands, unless they could first show that a dispute had occurred. The provisions of the new Bill (in many ways an improvement on the former procedure) nowhere distinctly say that the Court may "order" the land to be measured by its own officers. Section 137 (1) only implies that it may be done. Section 135 (1) merely says that the landlord may apply to the Court to direct the tenant to permit the measurement.

Both Act VIII and the new Bill compel the landlord to declare that he has been obstructed in the measurement of the lands, before they will afford him any assistance in the matter.

It would be a great convenience to all parties concerned to allow the landlord to apply to a Revenue officer to have his estate measured, without being first obstructed by his tenants. A landlord cannot always procure a trained amín, and some of the bitterest quarrels between landlords and raiyats are caused by the ignorant men sent out by the landlords to survey their estates.

Under section 133 the landlord is prohibited from measuring his estate oftener than once in ten years: this may in many instances be a great hardship to him, especially in estates bordering on large rivers.

The landlord might be prohibited from having a cadastral survey of his estates carried out under the supervision of a Government officer oftener than once in ten years; but he should be allowed to measure his lands as often as he pleases, or he should be allowed, for any reason which is satisfactory to the Court, to measure individual raiyats' fields; otherwise how is he to check encroachments? I am not sure that this section does not run counter to section 207 (*a*).

Regarding the length of the pole. When the registration of all estates was made under Act VII of 1876, the lengths of the poles used on such estates were recorded. If such record is not sufficient, it might be as well to have the length of the pole used on each estate authoritatively settled once for all.

C.—Of surrender and abandonment.

The right to relinquish his holding at the end of the agricultural year is not among the incidents attached to an occupancy holding under section 50. Every raiyat has a right to

relinquish his holding under section 20 of Act VIII of 1869, always provided he gives his landlord ample notice of his intention to do so. Every raiyat should be allowed to relinquish his holding, provided he relinquishes it as a whole, gives his landlord ample notice of his intention to do so, and provided he does not hold it under a contract.

Care must also be taken to secure the right of pre-emption to people who may have advanced money to the raiyat on the security of his holding.

Abandoned lands the landlord is permitted to re-let as soon as they are abandoned. A raiyat who changes his residence, or goes off like a thief in the dark to avoid his creditors, without giving his landlord notice of his intention to retain his holding, should forfeit it after an absence of three months.

In some parts of Bihár a landlord would find it absolutely impossible to induce people to take up land that had been allowed to run to waste for a twelvemonth.

D.—Of Merger.

This chapter I think a very important and a very necessary one.

I think our interests are amply secured, and see nothing to alter in it.

E.—Of the appointment of a manager on behalf of a co-owner of an estate or tenure.

The provisions of this chapter are very necessary to protect the weak against the strong, but they hardly go far enough.

The Court should not only have the power to manage the estates, but should also have power given it to make a summary and, if I may use the word, a tentative division among shareholders, with power reserved to shareholders to apply within a certain time for a formal "batwara."

The appointment of a manager should not debar shareholders in a managed estate from applying for a "batwara." The proprietors should have power given to them to challenge accounts rendered.

CHAPTER XI.

Of the Settlement of Rents by a Revenue Officer.

Sections 151 to 163 allow the Revenue authorities to settle the jammabandi of an estate or a class of tenants in cases where—

(*a*) a large proportion of the tenants or landlords wish it, and deposit costs;

(*b*) where such an order is calculated to avert a serious dispute;

(*c*) where the settlement of revenue is being made.

Section 163 allows the Local Government to decide on whom the cost of settlement shall fall.

I think it very necessary that the Revenue authorities should have the power here granted them to prevent agrarian disputes, but think the powers should be very sparingly used, and only in cases where the disputes occur between landlords and large bodies of raiyats. Power should be given to the Revenue authorities to measure the estate also. Section 159 says the jammabandi settled is to come into force from the commencement of the agricultural year next following the publication; it says nothing as to the rates raiyats are to pay during the time the estate is under settlement.

The settlement should take effect from the commencement of the dispute, and, when settled, have the force of a decree. Section 151 (2) (*a*) should be an Exception to 163.

CHAPTER XII.

Of the preparation of a Record-of-rights by a Revenue Officer.

The only alteration I would wish to see made in the provisions of this chapter is to require any special conditions under which the raiyat holds his lands entered among the particulars to be specified. If sections 14 and 15 hold good, this chapter should be struck out.

CHAPTER XIII.

Of the Recovery of Rent from Raiyats and Under-raiyats by distraining the Produce of the Holding.

The Statement of Objects and Reasons published with the Bill says:—"This chapter may be said to be the result of a compromise. The Rent Commission, concurring with the Bihár Rent Committee, proposed to abolish the existing law of distraint as an offset of English law, of which the efficacy was impaired by the legislation of 1859, and which had been abused in Bihár, and not always applied in a regular manner in other parts of the country. To this strong objections were urged, and the procedure provided by this chapter was then devised by the Government of Bengal, as being likely to secure to the landlords most of the advantages offered by the existing law, without exposing their tenants to the evils complained of." I am as strongly of opinion as I was at the meeting of the Bankipore Committee, that the power to distrain growing crops should be abolished. I am of opinion that, as long as the power to distrain in any shape remains law, so long will the raiyats submit to its abuses.

If they are once given to understand that it has been finally abolished, the abuses will die a natural death. The raiyats now submit to private distraint, or, more correctly speaking, restraint of their crops, because they believe in its legality.

In the Statement of Objects and Reasons it is stated that the provisions of the Bill are the result of a compromise; but, like most compromises, it will satisfy neither party; it will not satisfy us, who wish to abolish it, as it does not do away with the abuses we complain of; it

will not satisfy the zamindars, as they wish to distrain without suit, claiming such power as inherent in their position. The power here allowed they look upon only as attachment before judgment.

The Honourable Baboo Harbans Sahai, in his letter to the President of the Rent Committee, says:—"It has been declared, from the earliest legislation to the present time, that the produce of the land is hypothecated for the rent, and the zamindar has a legal right to realize his rent by distraining the crop." It is because all zamindars implicitly believe in the correctness of this hypothesis that they abuse their powers. Section 68 of Act VIII of 1869 says the produce of the land is held to be hypothecated for the rent payable in respect thereof. Had it stated that the land itself and all thereon was held hypothecated to any "arrears" of rent, it would have been more correct. Possession of the land may be hypothecated to the tents thereof, but standing crops cannot be hypothecated, as zamindars consider them to be, for the simple reason that no Government in the world dare declare that a raiyat must pay his rents before he has been afforded an opportunity of disposing of his crop; as the raiyat is in duty bound to pay his rents from the proceeds of his crops, so he should be allowed to dispose of them before being called upon to pay.

That standing crops should be liable to attachment is right, but only to the same extent as a lodger's goods at home are liable to attachment for his landlord's debts.

If it is declared that the crop is hypothecated to the rents, although it may not be done legally, morally the landlord will be justified in restraining the corps until his rents are paid.

To justify the present procedure, one must be prepared to declare that the future crop is hypothecated to arrears. If it is hypothecated to arrears of rent due, we are not justified in limiting the lien to one year's rent, but to all that may be due.

Under section 68 of Act VIII of 1869, the distraint of standing crops is allowable; but section 71 forbade distraint of stored grain. I cannot conceive any more effectual instrument of persecution than to allow distraint of grain stored in a storehouse, more especially as the power to distrain is to be given to raiyats who have sublet their lands.

CHAPTER XIV.

B.—Rules applicable to particular classes of suits between landlord and tenant.

Section 194 allows the service of a summons on a defendant in any suit for the recovery of rents, &c., which may be served through the post office.

This would, I think, hardly be sufficient in all cases.

Section 201 makes no allowance for the delays of the Courts. If a decree could be obtained quickly, there would not be much harm in this section; but considering a case drags on for months, this will come rather hard on some.

Sub-section (2) is not required.

C.—Suits to determine status, &c., of tenant.

I would like to see the provisions of section 207 and sub-sections somewhat extended.

At present a raiyat has only to deny the relationship of landlord and tenant to compel the proprietor of the estate to enter into a costly suit. He has only to declare that he received the lands from a neighbour to force two neighbouring proprietors to enter into a suit.

If the law would allow the landlord to sue for the determination of the status of any person in possession of his land, leave alone a "tenant," or to be allowed to have the boundaries of his estate defined, it would be an advantage and save much litigation.

CHAPTER XV.

OF THE SALE OF TRANSFERABLE HOLDINGS IN EXECUTION OF DECREES FOR ARREARS DUE ON THEM.

Section 208 (1) says—"'Incumbrance' in this chapter, used with reference to a tenancy, means any lien, sub-tenancy, easement, or other right or interest created upon the holding by the tenant in limitation of his own interest therein except—

"(*a*) a tenure existing from the time of the Permanent Settlement;

"(*b*) a tenure recognized by the settlement-proceedings of any current temporary settlement as a tenure at a rent fixed for the period of that settlement;

"(*c*) a tenure of land whereon dwelling-houses, manufactories or other permanent buildings have been erected, or permanent gardens, tanks, canals, places of worship or burning or burying-grounds have been made;

Had the word "tenure" been used instead of "tenancy," I could have understood the purport of this section.

I should then have understood that it was necessary to prevent tenancies created or acquired within a tenure from being considered encumbrances on that tenure; but why should it be necessary to declare that an occupancy-right, which in itself is a tenancy, shall not be an encumbrance on a tenancy?

" (*d*) a right of occupancy;

" (*e*) a right conferred on an occupancy-raiyat to hold at a rent which was a fair and reasonable rent at the time the right was conferred; and

" (*f*) any right or interest which the landlord has expressly, and in writing, given the tenant permission to create."

Section 209 (1) says—" When a decree has been passed for an arrear of rent due for a transferable holding, and the decree-holder applies under section 235 of the Code of Civil Procedure for the attachment and sale of the holding in execution of the decree, his application shall contain, in addition to the particulars specified in that section and section 237 of the said Code, a statement of the annual rent of the holding."

This is hardly sufficient. The sale taking place at the instance of the landlord, should state for what " term " the current rate is to hold good.

A purchaser might find that he had paid a high price for a holding at a low rental, only to be a defendant in a suit for enhancement afterwards.

When the sale takes place at the instance of the proprietor, it should be for a term certain, if at the instance of an ijaradar, for the term of his, the ijaradar's, lease unless the raiyat whose holding is sold has acquired a right to hold for a longer period, when it should be for the full period of his tenancy.

Section 210 (1) says—" When an order has been passed for the sale of a holding upon an application made under section 209, the proclamation made under section 287 of the Code of Civil Procedure shall, in addition to stating and specifying the particulars mentioned in that section, announce—

" (*a*) in the case of a tenure, that the tenure will be sold subject to the registered encumbrances, and will be sold subject to those encumbrances if the sum bid is sufficient to liquidate the amount of the decree and costs, and that otherwise it will, if the decree-holder so desires, be sold on a subsequent day, of which due notice will be given, with power to annul all incumbrances; and

" (*b*) in the case of an occupancy-holding or bastu-holding, that the holding will be sold with power to annul all incumbrances."

In reference to tenures under this section I have nothing to object to, but, as regards the sale of occupancy-rights, I think it should be compulsory on the landlord to enforce his decree by selling up the whole of the holdings, and not only a portion of it, as I believe the law now permits.

Occupancy-rights should be sold subject to their encumbrances in the same way as tenures are to be. Section 215 certainly allows the Local Government to declare that occupancy-rights in any given local area shall be sold subject to registered encumbrances; but it is not sufficient. It will paralyze all trade, by making all trade too venturesome to be entered into excepting at exorbitant rates of interest. If occupancy-rights are not to be sold subject to registered encumbrances, it is absolutely necessary that notice of sale should be issued on all mortgagees, to permit of their purchasing under section 218, or to protect their interests as they deem right, and not to sell up the holding unknown to them.

Section 216.—" Rule for disposal of sale-proceeds."

In disposing of the proceeds of the sale of a holding free from encumbrances, no mention is made of the poor mortgagees; the proceeds are to be divided between the decree-holder and judgment-debtor, only allowing the mortgagees two months to sue and recover from balance of proceeds in hand.

Section 217 allows the judgment-debtor to pay up the amount of decree with costs, any time before the sale takes place. More than half the property sold in this country under decrees of Court is sold at one-quarter of its value, owing to the uncertainty which would-be purchasers are in as to whether the sale will really take place or not.

The Court might give the raiyat as much time as it thinks necessary to pay up : the sale should be advertised for a date subsequent to the date allowed for payment; but when the date allowed is passed, the sale should be compulsory.

Section 218 (*1*).—"Amount paid into court to prevent sale to be in certain cases a mortgage-debt on the holding."

By " holding " I presume an occupancy-holding is meant.

Under this section, a person paying the amount due into court would hold the first mortgage on the land; but who would have a right to redeem it? Would the raiyat be allowed to do so, or only other and prior mortgagees under a suit?

What time would other mortgagees be allowed within which to sue?

As the clause stands, I am inclined to think they may choose their own time to do so, or under section 148, schedule II of the Limitation Act, 60 years. Would voidable encumbrances take precedence of registered ones under this section?

Then, again, the question arises, would the landlord again have the power to exercise his right of pre-emption under section 53?

CHAPTER XVI.

OF LIMITATION.

The present Bill is in so much different from Act VIII of 1869, that the time from which the period of limitation is to run is mostly mentioned in the clauses likely to be affected, whereas Act VIII of 1869 refers to them under clauses 27, 28, 29 and 30.

I presume grounds of action not specially provided for under the Bill would be governed by the law of limitation, Act XV of 1877, such as a suit against an agent, &c., which was provided for under Act VIII by section 30.

CHAPTER XVII.

A supplementary chapter to regulate the acts of the Executive does not concern us to any extent.

Schedules II and III permit summary sale of patní tenures.

When criticising the provisions of Chapter IV, I said I was of opinion that the procedure laid down in reference to patní tenures should be extended to all permanent tenures other than raiyatí tenures referred to in sections 14 and 15.

If it is necessary to permit zemíndárs to recover the rents due to them on patní tenures by a summary process, it is equally necessary to allow them to recover rents due to them on all permanent tenures under the same procedure. There is no valid reason for allowing them to recover rents on all tenures created by themselves after the Permanent Settlement, and withholding permission from them to collect the rents due to them on tenures created at the time of and before the Permanent Settlement, and on which they receive a fixed sum as malikána in perpetuity. There is nothing in the wording of this chapter, or in the definition given of a "patní tenure," to permit of this. All over Bihár we have such tenures; tenures created before or at the time of the Permanent Settlement, known as "Bhek-Birt," "Shikami tenures," "Juglis," "Ultumgha," &c., &c., the revenue for which is paid by the zemíndár to Government, and the rents of which the zemíndár has the greatest difficulty in collecting from the tenure-holders. If such tenures are to be brought under the provisions of these schedules, some of their sections will require to be modified.

Section 11 would be very rough on men who have advanced large sums on the security of such property, and who may not be rich enough to buy it in.

No facilities are afforded the landlord under the Bill of collecting Government taxes, such as road-cess, &c., from tenure-holders.

As the landlord is the tax-collector, and has to collect the taxes from tenure-holders and lákhirájdárs, some facilities should be afforded him to do so.

MEMORANDUM.

Regarding all the legislature wishes to enact under the Bill, I have said all I wished to say; but I think it will not be out of place to mention here that, however just and estimable the provisions of the Bill may be, its effects will be perfectly nugatory as long as the cost of obeying its behests is prohibitory.

To say that we "must" and "shall" do such and such work is not sufficient; it must be made "possible" for us to do it.

Under the proposed Bill, it is laid down that landlords shall keep, and also deliver, most eleborate accounts; but, unless the question of patwárís' accounts is thoroughly gone into and Regulation XII of 1817 is revised, it will be impossible for them to do so.

It is intended under the Bill that the registration of documents should be more generally resorted to; but, unless the act of registration is made less irksome and the fees less onerous, neither landlord nor raiyat can afford the time or the money to obey the law. It is intended that landlords who wish to recover what is due to them should desist from resorting to illegal means of recovering their rents, should desist from bringing illegal pressure to bear on their raiyats, and that they should in all instances where the raiyats fail to pay their rents resort to law to recover them; but nothing is done to encourage them to do so. The cost of recovering rents through the Courts is ruinous.

Whether it is intended to revise the Court-fees Act hereafter I do not know; but, unless something is done, either by following the suggestions of the Bihár Committee, or by resorting to other and more certain measures, landlords are bound to evade the law by every means in their power.

The smaller the amount of rent due, the greater the comparative cost of a suit. The cost of a suit is becoming greater every day instead of less. It has lately been discovered that, to enforce a decree against a raiyat, two rupees *tulbana* must be paid on each separate field; that is to say, if the landlord has a decree for ten rupees, and the raiyat's holding is divided into ten fields, he must pay twenty rupees *tulbana* to enforce it.

T. M. GIBBON.

Memorial of the Landholders of East Bengal to His Excellency the Viceroy and Governor-General of India, with Notes on the Bengal Tenancy Bill, 1883.

The humble memorial of the
Landholders of East Bengal.

MOST RESPECTFULLY SHEWETH—That your humble memorialists are filled with great alarm at the introduction into the Imperial Council of a Bill entitled the Bengal Tenancy Bill, the

provisions of which will tend to upset the present relations between landlord and tenant in Bengal, to redistribute property in land on an unfair basis, and will foster dispute and litigation to the prejudice of the interests of both classes.

2. It was in June 1875 that the zemindars of East Bengal, to their misfortune be it said, sent a petition to the then Lieutenant-Governor, Sir Richard Temple, asking for greater facilities in the realisation of arears of rent, the present law having practically been found very tedious and expensive. The petitioners stated that "it is not unknown to Your Honour that the punctual payment of the Government revenue of an estate depends almost entirely on the punctual payment of the rents of the *mehal* by the tenants thereof. That suits for arrears of rent are very expensive, and that it is almost impossible to realise by suits the rents of a *mehal*, where the ryots combine against the zemindars as they often do, and when in consequence a very large number of suits has to be instituted. That even where a decree is obtained for arrears due, the zemindar very often does not obtain the whole of the actual costs of the litigation, and that the low rates of interest allowed on decrees are by no means calculated to induce the ryots to satisfy the decrees at once. That leaving out of consideration for the present the question of enhancement, your petitioners submit that there are enormous difficulties in the way of their realising arrears of rent at even existing rates. That the right of occupancy created by Act X of 1859 is now-a-days claimed by the great majority of ryots, and that it appears to Your Honour's petitioners that a stringent law for the absolute forfeiture of the right of occupancy on non-payment of arrears of rent either on the due date or at the latest on the fifteenth day before the last day of the next payment of the Government revenue will, to a great extent, help the zemindar in realising his rent and paying the Government revenue in time. That distraint of crops and suits in courts are the only remedies provided by the law for the realisation of arrear of rent That distraint is naturally disliked by the ryots, and that owing to the vexation which it entails upon the distrainor and considering the liability to be sued for damages, zemindars very seldom have recourse to this mode of recovering rents."

3. This prayer was rejected by Sir Richard Temple, but he said that "in the event of legislation being contemplated on a future occasion, he has little doubt that the arguments now submitted will receive proper consideration." A few months after this Sir Richard Temple recorded a minute on the 18th April 1876 on the question of determination of rent But his sliding scale of adjustment of rents was rejected both by officials and non-officials as quite impracticable. The Agrarian Disputes Act was passed on the 21st April 1876 and received the assent of the Governor General on the 10th July following. Sir Richard Temple again recorded two minutes, one on the 15th May and the other on the 29th August 1876, and in this later minute the question of the transfer of the occupancy right by private agreement is brought forward for the first time. The Government of India disallowed this proposal in the following terms in October 1876 :—"With regard to the expediency of rendering the right and interest of an occupancy ryot liable to sale for default and transferable by private agreement, I am desired to state that the President in Council entertains considerable doubts. The absence of restrictions on the liability and the transfer of land which prevails in many provinces of India has been alleged by numerous authorities, whose opinions are entitled to great weight, to have been an efficient agent in the impoverishment of the ryot and the transfer of the ownership of land to classes not likely to be good landlords as regards either their own tenants or the State. The Select Committee on the Civil Procedure Code also, in a report presented to the Council of His Excellency the Governor General for making Laws and Regulations, on the 21st ultimo, have recommended considerable restrictions on the sale of land by Civil Courts in execution of decrees. Under these circumstances, it appears very questionable whether it is *politically expedient* to afford any additional facilities for displacing the existing occupants of land."

4. After the collapse of the measure proposed by Sir Richard Temple, there seems to have been a suspension of legislative activity in the matter of the Law of Landlord and Tenant in Bengal. But the difficulties of zemindars in the matter of realisation of rents were so great that Mr. Reynolds, Secretary to the Government of Bengal, in his letter dated April 1877 thus brought the matter for the reconsideration of the Government of India :—"The replies which have been received to the circular in which this Government invited an expression of opinion on the Bill, sufficiently show that under the present procedure, the recovery of rent by legal process, even when the arrear is not disputed, is so tedious and costly as practicably, in many cases, to involve a *denial of justice*. If the ryots of a village combine to offer a passive resistance to the landlord by withholding all payment of rent, he can only realise his dues by a suit in the Civil Court against each individual cultivator. It is the object of the ryots to delay a final decision as long as possible and the procedure of a civil suit affords them many facilities for doing so. In the meantime the zemindar, though thus kept out of his own dues, is compelled to pay the Government revenue on pain of losing his estate, and under the pressure thus put upon him, he is sometimes obliged to accede to the demands of the ryots and to forego claims which he would have been able to establish under a more expeditious legal procedure, or he is forced to borrow money at ruinous rates of interest to enable him to meet the Government demand."

5. Mr. Mackenzie thus expressed himself in the Bengal Council four and a half years ago :—"The law's delays are, we know, proverbial, but the delays of a Bengal rent suit in a Bengal Moonsiff's court are more than even proverbial philosophy can make palatable. Notwithstanding the fact that in about 75 per cent. of the suits for arrears of rent the claim is not really contested, the zemindars and other rent receivers have too often found themselves unable to recover their just dues without submitting to a process which entails costs that they may

possibly never recover, and delays that are frequently embarrassing and ruinous, and even when the zemindar has got his decree, it by no means follows that he has got his rent.

"The zemindars are on their part not merely not unwilling but anxious to have this portion of their case taken into separate and final consideration. The Road Cess and Public Works Cess Acts have thrown upon them the responsibility of collecting with their rents and paying into the treasuries all that portion of this fresh local and provincial taxation which falls upon under-tenants of every degree. If they cannot recover this easily and effectually from their tenants, they must under penalty pay the amount themselves—a position which the State *is obviously bound to render* as little burdensome as possible. The Lieutenant-Governor therefore, as he has informed us immediately on his assumption of office, and in accordance with the last views of his predecessor, pressed upon the Government of India the necessity of early legislation to facilitate the early recovery of undisputed rents and to improve the law for execution of decrees in rent cases."

6. After alluding to the many special powers granted to the Zemindars by the old Regulations (notably Reg. VII. of 1799 and V. of 1812) for easier realization of rents, Mr. Mackenzie thus noticed the gradual curtailment of those powers and the change of sympathy of Government from the Zemindars to the ryots :—"In 1859 the legislative pendulum swung quite to the opposite extreme. Summary arrests of defaulters were forbidden. Distraint was so fenced in with difficulties as to become quite impracticable. Zemindars were prohibited from compelling the attendance of their tenants to settle accounts or pay their rents, and both parties were relegated to formal suits in the Courts, at first in that of the Collector and since 1869 in that of the Civil Judge. It was the opinion of many competent Judges, even at the time that this re-action *was too violent*, that sufficient consideration was not given to the difficulties of the Zemindar's position; that the character of the ryot, say, for instance in Backergunge, is not by any means so "child-like and bland" as to warrant the confidence which the law places in his anxiety to pay his rent as it falls due. As I explained to the Council before, the difficulties of the landlords have *become greater year by year*, while the pressure put upon them by Government has *become heavier*, and they stand now urgently in need of assistance from the Legislature."

Mr. Reynolds in his letter alluded to before thus concluded his observations on the subject :—"While Mr. Eden is not prepared at present to take up the question of defining the principles upon which rents should be enhanced, he is quite satisfied that something must be done without delay to improve the system under which the Zemindars can now legally recover their rents. Complaints have reached him from every part of the country of the difficulty and delay which exist under the present procedure, and both officials and non-officials are agreed that the system requires an immediate reform.

"In the two Bills now before the Bengal Legislative Council, the Bill for the levy of a cess for Provincial Public Works, and the Bill for the levy of a rate upon Irrigation Lands, it is proposed to collect the rates through the Agency of the Zemindars in the same manner as the road cess is collected at present. But it is clear to the Lieutenant-Governor that, if responsibilities of this kind are thrown upon the landlords, the Government is *bound in equity* to give them corresponding facilities for realising the amounts which they are entitled to recover from the ryots."

7. The above extracts will make at least two points clear; (1) that it was the difficulty about the realization of rent that the Zemindars asked to have remedied, and (2) that the Governments of Sir Richard Temple and Sir Ashley Eden thoroughly appreciated the difficulties of Zemindars and were anxious to have the law so amended as to remove all cause of complaint on that score. Section 9 of the Bill framed in 1876 and section 4 of that framed in 1879 provided that the amount sued for should be deposited in Court before the tenant would be allowed to put in his defence. This salutary provision has disappeared from all Bills that have been drafted since, for reasons not known to your memorialists. If the Government really believes that the difficulties of Zemindars "have become greater year by year" and if the Government is convinced that it is "bound in equity" to give them the necessary help, it is plain that the first step at legislation should be to remedy an evil that is unequivocally pronounced to exist with such dire consequence to the Zemindars. But nothing has been done in the present Bill to help the Zemindars in realizing their rents. On the contrary, it contains provisions of such a one-sided nature as to deprive them of their most cherished rights and thus by weakening their position, gradually pave the way for their extinction as a class. The provisions regarding khamar lands, the arbitrary extention of the right of occupancy, the right of transferring the occupancy tenure without the consent of the landlord, the restriction on freedom of contract, the provisions regarding compensation to ordinary ryots, the fixing of the maximum amount of rent at one-fifth of the gross produce, the provisions regarding the appointment of a manager by the District Judge and other provisions of a similar nature, too numerous to detail here, are all intended for the good of the ryot, and offer not only no advantage to the landlord but are calculated to throw enormous difficulties at every step in his dealings with his tenantry. The ryot under the proposed Bill could, if he chose, make the Courts the medium of his communication with the person designated in the Bill as his landlord, but the latter will no longer occupy the same position as in the past. The effect of these provisions becoming law would be (by giving a wide scope to litigation) to diminish the profits of the landlord, and hence the value of landed property. And with the rigorous sun-set law hanging over their heads and the tenantry in an attitude of defiance, it is not too much to say that utter ruination will stare the zemindars in the face. Your humble memorialists are loath to believe that the righteous British Govern-

ment would sanction a one-sided, narrow, and unjust measure of this kind. It would virtually bring on the abolition of a class of Her Majesty's subjects who have invested money in land relying on the faith of the British Government and who sincerely believe that interference with their rights in the manner proposed would be a direct infringement of vested interests as guaranteed by the Permanent Settlement.

8. As regards the necessity for a radical and complete change in the law of Landlord and Tenant, your humble memorialists beg to observe that the present state of the country is not such as to justify the enactment of a measure like this. In Bengal (especially Eastern Bengal) the ryot is strong enough to hold his own against the strongest Zemindar. The advocates of the Bill admit this. Spread of education and enlightenment and the progressive nature of the times have infused a spirit of independence and self-reliance among the Bengal tenantry, quite unknown a quarter of a century back, and as time goes on this will spread. They are perfectly alive to their rights and interests and occasionally assert them in a way which places the landlord completely at their mercy. Sir Ashley Eden after his first tour in the Eastern districts was able to testify to the prosperous condition of the peasantry in clear and unmistakeable language. It is well known that the occupancy right is enjoyed by the great majority of the ryots. If statistics were called for, it would be found that at least 90 per cent. of the ryots possess that right, and the Zemindars have never in this part of the country objected to this right being acquired under the 12 years' rule, or shifted them from one plot to another with a view to prevent the acquisition of the right. The ryots are therefore quite secure from unnecessary eviction at the will of the landlord. Enhancement also takes place slowly and by mutual agreement. The difficulty of realization has already been dwelt upon before and it is a well-known fact that the Government, with its immense prestige, cannot realize the full extent of the jumma in Government estates even with the aid of a summary law. Thus whether for enhancement or realization of rent if the disadvantage is on the side of the Zemindar, your humble memorialists fail to see what justification there is for still further intensifying those difficulties, and reducing his status by a complete and radical change in the law calculated to excite the worst passions, foster litigation, and set one class against the other.

9. A detailed criticism of the provisions of the Bill is appended to this for the consideration of your Excellency in Council.

And your memorialists as in duty bound will ever pray.

Notes on the Bengal Tenancy Bill, 1883.

Section 3, clause 2.—It is doubtful whether the word "owning" would include trustees and persons having a life interest only in the property. as well as *mutwallies* of *wakf* properties and *shebaits* of *debatter* estates.

Section 3, clauses 5 and 8.—The definitions of "raiyat" and "tenant" will bring in confusion. In a country where the masses of the people are uneducated and ignorant, these fine distinctions will often cause confusion, as by the careless use of the word raiyat in any proceeding the landlord will be taken as having admitted a tenant to be holding agricultural lands, though the person so designated may not have held any such lands at all. The definition of the word "tenant" is also faulty inasmuch as it does not show who, other than a tenure-holder, raiyat, under-raiyat or the tenant of a bastu holding, can be said to be a tenant.

If the distinction between a raiyat and a tenant is at all to be preserved, then the definition of raiyat might be advatageously changed to the following effect: A person shall be deemed to be a raiyat who holds land for the purpose of agriculture, horticulture or pasture, either on an express or implied agreement to pay rent.

Section 3, clause 6.—This will encourage unrestricted and unlimited sub-letting. The word "mediately" should be omitted.

Section 3, clause 16.—Transfer should not include mortgage.

Section 3, clause 19.—Does the word "stamped" include "sealed"?

Section 4.—The insertion of the words "not inconsistent with" in clause (*a*) has given such an amount of vagueness and indefiniteness to the section, that it would be a fruitful source of litigation and confusion. The illustration in this section is so far suggestive that it will encourage under-raiyats to set up false claims, as well as create another class of occupancy-right holders.

CHAPTER II.

This refers to *khamar* lands. Too much importance has been attached to this class of lands. Large zemindars seldom have *khamar* or *nij jote* lands, and it is only small landholders or talookdars who keep such lands for their own maintenance. The provisions relating to the survey and registry of these lands are based on the fear that landholders will gradually absorb and convert *rayati* lands into *khamar*, but this fear is perfectly baseless—at least so far as Bengal is concerned. The provisions of this chapter will entail a good deal of expense and trouble while they will serve no useful purpose. Why should the proprietor have to prove 12 years' continuous occupation? If any landholders have made new khamar, say, five years before the passing of the Act, will he be deprived of those lands? This is surely very unjust.

Section 15.—The presumption that when the rent of a tenant has not been changed for 20 years, it must be taken for granted that the land has been held at that rate since the permanent settlement of 1793, is injurious to the interests of landlords. There are many estates in which the owners are minors or women, who have treated their tenants leniently, and have never attempted to enhance the rents of their tenants, or who, from sheer neglect, have allowed

the same rents to run on for 20 years or more. The interests of such persons will be very seriously affected by this provision. On the other hand, those landlords who have been frequently enhancing their rents will not be so affected. This seems very unjust and unreasonable. This provision is also very prejudicial to the interests of auction-purchasers who are often unable to get possession of the zemindari papers of their predecessors. Mr. Reynolds remarks that "as there is reason to think that rent receipts have been much more regularly given and much more regularly preserved during the last 20 years than during the 20 years which preceded them, it seems to follow that the lapse of time has made it more and more easy to raise the presumption and more and more difficult to rebut it." Since the passing of Act X of 1859 the tenants have been quite alive to their own interests and do everything in their power to protect the many valuable privileges which that Act conferred on them. Hence it is much easier now to prove uniformity of payment for 20 years than it was when the Act was passed. It is therefore urged that if in future such presumption should be raised, the tenant should prove uniform payment for at least 40 years immediately before the commencement of the suit, and not any 20 years which may suit his own convenience.

Section 20.—This is probably intended to apply to Government estates. Why should not ryots in Government estates be in the same position as the ryots of private land-owners.

Section 28.—The relief contemplated by this section might easily be obtained by application to the zemindar. Why then should the ryot have power to apply direct to a revenue officer? If the landlord refuses to register such transfers, then the tenant may apply to the civil court as provided for in section 32.

Sections 45 and 47.—These two sections will confer the right of occupancy on all classes of ryots, without any distinction whatever in the territories under the control of the Lieutenant-Governor of Bengal. The occupancy right will then be "the rule and not the exception" as desired by Sir Ashley Eden. It is well known to Government that 90 per cent. of the ryots of the present day possess that right. They have acquired this right under the operation of the present law, and no land-holder ever thinks of attempting to deprive his ryots of this right. Why should then the Government confer that right in a peculiar way against the wishes of the zemindars when the latter affirm that they have never objected to the right being acquired under the 12 years' rule? It will not now be necessary to hold the same piece of land for 12 years, nor will it be required of him to hold one piece of land for 12 years in the same village. If a ryot holds one piece of land or several pieces of land at different periods in the same estate for 12 years (an estate may have 100 villages in it), then he will acquire the right of occupancy in all the lands held by him on the 12th year. For instance, an estate called *A* in the district of Dacca has lands which are within the boundary of the district of Furreedpur or Barisal If the ryot holds a piece of land belonging to *A* for 12 years in Barisal, then he acquires a right of occupancy in all lands held by him in estate *A* in the district of Dacca, though he may have held those lands for six months only; or he need not even hold an identical piece of land in Barisal for 12 years, he may have held 10 pieces of land within that time in Barisal, but on the 12th year he will acquire the right of occupancy in all lands held by him in the 100 villages of estate *A* in the district of Dacca. Then, again, there may be several estates owned by different owners in the same village. By this provision the ryot of one estate is virtually a settled ryot in respect of the others, though he may not have held any land in any of the other estates. Because the ryot holds land in the same village, therefore he has a right to be deemed a settled ryot in respect of all estates in the village. This may be somewhat in keeping with the spirit of the Regulations which respected the rights of khoodkasht kudmee or resident ryots of the village only. But the khoodkasht ryots of one village were the paikashts of another, though included in the same estate. But the present Bill goes far ahead of the Permanent Settlement Regulations and gives the right of being deemed a settled ryot to any one holding land in the same estate which may have hundreds of villages in it. Is this not going too far? The definition should therefore be changed as follows:—"Every person who for a period of 12 years, whether before or after the commencement of this Act, has continuously held as a raiyat raiyati land situate in a village when it appertains to a single estate, or raiyati land in an estate when there are more estates than one holding interests in the same village. shall be deemed," &c. This will also do away with the necessity for retaining clause (*b*) of section 43 which is very wide in its significance. The word "village" should also be more accurately defined. The boundaries of *Thak* or survey maps of most of the villages as surveyed in 1853 are very different from their present boundaries, partly on account of diluvion or alluvion, partly on account of the encroachment of neighbouring villages, or partly on account of (in many cases) voluntary concessions and agreements entered into between neighbouring landlords since the last survey. It may often be that part of the area included in an old survey map is now a part of a different village and estate altogether. How will such cases be dealt with? The definition in section 45 is certainly a very broad one, which not even the blindest supporter of the cause of ryot's rights ever dreamt of having. The pesent law of 12 years' continuous possession of the same piece of land piece of land has been declared by the highest legal authorities to be an invasion of the proprietary rights of landlords as guaranteed by the Permanent Settlement. Sir Barnes Peacock, the late Chief Justice of the Calcutta High Court, remarked that "it interferes with the just rights of the zemindars, at least in the permanently-settled estates by vesting rights of occupancy in ryots who had no previous existence." Sir Richard Garth says:—"The term of 12 years, which was fixed by the Act of 1859 as necessary to confer the right, was about the shortest period of prescription known to the law. I believe it will be found that in no country in the world can

a prescriptive title be gained in any shorter period." Then again, regarding the contention made by those who advocate the cause of the ryots, that the ryots in many parts of the country acquire the right according to custom and not under Act X of 1859, Sir Richard Garth says:—"If there did in fact exist now, or if there had existed in 1859, any customary right to land by which ryots could have proved a permanent title by an enjoyment of less than 12 years, the civil courts would surely have heard of it long before this." Such are the views of high legal authorities on this vexed question, and the opinions of many more Judges of the High Court could be quoted to the same effect. Apart from the question of the legality of the provision, it may be said that the 12 years' rule is not injurious to the ryots, and that there is no necessity or justification whatever for changing the law in this respect—at least in Bengal.

Section 46.—*Vide* remarks on chapter VII.

Section 49.—This section is also very objectionable. Section 13 provides that no land other than that for which a register has been kept shall become *khamar* land. This absolutely puts a stop to any increase in *khamar* lands in future. But section 49 provides that the occupancy right might be acquired even in *khamar* lands by 12 years' possession. The zemindar will thus suffer double loss—on the one hand he will be deprived of the right of retaining as much land as he may require for his own use, and on the other, his *khamar* land will also be acquired by his ryots gradually, so that if a zemindar wishes to extend his family residence, make a garden or a new house, he will be entirely at the mercy of the tenant.

Section 50.—This section confers on the occupancy ryot the right, along with other rights, of transferring the holding by sale, gift or otherwise, without the consent of the landlord. The zemindars of East Bengal have in their memorials to Government (on the Rent Question) in previous years always objected to this clause as detrimental to the interests of both landlord and tenant. The provision would tend to transfer the tenant right from *bonafide* cultivators to money-lenders or other non-cultivating classes. The right of transfer will defeat the very object with which the right of occupancy was created. As the Legislature cannot fix a limit to the rate of interest payable by ryots on amounts borrowed by them, nothing will prevent the mahajans from extorting any rate of interest that may suit their convenience. And in a short time the amount will be doubled or quadrupled, and the poor ryot will be sold out and converted into a day-labourer for tilling the very land which the other day he called his own. The full benefit of this measure, though intended for the good of the actual cultivator, will be reaped by a third party who cannot lay any claim to that right, and who does not deserve any consideration at the hands of the zemindar. The Government of India objected to this in 1876, but Sir Ashley Eden, in asking the Government of India to reconsider its decision, said: "There appears no ground for apprehending that this measure would have the effect of transferring the land to classes whose ownership it might not be thought desirable to encourage. It is probable that in most cases the right would be purchased by ryots of the same class and position as the former tenant. The occupancy ryot is, by the nature and terms of his holding, a resident cultivator, and to render his tenure saleable would involve nothing more than the possibility of its transfer from one resident cultivator to another." It is clear that the whole of Sir Ashley Eden's contention falls to the ground if it can be shown that in places where the right of transfer has been given, the tenure has passed from *bonâfide* cultivators to money-lenders or other non-cultivating classes. Sir Ashley Eden thinks "it is probable that the right would be purchased by ryots of the same class;" but is this borne out by facts? On the contrary, the experience that has been gained in Bengal and in other Provinces of India entirely falsifies the expectation on which the late Lieutenant-Governor based his theory. The Hon'ble Raja Siva Prosad in his speech in the Imperial Council in March last laid special stress on this point, and illustrated it by the case of one of his estates the tenants of which had simply been ruined. Then, again, if the occupancy ryot is by the "nature and terms of his holding, a resident cultivator," why does the present Bill give the right to one who is non-resident? Is the present measure in keeping with the original proposal of Sir Ashley Eden? If not, how wide it is of the first inception of the idea? It is said that the great advantage to the ryot will be that it will enable him to raise loans on easier terms. But even on this point opinions differ very much among those who have experience of the state of things in the mofussil. But, granting, however, that such is likely to be the case, a loan on easier terms could be raised only by the hypothecation of the holding to the mahajan. It is unreasonable to accept the theory on which the justification of the measure is founded, *viz.*, that the money so raised would be spent in improving the condition of the land from which he could be sold out at any moment. The zemindar's interest in the land is much more permanent and unalienable than that of the ryot, even were the right of transfer conferred on the latter. An occupancy ryot can throw up his holding at any moment, if it does not prove profitable to him, but the zemindar's interest is permanent. Hence the zemindar is not only directly interested in keeping his estate in an efficient condition, but he alone is capable of incurring the outlay necessary for such improvements. When artificial means are employed to improve the condition of an estate, it is not plots of ground but large tracts that have to be dealt with. And large sums are often necessary to bring the works to a successful completion. It is therefore unreasonable to expect that the ryot will take on himself the work which he has not the means to undertake, and which legitimately belongs to the zemindar. It is said that the sale of a tenure would facilitate the realisation of rent by the zemindar, but if the disadvantages of the measure were weighed against its advantages, the good resulting from it would be more than counterbalanced by the evil that it would give rise to. As regards the ryot, the increased

facilities afforded him for borrowing would be a tool in his hands to work his own ruin by borrowing money on every possible occasion, such as marriage ceremonies and so forth. The phrase "which does not render it unfit for the purposes of the tenancy," in clause (a) of this section, is very vague, and ought to be properly defined, otherwise it will give rise to much litigation between landlords and tenants. No provision has also been made in the Bill for the registration in the landlord's sherista of transfers of occupancy holdings. Without such a provision, the landlord will entirely be in the dark as to who his tenant is. The Bill makes the occupancy holding virtually a *talook* and the occupancy ryot, a *talookdar*. With the large powers of sale and gift given to him, we do not see why the purchaser of an occupancy holding should not register his name in the landlords' sherista on payment of a moderate fee.

The advocates of the present Bill deny that its provisions are tantamount to redistribution of property in land. When this Bill becomes law, who is it that will get the compensations that are offered for acquiring land for public purposes such as railways, canals, &c. Will not the tenant come in for at least half the price, if not more? If this does not mean distribution of property, we do not understand what does.

The power of sub-letting in clause (e) will be resorted to chiefly to prevent the landlord from exercising his right of pre-emption. Sub-letting will be injurious to the actual cultivator, as the occupancy ryot could easily convert himself into a middleman.

Sections 56 and 61.—The acquisition of the right of occupancy by a new tenant immediately on his taking from the landlord a holding wherein the former tenant had a right of occupancy is indeed very objectionable. The landlord will have no interest to pay the highest amount offered for a holding, if he cannot let the land again as he desires, or if he cannot enhance the rent of the same holding. And it may often happen that having bought a tenure at the highest market price, he may have to wait for a year or more before he can let it at the same price or even at a reduction to a new tenant. Let us illustrate this by an example. A holding is put to sale by a mahajan and Rs. 200 is offered as the highest price. The landlord in exercise of his right of pre-emption pays this amount and buys the holding, but he may not be able to settle it over again at that price to a new tenant. Probably the land will remain uncultivated for a year, and he suffers loss of his rent meanwhile. The interest of the Rs. 200 at 12 per cent. per annum comes to Rs. 24. At last he is obliged to make over the holding to a new man, say, for Rs. 150. Here the landlord suffers a loss of Rs. 50 in the price, Rs. 24 in the interest or Rs 74 in all, besides his rent for the year. Considering the risks undertaken by the landlord, it is but fair that he should be allowed to settle the land to the best advantage. And there is no reason why the new tenant who did not occupy the land for even a day, should get all the privileges of the previous occupant at the very moment he enters the land. The right does not attach to the land but to the holder thereof, and hence the new occupier cannot have the same privileges which the former tenant had.

We cannot conclude our observations on the subject of the occupancy right without noticing one or two important deviations in the present Bill from what was proposed by the Bengal Government in its own Bill. In the first place it was proposed (section 19, clause 3) that the sale of an occupancy right to a non-resident ryot will be valid only with the written consent of the landlord, and not otherwise. In the second place (section 21, clause *b*) no partial alienation of the holding will be valid without the written consent of the landlord. But both of these safeguards have been done away with in the Bengal Tenancy Bill. The first would to a certain degree prevent the right passing into the hands of men who, owing to their absence from the village, are not likely to turn out desirable tenants or good agriculturists. The second would preserve the holding from being divided into minute parts, the occupants of which would be too poor to devote themselves to the improvement of agriculture. But by far the most important objection to this sub-division is that it will lead to quarrel and litigation among the numerous co-sharers of the occupancy right. It is well known that the great majority of ryots in Bengal are Mahomedans. Under the Mahomedan law the property is inherited by all the sons, daughters, wives and other relations. Some of these—especially the daughters—live away in distant villages and do not share in the cultivation of the land. It frequently happens that these various members of a family do not agree among themselves. And the effect of this will be that any member living away and having no direct interest in the holding, will sell up his or her share to some one who is not friendly to the others. And this will lead to misunderstanding and quarrel. Is such a state of things likely to conduce to the peace and happiness of the cultivating class or to the feeling of security which the bestowal of rights in property (the avowed object of conferring the right of transfer) is likely to engender? Then, again, is this likely to facilitate the realisation of the zemindar's rent from the numberless co-sharers of a holding which the provision will create? If the resident occupiers are sued for arrears, they will say that such and such a person (perhaps living miles away) is part-owner and is responsible for part of the rent, though the holding stands in the name of one member of the family, as is usually the case. These difficulties should be well considered.

Section 59.—This section limits the enhancement to six annas per rupee, or to ⅛th of the estimated average annual value of the gross produce. No restraint should be put on the freedom of contract. When contracts entered into by people in other matters are respected by the courts of law and sanctioned by the established usages of the country, there is no reason whatever why a contract freely entered into between a landlord and a tenant should be respected only when it binds the former. Then, again, the limit of six annas per rupee is one of several restrictions to enhancement of rent. The second restriction is contained in section 76, which provides that the enhanced rent shall in no case be more than double the existing rent. The

third is contained in section 77, which provides that the limit of enhancement will be reached by degrees in a number of years. And the fourth is the limit that the enhanced rent shall not exceed ⅕th of the average annual value of the gross produce in staple crops calculated at harvest time, the cheapest time in the year. Amidst so many restrictions it is easy to conceive that the landlord will get but small advantage, if at all, when he puts the legal machinery in motion for the enhancement of rent. Let us illustrate this by an example. Suppose the average annual value of the produce of a bigha of land is Rs. 12½ and the present rent of the ryot one rupee. Under this law the landlord can claim to enhance up to Rs. 2 annas 8, being ⅕th of Rs. 12½. But he cannot expect to get more than double or Rs. 2. And even if the court should deem it to be fair, from the evidence before it, to give him the Rs. 2, it cannot pass a decree for that amount, as section 59 provides that in no case shall the enhancement exceed 6 annas per rupee, or in other words, the landlord cannot get more than Re. 1 ans. 6. Hence it is evident that the landlord can never expect to get the full benefit of the provision of the law. For, even if the land should continue fertile, it would take, at this rate, at least 50 years to get his 2 rupees 8 annas, for the rent once enhanced cannot be disturbed for 10 years, as provided for in section 78. So much for the justice of this provision.

Regarding the limit of ⅕th of the average annual value of the gross produce, it may be said that it is a most arbitrary limit. Even the Rent Commissioners fixed the limit at ¼th of the average annual value of the gross produce. Many authorities could be cited to prove that rent in times anterior to the Permanent Settlement varied from ⅔ths to ½ of the gross produce. In the western districts of Bengal the rent still varies from ⅓rd to ½. Even in East Bengal, where land is let at what is called the *burga bhag*, half the produce is paid to the landlord. But if the landlord gives the seeds, he gets more than half. In Behar the rent at present varies from half to nine-sixteenths of the gross produce. Under these circumstances, to fix the limit of enhancement to ⅕th is very arbitrary and unjust. The limit should be six annas of the average gross produce of land where money rent is paid, and half the produce where rent is paid in kind. The ryot is the best person to know which lands will yield him a profit and what rent he can afford to pay deducting the cost of cultivation. Hence any contract freely entered into by a ryot should be respected by the law.

Sections 62 to 73.—The procedure laid down in these sections for the preparation of a Table of Rates is very cumbrous, and will be very expensive and troublesome to both landlord and tenant. Clause (*c*), section 63, refers to "the maximum and minimum estimated average amounts of the gross produce" of each class of land. If the average is to be struck, why should there be two averages for each class? These fine distinctions instead of simplifying matters will create more confusion. For the same reason there should not be two rates—a minimum and a maximum—for each class of land as provided for in section 73. It is very doubtful whether a Table of Rates, prepared on the complicated lines laid down in the Bill, will be fair to the landlord; on the contrary, the probability is that in every case the Table will err on the side of over-leniency towards the ryot. It will be necessary not only to fix rates for each class of land in every part of a district, but also in every village in that part. Rates vary in each village, and it is impossible to fix a rate for even a tolerably large area. The rates will remain in force for 10 to 30 years, but the land may deteriorate after 5 years. Is the tenant then to get a reduction? If he does not, he suffers. But if he does, he becomes liable to enhancement within that period. For, it would be unfair to give him reduction without making him liable to enhancement. In either case the fixed period of 10 or 30 years will be injurious to one or the other party. In respect to such matters the landlord and tenant should adjust their claims without interference from outside. Then, again, in most of the districts in Eastern Bengal, the Courts of Law have decided what are fair and equitable rates. Does the Legislature intend that the rates fixed by the High Court and adhered to both by landlord and tenant should be set aside by the revenue officer and the rates established since a long time after the expenditure of large sums of money should be altered at the caprice of such an officer? Then, again, the expenses to be incurred by Government, including the salaries of all officers employed down to the lowest peon, will be realized from both landlord and tenant, and the result will be financially disastrous to both. It should also be remembered that a Table will be of value in places which have been surveyed in detail. To prepare a Table before such a survey would be like putting the cart before the horse. Then, again, after incurring all the trouble and expense of preparing a Table of Rates, the landlord will have to bring as usual a suit in the civil court to determine under what class the land in question should be assessed. This means a good fight with the tenant over again. Why this double loss?

Section 70.—The limit stated in this section should not exceed 10 years. Considering the difficulties in the way of enhancement and the hard contest with the ryot at every step, it is but fair that the landlord should not be debarred from reaping any advantages which he may get on the clearest evidence and on the most undeniable facts.

Section 71.—It is not clear why the ground of enhancement on account of the ryot is holding more land than he pays rent for, has been omitted from this section.

Section 83.—The preparation of annual price lists should be made by the Collector in cotuation with, say, three assessors, who should be men having a knowledge of the country and its prod... .

Section 87.—The provision of a settled ryot acquiring permanent right in bastu land *not included in an occupancy tenure*, is unjust to the landlord. But the provision that he will not lose the right, though he may cease to be a settled ryot of the village or estate, appears to us quite incomprehensible. Nothing has been said as to how long the landlord will wait before

letting out the land left by the absconding ryot, and no attempt has been made to shew any justification for so unjust a measure. Furthermore, the run-away ryot cannot be ejected from the land, though he may have broken the condition on breach of which he was, under the terms of the contract, liable to be ejected without compensation being paid to him. Is this fair?

The limit of 5 per cent. is also very unfair. This limit had been first fixed by the Rent Commission. Even Government paper yields 4 to 4½ per cent. and free of all costs. For land there is first the Government revenue to be paid, then the Road and P. W. cesses. Then there is the cost of collection and the difficulty of realizing it. Some consideration should also be made for outstanding balances and chances of litigation. After all this trouble and expense 5 per cent. is the highest that the landlord can look to as his rent. Is this fair?

CHAPTER VII.

The broad definition given of a settled ryot will include almost every ryot in Bengal, Behar and Orissa. If there be one in ten thousand who is not so, he would also in course of time get all the privileges of a settled ryot, which no landlord could prevent him from acquiring. The provisions for compensation for improvements and for compensation for disturbance are such as to make the position of an ordinary ryot in some respects more enviable than that of an occupancy ryot. These two compensations are to be given to him though he should have broken a condition for breach of which he was, under the terms of the contract, liable to be ejected. Hence to eject such a tenant would be out of the power of an ordinary landlord unless he is disposed through sheer *malice prepense* to incur an unwarrantable amount of expenditure in order to get rid of the tenant.

The breach of a stipulation relating which both parties have most willingly made an agreement, is an infringement of the landlord's right, and if in such a case the ryot is allowed compensation of such a heavy nature, it is simply punishing the landlord for seeking redress of wrong done to him, and rewarding tenant for committing the wrong. If a ryot does not appear or agree to pay the enhanced rent demanded (section 92), it will be more advantageous to him than to the ryot who agrees to pay the enhanced rent, for, if the case is not decided within ten weeks before the expiry of the year and the agreement is recorded in the year following, the ryot will have to pay the enhanced rent from the year next following the date of the agreement. In the case of the ryot who agrees before the expiry of the year to pay the enhanced rent, he will have to pay at that rate from the year immediately following.

Section 96.—This is very objectionable. Why should a ryot be entitled to claim all accretions to his holding as his own. If this be the law, half a dozen ryots of a village could claim a new *chur* much larger perhaps than the village itself as their own. But when a civil suit is brought by the neighbouring landlord for possession of the land, who is it that will bear the cost of the suit—the ryot or the landlord? Is the landlord or the ryot to be made defendant?

Section 100.—The provisions regarding a better system of receipts and accounts are no doubt desirable, but the safeguards have been stretched to an unnecessary extent. The receipt is to contain so many facts relating to the holding that it will serve the purpose of a *pattah*, that is, it will have in it those facts and figures which a *pattah* usually has. This will not facilitate the collection of rent, but will throw such obstacles in the way of ordinary village patwaris or gomastas, that they will honour the rule more in the breach than in the observance thereof, and will oftentimes comit such blunders as to throw everything into confusion. Some simple facts connected with the rent of the holding should only be stated, such as the name of the tenant, the date of payment, the name of the landlord, the amount paid in the arrears and the amount paid in the current rent of the year, &c. We would therefore suggest that clauses (*f*) and (*g*) in section 100 be expunged as quite unnecessary in an ordinary receipt—especially as section 101 provides that, within three months after the expiry of each agricultural year, a statement of account showing these and other important particulars is to be delivered to the tenant by the landlord under a penalty. As a better system of accounts will have to be kept by the landlord under the provisions of this chapter than is at present in vogue, the landlord may be fairly entitled to a small fee for retaining a better staff of servants, and perhaps increasing the number of his amlahs in order to carry on this extra work. There is ample justification for this demand, as the landlord will be liable to a fine of Rs. 50 for non-compliance with this provision. When there are more co-sharers than one, the fee might be rateably divided among them. If the landlord is not to receive a fee, then the penalty should be withdrawn, as it will prove ruinous to many poor landlords, and will prove quite embarassing to others.

Section 103—Is objectionable, as the phrase "has reason to believe" is too wide, and would entitle all and every ryot to deposit the rent in court without tendering the amount, to the receiver of it. This would entail endless hardship on the landlord to recover the amount, and in every case he would have to incur some expense in recovering it, which would be a source of loss to him for no fault of his own.

In making a deposit under clauses (*b*) and (*c*) of section 103, the tenant need not even mention the names of those co-sharers who are entitled to receive the amount. And no penalty is attached to his wilfully withholding this information. In such a case how are the co-sharers to know that such a deposit has been made in their favour unless they retain a mooktear (in every court where rent might be deposited) to bring in such information. Is it within the power of every landholder to engage the services of agents for that purpose? We should therefore suggest that, when deposits are made under clauses *b* and *c*, the tenant should be bound

under penalty to give the names of the persons who, he has reasons to believe, are entitled to the rent, and then the officer should cause a notice to be served in the *tahsil kutchery* or in some conspicuous place in the village or estate.

Section 107.—Three years is too long a time. It should be six months.

Section 119.—Half the gross produce should be the limit instead of 5-16ths.

Section 129.—If a ryot is evicted from a holding in default of payment of rent, there is nothing in this section which will prevent his demanding compensation from the landlord. This is very unfair. This is encouraging a defaulter, while it is the duty of the Government considering the stringent sunset law to afford every facility to the landlord in the realisation of rent. It should be remembered that one of the primary objects of the revision of the Rent Law was to facilitate the recovery of arrears of rent, but the temptation to a defaulter in the shape of compensation is such that he will have no incentive to be punctual in his payments. There is nothing in the Bill to deter a tenant from wilfully withholding the payment of rent. On the other hand, he is ensured from loss likely to arise from any measures that the landlord may take by the heavy compensations to which he might lay claim.

Section 133.—If the landlord be willing to measure the land, we do not see why he should not be able to do so within ten years next following the date on which it was so measured. It will in no way be injurious to the ryot, while the landlord might require to do so for some useful purpose. This section should be expunged.

Section 140.—Six months should be about the largest time allowed in such cases.

Sections 142 to 148.—These are some of the most objectionable provisions of the Bill Co-parcenary is an institution in this country. There are few estates, tenures or under-tenures that are owned by single individuals. In the great majority of cases the co-parceners have separate management. The usual practice is for some co-parceners in a group to have joint collection and management separate from another group of co-parceners. Instead of mending matters and furthering the cause of peace, these provisions will be an instrument to harass and virtually to ruin the majority of landholders. Owners of infinitesimal shares and refractory tenants would be able to throw every estate into the hands of the Court of Wards by a simple application to that effect to the District Judge. No provision has been made for an appeal against the Judge's order, and his order, however unjust and arbitrary, will remain final and conclusive. The onus to show cause why they should not appoint a common manager, is on the defendants, and the applicant is not bound to adduce any proof in support of his assertions. There is also no appeal against the appointment of a manager, nor against an order refusing to remove him from office should any interested person apply for his removal on sufficient grounds.

Sections 166-187.—The restricted nature of distraint allowed in these sections will be worse than useless to a landlord. The procedure laid down is like an ordinary suit to recover arrears of rent. The full amount of court-fee will have to be paid, the application shall be signed and verified in the manner prescribed by the Code of Civil Procedure. The court may then admit the application or reject it. These several restrictions are against the object and spirit cf the law of distraint, and hence no landlord would take recourse to it.

Section 157.—Three months' time should be allowed under this section.

Section 187.—No reason has been assigned why the local Government should have the power to suspend the provisions relating to distraint in any area it thinks proper. Probably the object is to prevent harassment and oppression of ryots by frequently or unnecessarily distraining their crops. If the Executive Government should retain the power to interfere when the landlords are bent on taking undue advantage, we do not see any reason why the existing law regarding distraint should be so distorted and modified as to make it practically valueless. Why should good landlords be deprived of this only method of speedy realisation of rents for the sake of the bad ones who could be easily checked by the local Government. As a matter of fact, distraint is never taken recourse to except under the most pressing necessity.

Sections 188-207.—With regard to the procedure for the realisation of rents the provisions in the present Bill are very much alike the existing law on the subject with a few minor alterations. Section 199 is new, but is not likely to be of any use, and will certainly be limited in its application. The ryot who disputes the plaintiff's claim is not likely to act so foolishly as to admit that the arrear is due to him. Such cases will be very rare, and will not be of any help to the generality of landlords. What would really facilitate the realisation of rents would be to provide for the absolute forfeiture of the right of occupancy on non-payment of rent either on the due date, or at the latest, on the fifteenth day before the last day of the next payment of the Government revenue, provided the arrear be established to the satisfaction of the civil court. Or let it be provided that the ryot should deposit in court the amount sued for before filing his defence if the suit be a contested one, though he might sue the landlord for damages should the claim turn out to be false or should the claim be for a larger amount than he is entitled to get. Without some such stringent provision, it is vain to hope that the ryot will be regular in his payments. Or it may be provided that any number of tenants might be sued in the same plaint, so as to reduce the cost of bringing such suits. In many instances the ryot in order to avoid paying the rent, puts in a disclaimer denying the title of the landlord to the land. These cases should be severely dealt with : section 79, clause (8) of the Bill of the Rent Commission runs thus :—Subject to the other provisions of this Act, a tenancy is determined as between the parties thereto by any of the following occur-

rences in the following cases respectively, that is to say, in the case of any tenant(8)—by disclaimer when in a suit to which his landlord is a party, the tenant disclaims such landlord's title and sets up an adverse title in himself or another, by matter in writing or reduced to writing by the court under the provisions of the Act or the Code of Civil Procedure, and such landlord elects within six months to treat such disclaimer as a forfeiture of the tenancy; provided that no such forfeiture by disclaimer shall be allowed in any case in which such tenant having been let into possession by such landlord can show that such landlord's title had expired or been defeated or annulled at the time at which such disclaimer was made, or not having been let into posssession by such landlord can show that he admitted his title as landlord under a *bonâ fide* misapprehension or mistake. It is not clear why such a salutary provision has been left out.

Section 198.—The limit of Rs. 50 in clause (*b*) of this section is very high. This amount will cover the majority of rent suits, and as such cases will, in the first instance, be tried by a moonsiff, an appeal should be from his decision to the Judge or Subordinate Judge.

Section 202.—This section will enable a tenant to acquire rights which were never intended to be conferred on them. He has only to use the land in such manner or to render it unfit for the purposes of the tenancy, and when called upon by the landlord to repair the damage or pay "reasonable compensation," if the tenant choose to pay the compensation, his title to the land will be admitted and his possession confirmed. If this be the law, then anybody could take anybody else's land on payment of what is called reasonable compensation.

Section 208.—Clause (*f*) of this section should be omitted. This will frequently give rise to fraud, and will be a great injustice to auction-purchasers.

Section 210.—Section 201 is a confirmation of the circular order of the High Court published in the *Calcutta Gazette* in July 1880. The registered incumbrances can only be ascertained by a reference to the registers in the different sub-registry offices. These offices are scattered in different parts of the district, and visiting them involves so much waste of time and money that they operate as a serious bar against the execution of rent decrees. The poor class of landlords cannot afford to execute decrees on account of the costs to which they are subjected. As the indexes to these registers are kept in English, and English education has not extended into the interior of districts, the decree-holder finds it difficult to obtain the services of a person competent to examine the registers, and should he succeed in finding a person, he has to pay him a sum which cannot be included as costs in the execution of his decree. Let us consider the outlay which must be incurred before a decree for rent can be executed under this section. (1) The payment of fees in the several registry offices and the cost of obtaining copies of documents to enable the decree-holder to put in a correct affidavit, or he is certain to subject himself to the penalty of prosecution for perjury. (2) The cost of obtaining copies of road cess valuation papers in order to determine the value of the property to be sold. (3) The cost of making local enquiries to ascertain the number and rental of undertenures, &c. To the poorer classes of landlords who have expended their all in obtaining a decree, these costs are simply ruinous. Is it fair to throw such difficulties in the way of decree-holders who have satisfied the court that their claim is just and proper? If it is considered necessary that the existence of all incumbrances should be ascertained before a decree for rent can be executed, why should not the Registrar be required to furnish this information free of cost. If not, a moderate fee should be charged and the Registrars should be held responsible for the accuracy of the returns.

Section 215.—If occupancy holdings are also to be treated as tenures in such areas as the Local Government may, from time to time, by notification in the Gazette, direct, then the realization of rent will come to a perfect stand-still. It is not clear why the local Government should have this power reserved to itself. The Bill is only one-sided in its character, and favours the tenant unduly in his dealings with his landlord, but the *acme* of injustice is reached if this discretion is to be given to the local Government.

No. 21, dated the 20th September, 1883.

From—RAJA PROMATHA NATHA ROY BAHADUR, of Dighapatia,

To—The Secretary to the Government of India, Legislative Department.

I have the honour to forward herewith my notes on the Bengal Tenancy Bill, and I beg you will do me the favour to lay them before His Excellency the Viceroy.

Notes on the Bengal Tenancy Bill.

I, as a zamindar of Bengal, cannot help feeling alarmed at the unjust provisions of the Bengal Tenancy Bill introduced into the Legislative Council of His Excellency the Viceroy. As far as I am aware, this Bill has been brought forward, not in response to any application from the tenants for an enlargement of their existing rights, but because the landlords have been praying since some years for an alteration in the existing law to make fair enhancement of rents practicable, and their realization speedy, and successive Lieutenant-Governors have promised to grant both of these two prayers. It however, instead of altering the existing law in these two respects in such a way as would make it useful to the landlords, proposes to curtail several of their existing right for the benefit of the raiyats, and, as I shall show in paragraph 11 of these notes, to grant rent-free to the tenants all lands of the rents of which

they have been able to defraud the landlords for some time past. But the words which have been said by several of our rulers and legislators since the introduction of the Bill into the Council have alarmed me more than the Bill itself, and they have no doubt that the Government dislikes the landlords as a class. I am heartily willing to support any stringent provision for stopping the levy of illegal cesses, if our rulers would be disposed not to make fair enhancement impracticable. But I beseech them to consider whether it is just and wise to make no distinction between the innocent and the guilty, and to punish the whole class by making the law too harsh for everybody.

2. The landlords of Bengal and Behar, as a class, though not numerically large, constitute a very important and useful section of the community, and they are neither the creations of Lord Cornwallis nor of any other British Governor General of India, as some people suppose; but they claim their existence from a date centuries before the commencement of the British rule in India; and it will be unwise and unjust for the Government to curtail the rights they have enjoyed now for hundreds of years, and which have been solemnly confirmed to them by the Permanent Settlement and the Royal Proclamation of 1858.

3. If, however, our rulers think the landlord class as not undeserving of fair treatment, I am sure their sense of justice will oblige them to reconsider the Bill, and to make it really fair and equitable to both the sections of the landed class; and, on this belief, I now proceed to discuss some of the important sections which have yet struck me as unjust, and therefore objectionable from the landlord's point of view, preserving as far as possible the same order in which they are arranged in the Bill.

4. *Section 15.*—This section, unlike every other law we have, instead of putting on the shoulders of the tenant the burden of proving his allegation that he has paid the rents of his tenure or holding at a uniform rate since 1793, places upon the landlord the onus of disproving this allegation, or rather of proving the contrary, if he (the tenant) can only show that the rate of his rent has not been changed for the last twenty years. This provision has also been objected to by a large number of people, both official and non-official, since the publication of the Rent Commission's Bill and Report; and Mr. Reynolds, in his memorandum, dated the 21st February, 1881, appended to the Bill he prepared under directions from the Bengal Government, admits the soundness of those objections, and the difficulty of the landlords in these terms:—"Allowing all due weight to the arguments of the Commission, it is to be remembered that the presumption was first introduced by Act X of 1859, and that it was then necessary for the tenant to prove a uniform rate from 1839. It is now only necessary to prove such uniform payment from 1861. As there is reason to think that rent-receipts have been much more regularly given, and much more carefully preserved, during the last 20 years than during the 20 years which preceded them, it seems to follow that the lapse of time has made it more and more easy to raise the presumption and more difficult to rebut it Nor can it be denied that auction-purchasers labour under a special grievance in this matter." though Mr. Reynolds, in his speech in Council on the 12th March last has modified his former views in the belief that a landlord will always be able to get out of his difficulties in such cases by applying for a record-of-rights under Chapter XII of the Bill, I fail to see the force of this reasoning; for I am sure the tenant will not hesitate to take advantage of this section to make an incorrect allegation of his *isthumurari* right before the officer preparing the record, and then that officer shall have no help for it but to throw the whole burden of the proof on the landlord, in the same way as a Civil Court does now. True, this provision about presumption is our existing law, but it is nevertheless an unfair one; and, when the law is being altered for the benefit of the ryots, I think any provision which is unduly harsh towards the landlords should be altered also. I therefore beg our legislators to either omit this unjust section altogether, or at least to restore the shape which was given to it in the Bill by Mr. Reynolds.

5. *Section 17.*—I believe that, to prevent the meaning of this section being misunderstood, the words "if the rate of rent have not been altered thereby" which exist in the Commission's Bill, the Bill prepared by Mr. Reynolds under the direction of the Government of Bengal and Digest, should not be omitted.

After *section 31* and before *section 32* I propose the insertion of a section to entitle a landlord to demand and receive in all cases a security from the transferee or the successor of not less than half the annual rent. When it is proposed to give to all permanent tenure-holders the advantages now enjoyed by patnidars in regard to the registration of their tenures, I think it is only fair that landlords should be given the same privileges about demanding and receiving security which a zamindar now has when a *patni* under him is transferred by sale, bequest or inheritance. This provision is very necessary, since, these tenures not being liable to summary sales like the patnis, the arrears together with the costs of realizing them sometimes grow too large to be fully covered by the sale-proceeds.

7. *Sections 45 and 47.*—For the sake of convenience, I take the two together. These sections propose to give to all ryots, whether *khudkast* or *pykast*, who have held lands in a village or estate for twelve years or more, the new status of settled ryots of that village or estate, and to confer upon all such ryots the right of occupancy in regard to any ryoti land they shall hold, whether they paid any rent for it or not, and even if they might have entered upon it the day before. The payment of rent for a plot of land is an essential necessity under the present law for the accrual of the right of occupancy in regard to that plot, and even the Rent Commissioners, the majority of whom are well known to be very friendly to the ryots, did not propose to do away with this condition, very necessary for the protection of the right of the landlord class. This alteration of our present law would further confer the right of occupancy upon the majority of the *pykast* tenants who hold from year to year

and who do not consider this right of any value at all, as they abound now only in places where there is a greater demand for tenants than for land. Under the present law, none of these ryots has acquired an occupancy-right to any particular plot of land in the village, though many of them might have held lands in it for 12 years or more; because, there being no certainty that all the tenants who have come in this year from remote places will also come in the next: those who at the beginning of each season come first are first served; hence very few of these ryots can show uninterrupted possession of the same fields for any number of years. A landlord now therefore always can, and he often does, give these holdings over to new settlers whenever he finds an opportunity of reclaiming some portion of his waste-lands by so doing; for a new settler would not, and could not, take up waste-lands, unless he could secure a proportionate quantity of land which had been under cultivation. But, if sections 45 and 47 were passed into law in their present forms, a great check would be put to the reclamation of waste-lands, and the landlords shall suffer a great loss thereby. Besides, the landlord would suffer material injury in another way, namely, that many of these *pykast* cultivators having thus held lands in the village for 12 years or more, they shall now acquire occupancy-rights to the plots they have cultivated this year, though, as it often happens, they would not come to claim their rights again; but, all the same, the landlord shall have to refuse every one of these plots to a new ryot who might come first and like to take up some of them next year; consequently, he shall have to lose the whole of his next year's rent on these holdings, as it is well known that it is impossible to realize rents from these ryots if they have no crop which might be distrained or attached. Under these circumstances, I must object to these sections, and I venture to add that to consider one of this class a settled ryot of the village or estate is quite foreign to our traditions. Even the Bill prepared by Mr. Reynolds under direction from the Bengal Government did not propose an extension of the occupancy-right such as this.

8. *Section 50, clause (f).*—It proposes to make the occupancy-right transferable by sale or bequest, without even any check against a holding being broken up piecemeal in the course of the transfer—a provision considered desirable in both these cases by the Select Committee on Mr. Mackenzie's Bill to protect the landlords from needless inconvenience and annoyance. I regret to see several officials in high position (even the Hon'ble the Law Member included) believe that this is at present held to be the custom "throughout a very large portion of the area to which the Bill applies." If they will ascertain by enquiry the total number of holdings transferred from one family to another within a certain period, and compare it with the number transferred by sale or bequest, they shall find that the latter class of transfers bears a very small proportion to the former, and that the provision would be a novelty as far as the majority of our districts are concerned. This proposition, which is intended to make a substantial addition to the privileges of the ryots by taking away something equally substantial from the rights now enjoyed by the landlords, has already been discussed a good deal by the public both from a landlord and a ryot's point of view. Whether this new right will practically benefit the ryots or not, it is beyond my province to discuss here. But, if this clause be passed into law, (1) the landlords shall be deprived of the power they now have to keep new hostile tenants out of their properties; (2) the income they now derive from the nuzzurs which they get by re-letting out the profitable abandoned holdings shall be entirely lost to them, as all such holdings then shall be sold and not given up by their holders; (3) a lot of unprofitable holdings, which nobody would care to buy, shall come back to the landlord's hands and remain there, thus depriving them of a portion of their income from rents. Such holdings do come to their hands often, but now the better class of them come also; and by breaking up the old holdings when necessary, and forming new ones comprised of good and bad plots, a landlord can almost always let out every inch of his property, which advantage he shall be deprived of hereafter. The following five sections certainly enable a landlord to meet inconvenience No. 1 if he be a rich man and capable of buying up his tenants whenever they might be disposed to sell away their holdings, but not otherwise, while Nos. 2 and 3, as I have shown above, would surely bring heavy pecuniary losses to the landlord class. When this question was originally taken up by Government, it proposed to give to the landlords facilities for the speedy realization of their due and a law to ensure fair enhancements of their rents as compensations for this new right which would be given to the ryots at the landlord's expense; but, as this Bill does not intend to give them the two advantages named above in a way likely to better their present position, I must very respectfully, but strongly, object to this new measure.

CHAPTER VI, SUB-CHAPTERS A, B, C, D, AND E.

9. I take up all these sub-chapters together, in order to be able to show in a convenient way my reasons for the additions and alterations I am going to propose to some of their sections which give the rules as to how the money-rents of occupancy-rights shall be settled by Government officers and, in cases of amicable enhancements, the limits which the law shall not allow the rents to exceed. Act X of 1859 virtually made the occupancy-ryots co-proprietors with the landlords, and this Bill proposes to confer upon them (the tenants) what little is now wanting to make that right complete. If, after having brought things to this state, the legislators do not say definitely what is to be the share of each party in the income derived from the land, or at least how far one party can advance and the other recede, solely because the existing rents are either lower or higher than that share of the produce from the soil, it is only natural they shall quarrel; and, if the

law would not give the landlords what in fairness they ought to get, and what they used to get not many years ago, it is quite as natural that, as long as they exist, they shall try to secure their fair share by means other than the law, specially when it is seen that the law-abiding are in a worse plight than the less scrupulous. If the legislature, or rather the Government, does not want that the rents of the occupancy-ryots should be enhanced, it is better to say so at once and in plain words than to hold out hopes to the landlords of better things and then to deny them the fulfilment. The High Court ruling laid down in *Thakurani Das'* case, and based upon the existing law, has been universally condemned as unworkable for the purpose of restoring even that proportion which the rent bore to the gross produce of the soil before the time the prices of produce rose, and, therefore, it has always been cried against by the landlords as unfair to them. If our rulers did not know this before, they know it very well now, from the letters and notes submitted to them by persons having practical experience on the subject since the publication of the Rent Commission's Report and Bill; and I fail to make out why, after this knowledge, the Government should persist, as it does in this Bill, to lay down this case-law as the rule to be observed by rate-table makers and courts to determine what enhancements of the rents of occupancy-ryots should be allowed. When rents are paid in kind, as far as I am aware, they are everywhere adjusted now according to defined shares of the gross income derived from the land; and everybody, even the Government, has acknowledged that a certain share of the gross produce should be the limit beyond which money-rents also must not be enhanced; but I cannot see why, Government should hesitate to allow an enhancement up to that share of the gross produce simply because of the existing rent being below it; and this is the law for which the landlords have always been petitioning. Some of the friends of the ryots object to this principle of enhancement on the grounds that it will raise the rents very high all on a sudden, and that, because of the existence now of a difference in the shares, or rather in the proportions, of the rent with the gross produce in the different tracts of this province, any definite share, if fixed by law, would be unfair. Now, this Bill provides that the enhanced rent shall not be more than double the former rent; and, from my personal experience in the zamindari business, I can say that this rule is often followed in amicable enhancements; and not in a few cases of individual jamabandis the enhanced rents go up to that maximum. I therefore think this provision, with that about ten years' rest, meets the first objection. In regard to the second, I fail to see its force, as it can be proved by historical evidence that in old times the rents bore in every part of the province a uniform proportion to the gross average produce of the soil, and our laws have only latterly created the difference. I do not therefore see what harm can there be if after some more years the porportion be uniform again, the rights of the landlords as also of the occupancy-ryots being the same everywhere throughout the province. Then comes the question, what should that share of the gross produce be up to which the landlords shall claim enhancement and no further? The Rent Commission, of which the declared friends of the royts were the prominent members, proposed that rents should not be allowed to go beyond a fourth share of the gross produce; but the landlords have been claiming a higher share, because they are fully entitled to what the Government and they themselves were receiving at the time of the Permanent Settlement, when the Government made over to them its rights to the future increase of the income from the land for a fixed revenue; and these shares together come up to very near three-fifths of the gross produce (*vide* the Fifth Report from the Select Committee on the Affairs of the East India Company, Vol. I, page 18). However, I believe in regard to staple crops they would now gladly accept even the fourth share of the gross produce of the soil, in order to avoid the worse fate proposed for them by this Bill, if they are allowed to enchance the rent up to that share where it is less because it is less. Concerning special crops, to grow which it is necessary for the ryot to undergo more than ordinary labour and expense, I think the landlords should be content to accept a much smaller share of the gross produce, say, one-sixth. With regard to the safeguard that the enhanced rents shall not on any one occasion be more than double the existing rent, I have already said that in amicable enhancements this rule is generally followed now; but cannot see why this Bill declares that in future, in the case of an amicable enhancement, this maximum should be reduced to six annas per rupee of the former rent. If the tenant be expected to feel no great hardship to pay double after an expensive law-suit, why should it be considered hard for him to pay the same amount of rent when he has incurred that expense; and I fail to see why a landlord, because he feels disinclined to go to court against his tenants, should be denied the advantages which the Government wants to give to his more litigious brother. As far as I can see, the result of this law would be to drag into court friendly landlords and tenants in spite of their will, and to subject them to perfectly unnecessary expenses for getting settled what they were ready to settle and they would have settled amongst themselves but for this law. About the other provision mentioned in section 59, sub-section 2, that the Revenue Officer shall not register the contract, without which there can be no amicable enhancement, before he is satisfied that the enhanced rent has not exceeded that share of the gross produce beyond which enhancements must not go, I admit the reasonableness of a check against the *jama* exceeding the limits fixed by law even by an amicable enhancement, but the question is whether that purpose cannot be equally served by adding another sub-section authorizing the tenant, in case the landlord refuses to correct the mistake, to petition the civil court, within one year of the execution of the contract, to declare it null and void, if the amicably enhanced rent should be found to exceed the share of the gross produce fixed by the law as the limit to enhancement. The provision as it stands will make amicable enhancement simply impossible, for it will take a long time and a good deal of bother to satisfy the registering officer that the enhanced *jama* has

not exceeded the share of the gross produce of the holding up to which the landlord is entitled to enhance, especially if the holding be situated in a part of the country for which no Revenue Officer has prepared a Table; and everybody who has any practical experience of this business knows that a tenant would not stand all this bother and loss of time in order to be bound to pay a higher rent for the benefit of his landlord. If Government should feel disposed to adopt the principle of shares in regulating enhancements, I think abatements should also in fairness be regulated according to that principle. I mean an occupancy-ryot should be entitled to an abatement of his rent to a certain share of the gross produce of his holding below which rents shall not be abated because the rent exceeds that share. Now, what that share should be below which there shall be no abatement, I have already mentioned that, according to the Fifth Report from the Select Committee on the Affairs of the East India Company (Vol. I, page 18), the ryot's share at the time of the Permanent Settlement was two-fifths of the gross produce of the soil, while Elphinstone, in his History of India (page 17), says, "a country is reckoned moderately assessed where he (the Sovereign) takes only one-third." and again, in page 475, when treating of the revenue-system of Akbar, he says, on the authority of the Ayen-i-Akbari, "the land was divided into three classes, according to its fertility, the amount of each sort of produce that a *bigha* of each class would yield was ascertained, the average of the three was assumed as the produce of a *bigha*, and one-third of that produce formed the Government demand." Of course the remaining two-thirds were left to be shared by the ryots and the zamindars, of whose (the latter's) existence at that time there are proofs. I therefore believe that nobody can call it unfair if ryots were allowed to claim an abatement down to one-third share of the gross produce in staple crop and one-sixth in special crops, but not lower, if the rents exceeded that share of the gross income of their holdings. Before I conclude my remarks on these sub-chapters, I must respectfully enter my protest against the new proposition in section 79, sub-section (2), as. in the present state of the official feeling towards the landlords, there cannot be two opinions that the discretion will be exercised against that class. For these reasons I propose that—

In section 59, sub-section (2), the words "six annas per rupee greater," in lines 3 and 4, be omitted, and replaced by the word "double."

The words in this sub-section, from "or more" in the 4th line to "the harvest time," be omitted, and another sub-section added to this section to enable an occupancy-ryot to petition the civil court, within one year of the execution of the contract, to declare it null and void, if he find that the *jama* as amicably enhanced exceeds the fourth share of the gross produce of his holding, and the landlord declines to cancel the contract amicably when asked to do so.

In section 63, clause (6), the words from "or the" in the first line to "equitably" in the second be replaced by the words "of rent which according to one-fourth of the gross produce &c."

The whole of section 64 with the proviso be omitted.

In section 74, sub-section (1), the words "on one or more of the following grounds, namely," at the foot of this sub-section, be replaced by the words "of any land on the ground that it is below one-fourth share of the gross produce of such land;" and the grounds (1), (2) and (3), with illustrations of ground (1), be omitted.

In connection with illustration (*b*), I here beg to mention that, in my zamindari experience, I have never known a ryot receiving a reduction of rent because some ancestor of his held the jote at the time of the Permanent Settlement; the *hajats*, as these reductions are called in my part of the country, are only given to the *pradhans*, or headmen, according to their status in the village, or for services their families have done to the landlord's family.

In section 75, the words "the 2nd or 3rd of the grounds," in lines 1 and 2, be replaced by the words "the ground." In the same section, clause (*c*), the proviso be omitted.

In clause (*d*), the words "one-fifth," in the second line, be replaced by the words "one-fourth."

A separate section be inserted after this to the effect that nothing in this chapter shall debar a ryot from obtaining a reduction of rent from that at the prevailing rate of the village to which his family is entitled.

In section 79, sub-section (1), the words from "either" in line 5 to the word "namely" in line 7 be replaced by the words "his horticultural or agricultural lands, on the ground that, for causes beyond his control, the fertility and the prices of produce having fallen, his rents have become higher than one-third of the gross produce of such lands;"

the grounds (*a*) and (*b*) be omitted;

and in sub-section (2), the words "it thinks fair and equitable" at the foot be replaced by the words "would make it equal or as near as possible to one-third of the gross produce of the land."

10. *Section 93, sub-section (2), clause (b), and section 119.*—These are proposals to virtually deprive the landlords of the right they have always possessed to eject at their will a tenant who has not acquired the right of occupancy. They limit the enhancement of the rent of a ryot of this class to five-sixteenths of the gross produce, and give him the privilege of throwing up his holding and obtaining a heavy compensation if he did not choose to pay an enhancement within that limit, even if that increase were to make the rent equal to what is paid by an occupancy-ryot of the village. These provisions are, in my humble opinion, very unjust, and therefore I must respectfully but strongly protest against them.

11. *Section 96, sub-section (1), clause (a).*—The third ground of enhancement of the rents of occupancy-ryots according to Act VIII of 1869 (B.C.) is that "the quantity of land held

by the ryot has been proved by measurement to be greater than the quantity for which rent has been previously paid by him." This clause, therefore, though it empowers the landlord to successfully claim an enhancement if since the last measurement a ryot has added to his holding lands which then did not belong to it, does not meet cases where the holdings were under-measured at the last *jareep* (measurement). This alteration of our present Statute was proposed in section 22, illustration (*c*) of ground (2) of the Rent Commission's Bill and the same of the Bengal Government Bill, and it was strongly objected to by the public on both these occasions. If Government would only consider this matter thoroughly, they will be able to see that, unless it was under-measured at the former survey, a holding cannot possibly be found in the subsequent one to exceed the area it was put down for last time, if no new lands have been added to it since, and if the two measurements are done by the same standard poles or chains. They will also be able to see that the lands could not have been under-measured without either a mistake or a collusion between the ryots and the landlord's amin (surveyor). Under these circumstances, this provision will do a gross injustice to the landlords, who are as much entitled to protection as the occupancy-ryots, by encouraging the tenantry to commit crime and awarding to them rent-free all lands of the rents of which they have been able to defraud their landlords for a certain number of years. I do not know what have induced Government to propose this alteration in our present Statute, which is supported by the custom of the country and the High Court ruling in the case of *Prankissen Bagchee* versus *Monomohini Dassi* (XVII W. R., page 34); but I know that, unlike the *mukari* tenures or lands conveyed by sale, the occupancy and the other ryoti holdings have not hitherto been carefully measured as a rule, because, not expecting an alteration in the existing law such as is now proposed, the landlords have not hitherto cared to spend a lot of money for this purpose, and that therefore this present, and I venture to say unjust, proposition, coming, as it does, without a previous warning, will, if passed into law, be very injurious to the landlords; and as such I most respectfully but very strongly protest against it.

12. *Section 103, sub-section (1), clause (a).*—This is another proposal to alter the existing law to the disadvantage of the landlord. According to the present law, before he is allowed to deposit his rent, a tenant has got to swear that he offered to pay it to the landlord's agent and he (the agent) has refused to accept the money. The fear of being prosecuted for swearing falsely has hitherto obliged many a hostile tenant to pay his rent to the tahsildar; but, if this proposal should become law, that wholesome fear would be removed, and every hostile tenant will deposit his rent into Court just in order to harass the landlord. Anybody acquainted with the practice of our Courts can well conceive the costs, trouble and annoyance a landlord must go through to take out the rents the tenants have deposited for him. When the landlord's agent is in the village, and he often is there, the trouble of going to him or sending a man to him to offer rents is little or nothing; and, even if he be away, the tenant cannot undergo any great trouble, loss or risk in offering payment of his rent to the landlord himself, now that the post-office money-order system can be taken advantage of almost everywhere. Under these circumstances I beg Government to let the law remain as it is.

13. *Section 140.*—According to our custom, a holding is considered abandoned if the tenant leave his village or the landlord's estate for good even if there be no arrears of rent due from him. This custom, supported as it is by several High Court rulings, enables the landlord to make timely arrangements for the cultivation of the holding, and saves him from any loss of rent, unless the holding be such as nobody would care to take up. But if this section should become law, a landlord must lose one whole year's rent before he will gain the right of re-letting the holding, for which he shall have to pay the revenue or the rent to the superior proprietor all the same; and everybody who has any experience in zamindari work knows quite well that it is hopeless ever to realise this arrear from the old tenant who has abandoned his holding. For these reasons, I most humbly protest against this proposal.

14. *Section 151, sub-section (2), clause (a).*—I propose the insertion of the words "or a single landlord" after the word "landlords" in the second line of this clause, because there is many a landlord who singly owns a large tract of the country, and who, without an alteration such as I purpose, would not be benefited by this clause, though he may have a very large number of tenants to deal with.

15. *Section 164, sub-section (2), clauses (a) and (b).*—These two clauses are superfluous after the provisions made in section 151, (sub-section (2), clauses (*a*) and (*b*), and I therefore think they should be omitted.

16. *Section 166.*—As a rule, a landlord has recourse to distraint only when he sees that the realization of his dues would be very difficult after the tenant is able to sell away the crops or take them beyond reach of the landlord, and in a great many cases it is very difficult, especially in regard to *boro* or such other holdings, the area of which is determined after the crop is ready, when the tenants are *pykasthas* paying their whole year's rent in one instalment, before they go away with their profits to their distant homes, about which the landlords know nothing. This section, therefore, cannot and shall not help the landlord to realize his dues, unless there be a provision in the law binding the tenant under penalties neither to sell away the crops nor to remove them beyond the village or estate without the written consent of the landlord till one month is over after the instalments on those crops fall due. The crops are now the only security a landlord has for the realization of his dues, and I must object to the proposed alteration of our existing law without a provision such as I mention.

17. *Section 186.*—A landlord generally living away fom his estate has no opportunity of knowing whether the rents by the receipt of which he has been benefited have been realized by his *tahsildar* in the ordinary way or by illegal distraint. I believe therefore that, if this section should pass into law, it shall put into difficulties many an innocent landlord. Besides,

no zamindari tahsildar, after the preceding section becomes law, would care to risk a punishment for criminal trespass in order to do a small turn for his employer; so I do not believe this section is necessary to prevent illegal distraint. Under these circumstances, I beg Government to omit this new section altogether.

18. *Section 207.*—I object to this section, because, if it becomes law, I believe it will very probably increase litigation to an alarming extent, and thereby injure both the landlords and the tenants. Opportunities have already been given in the proceedings for the adjustment of rents in the ordinary way, and in section 151, sub-section (2), clause (*a*) of this Bill, for the determination of this question; and I cannot see any necessity for the tenant to get his status determined, except when an enchancement-suit has been instituted against him by his landlord. Besides, a very large number of pattàs and kabuliyats have been executed within the last few years, and the number is daily increasing, as a return from the registration-offices will show; so I am sure the tenants cannot possibly be injured by the omission of the sub-chapter (C) of Chapter XIV.

19. *Section 208, sub-section (1), clause (c).*—I admit that the hardship would be very great if the holder of a tenure mentioned in this clause be made liable to ejectment when his landlord is sold up for arrears of rent; but, unless the legislature provide in such cases for an enhancement of rent of the lands comprising the tenure, the superior landlord's interest cannot be protected; because otherwise there will be no check upon the creation of incumbrances such as is mentioned in this clause. As long, therefore, as Government would not make a provision, uch as I have mentioned above, for the protection of the rights and interests of the superior andlords in these cases, I must humbly protest against this clause.

No. 822T.-R, dated the 15th September, 1883.

From—C. W. BOLTON, Esq., Under Secretary to the Government of Bengal,

To—The Secretary to the Government of India, Legislative Department.

In continuation of my letter No. 686T.-R., dated 3rd September 1883, I am directed to submit, for the information of His Excellency the Governor General in Council, the accompanying copies of papers* received from the British Indian Association on the subject of the Bengal Tenancy Bill, 1883.

* Letter No. 92, dated the 17th August 1883, with enclosures.

No. 92, dated Calcutta, the 17th August, 1883.

From—The HON'BLE KRISTODAS PAL, C.I.E., Secy. to the British Indian Association,

To—The Under-Secy. to the Government of Bengal, Revenue Department.

I have the honour, by desire of the Committee of the British Indian Association, to acknowledge the receipt of your letter No. 967A.—366L.R., dated 21st July last, calling attention to Mr. Under-Secretary Bayley's letter No. 967—366L.R., dated 19th March last, inviting the opinion of the Association on the provisions of the Bengal Tenancy Bill.

2. In reply, I am desired to state that on receipt of Mr. Bayley's letter, the Association invited a meeting of the Central Committee of Landholders appointed by it to consider it, and to report upon the Bill. The Central Committee issued a circular in English and Bengali (copies hereto annexed) to zamindars and others interested in land, inviting answers to questions therein set forth.

3. The Central Committee have not yet received answers from all those whom they have addressed on the subject, and considering the vast magnitude of the interests involved, the Association solicit permission of His Honour the Lieutenant-Governor to defer their report upon the Bill till a fair representation of the views of the different districts upon it is received.

4. In the meantime the Central Committee have addressed a petition to both Houses of Parliament, setting forth their objections to the leading principles of the Bill, to which the Association fully subscribe. A copy of the petition is herewith submitted for the information and consideration of His Honour the Lieutenant-Governor and the Government of India.

5. The Central Committee have appointed a Sub-Committee of their body to consider the detailed provisions of the Bill; the Sub-Committee have submitted their report with notes containing their opinion on the provisions of the Bill. Not to lose time, I forward a copy of the notes for submission to His Honour the Lieutenant-Governor. These notes I request may not be accepted as the final conclusions of the Association, which will be communicated to you when the Central Committee will come to a decision on the subject.

6. I have stated above that the Central Committee have not yet received answers to their circular from all those to whom they have addressed it. The Association fear that the agitation of the public mind with other matters has diverted attention from the Bengal Tenancy Bill, and that hence the delay complained of. The Association would therefore solicit that His Honour the Lieutenant-Governor would be pleased to recommend to His Excellency the Viceroy and Governor General in Council to defer the consideration of the Bill till the public are relieved of these other matters, so as to be able to give undivided attention to this momentous subject.

Circular issued by the Central Committee of the British Indian Association to zemindars and others, dated the 15th May 1883.

Dear Sir—With reference to the Bengal Tenancy Bill introduced into the Governor-General's Council for making Laws and Regulations, I have the honour, by desire of the Central

Committee of Landholders of Bengal and Behar, to invite your opinion on the provisions of the Bill and on the following questions in connection therewith.

1. Have you got measurement papers of all your estates and taluks, showing the areas of all khamar lands in all your villages?

2. Would there be any practical difficulty to the area of khamar lands being fixed for ever after enquiry and reckoning all other lands as ryoti lands as the Bill proposes to do (section 6), and do you approve of the principle of this section?

3. Are you aware of lasting distinction being observed in the lands of any village in your estate, denoting that certain plots or tracts are permanently appropriated to the exclusive use of all or any class of ryots in the village, and that certain other tracts, whether occupied or not by ryots, are similarly reserved as the zamindar's khamar?

4. Having regard to lands which are currently called ryoti and khamar, are you aware of any custom, usage, or tradition which disentitles the zamindar to convert into khamar any unoccupied ryoti land or entitles any ryot to claim the lease of lands left vacant by any of his fellow-ryots? Have you ever known of any such claim being set up or any allowance being made by the zamindar in satisfaction of such claim?

5. Do you hold any land which is specifically appropriated as the zamindar's malikhana or moshaira? And have you not—if at all—always enjoyed the malikhana as an allowance upon the aggregate rental of estate?

6. Do you as zamindar ever claim any higher proprietary right in respect of unoccupied khamar than in respect of unoccupied ryoti land?

7. What has been in your district the effect of the rule of 20 years' presumption in suits for enhancement of rent? How will it be modified by the change which the Bill proposes to introduce by allowing uniform payment of rent to be proved for any period of 20 years (sections 15 and 20)?

8. In the case of tenures held since the Permanent Settlement, but not at a fixed rent, the Bill requires the landholders' "right to enhance" to be proved in every suit for enhancement of rent (section 18). How would you prove such a right?

9. Section 21 provides that the rent of a tenure may be enhanced up to the limit of the customary rate, but if such rate cannot be determined the rent may be enhanced so as to leave the ryoti tenure-holder a profit of from 10 to 30 per cent. on his gross rents *minus* the costs of collection. How would such a rule operate in your district?

10. The Bill proposes to make all tenures, the rents of which are fixed, saleable and heritable like other immovable property (section 25). The provision contained in section 51, which gives the landholder a right of pre-emption, does not apply to such tenures. Is the proposal liable to any objection?

11. Consider the sections from 27 to 35, and say whether these would make adequate provisions for the registry of transfers of ryoti holdings by succession, sale, gift, and otherwise?

12 How would the rule for acquiring right of occupancy contained in section 45 operate in your district and affect your rights?

13. Section 46 provides that, unless a ryot has ceased by desertion or otherwise, to hold for at least one year his right to the land shall not cease How would such a rule affect your interests?

Consider the case of two applicants for such land; one offering a certain bonus on condition the rent-rate is the one hitherto prevalent and the other offering no bonus, but in its stead an increment over the prevailing rate. Call the first as one of class A and the second of Class B.

Does it not often happen that the offer of B is more profitable to you than that of A? And does it always happen that the offer of B is suicidal to his own interest?

Do you not think that the zemindars and ryots will both suffer in the long run by discouraging or prohibiting offers like that of B?

What do you think will be the ultimate condition of people in the circumstances of B? Do you not think that the provisions in the Bill will for ever prevent B from growing into the circumstances of A, and that the former will eventually have to work as day-labourers under A?

14. The Bill allows right of occupancy to grow in respect of khamar lands unless the contrary is provided by written agreement (section 48). Is this objectionable?

15. The Bill prohibits ryoti land being ever placed at the disposal of the zemindar so that it might at his option be let out to tenants-at-will, or at rates agreed to by the applicant, but above the limits prescribed by law. Is such restriction consistent with any custom or usage that you know of? Is it safe for the adequate realization of dues and of the Government revenues?

16. Would the right of pre-emption given to landholders by sections 51 and 53 remove the objections to the saleability of all occupancy holdings?

17. Section 56 provides that when the land of occupancy ryots comes to the khas possession of the landholder, the person to whom such land is let will get it with a right of occupancy. Do you think this objectionable; and if so on what grounds?

18. Section 59 provides that the rent of occupancy ryot (not even that of land which has come to the khas possession of the landholder) (section 61) shall not be enhanced unless by a written contract approved of by a revenue officer, who shall see that the amount of additional rent is not more than 6 annas in the rupee, and that the enhanced rent is not greater than one-fifth of the annual value of the gross produce of the land. Do you think this limitation on the freedom of contract necessary or desirable?

19. Do you see any objection to the rates of rent being determined by the executive, instead of by the judicial authorities, as provided in Chapter VI? Do you think the principles on which tables of rates are directed to be prepared just and reasonable, and do you think the procedure suggested will remove practical difficulties in the way of enhancement of rent?

20. Section 81 restricts the landholder's share of the produce in all cases where rent is paid in kind to one-half. Would this rule operate to reduce existing rents?

21. Would the rule as to instalments of rent provided in section 97 check litigation on the point and simplify the decision of rent suits?

22. Section 119 limits the rent in any case to five-sixteenths of the value of the produce. Is there any objection to the proposed restriction?

23. Consider the provisions regarding distraint contained in section 166, and say whether they would serve the purposes of the existing law on the subject?

24. The Bill proposes to allow no appeals in suits for arrears of rent and some other suits of which the value does not exceed Rs. 50. Is this desirable?

25. What remarks have you to offer on the provisions of chapter VIII regarding ordinary ryots and compensation for improvements, and also for disturbance?

26. Is transferability of occupancy tenures recognized in your estates or district; if it is recognized, does it require the consent of the landlord?

27. Do you consider the present procedure for the recovery of rent dilatory and inconvenient? If so, what modification would you suggest?

28. Do you hold that the same law for the settlement and realization of rent should apply to Government and private estates? If so, what are your reasons?

A copy of the Bengali translation of the Bill is forwarded herewith for ready reference. The Committee will feel obliged if you will favour them with your opinion by the 15th day of June next.

Your faithfully,
KRISTODAS PAL,
Secretary.

BRITISH INDIAN ASSOCIATION ROOMS;
No. 18, British Indian Street,
The 15th May, 1883.

To the Honourable the Commons of the United Kingdom of Great Britain and Ireland in Parliament assembled.

The Petition of the undersigned Members of the Central Committee of Landholders of Bengal and Behar, meeting in Calcutta, on behalf of themselves and of their fellow-landholders in the Bengal Provinces in British India,

HUMBLY SHEWETH,—That Your Petitioners are filled with great anxiety, apprehension, and alarm at the introduction into the Council of His Excellency the Viceroy and Governor General for making Laws and Regulations of a Bill entitled the Bengal Tenancy Bill, the manifest tendency of which seems to be to revolutionise the present relations between landlord and tenant in the provinces of Bengal and Behar, to redistribute landed property on a new and inequitable basis, and to fetter the freedom of action of all classes interested in agriculture by driving them at almost every step of their mutual transactions to Courts of Law and fiscal officers, and foster dispute, litigation, and animosities in lieu of peace, harmony, and good-will among them.

2. That Your Petitioners do not wish to trouble Your Honourable House with the history of that solemn covenant of the State, entitled the permanent settlement, which the late Honourable East India Company, with the sanction of the Imperial Parliament and the Crown, concluded with the zemindars as "actual proprietors of the soil," under which the Government transferred its rights in the land to the said proprietors in consideration of revenue assessed at $\frac{10}{11}$ths of the gross rental and fixed in perpetuity, nor with an account of the advantages—financial, economic, social, material and political—which both the State and the people have derived from the operation of that settlement for the last ninety years.

3. That, in consequence of the exorbitant assessment of the revenue under the permanent settlement, no vestiges of most of the old zemindars with whom the covenant was made now exist; the land has been divided and sub-divided and purchased at the full market value by capitalists as a legitimate investment of capital in thorough good faith and in perfect reliance upon the guarantees of rights and interests given by the permanent settlement regulations.

4. That, until 1859, those guarantees had always been maintained inviolate, but in that year a law Act (X of 1859) was passed conferring new rights upon tenants under arbitrary and fanciful rules of prescription, and seriously clogging the rights of the landlord with regard to tenancy and settlement of rent, and imposing grave difficulties in the way of recovery of rent.

5. That although Act X of 1859 is a direct infringement of the permanent settlement regulations, still it has been in operation for nearly a quarter of a century, and rights have grown up under it, which cannot now be fairly or equitably abrogated. Under it a large majority of the tenants have acquired rights of occupancy or fixity of tenure, rack-renting, which had hardly ever prevailed, has been altogether prevented, and even free sale of occupancy holdings has been recognised in some parts of the country with the consent of the landlord. So far Act X of 1859 has fulfilled its great object in improving the position of the tenant and secur-

ing his rights; but the landlord has not only lost some of his ancient and guaranteed rights, but has also been deprived of the ordinary facility of settling and realizing the rent due to him, though he is burdened with the obligation of paying in the Government revenue by the sunset of the quarter-day, the expiration of which renders his estate liable to peremptory sale for default.

6. That in addition to the payment of the Government revenue, the landlords or zamindars are required under serious penalty to collect from tenants for the Government the road and the public-works' cesses without any remuneration, and to make good all losses that arise from failures in collection on account of default due to bad seasons and other causes not attributable to them; and that in consideration of this service they were promised by three successive Lieutenant-Governors of Bengal, Sir George Campbell, Sir Richard Temple, and Sir Ashley Eden, a simplified procedure for the recovery of rent. Some Bills had been introduced into the Bengal Legislative Council towards that end; but they were abandoned with a view to a general revision of the Rent-law.

7. That a Commission, consisting chiefly of Government officers, was subsequently appointed to report on the general revision of the Rent-law, but that Commission, without taking any evidence, or examining the parties interested as to the necessity of the amendment of the law, its direction, extent and scope, submitted an elaborate but extremely one-sided scheme, upon which is primarily based the present Bill. Some provisions of a highly objectionable character have also been introduced into the Bill, which had not been recommended even by the Rent Commission.

8. That one unfortunate incident has practically barred constitutional redress in respect to this Bill as far as the Legislature of this country is concerned. Your petitioners gratefully acknowledge that the fullest opportunity had been given to the public to discuss the original draft of the Bill at its initiatory stage before the Bengal Government, but neither when material alterations and additions were made to it by the Bengal Government, nor when it was finally laid before the Government of India, the public were allowed any such opportunity; on the contrary, they were positively refused access to it; and the sanction of the Right Honourable the Secretary of State for India was taken without giving the public or the parties interested the slightest opportunity of knowing or discussing its contents. Under the Indian Constitution Her Majesty's Secretary of State is the highest controlling authority, and all laws passed by the Indian Legislature are liable to be revised and disallowed by him; but when his permission for a public measure is obtained beforehand, without previous public discussion, practically the public judgment is anticipated and barred. The leading principles of the present Bill having been already sanctioned by Her Majesty's Secretary of State, its formal passage through the Indian Legislative Council will necessarily be a formality, and as the Government has a standing majority in that Council, the aggrieved can hardly hope for a fair hearing in matters which are already matters of foregone conclusion.

9. That the Bill under notice is so voluminous and so comprehensive that it would be tedious to approach Your Honourable House with a detailed criticism on it. Your petitioners would, therefore, crave permission to draw attention to the following summary of the leading principles of the Bill, to the innovations which it proposes to introduce, and to its general policy and tendency:—

I. The Bill proposes to effect a redistribution of land by making an allotment of it in a manner which neither past history nor present facts justify. It declares that all lands, except such as are in the private possession of the landlord in respect of which he may prove 12 years' continuous occupation, shall be regarded, from the date of the introduction of the Bill, as the specific property or portion of the tenant class for habitation and cultivation, along with various incidental rights; that at the discretion of Government the lands may be surveyed and demarcated at the expense of both landlord and tenant; that conflicting claims to such lands shall be the subject of a summary investigation; and that the landlord, even in case of relinquishment of a tenancy, or of its purchase by him, if he wishes to let it, shall be bound to re-let it to a new tenant at the old rate and conditions, including permanent occupancy right. This is wholly an innovation, and makes a serious encroachment upon the proprietory rights of the landlord. It is in direct antagonism with past history, for when the Permanent Settlement was concluded, it was the land which sought the tenant, and not the tenant who sought the land; and this was particularly the case in the distribution of waste lands, which had been made over to the landlords or zemindars by way of compensation for the ruinous assessment of the settlement, and the proprietary right from the reclaimed portion of which is now being taken away from them. The land has thus no such characteristic attached to it as now proposed, and the landlord was in no way fettered in the mode of the settlement of his estate. The proposed provision will not only deprive the landlord of his inherent right of re-entering upon land which a tenant may relinquish or which may lapse on the expiration of a lease, but will also give rise to serious dispute, misunderstanding and litigation between landlord and tenant in the establishment of their claims to different classes of lands.

II. At the time of the Permanent Settlement the resident hereditary tenant had fixity of tenure; custom had recognized that right, but no period had been fixed for the accrual of the right; by Act X 1859, 12 years' continuous possession was declared to be the basis of occupancy right; and this provision was allowed retrospective effect; accordingly a squatter by mere efflux of 12 years' time, acquired a right of occupancy, to the detriment of the rights of the actual proprietors of the soil guaranteed by the Permanent Settlement. This is the interpretation of that law by some of the highest judicial authorities, notably Sir Barnes Peacock,

late Chief Justice of the Bengal High Court, and now a Member of Her Majesty's Privy Council, and Sir Richard Garth, the present Chief Justice of Bengal; but this innovation has been the law of the land for nearly a quarter of a century, and, although it involves gross injustice to your petitioners and the class they represent, they would submit to it as they have hitherto done. By far the largest number of tenants in Bengal have acquired a right of occupancy, and they do not wish to take it away. They, however, submit that it would be the height of injustice if the right of occupancy be further extended in the manner proposed in this Bill. It is now declared that any tenant, if he holds any land in any village or estate for twelve years consecutively, though the land so held by him at different times may have been different, shall be deemed to have become a settled tenant of that village or estate, and to have acquired the right of occupancy, though the last plot, in which the right will accrue, may have been held for a year or even for a day, and may exceed ten times the quantity previously held by him. The right of occupancy is also extended to tenants of the private domains of the landlord, unless there be a lease for a fixed period. Even as regards tenants-at-will, the provisions are so fenced with restrictions by providing compensation for disturbance, that they will virtually become tenants with permanent occupancy right. The extension of the occupancy or tenant right in this arbitrary manner, without any compensation to the landlord, will be a serious encroachment upon his proprietary rights, and will be a deliberate infraction of the guarantees under which he has invested his capital in land. Indeed, it will have practically the effect of redistributing property in land on a new basis.

III. The tenant-right in Bengal, wherever it has existed, has always been heritable, but not transferable. Even Act X of 1859 did not make it transferable. But it has become transferable in some parts of the country with the mutual consent of the landlord and tenant. The growth of this custom, if desirable, may fairly be left to the natural operation of economic laws. But to force it by a legislative enactment would be alike detrimental to the proprietary rights of the landlord and to the material well-being of the tenant. The landlord will then cease to be the lord of the soil, which he has inherited or purchased by paying market value for it; he will lose his inherent and just right of chosing his own tenant; although directly liable to the State for revenue under the stern sunset law, by losing his hold upon his tenantry under this process of transfer of tenant-right without his consent, he will be driven to despair in the collection of his rent, and consequently to ruin. On the other hand, the tenant, by acquiring the new freedom of sale, will from excessive Government taxation, adverse seasons, thriftlessness and other causes, find a facility which will inevitably encompass his ruin, as has been the case in some of the temporarily-settled districts of the country where the transferibility of the tenant-right is recognized, and where special laws have become necessary for the relief of the distressed agriculturists. Small capitalists, mostly money-lenders, will take the place of the present agriculturists, who will be reduced to mere day-laborers on their expropriated lands.

IV. With a view to counteract the evils to the landlord referred to above, the Bill gives him the right of pre-emption in case of the sale of a tenancy, but under such restrictious as to render it nugatory. In the first place, if the landlord wishes to buy it in, he must pay the full market-value for it; that is to say, he must pay a fine, as it were, for exercising his proprietary right, and if he cannot agree with the tenant as to the price, he must go to court. Even if he purchases it, he will not be allowed the same rights that will be accorded to an ordinary purchaser. After purchasing it if he chooses to let it again, he must re-let it at the old rent to a new-comer, who will *ipso facto* acquire the right of occupancy. An ordinary purchaser will not be bound to accord that right to his sub-tenant. So that a capitalist, who purchases an estate with a certain calculation of return, will get no *quid pro quo* for the sums he will have to lay out again for the purchase of tenancies, simply because the tenant is invested with a new right of transferability of his holding, without of course paying any consideration for it. Supposing that tenants in any large numbers choose to sell their holdings, and that other tenants choose to combine and withhold payment of rent, in order to compel the landlord to their own terms, a contingency by no means unfrequent, ruin will stare him in the face, and if he has not means, he must submit to his fate, however unmerited, through an act of the Legislature, the paramount duty of which is to give equal protection to all classes of Her Majesty's subjects.

V. The determination of rent in Bengal has been generally discretionary. It is true that there was at one time a customary rate in many parts of the country, but the custom was varied so much as by personal, local, and other considerations, that the rate was practically left to the discretion and mutual understanding of the landlord and tenant. This fact has been brought to prominence by the recent enquiries made by Government as to tables of rates prevalent in different districts. When the Permanent Settlement was made in 1793, the rate of rent, it is on record, varied from three-fourths to one-half the value of the gross produce of the land. Until a few years of the enactment of Act X of 1859, there was not much dispute between landlord and tenant about the rate of rent; the rise in the value of agricultural produce led to a demand for increased rent, and in order to bring the question of rent to a satisfactory judicial test, that Act declared that the rent shall be reasonable, fair, and equitable, and provided certain rules for the guidance of the courts. These rules, however, have proved so unworkable that the enhancement of rent through the judicial machinery has practically come to a dead-lock. The gravity of the situation was represented by the landlords to Government, and the Government promised to redress their grievance. That promise is now about to be redeemed by the retrograde step indicated in this Bill. Under this Bill the rent of an occupancy tenant shall not exceed 20 per cent. of the gross value of staple products of the land. In other words, the landlord is practically reduced to one-fifth partner of his own property with his tenant. The rent due to him represents the

shares of the Government and of himself, but this arbitrary limit will necessarily deprive him of all participation in the advantages which the progress of the country will confer upon all other classes of the community, but will always be subject to losses consequent on decadence and reverses. As regards the tenant-at-will, called in the Bill "ordinary ryot," the restrictions are so fenced round that practically there will be no enhancement of rent. In Behar, there are certain tenures called *Bhouli* tenures, analogous to *Metayer* tenures, and with regard to these the Bill actually sanctions reduction of the present rents. Thus the landlord will be practically deprived of the legitimate fruits of his capital, prudence, and good management, the enjoyment of which had been guaranteed to him by the Permanent Settlement.

VI. Contract is the basis of transactions in civilised life, the first step in advance over patriarchal habits, and essential to the success of social and moral progress. The tenant, as an agriculturist or as a member of society, is allowed perfect freedom of contract in all matters affecting him, whatever the difference in the status, intelligence and influence of the contracting parties; but this Bill declares that he shall not be competent to enter into a contract respecting his tenant-right or the rent payable by him, unless his contract for the latter is approved by a revenue officer to be appointed by Government. This denial of the ordinary rights of a citizen to the tenant was never before known in this country. On the contrary, the Legislature had repeatedly encouraged the interchange of lease between landlord and tenant. The disability imposed upon the landlord for the sake of the fancied security of the tenant is still more arbitrary, unjust and unjustifiable.

VII. The importation of foreign ideas in the regulation of the ordinary relations of life in an oriental country, for which the people are not ripe, can only lead to harm. Never in the history of this country, or at present within the British territories or in the Native States, is the practice of paying compensation to a tenant-at-will for relinquishment of his holding known or recognized. As a rule, the class of tenants called tenant-at-will have not the means of making improvements, and therefore there has never been any question of compensation for disturbance raised. This innovation will not only be a serious interference with the proprietary rights of the landlord, but will plunge both landlord and tenant into deep litigation.

VIII. This Bill will foster litigation between the landlord and tenant at every step of their transactions. The landlord's office will be transferred to the revenue office, and the landlord himself will be reduced to a mere annuitant. Whether the question be classification of land, determination of occupancy right, transferability of a tenancy, the exercise of the right of pre emption on the part of the landlord, the settlement of rent, the payment of compensation to a tenant-at-will for disturbance, or the realisation of rent, there will be at every step expensive, harassing, and, not unfrequently, demoralizing litigation. There will be no peace, no concord, no harmony, no good-will between two such important members of the community as the landlord and tenant. Such embittered relations between them, as will be the inevitable result of the proposed Bill, cannot be conducive to the true well-being of the State or society.

IX. As regards recovery of rent, the landlord had formerly power to call in the tenant to pay in his rent, failing which he could have him arrested by a simple application to the court, followed by a summary enquiry. He could attach the property of the tenant and sell it after due notice. All suits for arrears of rent were heard before all others by the civil courts, and were finally transferred to the Collector for expedition. Act X of 1859 took away from the landlord the power of calling in his tenant. At first the arrear suit was triable by a revenue officer under summary procedure, but now it has been made a regular civil suit, to be tried at a heavy cost under the regular civil procedure. That result is that ordinarily a rent suit is not disposed of within three months, and not unoften many months, and that if the tenants continue to withhold rent, the landlord must either succumb, or let his estate be sold for default. It is observable that this procedure is not applicable to the State in the recovery of its dues as landlord or as guardian of minor landlords. If the State with its vast resources, unequalled influence, and immense prestige, without the terrors of a sunset law for sale of estate in case of default of revenue, deems it necessary to have recourse to a summary law for the realization of rent, how much more necessary is it for the private landlord for a like purpose? Although three successive Lieutenant-Governors of Bengal, as stated above, had promised the landlords the simplification of the procedure for the recovery of rent, still no advance has been made in this Bill in that direction.

X. On the contrary, the Bill practically minimises the only facility which the present law provides for the speedy realization of rent, *viz.*, distraint. The process of distraint is now made at every step a process of court, and by the time the court's order may be obtained the crops may be removed or disposed of, and the landlord's demand thus defeated. As the Bill has been framed, the landlord will, on the one hand, be made to forfeit his ancient, substantial, and valuable rights, but will, on the other, derive no benefit from it.

XI. Nor will the *boná fide* cultivator derive material benefit from the Bill. If he holds land under a superior landlord, his rent will be 20 per cent. of the gross produce of the land, but under a subordinate holder it will be 30 per cent. of the same, or 50 per cent. more than what he will pay to the former. He will acquire occupancy right under a superior landlord, but none under a subordinate holder, the latter being himself a tenant with occupancy right. So that without fixity of tenure, freedom of sale or security of fair rent, the actual cultivator of the soil under the operation of this Bill will be reduced to the miserable lot of a poor day-labourer.

XII. And this evil will be both multiplied and aggravated, as the Bill proposes to encourage sub-letting. If there is anything in the agricultural system of Bengal, which has tended to depress the condition of the actual cultivator of the soil, it is sub-infeudation. The actual agriculturist, who constitutes the lowest link of the chain, necessarily bears the whole burden, and the more the chain will be lengthened, the worse will be the fate of the actual cultivator of the soil. The new tenure-holders, who are created by the Bill will be small proprietors, and it may be easily imagined whether small proprietors, themselves not agriculturists but absorbing agricultural profits, are more conducive to the welfare of the agricultural population than large proprietors. By-and-bye, as the capital of these small tenure-holders will increase, they will also become large proprietors. The result of the proposed Bill will, therefore, be the destruction of the present proprietors, who have either inherited or paid fair market-value for their estates, the creation of a new class of small proprietors, who will, for the most part, acquire their rights without paying for them, and the impoverishment and degradation of the actual cultivators of the soil.

Such, in brief, are the manifest tendencies of the proposed Bill, opposed to all principles of equity and fairness, to the guaranteed rights of the landlord, and to the best interests of the actual cultivators of the soil.

10. That no valid proof has been adduced shewing the necessity for this wholesale revolutionary and confiscatory legislation. The Rent Commission, which originally drafted the Bill, as already stated, did not take any evidence on the subject. No less an authority than Sir Richard Garth, the eminent Chief Justice of Bengal, says—"The Bill is calculated to deprive the landlords unjustly and unnecessarily, in my opinion, of rights which the courts of law have always considered to be their due." Indeed, the whole Bill, whether as originally framed by the Rent Commission, or subsequently revised by the Government of India, has been based on arbitrary assumptions and gross predilections. Your petitioners respectfully appeal to Your Hon'ble House to consider whether rights and interests, worth millions upon millions of pounds, and consecrated by solemn acts of the State, and ratified by the sanction of nearly a century, should be sacrificed for sentimental and fanciful considerations.

11. That, on the other hand, there is abundant testimony to show that the tenantry of both Bengal and Behar have made rapid strides in progress and prosperity unhampered by the existing land-laws. The latest and most emphatic testimony is that of Sir Ashley Eden, the late Lieutenant-Governor of Bengal. Thus, in 1877, after making a tour in the interior, he made the following remarks on the condition of the agricultural population of Bengal:—

"Great as was the progress which I knew had been made in the position of the cultivating classes, I was quite unprepared to find them occupying a position so different from that which I remember them to occupy when I first came to the country. They were then poor and oppressed, with little incentive to increase the productive powers of the soil. I find them now as prosperous, as independent and as comfortable as the peasantry, I believe, of any country in the world; well-fed, well-clothed, free to enjoy the full benefit of their labour, and able to hold their own or obtain prompt redress for any wrong."

As regards the peasantry of Behar the same high functionary, in an address to a deputation of the Behar Landholders in 1881, said:—

"I can assure you that nothing has given me greater pleasure than to notice, as I have had ample opportunities of doing, the extraordinary improvement in the condition of the people. It is made manifest in a hundred ways daily, even to the most casual observer. I hear the same story from all classes, official and non-official, and it is a matter for general congratulation.

"This improvement is due to various causes: first and foremost, to several succeeding harvests, plentiful almost beyond the recollection of the present generation, and these full harvests followed years of trial and famine; next there has been, with growing prosperity, an increase in the value of land, a *general awakening* of the cultivating classes, and an improved knowledge of their legal rights and privileges, and this has, I hope, been accompanied by a strict administration of the law. Then there has been a greater readiness on the part of landlords to recognise and affirm the rights of cultivators, and I hope that this may to some extent be due to the influence of your Association."

Surely, in the face of this strong and authoritative testimony, it cannot justly be contended that the agricultural prosperity in Bengal and Behar is impeded or hampered by the existing land-laws.

12. That the proposed Bill is ill-suited to the purposes for which it is intended is evident from the fact that the Bill is not made applicable to the State in regard to property which it holds in the capacity of a landlord. The State has a separate and summary law for the settlement and recovery of rent on its own estates. Even when it manages in trust the private estates of minors or wards under its care, it is not subject to the ordinary procedure for the realization of rent. If an enquiry be made, it will be found that the tenants of the State landlord are by no means better off in life than those of the private landlord; perhaps in many instances worse off. It is but reasonable that, *cæteris paribus*, the same land-law ought to apply equally to the State landlord and the private landlord, for surely what is done by the State ought to be regarded as the best example for the private landlord.

That in conclusion, your Petitioners pray that Your Hon'ble House will be pleased to take the above statements, facts, and reasons into consideration, and to adopt such steps as to Your Hon'ble House may seem meet to prevent the passing of the Bill under notice.

And Your Petitioners, as in duty bound, will ever pray.

Signed by the Maharaja of Burdwan, Maharaja of Durbhanga, Maharaja of Hutwa, Maharaja of Dumraon, Maharaja Rai Jotendro Mohun Tagore, Nawab Abdool Gunny, Nawab Ahasanwoola Khan Bahadoor, Maharaja Komul Krishna, Maharaja Norendra Krishna, Raja Poorno Chunder Singh, Raja Suttyanund Ghosal, Raja Promotha Nath Roy, Raja Surjyakant Acharjya Chowdhry, Raja Hurbullub Narain Sing, Raja Shyama Sunker Roy Chowdhry, Nawab Mir Mohamed Ali, Babu Joykissen Mookerjee, Babu Peary Mohun Mookerjee, Babu Bejoykissen Mookerjee, Babu Surendra Mohon Tagore, Hon'ble Doorga Churn Law, Babu Gobind Lal Seal, Babu Kali Krishno Ghose, Babu Lolita Mohun Sigdurga, Babu Kissory Mohun Gossami, Babu Rajendralala Mittra, Hon'ble Hurbans Sahai, Hon'ble Mohamed Yusuff, Babu Mohiny Mohun Roy, Babu Saligram Sing, Babu Mohesh Chunder Chowdhry, Babu Joggender Chunder Ghose, Babu Janoky Nath Roy, Babu Gobind Chunder Dutt, Babu Ram Sunkur Roy Chowdhry, Babu Parbati Sunkur Roy Chowdhry, Babu Girja Sunkur Muzoomdar, Babu Kulnda Kinkur Roy, Babu Sita Nath Roy, Mr. J. J. J. Keswick, of the firm of Jardine, Skinner & Co. and Watson & Co., Mr. W. B. Morrison, Mr. C. J. Quadros, Mr. J. F. Cauty, and Hon'ble Kristodas Pal, Secretary.

The above petition has been presented to the House of Commons by Mr. Stanhope.
A similar petition has been presented to the House of Lords.
Calcutta, the 1st July 1883.

Notes on the Bengal Tenancy Bill.

Section 3.—Definition No. 3.—The word tenure should not include a ryot's holding although the rent thereupon is fixed. It would lead to confusion if ryotiy holdings, comprising a beega or a few beegas of land, be designated by the same term which people have been accustomed to apply only to putnis, durputnis, and other dependant talooks. The Bill does not provide for registration of transfers of tenures in the landlord's sherista, nor does it give the landlord a right of pre-emption in respect of such transfers, and it gives tenure-holders a right of conferring a right of occupancy on their under-tenants. These provisions show what confusion would arise if ryoti holdings be classed as tenures (*see* remarks on section 14).

Definition (5).—The word ryot should be clearly defined. By the definition as it stands, a trespasser would be a ryot if he "holds land for the purpose of agriculture, horticulture, or pasture." It is scarcely to be supposed that the law about trespass is to be circumvented in the case of men who surreptitiously scatter seeds in another's land, in a country like India, where fields are not, generally speaking, provided with fences or other boundary marks; and from the nature of the case it is impossible to watch who scatters seeds or at what time. The reaping season is the only one when a trespass of the land can be made out, and then trespass is given undue advantage under the section. Again, a person who has established a mart or a factory on his land, or who uses it for the purpose of brick-making, would be a ryot if his ancestor came into the pessession of the land for the purpose of agriculture.

Definition No. 10.—The definition of rent should be altered with a view to provide for cases in which the ryot is deprived of his use and occupation of the land by an act of dispossession committed by a third party—a circumstance which does not legally affect his liability to pay rent. Or it may be that a lease is taken or engagement of some kind is made for the use of land, but afterwards circumstances, not due to any act or neglect of the lessor, might intervene to prevent the lessee from using or occupying the land, such as want of capital to build a hut or to cultivate the land, and in such cases the penalty should rest with the party who fails; and not he who is deprived of the rightful use of his land by the failure of the defaulter.

No. 16.—"Transfer" should not include mortgage, otherwise a mortgagee without possession would have the right of getting his name registered in the zamindar's sherista.

Section 4 (c).—The proposal to exempt khas mehals and wards estates from the opertion of the proposed law is anything but reasonable. It is but only fair that the rights of all tenure-holders and ryots should be regulated by one code of laws. Nothing would create a greater confidence in the minds of the people in the justness of an act defining the rights and obligations of landlords and tenants than the fact that it applies equally to Government as landlord and to private landlords. There is no difference in the position and character of the subordinate agency employed by Government and by private landlords in the collection of rent and management of estates, and yet the State has secured to itself a special and summary procedure for the recovery of rent. In the matter of rights and obligations relating to land, however, the people have a right to expect that there should not be one law for private landholders, and another for the strongest and most irresponsible of landholders—the State.

Section 4, Illustration.—The illustration is most unfortunate. It assumes the existence of a customary right which does not exist anywhere. It would be an encouragement to under-ryots to make false claims of a right which has not once since 1793 been put forward in any instance. The Bill itself contains no provision clearly defining the rights of such ryots, and an enunciation of the rights of under-ryots is a question of no small difficulty. A world of confusion would arise in cases of sale, forfeiture, and merger of the superior right if under-ryots be declared to have, at least in some places, a right of occupancy.

Sections 5-8.—These sections involve an arbitrary inroad upon one of the most valuable rights of the landholders. While khamar lands are frequently converted into ryoti lands by the act of the landholders, large additions are daily made to his khamar lands by accretion, relinquishment, deaths of ryots without heirs, purchase of holdings, &c. From their very nature all accretions are private property of the landholder, and as such they must begin by being khamar, for no ryoti interest has till then accrued on them, but the sections deprive the landholder of the full benefit of such accretions. This is quite uncalled for and most arbitrary. As regards accretions, the existing laws grant them to the zamindar as his special right. And the proposed sections indirectly transfer them to persons who may in future become ryots. Nothing can be more unjust, moreover, than to fix a maximum limit to the area of khamar lands of a landholder, and thus to place restrictions on his right to let such lands in any manner he pleases. The principle which underlies these sections would seriously clog, if not extinguish, an undoubted right which landholders have all along enjoyed, namely, the right of claiming enhancement of rent on the ground of the ryot being in possession of more land than what he pays rent for. But besides being unjust to the landholders, the measure is eminently unpractical. It ignores the existence in the village of all rent-free lands, all service lands, and all land temporarily given away by the landholders for the benefit of pundits, or moulavis, or for the expenses of worship of a village idol, or for the annual celebration of a village festival. To what class would these lands belong? To poor villagers a classification of lands which reckoned all these lands as ryoti lands would be simply incomprehensible. Besides, a very small number of zamindars and talookdars have got measurement papers of their villages which might enable them to submit statements of khamar lands in their villages. It would require decades of time and an outlay of crores of rupees to enable the Bengal landholders to submit such statements. The amount of trouble which a determination of khamar and ryoti lands would cause to the landholders and ryots would itself be enormous, and the loss of time to public officers in deciding disputes and appeals would be great, specially as the areas of a vast number of estates and villages undergo continual changes by the action of large rivers which intersect Lower Bengal.

Section 14.—This rule is intended either to attach a value to a class of property which never had such value before, or to simplify classification. In the former case it unnecessarily and unjustly deprives the landholder of one of his existing rights, and in the latter it is objectionable for the reasons assigned in the remarks on section 3, definition 3.

Section 15.—Act X of 1859 did not directly or indirectly set aside the right of the zamindar to enhancement under the Regulations of 1793, but provided a remedy for the difficulty that had arisen in producing proofs of continuous possession at a uniform rate previous to the date of litigation. This placed the zamindars at a great disadvantage and they complained of it most bitterly. But instead of giving the zamindar any relief from the operation of the rule of 20 years' presumption, the section in a manner completely shuts them out by providing that proof of uniform payment of rent for any period of 20 years (and not 20 years immediately before suit as at present) would raise thus presumption. Sir Richard Garth truly observe that "this section has undoubtedly operated very unjustly against the landholders;" and further on—"But in the case of rent it might well be that for 20 years no ground for enhancing it had ever occurred; or from the fact of the landlord being a minor, or female, or over-lenient with his tenants, any opportunity for enhancement might not have been taken advantage of, and in such cases it would be hard to presume against the landlord that because the rent had not been enchanced for 20 years, it has been fixed from the time of the permanent settlement." The experience of the last 23 years has shown that in 95 per cent. of suits for enhancement of rent landlords were unable to rebut the presumption thus raised; and how could they? Those who have come into possession of estates and talooks by purchases made at sales for arrears of revenue or rent, or in execution of decrees, did not get a scrap of paper belonging to the former proprietors, while those who purchased at private sales were in no better plight, considering the great difficulty of preserving from white-ants and other sources of destruction, massive collection-papers of a period more than 30 or 40 years old. It is impossible therefore for landholders to adduce evidence except in rare cases to rebut the presumption, and it was this consideration which induced Mr. Reynolds to suggest an amendment to the effect that no such presumption would be raised unless the ryot succeeded in proving uniform payment from 1839, *i.e.*, 20 years before the date of the passing of Act X of 1859, which for the first time enacted the rule. The observations made by Mr. Reynolds in support of the change are unexceptionable:—"Allowing all due weight to the arguments of the Commission, it is to be remembered that the presumption was first introduced by Act X of 1859, and that it was then necessary for the tenant to prove a uniform rate from 1839. It is now only necessary to prove such uniform payment from 1861. As there is reason to think that rent receipts have been much more regularly given, and much more carefully preserved, during the last 20 years than during the 20 years which preceded them, it seems to follow that the lapse of time has made it more and more easy to raise the presumption, and more and more difficult to rebut it. Nor can it be denied that auction purchasers labour under a special grievance in this matter. If it be said that they may be expected to regulate their bids accordingly, it may be replied that it is not for the public interest that estates should sell below their value on the ground that the circumstances of the sale facilitate the advancement of fraudulent claims by the tenant." It behoves the

legislature to consider how very easy it is for ryots, with the aid and connivance of former talookdars and their gomastas, to produce rent receipts showing uniform payment for 20 years. The injustice of the rule of presumption is clear from the fact that Government, with all its prestige and resources, wish to keep clear of it in respect of temporarily-settled estates. The exception which section 20 of the Bill makes with reference to such estates prove beyond all manner of doubt the necessity of a change of the law for the behoof of the landholders. The remarks made by Mr. Reynolds on this head are conclusive. He says:—" The exception in the case of tenures in an estate not permanently settled is stigmatized by Baboo Joykissen Mookerjee as an invidious distinction which shows the injustice perpetrated on the holders of permanently-settled estates. A little consideration will show that the exception is perfectly reasonable."

Section 16.—There can be no objection to the rule laid down in the last part of this section, if the commutation of the rent in kind into a fixed money rent is the voluntary act of the landholder; but if such commutation be made at the desire of the ryot, and against the wishes of the landholder, as provided for in section 82, the rule would be very unjust to the landholder. It would in that case be in the power of every ryot to prevent enhancement of rent on the ground of a rise in the value of produce which payments in kind secure to the landholder.

Section 18.—This is a new restriction on the right of enhancement, alike unfair and uncalled for. In those cases in which it will be shown that a tenure has existed since the Permanent Settlement, although at a varying rent, the zemindar must prove his right to enhance before he gets a decree. How is he to prove such a right? If that right be not deemed clear from the Permanent Settlement Regulations, landholders must give up all attempt of proving it by proof of custom or contract. There is no custom, one way or the other, affecting the zemindar's right of enhancement, and as regards contract it is well known that no written engagements exist in respect to a large number of tenures.

Section 25.—This section gives ryots a right of free sale of all holdings which are protected from enhancement of rent either by agreement or under the operation of the rule of 20 years' presumption. Nothing can be more unjust to the zemindars, or more ruinous to the ryots. It deprives the landholder of his right of choosing his own ryots. It requires no great experience of mofussil life to see that the learned Chief Justice is quite right in considering this to be "far from a sentimental grievance." A provision which allows ryots to thrust upon a landholder as his tenants persons who are his avowed enemies, or who are notorious bad characters, and who would therefore in all likelihood create disaffection and combination among his other ryots, place obstacles in the collection of rent, commit breaches of the peace, and sow the seeds of discord among a peaceful community, affects most materially the proprietary rights of the landholders. It will be seen that in the case of these protected holdings the landholders would not have a right of pre-emption, such as is provided for by section 51 in the case of mere occupancy holdings, but it may be urged that the number of such holdings is small. It is well known, however, that during the last 23 years the courts have indiscriminately declared a very large number of holdings in every district to be protected from enhancement, and that the number of mokururee leases granted by landholders during this time is considerable. In one year alone the number exceeded 19,000, as shown by registration returns. And then the right is proposed to be given not only to those whose holdings are protected by agreement, and those whose holdings have been declared protected after judicial enquiry, but to the holder of every "permanent tenure." Who is to judge whether a tenure is permanent or not? In 999 suits for enhancement of rent out of every 1,000, the ryots claim their holdings to be protected under section 4. No occupancy ryot would be so unmindful of his own interests as to admit his holding without any sort of struggle to be not protected from enhancement by giving his landlord a right of pre-emption when he wishes to transfer his holding. The effect of the provision under notice would therefore be that, with the exception of that inconsiderable number of holdings which have been declared by the Courts at different times to be not protected from enhancement, all other holdings will be capable of being freely transferred in spite of the landholders. The landholder will have no right of pre-emption in such cases. He may of course contest by a suit in court the validity of such transfers, on the ground that the holdings are not permanent, but to what an alarming position would the landholder be drifted if he were called upon without a moment's notice to prove scores, perhaps hundreds, of different holdings not to be protected from enhancement. He will not be allowed his own time to decide when he will sue a ryot for enhancement of rent. He must without any notice accept a stranger as his ryot, and also give up for ever his right to enhance the rent of a holding, or institute suits to establish his right to enhance, with the inevitable prospect of a defeat.

Nor are the evils apprehended, or likely to arise, from the working of the law to be confined to the landholder only. The ryot is for certain to suffer from them even more grievously. Whereas now they have permanent tenures which they cannot be deprived of in any way, except by their own default in paying rent, and their sons and grandsons and successors without limit may inherit, and always remain owners of their ancestral fields; under the new law they will be liable to, and practically will soon be reduced to day-labourers, and their fields will pass to middlemen, thus defeating the primary and professed object of Government, namely to better the condition of the ryots. Our conviction in this respect is firm, formed as it is by our thorough personal experience of the country and the condition of the poorer classes. Nor is this belief unshared by the governing classes. Mr. Ilbert,

when introducing the Bill in adverting to the power of sub-letting, remarked :—" The powers of sub-letting which the Bill recognises may in time lead to a state of things in which the great bulk of the actual cultivators would be not occupancy ryots, but under-ryots, with but little protection of the law " (page 291). The power of forced sale will greatly hasten this consummation.

The learned Chief Justice has observed " that to give a poor population like the Bengal ryots the means of selling or mortgaging their tenures at pleasure is a very certain means of making them improvident. I should have thought that the most effectual way of protecting such people, and preventing them from wasting their substance, would be to secure them a permanent interest in their property by prohibiting the alienation of it in any shape or way." The truth of these observations have been painfully illustratad in a large number of cases. Whatever may be the custom in some of the eastern districts, the sale of ryoti holdings, even with the consent of the landlord, is very limited in the western districts. It is mostly those holdings in respect to which the right of sale is expressly reserved by a lease that are now and then sold in the western districts; but when the landholder neglects his own interests, or when the proprietor is an infant or a widow, or when by reason of long-continued litigation among the different co-sharers of a property the management is left entirely in the hands of the local agents, it is then that opportunity is taken by money-lenders, traders, and others to buy up ryoti holdings, not for the purposes of cultivation, but for letting the lands, in most cases to their vendors themselves, at a large profit. The purchasers become middlemen and the original ryots become korfa or under-tenants with no rights at all, and are placed entirely at the mercy of their superior holders. It is needless to add that small middlemen are worse than useless factors in Indian social economy, and that as a general rule the ryots of large zemindars are much better off than those under small middlemen. The evil would increase a hundredfold if a right of free sale were given to the ryot. If the present law were left untouched in this respect, matters would adapt themselves to local conditions and circumstances. The custom which has grown up in some of the eastern districts has nothing pernicious in it. There the holdings are large, cultivation is mostly carried on by hired labour, and the transfer of the holding causes therefore no change for the worse in the condition of the tenant. The lesson given by the Deccan ryots should be a warning to the extension of the right of free sale to other places. " The saleable value of the land greatly increased the credit of the ryot, and encouraged beyond measure the national habit of borrowing, which I have before observed on."—Secretary to the Government of India, to the Secretary to the Government of Bombay, dated 29th February 1879.

Section 26.—In providing that no holder of a permanent tenure shall be evicted except for breach of a term of a *written* contract, this section imposes a condition which will deprive landholders of their just rights. It is well known that written engagements are exchanged between landholders and their tenants only in a very few cases. Where there are no written engagements, a landlord would therefore be unable to evict a ryot, even if he builds a factory or establishes a mart on his land; nor would he be able to claim a forfeiture of the tenancy if the ryot denies the title of his landlord. The language of section 50 (*d*) is better, but still defective contract, written and unwritten, and custom should be allowed to govern the rights of parties in the matter of ejectment.

Section 27.—The first thing which strikes one with reference to this section is, that the Bill does not provide anywhere for the registration, in the landholder's sherista, of transfers of occupancy holdings. The uncertainty which exists as to whether a holding is a mere occupancy holding or a tenure, *i. e.*, a holding protected from enhancement, render it essentially necessary that all transfers should be registered. The right of pre-emption, it is true, would give the landholders the requisite information in certain cases of transfer, but, as has been already observed, that right would be more illusory than real. Besides, why should not successions to occupancy holdings be registered in the zemindar's sherista? A landholder should not, moreover, be held bound to register mortgages of tenures, specially where possession has not been made over to the mortgagee. The landlord is entitled, in some cases, to demand from the purchaser of a transferable tenure security for the regular payment of rent. Provision should, therefore, be made for the deposit of security or the execution of a security bond where it is demandable by law or custom.

Section 28.—This section gives the tenant the alternative of applying for registration of transfer either to the landholder or to a revenue officer appointed for the purpose. Nothing can be more objectionable. It is one of the numerous cases in which the Bill contemplates officious legislation for the transfer of management of property from the hands of the owner to those of a public officer. It would unnecessarily impose costs both on the tenant and the landholder. The tenant should have a right of applying to the revenue officer only after the landholder has refused to register the transfer. The section, moreover, ignores possible objections on the part of the landlord to the registry. The transfer may be one of a part of a tenure, one of a non-transferable tenure, or one which is otherwise invalid, and yet this section enjoins that whenever application is made to the revenue officer a notice shall issue on the landlord, not asking him to show cause why he should not register, but requiring him to register the transfer. It is true that section 32 provides for objections which the landholder may raise to an application for registration, but why compel the parties to undergo the trouble and incur the costs of regular suit without giving them an opportunity of coming to an amicable arrangement among themselves.

Section 29.—In this section, too, provision should be made for possible objections on the part of the landlord to the registration of transfers.

Section 34.—The tenant should be made liable to pay a fee of 8 annas for the first copy of the entry, instead of his getting it free of charge. The Rent Commission suggested the imposition of a fee for the first copy. The service to be done is for the benefit of the tenant, and in equity he should be bound to pay for it. The zemindar derives no benefit: nay, he may be called upon to make a registry which will bring in an unwelcome tenant, who will prove injurious to his interest, and he cannot fairly be called upon to render service without a legitimate and reasonable fee.

Section 43 (a).—The word "village" should be more accurately defined with reference to its fiscal constitution. It frequently happens that the geographical boundaries of a village contain the lands of a second and third village belonging to a different estate and owner. The definition of the word here given would therefore give as against a proprietor a right of occupancy, and that of a settled ryot to persons who had never before held land in the village or estate belonging to that proprietor. This would be an extension of the right which is neither sanctioned by the Secretary of State, nor contemplated by the framers of the Bill. Many villages have so grown up as to have combined into one, bearing in such cases a compound of two or three names, and others may do so; some have grown up into towns of considerable size, whereas the principle on which the provision is justified is that the holdings are contained in the same village or part of a village as owned by a single proprietor. Clause (*b*) of the section shows this clearly, but with a different object as reprehensible as this.

Section 43 (b).—Considering the purposes to which the word estate has been used in subsequent sections, the definition of the word here given is very objectionable. The arbitrary meaning, opposed to every conception of the term and to its definition in section 3, attached to the word by this sub-section, will lead to great confusion, while the inroad into proprietary rights which it involves is great. The effect of this section would be, that a person who has never held any land under A, but who has held land for 12 years under B, perhaps an enemy of A, will be deemed a settled ryot of A's estate, if at any time subsequent to 1853 the two estates formed or formed part of a parent estate. Some estates which formerly comprised lands in two or more districts have subsequently to 1853 been partitioned, but on that very ground this section would deem a ryot of a village in Burdwan a settled ryot of a village in Hooghly, which is more than 60 miles apart, and which he has very likely never seen in his life. The absurdity of a theoretical rule conceived in utter ignorance of existing circumstances can go no farther. What, again, would be the effect of the interpretation in question with reference to section 47. It would be simply this, that a person who has held land under a landholder for a few days would acquire a right of occupancy if he had held land for 12 years in a distant estate which once formed a part of the same estate as his. An examination of the nature and origin of estates would show how harmful the proposed definition would be. The principal estate of the Moharaja of Burdwan is composed of villages scattered in five or six districts. The Bill certainly distorts the views on this point of the Secretary of State, who evidently refers to partitions of estates in future when he remarks—"It will be necessary in actual legislation to provide that this right is not forfeited by any sub-division of estates and alteration of village boundaries."

Section 44.—Both in the definition of ryot in section 3 and of occupancy right in this section the important qualification inserted in section 6 of Act X of 1859 has been omitted. The right should attach to the ryot with respect to any land only "so long as he pays the rent payable on account of the same." It is an important qualification, and one that goes to the very root of the matter.

Section 45.—The "settled ryot," as defined in this section, is very different from a 'resident ryot' familiar to the Indian lawyer. The rights given to such a ryot by sections 57 and 61 are most objectionable. The latitude which sub-section 3 gives to the acquisition of the right is also very objectionable. In joint Hindu or Mahomedan families the number of co-sharers, male and female, in a ryotty holding is usually very large. Should all and every one of them acquire the rights of a settled ryot? Though some of them may be living for years, and in fact presumably far away from their ancestral homes.

Section 46.—This section provides that a ryot must cease to hold land for the full period of one year before his title to the land expires. In the meantime the land will remain fallow, and the landholder will have no security whatever for his rent. It would not be at all unreasonable if it were held that a ryot's title would cease by his absenting himself from the village for six months without making any provision for the payment of the rent payable by him. By the Central Provinces Act an absence of 30 days operates to extinguish the ryot's title.

Section 47.—A ryot who who has held on the 3rd of March 1883, even for a few days, a large quantity of land in a village, would by this section, any contract to the contrary notwithstanding, acquire a right of occupancy in respect to that land if he or his predecessor had held even a kotta of land in that village, or in the estate to which it appertains, for a period of 12 years. This is a most unjust and uncalled for invasion of the rights of landholders. The rule for the acquisition of the right of occupancy laid down in section 6, Act X of 1859, has been declared by eminent judicial authorities to be an encroachment on the proprietary rights of landholders. It was at first proposed to apply the rule only to resident ryots, and it

was only on the recommendation of the authorities of the North-Western Provinces that it was extended to all classes of ryots, but with a view to palliate the wrong thus done to zemindars a section (section 7) was enacted, which gave the landholders a power to prevent the accrual of the right by taking proper engagements from the ryot. It is admitted that that law has succeeded in giving fixity of tenure to a large majority of the ryots. Where, then, is the necessity of this fresh and unjust inroad into the rights of zemindars? The statement that landholders have hitherto prevented the accrual of the right of occupancy by not allowing their ryots to hold the same land continuously for a number of years is, in the main, incorrect and unfounded. If the practice has grown, as has been stated, in some estates in Behar the landholders are not to blame for it. They have done merely what is not wrong, but what they are expressly authorized by law (see sections 7 and 9, Act VIII of 1869) to do in order to protect their own interests. It should be remembered that the practice did not affect old ryots, *i.e.*, those who have acquired rights of occupancy, and that when the landholders could legally prevent the accrual of the right of occupancy by taking proper engagements from their ryots, this constant shifting of cultivation may be due to other causes, the conditions of the soil for example, than the desire of the landholder to gain his own object. The Secretary of State has, it is true, given his sanction to a revision of the law relating to right of occupancy nearly, though not quite, in the way proposed by this section, but it is no wonder that such sanction has been given when it is recollected that the opiniors of high and experienced afficers of Government, of men like Lord Ulick Browne, Mr. J. Monro, and others were kept in the back ground, and the isolated opinions of a few officers who are wedded perhaps to particular pet theories were held up to His Excellency as evidence of the condition of the ryots and of the conduct of the landholders.

The provision against freedom of contract in respect to the accrual and to the incidents of the right of occupancy is indefensible on all grounds, rational and economical. The ryot is a free agent in all other concerns of life. He may sub-let his lands at any rent, however small; he may borrow money at a ruinous rate of interest; he may relinquish, mortgage or sell his lands whenever he pleases, and convert himself into a day-labourer, but he must not consent to forego the acquisition of right of occupancy even in regard to land which he requries for temporary purposes, or to pay enhanced rent to his landlord at a rate which he has not the least disinclination to pay. The ryots are unquestionably a much more intelligent class of men than day-labourers; but although the latter are free to contract away their liberties for service in an unknown land for years, the freedom of the former must be restricted, in the opinion of our legislators, in matters in which they are the best judges of their own interests. The argument drawn from section 58 of Regulation VIII of 1793 in support of the proposed restriction is at best fallacious. That section required the form only of the potta to be submitted for approval once for all, and left the adjustment of the conditions, terms, and details to the parties concerned. Section 56 of that Regulation clearly shows that no sort of restriction whatever was intended to be placed in the way of the contracting parties. It is observable that a far different rule has been proposed for cases in which the interests of Government are concerned. The Bill, section 121, empowers a revenue officer to override contracts entered into by landholders with their ryots at reduced rents in estates not permanently settled, and to assess the rent in accordance with the provisions of the Bill.

When an owner, tenure-holder, or izardar holds alone as such any land, he would be prevented by the proviso of this section from acquiring a right of occupancy in respect of that land. Is it intended to mean that when land is held jointly by a number of owners, tenure-holders, or izardars, such a right may be acquired?

Section 48.—This section provides that a right of occupancy in an under-tenant may accrue only by an act of a permanent tenure-holder, but that after such a right has been created, all the incidents of an ordinary occupancy right will attach to it. A right of occupancy within a right of occupancy has been hitherto unknown in this country. It would give rise to great confusion in the matter of determination of rent payable by the sub-occupancy ryot, and of his rights and liabilities in cases of default of payment of rent by the superior ryot, and of distraint of crops and sale of the superior holding. This section would, moreover, enable ryots to introduce into the village, as under-tenants with rights of occupancy, persons who are obnoxious to the landholder, without the latter having any means whatever to prevent it.

Section 49.—The extension of the rule as to occupancy rights to khamar lands, unless prevented by contract, is an uncalled-for infringement of the rights of landholders. It is opposed to what Mr. Ilbert emphatically said in Council: "We might, I think, very fairly say to the zemindars—'This is private, sir, or khamar land is, and shall be, your own in a special and exclusive sense. You may do as you like with it."

Section 50 (d).—The very condition essential to the continuance of a right of occupancy in respect of any land is the payment of the rent payable for the same. It has been observed before that the omission of the qualification, namely, "so long as he pays the rent payable in respect of the same," is a material defect in the definition of the right given in the Bill. It is not in a land which the ryot merely occupies that he should acquire a right of occupancy, but, as observed by the Secretary of State, it must be a land which "he occupies and pays rent for." Such being the conception of the right, it is difficult to see how the incident of ejectment for non-payment of rent can be separated from it. The penalty is inherent to, and inseparable from, that right. In omitting to provide for ejectment for

non-payment of rent the Bill takes away a remedy which the landholders have not only all along enjoyed, but which is necessary for recovery of their rents. It would be found on enquiry if one were made, that in a very small number of cases indeed have the landholders availed themselves of this remedy, and that in a large majority of the cases in which decrees were obtained for ejectment the lands have been re-let to the defaulting ryots after some arrangement for the payment of the arrears have been come to; but the very existence of the remedy is a check to habitual and wilful non-payment of rent. For reasons stated with reference to section 26, a landholder should not be deprived of his right of ejecting a ryot where he is entitled to do so by custom or unwritten contract.

Section 50 (*c*).—Both Sir Ashley Eden and the Secretary of State are strongly against the practice of sub-letting. The latter remarks—"I entirely agree with you that sub-letting, where the custom has not become firmly established, should be discouraged," and yet the Bill would give the right indiscriminately to all occupancy-holders. If it be the object of the legislature to foster a substantial class of cultivators who have a direct interest in the agriculture of the country, that object would be frustrated by giving to all occupancy ryots the right of sub-letting. There are, doubtless, occasions when sub-letting may become necessary, as, for instance, when the holder of the right is a woman, or a minor or an invalid and a provision for sub-letting in such cases would doubtless be reasonable, but the grant of the right to all occupancy ryots, whether they have or have not the right by custom, would simply tend to create a class of middlemen who would enjoy all the rights and privileges taken away from the landholders, while the cultivators themselves would fare much worse than at present.

Section 50 (*f*).—The evils incidental to a rule for the free sale of ryoty holdings in this country have been already described with reference to section 25. If the free sale of permanent holdings be objectionable, how much more so would be the sale of simple occupancy rights held by persons who are in a majority of cases very poor, and who have no resources to fall back upon in seasons of agricultural distress. The result of such a rule would be, that within a few years the holdings will change hands, a number of middlemen will come into the possession of the greater part of the holdings of every village, while the original ryots themselves, who are the objects of so much tender solicitude on the part of the Legislature, will be reduced to the condition of day-labourers or of under-tenants paying rack-rents to their superior holders.

Sections 51 to 55.—The right of pre-emption proposed to be given to landholders on the sale of occupancy rights is as intangible as it would be ineffectual in palliating the wrong done to them by making the right transferable. The right of pre-emption would go for nothing if the ryot chooses to think—it would be preposterous to assume he would do otherwise—that his holding is protected from enhancement, or that it is a permanent tenure, and one therefore which under section 25 is not subject to the landlord's right of pre-emption. If the landholder wishes to assert his right of pre-emption, he must go to court prepared to prove the holding liable to enhancement, or that it is a simple occupancy holding, and *that* within six months from the date of sale, gift, or bequest. Nothing would be, however, more easy than for the ryot to defeat the landlord's right of pre-emption by keeping the transfer a secret from him for a period of six months, after the lapse of which the landlord would have no right or remedy whatever in respect of the transfer. The case would be much worse if the ryots combine against their landlord at the instigation of a neighbouring and unfriendly landholder, and call upon him to exercise his right of pre-emption at once in respect to a lage number of holdings. Few landholders in Bengal have the means of meeting such a call. With rare exceptions, therefore, they will be placed in such a case at the mercy of their ryots. In cases of sales in execution of decrees the Bill does not provide for any service of notice of intended sales upon the landlord, but he is expected to make himself cognizant of all such sales and to bid at the sales—a provision which shows further how worthless is the right of pre-emption proposed to be given to landholders. The Bill makes no provisions whatever for cases in which one or two of several joint-owners claim jointly or in rivalry to exercise the right of pre-emption in opposition to the wishes of the rest.

Section 56.—The Bill, while professing to run on the lines laid down by the Secretary of State, makes departures from them here and there which are wholly unwarrantable. He nowhere sanctions the accrual of an occupancy right by any but a settled ryot, but this section would give the right to a perfect stranger, who is let into a land which has come to the landholder's possession by virtue of his right of pre-emption. This is, however, far from being the worst feature of this section. Any other purchaser of an occupancy holding will have the right of using it in any manner, and letting it at any rent, he chooses, but the landholder, the proprietor of the soil, must not only pay as much as the land is worth if he wishes to purchase it and let it with a right of occupancy even to a stranger, but he must not also let it at a rent higher than what he was receiving before his purchase. This is expressly opposed to all ideas of fair play at auction sales, to all economic principles, and to the views of the Secretary of State, who says that the landholder may let such land "at whatever rent he can obtain." The right of pre-emption would therefore be a positive wrong and disability, instead of a benefit to the landholder.

Section 59.—The objections to the restrictions to freedom of contract apply with double force to contracts relating to rent which the contracting parties with an eye to their own

interests will enter into. Whenever a ryot agrees to pay a certain amount of rent for a plot or plots of land, he does so after taking into consideration the situation and capabilities of the land and the profits it or they will fetch him. He is the best judge of his own interests in the matter; he has his remedy in all cases in which the least coercion has been used, and yet this section restricts his rights as a free agent, and makes a revenue officer the guardian of his interests. But will any amount of legislative precaution prevent the parties from entering into any contract for rent they might agree upon? The futility of such attempts was made abundantly clear by the experience of the usury laws. The result of such a law would be that honest zamindars would suffer, while those whose exorbitant demands for rent it is intended to limit would be able to carry everything in their own way.

The arbitrary limit imposed by this section to rent with reference to the value of produce of the land is anything but just and reasonable. Leaving aside the question of lands which were waste at the time of the Permanent Settlement, and which the landholders have a right to let to their best advantage, it cannot but be conceded that they are entitled to get the State share of the produce of the soil which was made over to them for an annual money value or revenue fixed in prepetuity. Any measure which which would reduce that share cannot but be an act of spoliation, specially if it originates with that one of the contracting parties which received at least an adequate consideration for the bargain. It is well known that for the purposes of the Permanent Settlement the rent was assessed at from half to three-fifths of the value of produce. Whether the Government of 1793 was right or wrong in assessing the rent at such a ratio is a question with which neither the present Government nor the zamindars have anything to do. The British nation as masters of the soil took upon themselves the power of making what settlement of land revenue they thought proper on the assumption that they had got the land free of all previously existing rights and engagements (section 30, Regulation II of 1822). The rule in question is, therefore, a direct breach of the compact of 1793. If the Government wish to keep faith with the landholders, and to deal justly by them and their ryots, let the ratio of produce which formed the basis of settlement in 1793 in each district be enquired into and determined for the purpose of fixing a limit to the zamindar's claim for rent. One-half the value of the produce is not so high a ratio as it is supposed to be by some. Only last year the Bombay High Court decreed a claim for enhanced rent on the basis of half the value of the gross produce of the land.—3 I.L.R. 348.

The question of maximum limit to rent on the basis of a share of the produce presents another aspect. The ratio which rent bears to the value of produce varies in different districts from less than one-twentieth to more than one-half. Of what practical value is a maximum limit under such circumstances? In districts likee Dacca and Chittagong, where the ratio is low, the landholders would be entitled to double their rents after every 10 years; while the Hooghly, Burdwan, and such other districts, where the ratio is high, the rule will stop enhancement altogether, although, as a matter of legal right and justice, they are entitled to get as rent a sum which represents their original share of the produce. It is difficult to say how this variation in the ratio of produce in different districts took place; but if it be assumed that the ratio which formed the basis of the Permanent Settlement was pretty nearly uniform in these provinces, the present difference must have arisen by a rapid rise in the value of produce in districts like Dacca and Chittagong. Be the cause, however, whatever it may, it is undoubted that it has resulted in making estates and tenures in those districts much more profitable than those in Hooghly and Burdwan. The road cess statemets show that, whereas in Hooghly the ratio of revenue to the total rent-roll of the district is 48·4 and in Burdwan 40·8, it is only 21·9 in Dacca, 24·7 in Chittagong, 16·1 in Mymensingh, 8·6 in Durbhanga, and 6 7 in Loharduggа. The effect of the rule would therefore be that, while it would press hard on the landholders, whose profits are small, it would give those whose profits are large an unlimited latitude for enhancement of rent.

The Bill allows the rent of a ryot to be doubled by decree of court in an enhancement suit. It is therefore difficult to understand why the increase of rent should not be more than 6 annas in the rupee when the enhancement is effected by contract. The rule is simply a premium on litigation.

Section 61.—When any land comes to the khas possession of the landholder, it is usually let to some one of his ryots. It is in rare cases that a stranger comes to rent the land, or the landholder has the inclination to let it to one whose antecedents are unknown to him. For all practical purposes, therefore, the landholder's right to let will be materially restricted, even in respect to land which we have been accustomed to regard as land over which he has absolute control. He would not be able to rent the land at a higher rent than what was previously paid for it, unless by a registered contract approved by a revenue officer, who should see not merely that the contract rent is not more than one-fifth of the value of produce, but also should satisfy himself "that it is fair and equitable, and that the ryot in entering into it acts as a free agent." The climax of the evil is reached in cases in which the landholder lets out land which has come to his possession by virtue of the right of pre-emption. Payment of the highest price available for the land does not give him an iota of right in excess of that restricted right he would have in respect of land which has come to his possession by relinquishment, forfeiture, or death.

Sections 62 to 78.—The first attempt made since 1793 to regulate enhancement of rent by the enactment of definite rules has failed, and it requires no great foresight to see that

the elaborate rules laid down by the Bill for the preparation of tables of rates would make matters much worse. It is anything but reasonable to expect that public officers, wholly ignorant of the condition of the people, of the nature of the soil, of the different kinds of crops, and of the agricultural capabilities of a village, would ever succeed in fixing proper rates of rent for different classes of land. They must err on one side or the other. Did not our judicial officers make confusion worse confounded by decreeing (before they ceased to decree any rates at all) a variety of rates for the same class of land in a village? The most feasible way of meeting the difficulty appears to be the legal recognition of the indigenous system of the country. Let the preparation of a table of rates for each village be entrusted to a punchayet consisting of a number of mandals and the zamindar's gomashta of the village, and some provision made for cases of defference of opinion among them. A table or jamabundee so prepared would be more satisfactory to the parties concerned then any table prepared by a public officer, and all the trouble, expense, and loss of time, to the detriment of cultivation which it involves, would be avoided.

A provision for the payment by zamindars and ryots of the cost of preparation of a table of rates, including the salaries and portions of salaries of officers employed in the work, is unjust and unwarrantable. A suitor paying high institution and other fees is entitled to have his suit tried and decided, otherwise the salaries of Judges and Moonsifs may with equal justice be made payable by him in addition to what he pays by way of institution and process fees. The payment of the cost of preparation of tables of rates would not relieve suitors of the cost of suit. After they have paid for the preparation of tables of rates, they would have to pay the costs of suit all the same. Again, after a table of rates has been prepared at an enormous cost, what use will it come to? In the adjudication of suits for enhancement of rent the court is required by section 73 not to rely solely on the table, but to adjudge the rate of enhancement on a variety of considerations. The condition of the land, the changes made in it, the persons by whom the changes were made, and the proportion of cost incurred by each contending party in making the change, would have to be enquired into, and latitude should also be given to custom and contract to vary the rates mentioned in the table. The great difficulty which officers would experience in preparing correct tables of rates, the enormous expenditure which the work would entail, the double costs which the procedure would throw on landholders and ryots, and the little practical use the table will come to in suits for enhancement of rent, are all considerations against the feasibility of this ill-judged measure.

Section 74.—Among the grounds on which the ryot is liable to pay enhanced rent to his landlord, that which in the present law provides for enhancement by reason of the ryot occupying more land than what he pays rent for, has been omitted in this section.

The Bill does not deny the landholder's right to get enhanced rent on this ground; but the manner in which that right has been declared in section 60 is so very indefinite, and the division of the lands of a village into khamar or ryotti is calculated to give rise to so erroneous presumptions, that it would be well both for the landlord and tenant that the law on the subject should be clearly laid down. The provisions of section 96 refer to cases in which it would be proved that separate plots of land have been added to the ryot's holding, but this is quite distinct from a case where the increase of area is due to a clandestine encroachment by the ryot upon adjacent, occupied and unoccupied, lands. The provision of the present law should be retained.

Section 75.—The proposal contained in this section to limit theamount of rent to the value of one-fifth of the produce of the land has been already commented upon with reference to section 59.

Section 76.—For ordinary cases a rule prohibiting the enhanced rent to be not more than double the rent previously payable is not objectionable, but a dogmatic rule to that effect would be productive of great hardship and injustice in cases in which the landholder, by means of large outlay of capital, raises the value of land to several times its original value. In such cases section 75 (*a*) gives the landholder the whole benefit of the change. Again, when an assessment is tainted with fraud and collusion, the restriction in question would result in great injustice. A zamindar or putnidar lets land to his relative or dependent at less than one-fourth the prevailing rate of rent. With a view to give colour of *bonâ fide* to the transaction a suit for arrears, or even for enhancement of rent, is instituted, and it is so managed that the rent is not disturbed. A number of such holdings may be created, and then the property might be allowed to change hands by default of payment of revenue or rent. Should the purchasers at the revenue or putni sale be precluded from getting more than the double rent in such cases? This section should therefore be modified so as to provide for cases of the nature above indicated. Regulation VIII of 1793, section 60, clause 2, provided for such cases.

Section 77.—When a landholder gets a decree for enhancement of rent, it is on the ground that he is entitled to it by reason of the increase in the productive powers of the land, or of a rise in the value of produce as determined by an examination of the produce or prices of a number of preceding years. The decree is for what the ryot has been withholding from the zamindar. It is not the case of a poor debtor who is unable to meet the creditor's demand, unless the court allows him to pay the creditor by instalments. The provision or gradual enhancement is therefore unjust and uncalled for. Again, section 201 gives the court a discretion to fix the date from which a decree for enhancement shall take effect. These two provisions taken together will give the courts a power to render any decree of enhancement abortive. Progressive rents are necessary only with regard to waste and jungle lands, which can't be cultivated all at once.

Section 81.—This section proposes to place restrictions on rents in kind, which are alike unjust and uncalled for. They are opposed to the declaration of Government to the effect that existing rents would in no case be reduced. It is well known that nine annas of the produce is not unusually the z amindar's share when rent is paid in kind. The ryots pay that share voluntarily, and there is no reason whatever why that share should be reduced to eight annas. The proposal that whatever be the nature of the crop grown on the land, the zamindar shall be entitled to get the value of his share only in staple crops, is still more objectionable, the rule or custom which regulates payments in kind embrace the number of crops, any one or more of which the ryot may grow at his pleasure, and whatever crops he grows he pays the fixed share to the zamindar. Why should this simple arrangement, which has received the sanction of immemorial custom, be interfered with, specially when no objection has been raised to it? Far from placing a restriction to the right of the landholders in this respect, the legislature should declare the customary right which they enjoy in common with the landholders of some other countries, Holland for example, of compelling the ryot to grow a new and paying crop, and to come to some fresh arrangement with his landlord if he wishes to grow a new crop of his own accord. Interference in matters like these, which can best be arranged amicably by the interested parties, is productive of great mischief, and is calculated to increase litigation to an alarming extent.

Section 92.—The draft Bill of the Rent Commission provided for a commutation of rent in kind into money rent at the instance either of the landholder or the ryot, but this section gives the right only to the ryot,—the party who has in most cases the choice of cultivating or not cultivating the land, and of relinquishing it altogether. Nothing could be more unjust to the landholder. Payment of rent in kind is a method of payment which saves the ryot the trouble and expense of taking his produce to the market, and of contesting the zamindar's claim for enhancement of rent, while it saves the latter the trouble and expense of periodically asserting and proving his claim to enhanced rent. It is a self-regulating system which adjusts itself to the variations in the price of produce, and one therefore which is best fitted to give to each of the interested parties his just rights without the interference of laws and courts, and is on that account eminently deserving of the support and fostering care of Government.

The ultimate loss to the zamindars, if such commutation were allowed, would be in other respects very heavy. After the rent has been commuted into money rent, the ryot need only relinquish the holding, and he or his neighbours would be able to compel the landholder to re-let the land at a rent not higher than one-fifth the value of the produce of the land. Payments in kind also secure to poor landholders their requisite supply of food-grain for consumption throughout the year, and it would be a source of great inconvenience and hardship to them if the ryot be allowed to change them into money rent at his pleasure. It should, moreover, be recollected that it is in respect of lands which are more than ordinarily subject to the risks of cultivation, and which the ryots do not venture to take at a fixed annual money-rent, that rent is paid in kind. Our legislators should think twice before they recommend a change which may ultimately injure those most for whose benefit they now wish it. It should also be borne in mind that in the two disttiets of Behar where bhowly rent obtains to a large extent the cultivation of land is carried on the co-operative system, Both in Patna and Gya the cultivation of land mainly depends on the landholder. It is with his money that embankments must be raised and maintained, and it is with his money that *pynes* on water-courses must be cut and kept clear before the land can be cultivated. The ryots are altogether powerless to execute and maintain these works, and any measure which would throw the entire responsibility of cultivation on them would be their ruin.

Section 85.—In proposing that a right of occupancy in a bastu land should not lapse on a ryot ceasing to be the settled ryot of a village or estate, this section contemplates a great wrong to the landholder. At present, when a bastu land forms part of a holding, the right accrues and ceases along with the right in respect of the other lands of the holding. No such right should reasonably be allowed to accrue when the bastu forms no part of an agricultural holding; and a provision regarding bastu land, purely as such, would be out of place in an Act relating to landlords and tenants. If a ryot is allowed to have a right of occupancy in a bastu land, after he has ceased to be a member of the agricultural community, the effect on the rights of the landholder would be disastrous, with reference to bastu lands in marts and trading villages. The provision is, moreover, opposed to the well-established principle of law, that a landholder is not bound to recognise a division of ryoti holding—a principle which section 150 of the Bill fully takes cognizance of. The bastu as an occupancy holding gives a lien to its holder to claim under the proposed law all rights of occupancy to lands that he or any of his descendants may at any time take up. Without subjecting himself to the 12 years' occupation clause. Let a clandestine encroachment be once made by a ryot, even for a few weeks, and he becomes an occupancy holder. The economic effects of the provision would be still more mischievous. There is only a limited quantity of bastu land in every village, and if a portion of that area be taken out of the reach of the agricultural community, not merely would the integrity of holdings be destroyed but great inconvenience and hardship would be felt for want of bastu lands.

Section 86.—As observed under section 50, custom and oral contract, and not only written contracts, should be allowed their operation in the matter of ejectment from bastu land.

Section 87.—A maximum limit of 5 per cent. of the market value of the land to the rent of bastu land would be most arbitrary and unjust. Considering all the risks of loss

to the landholder by relinquishments, bad debts, diluvion, &c., rent on particular plots of land, calculated at 5 per cent. of the value of the land, would really come to a much lower percentage on the whole. Again, it is a well-known fact that in some districts, the southern portion of the 24-Pergunnahs for example, bastu lands bear the lowest rate of rent of all lands in a village, while in others, Hooghly for example, bastu lands bear the very highest rates of rent, and in others again they bear no rent at all. A uniform rule would be therefore quite unsuited to the circumstances of the case. The matter should be left to contract and custom.

Sections 88-95.—In the face of great anxiety expressed by the Secretary of State that the principle which allows no right of occupancy to accrue except by possession for 12 years should not be abandoned, and His Excellency's declaration that he attached great importance to it, this chapter proposes to give ryots, who have admittedly no right of occupancy, as good a right of occupancy as that created by Act X of 1859, if not one much more damaging to the landholder. The rent of such a ryot shall not exceed ⅛ths of the value of the produce of the land; he can't be ejected, except for breach of a condition of a written contract; his rent can't be enhanced without a notice having been previously served upon him and a decree having been obtained against him; he would be relieved of the liability of paying enhanced rent for the year next following the notice; if he agrees to pay the enhanced rent, no ejectment shall follow a decree for enhancement against him, unless the landholder deposits in court a sum payable to the ryot as compensation for improvements, and a further sum as compensation for disturbance; and in case of failure the decree would be void, and no further attempt at enhancements of rent allowed within the next 10 years. These are rights much greater than what an occupancy ryot enjoys at present. No wonder that objection was taken by Hon'ble Members of Council to the whole of this chapter, which trenches materially on the rights of landholders.

Section 96.—The assumption that even an occupancy ryot is entitled to the possession of accretions to his holding is wholly unwarantable. It is opposed to the existing laws and judicial decisions on the subject. The accretions belong to the proprietor, who has the right of letting them out in any manner he thinks proper. While all losses by diluvion, change of course of rivers, and by relinquishments will fall on him, it is anything but just and reasonable to hold that the gain by accretion will be the ryot's and not the proprietor's. Again, why should the increased rent for accreted land be payable at the rates payable by occupancy ryots? It is well-known that accreted lands are much superior to old lands, and ordinarily bear much higher rents. The proposal to give ryots whose holdings are protected from enhancement a profit of 30 per cent. on the increased rent is equally unjust and unreasonable. But nothing could be more preposterous than the proposal that, while the enhanced rent for accreted land should be calculated at the rates of rent payable by occupancy ryots, the abatement of rent for diluviated land should bear the same proportion to the rent previously payable as the diminution of the total yearly value of the holding bears to the previous total yearly value thereof—a mode of calculation which would necessarily give the ryot, for no reason whatever, an abatement of rent, even as regards the land which would remain in his possession, and much in excess of the amount he would be entitled to by the rule of proportion.

Sections 97-98.—Such a variety of objections have lately been taken in trial of rent suits as to the instalments by which rent is payable, and so many capricious decisions have been passed on the subject, that some simple rule on the subject has become very desirable: instead of that, however, the Bill would make matters worse. In the case of tenure-holders and ryots whose holdings bear a fixed rent, the Bill would give free scope, in the first instance, to the terms of any agreement between the parties, then to custom, and lastly to such rules as may be framed on the subject by the Board of Revenue. In the case of a large majority of the ryots, *viz.*, the occupancy ryots, the Bill provides that the number of instalments should on no account exceed four. It is a fact borne out by the Regulations that Government revenue was formerly collected in monthly instalments, subject to a penalty of 25 per cent. for default. By the custom of the country the rents of ryots are even now collected by monthly instalments, and all the leases evidencing creation of tenures, putni and other, contain stipulations for monthly payments. A reduction of the number of kists would therefore be unjust to the zamindars and tenure-holders. Mr. Reynolds' Bill effected a compromise in the matter which was acceptable to all. He proposed in his Bill to fix only four instalments, the date of each of which was timed just one month before the dates on which the four instalments of Government revenue are payable. A definite rule like this would be much simpler and more conducive to peace and harmony than a procedure which is sure to cause useless trouble and expense to suitors.

Section 100.—In providing for receipts for rent by the landlord the Bill evidently means receipts by his authorised agents. It would be well, however, if the meaning be made clear. Item (*f*) is never entered in receipts. It would be a source of useless loss of time to the agent, and it is altogether unnecessary. The amount of rent and the amount of arrears would be shown in the annual account. Why, then, require them to be repeated every time the rent would be paid. If the introduction of any change be at all desirable, the legislature should see whether the *hatchita* system may not be introduced for the purpose of evidencing payments of rents. It has several considerations to recommend it. Item (*g*) ignores a long established practice. It offers a direct incentive to arrears accumulating, so that after the lapse of the statutary period of three years the ryot may wash himself clean

of all liability to arrears. On the other hand, it compels the landholder to resort to the civil court for every default, without showing any consideration to his tenant. In fact it is a premium on hard-heartedness, and discount on mercy. A zamindar should unquestionably have the right of crediting payments of rent to the account of arrears, if there be any, and the ryot should have no right to demand that it should be credited to a particular year and instalment, if the rent of previous years be in arrears. The item in question, being opposed to the established practice, should be omitted. Zamindars may fairly claim that the receipt they give to the ryot should be similar to the receipt granted to them by Collectors on the payment of revenue. It is necessary that the form of the receipt should be simple, and that it should not contain more than what is absolutely necessary, in view of the heavy and most unreasonable penalty which sub-section 4 imposes in respect of defective receipts.

Section 101.—As proposed by the Rent Commission, the landholder's agent should be paid a fee of annas four or eight before the ryot is declared entitled to get an account which the agent or his master is on no earthly ground bound to give. For reasons above stated, item (*f*) should be omitted.

Sections 103-107.—A ryot is at present allowed to deposit rent in the Collector's office on his verified statement to the effect that the landholder's agent has refused to receive the amount tendered to him, and that the amount is all that is due by the ryot up to the date of deposit. Nothing can be more reasonable than this provision. The Bill, however, proposes changes in the matter of deposit of rent which are unjust to the landholders, and quite uncalled for by the circumstances of the case. It proposes to allow deposits of rent to be made if the ryot has reason to believe (without an actual tender) that his rent would not be accepted; or if he is unable to obtain a joint receipt from all the co-sharers of a property, if he entertains a *bond-fide* doubt as to who is entitled to receive the rent. The Bill would therefore make the ryot the judge of his landlord's title and of his inmost intentions. It would give the ryot the power to convert the Collector's office into his landlord's kutcherry, and to compel his landlord to bring an expensive suit to establish his title against any person of the street who the ryot may choose to think has a rival title in the property. The proposition is so opposed to all recognised principles of law, and so dangerous in its effects, that in providing for interpleader suits by stakeholders the Code of Civil Procedure has expressly (section 474) excluded tenants from the category of persons who as stakeholders may compel rival claimants to interplead in a suit in court. The immediate effect of this would be to empower the Collector to assume the functions of a civil court, and adjudicate in an informal, but quite effective, manner regarding rights to one's property on the issue of a few rupees, and put the actual possessor out of possession on the alleged right of third parties. The Bill, moreover, would give a ryot much greater rights than what the Procedure Code gives to any other stakeholders. It would save the ryot from the expenses of a suit, but allow him to compel his landlord to plunge into an expensive and, in most cases, fruitless litigation. Provisions like these are calculated simply to breed ill-feeling, create animosity, harass both the interested parties, and give rise to endless litigation.

The provision for the service of notice on landholders is anything but satisfactory. In most cases no personal notice would be served, and the landholder, however poor he may be, is expected to have an agent always present at all the revenue offices of the district, to inform himself of the fact of deposit by any ryot from the notification required to be affixed at the revenue office. The provision for payment of the amount deposited is equally objectionable. The revenue officer may pay the amount to any person he thinks entitled to get it, and then the party aggrieved may recover the amount by a regular suit. In matters like these, in which the rights of parties are not involved, and in which legislation may go a great way to foster good feeling between the parties, a provision which will unnecessarily set class against class is wholly unwarrantable. The present law relating to deposit of rent is about as good as a law can be. If a time be fixed within which notice of deposit should be served on the landholder, or if a provision be made for the transmission of the money by a postal money-order to the landholder, all the improvement that it needs will have been made.

Section 117.—This section provides that if the landholder interferes with the cutting of produce in any way he shall be deemed guilty of criminal trespass. The objectionable nature of this section will be discussed in considering section 166 on distraint.

Section 119.—This section provides that the rent of no non-occupancy or korfa ryot should exceed $\frac{5}{16}$th of the value of produce of the land. As a matter of fact a much larger ratio is paid, not only by such ryots, but whole communities of occupancy ryots in several districts. This arbitrary limit, fixed in utter ignorance of existing facts and circumstances, is wholly unwarrantable. It militates against the express views of the Secretary of State, who has stated that a landholder should have the power of letting land which comes to his possession "at any rent he may obtain," and while it restricts the right of the occupancy ryot as regards his under-tenant, it leaves the under-tenant of the second degree entirely at the mercy of his superior tenant.

Section 123.—With reference to this section it is necessary to mention that both Sir George Campbell and Major Baring classed some so-called impositions under the head of abwabs or illegal cesses which are no abwabs at all. The selamies, for instance, which a landholder gets from a ryot for making excavations and taking earth for making bricks, for hewing trees, for excavating fish-ponds, &c., are not impositions in any sense of the term, but con-

sideration money for special privileges, which he is entitled to exact on every eqitutable ground. These acts of the ryot deteriorate the letting value of the land, and are therefore such as landholders are lawfully entitled to receive compensation for. Such selami or compensation landholders have in several cases recovered by suits in court. Indeed, the words *abwab* and *makthat* used in the section would not have covered them at all, but from the fact of some such payments being made annually or at recurring periods, or so long as the special advantages are enjoyed; and because the concluding part of the section declares all additions to the actual rent to be illegal, and in the next section impose a money penalty. It cannot and should not be the intention of Government to prohibit special charges for special benefits; and it is necessary therefore that the term abwab should be clearly defined, and exceptions should be expressly made with regard to such compensatory charges. In several places the imposition of abwabs has taken the place, and superseded the necessity, of enhancement of rent. It is in fact a moral adjustment of rent in consequence of the increased value of produce, and is in that light not so objectionable as it is supposed to be. The only other remark which need be made with reference to this subject is, that our legislators are evidently ignorant of the fact that what is called the mathat is a village fund raised by ryots for their own behoof, and not a fund raised by the landholder for his own benefit. The fund is made up of small contributions from all the ryots of a village, and is spent under the direction of the punchayet or committee of mundals of the village in churruck or other poojahs, in paying annual perquisites to the police, in village festivities, &c.

Section 125.—If occupancy holdings be made transferable by sale, they should be declared hypothecated like permanent tenures under the present law, for the rent payable in respect of them instead of the rent being made a first charge on them. The effect of the proposed change in the law would be, that the landholder will be reduced to the position of a first mortgagee, and that by reason of a legal recognition of other charges on the tenures the sales would fetch very inadequate prices, much to the loss of all parties concerned, and ultimately of the landhol lers Of what value would this declaration be to the landholder when any other sum due by the tenant may be made a first charge on the tenure, as section 218 does in regard to money due to under-ryots.

The primary charge on the land is the revenue due to Government, for argue how one will, the security of the rent is the security of the revenue, and every provision of law which makes the rent insecure reacts on the revenue. Doubtless the immediate sufferer will be the land holder, who will have, so long as the loss does not swamp all his profits, to make good all losses from his private resources; but the injustice of the act which brings on such a shifting of responsibility cannot but be patent. In the old laws special provision was made to prevent the permanent alienation of land on low, or nominal, or no rent, lest such acts would ultimately tell against revenue, and the principle which was sound then, has not lost its force in the present day, though the recent rise in the value of the property may not make the Government apprehend any immediate evil to its own interests.

Section 127.—Although as a matter of fact none of the improvements, beside, dwelling-houses, mentioned in section 126, are ever made by ryots, they should not be vested with a legal right to excavate thanks or take earth for making bricks for the walls and plinths of his own house without the permission of the landlord, and without payment to the landlord of an adequate fee or selami. In most agricultural villages excavations made in the land reduce its value, and land covered with water is always let at a much lower rent than dry land. If a ryot relinquishes a holding in which he has cut a tank, it rarely fetches the same rent which was previously paid, and the loss to the landholder is great if the relinquishment is made several years after the excavation, when the tank has partially silted up, and is unfit for cultivation on the one hand and for storage of water on the other.

Section 128.—The power which this section gives to ryots not having a right of occupancy of building houses and out-offices on the land without the permission of their landlords, of compelling their landlords to make improvements, and of making the improvements themselves in default of their landlords, is inconsistent with the very notion of such a tenancy. It would confer on them a right which not even occupancy ryots enjoy at present.

Sections 129-131.—The provisions for the award of conpensation for improvements made by ryots are altogether foreign to this country. Improvements are rarely made by ryots. Nothing is more true than what feel from His Excellency the Viceroy on this subject in the course of the debate on the Central Provinces Tenancy Bill. All these provisions should therefore be omitted. Some of the detailed provisions regarding compensation for improvements are discussed below.

Section 129.— This section provides for the award of compensation to ryots for improvements made by them. In most cases the amount of outlay would be more than repaid by the advantages which the ryots would enjoy by reason of such improvements, and it would in such cases be unreasonable to give them any compensation at all for such exhausted improvements.

The limitation prescribed in this respect by the Rent Commission was an equitable one. They suggested that no compensation should be awarded after a certain number of years from the making of the improvement.

Section 131.—With reference to the remarks made under section 129, the time during which the ryot has enjoyed the benefit of the improvements should be taken into account in determining the amount of compensation.

Section 133.—The landlord's right to measure all the lands of his village should be unrestricted, and the exception suggested in this section with regard to revenue-free lands should be omitted. How would a landholder right himself, when a revenue-free holder has encroached upon and appropriated adjacent mal lands, if he is not allowed to measure such lands? The present law places no such restrictions in the way of the landlord.

Section 135.—This section provides for cases in which a ryot occupying land refuses to attend the measurement and point out the boundaries, but the Bill takes no notice whatever of the important class of cases provided for by the present law, in which the landholder, usually a new purchaser, is unable to ascertain the names of the ryots or persons who are in possession of particular holdings in his estate. In such cases a landholder is placed in a situation which entitles him to as much help from a public officer as in any other. It is a situation which purchasers of estates and tenures at auction sales are frequently placed in. The Bill should provide for such cases, as well as impose penalties for determined attempts on the part of the ryots to thwart the Collector's attempt at a measurement of the land.

Section 139.—The landholder is required by section 91 to give six moths' previous notice even to a tenant-at-will, before he can apply for his ejectment. In common fairness the ryot should give previous notice of an equal period before he is allowed to relinquish his holding. This section prescribes only three months' notice.

Section 140.—For reasons stated with reference to section 46, the time should be reduced from one year to six months. If absence for one year from the village be an unreasonably long time in the case of an occupancy ryot, how much more so must it be in the case of a tenant-at-will before the landholder is permitted to let the land to another. The section amounts practically to the declaration that a landholder should forfeit a year's rent for every runaway tenant.

Section 142.—A provision which gives the owner of a minute fractional share in a property, or a single ryot the right of applying to the District Judge for taking it out of the hands of the proprietors thereof and placing it in charge of a joint manager, would be productive of very great mischief. Such an interference with the rights of private property can be justified only on the ground of public good, and it is only in exceptional cases that a District Judge should be empowered to appoint such a manager, but a provision empowering him to do it whenever a dozen ryots represent that such a course would lead to public convenience, or the owner of $\frac{1}{16}$th share represents that it would conduce to his benefit, would be a most unwarrantable and officious piece of legislative interference with private property. The most objectionable feature of the law is the power it virtually gives to the Judge to adjudicate questions concerning possession in an indirect manner and without due precaution. The proviso attached to the section is intended to serve as a safeguard; but as in all disputes of the kind the real contention will be about possession, either the law must fail, or the Judge must take up the question of possession in an indirect manner. Much of the objectionable character of this provision would be removed if it were provided that no joint manager should be appointed, unless the owners of more than half the share of the property apply for the same.

Section 151.—The circumstances which would justify the removal of a tract of country from the jurisdiction of the ordinary courts, and placing it for the purposes of settlement of rent under the jurisdiction of revenue officers, must be of an exceptional character. The first ground therefore on which this section would allow such a removal is very objectionable. Let the Local Government have the power of ordering such a transfer when an agrarian disturbance is threatened or when settlement in a khas mehal is to be effected, but it would be dangerous to give a number of landholders or a number of tenants the right of applying for it.

Section 164.—For reasons above stated no record of rights should be undertaken in any tract of country on the application of landholders and ryots. The first ground laid down in sub-section 2 of this section should therefore be omitted. If it were allowed to stand, it would be in the power of the ryots of any village to ruin their landlord by compelling him to meet all at once their claims to fixity of tenure and fixity of rent, and such other rights as they might choose to claim.

Sections 166 to 187.—Distraint of crops for the realization of rents is an indigenous institution of the remotest antiquity. It enables the landholder to collect his rents by the agency of his permanent establishment, without adding in the least to his own expenses, or saddling any cost on the ryot. It prevents the ryots, on the other hand, from cheating their landlords of their just rents, and in so far acts as a check to fraud and improvidence. It is only in rare cases that the power has been abused, but an abuse of power in matters relating to distraint is so easy to prove, and the penalties for offences committed in connection with it are so heavy, that the law might be left safely to vindicate itself. In Bengal at least, cases of abuse of the power of distraint have been very exceptional. It was the majority of the members of the Rent Commission who, labouring under an error, assumed the institution to be an offset of the English law, and suggested a radical modification of it on purely theoretical grounds. The framers of the present Bill have improved upon the alterations in the law suggested by the Rent Commission, and drafted under the head of Distraint a number of provisions which not only bear no resemblance to the institution of distraint, and amounts practically to a total abolition of the law of distraint, but actually deprives the landholder of even some of the rights which an ordinary creditor enjoys

under the law of the land. Distraint has always been understood to be an act of a landlord or creditor as distinguished from attachment, which must be the act of a constituted authority. But the Bill provides that if a landholder wishes the crops of a ryot to be distrained for recovery of his rent, he must make an application to court for the purpose; that such an application must contain all the particulars required for plaints, if not more; that it should be signed and verified like a plaint; that, the amount of arrears should be proved as in suit for arrears of rent; that the court may then either admit or reject the application; and that if admitted, an officer of the court would be deputed to distrain the crops. Where, in the first place, is the necessity of laying down all these elaborate provisions, when it is open to the landholder to have, like any other plaintiff, the crops of a defaulting ryot attached before judgment under section 483 of the Code of Civil Procedure, immediately after bringing a suit for recovery of rent? What facility would the Tenancy Act give the landholder over the ordinary procedure of civil courts when he would have to pay the court fee, adduce evidence, and pay the expenses of attachment all the same? What inducement would there be to the landholder to apply for such an attachment in regard to a poor ryot paying a small rent, when the costs of suit and attachment are likely to eat up the whole value of the crops, and of what benefit would these provisions be to any ryot who would be thus unnecessarily saddled with a large amount of costs? Consistently with the other provisions under this head, the Bill provides for heavy penalties and punishments for certain acts in connection with attachment of crops. But why should any penalties be at all imposed beyond what the ordinary law provides for attachments made by order of the court, by an officer of the court, and after proof to the satisfaction of the court of the justice of the claim?

The primary object of an amendment of the Rent Law, according to the repeated avowal of the Bengal Government, was to provide facilities to landholders for the realization of rent, and the section under notice deprives them of one important facility they now possess, without supplying them with any adequate substitute.

Section 194.—It is not unfrequently that defendants purposely allow judgment to go by default in rent suits against them, and then after they have seen the plaintiff's cards, apply for a revival of the suit on the ground of non-service of summons upon them. Let every precaution be taken for the proper service of the summons, but let not such applications for revival be recklessly entertained, as at present. The proposal to have the summons served by post under a registered cover would be a great improvement on the present procedure.

Section 198.—Section 109 provides for damages to be awarded to the landholder for wilful default in the payment of rent. A suit for the recovery of such damages should be classed in the same category as regards appeals, as a suit by a ryot for the recovery of a penalty. If there be no appeal in one case, there should be no appeal in the other.

As regards rent suits, it is a great mistake to suppose that suits for small amounts are of no moment. They form the largest number of suits in the courts, and they are often suits of great importance. In suits in which the amount of rent annually payable by a ryot is in dispute, the High Court has held that no appeal lies to that court, inasmuch as no question of title is involved, but in such cases an appeal should be allowed in the interests of both parties, and the proposal to make the decision of the first court final in suits in which the amount involved does not exceed Rs. 50, should be abandoned.

Section 199.—In suits for recovery of rent, where the ryot pleads the title of a third party, the payment of rent into court should be made obligatory on the ryot, and not left as a matter of discretion to the court. The principle which underlies this section is, however, radically unsound. Both by the English and Indian laws a ryot is estopped from denying the title of his landlord (Indian Evidence Act, section 116). A ryot who denies his landlord's title forfeits his own title to the land, which lapses to his landlord. The effect of this section would, however, be to hold out an encouragement to the ryot to deny his landlord's title, inasmuch as he would thereby evade payment of rent at least for a certain time. Matters like these should be left to the decision of the constituted judicial authorities, and not made the subject of arbitrary legislation.

Section 201.—Sub-section 2 gives the court a discretion to fix the date from which a decree for enhancement of rent should take effect. The rule laid down in sub-section 1 is reasonable enough. The Bill provides for so many and so diverse limitations in the way of enhancement of rent, that it would be a matter of great difficulty to a landholder to get enhanced rent. Why unnecessarily increase the difficulty by giving the court an arbitrary discretion which will place an additional obstacle in his way? Were it the policy of Government to prohibit enhancement, it would be well openly to declare it; but as we believe such is not the case, we consider the difficulties thrown in the way of enhancement are, as they would practically make it, not worth the while to seek it by reason of the trouble, annoyance, and heavy cost, unsound on economic grounds, and unfair towards the landholders, who have the right of protection, is common with all other classes of the community.

Section 206.—The time within which the money due, either to the landholder or to the tenant, in connection with a decree for ejectment must be paid should be limited. It should not exceed 15 days.

Section 208.—Item (*f*) of this section is very objectionable. It is an encroachment on the rights of auction purchasers at sales for arrears of rent which they have all along enjoyed. The effect of item (*f*) would be to deprive the purchaser of the right of avoiding

a mookururee of other permanent lease created by the defaulting tenant. Such a provision is opposed to the fundamental principles which regulates sales for arrears of rent, viz., that they restore the tenure to the condition in which it was at the time of creation, and give it to the purchasers free of all incumbrances created by the out-going tenant. Section 66, Act VIII of 1869, provides for the sale of tenures free of all such incumbrance. The proposition is also one which would give rise to fraud and litigation, inasmuch as every defaulting tenant will try to make the best of their incumbency by creating mookururee leases in favour of relatives and dependants.

Section 210.—The provision for the sale of tenures for arrears of rent subject to registered incumbrances in the first place, and then, if necessary, free of such incumbrances, would simply increase the costs of litigation, which will ultimately fall on the ryot, deter intending purchasers from bidding at sales, fetch inadequate prices for the tenures, and thus cause material injury at every step, both to the landholder and the ryot. The sale should always be, as at present, free from all incumbrances.

Section 215.—This section gives the Local Government the power of extending to occupancy holdings the provisions of section 210 regarding tenures. As observed above, it is a very objectionable proposal. Much more so is it in the case of occupancy holdings, the minute subinfeudation and divisions of which should certainly not be allowed to be perpetuated.

Section 218.—This section gives a sub-tenant of the first, second, or third degree a right to stop the sale of the superior tenure or holding by paying in the amount of arrears of rent due on account of that tenure or holding, and makes the amount so paid a first charge on the tenure or holding. The landholder's lien on the land should be paramount under all circumstances, but this section would materially affect it. In the case at least of occupancy holding the amount paid by a sub-tenant to protect the holding from sale should be made a personal debt of the defaulter, as otherwise of what use would be the lien which section 215 declares the landholder to possess in the land?

The attempt to incorporate in the proposed Act the law relating to patni tenures should be abandoned. Sections 36-42 and Schedule III should therefore be omitted. The present law on the subject is a master-piece of legislative wisdom. It has stood the test of experience of more than 60 years, and has always been found to be a complete and satisfactory law on the subject.

APPENDIX A.

Memorandum by* MAHARAJA SIR JOTINDRA MOHUN TAGORE, BAHADUR, K.C.S.I., *on the subject of affording facilities for the realization of rent.

I think it will be admitted on all hands that the Government, which has recourse to the rigorous sun-set law for the realization of its revenue, ought to offer equal facilities to the zamindar for the collection of his rent. The Permanent Settlement Regulations have repeatedly recognized this obligation on the part of Government, and the earlier laws relating to the recovery of rent by zamindars were framed with that object. Abuses having, however, crept into the old system of collection, Act X of 1859 was enacted, and the difficulties interposed by the new law were aggravated by Act VIII of 1869 (B.C.), by which the trial of rent-suits was transferred from the revenue to the civil court. A suit for the recovery of arrear of rent is now a regular civil suit. It takes ordinarily from four to six months, sometimes a longer period for disposal, and while the zemindar is engaged in protracted and harassing litigation, he is obliged to meet the Government demand from his own pocket, that is to say, by borrowing money where the arrear is heavy and he has not independent means to pay the revenue. The ryot is also a loser, under this system, for as a rule he is cast in an arrear suit, and has consequently to bear ultimately the costs of the suit and interest upon the rent due, not to mention the trouble and harassment to which he is equally subjected. The majority of the rent-suits are decided *exparte*, and under the present procedure both the zemindar and ryot suffer,—the zemindar by reason of the delay involved in going through the forms, and the ryot in consequence of the costs which necessarily devolve upon him.

Under the circumstances a law for the recovery of rent which would be at once cheap, speedy, efficacious, and just to all parties has become absolutely necessary. Having been invited by His Honor the Lieutenant-Governor to suggest a scheme for the amendment of the law in this respect, I venture to submit the following :—

Firstly.—Without disturbing the present rent kists or instalments, which vary according to local usages, I would declare a specified quarter-day for the payment of the quarter's rent, failing which a suit for arrear shall lie. Where the kists are monthly, as they are for the most part, the zemindar shall be entitled to receive the rent according to monthly instalments, but if the monthly instalments be not liquidated by the quarter-day aforesaid, he shall be competent to institute an arrear suit.

Secondly.—In default of the quarterly instalment as suggested above, the zemindar or the rent receiver shall be competent to make an application to the Collector, setting forth the name of the defaulting ryot, description of the holding, and the mouzah in which it is situated, the amount of the annual rent, the amount due, and the period for which the same may be due, with a statement of accounts giving details of the jumma or rent, the instalments in which it is payable, and the amount paid or payable by the ryot up to the end of the quarter. But the application and the amount should be verified by the naib or gomashta as the case may be.

Thirdly.—With a view to save costs and trouble, the zemindar should be allowed to sue the defaulting tenant collectively, by an application written on a stamped paper of 8 annas value. This sort of a collective suit is permitted under the North-Western Provinces Rent Act, and also under the Agrarian Disturbances Act. I recommend a stamp fee of 8 annas for a collective suit in order to lighten the burden upon the ryot.

Fourthly.—On receipt of the application the Collector should serve a notice upon the defaulting tenant or tenants, calling upon him or them to pay arrears due with costs up to that stage, or to deposit the sum in the Collector's kutcherry, if he or they should contest the demand. The notice should state that, if the payment or deposits be not made within fifteen days from date of service of notice, the tenure of the defaulter or defaulters shall be sold by public auction on the day to be fixed in the notice, which should be served by a single peon upon all the defaulters residing or holding land in the same village, *firstly*, by affixing it in the zemindar's kutcherry, if any, in or near the mouzah; *secondly*, at the police thana, if any, in as near in the mouzah; *thirdly*, in some conspicuous part in the village; *fourthly*, by proclamation or beat of tum-tum in the village; *fifthly*, by affixing it on the land on account of which the rent is due. The serving peon shall procure the signatures of three substantial residents residing in the neighbourhood in attestation, of the notice having been brought and published on the spot. In case the people of the village should object or refuse to sign their names in attestation, the peon shall go to the kutcherry of the nearest Moonsiff, or, if there should be no Moonsif, to the nearest thana, and there make a voluntary oath of the same having been duly published. Certificate to which effect shall be signed and sealed by the said officers and delivered to the peon.

Fifthly.—The sale of tenures should not be stayed unless the arrear claimed be deposited. In case the defendant make the deposit and propose to contest the suit, the Collector should try it under the procedure laid down in Act VIII of 1869. The zemindar, or the person claiming the rent, shall be entitled to take out the deposited amount on giving proper security.

Sixthly.—Should the Collector find that the demand is not just, or is in excess of actual amount due, he should levy a fine upon the claimant, not exceeding twice the amount so claimed, in addition to all cost, and should make over the damages so realized to the defendant by way of compensation. Should it appear that the accounts made up for the zemindar have been falsely or fraudulently prepared by the attesting servant of the zemindar, he, the servant, shall be liable to a criminal prosecution.

I propose the above procedure for the realization of rent from ryots having occupancy or mookarari rights. I am aware that under the present law occupancy tenures are not saleable or transferable, but in many districts the usage sanctions sale for arrears of rent, which is largely resorted to in practice. I would legalize the sale to that extent. The purchaser shall have the same right and interest that the defaulting tenant possessed. I should observe that the existing law enjoins the eviction of the occupancy ryot in lieu of the sale of the tenures, but the courts are generally reluctant to enforce this provision, inasmuch it throws the ryot adrift. Under my scheme the ryot may, if he likes, buy in his own tenure, or if it be sold to a third party he will obtain a fair value for it.

It will be observed that I proposed to place the whole procedure in the hands of the Collector. But should the agency of the civil court be considered preferable, I would suggest that the proceedings in the civil court should take place only when there would be contention, and after the deposit has been made in the Collector's kutcherry by the defendant. The procedure of the civil court should of course be the same that has been prescribed in Act VIII of 1869 (B. C.).

20th August 1876.

P.S.—With regard to non-occupancy tenures, the preliminary procedure suggested above will apply: in case the arrear adjudged be not paid, the defaulter should be evicted.

THE PETITION OF LANDLORDS OF BENGAL AND BEHAR TO PARLIAMENT REGARDING THE BENGAL TENANCY BILL.

1.—*The Petitioners' Stand-point.*

The constitution of the Anglo-Indian Government at the close of the last century deprive the people of India of all share in the deliberation and adjustment of their affairs by it. "It had been customary," as Parliamentary records shew, "for the landholders of distinction, and other principal inhabitants, to maintain, in proportion to their rank, an intercourse with the ruling power."* This custom was brought to an end under the British rule, and the zemindar "was referred to the Code of Regulations as the only protection any longer necessary to maintain him in the possession and enjoyment" of his benefits.†

But the Regulations are modified from time to time, and not seldom the very policy of the laws is changed. And then the zemindar and his fellow subject are liable to lose, and have at times missed, what he once possessed. They still possess the right of making petitions, but that is often found insufficient, so that the last resource left to them is to appeal to Parliament. Hence the petition to which this is intended to form an explanatory note.

The petition comes from subjects who are quite unrepresented; it comes to their Sovereign exercising absolute powers over them; and it comes from a quarter of the globe afar. The

* 5th Report of the House of Commons, p. 54. † Ditto ditto, p. 55.

landholders of Bengal belong to no party in England, and it would be their misfortune if party considerations should affect their interests in Parliament. In this regard they labour under peculiar disadvantages owing to the transfer of Government from the East India Company to the Crown. But it is still more unfortunate for them that somehow or other questions relating to Ireland have just now got mixed up with their affairs in India. Indeed, it is apprehended that the intense agitation in the United Kingdom on these questions may have largely influenced, if not actually originated, the changed policy against which the present appeal is submitted to Parliament.

The position of the petitioners is thus extremely delicate. But it is hoped that the wide difference between a European and an Asiatic country—an integral part of the kingdom and a far off dependency—will not be overlooked, but will, on the contrary, serve to remove any prepossessions which might otherwise prevail. Changes which may be justified by the constitution of Parliament, or by the peculiar circumstances of Ireland, or Great Britain, or Europe, may not be fitly transported to a distant and conquered country like India, and among a people whose feelings, views, habits, customs, and social conditions are, in the natural course of things, so widely dissociated from those of the sovereign power. Besides, in Ireland, troubles traced to a long and painfull history may have justified the measures recently adopted by Parliament: in India nothing of the kind has occurred, or is to be apprehended for very many years to come.

The landlords of Bengal do not claim or possess any class privileges over their tenantry; their relation is not derived from conquest or political ascendancy of any kind, as was the case in Ireland, nor is there any the least distinction of race between the classes said to be arrayed against one another. Hence they feel aggrieved that a class question should be raised between two sections of the same community who are constantly passing from one to the other, and many of whom belong to both sections in relation to different individuals. Property-questions certainly exist, as they do exist, all over the world; but the legitimate remedy for differences arising from such causes is, of course, impartial dispensation of justice between individuals. They do not suggest a repressive policy to be directed against the topmost section, really or ostensively for the benefit of the lowest order of society. Such a policy, dictated at best by sentimental reasons, cannot but be subversive of the hitherto prevailing course of legislation and system of land tenures, and a source of serious mischief. Such a policy and consequent legislation of vast magnitude, and those adopted and conducted without any concert with the people so deeply to be affected thereby. Such a change, advocated only by gentlemen belonging to a foreign race, who again, by their tenure of office, are quite cut off as much from the traditions of their predecessors as from local experience of their successors—the landholders of Bengal firmly deprecate and respectfully protest against. Such revolutionary changes, they contend, urgently calls for Parliamentary interference, and their prayer is that further progress of the Bill entitled "The Bengal Tenancy Bill" may be stopped by order of Parliament.

2.—*Revolutionary character and inexpediency of the proposed measure.*

The foremost contension of the petitioners is that the changes proposed will injuriously affect private property in land of great value: in fact the bulk of all that exists in the country. It will be shown gradually how far the policy of Government in this respect is being revolutionized, and to what vast extent the property is going to be re-distributed, and how, to attain these objects, disabilities of the most complicated kind are going to be imposed upon the people. But the general truth of this contention will be manifested by the opinions of responsible officers of Government, as given in the following extracts:—

Mr. Ravenshaw, Commissioner of the Burdwan Division, reporting on the subject some time between July and December 1880, says:—

"I am not in favour of revolutionary measures, and I think that legislation should rather take the form of consolidating the existing law and rulings than re-constitution of the relations between rent-payer and rent-receiver, which must produce an increase rather than mitigation of existing evils.

"For all practical purposes, it would suffice to re-enact the law with as little radical change as may be possible, with reference to the conflicting interests concerned.

"As regards the existing law, nothing can be more precise and clear than Mr. Field's Digest. The present law has been, with little variation, in force for 20 years; and so far as my experience goes, it needs only slight modification and simplification to adapt it to the real wants of all parties."*

Mr. Beames, successor to Mr. Ravenshaw in the same office, but with experience derived from another division of the province, says, under date the 26th April 1881:—

"From the experience I have had of the very great difficulty which the officers of Government feel in managing wards and attached estates in the Chittagong and Dacca Divisions, I am convinced that the position of the zemindar (landlord) in those parts is a precarious one. As far as I am able to judge, it will be rendered more so if the present Bill, moderate as it is, becomes law.

"After tacitly acquiescing in the assumption and exercise of certain powers by the zemindar for nearly a century, it is rather late in the day to discover that it was never intended that he should have those powers, and that neither past history of the land question, nor the legislation under British rule, justifies him in in exercising them. That, in fact, his status is, and has all along been, understood to be something very different from what it practically has been.

* Report of the Government of Bengal on the proposed amendment of the Law of Landlord and Tenant in that province, Vol. II., p. 162.

"I am not aware that any section of the community in Bengal has suggested or manifested any desire for new legislation on the rent question. If there is really a want for it in Behar, it would perhaps be sufficient if a law were passed giving the inhabitants of that province the relief they desire without disturbing another province where no change is called for."*

Mr. Smith, Commissioner of Orissa, says :—

"Nearly a hundred years have passed since the time of the Permanent Settlement. The power conferred on the zemindars of selling their estates has been largely used, and money has been largely invested in this description of property with regard rather to existing usages than to old and forgotten minutes in Government offices. Neither the ryots nor the zemindars of the present day have, as a rule, had much regard in their dealings to the minutes of Lord Cornwallis, although the usage of the time under which the ryot is to pay only a fair and equitable rent is in accordance with its spirit.

"It appears to me that any legislation to be now adopted should be directed towards facilitating the ascertainment of what the fair and equitable rents are, rather than to any extensive adjustment and alteration of existing relations, and a measure of this sort would, I have little doubt, prove acceptable to both tenants and landlords."†

Mr. Monro, Officiating Commissioner of the Presidency Division, speaks still more strongly. The following extracts are given in order to avoid longer quotations. The Report is dated 31st December 1880 :—

"So far as the practice of Government is concerned, I fail to find in their dealings with the ryots upon Crown lands any indications of the recognition of a living tenant-right among any class of ryots save and except those known as khodkasht (resident) or kudeemi (ancient).

* * * * * * * *

"I do not here stop to consider the various modifications in the rights of zemindars effected by Act X of 1859. It will be sufficient to mention that sundry very important modifications of these rights were introduced by that Act; that such modifications were strenuously resisted as infringements of the rights of zemindars under the perpetual settlements; and these modifications have, although unwillingly yet practically, been accepted by zemindars as the basis of the relations between them and their tenants.

"The proposed Bill (*i.e.*, the one prepared by the Rent Commission), however, goes very much further than Act X of 1859. It further curtails the rights of the zemindars."

* * * * * * * *

"I cannot see that it is just to them, whatever may have been their failings, to deprive them of rights * * * which, so far as I know, have been believed universally to attach to the position of a landholder in this country. Nor does it seem to me to be just to declare the existence of rights on the part of ryots * * * which, so far as I know, are not claimed as belonging to them by the ryots themselves.

"The proposed Bill seems to me, on the principles above referred to, to contemplate grave infringements on the rights of zemindars as hitherto recognised; to destroy such recognised rights and to give the landholders no compensation for such damage done to their interests. It seems to me moreover peculiarly unjust to contemplate such restrictive legislation with reference to the rights of zemindars, when the whole tendency of recent legislation on the part of Government has been to throw more responsibilities on the landholders in the way of providing funds for improvements connected with lands."‡

Lord Ulick Browne, Commissioner of the Cooch Behar and Rajshahye Division, says, under date the 1st February 1881 :—

"I think such important changes, deeply affecting the rights and pecuniary interests of a large and important class in a vast country, should only be made on very strong grounds, such as, for instance, the grounds advanced by Mr. Gladstone when introducing a somewhat similar measure for Ireland in 1870, when he supported his proposals by urging that, as good general laws...had failed to dispel the serious ill-feeling of the mass of the population of Ireland towards England and the Government of the United Kingdom, it was necessary to take an extreme step in a direction specially acceptable to that population, in the hope that it would put an end to what was always a serious political danger. No strong and special grounds, political or other, exist in the present case, nor are they asserted by the Commission, who, indeed,......seem.........to be unanimous in holding what is a nearly universal opinion, *viz.*, that the ryots of Bengal are stronger than the zemindars."

In the opinion of His Lordship the proposed law would be in accordance solely with the "individual views" of some "gentlemen (the majority of the Rent Commission) as to what the respective positions of landlords and tenants *ought* to be; and a key to their general views...may, perhaps, be found in their adoption, in the face of Lord Cornwallis' declaration, ...of the politico-economical axiom, that the land of the country is the property of the people of the country." Further on he says :—

"Not only there is no general feeling of discontent among the ryots, in whose favour it is now proposed to sacrifice the zemindars, but that there is not even a partial feeling of that nature, and that the ryots of Bengal Proper, at all events, are, as a body, in a prosperous and contented condition.............Lastly, I think the passing of such measures into law would

* Report of the Government of Bengal on the proposed amendment of the Law of Landlord and Tenant in that province, Vol. II, p. 362.
† Ditto ditto, Vol. II, p. 200.
‡ Ditto ditto, Vol. II, p. 219.

create no little discontent among the zemindars as a body, though being loyal and well-affected, they will bow to the decision of Government."*

The Officiating Commissioner of the Dacca Division, writing on the 27th December 1880, says:—

"Innovations in the law and the creation of principles foreign to the customs of the country are, I maintain, strongly to be deprecated, unless their urgent necessity can be demonstrated."

Speaking of Chapter IV of the Bill of June 1880, he says:—"I see no reason for the innovations proposed in this chapter, which would create a class of ryots never before in existence."†

Thus, it will be seen, the Commissioners of the western districts grouped under Burdwan, of the Eastern districts under Dacca and Chittagong, and of the Central districts under the Presidency, Rajshahye and Cooch Behar Divisions,—all the Commissioners of Bengal Proper in fact, besides Orissa and other places, have, in terms more or less explicit, recorded their opinion that the measure proposed is decidedly of a revolutionary character. And it is well known how the present Chief Justice of Bengal has also borne testimony to the same fact in a minute seperately given to the public (dated 6th September 1882).

3.—*The Permanent Settlement.*

The petitioners do not enter into the history of the permanent settlement. But the landlords of Bengal cannot help observing that their mortification becomes naturally great when they find even a reference to the documents of their title is repelled with pleasantry ‡ or displeasure by representatives of the Sovereign power. The Law Member of H. M.'s Government in India has no time to enter into an exhaustive inquiry into the meaning and effect of the permanent settlement, and yet the legislature has taken up the functions of judicial authority, in order to decide the question of right determined by that settlement as between the Government, the landlords and cultivators of the soil in Bengal!

The petitioners have not been shewn the danger which may have rendered expedient the present extreme measure, and the arguments adduced are all the more painful to follow, because they are unsupported by facts, and still more because all forms of arriving at facts have been arbitrarily set aside.

It has been assumed that at the time of the permanent settlement three different parties were interested in the transaction, and that the authors of the measure settled and defined the mutual rights of only two of these, but put off for the future all questions as between the second and the third. "The ryots," says Mr. Ilbert, "were not consulted about the arrangement, and were in no sense a party to it, and, according to the most ordinary principle of contract, it could not affect *any right* which they then had, or *might thereafter acquire.*"§

An immediate reply to this argument would be that, in the sale and purchase of slaves, the third party was never consulted; but in abolishing slavery in the West Indies, the British Parliament never adverted to it, and sanctioned ample compensation for the revocation of the contracts.

This extreme case apart, the question at the time of the settlement did not concern the alleged third party. As a matter of fact, the old proverb, "the lands belongs to the zemindar and the rent to the king"¶ would seem to point in quite a contrary direction, and to fairly bear out the daily experience of everybody, that the ryots have no right in the soil, except what is conferred by the zemindars. It is true that the Government reserved to itself the power of legislation for the protection and welfare of the ryots. But surely that did not imply the abrogation of the substantive law, or the rights conferred on the zemindars by the permanent settlement? The simple question is, whether the leading provisions of the Bill fall under the reservation referred to. And it is for Parliament to consider whether, in a matter like this, and especially when one of the parties interested appeal to the judicial wisdom of the United Kingdom, the executive authorities should ignore that appeal and instruct the legislature to enact a law suited to their extra-judicial opinions and at variance with other laws still in prevalence.

The well-known Sudder Judge, Mr. Hawkins, thus interpreted the permanent settlement:—

"It is a narrow and contracted view to suppose that the permanent settlement consists in nothing more than the obligation on the part of the zemindar to pay a certain amount of revenue annually to the Government. The settlement is a compact by which the zemindar engages on his part to pay a fixed amount of revenue to the State; and the State on its part guarantees to the zemindar, by means of its judicial and fiscal administration, the integrity of the assets from which that revenue is derived, and which in fact constitute the Government's own security for the realization of its revenue."

The contention of the petitioners is that, of the three parties—the State, zemindars, and cultivators—the first had, without consulting the other two, virtually plotted out the map of the country; that it then distributed the different portions to individuals comprising the second class, defined most accurately their respective liabilities to the State; and required them to respect any claims against them, such as might then exist, on the part of any individuals of

§ Ditto Ditto, p. 91.

¶ Hartington's Analysis. Extracts published from the Office of Superintendent of Government Printing, p. 8.

the third party. Nothing was left open for legislation as to the *substantial rights* of subsequent cultivators.

The Government, though a conquering power, sought at first to assimilate its position with that of a landlord, but as landlord it took every care to appropriate all that lay at its feet as conquerors. The main transaction undoubtedly concerned property in land. And there is no question that the State had made up its mind to forego for ever all its claims as landlord for a fixed annual return. But it had after all to make its choice between the two other parties in order to decide to which of them it should look for the money—call it rent, revenue or whatever you like. And the considerations incidental to such choice could not possibly be put off; nor was the sovereign power then so distinct as to allow of its foregoing as landlord any right which it was not necessary for it to give up.

The considerations alluded to may be distinguished in the following way, with a view to hold in contrast the revolutionary principles of the Bengal Tenancy Bill:—(1) Land occupied by cultivators; (2) land lying waste; and (3) land which might be expected to become vacant subsequently. It is wrong to suppose that the State took all the land in the country as a whole and legislated for revenue-payers and rent-receivers, leaving the question between rent-payers and rent-receivers perfectly undecided. At all events this is a question of fact, and cannot be decided *ex parte* by the supreme landlord, because that landlord holds the sovereign power.

Viewing the matter from the above point, it would follow that, if the State omitted to determine any question between landholders and cultivators, it could only have been with respect to the land which was occupied by cultivators, and held by their landlords. And the claims of these cultivators were respected for a special reason, *viz.*, because there were higher claims set up on their behalf, the claims, that is, to the permanent settlement which was made with their landlords. In respect of the other two descriptions of land, the landlords deny that the cultivators had any right whatever.

They could not possibly have had any such rights, and for the simple reason that they had no distinguishing features of character to form them into a class, and that they have never formed a distinct class of the kind. There have indeed been caste reasons precluding some people from the ploughman's work. But that has never led to the recognition in any persons to a preferential claim to the lease of any land going to be let out; and the proof for this contention lies in this, that no rules are known to exist to decide in such matters between rival applicants for lease. Village communities are said to possess an indefeasible right in the land, but village communities have been broken up in Bengal since long before the Permanent Settlement; and it would, besides, be most singular if, in the primitive communal system, the upper classes had no rights whatever, and the land had belonged entirely to the lower, *i.e.*, the cultivating classes in the country. In fact, where the village system has not gone out of use it was invariably the upper classes who held as well the village franchise, as the proprietary rights in all the village lands.

But even if the cultivators had any claims to the lands referred to—lands remaining or subsequently becoming vacant or waste—such claims must have been extinguished by the conquering power having laid hands upon them and made them over to the landlords of their choice. "In case of foreign invasion," records Lord Cornwallis, "it is a matter of the last importance, considering the means by which we keep possession of this country, that the proprietors of the lands should be attached to us from motives of self-interest" (Fifth Report, p. 492). It may be that the present motive to the proposed changes is something of this same kind. But its obvious inconsistency with the old policy would be sufficient to neutralise the effects of both, and thus the new policy of this kind would stand self-condemned.

As regards the lands of the then existing cultivators, the case was a little different; but different only in relation to the Government. If the Government of 1793 believed that the cultivators were "the actual proprietors of the soil," and yet accepted the zemindars as such, their action was a huge fraud. If they committed a mistake, it would be as great a wrong to relieve the State of its consequent responsibilities in the way proposed. Happily, neither of these theories is tenable. The truth is, the farmers of the permanent settlement believed the zemindars to have been, as they were in fact, the rightful owners. But situated as the Government then was, they tried to do all that lay in their power to serve the cultivators who had become, in some shape, rivals to the zemindars, in regard to the grant of the permanent settlement; and they laid down that the claims of these persons, as against the zemindars, would be duly considered by the judicial authorities then being appointed.

It is necessary to understand this point; for people are apt to be taken away by the comparatively irrelevant fact that the policy of granting permanent settlements has not been adhered to by the Government in administering the affairs of the North-Western Provinces, or of Bombay. The Madras settlements were earlier, and led probably to the claims on behalf of the cultivators. Thus the permanent settlement of Bengal, whether good or bad, as a piece of fiscal policy, whether wright or wrong, as a political measure, was the result of mature deliberation, and to break it by roundabout means would obviously be worse from considerations of either kind.

The engagements of the time, it may be repeated, was made in respect of land, and not in respect of cultivating, as distinguished from rent-receiving classes; for it was the land which was made over to one or other of the applicants, and it was never that the members of any particular class had to be provided with land from the country by Government, or from the village by the landholders.

And as for that permanent settlement itself, the parties were at first, and only for once,

chosen with reference to the history of their connection with the lands. But this was only when the new departure was to be made. And then, too, sufficient regard was shewn to all other sections of the community by the provision that, in the event of the estates being afterwards sold by the State or by the landlords themselves, all prior claims derived from such history would be entirely overlooked. And if anything more was necessary in order to further disarm the zemindars, it was accomplished by depriving them of the rights of primogeniture, of the functions of keeping the peace of the country and administering justice over the tenant classes, and of the power of levying taxes on cultivators and duties on trading people.

Mr. Ilbert says:—

"We have indeed been told that it was part of the bargain between the Government and the zemindars that the latter should not only be exempted from payment of revenue for lands which were then waste, but which might subsequently be taken into cultivation, but should be given full and absolute discretionary powers as to the mode of dealing with such lands, unqualified by any village custom or local usage. But it would require extremely strong and clear words to make an enactment conferring such powers"*

The following, however, appears in section 31 of Regulation II of 1819:—

"Nothing in the present Regulation shall be considered to affect the right of the proprietors of estates for which a permanent settlement has been concluded to *the full benefit of all waste land* included within the ascertained boundaries of such estates respectively at the period of the decennial settlements, and which have since been, or may hereafter be, reduced to cultivation. *The exclusive advantages* resulting from the improvement of all such lands were *guaranteed* to the proprietors by the conditions of that settlement."

Whether or not these words "are strong and clear," the only "guarantee" now left to the landlords of Bengal is reliance on the high sense of justice of the British Parliament. For all but the last three lines of the above were cited in Council and found to fail.

The issues should be clearly defined in order to determine the question raised, and contemptuously put aside, by the chief authority for making *just* laws in the country. The issues are (1) the terms under which the then existing cultivators should hold their lands under the zemindars; (2) the mode of dealing with the lands then lying, or subsequently becoming, vacant or waste. It is never contended that anybody in the country ever enjoyed any right in land without paying rent or revenue for it, or that the tenants paid any rents for unoccupied village lands. The zemindars could always cultivate these latter lands by hired labour; and no one has come to dispute that even at the present moment. But they generally proposed to carry on the work through tenants, and hence arises the further questions—(*a*) Had any cultivators any preferential claim to the lease of any of these lands? (*b*) Were the terms of lease, when any was to be granted to cultivators, terms as to period and rent, subject to any restrictions? (*c*) And if so, were they of the kind proposed in the Bill?

The answer of the zemindars to all these questions being in the negative, the burden of proof obviously falls upon those who claim for the ryots rights of the kind proposed.

It may, however, be asked—Was the permanent settlement of so little consequence that it did not give to the zemindars even a presumable title to the free disposal of such lands, and that they should have to *rebut* a contrary presumption according to the stringent requirements of section 6 of the Bill? And is the legislature to be justified in simply suggesting a conflict of claims unknown to the people, and then authoritatively relieving the fevoured class from all burden of proof? The cultivating classes had, it is said, a right to what is called *ryoti* or the tenants' lands. How then was the right to be determined with reference to each particular plot which had to be disposed of? Was the zemindar bound to prefer the resident over non-resident ryots? If so, would the question have to be decided by the judicial authorities, and meantime the land remain uncultivated? And if the judicial authorities were then relieved from the function of determining the limits of ryoti lands not in their posession, and the claims to such lands of individuals, members of the cultivating class, how is the function—one of very great pecuniary value—now going to be withdrawn from the landlord? The only question remains as to the terms on which the land was to be let out. But that is obviously distinct from the starting principle of the Bill,—a presumable right to the lease of such lands in people whose character, as a class, the legislature claims to have determined, unknown to them or their supposed antagonists—the landlords. A great deal has been built upon the alleged history of land tenures and the customary laws of this country. But the landlords only contend that the proper way to establish the facts and to test the laws is to submit them to judicial authorities, in order to have the points controverted by parties setting up an adverse position.

And the reference to customary law is the more singular, since the Bill brings within its purview affairs of great extent, but does not claim to consolidate, or even to have ascertained the customary law relating to those affairs.

Mr. Ilbert supposes that the permanet settlement served merely to determine who was to be liable for the land revenue, and that the exemption of waste lands from like charges leaves it open to the legislature to dispose of all lands falling vacant in future in the way it pleases. But the following considerations are urged against this astounding assumption, apart from the technical methods of interpreting the wording of laws, and from the controversy thereon raised and arbitrarily disposed of with regard to the Regulations of 1793.

The revenue charged under the permanent settlements, it will be remembered, was $\frac{10}{11}$ths of the actual collections in each estate, and the remaining $\frac{1}{11}$th of the total collections from the cultivating classes, called *malikana* (proprietors' dues) was due to the here-

* Abstract of Proceedings, pp. 93-94.

ditary zemindar, whether he accepted the settlement or not.* Even if the Government collected the rents from the cultivators by its own paid officers, it was bound to pay this $\frac{1}{11}$th to the zemindars. In Behar, the origin of this system was untraceable even at the time of permanent settlement, and was supposed to be only hereditary pensions with which the "proprietors" had been "shelved" probably by the Mahomedan Government. And referring only to two divisions of Behar, this allowance to proprietors out of possession is reported to have amounted in 1871-72 to Rs. 82,078, from 3,426 estates.† This ought to have satisfied Mr. Ilbert that the zemindars were something better than the nondescript trustees they were sought to be made out by two of his speeches. Again, when in 1819 waste lands, not included in the permanent settlement, came to be disposed of by Government, it was not the cultivators, but the zemindars of the adjoining villages, who were recognised to have a preferential right to them.

The question therefore is, if the zemindars only collected the revenue for the Government, what was their remuneration for the work, and how were they compensated for the many bad debts from cultivators which, it could well be foreseen, they would have from time to time to write off? Add to this the well-recognised contingency of the remaining $\frac{1}{11}$th of the collections having to be paid as *malikana* by a farming zemindar to a refractory *malik* (proprietor), who had a *right* to the permanent settlement? The answer is simple. The waste lands capable of cultivation (variously estimated from $\frac{1}{3}$ to $\frac{3}{8}$ of the entire area of the country) were explicitly pointed out for the one case, *i.e.*, for the remuneration; and for the other, *viz.*, the risks of collection, it was but just that landlords should recoup themselves by subsequent increments to the then existing rents. This liability of the State to remunerate the zemindar does not now seem even to be felt, but on the contrary it is argued that the zemindar shall not draw from unoccupied lands all that tenants might fairly afford to pay.

The so-called customary or pergunnah rates of rent were applicable only to the ryots whose supposed claims had been rejected by the Government at the time of the permanent settlements, who, in any case, could not have been *let into* possession under the authority of the permanent settlement, and as such might possibly claim a prescriptive title against the parties chosen as zemindars by the Government. These customary rates are now a subject of historical enquiry and of infinite controversy therein. But the difficulty probably arises from the simple fact that the benefit of these rates is now claimed for parties who were never privy to their assessment, whereas at the time of the permanent settlement the question had entirely a judicial aspect, and was justly left to judicial trial between parties, both of whom knew the terms of their mutual engagement. It ought to be further borne in mind that even to these old ryots the zemindars were not to grant leases for more than ten years, for fear the value of Government rights in the land should be fraudulently impaired. And as regards lands which reverted to the landlords, it is but reasonable to suppose this to have been the original understanding that "where the landlord," to borrow the language of Chief Justice Garth, "ran the risk of getting nothing for his land in bad seasons, he should be compensated to such an extent as the ryot was willing and could afford to pay."‡ In any case it would be inconsistent with the policy of the times to suppose that the landlord, having the opportunity of making such a fair bargain, was disallowed from doing so by the Government for the sake of future cultivators.

On the other hand, for the lands lying waste, and about tenants who were actually let into possession thereof by the zemindar, it is simply absurd to hold that he had not the right to name his terms; or that the tenants had, as a class, a beneficiary interest in the land independently of him, and without having ever paid any rent for the same.

In fact the much debated question of the permanent settlement of 1793 might find a more intelligible solution in the histories of Europe and America, where the doctrine of sovereignty of the people (shorn in Asia of adjuncts like the zemindars) was then practically but four years old, and whence Lord Cornwallis had come with special views as to the policy of governing distant and foreign dependencies.

The exclusive proprietary right of the zemindars to all the lands included in the permanent settlement of 1793, and to those excluded therefrom, but subsequently included under operation of Regulation II of 1819, is further brought into relief by the Regulation III of 1828, whereby the limits were defined of all the immense uninhabited tract called Sunderbuns, and immediately adjoining the permanently-settled lands, in which even the cultivators are now supposed to have had an interest, and, as compared to the zemindars, a "preponderating"§ share of the whole. In that Regulation the Government lays down how certain lands were to be attached by Government as "in the case of a lapsed farm," and how "certain tenures, however designated, were not to be considered hereditary and perpetual, if the grants under which they were held *did not convey in express terms* an hereditary or perpetual interest." And in regard to the Sunderbuns, it was provided that all parties having leases from Government for any lands included therein "shall be entitled to hold or to *take* possession" of them "without question or opposition;" and that, if "any zemindar, talookdar or other sudder malgoozar, or *any other person* (evidently *not* excepting the class for whose benefit section 6 of the Bill has been drafted), owning and occupying or collecting the rent or revenue of cultivated land in the neighbourhood," shall "sue to contest the title" of the former, "the suit shall be dismissed with costs. Provided, however, that if any zemindar, talookdar, or

§ Ilbert's speech: Abstract of Proceedings, p. 113.

other person aforesaid shall claim to possess a valuable interest in part of the Sunderbuns, by virtue of authority to collect money or other valuable thing *from the persons engaged in* gathering wax, or cutting wood, or obtaining other jungle products of the tract, or by virtue of any other similar privilege or advantage which may have been recognized as part of the assets on which the assessed revenue of his zemindary, talookdary or other tenure was adjusted at the time of farming the perpetual settlement of the district, and the collection of which was not subsequently stopped and due compensation made under the rules relative to the collection of sayer revenue or other similar arrangement, such zemindar, talookdar, or proprietor [*no mention is here made of ryots or even of the* PERSONS *abovementioned engaged in gathering forest produce*] shall be entitled to receive from Government *compensation* for any diminution in the value of such interest and advantage consequent on the arrangement adopted for the cultivation of the Sunderbuns."—*Regulation III*, 1828, *sections* 12 *and* 13, *clause* 1.

Two questions arise from the foregoing; (1) If the ryots in the neighbourhood, actually engaged in gathering on these lands wax, &c., for themselves or for their zemindars, were not entitled to compensation, how can they be supposed to have had a right in these unoccupied lands or in similar lands included in the permanent settlement of 1793? (2) If the ryots living in the neighbourhood had no such right, how can ryots procured from a distance, not unoften hillmen from the southern parts of Behar, by the lessees of these lands, be held to have had a right in these unoccupied lands which have been reclaimed at the expense of the lessees referred to, and under the declaration quoted above?

It has been argued that the Bengal Tenancy Bill would not take away from the landlords more than what, under customary law was, from before the year 1793, due to the cultivating classes, and that it had never been intended to make of Bengal zemindars anything like English landlords; and hence clear words have been required of the zemindars to show their absolute right in respect of the waste lands. Now it happened, even so late as 1861, that for all the care evinced by Government in 1859 for customary rights, supposed to have been held by cultivators against the zemindars, it did not care to vest the property of the soil with any but the non-cultivating zemindar class. It had in 1861 large tracts of waste land at its disposal, and an attempt was made, and partially carried out, to introduce certain property-rules into all such and divers other classes of lands. Whether the precise object was to import the English system of property cannot of course be definitely proved. But the tenure introduced by the measure alluded to has been currently expressed by the term "Fee-simple;" and English proprietors were expected to, as in fact they did, avail of the rules framed.

The following extracts are given from a Resolution recorded by the Government of India during the time of Lord Canning. It bears date the 17th October 1861:—

"He (His Excellency the Governor-General in Council) confidently expects that harmony of interests between *permanent European settlers* and the half-civilised tribes, by whom most of these waste districts, or the country adjoining them, are thinly peopled, will conduce to, &c."

The Resolution then proceeds to state the rules under which effect was to be given to the two proposed measures for sale of waste lands belonging to the State and the redemption of land revenue by the landlords:—

"8. I.—As to the sale of unassessed waste lands, in which no right of proprietorship or of exclusive occupancy are known to exist at present, or to have existed in former times, and to be capable of revival.

"9. In any case of application for such lands, they shall be granted in perpetuity under the rules which will be presently laid down, as a heritable and transferable property, subject to no enhancement of land revenue assessment.

"10. All prospective land revenue will be redeemable at the grantee's option by a payment in full when the grant is made, and the land granted will thenceforward be permanently free of all demand on account of land revenue."

It then goes on to consider "prior claims of property or occupancy in the land applied for," prescribes for the raising of such claims "a term which, probably, need rarely exceed thirty days" from advertisement, and directing how, after their disposal, the applicant was at once to have the land allotted to him, proceeds as follows:—

"19. If after the allotment of the land under the preceding rule any persons shall establish a right of property in the lands allotted, the possession of the party to whom the land has been granted *bonâ fide* shall not be disturbed. But provided the claim be made within one year from the allotment, the claimant on proof of his right, and on shewing good reason why his claim was not advanced before the allotment took place, shall be entitled to receive *from Government* full compensation for the actual value of his interest in such land. After the expiration of a year all rights of third persons, which have not been already claimed, will be altogether barred. [The Bengal Tenancy Bill applies equally to estates protected by these rules and to all other lands, *e.g.*, the Sunderbuns: the landlord's right of re-entry in respect of lands held by settled and occupancy ryots and the question of compensation for disturbance are governed by the same rules in these as in other kinds of property in Bengal.]

"33. Holders of grants under any existing rules (*i.e.*, governing, for instance, leases of Sunderbun lands under Regulation III of 1828), who have not yet completed the purchase of their grants, will be allowed to commute them under the new rules..... and he (the grantee) *will be free to purchase absolutely* as much or as little of that area as may suit him......

* * * * * * * * *

"37. The tenures of *all waste lands granted under this Resolution* will be that of an heritable and transferable property held in perpetuity free from all claims either of the Government *or of third persons prior to, or inconsistent with, the grant.*

"11.—As to the redemption of the land revenue: [*i.e.*, applying even to permanently-settled lands (see paragraph 42.)]

* * * * * * * *

"43. The tenure obtained will, as in the case of waste lands, be that of an heritable and transferable property......But such tenure will not carry with it, as that of waste lands will, immunity from any legal claims other than those of Government to which the lands may be subject, and *which may date prior to the grant under this Resolution* (Qy. Does not the restriction as to *prior* legal claims exclude all subsequent legal claims of third persons including tenant-right, dating from October 1861? And does not this afford some commentary on section 7 of Act X of 1859, whereby permission was given to provide against the growth of occupancy rights coming under the purview of section 6?)"

It would be hard to say what other "strong and clear words" could be required to substantiate the contentions of the landlords.

But what a falling off there has been from the land-policy of Lord Canning's Government will be perceived from the following remarks of the Government of India, contained in its Despatch to the Secretary of State for India, on the Bengal Tenancy Bill, dated the 21st March 1882:—

"Many events had tended to lower the claims of tenants in official estimation and to help the cause of the large landlords. Before the mutiny, ideas on the subject of property and tenant-right in India took very much of their colour from the views of the able peasant-proprietary school of the North-Western Provinces. But the occurrences of 1857 drew attention to the leaderless condition of the people; the sympathies between the mass of the agricultural population and their rulers were for some years disturbed by reminiscences of disorder, and severity; the development of the country gave rise to hopes of European colonization, and *thus* theories of land tenure, which were unfavourble to tenant-right, as being an impediment to the free disposal of property, were advocated in Lower Bengal on behalf of great European interests, and elsewhere, as coincident with political expediency (!) The relation between landlord and tenant *began* (?) to be regarded purely as one of contract. Sir Barnes Peacock objected to section 6 of Act X, because, in his opinion, it interfered with the just rights of the zemindars, at least in the permanently settled districts, by vesting rights of occupancy in the ryots which, as he thought, had no previous existence.*"

The spirit which has dictated the above is manifest enough. It is nothing less than a desire to wean the agricultural population from their natural leaders and protectors—the landlords. The very basis on which the relations between the landlord and tenant had hitherto subsisted is denied. The principle of contract is held in supreme contempt. It is even broadly asserted that this principle, which dates from the days of the farming out the public revenues before the permanent settlement, *began* to be recognised only after the convulsions of the Mutiny. And the emphatic opinion of Sir Barnes Peacock, the highest judicial authority in the land, is mentioned as if it was an outcome of that political commotion and not the result of mature juridical deliberation and reasoning.

The judgment of Lord Lyndhurst, cited by one of the Members of the Council to show that the zamindars "had an absolute dominion and ownership of the soil," has, by an argument endorsed by the Law Member, been explained away by a third, the argument being that the immediate question before the Privy Council in that case was not one "as to the relative position of zamindar and ryot." This argument would certainly be very important in a *Court of Justice*, in order to leave the Judge free to fully try the same question after hearing arguments and weighing evidence on both sides, The dictum of one Judge does not bind another's ruling, because counsel is not heard in regard to the former, and *is* heard in arriving at the latter. But how the circumstance alluded to justified the *legislature* in arriving at a conclusion different from that of Lord Lyndhurst remains a mystery. But perhaps the case of Raja Lelanund Sing *vs.* the Bengal Government, might be more acceptable. In that case the Right Hon. T. Pemberton Leigh, after a long inquiry into the circumstances of the permanent settlement, finds the object to have been "to leave to land proprietors the benefit of all subsequent improvements.†" And, at all events, if all dicta of Sir Barnes Peacock on the land question have not become vitiated, because one of his rulings has been overruled by the majority of his colleagues in the High Court, the following passage may have a value in the eye of the legislature:—

"I will add," he says, "one word as to the argument of Mr. Montriou that the ryots were originally the owners of the soil, and that neither the Government nor the zamindars were the proprietors. This argument cannot apply to ryots who are in possession of land which has been occupied and brought into cultivation for the first time since the permanent settlement. It is clear that a ryot cannot at the present day, by merely entering upon land belonging to a zamindary, and bringing it into cultivation, become the proprietor of the soil. The zamindar may lose his right by the operation of the statute of limitations, and the right to the soil may then be acquired by the ryot. But in cases in which there is no contract, and to which the statute of limitations does not apply, the ryot cannot by occupying and cultivating become the proprietor of the soil. Neither can he, by occupying with the consent of the zamindar, and paying rent for the land to him, become entitled to the proprietorship of the soil, even though he should acquire a right of occupancy by virtue of Act X of 1859.‡"

Moreover, if the cultivating classes had, with the zemindars, a part interest in the soil, it does not appear that the Government has hitherto given it any recognition in dealing

* Correspondence, p. 8, para. 7.
† 6th Moore—pp. 108-10, quoted at 2nd hand.
‡ Ishur Ghose *versus* Hills, on a petition of review of judgment.

with land over which the State has had exclusive control. Mr. Monro, in reporting on the Rent Bill prepared by the Rent Commission, quotes certain rules to shew what has been with the Government, as landlord, "the practice with reference to the eviction of mere ryots."

"In dealing with mere ryots," so runs the rule, "it is desirable not to interfere with their possession till it becomes necessary to displace them.

"Should an arrear remain due at the close of the year, if the defaulter be a mere ryot having no transferable interest in the soil, he may be summarily ousted and his lands given to another."*

So also the Revenue Board in its memorandum dated 1873—

"Lastly, it is to be observed that it is the *present policy* of Government to take no means, either in Government or in wards or attached estates, to prevent tenants-at-will from acquiring rights of occupancy; though, on the other hand, it will not, in recording the rights of tenants and delivering pottahs to them, *assume the existence of such rights unless they are claimed.*"

And "where the practice of the former proprietor" was "to guard, by special precautions, against the accrual of rights of occupancy, *the continuance of that practice is sanctioned.*"†

The customary right of the cultivators in the property in the soil, unaffected by the permanent settlement, is said to be a fraction of the whole. But it is nowhere stated what the zamindar's interest was independently of that settlement, and as distinguished from the supposed class of cultivators who, it would follow from the opposite point of view, were not free, like the landlord class, to buy permanently-settled lands. It cannot be said that the zamindar had no interest whatever in the land, apart from the malikana allowance; for in that case this allowance in respect of lands taken away from his possession would remain unaccounted for. On the other hand, if he had any such part-interest derived from customary law, it does not apear that the legislature has given it the least recognition in the Bill under consideration. Certain it is that jungle lands (*jalpai*) at one time yielding fuel for the manufacture of salt, have been surrendered by Government, and only to zamindars, on the closure of salt works in many parts; and in some cases refusal to surrender has been overruled by the civil courts of the country.

Again, the Government as landlord, has had often enough to let out land to cultivators: but why does not the Government allow the zamindars their customary share in such lands? Nor does it appear that the Government has ever had occasion to decide which of any number of applicants, zamindar or cultivator, had the right to the lease of tenures at its disposal. In any case, when land is taken by Government at a valuation, for public purposes, "the fact," noticed by the Board of Revenue would be inconsistent with the policy of the Bill, "that, as a rule, the occupancy ryots have advanced no claims to compensation, except for damage done to personal property."‡ Thus the whole theory is absurd; and whether the absolute ownership of land lay with the conquering power or the zamindars, it is certain that the cultivators of the soil had no share in its property, as of right. The first point in Indian land tenures is that whoever holds land must pay for it something every year. The cultivator's rents never covered the waste or unoccupied lands of the village. The zamindar's revenue has always covered these. Hence the zamindar's right is unassailable, except by a ruthless act of spoliation. The permanent settlement did not leave the question of property an open one between the zamindar and the cultivator of the soil. Power was certainly reserved to Government to make laws; but that was only as common sovereign over landholders and cultivators: and calculated not to diminish, but in the language of the Court of Directors, to "enhance the value" of the proprietors' rights: to prevent the ryots "being *improperly* disturbed in their possession" (*i. e.* in the matter of eviction), and "to define the limits by which rent could be determined" so as to prevent *unwarrantable* exactions and arbitrary conduct of the zamindar. Instructions like these cannot have justified the policy of the present Bill.

This would, perhaps, be the proper place to consider how far, if at all, Act X of 1859 interfered with the proprietary rights of the landholders, and gave a sanction for further encroachments of the kind proposed. It will be necessary for this purpose to read together the sections 2—7, 21, and 78 of that Act which have been re-enacted respectively as 2—7, 22, and 52 of Act VIII (B.C.) of 1869, together with sections 9 and 46 of the latter Act.

Section 2 of Act X of 1859, and VIII (B.C.) of 1869.—"Every ryot is entitled to receive from the person to whom the rent of the land held or cultivated by him is payable, a pottah containing the following particulars:—

The quantity of land; and where fields have been numbered in a Government survey, the number of each field.

The amount of annual rent.

The instalments in which the same is to be paid.

And any special conditions of the lease.

If the rent is payable in kind, the proportion of produce to be delivered, and the time and manner of delivery.

Section 3.—Ryots who, in the provinces of Bengal, Behar, Orissa and Benares, hold lands

* Bengal Govt. Report, Vol. II, p. 219.

† See Board's Memo., p. 159.

‡ Memorandum of Revenue Administration, p. 104.

at fixed rates of rent which have not been changed from the time of the permanent settlement, are entitled to receive pottahs at those rates.

Section 4.—Whenever, in any suit under this Act, it shall be proved that the rent at which land is held by a ryot in the said provinces has not been changed for a period of twenty years before the commencement of the suit, it shall be presumed that the land has been held from the time of the permanent settlement, unless the contrary be shown, or unless it be proved that such rent was fixed at some later period.

Section 5.—Ryots having rights of occupancy, but not holding at fixed rates, as described in the two preceding sections, are entitled to receive pottahs at fair and equitable rates. In case of dispute, the rate previously paid by the ryot shall be deemed to be fair and equitable, unless the contrary be shown in a suit by either party under the provisions of this Act.

Section 6.—Every ryot who has cultivated or held land for a period of twelve years has a right of occupancy in the land so cultivated or held by him, whether it be held under pottah or not, so long as he pays the rent payable on account of the same; but this rule does not apply to khamar, nijjote, or sir land belonging to the proprietor of the estate or tenure, and let by him on lease for a term, or year by year, nor (as respects the actual cultivator) to lands sublet for a term, or year by year, by a ryot having a right of occupany. The holding of the father or other person from whom a ryot inherits shall be deemed to be the holding of the ryot within the meaning of this section.

Section 7.—Nothing contained in the last preceding section shall be held to affect the terms of any written contract for the cultivation of land entered into between a landholder and a ryot, when it contains any express stipulation contrary thereto.

Section 21. (*Section 22 of Act VIII* (*B.C.*) *of 1869.*)—When an arrear of rent remains due from any ryot at the end of the Bengal year, or at the end of the month of *Jeth* of the Fusly or Willayuttee year, as the case may be, such ryot shall be liable to be ejected from the land in respect of which the arrear is due. Provided that no ryot having a right of occupancy, or holding under a pottah, the term of which has not expired, shall be ejected otherwise than in the execution of a decree or order under the provisions of this Act.

Section 78. (*Section 52 of Act VIII* (*B.C.*) *of 1869.*)—Any person desiring to eject a ryot, or to cancel a lease on account of non-payment of arrears of rent, may sue for such ejectment or cancelment, and for recovery of the arrear in the same action, or may adduce any unexecuted decree for arrears of rent as evidence of the existence of such arrear in a suit for such ejectment or cancelment. In all cases of suits for the ejectment of a ryot, or the cancelment of a lease, the decree shall specify the amount of the arrear, and if such amount, together with interest and costs of suit, be paid into court within fifteen days from the date of the decree, execution shall be stayed.

Section 9 of Act VIII of 1869.—If on the trial of a suit for the delivery of a pottah instituted by a ryot having a right of occupancy, the parties do not agree as to the term for which the pottah is to be granted, the court shall fix such term as, under the circumstances of the case, may seem just and proper: provided that the term shall not in any case be longer than ten years; and in estates not permanently settled, shall not extend beyond the period for which the proprietor of the estate has engaged with Government: provided also that, if the defendant be a farmer or other person, having only a temporary interest in the land, the term of the pottah shall not extend beyond the period of the continuance of such interest. For cultivators not having a right of occupancy, the term of pottah shall be exclusively in the discretion of the person entitled to the rent of the land.

Section 46.—If any under-tenant or ryot shall, at the Mâl Cutcherry for the receipt of rents, or other place where the rents of the land or other immoveable property held or cultivated by him are usually payable, tender payment of what he shall consider to be the full amount of rent due from him at the date of the tender to the zemindar or other person in receipt of the rent of such land; and if the amount so tendered shall not be accepted, and a receipt in full shall not be forthwith granted, it shall be lawful for the under-tenant or ryot, without any suit having been instituted against him, to deposit such amount in the court having jurisdiction to entertain a suit for such rent, to the credit of the zemindar or other person aforesaid: and such deposit shall, so far as the under-tenant or ryot, and all persons claiming through or under him are concerned, in all respects operate as, and have the full effect of, a payment then made by the under-tenant or ryot of the amount deposited to such zemindar or other person.

Section 2 ought to be read with reference to the old rules of 1793, where by the exchange of leases was strongly insisted upon, and ten years was made the maximum limit; though by Regulation V of 1812 the restriction was afterwards withdrawn. In section 3 it will be seen that, as between the zemindars and the cultivators holding at fixed rates from the time of the permanent settlement, the Government assumed that, where the zemindars had hitherto omitted to exchange any leases, all subsequent leases obtained through the courts of justice should be at such rates. It certainly does not warrant the inference that all cultivators of that date were entitled to fixed rates, but only those who had been holding at fixed rates. Certainly the omission to vary the rates did not justify such a penalty. Thus Act X did make encroachments on the rights of the zemindar. But the encroachment was made ostensibly at least in the shape of a penalty for the violation of a well-known rule—the one about exchange of leases. The Government claimed that the discharge of its judicial functions should be helped by adequate evidence being furnished by litigants.

Section 4 was another rule of the same kind. It was a very hard rule as against the landholders, but after all the rule was one of presumption, and directed against the same fault of omission to exchange leases.

Section 6 is supposed to have been the worst violation of the rights secured by the permanent settlement. But in fact this section was only one about exceptions to those—the majority of—cases which came under section 7. And if any doubt could be thrown on this explanation, all would vanish on reference to section 9 of Act VIII of 1869, whereby the old limit of ten years was maintained for leases under section 6. And "for cultivators not having a right of occupancy, the term of the lease" was to be "exclusively in the discretion of" the landlord. If therefore the landlords have anywhere betaken themselves to "shifting ryots" from land to land, the fact must be attributed to the unjustifiable endeavour made in certain quarters, exposing the landlords to the loss of a valuable right, rather than to any want of loyalty on their part to the just laws of the country. Injustice is the most fruitful source of violations of justice; and even the legislature must fail to transcend this universal truth.

Section 6 simply provided that where the terms of lease were not to furnish any guide, duration of possession was to be taken to determine what lands the tenant was not to be disturbed from possession of, at the will of the landlord: it was again a question of evidence. The absence of a certain important entry in a document was to be interpreted in a certain way. It did not interfere with the general principle, which was fully recognised in section 21 that non-payment of rent renders all tenants (those with unexpired leases, and the occupancy ryots being both put in the same category) liable to peremptory eviction. The Act X, however, only required the question of eviction in such cases to be brought before courts of justice; and in section 78 (sec. 52 of Act VIII) the most stringent provision was made against the ryot,—a provision, by the way, which is for realization of arrears of rent by far the safest and least objectionable to all the parties concerned. And in section 46 of Act VIII of 1869, which was a re-enactment of a short law passed in 1862, the Government did all that lay in its power for the protection of honest cultivators. It threw open its treasury as an ordinary banker for the adjustment of accounts whenever required by the cultivator.

Thus in the matter of occupancy right, all that the legislature did in 1859 was to close the loopholes, of which any undue advantage might be taken by the zemindar. First there was the lease to set forth the terms between parties; then there was the interpretation to be put on omissions in respect of such terms; thirdly, this interpretation was not to be enforced for a period of 12 years from when a tenant was let into possession. No indulgence was shown to cases of non-payment of rent; but for the sake of the ryot, the rent was allowed to be deposited in the Government treasury, instead of its having to be carried to a perverse landlord. It is believed by some that the occupancy clause was an application of the doctrine of prescription, but the argument of Sir Barnes Peacock in this connection has nowhere been met. "The civil law," he says, referring to Domat 2227, "held that a farmer or tenant could not acquire by prescription what he held by that title, for in order to prescribe it is necessary to possess, and *to possess as master*." It is not meant that the anti-zemindar policy had not begun in 1859. But it had not then made such advance as it has done since the recent difficulties in Ireland.

The question of eviction having been determined by the framers of Act X of 1859 in the way mentioned above, another difficulty arose as to the question of rents. Where the landlord had chosen not to insist upon his right of re-entry; where the current rents were regularly paid, and neither party was in consequence to be disturbed in his possession, the rate of rent payable would obviously have to be determined between them at times at least, and by a third party of course. Accordingly the task was made over to the judicial authorities; and the legislature thought—wrongly as it has since appeared—that sufficient indication would be given to Judges by the simple expression "fair and equitable rates."

But the error of the legislature, if any, has been exceeded by the assumption, probably traceable to politico-economic views, that the difference between a rack-rent and a fair rent is equivalent to a proprietary right in the land. A rack-rent denotes the limit of what the land is capable of yielding. Anything paid in addition converts the payment into a cottier rent, and as such becomes a charge levied on the privilege of keeping one's self to a particular calling, *viz.*, that of cultivators. Such a tax is open to grave objections certainly, though the outcry comes with very little grace from a Government which levies several taxes, like the Road and Public Works cesses, from the poorest of the cultivators. But as compared to a rack-rent, a fair rent must always be a very indefinite amount; for in estimating the fairness, account would have to be taken of the demand for land, even where the wages of labor were regulated only by custom. It is also mathematically true that an annual charge, whether of rent or other kind, can be equated to what is called its capitalised value, but that would not justify its being looked upon as property, for one of the data required, as a constant quantity, is the rate of profit common to both terms of the equation; and in the present case this constant quantity has always been uncertain. And where this variable element, the rate of interest, was not intended to be meddled with, and where too the question of property was left in act, no greater mistake could be committed than to presume that a difference was intended between rack-rent and fair rent, and to assume that the necessity to determine a fair rent, which was imposed on judicial authorities, was tantamount to giving the tenant a property in land equivalent to what would be the capitalised value of the difference under an unknown market value of money.

The truth seems to be that Act X intended by section 7 to make written contracts the rule in regard to the question of eviction, and to provide for the extinction of the landlord's right of re-entry where, save for non-payment of rent, the omission to enter into such contracts would show that no such reservation of right was intended at the time the tenant was let into possession. The retrospective effect given to the provision seems to have caused all the evil complained of by landlords. But they do not now wish to call in question the finding of judicial authorities.

However that might be, the restriction alluded to being imposed upon eviction, the determination of fair rents became unavoidable in consequence. This question was taken up by Government with obvious reluctance; and at the first instance it was left to the Judicial Department to do, as the Settlement Officers were doing in other provinces, but without the bias, unavoidable in those officers, of the peculiar interests of Government. But it was found afterwards that more detailed rules were necessary than the guidance furnished by the expression "fair and equitable rates of rent." And it is contended by landlords that this necessity for making such rules could never have justified the proposed division of the zemindar's proprietary right.

To sum up: The proprietary right of the zemindar is evidenced—(1) By the simple consideration that there could be no rival claimant on lands not occupied by the cultivators of the time of the permanent settlement. (2) The fact that the zemindar had an allowance even when he refused to accept the permanent settlement, and was in consequence put out of possession. (3) The fact that a similar right was recognized over lands claimed to be included, but proved to be excluded, from the permanent settlement. (4) The fact that in the Sunderbuns compensation was provided for to the zemindar and to the exclusion of persons belonging to the cultivator class who collected the forest produce for the zemindar. (5) The fact that some of these lands actually occupied by people were treated in certain cases "as lapsed farm." (6) The fact that waste *jatpai* lands have been surrendered by Government to the zemindars in whose estates they were situated. (7) The fact that the Government ignored all right of cultivators in the neighbourhood, as against the parties let by Government into possession of lands in the Sunderbuns. (8) The fact that it ignored all such rights when, within living memory, the English system of property and the rights of fee-simple were introduced in this country. (9) The fact that the Government in dealing directly with the land and the cultivators never treated the latter as having the whole or part of the property in the soil, nor (till of late) gave any compensation to the occupancy ryots when acquiring land for public purposes. (10) The fact that Act X strictly adhered to the general principle of tenant-right in this country, that non-payment of rent determines all occupancy rights, and that consequently the tenant could never be a co-proprietor with the zemindar, least of all in lands which have ever remained unoccupied by tenants, while the zemindar paid the revenue for them. (11) The consideration that, apart from *their* customary rights, a two-fold compensation was due to the zemindars who accepted the permanent settlement—one, for the labour of collecting the Government dues, and the other, for the risks of the collection, and that this compensation was obviously afforded by (*a*) the profits of lands which were yet to be reclaimed, but which were nevertheless included in the permanent settlement and covered by the revenues assessed; and (*b*) by profits realisable on extinction of the tenant-right then existing. And lastly, (12) that judicial findings or dicta have been recorded, suggesting at least that the point in issue should not be decided by the legislature and without the usual judicial tests provided for the purpose.

4.—Tenant-right.

But even if property in land belongs to the zemindar, and the zemindar alone, the question as to the distribution of the proceeds of land would have to be decided, and upon its own merits. The economic doctrine of distribution on the triple basis of land, labour and capital is hotly contested in Europe; and perhaps the present agitation among the members of the Anglo-Indian Government is due only to get that science out of the way. But the attempt to break up landed rights, so as to lay by something in the name of the cultivator, will probably be found to be neither fair nor reasonable. In any case, the position could not be maintained, on grounds of political economy, that a man who was free to keep any land in his own hands, and to cultivate it by his servants or by hired labourers, should not be permitted to let it to another so as to reduce the tenant's margin of profit though with his own consent and for valid reasons. A doctrine like this may, however, be traced to a growing class of men in Europe, whose general views of social relations the Government would least desire to see extended in India. Besides, the doctrines about peasant proprietors are absolutely inapplicable in a country where the land can never be held without paying for it something in the shape of rent, either to the State, or to the landlord, or to both.

But if regard was to be shown to the customs of India (the scientific character of which is still unsettled), the communistic prejudice against landlordism ought to have been guarded against with more care.

The three kinds of right, shortly denoted by the term three F's, however desirable in Ireland or in Great Britain, are not logically inseperable, nor are they universally acceptable. Fixity of tenure no doubt calls for fair rents: but the question of free sale is a politico-economic idea which, it will be found, is not suited to this country in its existing condition, and there is no reason why fixity of tenure should be given to those who are not entitled to have it. Pauperism would be provided against, within the limits of human power, by fair rents. Fixity

of tenure in fact was what was given to the country by the permanent settlement itself: for everybody has been declared free to buy the property created by that measure, and people, too, have freely availed themselves of the opportunities thus afforded. It may not agree with some people's views of the fitness of things, that those who have purchased permanently-settled lands do not confine themselves to the function of cultivating the soil. But even the cultivating classes of the country have had other feelings, and when they have had money to invest, they have depended largely upon the promises given by Government in 1793. In point of fact, all descriptions of caste may be found among the zemindars of Bengal, and if that would not satisfy the desire displayed for the nation's prosperity, the philanthropy might be seriously impeached which aimed at turning all landholders into cultivators.

Section 7 of Act X, it is said, has been perverted to noxious purposes by what has been called "shifting" of ryots. But was that section (especially when viewed with reference to section 9 of Act VIII of 1869) inserted in order that it should be made a dead letter of? The intentions of the framers of Act X have been largely appealed to, but the object of such appeals—to explain that section away—is obviously of greater significance.

On the other hand, it cannot be denied that just as in land the unit for assessment of rent must be that which does not leave any profit, so in social life the unit of prosperity must be found among those who are barely removed from starvation. This may be a misfortune, but it is the common fate of mankind; and the zemindars of Bengal are certainly not responsible for the inevitable consequences of man's struggle for existence. However, the framers of Act X of 1859 attempted to minimise this evil by confining it to those cultivators who could manage to hold to their land continuously for 12 years. For the rest, it may be hard that the zemindars should endeavour to save their own from being eaten into; but it is not a little creditable to them that the number of the tenants-at-will is so small, and that their rents are so often below a rack-rent. The Secretary to the Government of Bengal, while sending the Bill which was the immediate precursor of the one under consideration, bears testimony to this fact in the following terms :—

"The inquiries made in connection with Sir R. Temple's proposal to fix occupancy rates with reference to competition rates, brought to light the fact that competition has as yet got next to no hold upon the rents of Bengal. In one or two districts near the Presidency there is perhaps some little competition for land, but even this is local rather than general, and confined as a rule to the village to which the land under settlement belongs. * * * Generally speaking, there is nothing like competition for land in the economic sense even in places where the population is most dense. In the majority of districts the effective demand is still for ryots rather than for land, and even where the land is nearly all taken up for cultivation, custom is still the principle that decides the rent. The rates are customary and not competitive rates, *however high they may in any particular case be found to be.*"* (The italics are as in the original.)

The foregoing passage is interspersed with observations tracing a parallel in the far-off cottier questions of Ireland. But the facts of every-day experience with the people of Bengal,—facts, for instance, about the caste question and the consequent overcrowding of particular branches of industry and in particular localities, and facts about the inducement afforded by the personal character of individual zemindars, and even by that of their land-stewards, to the poorest and the floating portion of cultivators—these facts have for obvious reasons, escaped the attention of European gentlemen reporting upon the subject.

The stern economic fact remains unassailed after all, that the poorest classes must be converted into day-labourers, and that the section 7 of Act X of 1859 only indicates where this residuum is to be found. To extinguish it would be simply impossible; and so long as this class of non-occupancy ryots is not reduced to competition rates, all anxiety of the kind evinced by the legislature is simply out of place.

Even if shifting of ryots does prevail to any large extent—and no statistics are forthcoming to prove this, while the experience of the zemindars, belies it,—it would only show an increase in the number of tenants-at-will; an increase which would be perfectly innocuous so long as competition rates did not prevail. The trick of shifting ryots certainly discloses another fact, which, though it may rouse the ire of Government, ought even therefore to be the less meddled with. It shows a desire to avoid the interference of judicial or executive authorities in the fixing of rent-rates. But if the rent-rate fixed by the zemindars in such cases be not objectionable, the desire in question is not positively culpable; and the only way to get such desire under the civilizing influences of the British Government is to improve the *quality*, rather than the *strength*, of the law and the justice of that Government.

It would certainly become a difficulty if the number of tenants-at-will become very large, and if afterwards their rent-rates rise up to, or tend to exceed, competition or economic rates. But the natural solution to this difficulty—conversion of tenant-cultivators into hired labourers—is very obvious; and it is an assumption of no ordinary kind to suppose that the peasantry of Bengal will not take to this solution, but follow the example—unknown to them—of *Irish cottiers.*

A certain section of tenants verging upon the condition of day-labourers being unavoidable, there is no reason why the principle of section 7 of Act X of 1859, confining the class to less than 12 years' occupation of specific plots of land, should be rejected. On the contrary, its due recognition would largely facilitate legislation about fair rents for occupancy tenants.

* Report of Government of Bengal, &c., Vol. I, p. 13.

What, then, is the principle of fair rent? The answer to this question would be easy enough from the stand-point of the permanent settlement, if the authorities would have the patience to view it from that point. The State share of the produce at the time of the permanent settlement is roughly given at ⅗ths or 60 per cent. of the produce. Then the metayer systems prevailing at places also afford important indications. And in the "Directions for settlement officers in the North-Weastern Provinces," 66 per cent. of the nett assets used at one time to be taken by the State from cultivating proprietors (as well as non-cultivating zemindars drawing rents from tenants). If, with these facts, the instructions of the Court of Directors in 1793, not to deteriorate the value of zemindari tenure had been duly coupled, little or no opposition would have been apprehended from the landlords. But since these limits have been exceeded, and since this difficult question has not been approached in a judicial spirit, the petitioners to Parliament pray that they would withdraw their former prayer for legislation rather than have a law for enhancement of rents, which would take away a large slice from their existing property in land.

5.—Necessity of the Legislation.

The facts set forth above, to show the revolutionary character of the proposed law and the absence of competition rents in Bengal, will show how little a measure like tne Tenancy Bill has become necessary in Bengal. But it has been argued that the landlords prayed for legislation, and cannot now recall that prayer. But whether they must have King Stork because they wanted something better than King Log, now rests with Parliament, and Parliament alone. The facts will show, however, how little the landlords, when their consent was obtained (and in a characteristic way too) to a general revision of the law, could foresee the leaning, since disclosed against them, in the minds of the ruling authorities.

It is now pretty well known that the punctual payment of revenue required by the permanent settlement, coupled to the checks interposed against the semi-regal or feudal powers exercised by the zemindars, led to the introduction from Europe* of the rules for the distraint of the crop, &c. But these foreign ways of dealing in business, as the Parliamentary Report of 1813 records, "were ill-understood, and not found easy of practice;" "the tenantry were enabled to withhold payment of rents," "the zemindars suffered oppression from the mal-practices of the cultivators," "the courts of justice were found 'incompetent' to afford them redress," "hazard of a reduction *in the rates of the assessments* as well as *the property of the zemindars*" was strongly apprehended, and a remedy was applied by Regulation XXXV of 1795. But "the experience of four following years did not justify the expectations formed" in regard to that Regulation†; and it appears that the total collections in the Government Treasury, from 1794 to 1798, fell short of the annual revenue demand by no less than three lakhs every year.‡

Again, of "some of the oldest and most respectable families," we are told that, "the dismemberment of their estates *at the end of each succeeding year* threatened them with poverty and ruin;"§ and "within the ten years that immediately followed the permanent settlement, a complete revolution took place in the constitution and ownership of the estates which formed the subject of that settlement."‖ The passing of Regulation VII of 1799 had been deemed necessary in order to further "strengthen the hands of the zeminders over their undertenantry, who, it appears, had, under the general protection afforded by the courts of justice, entered into combinations which enabled them to embarrass the landholders in a very injurious manner by withholding their just dues and compelling them to have recourse to tedious and expensive process to enforce claims which ought not to have admitted of dispute."¶ These facts are well known. There was a corner, however, whence they were explained to the Court of Directors as "a change of circumstance which ought to be received with *satisfaction*!"

It was said to evince that "the *great body* of the people employed in the cultivation of the land experienced ample protection from the laws, and were no longer subject to arbitrary exactions"** that "the equal administration of justice" was "real and efficient," and in the words of an Indian document bodily transferred to the Parliamentary report, that "it had been foreseen that those immense estates were likely in the course of time to fall into other hands by becoming gradually sub-divided,—an event, however, much to be regretted, as affecting the individual proprietor, would probably be beneficial to the country at large, from the estate falling into the possession of more able and economical managers."

Such explanations seem to have raised "a doubt in regard to the sincerity of the intentions expressed by the ruling authority for the prosperity of the principal zemindars." But it was allayed by the fact that at the very time they were written, remedies were being assiduously devised for the evils alluded to. And then "the great body of people" quietly submitted to Regulation VII of 1799, for which, however, sixty years afterwards a change was perceived to have been requisite from the aspect of affairs.†† "A great financial improvement," records the Board of Revenue in 1873, "was effected by the legislation of 1799. The zemindars began to collect their rents with ease and success.

* Some maintain that the principle was *not* new to India, but may even have been borrowed in Europe from the East.

The Government dues were paid up with greater regularity." In 1824-25 the revenue demand showed a tendency to rise, and then "rapidly expanded" under the operation of Regulation II of 1819. But in 1859 "the remedies assiduously devised" for the protection of the little body of zemindars, and against the great body of the people, were completely wiped out of the Statute Book. Difficulties, however, again arose, despite the liberal views which in 1859 had perceived a state of things different from that in 1795 and 1799. These difficulties were brought to a head by a well-known ruling of the High Court, dated 1865, and in 1872 the great body of the people had made a corresponding advance over the old tactics of "withholding their dues," and broke out in open riot against the little body of zemindars, publicly claiming to be the especially-favoured subjects of Her Gracious Majesty the Queen. And it would seem that they were not far wrong since the then Lieutenant-Governor of Bengal recorded the following opinion in the public Proclamation dated the 4th of July. "It is perfectly lawful to unite in a peaceable manner to resist any excessive demand of the zemindars, but it is not lawful to unite to use violence and intimidation."*

The spirit in which the above proclamation was issued needs no comment. It proceeded from a Lieutenant-Governor whose energetic inquiries disclosed the prevalence of certain illegal cesses in *different* parts of Bengal, but who nevertheless presented the facts as if every zemindar had been levying all the cesses compiled in the list. And it is no less singular that in spite of the opinion expressed by him, and generally admitted by others that the cesses are nothing but a convenient, though illegal, mode of enhancing the rents of land by adding a rate on the rental, instead of one on the acreage; and in spite of the fact that this same principle has been embodied in section 59, clause 2, of the Bill under consideration, it is singular after this that these cesses have been set up as the clearest proofs to justify an interference with the permanent settlement.

The Lieutenant-Governor, Sir George Campbell, has himself recorded as follows on the subject of these cesses:—

In Bengal the levy of cesses may or may not be carried to such an excess as in comparatively primitive Orissa, but that the system does prevail there is no doubt. *In Bengal Proper, however, the Lieutenant-Governor also feels this, that the cesses, illegal though they be, do in practice to some extent take the place of the enhancement of rents to which by litigation the zemindar might perhaps establish a right, and there is little doubt that the people much prefer such cesses to any alteration of their old-established rents.* Where, then, there has not been any recent general enhancement, and the cess system is not carried to very great excess, the Lieutenant-Governor is inclined to think that, while the people do not complain, it may be better not to embark on a crusade to put down such customary illegalities, and that we may perhaps trust to the gradual enlightenment of the lower orders to enable them so far to look after their own interests.†

It is hoped that the rise in rents has not been so great as to absorb the whole of the ryot's share in the general improvement. It may even not improbably be that if the proprietors, instead of levying irregular cesses, were systematically to pursue in the courts a course of enhancement to the utmost limits that the law allows, they might still establish grounds for further enhancement in many cases, while the expenses of such a mode of proceeding would fall very heavily on the ryots, whatever the event of such suits.‡

It may be said that the rights of enhancement conferred on landlords by Act X of 1859 have not been the occasion of much serious excitement or great social disturbance in these provinces generally in the past year. Of late years the courts have shown a tendency to scrutinize thoroughly the grounds of enhancement, and to watch the cases affecting great classes of ryots, who are individually unable to contest particular cases with zemindars on equal terms in respect of money and legal aid; and the zemindars of Bengal have not generally been very pushing in this respect. It was principally in connection with the indigo question that the planters of Bengal Proper fought and lost the battle of an unlimited right of enhancement of the rents of the ryots possessed of a right of occupancy. The zemindars are most frequently content if they can get extra cesses and benevolences, illegal, but which the ryots certainly prefer to enhancement of rent.§

The permission which, as shown above, was given by the Lieutenant-Governor to the ryots to withhold payment of rents, indicated a grave misconception, in so far as tenant-right in Bengal is always conditional on the payment of the rents. Some time after the Proclamation referred to, the Government decided to impose certain cesses as well upon the richest landlords as upon the poorest cultivators—the Road and Public Works cesses—and it was deemed expedient to lay the trouble, risk and odium of collecting these taxes upon the zemindars. The zemindars knowing that resistance was hopeless, and European modes of agitation not being familiar to them, consented to bear the burden, but only upon condition that facilities should be given them to collect their dues from the tenants. No reference was made to the laws of 1795 and 1799, which had been repealed in 1859; none whatever to the Pubna riots alluded to, which, however clearly traceable to the changes in law and the interpretation thereof, were unjustly set down against the zemindar's demands for rent, nor was any prayer ventured to undo the mischief created by a public proclamation, which

* Administration Report, 1872-73, Part III, p. 31.

‡ Do. do. do. p. 180.
§ Do. do. do. pp. 23-24.

openly justified a wrongful act and a conspiracy for the purpose. But the only prayer was that, while additional burdens were being imposed by Government, the zemindars might be put in the way of discharging them without loss to themselves. And the Government promised to afford them the facilities, the need of which even now the Law Member acknowledges, though unfortunately for the zemindars, only as being beyond the reach of his talents in law-making.*

At this very time the question of fair rents had also come to engage the public attention with reference to Act X of 1859. It has been shown that, according to that Act, fixity of a kind was to be assumed as intended to be given to those tenures which continued to be held for 12 years without any documentary evidence to prove the contrary. This construction of sections 6 and 7 of that Act, quite in accordance with the hitherto prevailing policy of encouraging the exchange of leases between landlords and tenants, would also reconcile them to the terms of the permanent settlement. But somehow or other economic rent, as defined in English books, was taken by Sir Barnes Peacock to be the fair construction of the expression "fair rates" in that Act. Now, negative to this connection would simply be that fair rents and rack-rents were not necessarily identical. But it seems that the learned arguments of Sir Barnes called forth only an emphasis on the contrary positions, that fair rents should always be less than rack-rents.

The next step (shown before to be as much an assumption as the foregoing) was that the difference between the two kinds of rent had been given by the legislature to the creatures of Act X in contravention of the terms of the permanent settlement; and hence the opinion that section 6 of that Act ought to be repealed.

Mr. Justice Trevor, in the very judgment which has determined that the fair rent of section 6 is less than the rack-rent of Ricardo, held that "the new law" *i.e.*, the Act X, "interfered with the right of the zemindars as laid down in the legislation of the last thirty years." This was endorsed by Justices Lock, Bayley, Jackson, and Glover. Elsewhere Justice Trevor declared it "a great infringement of the law previously existing." And Chief Justice Peacock and Justice Shumboo Nath Pandit and others suggested its abolition, the Chief Justice basing his recommendation among others on the ground that "it interferes with the just rights of the zemindars, at least in the permanently-settled districts, by vesting rights of occupancy in the ryot which had no previous existence." And even down to this day, Chief Justice Garth finds it "impossible to deny that it operated as an invasion of the landholder's rights as conferred upon him by the permanent settlement."†

Under these circumstances, the landholders were least prepared for the views of Bengal Government which had been carefully withheld from the public, or for those announced by Mr. Ilbert in the Council Chamber on the 2nd of March 1883. Hence, when a certain native member of the Bengal Council was asked to give his consent to a general revision of the rent law, on the ground that the question of arrears of rent was often found mixed up with that of assessment and enhancement of rents in general, no hesitation was shown on the part of the landlords of Bengal to accede to the proposal. But if circumstances like these can justify the demand of some Government officers, that the zemindars must make equivalent sacrifices to the ryots, who had nothing whatever to say, there does not appear any reason why the zemindars should not urge, in furtherence of their prayer before Parliament, that the promises given in 1871 and 1877, about speedy realization of arrears of rent, might be allowed to stand over, along with the newly remembered one of 1793, to make laws for the protection of all classes of subjects.

6.—*The Rent Commission.*

The consent of the landholders for a general revision of the rent law having been obtained, the Rent Commission was appointed by Government; and so long as their labours were confined to preparing an analysis and digest of the existing law, the public were not apprised of what was intended by the Government. But Mr. Field, the most energetic member of the body, supplemented his digest of the Rent law with certain notes, and especially one on the question of free sale of tenures. In that note he had occasion to notice the argument that it was discretionary with the landlord to withhold fixity of tenure from their tenants, and that by arbitrarily making all occupancy tenures transferable against the consent of landlords, the legislature might virtually stimulate the landlords to exert themselves with a view to prevent the acquisition of occupancy rights by tenants. And the following characteristic solution given to this question, in the teeth of section 9 of Act VIII of 1869, clearly showed how dispassionate and judicially disposed the most active member of the Commission was:—

"The 13th argument (stated and numbered by Mr. Field himself) partakes in some respect of the nature of a threat, and cannot therefore carry much weight. The great majority of the ryots have already acquired the right of occupancy: and in respect of those who have not, the legislature is not likely to be much moved by the fear of that being done which it has permitted to be done, and *which it could prevent from being done by a stroke of the pen.*"‡

To this the following may well be contrasted:—

"Justice E. Jackson, in his minute on Act X, said with reference to section 6: 'They (the zemindars) will not be affected by it. They have it in their power to put an end to every right

* Ilbert's speech, Abstract of Proceedings, 2nd March, pp. 119 & 124.
† See Rent Commission Report, 1st edition, Vol. I, pp. 105, 96, where references to the original are given.
‡ Field's Digest, p. 177.

of occupancy which exists on their estates, as the tenures fall in, if they will only take care to let out the tenures again on term leases. The only landlords who can suffer by the law are those who pay no attention to their estates, and who disobey the direct injunctions of the legislature under which they hold their estates.' "

Again, the President of the Commission, speaking of his votes as given in it, has since thought proper to record "that on many points I preferred to give my voice according to the opinion of the moment rather than prolong discussion, being satisfied that the point...would meet with full further discussion before the time came for taking action on it."*

After this the following from Sir Richard Garth would be quite significant of the constitution of the Rent Commission :—

"I have taken the pains," he says, "to go through all the minutes of the committee meetings, and I find that out of thirty-five discussions which took place, Mr. O'Kinealy in every single instance voted in favour of the ryots and against the landlords, and Mr. Mackenzie did so in almost every instance."†

The fact is, the Commission was from the very beginning furnished with a standing majority against the landlords. And when the Bengal Government sent its draft Bill to the Government of India, both the Bill and the covering letter No. 849T, dated 27th July 1881, were kept a dead secret from the public. Referring to this, Sir Richard Garth observes :—

"I am afraid that individual Judges have, like myself, felt a disinclination to oppose what were generally known to be the strong views of Sir Ashley Eden in favour of the ryots until those views had assumed something like a definite shape.

"The Bill, as drafted by the Rent Commission, differed in many important respects from that which has since been prepared by Mr. Reynolds, and we are now in still greater uncertainty as to what is really proposed, because we learn that Mr. Reynolds' draft was again materially altered before it was sent to the Government of India, and that it has now been submitted with still further alterations for the consideration of the Secretary of State."

The third draft settled by Sir Ashley Eden was the one sent to Her Majesty's Secretary of State for India‡ with letter dated 21st March 1882, so that the secrets of the Executive Department appear to have been very carefully kept even from the Chief Justice of Bengal, whose minute is dated 6th September 1882.

"It is true," continues Sir Richard, "that through Sir Ashley Eden's kindness ..I was allowed a perusal of the Bill before it left the Bengal Office; but as this was for my private information only, I do not feel at liberty to discuss it publicly in other shape than that in which it was presented to the public.

"This method of dealing with important legislative measures, however much it may be in accordance with practice and precedence, is, I venture to think, inconvenient. It places myself and others...... in a position of considerable difficulty, and it seems hardly fair to those classes of the community whose interests may be most seriously threatened."§

Sir Richard is mistaken: there was no difficulty, for he was not let into all the secrets. Elsewhere he says :—

"In the numerous notes and minutes which this discussion has elicited, I find some pains have been expended upon the argument that the Government, in case of necessity, has a right to interfere with vested interests, although created by so solemn a compact as that of the permanent settlement, and it has been further argued that in the settlement itself the Government has expressly reserved such a power of interference.

"For my own part I consider this argument quite superfluous. Any Government, *in case of real emergency*, has a right, so far as it is necessary, to interfere with vested rights to whomsoever they may belong, or howsoever they may have been created. But then I take it to be equally clear that *without some such actual necessity* no Government is justified in interfering with the vested rights of any class of its subjects."||

But to Mr. Ilbert the aspect of affairs is singularly different.

"There is," he says, addressing the Legislative Council, "no great difficulty in showing that this so-called obstacle to legislation for the protection of the tenant is no obstacle *at all*: that it is a mere *phantom barrier, which, the moment that it is approached, dissolves into thin air*."¶

In a note, however, prepared by Mr. Tupper under orders of the Government of India, the summarised objections to the contemplated policy are met by such remarks as these— "A conclusion is not condemned because it is theoretical, the real question is whether the theory is right or wrong. Applied political economy is only another name for statesmanship" And referring to the objection of breaking through anachronising customary and traditional relations, a fitting answer has been found in the assertion "they are the concomitant of foreign and civilized dominion." Before radical views of this kind dissolution of the phantom barrier of a permanent settlement into thin air was no great wonder certainly! The wonder is that a foregone conclusion of this kind has been subjected to such long delay and such expensively protracted discussion.

With all this endeavour, however, the full consent of the Secretary of State could not be obtained, and even after repeated communications. At last the Viceroy telegraphed on the 22nd December 1882: "We shall therefore prepare a Bill in accordance with general

* Bengal Government Report, vol. II, p. 410.

‡ See Blue Book on the subject, p. 1.
§ Minute, pp. 1-2. | || Minute, p. 3. | ¶ Abstract, p. 90.

views expressed in Lord Hartington's—17th August." And to "this discussion" the Secretary of State has given his sanction by telegram dated 30th idem; so that it does not seem likely that the Bill begun in January 1883, and presented in Council on the 2nd of March, has yet received the Secretary of State's sanction And since the facts and arguments presented to the Secretary of State are not sound, and since, besides, the directions from England have not been duly followed in the fourth Bill prepared by Mr. Ilbert, the measure stands self-condemned.

One thing besides is deserving of notice. The statesmanlike solutions offered to problems in applied political economy have now run up to four successive Bills, and in each case a re-examination of past labours have led to fresh solutions being attempted of well-known problems in the society of barbarian subjects. And Mr. Ilbert has announced in fervid scriptural language "sufficient for the statesman if he can grapple with the problem of to-day, and for the distant future he must leave posterity to provide." The term posterity in the present case is obviously meant for successive Law Members going to and from England every five or ten years at most: and yet it was not deemed necessary to collect any evidence for the purpose of the present legislation.

7.—*The Bill.*

The petition to Parliament avoids entering into details, for what is prayed for is not how the sections of the Bill might be improved, so as to make the measure perfect, but that a cursory view of the principles and policy of the intended legislation would lead to its rejection. At each successive step in the course of four several drafts, the law-maker has been haunted by one fierce desire to get the ghost of a Bengal zemindar down under the power of the law. Consequently there has been remarkably small leisure to judge how the law would have to be administered. And after many long efforts the definition of the *ryot*, for whom all this trouble is claimed to have been incurred, is left in the form of a negative proposition. The petition avoiding all details of this kind notices only the graver changes in the rent law, of which changes, the inner history is, however, of a remarkable kind. It will be seen that although, after much opposition, the sanction of the Secretary of State was obtained to the introduction of the Bill, yet an endeavour has been made to defeat the declared wishes of Lord Hartington, to say nothing of the misleading reports submitted to him in support of the favourite project of Government.

The principle of the right of occupancy, as created by the Act X of 1859, has been already noticed at sufficient length: its greatest safeguard on behalf of the zemindar were sections 7 and 21 of that Act. All these were proposed to be taken away, for the first time, by the Rent Commission. But the Government of India in reporting upon the subject has coolly ignored the point, mentioning only "that they proposed to institute a new class of ryots, *viz.*, those who had held land for three years or more." The simple plan of making the law acceptable to the people did not commend itself to the authors of the measure, and consequently "a sharply drawn limit of time" was rejected for the purpose of defining the blessing which was intended for this unknown class of people. Sir Ashley Eden had gone beyond the Rent Commission, and had proposed "the resident ryot" instead of the three-year old proprietors. "The Lieutenant-Governor's proposal," so runs the letter to the Secretary of State, "amounts in fact to the creation of an artificial village, residence and cultivation within the boundaries of which shall entitle all settled ryots to rights of occupancy in their lands." But it was objected to by the Government, because they thought "many zamindars will utilise to the utmost extent any opportunity of annihilating the claims of the ryots which may be afforded by the law." They "fully admit the absurdity of supposing that zamindars could cause the great majority of their cultivators continually to shift about from one village or even from one set of fields to another." Nevertheless they "think that it is contrary to public policy (!) that the zamindar should find it to his benefit to oust his ryots or any of them either from house or and."* Strange that in a public document of so great importance such an observation should find its way, while the avowed object of the Government is elsewhere set forth as follows:—"We do not conceal from ourselves that either proposal (that of the Government of India or the recommendation of Lord Hartington) will meet with very serious and painful opposition. Ours will be the more distasteful to the zemindar's interest, but the reason why it will be the more distasteful is obvious."† The only way to reconcile these observations is to suppose that the Government believe either that the zamindars seek to injure their tenants and to elude the law, not for their own interests, but only for the destruction of their tenant's interests, or that whatever is distasteful to zamindars' interests is most in accordance with "public policy." The meaning, however, will not be far to seek; for every body knows whose interests are being most sought to be destroyed, by whom the endeavour is being made, and how few the opportunities are of these English officials to test their schemes by a normal amount of self-interest. Accordingly, the Government of India preferred "simply to take the land as the basis of the occupancy right and to declare that all ryots holding or cultivating ryoti land shall have a right of occupancy therein. The occupancy right would then attach to all *ryoti* land without exception, that is to say, to all land that is not khamar or private land."‡

The Secretary of State has disallowed this:—

"I have to observe," he says, "that whatever may have been the exact position, actual or legal, of the bulk of Bengal ryots prior to the permanent settlement, there can be no doubt that their customary rights at best included the right of occupancy *conditional on the payment*

* Correspondence, p. 22.
† Ditto, pp. 59—60.
‡ Correspondence, p. 25, para. 62.

of the rate of rent current and established in the locality. To this extent therefore I concur in your proposal to restore the ryots to their original position."

But as regards the proposal "to take a classification of lands...as the basis...of the occupancy right," His Lordship says:—

"9 After careful consideration of your arguments, I am not satisfied that a measure is advisable which appears to me to make so great and so entirely novel a departure from both the ancient custom and existing law of Bengal."

His Lordship then proceeds to give his own suggestion to the effect "that every *resident* ryot shall have a right of occupancy in the land which he occupies and *pays rent for*, and that a resident ryot shall be one who, or whose ancestor, has occupied any land in the village or estate for 12 years." This is of course somewhat vague and open to many of the objections previously set forth. But in any case it leaves no room for several of the provisions in the Bill, and more especially for the ignoring of the principle that occupancy rights are at best conditional on the payment of rent, and cannot subsist if the zamindar has unnecessarily to go to court for its realization. The instructions evidently do not justify such a provision, as for instance, that "all land shall be presumed to be ryoti land until the contrary is proved," *i. e.*, proved to have been "the landlord's private land for twelve continuous years before the commencement of this Act." (Sections 5 and 6 of the Bill.)

In answer to the Secretary of State's Despatch quoted above, the Government of India wrote on the 17th October 1882:—

"The number of unprotected ryots will, under Your Lordship's scheme, be thereafter a constantly increasing number. Every acre of land which becomes vacant, whether by pre-emption on the part of the landlord, by death without heirs, &c., falls out of the protected class, and instantly becomes a subject for a renewal of the evil contest. The landlord's interest is immediately concerned in preventing the settlement on such land of any existing cultivator of the estate or village, and in defeating as regards tenants from outside the accrual of occupancy rights by 12 years' prescription on such land."*

The reply to this despatch even was not favourable to the views of the Government of India: and yet we have the following in section 56 of the Bill:—

"Notwithstanding any contract to the contrary when the landlord...acquires...the occupancy right in any of the land...any person thereafter holding the land as a ryot shall have a right of occupancy in respect of it."

A perusal of the Secretary of State's despatch, as well as of Mr. Ilbert's speech, would lead one to think that, at all events, the legislature will not permit any *reduction* of existing rents. The Bill, however, shows a different sort of arrangement. Section 81, clause 6, fixes the maximum limit of produce-rents positively *below* the customary rates in many places, and section 82 is so far dubious in its wording, that it is impossible to say whether clause 2 of section 61 will not operate so as to further reduce the limit by 60 per cent. of what would be due to the landlord under the low limit given in section 81, clause 6.

The redistribution of property, as apprehended from the Bengal Tenancy Bill, is mainly due to the following provision:—

Firstly, as regards Fixity of tenure:—

(*a*) The old occupancy ryots are being placed above the restriction that punctual payment of their dues is indispensable to the continuance of their rights: the value which would be imparted to the occupancy right in consequence of this change would be so much taken from that of the landholder. Nay, it will take away far more from the zamindar than it will give to the occupancy ryot.

(*b*) The occupancy right is further extended in a peculiar way: A tenant holding the right in respect of a square yard or two of land is to have that right extended to any quantity of land, even hundreds of acres, that he may afterwards lay his hands upon.

This provision converts a right in land which was traceable to duration of occupation, into that of a personal status, *i. e.*, privilege attaching to the man who happened sometime in his life to have held a plot of ground for 12 years within the indefinite limits of a village or an estate.

And this personal status of the settled ryot is again made peculiarly obnoxious to the zamindar by the disability imposed on him, whereby he is never to acquire the privileges of a settled ryot, neither for money nor from customary laws.

(*c*) Then the "well-known distinction" which, in the words of the Secretary of State himself, is "deeply rooted in the feelings and customs of the people not only of Bengal, but in most parts of India," between resident and absentee tenants,—a distinction considerably affected by Act X of 1859, is going to be still further relaxed, to the certain increase and possible universality of absenteeism among the rent-payers subordinate to the landholders, and the consequent detriment to agricultural interests and to the much needed facilities for collecting the rents.

(*d*) A further instance of redistribution is the provision about compensation for disturbance, in the case of ordinary ryot, which amounts to a penalty upon the exercise of just rights by the landholders.

(*e*) Lastly, the land is proposed to be cut up in two parts, so as to divest the zamindar of all his proprietary rights in respect of one part, and in the other to make his position as intolerable as what the effect given to provisions of the Act X had generally led to. And for

* Correspondence, p. 58, para. 8.

all this the zamindar is required to bear half the cost of a tedious and most expensive process of land survey, while his rights have to be surrendered through a nominal and summary investigation. In respect of part No. 1, the zamindar is proposed to be denied full rights even when the land should remain unoccupied, and although the revenue demand of the Government in respect of such unoccupied land was not in the least to be relaxed. If he lets it out to a tenant, he must not get the full benefit of what terms he might otherwise obtain, but the tenant must have that benefit even when willing to part with all or some of it, and for valid reasons; and lastly, this lien of the tenant classes will continue for a period of twelve years over all such lands, and the zamindar must not have anything in return for that lien, whether from Government, or from those who enjoy the lien. And in regard to that part of the land which it is proposed would not be especially the zamindar's private land, his rights would have to be established by twelve years' continuous occupation, and even then he would remain liable to be eased for ever of what he thus re-acquires, by simply letting a tenant into possession for the same twelve years.

Secondly, in regard to Free Sale:

The landlord is going to be deprived of all his most important rights: it will deprive him of two of his most ancient rights, *viz.*, that of re-entry in case of non-payment of rent, and that of choosing his tenants; it will require *him*, for the realization of his rents and the punctual payment of his own dues to Government, to look to absentee tenants of uncertain character and all this at inconvenient distances; so that it will make those absentee tenants practically the lords of the soil, leaving all the risks and responsibilities upon the annuitant landlord. Here, too, the landlord is going to be imposed with a grave disability that he cannot acquire, even by purchase, all the rights accorded to any other purchaser for equal value. And while so much is being taken from the property of the zamindar, it does not appear that, even in the expectation of the Government, the ryot is likely to derive much substantial benefit.

And, thirdly, in respect of Fair Rents:

The maximum limits prescribed are inordinately low, and in some cases the limits will lead actually to a reduction of existing rents.

Referring to the question of transferability of tenures, the Government of India write to the Secretary of State:—

"*Para.* 93. So far we have considered the landlord's interest." To this the flat contradiction of the landlords may be entitled to some weight, as coming from those who ought to know their interests better than the authors of the sentence quoted above. Be that as it may, the paragraph then runs as follows:—

"But the protection of the ryot is a matter of much greater difficulty. The money-lender by means of a mortgage might appropriate the whole profits of the holding; or by foreclosure or purchase he might become possessed of the occupancy right, making a sub-lease to a cultivator; or the occupancy ryot of to-day, finding his interest profitable, might gradually disuse cultivation, sub-letting his land to an under-ryot at an exorbitant rent. In all these cases the actual cultivation of the soil would, unless provision be made to the contrary, tend to fall into the hands of a rack-rented peasantry, the fruit of whose labours might be reaped by speculators or absentees or mere annuitants idly consuming the agricultural yield in unproductive expenditure. A generation hence, it may be said, the present circumstances will repeat themselves; the present settled ryots will have become to all intents and purposes tenure-holders, or they will have parted with their rights in favour of non-agriculturists, and the Government will again be moved to interfere for the protection of new masses of peasant occupants against seldom (serfdom ?) and oppression."*

It is hard to say whether language much different from this would have been needed, if the ryots of Bengal had taken to the doctrines of communism and sought to help themselves to the property of the zemindars by violent means, leaving the future to take care of itself.

It is well known that in Ireland it has become necessary to override the contractual relations of people: the reason was that cottier rents there rose above rack-rents. In Bengal the danger is said to be apprehended. No evidence has, however, been adduced, and no statistics collected; but on the contrary competition rates are reported by Sir Ashley Eden to be altogether unknown. Nevertheless the contracts of private parties are proposed to be upset, and the rule about exchange of leases between landlord and tenant, on which the framers of the permanent settlement laid so much stress, is going to be entirely relaxed, because in the opinion of the Government of India the principle dated from the political disturbances of 1857! It would be easy to set right such inaccurate statements of fact: but it is not easy to reach the feeling which could record the following. Mr. Tupper says:—

"Mr. Reynolds remarks that the British Indian Association strongly disapproves this section, and continues, 'it is natural that they should do so, for without this section the other provisions would have little practical effect.' An unfettered contract law, it is stated, is the basis of civilized life and the primary condition of moral and social progress. The aphorism is worthy of Joseph Surface, and I regret that the Association should have stooped to employ an argument which they must have known to be altogether sophistical. Free contract between ignorance, poverty and improvidence on the one side, and cunning, wealth and power on the other, is likely to result in the conclusion of a somewhat inequitable bargain."†

Whether or not the British Indian Association have belied their conscience, or raised a scandal against themselves, the principle, if openly advocated, would naturally raise the

* Correspondence, page 89, p. 93. † Tupper's note, p. 108.

question, how far the high revenue assessment of $\frac{10}{11}$ths on the rental was consistent with customary law, and why the engagements entered into by Government in various matters would not cease to be binding upon the swarthy millions of India. It is, however, a relief to find the following from the pen of the same précis-writer who has approvingly quoted the generous reference to Joseph Surface:—

"But are the landlords in respect to all classes of land, whether *ryoti* or *khamar*, and the occupancy ryots in respect to their own holdings, to be universally refused the advantage of perfect liberty of contract with their lessees? Is the economic benefit of unfettered discretion in dealing with the soil to be banished, so far as the law can expel it from the whole valley of the Ganges from Sarun to Backergunge? If so, how long is this state of tutelage to last? Has the educational value which belongs to the free exercise of authority within a limited field been overlooked? Let the necessities of the time [there is nothing wrong in the *times* as the facts about competition-rates of rent will show—necessities of *cases* of individual misconduct are always subject to judical control] be met by interposition to deliver the cultivators [say rather, individual ones] from injustice and to compel them to render to their superiors their proper dues. But do not eviscerate the scheme of reform by extracting the principle of growth which might be retained as part of it. *This portion of the Bill omits, it may be thought, the germ of social development?*"*

This retrograde movement in regard to contractual relations between people may well be contrasted with the too-forward movement in respect of compensation for improvements. This last is not needed, for the simple reason that agriculture has not yet advanced so far as to take up all the culturable land, much less to require improvements for intensifying the productive powers of the soil.

"Under the influence of external peace" and other causes, says the Board of Revenue, "population has increased and cultivation extended over vast tracts which lay waste at the end of the last century. It should, however, be observed that improvement in the *modes* of culture is not conspicuous. The demand for land has not in most parts yet reached the point at which the enhancement of productive powers becomes the indispensable condition of profitable occupation."†

The fact, if dispassionately considered, will explain most of the phenomena in the agrarian affairs of the country. Mr. Ilbert supposes that the best interests of our society would be conserved because "there is nothing in the Bill to prevent a landlord acquiring an occupancy-ryot from keeping the land in his own hands and cultivating it by his servants or by hired labourers."‡ But a greater mistake could hardly be committed in the present state of Bengali society. If the rich zemindars would take to agriculture and convert their ryots into day-labourers, the European labour-difficulty would make its appearance in India with the most awful consequences. Matters may possibly be moving in that direction. The population difficulty must perhaps arise in course of time: and between the pauper life of day-labourers and cottier life of Irish tenants there would not perhaps be much to choose. But in any case the choice would not lie in favour of the former. Besides, if the life of hired-labourers is all that is intended by our beneficent Government for the poor of this country, that life would be more tolerable under the existing zemindars than under the vast body of (occupancy) tenure-holders now in contemplation. A mistake of the very same kind was committed when in 1793 the members of the British Indian Government advocated the growth of landlords more energetic than their predecessors of the last century. These very landlords have to bitterly rue their fate to-day, and under them, it must be admitted, the tenants have not fared better than under those who had not to think of the interest due to capital invested in the purchase of zemindaries, and whose ruin was compassed by tenants of olden time and by the self-same method of withholding payment of fair rents. Agricultural improvements cannot be fostered by Government, least of all by helping to convert the life of agricultural tenants into that of agricultural day-labourers. But when improvements will become necessary, the richer zemindars would perhaps be found more efficient than the money-lenders of humbler means, who are calculated to acquire under the Bill the rights of occupancy and the status of settled ryots. These considerations probably have not escaped the authors of the measure. But in that case their only justification would be the laudable desire now to redistribute the property of zemindars between the favourities of the day—the settled ryots—just as they leave it to their successors to do the like by those favourities a generation hence.

The grandest panacea, however, for all existing evils with these Indian statesmen is "to take up the question of introducing throughout Bengal the system of village records and field surveys, commencing with Patna Division."§ This was written on the 21st of March 1882. On the 17th of August the Secretary of State, while admitting the advantages of the measure (of course only from an *ex parte* statement of facts), could not after all "avoid "the apprehension that the difficulties may prove greater than the Government of India anticipate."‖

Some enquiries, it seems, have been subsequently instituted. And we find Mr. Finucane reporting on the 10th February, with reference to a small tract of land called No. II.—

"That the number of (rent) rates varies in one village from a maximum of *ninety-five* to a minimum of four, and that the average number for eight villages is thirty-four.

"That the amount of the rates varies from a maximum of Rs. 10 (=1£) to a minimum

* Tupper's note p. 175. † Board's Memo., p. 18.
‡ Abstract, p. 105. | § Correspondence, p. 44. | ‖ Correspondence, p. 56.

of 10 annas (15 pence) in the same village, and for all eight villages from Rs. 15 (£1 10s) to two annas (3d.) per (unit of) 3,600 square yards."§

Another officer reports of the tract to which he was deputed :—

" There was no evidence to prove that the rents of those estates had varied since the permanent settlement. The proprietors of 54 villages on being called on to produce the papers whence present and former rates of the lands in their possession could be ascertained have field petitions" saying "that they had no [such] papers."||

Even Mr. Ilbert has had to confess his "apprehension that in many parts of the country the framing of a table of rates will be impossible." He also adds, "that in many instances the mere framing of a table of rates will not suffice to settle the disputes between landlords and tenants." But, nothing daunted, he has, "to provide a remedy," inserted in the Bill a chapter which is entitled,—" Of the settlement of rents by a Revenue officer."¶ The revenue officer has, however, had to be empowered to "decide questions which more properly appertain to the jurisdiction of the civil courts, and ought not to be finally decided by any other authority."** Therefore, again, to civil courts the litigants are directed to go.

What measures will be hereafter necessary to undo all this mischief the future alone can say.

No. 972 T. R., dated Darjeeling, the 27th September 1883.

From—A. P. MacDonnell, Esq., Offg. Secretary to the Government of Bengal,

To—The Secretary to the Government of India, Legislative Department.

I am desired by the Lieutenant-Governor to address His Excellency the Governor-General in Council on the subject of the Bengal Tenancy Bill, which was forwarded with your letter No. 11C. of the 16th March 1883. The Government of India have already been advised of the publication of translations of the Bill in the *Bengali* (1), *Behar* (2), and *Urya Gazettes* (3), on the dates mentioned in the margin, and I am now to say that, with a view to give as wide publicity as possible to the proposed measure, copies of the Bill, in English, and in the Bengali, Urya, and Hindi vernaculars, were made available to all public bodies and private individuals throughout these provinces. Full publicity has thus been given to the Bill, and the result is apparent in a vast quantity of careful and detailed criticism, which cannot fail to have an effect in moulding the ultimate form of the measure. Copies of the various reports and memorials received by this Government during the last six months in connection with the Bill have been from time to time forwarded to the Government of India; but I am to take this opportunity of submitting in a collected form all the more important correspondence which has passed between this Government and those interested in the subject since Mr. Rivers Thompson assumed his present office in Bengal.

(1) 24th April 1883.
(2) 4th May „
(3) 17th „ „

2. It has been recognised that the Report of the Rent Commission, in itself a most exhaustive State paper, was subjected to a degree of careful criticism, unprecedented in the discussion of public questions even in this country. "No measure of late years," says the representative organ of zemindari interests in Bengal, "has attracted so much public attention as this. It has been discussed throughout the country, and representations have poured in upon Government from all quarters. The discussion which has followed the proposed Rent Bill is in marked contrast to what took place when the Rent Bill of 1859 was passed. The only representation of any note which was then submitted to Government came from the British Indian Association; but even that vigilant body did not then show sufficient activity in the matter. It contented itself with submitting a memorial to the Legislative Council. It did not then take any steps, as it has done on the present occasion, to organize public opinion on the subject. But the times have changed. The Government has now become more alive to public opinion than ever. Sir Ashley Eden has invited expressions of public opinion from all quarters. He asked district officers, both executive and judicial, to express their opinion on the Bill. He invited the public Associations to discuss the Bill. He appealed to the leading men in the districts to consider the Bill. He offered every facility in the way of discussion. He caused the Bill and the Report of the Commission to be translated into Bengali, Urdu, and Hindi, and had the translations extensively circulated. He went further, and deputed Mr. Reynolds to tap the great centres of mofussil opinion. Thus ample opportunity has been given to the public for a thorough discussion of the Bill."

Nature of criticism to which the Bill has been subjected.

3. That is an accurate description of the extent to which the Reports under notice had been subjected to criticism up to the early portion of 1881. Later in that year those criticisms were examined in Mr. Mackenzie's letter No. 849 T. of the 27th July, a valuable addition being made thereby to the literature of the subject. Afterwards the Government of India, in their despatch No. 6 of 21st March 1882, reviewed the entire discussion in its historical and economical aspects with a detail and fulness remarkable, the Lieutenant-Governor may be permitted to say, even in an enquiry which has been distinguished throughout by ability and research. It may be accepted therefore that, even before the publication of the present Bill, the information accumulated on the relations of landlord and tenant in Bengal was almost complete.

§ Letter from M. Finucane, Esq., on special duty, to the Secretary to the Board of Revenue, paragraph 5 (dated 10th February 1883).

|| Baboo Parbati Churn Dey, to the Revenue Board, No. 114, dated 6th February 1883.

¶ Abstract, pp. 116, 117.

** Abstract, p. 118.

4. In a petition dated Calcutta, 1st July 1883, to the House of Commons, the landholders of Bengal and Behar, while acknowledging that the fullest opportunities had been given for discussing the original draft of the Bill, complain that similar opportunities of examining the Bill finally submitted to the Government of India by this Government had been refused. This complaint is, in the Lieutenant-Governor's judgment, unreasonable. The Bill submitted by the Bengal Government for the consideration of the Government of India and the Secretary of State embodied the modifications of the Rent Commission's original draft, which seemed to Sir Ashley Eden to be called for by the ordeal of criticism through which that draft had passed. Those modifications might not have been (as in fact many were not) accepted by the Government of India, and therefore to invite criticism on them before they had been approved by that Government would have been a waste of time. The Bill now before the Council is the Rent Commission's draft moulded into its present shape by the Governments of India and Bengal in the full light of public opinion, and this Bill has now been before the public for six months. Its publication has added to the mass of information, extant on the Rent question, a further voluminous expression of opinion on every point of principle and on most matters of detail. The opinions now expressed, indeed, are in many instances but repetitions of what had been said before; but this was to be expected, for the Bill in its main features is the natural outcome of the preceding discussions: while, even on such a wide subject as that in hand, there are limits to human inventiveness. The repetitions, however, are valuable as showing that little more is left to be said upon the subject. A few reports, indeed, are still expected from local bodies or individual officers; but the Lieutenant-Governor thinks it undesirable to postpone any longer the expression of his own views on the main points of the measure. With questions of detail or verbal emendations of the Bill he does not propose at present to trouble the Government of India, as ample opportunity will no doubt be afforded him, during the progress of the Bill through Select Committee, of making such communications on minor points as circumstances may require.

Groundlessness of complaint of secretiveness in regard to the measure made against the Government

5. If the Lieutenant-Governor thinks it undesirable to consider minute details on this occasion, still less does he wish to follow those advocates of the zemindari party, who question the propriety of the measure as a whole. If there really be any persons who, in the face of the overwhelming accumulation of evidence afforded by the discussions of the past ten years, still question the necessity of legislation on the broad lines of this Bill, then it is quite hopeless to expect that anything the Lieutenant-Governor could say would convince them. Recent experience in these provinces has accentuated the necessity for legislation which has already been recognized most distinctly by the zemindars themselves; and Mr. Rivers Thompson therefore hopes that no time may be lost in bringing to a close a controversy the settlement of which is essential to good administration, peace, and progress in Bengal. With these preliminary remarks, I am now to state the views of this Government on the chief provisions of the Bill; and from the statement I shall make it will be seen that, while the Lieutenant-Governor must express dissent from some points of the measure as drafted, he is able to give it, subject to the acceptance of certain modifications, his earnest support.

Necessity for speedy legislation

6. In the first place I am to offer a few observations on the propriety of legislating for the whole of these provinces in one Bill, as the proposal to do so meets with some opposition. It will be within the knowledge of the Government of India that doubts on the point, suggested at an early stage of this discussion, were formulated by Mr. Reynolds in the note which is printed in Appendix IV, Volume I of the Report submitted by the Bengal Government in 1881; but Sir Ashley Eden, on full consideration of the subject, thought separate Bills unnecessary, believing that "if his proposals for basing the occupancy right on a broad and popular basis throughout the whole of the Lower Provinces met with approval, and if the improvements suggested by him in the law of distraint were accepted, the matters calling for exceptional treatment in connection with Behar would be practically reduced to two, *viz.*, the disposal of claims to *zerant* lands, and the regulation of the procedure for the regulation of rents in kind."

Proposal to legislate separately for Bengal and Behar considered.

To these remarks of his predecessor, as well as to the arguments advanced by Mr. Reynolds and others in favour of separate legislation for Bengal and for Behar, the Lieutenant-Governor has given his careful attention; and while he admits that differences do exist between both portions of these provinces in some respects, he is not prepared to say that they are such as call for divided treatment. It is true that in Bengal the demand for legislation came, in the first instance, from the landlords, who urgently pressed for increased facilities for enhancing and realising rents, while in Behar the cry was from the ryots for protection from illegal enhancement and ejectment. It is also true that in Bengal the extent to which sub-infeudation has gone produces difficulties in adjusting the mutual relations of proprietor, tenure-holder, and ryot, while in Behar those difficulties are less developed. It is further true that in some districts of Behar the system of corn-rents is far more prevalent than in the districts of Bengal Proper. But granting all this, an examination of these points of apparent difference will show that the differences are of degree, rather than of essence; while in Bengal we have well-marked instances of the same evils which depress industry and disturb the public peace in the Patna Division. If ejectment, as a means of extorting enhanced rents, widely prevails in Behar, evidence is not wanting that a similar practice is in vogue even in the most forward district of Bengal. Does a Behar zemindar or thikadar attach the whole crop of the ryot to compel payment of an increased *jumma* or of legally irrecoverable arrears?—

the Bengal zemindar applies corresponding pressure through suits for monthly kists, or through some other legal device, in order that he may (as one recently ventured to tell a sub-divisional officer) "by hook or by crook" raise the rents and break the rates. Where Behar landlords shift their ryots from field to field (as they have admitted they do) to prevent the growth of prescriptive rights, the Bengal zemindar can apply no less potent pressure, if one may judge from the "agreements" which are registered in such widely different districts as the 24-Pergunnahs and Mymensingh. In Bengal and Behar alike the efforts of landlords are directed towards the same end—enhancement of rent, prevention of the growth of tenant-right, and its destruction where it has grown up; and if in Bengal they are not so successful in their efforts as in Behar, that is not because of any dissimilarity of aim. The same evil demands the same broad line of treatment in all portions of these provinces. To prescribe every variation of detail to suit local circumstances is not within the compass of any law; these variations must be worked out in practice by the applications of the broad principles of the law to individual cases by the courts or other authorities entrusted with the administration of the Act.

Necessity for a positive definition of 'tenure' and 'ryot.'

7. *Chapter I.*—The negative character of the definitions of "tenure" and "ryot" has been unfavourably critisised. The difficulties in the way of a positive definition, especially those to which the Rent Commission draw attention in paragraph 20 of their Report, are not ignored, but it is clear that the want of some definition which might afford a presumption as to the nature of the right leads in practice to serious embarrassment from which all landlords suffer. The Board of Revenue even go the length of asserting that any "rule of thumb" procedure which would enable a tenure to be distinguished even presumptively from an occupancy holding would be a great relief to landlords, and a help to the revenue administration of the province.

Objects at which a definition of those terms should aim.

On such a question as a legal definition of this sort, the Lieutenant-Governor has much diffidence in offering any opinion; but it seems to him that there is reason for the dissatisfaction expressed with this portion of the Bill, and that a definition is more likely to avoid difficulties than the absence of any definition at all. One of the greatest difficulties to be met with in dealing with the rent question in Bengal is the question of subletting. It is possible that by accurately defining the class who, as occupancy ryots, will be entitled to sublet, that difficulty may be lessened; and, therefore, the Lieutenant-Governor would suggest that while those who retain a substantial cultivating interest in the holding should be regarded as occupancy ryots, all those owners of occupancy rights who never got possession for the *bonâ fide* purposes of cultivation, or who, having originally been cultivators, have divorced themselves from direct connection with, or responsibility for, the cultivation of the holding, should be classed as tenure-holders. It is to be remembered that the late Supreme and present High Court have declared "any tenure by title deeds or by the custom of the country, transferable by sale," to be an under-tenure (Indian Law Reports, Vol. 8, page 675), while the Lieutenant-Governor understands that the courts look on persons who have not got possession for *bonâ fide* purposes of cultivation in the light of tenure-holders (9, Calcutta Law Reports, page 449). It seems therefore to Mr. Rivers Thompson that a definition on the lines he proposes would not only be in accordance with the prevailing judicial opinions on the subject, but would also establish an intelligible demarcation line between the cultivator and the mere rent-receiver, which would hold good in the great majority of, if not in all, cases. Such a definition would also have the great advantage of classing as tenure-holders mahajans and other non-agricultural purchasers of occupancy rights, whose ryots would then become 'ordinary' ryots, saved by the provisions of the Bill applicable to their class from the worst evils of rack-renting, and capable of acquiring occupancy rights in course of time.

Objections to such a definition.

In making this suggestion, the Lieutenant-Governor is not unmindful of the objection that it would tend to increase indefinitely the chain of middle men between the proprietor and the actual cultivator. The increase, however, would be but nominal; for the non-cultivating occupancy ryot is already in fact a middleman, while middlemen, divorced from all connection with tillage, are rarely in these provinces, owing to the pressure of population on the soil, recruited from the cultivating classes. Besides, even if middlemen are created, the condition of the actual cultivator under them would be better (if the proposals which the Lieutenant-Governor will subsequently make be accepted), than under rack-renting occupancy ryots, who are middlemen in all but the name. Mr. Rivers Thompson is also not forgetful of the probability that such a definition as he proposes would meet with some opposition in portions of deltaic Bengal; for instance, where certain classes claim the *status* and immunities of tenure-holders, while exercising over under-tenants the power and privileges at present enjoyed by occupancy ryots. These classes would oppose a formal definition which would curtail the power they claim to exercise; and it is only right to say that their opposition seemed so formidable to Sir Richard Temple that, notwithstanding the existence of judicial decisions declaring these classes to be tenure-holders, he deemed it imprudent to provoke it by affording any protection, even in settlement proceedings, to the actual cultivators of the soil. On the other hand, the proposed definition would meet with approval, and would redress existing inconveniences in those districts where cultivation expands or contracts with the rise or fall of prices, an elastic rent system being the consequence.

A positive definition of 'tenure' and 'ryot' proposed.

Such being the objects to be provided for, the question is, what form should the definitions take? This question is, no doubt, difficult, the difficulty being in connection with the point whether an occupancy ryot may sublet his holding and still remain a ryot. In by far the greater portion of these provinces it is, in the Lieutenant-Governor's opinion, safe to provide that a ryot who sublets a large portion of, if not his entire holding, thus divorcing himself from actual cultivation, shall be deemed to be, not a ryot, but a tenure-holder. In the less settled portions of the deltaic and frontier districts, however, subletting is the usual procedure for reclaiming land, and is rather a method of *ryotti* cultivation than an evidence of sub-infeudation. In such districts, therefore, subletting of the entire holding should not operate to convert the lessor into a tenure-holder, but should be deemed consistent with the *status* of a ryot. Bearing these considerations in view, the Lieutenant-Governor submits for the consideration of the Council the following definitions which are based on those contained in the Rent Commission's Report:—

(*a*)—A tenure means (1) a rent-paying interest in land subordinate to the interest of a proprietor and superior to that of a ryot; (2) a rent-free interest in land when a rent-paying interest in the same land exists between the proprietary interest and such rent-free interest; (3) a revenue-free or rent-free interest in land when no rent-paying interest exists between such revenue free and rent-free interest and the proprietary interest. A tenure includes an undertenure.

Illustrations.—A patni, dar-patni, or se-patni interest is a tenure. An ijara or dar-ijara is a tenure. An occupancy holding, which the owner does not cultivate as ryot, is a tenure. A valid bramhotur is a tenure. A lakhiraj holding, included in a revenue-paying estate and not entered in the register of Revenue-free lands, is a tenure.

(*b*)—A ryot or tenant means a person who cultivates land, or who occupies land for the purposes of cultivating it, or bringing it under cultivation. A person cultivates land or brings it under cultivation within the meaning of this definition, when cultivation is carried on by himself, or by the members of his family, or by his servants, or by hired labour, or by subletting a part while continuing to carry on cultivation by one or more of the preceding means in a moiety of the land.

Provided that by order duly published in the *Calcutta Gazette*, the Local Government may declare that cultivation as a ryot may be carried on within a tract to be specified in such notification by subletting the whole of the land, and may suspend or withdraw that order, and such declaration shall have the force of law.

Illustration.—Cultivation of the whole or part of an occupancy holding on the terms of a division of produce between the occupancy holder and the actual cultivator, is cultivation under a sub-lease.

(The latter illustration is meant to provide for those cases which, judging from experience, would probably be numerous, in which mahajans having bought up occupancy rights would let a portion of the land on a *nukdi*, and the remainder really on a *baoli* tenure, but ostensibly on a contract fixing portion of the produce as the wages of labour.)

I am to propose below that landlords be allowed a more summary procedure for collecting rents from tenure-holders than from ryots, while non-occupancy ryots renting land from tenure-holders be granted a more beneficial *status* than *kurfas* or under-tenants can enjoy. It is to be hoped that by these means the interests of the landlords on the one hand, and those of the actual cultivators on the other, will jointly operate in the direction of classifying as tenure-holders all owners of occupancy rights who do not actually cultivate the soil; and further that the limitations imposed on the powers of tenure-holders to rack-rent, to which reference will be made later on, will discourage the growth of the class.

CHAPTER II.

Distinction between ryotti and khamar land.

8. The provisions relating to the distinction between *khamar* and *ryotti* lands have been subjected to a good deal of criticism, the outcome of which is to confirm the Lieutenant-Governor's belief in the usefulness of those provisions, especially in Behar. It may be conceded that the chapter is not so much required in Bengal as in Behar, and that there is truth in what some critics of the measure say, that if in Behar landlords strive to absorb *ryotti* lands into *khamar*, in Bengal ryots strive to convert *khamar* into *ryotti*. In either case, however, it would seem that some provisions, such as the Bill contains, are necessary; although the Lieutenant-Governor is not prepared to say that, if enacted, they will be found as necessary, or made as much use of, in Bengal Proper as in Behar. The requirements of particular districts will, however, be sufficiently met by the discretion with which section 7 of the Bill vests the Local Government. Undoubtedly the chapter may be needed from time to time in particular tracts in Bengal, where it would prove an useful adjunct to some other provisions of the Bill; but it would probably be unnecessary to enforce it on any large scale in Bengal Proper, if landlords do not abuse their power of pre-emption by converting *ryotti* into *khamar* land. This point will be dealt with later on.

Proposals to recognize an increase in khamar land examined.

Some critics of the Bill, while admitting the necessity for the chapter, especially as regards Behar, desire to modify it so far as not to absolutely limit for ever the stock of *khamar* land. Some would allow it to be increased by the absorption of *ryotti* land; others by the re-

clamation of waste lands and by alluvial accretions; and a few, referring to local peculiarities of tenure, would class as *khamar* such lands as the *utbundi* lands of Nuddea. On the general principle whether *ryotti* land should be absorbed into *khamar*, the Lieutenant-Governor entertains a decided opinion in the negative. Without wishing to reduce the existing stock of the landlord's *khamar* or *seraat* land (in which it should be distinctly understood that the lands for instance, known as indigo *zeraats*, which are essentially ryotti, are not included), Mr. Rivers Thompson believes that every consideration of law of experience, and of expediency, is against its extension. It has been affirmed that *khamar* was originally the waste unreclaimed area of the village which the zemindar was permitted to cultivate by contract for his own advantage during the term of his revenue engagement with the Government of the day, but which, as cultivators settled on it, became part of the *ryotti* land of the village. However this may be, the fact is indisputable that under the Permanent Settlement Regulation (VIII of 1793, sections 37 to 39) no land was recognized as *khamar* which was not such on the 12th August 1765, the date of the grant of the Dewani, and there is no law recognizing the creation of *khamar* land subsequent to that date. These facts afford a sufficient answer to the charge of an infringement of ancient rights, which is brought against the present proposals to define the limits of *khamar* land; and itmay be added that from the facts established in other countries, of the clear line of distinction between demesne and tenemental lands, analogies* might be drawn in favour of thost provisions of the Bill.

If, however, it be inexpedient to permit the increase of the *khamar* area by the absorptiou of *ryotti* land, can the same be said of an increase through reclamation of waste lands, alluvial accretions, or lands subject to special conditions of cultivation. In the Lieutenant-Governor's opinion, the prohibition should hold good here too. In those ditricts where large waste areas still exist, and where there is no customary right of pasturage or easement involved, the faculty of converting waste into *khamar* might perhaps be conceded without any immediate loss to the community at large; though, looking to the over-growing importance of emigration from the more crowded tracts to those wastes, there would be ultimate loss and difficulty. In those districts, however, where the village wastes are the only pasture grounds, the case assumes a different aspect, for admittedly one of the most crying wants in these provinces is the provision of sufficient pasturage for cattle. While our Forest Department is unsuccessfully struggling with the difficulty of providing fuel and pasturage reserves that manure now used as fuel may be liberated for agricultural uses, and cattle preserved for husbandry, it would surely be unwise to hasten the absorption into the cultivated area of such limited pasturages as still remain by any such incentives as the proposals in question are calculated to afford.

It is stated by some that local custom usually classes *churs* as *khamar*, and that such a custom ought to be recognized; but the Lieutenant-Governor must say that he does not see on what basis of right such a custom, which is opposed to positive law, could be defended. The principle guaranteed by section 4, Regulation XI of 1825, that a ryot or "any description of under-tenant whatever" has a right to an accretion to his holding, would, if properly pleaded, dispose, in the Lieutenant-Governor's opinion, of many such "customs" in a court of justice. It is well known that *churs* and alluvial accretions form large tracts of country, especially in the deltaic districts. Many of these churs are inhabited by an industrious class of resident ryots; and any custom, even if legal, which would deprive them of agrarian rights, would be indefensible on grounds of public policy or justice to individuals, and a fertile source of embarrassment to Government.

Finally, in regard to *utbundi* lands, the Lieutenant-Governor does not see that any exception to the general rule is needed. As far as he is aware, the *utbundi* tenure is only special as regards the system on which the rent is paid, and does not affect the legal attributes of the land. It is not so much that one ryot cultivates one *utbundi* holding one year, and a different ryot another year, as that rent is paid only on the extent of land actually cultivated for the year, and by measurement at harvest time according to the actual outturn of the crop. The Lieutenant-Governor understands that prescriptive rights of occupancy under Act VIII of 1869 are now actually acquired in these *utbundi* lands, and he would not by any provision impede the growth of such rights.

CHAPTER III.

9. The Lieutenant-Governor is disposed to agree with those who object to classing tenants at fixed rates as necessarily tenure-holders. He would prefer to apply to them the definition already given classing them as tenure-holders or ryots as they fall within the definition of either. Mr. Rivers Thompson also agrees with the representative Associations in thinking it undesirable to retain section 28 of the Bill. Tenure-holders are, as a rule, well able to look after their own interests, and they have, in section 32 of the Bill, a means provided of compelling registration should they prefer not to await the landlord's action under section 33. It is unlikely that a tenure-holder desiring to register a transfer would be deterred from applying to the landlord under section 27 by any of the causes which may deter a ryot from tendering payment of rent. The introduction of the revenue officer, therefore, in these proceedings is unnecessary; and as the double procedure would be embarrassing, the section may well be omitted, and the same facilities to compel registration afforded to both the tenure-holder and his landlord. Parties should go to the court where they will get final relief, unless there be a distinct advantage to be gained by a departure from this rule. The omission of section 28 from the Bill would involve modification in section 35. The words from "and determine" to "under section 27" might be omitted, and "Local Government" substituted for "Board of Revenue" in the first line.

Objection to classing ryots holding at fixed rates as necessarily tenure-holders. Registration of tenures.

* Reports from Her Majesty's Consuls, Parts I—V, 1869 70. See also Mr. Justice Field's "Landholding, &c in various countries."

CHAPTER IV.

Incorporation in the Bill of the procedure for sale of patni taluks.

10. The Lieutenant-Governor approves of the principle of including the law for the sale of patni taluks in the Bill, as it is essentially a part of the law of landlord and tenant in these provinces, and as its provisions may be advantageously extended to some other classes of tenures besides those distinctively known as *patnis*. He sees no force in the objections made to this course; for there is no question of altering the substantive provisions of Regulation VIII of 1819, or of modifying it in any points of principle, or except on a few, and those unimportant, points of detail. If, however, the Regulation be now included in the Bill, it is for consideration whether the whole law should not be worked into the body of the Bill, instead of being relegated in part to a schedule. This would bring into one code the whole law upon the point relating to landlords and tenants.

CHAPTER V.

Right of occupancy. Definition of a 'settled ryot.'

11. This chapter brings into prominence one of the chief features of the Bill, and has naturally received much attention. The advocates of the zemindari interest object to any expansion of the provisions of Act X of 1859; but, putting extreme partizans on one side, the Lieutenant-Governor does not see that any reasonable objection is made to conferring on ryots, who have resided twelve years in the village, rights of occupancy in all lands they hold, or may hold, in that village. Considerable opposition, however, is shown to the introduction of the term "estate" into the definition, and various examples are given of the hardships which would be thereby inflicted on zemindars or tenure-holders. The basis of all the hostile criticisms on the chapter is that the "settled" ryot is not the true representative of the *khudkhast* ryot, and that, as the object of this legislation is supposed to be the rehabilitation of the *khudkhast* ryot, we go beyond the requirements of the case by introducing the "estate" into the definition, and excluding the idea of *residence* as essential to the *status* of the ryot in question. That is, in the Lieutenant-Governor's opinion, a correct representation of the main objections to the definition, though in his own view it is untenable, having regard to what passed in 1859. It must be added, however, that, in a petition to the House of Commons, the Behar Landholders' Association go the length of asserting that the *khudkhast* ryot was altogether unknown to Behar at the time of the permanent settlement, which they say only recognised, on the one hand, proprietors of the soil, and, on the other, tenants-at-will with no rights or privileges of any description. This extraordinary assertion of the extreme zemindari view of the permanent settlement has for its sole foundation the facts that the rule regarding the cancellation of *khudkhast* ryots' pottahs contained in the second clause of section 60, Regulation VIII of 1793, did not apply to Behar, and that the Court of Directors in 1819 expressed an opinion that zemindars were entitled to eject *hereditary* ryots on refusal to pay even exorbitant rents.

Erroneous views regarding the *status* of Behar ryots contained in the Behar Landholders Association's petition to Parliament.

It would be tedious to enter here on an examination of the permanent settlement with a view to correct the serious misapprehensions of its nature and effect into which the Behar Landholders' Association have fallen. Such an examination will be found on pages 97 to 108 of the Papers on the Working and Amendment of Act X of 1859, which have recently been republished by the Government of India; and here it will be sufficient to say that the position of Behar zemindars at the time of the permanent settlement, so far from being the independent one now claimed by the Behar Landholders' Association, was such as to justify Mr. Shore in speaking of "the very degraded state of the proprietors in Behar compared with those in Bengal. The former, unnoticed by Government and left at the mercy of the *amils*, have in fact considered themselves proprietors only of tithe of their real estates, and assured of this when dispossessed, they have been less anxious to retain a management, which exposed them to the chance of losing a part of what they received without it." And, again, "the system of management adopted in Behar for so many years having been calculated to destroy all ideas of right in the proprietors of the soil, beyond their admitted claims to a tithe of their proprietary right, they consider all besides this at the discretion of the Government." (Minute of September 18th, 1789). The true reason why section 60, clause 2, Regulation VIII of 1793, did not apply to Behar was that written pottahs had obtained a currency in Bengal which was unknown in Behar, where the *baoli* rent system and verbal agreements had prevailed up to the latter part of the last century; that accordingly provisions for dealing with collusive pottahs, which were of use in Bengal, would have been out of place in Behar, and that the same stringent rules required to protect ryots against the powerful landholders of Bengal were uncalled for in the case of the powerless zemindars of Behar. "In Behar," says Mr. Shore, "the variations in the demands upon the ryots are not so great as in Bengal; the system of dividing the produce (*i.e.*, the *baoli* system) affords a definite rule whenever that prevails; and the regulations need not be so minute as those proposed for Bengal." (See paragraph 145 of the Minute already quoted: also Harrington's Analysis, Vol. III, p. 441). If the Behar Landholders' Association had consulted the official literature on the subject, they would have been saved from the error of thinking that Behar ryots were held to have no rights by the framers of the permanent settlement. The whole of that literature proves beyond doubt that the ancient usages of the people were, at the time of the permanent settlement, less obscure in Behar than in Bengal; that the true position of zemindars as removable revenue collectors was less open to dispute: that the cultivator's right to hold his land as long as he paid the authorised rent was less questioned; and that even the *paikhast* ryot was less known, the village margin of waste land being greater in Behar than in Bengal.

If the Behar Landholders Association's appeal to section 60, Regulation VIII of 1793, be unfortunate, their reference to the Court of Directors' Despatch of 1819 is not less so. So

far from stating that in 1793 zemindars had unlimited powers of ejectment and enhancement over all classes of ryots, as the Association assert, that Despatch is concerned with proving exactly the reverse, as is shown by the following passage from the 13th paragraph opening the discussion of "the Rights of the Peasantry":—"Although the zemindars with whom the permanent settlement was made are, in the regulations respecting that arrangement, declared to be 'actual proprietors of the soil'; although their zemindaris are called landed estates, and all other holders of land denominated their under-tenants; and although, as we shall have occasion more particularly to observe in the course of this Despatch, the use of those terms, which has ever since continued current, has in practice contributed with other causes to perplex the subject of landed tenures, and thereby to impair, and thereby to destroy, the right of individuals, yet it is clear that the rights which were actually conferred on the zemindars, or which were actually recognised to exist in that class by the enactments of the permanent settlement, were not intended to trench upon *the rights which were possessed by the ryots*" (the italics are the Lieutenant-Governor's). The whole tenor of the Despatch goes to show that undoubtedly the peasantry in 1793 had rights which neither the Government of the day did, nor could, alienate from them; and the passage which the Association quote, apart from its context, merely states as an "unavoidable inference" that zemindars "are authorized by the existing law (*i.e.*, by the law as understood in 1819) to oust hereditary ryots." Keeping in view the unforeseen effect on tenant right of the legislation subsequent to 1793, particularly of Regulations V of 1794 and VII of 1799, it will be seen that the Court of Directors in the passage quoted by the Association were in fact not referring to the permanent settlement at all, or to ryots' rights under it. And of this (if further demonstration on the point is to be given) the Behar Landholders' Association might have satisfied themselves by going a little beyond the quotation they make from the conclusion of the 53rd paragraph of the Despatch, to the commencement of the 54th. The 54th paragraph of the Despatch of 15th January 1819 runs thus:—"In the consideration of this subject it is impossible for us not to remark that consequences, the most injurious to the rights and interests of individuals, have arisen from describing those with whom the permanent settlement was concluded as actual proprietors of the land. This mistake, for such it is now admitted to have been, and the habit which has grown out of it in considering the payment of the ryots as rent, instead of revenue, have produced all the evils that might be expected to flow from them. They have introduced much confusion into the whole subject of landed tenures, and have given a specious colour to the pretensions of the zemindars, in acting towards persons of the other classes as if they, the zemindars, really were, in the ordinary sense of the words, the proprietors of the land, and as if the ryots had no permanent interests, but what they derive from them * * * * * * *
It is fortunate, however, and must not be forgotten that in the same Regulation in which the Bengal Government in 1793 conferred rights upon the zemindars, apparently inconsistent with the rights of the cultivators of the soil, it reserved to itself the full power of passing such laws, as from time to time might appear necessary for the protection of the rights acknowledged to be vested in the ryots."

It did not of course require this demonstration to satisfy the Government of India that the views expressed by the Behar Landholders' Association, on the status of zemindar and ryot in Behar in 1793, are incorrect; but the Lieutenant-Governor has thought it right that the expression of such erroneous views, by an influential body of land-owners in a petition to Parliament, should not be allowed to pass uncontradicted.

The definition of a 'settled' ryot as contained in the Bill further justified.

Returning to the objections which have been raised to the definition of a "settled ryot," the Lieutenant-Governor starts with the fullest acceptance of the principle enunciated by the Famine Commission, that it is "desirable for all parties that measures should be framed to secure the consolidation of occupancy rights, the enlargement of the numbers of those who hold under secure tenures, and the widening the limits of that security." This principle finds a fitting recognition in the constitutional acknowledgment made by the Bill that the proprietor's interest in the soil is not an absolute or exclusive one; but that, as Lord Hastings' Government admitted in their letter of the 7th October 1815, to the Court of Directors, the permanent cultivator has an "established hereditary right in the land he cultivates so long as he continues to pay the rent justly demandable from him with punctuality." This position has the Lieutenant-Governor's fullest approval as being in accordance with the ancient custom of the country, and never superseded by any act of active legislation. The customary law of these provinces being such, the question remains whether the village in which the cultivator lives should limit and bound his rights, or whether, having once been admitted by the landlord to permanent cultivation in one part of his estate, he should not be deemed entitled to similar privileges in other portions which lie outside the village in which he may actually reside. To the question thus raised, the Lieutenant-Governor would give an affirmative answer. The interests of the community require as large an extension of fixity of tenure as is consistent with the rights of the zemindars, and the only rights which can be conceded to zemindars upon the point are those of receiving fair rents, and of assuring themselves that the persons they admit to permanent residence and cultivation within their estates are persons of good character and likely to make solvent, industrious tenants. Once assured on these points, the proprietor of an estate can have no reasonable justification for refusing to an approved tenant cultivating rights in one portion of his zemindari which he has granted to him in another. It must be remembered that the proposal under consideration has been brought forward in consequence of the evils caused by the action of the zemindars themselves in shifting their ryots from land to land to prevent the accrual of a right which the earliest Regulations recognised, and Act X of 1859 distinctly affirmed.

On this question the Lieutenant-Governor would say that perhaps too much importance has been attached to the fact that the term *khudkhast* connoted, or is believed to have connoted, the idea of residence in the village in which the ryot's holding lay. The early discus-

sions upon Act X of 1859 show that residence, though generally, was not always a condition of occupancy; and at any rate it should be borne in mind that we are not now seeking to rehabilitate the *khudkhast* ryot in exactly the same status which obtained in 1793. The reasons for this are obvious. The period between 1793 and 1859 was one in which the power of the landlord had grown beyond controllable limits, and exercised an almost paramount influence dangerous to public stability and order. It was in such a state of things that the law of 1859 was passed; and as regards the position of the main body of the cultivating classes, the doubts and difficulties of the situation (which had arisen from the effacement of the ryots' rights and privileges by unchecked zemindari influence and independence) were solved by the declaration of a 12 years' occupancy as evidence of prescriptive title, that term being adopted in the Act absolutely and *without reference to residence.*

Even if Act X of 1859 had not thus introduced a "new departure" in the land law of Bengal, the changes of a century, and the indeterminate limits of villages at the time of the permanent settlement, forbid that we should go back now to the consideration of a state of things which existed nearly a century ago. It is, in fact, impossible to do so, for the circumstances and conditions of the country are different; and all we can hope to do is to place the settled ryot of to-day in a position analogous to that occupied by his prototype. One of the privileges of the *khudkhast* ryot was to hold fresh land in the same village on the same tenure as the old; and as, in those times, there was a large margin of waste in all villages, the resident cultivator had the fresh land at his door. There is now but little margin of waste in any village of the settled districts, and therefore the ryot, if he wants to add to his holding, cannot always succeed in doing so. That he should, however, if successful in his quest (and he can only succeed with the consent of his landlord), hold such additional land in the same estate, by the same title as his original holding, is only a rational development of an old customary law of the country to suit modern wants.

Definition of a settled ryot further considered.

In considering all that has been urged against the definition which the Bill gives of a settled ryot, Mr. Rivers Thompson regrets to find but little evidence of a conciliatory spirit on the part of zemindars. They represent, in all their statements upon the question at issue, that they, of all people, are the most anxious to retain good ryots upon their properties; but when an attempt is made to translate their expressions of good-will towards their tenantry into positive law, in accordance with the necessities of the case as demonstrated by accumulated proof, the landlords assert their right not to be bound by any law. This question of definition of a settled ryot is a case in point. It is impossible to believe that in early times, as population grew and the margin of waste land in a village diminished, a landlord's approved tenants would not have the preference of such fresh lands as existed in neighbouring villages of the estate, or that they would hold such lands on a less secure title than attached to their lands in the parent village. It must also be remembered that, owing to the disintegrating influence of time and of the law of inheritance, the village area of to-day is frequently much smaller than the village area of a century ago: and to restrict the rights of the settled ryot to the smaller area would not be just to him nor advantageous to the public, nor in accordance with the practice which has grown up under Act X of 1859. All experience shows that the settled ryot of a village, who rarely holds more than a few acres of land, and who is therefore too poor to afford two homesteads, or any care-taker but himself and children, can never go far from his home for fresh land. This can be asserted with positive certainty of all those ryots who pay less than Rs. 20 annual rent, and they number 8,925,000 out of the 9,752,000 ryots, who, according to the Famine Commissioners, cultivate the soil of Bengal. It may be asserted, if not as positively, still with much probability, of 682,000 ryots who pay rents from Rs. 20 to Rs. 50. The residuum of ryots who may thus hold land in two villages is small; and it is not to the public benefit to discourage this substantial class of ryot; while even if a ryot of that class went 20 miles away from his village for fresh land, as some zemindars fear, he will still be well known to his landlord, who, after all, may refuse him the land. The Lieutenant-Governor must then support the definition of a settled ryot given by the Bill.

Objections to throwing on resident ryots onus of proving the 'settled' status.

While, however, the Lieutenant-Governor thus agrees with one part of the definition of a settled ryot, he desires to represent an objection to section 45 as it stands, in that it throws on the ryot the burden of proving 12 years' occupation. This provision will in most cases cause delay and inconvenience, and in some cases must result in injustice. It is here a misfortune that Bengal is so absolutely destitute of a record of rights. If we had such a record the position would be without difficulties. but in its absence there is much reason to fear continuous litigation to establish or disprove claims to a right of occupancy. When under the provisions of this Bill a record of rights is established, disputes will be impossible. But in the long interval before that can be accomplished, we must seek by some addition to the section to meet the difficulty, and the only way which presents itself to the Lieutenant-Governor's mind is the adoption of the principle that the fact of residence or actual occupation, which can be readily ascertained, should afford a rebutable presumption that the ryot is entitled to be classed as a settled ryot. If the presumption be unfounded, the zemindar can readily rebut it, for all the materials of proofs are in his office or *sherista*. No one can doubt that in the vast majority of cases the presumption will not be rebutable, and that the zemindars will not question it; and thus an enquiry into exceptional cases will alone be needed to secure to the country at large the peace and contentment which must attend on the well-defined *status* of the bulk of the agricultural population. On the other hand, an enquiry into the *status* of all resident cultivators will last a generation, and will lead to unrest, if not litigation, which should be avoided.

Necessity for barring freedom of contract.

Finally, the Lieutenant-Governor has no doubt whatever as to the necessity of that provision which disables the ryot from contracting himself out of the law. On this point there is a general agreement of opinion that, in view of the power of the zemindar and the ignorance and weak-

ness of the ryot, such contract should be disallowed. It must not be forgotten that the provisions on this subject contained in the Bill are in harmony with the principles of the Permanent Settlement Regulation (VIII, 1793), which, in sections 57 and 58, subjected to the Collector's supervision and approval not only the *forms* of leases, but also the *rates* of rent recoverable under them.

Objection to acquisition of occupancy right by grant.

12. With regard to section 48, the Government of India will perceive from the local reports that some officers oppose the reténtion of the section in the Bill, because, for instance, it might be made the means of depreciating the value of an estate sold for arrears of revenue. To this view by itself, the Lieutenant-Governor does not attach much importance, because the establishment of a substantial peasant proprietary should enhance, and not depreciate, the value of an estate. There are risks, however, connected with the concession of such a power, inasmuch as it might be used as a means of bargaining by zemindars with parties whom they wished to favour on receipt of valuable consideration, and of defeating the accrual of the right of occupancy of the rightful cultivator who may have been in possession for 10 or 11 years. Mr. Rivers Thompson agrees with the Hon'ble Mr. Reynolds in thinking that the occupancy right, being inherent in the *status* of the ryot, is not the landlord's to grant; and, further, that no necessity has been made out for introducing into the Bill a principle which is foreign to the law of Bengal.

Acquisition of occupancy right in khamar land.

13. The objections to section 49 are numerous, and the Lieutenant-Governor is disposed on the whole to admit their validity, the more so as he is in favour of preventing the absorption of *ryotti* into *khamar* land In the course of time, when *khamar* lands have been surveyed and registered, there will be no difficulty in maintaining the distinction between the two classes of land; and, in the Lieutenant-Governor's view, it would be advantageous to encourage the retention in the possession of zemindars of such demesne lands as they now hold. Under the existing law as interpreted by the courts, the Lieutenant-Governor understands that, if not barred by the landlord, rights of occupancy may be acquired in *khamar*; and he would not interfere with this state of things. With this view Mr. Rivers Thompson would suggest the addition of the words "or from year to year" after the words "fixed period" in the sixth line.

Incidents of occupancy rights generally.

14. Coming now to section 50, I am to say that, while no serious objections have been made to clauses *a*, *b*, *c*, *d*, and *g*, there is great and radical divergence of opinion in regard to clauses *e* and *f*. One party predicts the worst evils from the recognition of free sale and the liberty to sublet; the other says that freedom of sale is necessary to the ryot's prosperity, while freedom to sublet cannot be prevented. No attempt is made to reconcile conflicting interests; and even the British Indian Association, the leading exponent of zemindari views, forget the admission deliberately made in their letter of 20th November 1878, that with proper safeguards they had "no objection to the proposal that the transferability of the occupancy tenure, restricted to the cultivating class, should be recognized by law."

Transferability of occupancy right by sale.

There can be no doubt that the questions of free sale and subletting are intricate and difficult, and that the welfare of the ryots in these provinces is greatly dependent on a true solution of them. The key, however, to such solution is, in the Lieutenant-Governor's opinion, given by the Famine Commission when they say: "Though, on the whole, we regard the general concession of the power of sale of these rights to be expedient, and ultimately almost avoidable, the immediate course to be followed by the Government must, no doubt, be to a great extent governed by local custom. Where the custom has grown up, and the tenants are in the habit of selling or mortgaging their rights in land, it should certainly be recognized by the law; but where it has not, it may be questioned whether the law should move in advance of the feelings and wishes of the people." The question, then, which the Lieutenant-Governor has to answer is this: Has the custom of free sale of occupancy rights attained such a growth and stability throughout these provinces that it may now be safely recognized by law?

Having given the matter his most careful attention, the Lieutenant-Governor believes that the weight of argument and fact is in favour of legislation in the direction indicated by the Bill; and he accordingly would recognize the transferability of the ryot's occupancy right throughout these provinces. It may be accepted that freedom of transfer was not an incident of the *khudkhast* ryot's holding; and the Lieutenant-Governor is not unmindful of the fact that in Jhansi, in the Deccan, to some extent in the Sonthal Pergunnahs, and possibly in other parts of India, free sale has had evil results on a thriftless peasantry. If he had to deal with the question as one of mere theory, Mr. Rivers Thompson would probably not remain uninfluenced by its historical aspect, and by the dangers of vesting a population with transferable rights of property before habits of thrift among them had been fully confirmed. But the Lieutenant-Governor has here to deal with a question, not of theory, but of actual practice. It is here not a matter of "introducing a source of temporary prosperity," and encouraging an "increase of thriftlessness on the one hand, and of greed on the other," as was the case in the Deccan, but of confirming and recognizing a growing custom, to which the needs of the country have spontaneously given birth, and which has so far produced no evil results.

Statistics of sales of occupancy right.

It is true, indeed, that the Behar Landholders' Association, in the petition to Parliament which has been already noticed, assert that "in Behar there is no such custom (as sale of occupancy rights), nor is it even pretended that there is such a custom." That assertion, however, is certainly incorrect. It may, indeed, be said that if one point had been during these discussions more strongly insisted upon than another by Behar officers, it was this—that the transferability of occupancy rights was a growing custom in Behar, of which every man in the province, who

know anything of agrarian matters, was well aware. On page 370, Vol. II of the Rent Commission's Report, statistics are given showing that 410 occupancy rights, *exclusive* of 445 *guzastu* tenures, were sold in Behar courts, *in execution of decrees*, during the single year 1878-79. That fact alone, which should have been within the knowledge of the Association, sufficiently refutes the assertion made in the petition to Parliament; but in order still further to demonstrate its inaccuracy, as well as to furnish the basis for future argument in the course of this letter, the Lieutenant-Governer will quote the following statistics of private sales of occupancy rights from the Appendix to the published Report on the Registration Department in Bengal for 1881-82, which is the latest authoritative information available on the subject :—

Statement showing the number and value of Ryotti holdings transferred by registered deeds of sale in each Registration District of the Lower Provinces of the Bengal Presidency for the year 1881-82.

Districts.	Ryotti holdings at fixed rates.									Ryotti holdings with right of occupancy.

These statistics prove that not only in every district of Behar, but in every district of these provinces (except Darjeeling, where altogether exceptional conditions prevail) occupancy rights are now more or less freely sold as a matter of private agreement without objection on the landlord's part, and we know from independent evidence that many of the districts in which the custom seems most firmly established are those in which ryots are best off. It is true that about 16 per cent. of the purchasers of occupancy rights are mahajans; and this is a fact which has created misgivings as to the ultimate effect of formally recognizing the transferable character of occupancy rights. That is a danger, however, for which it is believed some provision has been made in the earlier portions of this letter, and with which I am to deal at greater length further on. Here I am to observe that it is now quite too late for landlords to object to a custom which already seems, without any opposition on their part, to have taken root in the agrarian economy of the Province.

Although, however, landlords may be out of court in their objections to the recognition of the freedom of sale of occupancy rights, this question remains—Is it desirable to give to the custom generally the formal sanction of the law, and if not generally, then to what extent? The Lieutenant-Governor has no doubt whatever that the law may recognize free sale throughout Bengal, and if he had doubts on the question as it affects Behar, those doubts would have been removed by the unanimity of impartial local opinion in favour of the proposal, and by the evidence afforded not only by the Registration statistics referred to above, but by the following figured statement of the extent to which occupancy rights in Behar were sold during the last three years in execution of decrees in the various Civil Courts :—

Sales of occupancy holdings in the districts of the Patna Division, in execution of decrees, during the years 1881, 1882, and 1883.

District.	1880.		1881.		1882.	
	Number of holdings.	Selling price.	Number of holdings.	Selling price.	Number of holdings.	Selling price.
		Rs.		Rs.		Rs.
Patna	72	9,627	71	7,667	97	14,456
Gya	92	8,076	32	1,209	57	4,875
Shahabad	696*	11,988	924*	23,933	1,174*	10,722
Sarun	247	3,610	291	3,150	460	13,565

Total	2,082	49,180	3,091	53,555	3,622	68,583

* Including *Guzastas*.

It may be added that in the Monghyr and Bhaugulpore districts, which, though not portion of the Patna Division, are usually considered portion of Behar, 91, 184, and 102 occupancy holdings were sold in each of the above years respectively.

It will thus be manifest that occupancy rights are now saleable in every district of Behar both as a matter of private agreement, and compulsorily in satisfaction of debts; but even had this not been so, it would have been difficult to justify, on one of the main principles of the Bill, any distinctive practice in two parts of the same Province. On a review of the whole question, then, the Lieutenant-Governor cannot but conclude that the balance of argument is in favour of extending to Behar the recognition of the right, which the circumstances of Bengal Proper not only justify, but demand. As observed by the British Indian Association in 1878, the recognition of the right of transfer would create a direct interest in the improvement of the soil, would stimulate cultivation, would tend to establish a substantial peasant proprietary, would give a valid security for the realization of the landlord's rent, and, by increasing the marketable value of the land, would lower the rate of interest when the ryot has to borrow. These are all advantages which cannot be lightly foregone; and Mr. Rivers Thompson therefore does not contest the wisdom of this portion of the Bill, the more so as its operation would be made the subject of watchful supervision.

Registration of sales of occupancy rights in zemindar's sherista.

While, however, the Lieutenant-Governor thinks that the right of free sale of occupancy rights may now be conceded as beneficial to all parties, and, indeed, not to be repressed, he is of the opinion that the wishes of zemindars may be so far consulted as that the notices of sale prescribed by section 51 should be presented, and successions under sections 54 and 55 of the Bill registered in their offices, and a ready means of information thereby afforded them of electing or not to exercise their right of pre-emption without the intervention of the Collector in the first instance. Section 46 of the Rent Commission's Bill provided for such registration, and Section 47 provided for the levy by the zemindar of a reasonable fee. Both these provisions commend themselves to the Lieutenant-Governor, and he would suggest that they be incorporated in the Bill before the Council. He believes it is only fair to allow zemindars to levy such a fee as will cover the costs of maintaining a registering establishment, while in matters of this kind it is of infinite advantage to encourage, as far as possible, arrangements out of court. They avoid the intervention of the ministerial officers in negotiations, thus reducing expenditure; preclude an irritating cause of harassing delays; and tend to promote more friendly relations between landlords and their tenants. It is not forgotten that doubts are expressed in paragraph 26 of the Statement of Objects and Reasons as to the possibility of bringing home to the ryot class generally the details of such a system; but there are reasons for believing that the class is conversant with this system already, and that its enforcement will be in accordance with custom. To provide for cases in which the ryot might not wish to approach the zemindar, or in which he might wish to secure proof of service of the notice, provision might be made for effecting service through the Sub-Registrar, either by the post or otherwise. The Lieutenant-Governor would prefer that such service should be effected through the Registration Department rather than through the Collector or civil courts, because that Department affords cheaper facilities to the people; and, as in the majority of cases it may be

expected there will be no dispute and no wish on the landlord's side to exercise his right of pre-emption, it seems as well that the office which will register the completed transaction should also deal with its initial stages. There is, as has been already suggested, a strong, and the Lieutenant-Governor must say reasonable, objection to unnecessary interference on the part of revenue or judicial officers in private transactions; but this objection does not hold in the case of the Registration Department, which, in all negotiations of the sort, is altogether passive. Of course the Collector will be kept informed by the Registrar of all that passes in his various rural or urban offices in connection with these provisions of the law.

Objections to allowing zemindar a *veto* on sale of occupancy right.

But while advocating registration of sales in the zemindar's *sherista*, the Lieutenant-Governor does not desire to give the zemindar a *veto* upon the transaction. It has been suggested by the Commissioner of Dacca, concurring in the opinion of the Collector of Mymensing, that "the landlord ought not to be bound to register any one as his ryot who is not a *boná fide* cultivator;" and this proposal is in accordance with the recommendations made by the British Indian Association in their letter of 20th November 1878, to which allusion has already been made. The Lieutenant-Governor would be very glad indeed if he could see his way to adopting that suggestion, but it seems to him impracticable. The object, of course, is to prevent occupancy rights passing into the hands of mahajans; but the village mahajan is very often to some extent a *boná fide* cultivator of the soil, whom, on the testimony of the British Indian Association itself, it is not always desirable to exclude; while it may be fairly presumed that most landlords would waive their power of *veto* if it were made worth their while to do so. Hence a system of fines on transfers would grow up, which would have the two-fold effect of reconciling landlords to dealings with all sorts of mahajans who could best pay them, and of depreciating the value of the occupancy title to the ryot, to whose shoulders the purchasing mahajan would in time transfer the full weight of the fine. For these reasons, then, the Lieutenant-Governor must dissent from the view that a veto on sales should be allowed to proprietors, finding no justification for it in actual experience, believing that in the pre-emption sections of the Bill the zemindars have a safeguard against the evils they fear from the exercise of the right of free sale, and being convinced that a concession on this point to the wishes of the zemindars would entirely neutralize the principle of free sale.

Necessity for registration of tenures in Bengal.

Although the Lieutenant-Governor is thus desirous of affording zemindars all reasonable facilities of keeping themselves acquainted with changes in their estates without undue official interference, he is not satisfied that the registration provisions of the Bill are all that is called for by the circumstances of these provinces. If those provisions prove effectual for the purposes of the landlords they will go no way towards supplying the Executive with what it ought to possess—adequate information regarding the division and sub-infeudation of property, and the transfers it undergoes. In Act VII (B.C.) of 1876 we have such a source of information in regard to the interests of proprietors, managers, and mortgagees, and it remains to complete the chain by the addition of links which will supply similar knowledge regarding all sorts of tenures. In a later portion of this letter the Lieutenant-Governor will propose that the patni sale procedure, or some reasonable modification of it, be applied to the recovery of arrears of rent due by tenure-holders; but to render that proposal workable it is essential that tenures of all sorts should be registered. Thus, not only for the purposes of this Bill, but for wider administrative reasons, Mr. Rivers Thompson thinks that the time has come when the registration, which has been effected of proprietors' titles, should be brought lower down. This will be best done by following, with due modifications, the procedure of Act VII (B.C.) of 1876, which was worked so successfully in regard to proprietary titles; and therefore, when sufficient progress has been made with this Bill in Committee to indicate the direction in which legislation for the registration of tenures should proceed, the Lieutenant-Governor will be prepared to introduce into the Bengal Legislative Council a Bill for the purpose. For the registration of occupancy holdings, Mr. Rivers Thompson looks forward to the creation of a competent village agency, the result of a revision of the Putwari Regulations, and of a survey and record of rights which will relieve zemindars of the duty of registration, and transfer it to responsible public officers.

Before passing on from this subject of registration and pre-emption, the Lieutenant-Governor desires to draw attention to the ambiguity which arises from the employment of the term "landlord" in those sections of the Bill. It is not, of course, the intention to give to the holder of a temporary interest, such as an ijaradar, the power of pre-emption: that privilege is reserved, as the Lieutenant-Governor understands, to the proprietor or permanent tenure-holder. But the definition of landlord in section 3 (*q*) of the Bill, and the employment of the term in sections 51, 54 and 55, is not calculated to promote that intention. Wherever the word "landlord" is used in these pre-emption clauses, the Lieutenant-Governor would suggest the substitution of "proprietor or permanent tenure-holder."

Subletting by occupancy ryots.

15. Having thus expressed his opinion in favour of the unrestricted freedom of sale of occupancy rights in Bengal and Behar, the Lieutenant-Governor proceeds to consider the question of subletting, and in regard to it he at once admits that subletting by occupancy ryots is calculated to cause difficulty and inconvenience. Mr. Rivers Thompson has, however, sought in vain through these papers for any criticisms on this question which are not merely destructive, or for any practical suggestions by which subletting may be prevented or the difficulties which it occasions obviated. From the discussions which have passed, however, one fact, which is, besides, in accordance

had some idea of the limit beyond which their landlords' demands cannot pass. The Bill gives to the landlords an effective procedure for enhancement; if it also give the ryot some assurance of the ultimate limit beyond which, under that procedure, enhancement may not pass, it will probably do good. As Sir Richard Temple said, "the liability to uncertain demands must harass the ryot, must damp his zeal for improving his land, and must make him chary of laying out capital upon it." While thus giving his adhesion to the principle of a maximum limit, Mr. Rivers Thompson, however, desires very emphatically to say that if he believed the safeguards in the Bill were insufficient to keep the provision what it is intended to be—a maximum never to be passed, and but very rarely to be reached—he would prefer to abandon the provision in the Bill.

Propriety of one-fifth limit.

As regards the propriety of the exact limit of one-fifth, Mr. Rivers Thompson admits that the question is one on which actual precision of knowledge or judgment is not possible. I am, however, to say that, after carefully considering all the information of a general and special character which has been accumulated on the point, the Lieutenant-Governor's opinion is that, for the Province as a whole, one-fifth of the gross produce allows a margin for future enhancements; while it represents as much of the crop as the ryot can part with and thrive. References to the share of the produce to which in former times the State might in theory be entitled to take as an extreme measure from the cultivators are very greatly out of place in dealing with existing facts. When population was scanty, the area of culturable land practically unlimited, and the produce large from a soil not overworked, a village or estate could well afford to give to the rent-receiver a large share of that produce. But where there is no margin of culturable land at all, and where population presses so densely on the soil that it is a marvel how life can be supported, and where agriculture has, in this struggle for existence, degenerated into a mere "spoliation of the soil," the aspect of the case is entirely changed, and references to theoretical rules of crop-distribution at some early period of time become unmeaning. This is the case throughout large portions of Bengal and nearly all Behar at the present day, and if one-third was a rack-rent 100 years ago in those localities, then one-fifth is a rack-rent there to-day. And to this conclusion Mr. Rivers Thompson has been led, not merely by such considerations as those now adverted to, supported as they are by statistical information as to the growth of population which cannot be questioned, but also by the general opinion of competent authorities that the costs of cultivation have largely increased; that, owing to the absence of all improvements in the system of agriculture, the average harvest yield is stationary where it is not growing less; and that the struggle for life among the agricultural community is, the deceptive influences of a few years of unusally good harvests notwithstanding, daily becoming more severe. It may be added in this connection that Mr. Rivers Thompson has given a practical proof of his conviction upon this point in his recent orders reducing the rental which had been assessed on the Khoordah Estate.

Objections to separate limits for occupancy and non-occupancy ryots

If the one-fifth, or 20 per cent. limit, be justifiable as regards occupancy ryots, the question remains—Is five-sixteenths or 31¼ per cent. of the produce fair as regards the non-occupancy ryot? On this point I am to suggest, for the consideration of the Council, whether the provisions of section 119 of the Bill, as far as they refer to what is there called the "ordinary" ryot, do not introduce an unconstitutional and dangerous principle into the law of Bengal. In the statement made by the Hon'ble Mr. Reynolds in his speech in Council, to the effect that it is not, and never has been, the law of Bengal that an occupancy ryot should hold at privileged rates, the Lieutenant Governor concurs; and it therefore becomes a matter for consideration whether, if the one-fifth limit be fair for ryots with occupancy rights, five-sixteenths is not unfair for ryots without them. The origin of the provision as it stands is probably due to Sir Richard Temple's effort to fix occupancy rates with reference to competition rates, by giving the occupancy ryot a beneficial deduction on such rates. But the enquiries which were made in connection with that proposal showed that competition rates hardly existed, and that custom, not competition, ruled the rents of occupancy and non-occupancy ryot alike, unless where considerations of caste intervene. Recent enquiries point to the same conclusion, and it is therefore, in the Lieutenant-Governor's opinion, a matter of doubtful expediency that a novel principle should now be introduced into the law of these Provinces, which, besides, would be calculated to lead to general enhancements of rent, which it is the avowed object of the Government to avoid. It must not be forgotten that if we call into existence two classes of occupancy ryots, one holding at higher rates than the other (and this would be the effect of sections 79, 95, and 119 of the Bill combined), the tendency will be towards an equalization of rates at the higher level. As at present advised, Mr. Rivers Thompson thinks that this is a danger which we should not run the risk of incurring, and that if a rack-rent limit is to be preserved in the Bill at all, it should be the same for both occupancy and non-occupancy ryots. He has no objection to five-sixteenths of the produce in the case of under-tenants (khurfas) who can never acquire occupancy rights; but he thinks that there is great danger to the cultivating classes in the provision of a separate limit for occupancy and non-occupancy ryots. Separate limits are tantamount to a premium on the discouragement of fixity of tenure.

I am, therefore, to say that the Lieutenant-Governor is not prepared to support those provisions of the Bill which recognize a difference between the maximum limit on the occupancy and non-occupancy rents. The longer Mr. Rivers Thompson considers this point, the more satisfied is he that these provisions are likely to cause serious injury to the best interests of the peasanty of these Provinces; while the retention of them in the Bill impedes the reasonable settlement of the question before the Council. If the maximum or rack-rent limit on

"An interval to be then allowed during which the landlord shall endeavour to adjust the rents of the individual ryots amicably with the help of the Table of Rates or the Table of prices framed as above;

"If he succeeds with few exceptions he may take the exceptional cases into court and the Revenue officers will hear no more of the matter;

"If his attempt on the whole is a failure, let the landlord apply for a field-by-field survey and assessment of rent by the Revenue officers;

"The cost in all cases to be distributed between the landlord and tenants, or thrown entirely on one of the two parties, at the discretion of the Revenue officers."

Such a procedure should, however, be applicable only when the Local Government thinks it undesirable to direct a settlement of rents or record of rights, and it should be liable at any time to be replaced by action under chapter XI or chapter XII.

Proposal to restrict thikadars' right to enhance.

20. Proceeding now to offer some remarks on Part C, Chapter VI of the Bill, I am in the first place to call attention to the objections which the Commissioner of Patna urges against the exclusion from the Bill of restrictions on the powers of thikadars to enhance rents. The Lieutenant-Governor agrees with the Commissioner in thinking that the abuse of the thikadari system has been the most efficient cause of rack-renting in Behar, and he thinks the repression of that abuse is essential to the prosperity of the Province. In Mr. Rivers Thompson's opinion, however, adequate guarantees against any improper exercise of farmers' powers will be found in the provisions for the survey and record of rights, and the Lieutenant-Governor prefers therefore to trust to that radical remedy rather than have recourse to any such expedient as the imposition of disabilities on a particular class.

Grounds for enhancing settled ryots' rent.

Section 74 reproduces with emendations the enhancement provisions of the existing rent-law, and enables the landlord to enhance on three grounds—(1) that the ryot's rent is exceptionally low; (2) that the productive powers of his holding have increased otherwise than at the ryot's *sole* expense or agency; (3) that prices have risen for reasons other than any brought about by the ryot's *sole* agency. To the first ground no objection is offered; but it would, in Mr. Rivers Thompson's opinion, be well that the second and the third grounds should be so worded as to make it clear that improvements in produce and prices, due to *combined* action among ryots, will no more justify increase of rent than improvements due to the action of a single ryot. The latter is a very rare cause of improvement, while the former—the construction or improvement of a village channel, an embankment, or a road may furnish an illustration—is not uncommon in parts of the country.

In regard to section 75, the Lieutenant-Governor observes that the rule of proportion is no longer made the measure of enhancement in all cases. This is a very great concession to zemindars, and if it operates in inducing them to spend money on improvements, the results may justify the concession.

With reference to clause (*d*) of this section, Mr. Rivers Thompson thinks it convenient to consider here the prudence of introducing into the Bill any limit on enhancements, and if a limit be desirable, the propriety of fixing on one-fifth for occupancy and five-sixteenths for non-occupancy ryots.

Propriety of imposing *maxima* limits on rents, and recognizing separate limits for occupancy and non-occupancy ryots, examined. General considerations.

In the first place, then, it must be said, or rather repeated, that the idea of regulating rents by a fixed proportion of the produce is not of recent growth in this country. It is of immemorial antiquity. Much obscurity exists as to what the State share of the produce was, but it seems sufficiently probable that the share, or rather its money commutation (*rebba*), taken by the Mogul Government was one-fourth, and this fourth share is pointed to as the prototype of the existing proposals on the subject. In the earlier stages of this discussion the zemindars of East Bengal, despairing of obtaining enhance, ments under the law, proposed that one-fifth of the produce should be allowed as rent; and the British Indian Association, improving on this proposal, suggested one-fourth. But that one-fourth was a high proportion even in the opinion of that Association is manifest from the *quasi*-official admission made by their representative organ that "if a higher rate or share (than one-fourth) be fixed for the landlord, it will trench on the very means of subsistence of the ryot." And again, "one-fourth would be too high for many parts of the eastern districts." It is beyond question, however, that the circumstances of districts in different parts of the province admit of considerable variation in this particular.

From the preceding it will be apparent that the idea of regulating the rack-rent at the present time by assigning a *maximum* portion of the produce to the landlord has been approved by the zemindars; but Mr. Rivers Thompson is free to confess that he does not look on the proposals, hedged round even as they are in the Bill, with unmixed satisfaction. As one officer puts it, "no rational rent scheme can be based on a fractional share of the gross produce;" and even if the *net* produce were taken instead of the gross, it would still be very difficult to hit on a *maximum* limit which would not be unequal in its incidence over a Province so diversified as Bengal. Another source of disquiet on this subject is the fear that the existence in the Bill of *maxima* limits may unduly stimulate that tendency to a rise in rents, which exists in every progressive community, and that efforts will be made by landlords to convert the *maximum* limit of the Bill into the ordinary measure of rents in practice. "Once," says the Behar Landholders' Association, "let Government fix a maximum rate, and no zemindar will rest until he has run up his rents to the prescribed limit."

All this said however, it must be admitted that there are large portions of these Provinces in which a maximum limit on rent cannot fail to be of advantage. Those portions are so heavily rented that it would be a source of peace and contentment to the cultivators. If they

rights, to insist on a rent which would render the position valueless. It is to be remembered that a non-occupancy ryot, on acquiring occupancy rights, is, under section 79, not competent to sue for an abatement of his rent.

Penalty on refusal to let ryotti land.

Finally it would be necessary to adopt some stronger precaution than the wording of the section presents against recusance on the part of zemindars to let out *ryotti* land of which they may become possessed; and from this point of view it might be unobjectionably enacted by way of penalty that if such land were not let to tenants under the Bill within a year from its coming into the zemindar's possession, any ryot should be authorized to demand that it be let to him. When let under these circumstances, the mere possession should invest the tenant with an occupancy right. As it stands, the section is incomplete.

Terms of holding to remain unaltered till changed in due course.

17. *Chapter VI.*—The Indigo Planter's Association strongly object to section 58 as drafted. They say that under the section as it stands it would be open to a ryot to repudiate every condition under which he held his lands at a low money rate of rent, while continuing to sit at the low rate alone. An instance from actual practice is given of an agreement made with a ryot, by which in consideration of his devoting a certain moderate quantity of land to growing indigo, the rent of his holding was greatly reduced; and it is contended that as the section stands it would be competent to the ryot to repudiate the agreement while holding at the reduced rent. Similar objections have been made from other quarters, and the Lieutenant-Governor thinks that they are reasonable. He therefore would suggest an amendment to the effect that not only the money rent, but the conditions of the holding, should remain unaltered till varied in due course.

Official supervision of enhancement of rent by private agreement.

18. Section 59, clause (2) has met with much opposition as being in the nature of "officious legislation;" but in the Lieutenant-Governor's opinion the section is based on a right principle, and is likely to prove advantageous in practice. According to the old customary law of Bengal, it was the function of the ruling power to determine what rent the ryot was to pay; and when sanctioning the Permanent Settlement, the Court of Directors expressly reserved "the right which belongs to us as sovereigns of interposing our authority in making from time to time all such regulations as may be necessary to prevent the ryots from being improperly disturbed in their possessions, or loaded with unwarrantable exactions." * The Lieutenant-Governor does not deny that the Settlement Regulation empowered zemindars to make agreements with their ryots, but it cannot be denied that all such agreements were both as to form and substance subjected by the same Regulation to official control. This control, partially relaxed by legislation, has been, in the course of time, completely ignored, until in parts of the country the ryot's capacity to pay has become the limit of the landlord's exaction. The provision under notice seeks only to re-establish a limit so that the ryots may not be "loaded with unwarrantable exactions," and it is therefore in harmony with the letter and spirit of the Permanent Settlement. Another objection to this provision is that the limit being less than that up to which enhancement might be had in suit, the tendency will be to drive people into court rather than abide by the section. It is obvious, however, that the limit affords ample scope for fair contracts in the great majority of conceivable cases. An enhancement of six annas in the rupee of rent is rarely possible now in any of the settled districts, except in the case of alluvial lands or revision of temporary settlements concluded long ago. Zemindars are only interested in the former, and for them further provisions will be suggested in paragraph 21 below.

* Despatch from Court of Directors, dated 19th September 1792

Tables of rates.

19. The subject of the preparation of tables of rates is one to which the Government of India, on first considering this measure, attached great importance. The Lieutenant-Governor regrets, however, that he does not see much prospect of any practical results of great value coming from this part of the Bill. The general opinion is that the proposals, though good in theory, are unworkable, and that no such uniformity in rates exists anywhere in Bengal as would be needed for the basis of such a table. This view borrows considerable support from the special investigations which were made on this subject last year; and from the papers appended to Mr. Dampier's Minute of 25th June 1883, copy of which has been already submitted to the Government of India. Still Mr. Finucane's enquiries in Jessore, the success which has attended broad classifications of soil in Khoordah, and certain other information of a similar character from various portions of the country, point to the conclusion that if the provisions of Chapter VIB cannot be of general application, they may be found useful in special tracts. The Lieutenent-Governor would, then, retain those provisions with some modifications of detail, and these modifications might take with advantage the direction indicated by Mr. Dampier in his Minute above referred to, copy of which has already been submitted to the Government of India. The modifications to which the Lieutenant-Governor gives a provisional adherence are these—

"The Lieutenant-Governor, whenever such a course may seem necessary owing to existing rent disputes, to have authority to order the Revenue officers to enter upon any tract for the purpose of holding such enquiries;

"The Revenue officers to proceed to ascertain whether the circumstances of the tract are such that the preparation of a general Table of Rates is possible; and, if so, to prepare such a Table, or more than one Table if necessary;

"If the preparation of a general Table of Rates be not practicable, the Revenue officers to draw up Tables of prices of different kinds of staple produce, to be authoritatively declared as the average of prices which ruled during different specified periods, and which rule at the time being: these Tables when approved by the Local Government to be binding on the Civil Courts for the purposes of the Act;

with the Lieutenant-Governor's previous ideas, comes out in strong relief, namely, that subletting cannot be prevented either in Bengal or in Behar. We may declare it illegal and refuse its recognition in our courts, but we only thereby increase the evils of a system which, if it did not subserve some useful purpose, would not possess the vitality which it exhibits.

Subletting by occupancy ryots is undoubtedly an established custom—which has its uses, and which cannot be stopped. The question then arises—What are its abuses, and how can they be removed? The abuses of the system are summed up in paragraph 41 of the Statement of Objects and Reasons: "The power of transferring and subletting which the Bill recognizes may, in course of time, lead to a state of things in which the great bulk of the actual cultivators would be, not occupancy ryots, but under-ryots with but little protection from the law." If these fears are ever to be realized, it will not, in the Lieutenant-Governor's opinion, be from the recognition of the custom of subletting, which is nothing new, but from the accumulation of occupancy rights in the hands of rack-renting non-agriculturists through the operation of free sale. The prevention of evil from subletting therefore depends on the probability that mahajans and non-agriculturists will not invest their money in buying occupancy rights, or, if they do, on our success in limiting their power of rack-renting under-tenants.

Prevention of rack-renting by mahajans who purchase occupancy rights.

Now, from the statistics exhibited in paragraph 14 above, there is reason to anticipate that mahajans will invest their money in the purchase of occupancy rights; and the question how to prevent the evils contemplated as possible under such circumstances in the Statement of Objects and Reasons, demands consideration. In the Lieutenant-Governor's opinion an effective way to prevent these evils is by converting all purchasers of occupancy rights, who are not *bonâ-fide* cultivators, into tenure-holders, under whom the actual cultivator will have the protection afforded by the *status* of a ryot; and this was one of the reasons which induced Mr. Rivers Thompson to propose the definitions of "tenure" and "ryot" given in paragraph 6 above. The other check upon the purchase of occupancy-rights by mahajans follows from the proposals which I am to submit under the next chapter, regarding the rack-rent limits to be imposed on ryots' rents, and the checks on exorbitant enhancements.

Objection to the provisions of the Bill attaching the occupancy right to a holding bought in by the landlord.

16. The last section in this chapter which seems to call for notice is section 56. This section has met with much opposition from zemindars, and has also been condemned by other competent critics of the Bill. After carefully considering the question, the Lieutenant-Governor must say that the section as drafted seems to him to be too drastic. Had the occupancy right been made adherent to the soil only of such holdings as the landlord had acquired otherwise than by purchase, the section would not be so objectionable as many people now think it; but even then, it would, in Mr. Rivers Thompson's opinion, be based on an unconstitutional principle. The constitutional principle is that *ryotti* land cannot, under any circumstances, be converted into *khamar*, and that when *ryotti* land comes into the landlord's possession, he should be under an obligation to let it out at the current rates of rent. The Lieutenant-Governor desires to preserve this principle in its integrity and to enforce it; and he therefore must express his dissent from the opinion (which is, however, more suggested than definitely stated in paragraph 42 of the Statement of Objects and Reasons), that a landlord may, for an indefinite period, keep such *ryotti* lands in his own hands and cultivate them through his servants or by means of hired labour. He holds to the view that a landlord should be bound to let out such land to ryots for cultivation. It might be that even as the Bill stands the zemindar would in course of time be able to recoup himself for the expenditure incurred in the exercise of his right of pre-emption by imposing a fine upon the in-coming tenant; and the matter would thus right itself. Still the Lieutenant-Governor agrees in thinking that the attachment of the right of occupancy to the soil, as in section 56 of the Bill, is founded on a wrong principle. The occupancy right is the attribute of the settled ryot, and it should not in this case be made adherent to the soil. Neither is it really necessary for the purpose in hand that it should be so, for, if the *ryotti* land acquired by the zemindar be let to a settled ryot of the village or estate, that ryot will hold it on an occupancy title at a fair rent. If it be not let to a settled ryot, but to a non-occupancy ryot, but few years should elapse before an occupancy title will accrue to him, if he be well-behaved and industrious. The Lieutenant-Governor would, therefore, modify section 56, and while insisting on the landlords letting out to ryots all *ryotti* lands of which they may become possessed by purchase or lapse of any sort, he would allow the other provisions of the Bill free play, believing that they will operate in the direction contemplated by section 56. This suggestion, however, pre-supposes, as an essential condition, that the proposal I am to make in paragraph 20 below, regarding the equalization of the *maxima* rents demandable from occupancy and non-occupancy ryots, be adopted. If a difference in the rack-rent limits for occupancy and non-occupancy rents be recognized, and the practically wide field for enhancing the latter, now allowed by section 119, be preserved in the Bill, then the Lieutenant-Governor will feel constrained to support a modification of section 56, only on the basis of compensation for disturbance on the principle stated in paragraph 24 below. When the law recognizes no difference between the limits up to which occupancy and non-occupancy rates can be enhanced, zemindars can have no great motive in opposing the accrual of occupancy rights; but when such a difference exists, as section 119 of this Bill contemplates, or the absence of any rack-rent limit would import, then there is a most powerful incentive supplied to zemindars to defeat the growth of fixity of tenure. Looking to the past history of this question, no one can doubt that zemindars would act upon that incentive. It would be always in the power of a zemindar to eject the ryot in, say, the 11th year of his tenancy; or, if he admitted him to occupancy

occupancy and non-occupancy rates alike be fixed at the same proportion of the produce, then, in the Lieutenant-Governor's opinion, it would be possible to dispense altogether with compensation for disturbance, which is only useful as a check upon the abuse of the landlord's power to eject. If a landlord can only obtain from a non-occupancy tenant under the law a rent not greatly exceeding what he can get from the settled ryot, he probably will not care to eject the former, and thus checks upon his power of ejectment will be less needed. If, however, the motive for ejectment supplied by the Bill as it stands be not removed, and the same limit be not imposed on the enhancement of the rents of occupancy and non-occupancy ryots alike, then some provision must be made for compensation for disturbance as a precaution against an abuse of the right to eject. To this point I am to return further on.

Check on rack-renting deducible from equalisation of maxima limits on ryot's rents.

I am here also to draw attention to the second check on rack-renting by mahajans to which allusion was made in paragraph 15 above. As long as it is in the power of a tenure-holder to exact up to 31¼ per cent. of the produce, so long will a wide field for rack-renting be provided, and the growth of occupancy rights at fair rents suppressed. But if the rack-rent limit be reduced to a reasonable limit within which a fair rent may be fixed, then remunerative cultivation by non-occupancy ryots will be possible, and the growth of occupancy rights among that class not discouraged. The discouragement will be to those who buy occupancy rights, not for the purposes of cultivation, but for subletting. They will be deterred from such investments by the fact that they cannot recover from their tenants much, if anything, more than they themselves will have to pay their landlords. In any case their tenants will be allowed a margin to live on and a fixed *status*. All this would be impossible if separate limits be preserved in the Bill. The occupancy right would then be valueless, for it would carry with it no right to enjoy any margin of profit.

Objection to subjecting accreting dearah lands to checks on enhancements.

21. Passing on to other portions of the Bill, the Lieutenant-Governor would suggest that, from the provisions of sections 76 and 78, the case of *dearah* or alluvial lands, and new reclamations, be excepted. These lands are quite exceptional in character, and need special treatment. They may be worthless this year, and most productive the next. According to custom in various parts of the country, alluvial lands are rented at merely nominal rates on formation (though they are then usually unproductive sand) in order that the ryot may establish some claim to hold them when the soil has fully formed. The full formation may be brought about by a rich deposit in a single season. It would be very hard, then, on a landlord, if he were precluded from doing more than doubling a nominal rent for such land within ten years. In the interests of landlords generally, therefore, and having full regard to what is due to ryots, the Lieutenant-Governor would suggest that partially formed alluvial accretions and new reclamations be excepted from the effect of these sections. For accretions or reclamations which are fully formed and ordinarily productive, there is no need to provide exceptional treatment.

22. To Part E of this chapter the Lieutenant-Governor has no objection, fully agreeing as he does in the policy of facilitating the conversion of corn rent into money rents. Exception has been taken to these provisions as one-sided, and it is claimed that the faculty of suing for commutation should be vested in the landlord, as well as in the tenant. Impressed with the economical disadvantages of the general prevalence throughout a district of the *baoli* system, the Lieutenant-Governor would be glad to see a system of money rents take its place, and he would make no objection to affording to both parties—to the landlord, as well as to the tenant—the facilities which the Bill now allows to the ryot alone.

CHAPTER VII.

Occupancy rights in *bastu* lands.

23. The principle which underlies this chapter seems to the Lieutenant-Governor to be that the right of a settled ryot in the homestead portion of his holding is separate from, and independent of, his right in the arable lands which he rents. Wherever the facts are as supposed, wherever the *bastu* holding is distinct from the arable holding, no objection can be taken to the section. But there are, it is understood, portions of the country where this custom does not prevail, and where the *bastu* even bears no rent, being given as a matter of course with the arable land, and therefore not separable from it. In these parts the principle of the section might, if enforced, lead to difficulties. The Lieutenant-Governor would therefore follow local custom. Where *bastu* lands are separate from the *jotes*, he would apply the section. To the cases where *bastu* lands are not separable from the *jotes*, he would not make the ryot's interest in *bastu* longer or more short-lived than in *ryoti* land. The general principles of the Bill would, of course, be applicable to both classes of land without distinction.

CHAPTER VIII.

Privileges of non-occupancy ryots.

24. As might be expected, this chapter has met with extreme opposition from zamindars, while the revenue and judicial officers who have been consulted on it seem to be divided into hostile camps. Those whose service has been mostly in Bengal Proper are against its proposals as being an innovation of an unnecessary character, while the Behar officers would accept them, provided freedom of contract between the landlord and the non-occupancy ryot be not barred. As the chapter stands, the non-occupancy ryot can only be ejected (1) for arrears of rent,

(2) for violation of the conditions expressed or implied of the lease, (3) for refusal to pay enhanced rents; and if ejected on any of these grounds, he is declared entitled to compensation for disturbance, as well as for improvements. The Behar executive officers, as the Lieutenant-Governor understands their proposals, would not limit in any way the landlord's power to eject, but in return for this freedom would give the tenant, if ejected, compensation for disturbance. They say nothing of compensation for improvements, though it appears from the earlier papers that the Behar Committee, under Mr. Halliday's presidency, were on the whole in favour of the proposition.

Objection taken to the use of the term 'ordinary' ryot.

In commenting on this chapter the Lieutenant-Governor must, in the first place, take exception to the term "ordinary," as applied to the non-occupancy ryot. All the information before this Government goes to prove that the occupancy status in these provinces is (if facts were duly recorded) the rule, while the non-occupancy status is the exception. If the term "ordinary" ryot is to be maintained, it would be more in accordance with facts to apply it to the occupancy ryot than to preserve the meaning it now has in the Bill. It would, however, be better to substitute for "ordinary" the term "non-occupancy," or "non-settled."

Compensation for improvement.

Coming now to the criticisms on the chapter, the Lieutenant-Governor conceives, in regard to compensation for improvements, that, notwithstanding all that has been said to the contrary, no reasonable dissent can be maintained from the proposition that it is desirable to give security for the invested capital of the tenant, no matter what that tenant's *status* may be. The history of the rent-question all the world over teaches this lesson, that want of such security has been a hindrance and a bar to good husbandry, and therefore politically inexpedient. It seems to Mr. Rivers Thompson that if an ordinary tenant improves his holding by sinking capital in it, he is as much entitled to compensation as if he had lent his money to the landlord on a promissory note payable on the determination of his tenancy. It is no valid objection to say, with the British Indian Association, that in this country ordinary tenants never do improve their holdings, and that the compensatory provisions of the law are therefore unnecessary. The fact may be as the Association asserts, and it is possible that for a long time no practical results will follow the adoption of the provision in question. At the same time experience proves that agricultural improvement is a plant which flourishes only in the soil of security, and it is useless to argue that because it has not flourished while insecurity prevailed, therefore it will not take root when security becomes the rule. The Lieutenant-Governor has in a previous communication informed the Government of India of the extreme importance he attaches to stimulating agricultural improvement. No means in his judgment could be more legitimate than that afforded by this provision of the Bill, which, besides, has already found a place on the Indian Statute Book in section 44 of the North-Western Provinces Rent Act (XVIII of 1873). It is unreasonable to expect a ryot to improve his holding if you do not secure to him some fruits of his capital and industry.

Compensation for disturbance.

But it is asserted if compensation for improvements to the non-occupancy ryot be in accordance with good policy and natural justice, the same cannot be maintained of compensation for disturbance. On this important question the Lieutenant-Governor must, in the first place, refer to what has been already said in paragraph 20 above on the unwisdom of legally establishing different limits on rent rates payable by settled and unsettled ryots. His belief is that the limits for both should be the same; and if his belief be accepted by the Council, he thinks that it is unnecessary to impose a check on the abuse of the landlord's power to enhance non-occupancy rents by any such provision as this of compensation for disturbance. But if on this point the Council disagree with him, and decide on preserving a limit for non-occupancy rates in excess of settled ryots' rates, then Mr. Rivers Thompson thinks that the incentive which would be thereby furnished to landlords to rack-rent and defeat the growth of tenant right should certainly be subjected to a positive check. As to what the character of the check should be, the Lieutenant-Governor's judgment is in the nature of a compromise between divergent views. He does not, on the one hand, accept as just and fair to the landlord the provisions of the Bill which entitle all non-occupancy ryots, if ejected, to compensation for disturbance; nor, on the other hand, can he approve the position that a landlord is to be absolutely free to eject with impunity a ryot, say, in the 11th year of his tenancy, who is industrious and law-abiding, and willing to conform to his landlord's reasonable demands.

Argument of identity in status of the non-occupancy of to-day and the paikhast of the times of the Permanent Settlement examined.

The uncompromising opponents of the provision in question appeal to the customary law of the country at the time of the Permanent Settlement, and to the *status* of the *pai kast* ryot at that time, in proof of their contention that the non-occupancy ryot of to-day should have no privileges beyond those which his contract with the landlord may secure to him. On this I am to say that it seems, as from the beginning it always has seemed, to the Lieutenant-Governor, that too much stress is laid throughout these discussions on arguments of an antiquarian character, and too little stress on what is politically expedient in the circumstances of the present time. Mr. Rivers Thompson believes it to be true (though it may not be universally admitted) that the *paikhast* ryot of the last century was only a "tenant-at-will," but the fact of competition then being among zemindars for ryots, and not among ryots for lands, rendered the *paikhast* ryot's condition better in many respects than the condition of a modern "tenant-at-will." In fact, if *quoad* the "tenant-at-will" the modern landlord be master of the situation, the *paikhast* ryot was usually its master

quoad the zemindar of 1793. It therefore seems to the Lieutenant-Governor that appeals to the status of the *paikhast* ryot of a century ago are calculated to throw but little light on what treatment should be accorded to the non-settled ryot of to-day. There are differences on essential points, not the least important, being that, while the paikhast ryot of the Regulations held at low rates, the non-settled or non-occupancy ryot of to-day enjoys no such privilege, but usually pays as much as occupancy ryots do.

From one point of view, however, the zemindar of a century ago may be, without any risk of dispute, said to have had the power of ejecting the *paikhast* ryot, because he had only to ask occupancy rates to assure the ryot's throwing up his holding. So far there is no doubt about the *paikhast's* holding being more precarious than the permanent cultivator's. As Mr. Colebrooke says, "the inconvenience of remote cultivation makes it necessary that he (the *paikhast*) should be at liberty to relinquish at any time the land which he uses; and consequently his own continuance being precarious, he cannot have a title of occupancy which shall preclude the landlord from transferring the farm to a resident husbandman desirous of undertaking it." If, however, the *paikhast* agreed to pay up to the pergunnah rate, which was all that could be demanded from the resident husbandman, it is very doubtful if the zemindar had the power to eject him; for in the discussions which preceded the enactment of Regulation I of 1793, the Governor-General authoritatively wrote: "Whoever cultivates the land, the zemindar can receive no more than the established rent, which in most places is fully equal to what the cultivators can afford to pay. To permit him to dispossess one cultivator for the sole purpose of giving the land to another would be vesting him with the power to commit a wanton act of oppression." (Appendix to Fifth Report.) The truth, however, is that in these days the thoughts of zemindars were directed to installing ryots, not to ejecting them. Ejectment in its present acceptation is a modern growth, and in every advancing society it is being placed under restrictions.

Notwithstanding all this, however, it canont be denied that there has grown up a custom which our courts have recognized, under which zemindars exercise the right to eject non-occupancy ryots for other reasons than non-payment of rent; and that custom, though it now calls, in the general interest, for some modification, cannot, in the Lieutenant-Governor's opinion, be abrogated. If there be little force in the argument that the provisions of the chapter are unnecessary because the ryots to be legislated for are few, there is, in Mr. Rivers Thompson's opinion, much force in the contention that the proposals as they stand are objectionable because they deprive the landlord of discretion as to who shall become a settled ryot in his estate, and because they virtually fine him for exercising that statutory power with which other provisions of the Bill invest him.

Lieutenant-Governor's proposals in regard to compensation for disturbance.

It seems to the Lieutenant-Governor that the circumstances of the case call for a compromise between the claims of the zemindars to eject an unsettled ryot at discretion, and the provisions of the Bill which give the ryot compensation no matter for what reason ejected. That compromise might, Mr. Rivers Thompson thinks, fairly take this form (always supposing that his earnest suggestion to equalize the limits of occupancy and non-occupancy rates be not accepted by the Council). As a landlord cannot eject a non-occupancy ryot except in execution of decree, let the Court in ejectment suits have jurisdiction to fix a fair rent, at which it shall be optional with the landlord to let the ryot sit or not. If the landlord consents to the ryot's sitting at that rent, and the ryot agree, no difficulty arises. If the landlord abides by the Court's orders, but the ryot demurs, let the ryot be ejected without compensation. If the landlord refuses to let the willing ryot sit at the rent declared fair by the Court, being within the maximum limit, then make the landlord pay the ryot compensation for disturbance. The landlord will thus retain the ultimate right of ejecting the ryot, and this is all he needs in order to get rid of a ryot for other reason than refusal to pay an enhanced rent.

CHAPTER IX.

Form of receipts for rent.

25. Sections 96 to 99 inclusive call for no remarks. In regard to section 100, it is pointed out that the form of receipt will not apply to some of the eastern deltaic districts, where the area of the holding varies from year to year with the price of produce or other causes, and where it is impossible therefore to define that area in any except the receipt which forms the acquittance for the year's demand. The adjustment of the terms of the receipt to such exceptional circumstances is a matter for arrangement, and the Lieutenant-Governor would retain for the Local Government a power to fix the form of the receipt, as circumstances may dictate, while preserving the substance.

Several critics of the Bill, among others the British Indian Association, draw attention to the provisions of section 101, and declare that they are innovations, the zamindar being "on no earthly ground bound to give" the statement in question. They would therefore omit section 101; or, if it be retained, they would make the ryot pay for the statement of account which it prescribes. The Lieutenant-Governor would, however, point out that, so far from being an unreasonable innovation, the provisions in question were, for 80 years after the Permanent Settlement, the law of the land. "Receipts for all sums received, and a receipt in full on the discharge of every oligation," were prescribed by section 63, Regulation VIII of 1793; and it was only when that section was repealed by Act XVI of

1874 that the provisions ceased to have binding force, though doubtless zamindars had ignored them. The Lieutenant-Governer considers the provisions salutary, and to the revival of them he gives his support. They will introduce no change into the existing practice in a large portion of these provinces where acquittances in full (*farkhattis* in the vernacular) are always given at the end of the year when accounts are cleared up.

Deposits of rent in court.

26. Coming now to the section regarding deposits of rent, I am to state that considerable opposition has been exhibited both by zamindars and Government officers to the provision of section 103 (*a*), which makes the ryot's *belief* that his rent will not be accepted on tender by the landlord a sufficient reason for depositing it in court. The opposition on this point is perhaps to some extent a matter of sentiment, but it is also, in the Lieutenant-Governor's opinion, not without reason, for the withdrawal of deposits from civil courts is attended with delay and some expense, while the freedom which the section would confer on the ryot tends unnecessarily to alienate him from the zamindar. Mr. Rivers Thompson is aware of what has been written on the subject from the opposite point of view—among others by the Hon'ble Mr. Reynolds in his memorandum of 18th May 1881— ; and he observes that in the Statement of Objects and Reasons it is re-asserted that the present declaration of previous tender has become a mere form. This is, probably, in a measure, true; but it certainly is not universally true; and the Lieutenant-Governor is therefore disposed to defer to the opinions of those experienced officers who deprecate the adoption of the section as it stands. He would accordingly be glad if means could be adopted which would discourage deposit without previous tender, while still preserving to the ryot the faculty provided by the section. This means might, Mr. Rivers Thompson thinks, be found in an adjustment of stamp duties to the requirements of the case. Deposits after tender might, as at present, be made on a stamp of the value of eight annas, but deposit *without* tender under the provisions of section 103 (*a*) might be made chargeable with a higher stamp duty. It will be remembered that under the practice current before Act X of 1859, deposits of rent in court were chargeable with stamp duty, as in suits for arrears. The suggestion thus made is no doubt open to obvious objections; but so is the section as it stands in the Bill, and the question is therefore a choice of evils. As no very widespread, though undoubtedly some, hardships have arisen from the existing law, in which tender before deposit is essential, it seems to the Lieutenant-Governor that any extension in the ryot's favour of existing privileges should not be made unnecessarily at the landlord's expense, and should carry with them deterrent incidents to prevent abuse.

Finally there is no reason apparent to the Lieutenant-Governor why the existing jurisdiction of the civil courts in regard to deposits should not be retained. The discretion conferred by sections 104 and 106 on the officer empowered to receive deposits can be exercised as effectually by a rent-suit moonsif as by a revenue officer; and as the civil courts will continue to exercise jurisdiction in rent suits under the Bill, there is a distinct inconvenience in establishing a dual jurisdiction in connection with the receipt and ackowledgment of rent arrears.

Rents in kind; objection to filing danabundi papers in court in all cases.

27. On part F of chapter IX the Lieutenant-Governor will only remark that it should be made clear, under section 117, that under the system called *agore-batai* the landlord has a right to watch the crop up to the division, and that the ryot cannot remove the crop till division has been made. Under section 118, also, Mr. Rivers Thompson does not, with the majority of Behar offices, see what good is to come from filing the *danabundi* papers in Collectors' officers in all cases. When the system of village agency is organized in accordance with the plan indicated in my No. 309T—R, dated 1st June 1883, the patwari and canoongoe will be the proper custodians of such papers. But until that agency is established the Lieutenant-Governor thinks that it would suffice if in disputed cases alone the *danabundi* papers should be deposited in the collectorates. To deposit them in undisputed cases would be to crowd the record-rooms with a mass of useless papers.

Application of the Bill to proprietary estates under khas management. British India Association's objection to Bill as not applicable to Government estates examined.

28. With reference to section 121, the question arises whether that section, taken with section 20, covers the case of an estate managed by the revenue authorities on account of the recusancy of the proprietors. Fair rents are, as section 121 stands, to be fixed "on the application of the landlord or of the tenant." When the State receives the rents, allowing the proprietor malikhana will it be deemed the landlord for the purposes of the section? The answer should, in Mr. Rivers Thompson's opinion, be in the affirmative, and made clear in the Bill.

In connection with this subject, the Lieutenant-Governor will notice a remark made by the British Indian Association, "that nothing would create greater confidence in the minds of the people in the justness of an Act defining the rights and obligations of landlords and tenants, than the fact that it applies equally to Government in its capacity of landlord as to private landlords" Concurring in the justice of that remark, Mr. Rivers Thompson desires to emphasize the fact, that the rights and privileges which the Bill proposes to recognize in regard to ryots generally, will, practically, be as largely enjoyed by the ryots in Government estates, as by those in estates which are permanently settled. Fixity of tenure, fair rents, and free sale, will, the Lieutenant-Governor trusts and believes, within a short period of time prevail throughout all Government estates where these advantages do not now exist. If we turn from ryots to landlords, the Lieutenant-Governor would say that the only privilege which Government retains, over and above those conferred by the Bill on zamindars, is the privilege

of the certificate procedure; and the reason why Government may fairly reserve this privilege is obvious. The certificate procedure in the hands of public officers should be safe from abuse, for there is no direct incentive to abuse it, and its exercise is subject to watchful official supervision. That is one, and in itself a sufficient reason, why a procedure for collecting rents may be given to the Government which cannot be safely entrusted to private individuals. But there is, besides, the paramount reason that the rents collected by Government are really revenue, and the procedure for enforcing payment of State dues must, in the general public interests, be more summary than the procedure for enforcing private dues. If this were not so, the ultimate result would be the employment of larger establishments, greater expenditure, and increased taxation. Thus a summary procedure for collecting the public revenue, while necessary if the government of the country is to be efficiently administered, and while not open to the objections to which a summary procedure for collecting private debts is exposed, is in the long run the easiest and cheapest for the people. Nor is this principle inapplicable in case of estates of disqualified proprietors managed by Government, for the rents of such estates include the revenue.

CHAPTER X.

Improvements on ryot's holdings. Measurement of lakhiraj lands within an estate.

29. The provisions of part A of this chapter have the Lieutenant-Governor's general approval; but he thinks that sections 127 and 128 might more explicitly declare that where the improvement to be effected does not lie within the holdings to be benefited (as in the case of an embankment), the ryots should still have the option of effecting it. Where an improvement affects more than one holding, the landlord should serve notices on all the ryots, and ryots collectively might serve notices on their landlord. Perhaps, as under the General Clauses Act, the singular includes the plural, the use of the word ryot may be taken to mean all ryots affected; but it might prevent mistakes if the point were made quite clear.

In regard to Part B of this Chapter, dealing with the landlord's right to measure land within the limits of his estate, the Lieutenant-Governor has some doubt whether the section, as drafted, expresses the intention of the draftsman as stated in paragraph 92 of the Statement of Objects and Reasons. As the section of the Bill stands, it is questionable whether a land lord can measure a *rent-free* holding forming part of his revenue-paying estate. Under the existing law the landlord is precluded from measuring such a holding, because he is not in receipt of rent from it; this it is proposed in the Statement of Objects and Reasons to alter, but the alteration does not appear in the Bill. The Lieutenant-Governor must confess that he does not view the proposed change in the law without some misgivings; but if the law is to be altered, he would provide against the abuse of the power of measurement, and against the possible creation of disunion between the rent-free holder and his tenants, by insisting on the landlord contenting himself, except for good cause shown, with a survey of the external boundary of the tenure. This will give the area, which is all the landlord can want to know in the great majority of cases. Under any circumstances the zemindar, if so advised, could sue in the civil courts to establish his rights if he is under the belief that the lakhirajdar holds more lands than he is entitled to hold under his grant.

Inadequate provision made in the Bill for measurement of ryots' holdings.

30. Sections 134 to 137 are given as reproducing sections 176 and 177 of the Bengal Bill; but the Lieutenant-Governor does not find that section 178 of the latter Bill, which itself reproduces section 38 of Act VIII of 1869, finds any place in the Bill now under discussion. This seems to Mr. Rivers Thompson a serious omission; for many in-coming landlords, especially auction-purchasers, will find it very difficult to overcome combinations to withhold rents among their ryots, if deprived of the procedure provided by section 38 of Act VIII of 1869. The justification for the exclusion of that procedure from this Bill is the introduction of the provision for settlement of rents and record of rights. These provisions, however, are at present only applicable to disputes on a large scale; they can only be put in motion by the Local Government, and are therefore inapplicable to such cases as section 38 of Act VIII of 1869 was intended to meet. Accordingly, the Lieutenant-Governor trusts it will be found possible either to amplify this part of Chapter X so as to include the provisions of the existing law regarding the measurement of land when it cannot be ascertained who are the persons liable to pay rent, or so to extend the provisions regarding record of rights as to enable the Government to apply the procedure to suit the wants of individuals.

Merger.

31. In regard to the doctrine of merger, the Lieutenant-Governor has nothing to say except that, as the doctrine is novel, it may be made clear that if a landlord buys an occupancy right under chapter V of the Bill, the occupancy right is extinguished, and the land becomes part of the ryoti land of the estate. The provisions regarding merger probably imply this, but it would be well by an explanation to make the matter quite plain.

Suspension and remission of revenue or rent on failure of crops.

32. Here I am to take the opportunity of stating that the Government of India has recently asked this Government whether it would not be desirable to introduce into the Tenancy Bill a section similar to section 23 of the North-Western Provinces Rent Act (XVIII of 1873). The question had already attracted the attention of the Lieutenant-Governor, and he is now prepared to say

that, while he has no objection to the introduction of such a provision into the Tenancy Bill he considers that it will not be as productive of good results in Bengal as in Upper India. In the first place it must not be forgotten that by far the greater part of these Provinces is permanently settled, the revenue bearing to the rental a proportion of one to five, if not less; and in the next place that there is usually a long chain of subinfeudation between the zemindar and the ryot. No zemindar, with a small revenue charge and a large rental, will consent to remit rent *in proportion* to a remission of revenue, while if he only remits a sum equal to the remission made him, the effect on the ryots would be small, even if it ever reached them through the long line of tenure-holders which often intervenes between them and the proprietor. These, however, are objections of practice, not of principle, and the provision might be useful in temporarily-settled estates. From this point of view the Lieutenant-Governor makes no objection to the introduction of a section similar to section 23, Act XVIII of 1873. If such a provision be introduced, it would become desirable to charge interest on the suspended demand; and therefore advantage should be taken of this opportunity to repeal section 2, Act XII of 1841, which prohibits Government from charging interest on revenue arrears.

CHAPTERS XI AND XII.

Settlement of rents and records of rights.

33. The provisions regarding settlement of rents and records of rights are, in the Lieutenant-Governor's opinion, among the most important of the Bill, and he observes with great satisfaction that they meet with but few, and these unimportant, objections at the hands of the representative Associations in these Provinces, while most officers approve of them. Reserving minute criticisms for later communications, Mr. Rivers Thompson will only say, in regard to Chapter XI, that while on the one hand, in section 157 the period allowed for objection appears to be too short; on the other hand, the facilities for appeal and for contesting the Settlement Officer's proceedings afforded by sections 160 to 162 are too wide and numerous. The matter is one which calls for finality; and the Lieutenant-Governor sees very serious disadvantages in the proposals to invest the civil courts practically with the faculty of revising on all points the work of the settlement officers. On questions of law there is no objection to an appeal being allowed to the civil courts; but on questions of fact such as are involved in clauses (*b*) and (*c*), proviso (2) of section 160, it seems to the Lieutenant-Governor that the civil court is a less competent judge than the Settlement Officer. If, after the *jummabundi* has been published, and has, under section 159, acquired validity, a material error of fact is discovered, there would be no objection to a correction being made, as is now done under section 25, Regulation III of 1872 (Sonthal Pergunnahs Settlement Law); but in this case the authority to direct the correction should be the Local Government, or some executive authority vested with powers of the Local Government, and not the civil court. It would, in the Lieutenant-Governor's opinion, seriously diminish the beneficial operation of these provisions if the *jummabundi* were open to revision by the civil courts on any question of fact; the zemindar, who has the longest purse, would be sure to prevail over the ryot in the long run, no matter how weak the former's case; and therefore Mr. Rivers Thompson very strongly recommends that sections 160 to 162 be revised with reference to these considerations.

34. Sections 164 of the Bill as drafted makes the previous sanction of the Governor-General in Council necessary whenever the Local Government *proprio motu* desires to make a record of rights. This, in Mr. Rivers Thompson's opinion, is an unnecessary restriction on the discretion of the Local Government, and one which can lead to no possible good, while by delaying action it may cause a good deal of harm. Commenting on section 151, the British Indian Association say: "The circumstances which would justify the removal of a tract of country from the jurisdiction of the ordinary courts, and placing it, for the purposes of settlement of rent, under the jurisdiction of revenue officers, must be of an exceptional character. The first ground, therefore, on which this section would allow such removal is very objectionable. Let the Local Government have the power of ordering such a transfer when an agrarian disturbance is threatened, or when settlement in a khas mehal is to be effected; but it would be dangerous to give a number of landholders or a number of tenants the right of applying for it." Without admitting the reality of the danger referred to (for the right of sanctioning or refusing the application will still rest with Government), Mr. Rivers Thompson agrees with the Association in thinking that in such matters the Local Government is the best judge of when and how action should be taken; and if this be true regarding the questions raised by Chapter XI it is obvious that it is not less true of the operations under Chapter XII. The Lieutenant-Governor, would, therefore, recommend the omission of the words "in any case with the previous sanction of the Governor-General in Council" from section 164.

Finally, provisions similar to those of sections 157 to 160 should (with the modifications suggested above) be introduced into chapter XII. Full opportunity for discussing disputed facts should certainly be afforded before the record of rights becomes final and binding. It is presumed that, in making the record, the revenue officer would have full power to make all surveys and enquiries that might be necessary to prepare a complete record of all rights in the tract in which he was operating. As this is not expressed in the section, it might be well to obviate the possibility of doubt upon the point by a definite provision.

Effect of the Bill on existing rents.

35. An objection is taken by the Committee of the Behar Landholders' Association to this portion of the Bill, on the ground that no assurance is given that the settlement procedure will not be utilised to reduce existing rents; and the Lieutenant-Governor believes that the idea is very prevalent among zemindars that the effect of the Bill as a whole will be to effect an immediate and serious reduction in their rents. As far as the Lieutenant-Governor understands the matter, this is not the intention of the Legislature. When the Bill becomes law, indeed, it will not be possible for any landlord to recover by legal proceedings rents above the *maxima* or rack-rent limits fixed by the Bill; and in whatever tracts of country settlement proceedings under chapters XI and XII may be instituted, the *jummabundis* resulting from such proceedings will shew no rents above these limits. Subject, however, to this restriction, existing rents would not be interfered with under the Bill; they would be recorded as payable for the existing holding.

CHAPTER XIII.

Distraint of crops. Objection to modification of existing law in case of non-occupancy and *khurfa* ryots.

36. The provisions regarding distraint have met with as much opposition from the zemindari interest as perhaps any other part of the Bill; and for his own part the Lieutenant-Governor thinks that there is some ground for this opposition. He does not, indeed, think that in the case of settled ryots—and they, according to all information, will form the great bulk of the rent-paying class—landlords would have any serious difficulty in collecting their rents, even if distraint were altogether abolished in regard to occupancy holdings. Occupancy rights are now valuable, and will grow in value. They afford adequate security for the landlord's rent; and if in regard to them facilities for distraint be abolished, the landlords will not ultimately be the sufferers. Mr. Rivers Thompson would be glad to think that settled ryots themselves will suffer nothing from the danger they are likely, in the beginning at all events, to run of losing their all through unpunctuality in paying their rents.

But if landlords' rents are adequately secured by the transferability of the occupancy right, there is no such security in the case of non-occupancy and *khurfa* ryots. It is in regard to those that the restriction of the landlord's power to distrain will be most felt. That the power to distrain, as it now exists, has been abused is beyond question; that it is still abused, especially in Behar, is equally indisputable, though the abuse is probably not so flagrant nor so extensive as it once was; but, granting all this, the Lieutenant-Governor has reason to believe that the abuses are quite within the ability of the executive to check and to suppress, and he therefore hesitates to deprive landlords (for the provisions of the Bill virtually mean deprivation) of the only effective means they have of collecting rents from the "non-occupancy" or *khurfa* ryots. Mr. Rivers Thompson would be quite prepared to agree to any proposals which have for their object the more effectual enforcement of the existing law of distraint, and he thinks this may be attained by making violations of the existing law of distraint punishable, as in the case of criminal trespass, under the provisions of the Penal Code, and by enacting that persons benefiting by such offences should be similarly liable to punishment. Thus armed, the district officers should be able to deal adequately and fully with the abuses of distraint, and he would, therefore, submit that the present law of distraint might with such substitution of penalties for civil damages be left unaltered in regard to all non-occupancy ryots. If this view were accepted, the Lieutenant-Governor would recommend the abolition of distraint altogether in regard to occupancy holdings. Indeed, with the stamp duty chargeable under section 167 (2) of the Bill, it is not apparent what great advantages landlords would derive from the distraint sections of the Bill which are not secured to them already by the procedure for attachment before judgment nder the Civil Procedure Code.

CHAPTER XIV.

Procedure for recovery of arrears of rent in Court. Proposal to extend patni sale procedure to registered tenures.

37. It is very generally admitted, and properly so in the Lieutenant-Governor's opinion, that the abbreviated procedure for the recovery of rent contained in this chapter is an improvement on all previous proposals on the subject. Partizans of the zemindari party, indeed, assert that, while their rights have been invaded in one direction, nothing has been done to facilitate the recovery of their just rents; but further than bringing to the notice of Government a proposal made in 1876 by Maharaja Sir Jotindra Mohun Tagore to extend the patni procedure to all tenures and tenancies, they have done nothing to suggest a better procedure. The Lieutenant-Governor has given his careful attention to the Maharaja's proposal; and while he is unable to adopt them in their entirety, he is willing, as at present advised, to extend a reasonable modification of the patni sale procedure to tenures of all sorts, which, either through the motion of the owner or the landlord, may be registered in the manner indicated in paragraph 14 above. In this Mr. Rivers Thompson goes somewhat further in the direction desired by the zemindars than section 147 of Sir Ashley Eden's Bill, which limited the summary sale procedure to patnis, to tenures at the creation of which the right to sell was reserved, and to permanent tenures with a rental of Rs. 50 per annum. It remains to be seen whether zemindars, by causing all 'tenures' to be registered, will, in consideration of the more summary procedure for recovering arrears, convert into middlemen those who are now nominally occupancy ryots. If they do, their action will further the Lieutenant-Governor's views regarding the preservation from rack-rents of the actual cultivators of the soil.

But while the Lieutenant-Governor is thus disposed to apply a summary proceduce for recovery of rent to all tenures, he is very strongly of the opinion that no such procedure could be safely applied to *ryoti* holdings in the possession of actual cultivators. Apart from the reasons which the Rent Commission give* for refusing to invest inferior landlords with summary powers, Mr. Rivers Thompson believes that it would be a mere mockery of justice to give occupancy ryots, sold out of their holdings under a summary procedure, the right to sue for redress. His holding is the occupancy ryots' all, and, deprived of this, he becomes a pauper, unable to sue. He becomes an incumbrance on the community which, under the circumstances of the country, cannot provide him with industrial employment, and a source of embarrassment, especially in times of scarcity, to the Government. Nor does the Lieutenant-Governor think that sufficient security against wrong-doing would be afforded by any such arrangements as those contemplated by section 148 of Sir Ashley Eden's Bill. There are many zemindaris in these Provinces in which regular and systematic accounts are now kept; but Mr. Rivers Thompson would hesitate very long indeed, before he would, on that account, vest the proprietors with exceptional privileges in regard to the recovery of rent, When an organized village agency of record and account is established throughout these Provinces or portions of them, things may be different, and then summary facilities for recovering rent from occupancy holdings may properly be granted, which cannot now be allowed without public danger. But for the present, the Lieutenant-Governor thinks that as much as can reasonably be done to facilitate the recovery of arrears from ryots has been done by the Bill. Indeed, many experienced officers doubt whether the Bill could, with safety, push simplification further than it has done; and some are disposed to take exception to that portion of section 198 which vests selected munsifs with final jurisdiction in suits when the arrears claimed do not exceed Rs. 50. The Lieutenant-Governor notices that the Rent Commission proposed to confer such summary jurisdiction in munsifs only up to a maximum claim of Rs. 10. It is to be observed that in the great majority of suits for arrears of rent the sum claimed does not exceed Rs. 50; so that in point of fact the practical effect of the section will be to prevent appeals altogether, except in a question of title or rate. The change, therefore, which the Bill proposes to introduce into the present law is a very radical change, and a very great concession to zemindars, which many competent Judges do not contemplate without some doubt as to its expediency. The Lieutenant-Governor, however, thinks that, on the whole, the section may stand, especially as it will be in the discretion of the Government to appoint carefully selected officers for the trial of rent-suits. According to the ancient law of the country, fixity of tenure was conditional on punctual payment of the nt ; and when there is no dispute as to title or rate, the decision of a competent and experienced udge, on an examination of the facts, may be safely allowed to prevail up to the limit ated. If any further concession is to be made, and hardly any seem necessary, it should, in Mr. Rivers Thompson's opinion, take the form of a prohibition of an appeal in suits for arrears of rent from Rs. 50 to Rs. 100 (the limit of the Judge's summary jurisdiction), unless the amount of arrears decreed by the Court of First Instance were previously deposited in Court. It is a common, and a not unreal, complaint with zemindars that their difficulties commence when the decree for arrears has been attained; and to obviate this complaint as far as may be, it might be desirable to limit the right of appeal except under such securities for the final payment of the demand as have been proposed above.

* "Experience shows that superior landlords rarely abuse the (patni) procedure, while they do abuse it, they are persons of substance, against whom a decree for damages can be effectually enforced. There are grave doubts whether the result would be equally satisfactory if the same power were entrusted to petty landlords."

Conclusion. Lieutenant-Governor's general opinion on the Bill.

38. In the preceding remarks the Lieutenant-Governor has only touched on the main points of the Bill, postponing matters of detail till the Select Committee meet. He hopes for opportunities from time to time, during the Committee's sessions, to make to it such communications on those points of detail as the progress of the measure may suggest. In bringing his remarks on the present occasion to a close, Mr. Rivers Thompson would again say that, although on some points he has not been able to approve the Bill as drafted, and has felt himself constrained to make suggestions at variance with some of its provisions, he is still bound to repeat that, if modified on those points, the Bill, in his opinion, will be a constitutional and successful effort to remedy abuses which unquestionably exist very widely, and whose continued existence is incompatible with the peace and prosperity of these Provinces.

No. 1021T.-R., dated 1st October, 1883.

From—C. W. Bolton, Esq., Under Secretary to the Government of Bengal,

To—The Secretary to the Government of India, Legislative Department,

In continuation of Mr. MacDonnell's letter No. 973T.-R., dated the 27th September, 1883, I am directed to submit, for the consideration of His Excellency the Governor General in Council, the accompanying copies of the report * received from the Commissioner of the Rajshahye and Cooch Behar Division on the Bengal Tenancy Bill, 1883.

* Eighty printed copies of letter No. 610 R. C. T., dated the 22nd September, 1883, with enclosures.

No. 610R.C.T., dated Darjeeling, 22nd September, 1883.

From—Lord H. Ulick Browne, Commr. of the Rajshahye and Cooch Behar Divn.,

To—The Secretary to the Board of Revenue, Land Revenue Department.

With reference to the Board's circular letter No. 351A., dated 29th March, 1883, I have the honour to report on the Bengal Tenancy Bill.

2. The district officers of Rajshahye and Julpigoree have offered no opinions on the Bill. They seem to have felt hampered by the knowledge that they had already reported on previous Bills, many of the provisions of which are reproduced in the present Bill, and that Government have resolved to pass into law many of those provisions. Mr. Vowell indeed asked me if I could tell him what provisions were still open to consideration and discussion—a question which I was unable to answer. The Deputy Commissioner of Julpigoree also pleaded want of time; but he forwarded a very full report by Baboo Tarruck Nath Mullick, an experienced Deputy Magistrate and Deputy Collector, now in charge as manager of a large Wards' estate. Mr. Vowell has also consulted non-officials in his district, and sent their opinions. Mr. Livesay entirely approves the Bill, and has no remarks to make on it. Mr. Newbery approves of it generally, writing as follows, and adding a few other remarks, which appear in enclosure No. 1 of this letter—

"I have myself gone through the Bill carefully, and, impartially considered, I must say that the Bill is a positive improvement, and it is impossible to make it better under the present state of things, which I admit. As the zemindars urge, the Bill introduces no new measures to remove the extreme difficulty at present felt in realizing the rents, though that was one of the two great necessities which led to the re-casting of the existing law on the subject. At the same time I feel bound to say with the Rent Law Commission that the facilities for realising rents in Bengal should be sought for, not so much in any positive and new provision of the law, as in the root of the disputes which prevent their punctual and ready payment. Chapter XIV appears to me to have fully taken up the sources of these disputes. Section 47 is, no doubt, in the zemindar's point of view, a very serious alteration, but the difficulties clearly pointed out in paragraphs 28 to 33 of the Objects and Reasons of the Bill cannot be removed without it. It is by far the more desirable to accede to certain concessions in order to gain something than to reserve a right which practically secures no good, but, on the contrary, is a source of endless trouble, uncertainty, and actual loss. The clause (*f*) at section 50 is only what is practically done and never objected to, except in certain cases which are fully provided by sections 51, 53, and 54, checked by section 56."

Mr. Glazier and Mr. Tate have given opinions of their own and of others which will appear in enclosure No. 1. Mr. Wace has reported very fully on the Bill. I give some extracts from his report in enclosure No. 1 of this letter.

3. *I enclose separately a paper marked as enclosure No. 2 of this letter, and desire to specially call the attention of the Board and Government to it.* It consists of extracts from Mr. Wace's report, containing remarks of great importance, showing as they do that the provisions of the Bill will have the effect of putting an end to the present custom of making settlements of the Terai jotes, which constitute a Government estate. for 10 years. As no contracts will under the Bill prevent the tenant from enjoying all the rights accruing from a right of occupancy, there will be an end of re-settlements, and future rents will be decided by the provisions of the Bill, if passed, for fixing an enhancement of rent.

The foregoing remarks, and what is said in enclosure No. 2 on that point, apply equally to the very similar settlements for 10 years of the Western Dooars of Julpigoree.

4. Before turning from special cases arising in connection with the position of Government as zemindar, I request the Board's attention to the matter of lands granted under the Tea and Arable Leases Rules. It seems doubtful whether under the provisions of the Bill there will be any use in some of our rules for the grant of these two classes of leases, as I understand that there being no freedom of contract, if a grantee has occupied for the requisite number of years, and has held land for 12 years, he will have all the rights of a settled ryot. Of course no such rights can be acquired during the currency of the preliminary lease. Some rather difficult cases will, however, arise, as it sometimes happens that the full percentage of cultivation required by the rules is not effected during the currency of the preliminary lease, and then the grantee is allowed to hold on as a year-to-year tenant, supposing grantees to so hold on without completing the 15 and 50 per cent of cultivation till they had occupied for 12 years, they would under the Bill become settled ryots, and the rules in regard to the grant of a renewed lease and the terms thereof would no longer apply.

5. I do not doubt that, as regards such estates as the Terai jotes and the jotes of the Western Dooars, Government intend to place themselves in the position of all other zemindars, and to deprive themselves of the rights of which other zemindars are deprived. At the same time it will be contrary to public policy in the matter of encouraging cultivators if jotedars of the Western Dooars are allowed to acquire rights and hold for ever any area of waste lands of which they may have been in possession for 12 years. Hitherto Government has exercised its beneficial right to improve its property and encourage cultivation by depriving the jotedar of waste lands in excess of the area which the jotedar is likely to be able to cultivate as proved by the area found uncultivated at the expiration of each 10 years' settlement, such excess lands being made available for others, both willing and able, to do that. Such judicious measures will be no longer possible under the Bill.

I am not aware whether Government and the Board contemplate that lands granted under the Tea and Arable Lease Rules shall be gradually removed from the operation of these rules, and the terms of the leases by the effluxion of time as a consequence of the present Bill. I have now drawn the attention of the Board to the subject, and it rests for them to bring it

to the notice of Government, in case there should be any desire to treat lands granted under the rules referred to in an exceptional manner.

6. It is scarcely necessary to say that the zemindars of the permanent settlement are (probably without any single exception) much opposed to the most important provisions of the Bill, which proposes to deprive them of so much and confer so much on their ryots.

What Mr. Newbery says in the following passage, as being the view of the zemindars of Rungpore, may be taken as representing the views of all the zemindars in the division, except Government, who are doubtless ready to make sacrifices in regard to public property in order to benefit all the ryots in the country:—

"All the principal resident zemindars of this district, who has given their opinions on the Bill, are unanimously against it as being unnecessary and full of measures which are not only subersive of their rights which the Government has bound itself at the permanent settlement never to disturb, but are also calculated to generate greater ill feeling between the ryots and the zemindars. Further, that courts having been made to come between them in almost every point of difference, the result would be, they say, that the ryots will be found practically to lose more than to gain by the Bill. They strongly object also to the new rights proposed to be created by section 47, and clause *f*, sections 50 and 56. They further urge that the Bill proposes no better means of recovering the arrears."

Lastly, the public prints have for some months past contained reports of special meetings held by zemindars to express their strong disapproval of the most important portions of the Bill.

7. The zemindars, as a body, also complain that the Bill contains no provisions for enabling them to recover their rents easily and quickly, and specially rents demanded by them at the same rates, &c., as have been paid in for former years, notwithstanding that in 1877 their claim to such an improvement of the Rent Law was admitted by Government.

8. I now proceed to give my own opinion on the Bill.

9. The most important provisions in the Bill are those which confer valuable rights and privileges on the ryots, generally at the expense of the zemindar, whose full proprietary rights will be curtailed, whose income will be restricted, and whose estates will, I think, fall in market value accordingly. It seems to me that the right to ask what price you like for your own property, whether it be land or a horse, or anythig else, is a valuable proprietary right which will be abolished by the Bill, and that to give an ordinary ryot a right to occupy land as long as he pays his rent, and unless he misuses the land or violates a special condition, and to limit the rent he is to pay, is to really make him proprietor in a lesser degree. The present Prime Minister of England, and I believe all the leading statesmen at home, have stated in Parliament that provisions of a somewhat similar nature in the two Irish land laws introduced by Mr. Gladstone confer a proprietary interest in land on the tenants. In short, the Bill proposes to effect a violent revolution in the ownership of landed property, and to change the landed system over a large and important tract of country, affecting one way or other the interests of above 55 millions of people. The magnitude and importance of the measure can hardly be overrated.

10. I think that such important changes, affecting detrimentally the rights and interests of a large and important class in a vast country, should only be made on very strong grounds, such as, for instance, the grounds advanced by Mr. Gladstone when introducing a somewhat similar measure for Ireland in 1870, and again, more recently, when he supported his proposals by urging that as good general laws and administration and assistance in the reclamation of waste lands had failed to dispel serious ill-feeling among the mass of the population of Ireland towards England and the Government of the United Kingdom, it was necessary to take an extreme step in a direction specially acceptable to that population in the hope that it would put an end to what was always a serious political danger. The result of such a measure as this in that case might well make thinking men pause before introducing it into another country, even if the circumstances under which the Irish measure was applied existed here. In Ireland the people were finally convinced that the action of Government originated in fear and weakness, and those who had previously paid the rent and lived quietly were persuaded that, if they resorted to greater and greater outrages, the English Government would give them more and more. As a consequence, concession made at the expense of the landlord was followed by further outrages till Government saw that vigorous repression and the suspension of constitutional liberties must take the place of concession. Thus, the result of a similar measure in Ireland was almost disastrous, but it was tried to meet circumstances which seemed to the Government to require special treatment.

11. What are the circumstances under which it is proposed to introduce the present measure? They are about as different to those found in Ireland as it is possible to conceive. No special and strong grounds, political or other, exist in the present case, nor have any been asserted in support of this Bill. Even the Rent Law Commission, the majority of whom proposed a measure similar to this one in its main features, made no such assertion, but, on the contrary, seem from a passage in the report to have been unanimous in holding what is a nearly universal opinion, viz., that the ryots of Bengal Proper are stronger than the zemindars. This will scarcely be disputed by those who have had opportunities of forming an opinion on the point, and it is pretty well known that in Eastern Bengal the ryots are very much the stronger, and that if protection or assistance is required there it is required by the zemindar.

That the ryots of Bengal have been the stronger, and have not been in need of protection or assistance, is further established by the history of the legislation and the attempt at it

which preceded the first of what may fairly be called the revolutionary Bills, viz., that proposed by a majority of the Rent Law Commission. In 1876, the then Lieutenant-Governor effected the passing of the Agrarian Disputes Acts of that year on a consideration of the disputes in Pubna arising from quarrels between shareholder zemindars. Most Government officers were, I believe, of opinion that nothing but the provision to be found in the present Bill for the appointment of a joint rent collector or manager was needed to meet such cases, but my object in mentioning the Act is to observe that, on that occasion, the Lieutenant-Governor never proposed such changes as are to be found in this Bill.

In 1877, again, so far from any measure to assist the ryots being thought necessary or advisable, another Lieutenant-Governor thought special legislation necessary to assist the zemindars all over the Lieutenant-Governorship of Bengal, *i.e.*, to enable them to recover their rents in cases where there was no dispute, and where the amount claimed was the same as had been paid at the same rate in previous years, combinations among some ryots and a general disinclination to meet their undisputed liabilities among the rest having called for such legislation in aid of the weaker party,—the zemindars. The Government of India concurred with the Lieutenant-Governor, and leave was given to introduce the Bill, though unfortunately for the zemindars that was never done. Matters have in no way changed since then. There has been no general feeling of discontent among the ryots of the country as a body. I am sure that all Government officers will agree in this, and in thinking that the ryots of Bengal are, as a body, in a contented prosperous condition, nor will it be denied that there has been no general request on the part of the ryots for such legislation as is now proposed. As a body, they know nothing of the intentions of Government, and have never asked for what is now to be given to them at a great cost to the zemindars.

12. It is clear then that the present measure is proposed, not because it is necessary, but because, in the opinion of Government, the land system of the Bill is preferable to the existing one. It seems to me that the passing of such a Bill would not be justified by the circumstances under which it is proposed, and that if there were no other objections it would not be right to pass it.

13. But there are other and, in my opinion, serious objections to the Bill. There is first the one, argued so universally and so strongly by the zemindars, that it is an infringement of the rights guaranteed to them by the Permanent Settlement.

The representations of the zemindars on this point seem to me to be most reasonable and entitled to the fullest consideration. I have always thought that the quotations from the writings of Mr. Francis, Sir John Shore, Lord Cornwallis, &c., as to whether zemindars had proprietary rights or not before the Permanent Settlement, which quotations have been so often brought forward by both sides when discussing the question of the infringement of the Permanent Settlement by the passing of Act X of 1859, and such Bills as this one, are not really much to the point, as the case of the zemindars rests on a much stronger ground, viz., the declaration in the Permanent Settlement Regulation that they are proprietors of their estates. That the Bill takes away some of the most important proprietary rights is not, I believe, denied by any but a very few supporters of the Bill. The Hon'ble Mr. Ilbert, in a debate in the Legislative Council, gave, it is true, a new interpretation to the word "proprietor," bu I do not think that has been adopted by other members of the Government; and being opt posed to the ordinary use of the word "proprietor" in the English language, to the use of i- as construed by our Government here and our Regulations and Acts for ninety years, it it unlikely to be adopted, especially as (*see* paragraph 9 of this letter) the leading statesmen as home hold that such measures as are proposed in the Bill deprive landlords of proprietary rightt and confer them on tenants.

The zemindars do not stand alone in thinking that Act X of 1859 and such Bills as this are breaches of the conditions of the permanent settlement. The English Barrister-Judges of the High Court, and especially the Chief Justices—men accustomed to interpret laws—have, I believe, almost without exception, held the same view. and it is on record that Sir Barnes Peacock, the Chief Justice of the year when Act X of 1859 was passed, and the present Chief Justice, are entirely in accord on that question.

I do not deny that on grave grounds of public necessity, such as apprehensions of general disturbances, it may be necessary to depart from even such engagements as the Permanent Settlement, but no one says they exist in the present case. Nor do I forget that the Permanent Settlement allows Government to interfere for the welfare and protection of the ryot. But if it had been intended that such interference could amount to the destruction of the proprietary rights then conferred, such rights would never have been conferred; and then I request reference to paragraph 11 of this letter, as it can scarcely be alleged that interference is necessary in the very slightest degree for the protection of the ryots, who are in Bengal Proper stronger than the zemindars, and in part of it very much stronger.

14. Next, we have for ninety years treated the zemindars as real proprietors, making them discharge the duties of proprietors as regards matters connected with police, crime, furnishing supplies to troops on the march, and, above all, the collection of public demands. Is it fair or just to now deprive them of several of the most important rights of a proprietor?

15. In what I have said in this letter as to the ryots being stronger than the zamindars, as to the former not requiring assistance against the latter, and as to the latter (as admitted by the Governments of Bengal and India in 1877) requiring assistance against the former, I have had principally in view the ryots of Bengal Proper. I know that in Behar the zamin-

dars are, generally speaking, the stronger, but if any measures nearly approaching those in the Bill had been necessary in that province, some measure or other would assuredly have been proposed by Sir Richard Temple or Sir Ashley Eden in 1876 and 1877 to assist the ryots of Behar, who have not asked for this Bill any more than have the ryots of Bengal It seems to me, too, from what has been written by officers of experience in that province, that there are at any rate no grounds for proposing such drastic measures in Behar, and, considering the way in which it affects the zamindars, I think Government are bound to first try very much more moderate measures even than are now contemplated there as elsewhere.

16. Another objection is that it is a serious thing to create among the nobility and gentry of a population of 55 millions a feeling that Government have injured such an important class, and that without nearly sufficient cause, and without any demand for it on the part of the classes for whose sake the injury is done.

17. Another objection is the possibly disturbing effect the Bill might have on the ryots throughout the country. Though happily they are of a very different mould to the Irish, still when the ryots of Bengal and Behar see that without any general representation on their part —without, so far as they know, any reason at all for the action of Government—the zamindars are deprived of rights, while others are at the same time conferred on the ryots, I think it very possible that the idea may occur to the latter that, as they have got so much without asking for it, Government must be actuated by a great desire to please them and to injure the zamindars, who are sacrificed for their sake, and that by agitation further concessions may be obtained. Such an agitation might before long grow and gain strength till it became a source of much trouble to Government.

18. For these reasons I am opposed to the most important provisions of the Bill, and think none of them should be applied to Bengal Proper. In Behar I would introduce but one of them, viz., the provision enabling a ryot to gain a right of occupancy in land in a village, even though he may not have occupied exactly the same land for 12 years. This might be enacted on a consideration of the ryots of Behar really needing protection against the zamindars, because the latter have been in the habit of changing the lands to prevent the former acquiring a right of occupancy, and because the general condition of the Behar ryots is such as to call for a special measure. But, while doing this, provisions for facilitating the recovery of rent should at the same time be enacted.

19. The following are the principal provisions of the Bill to which I have referred and objected in the foregoing paragraphs.

The general effect of chapter III, which will prevent any zamindar from utilising in the future any of his land as khamar land when once a register of such land has been prepared. He cannot so use land that may hereafter be deserted by a ryot, and to which no one but the zamindar will then have *any* claim, and he cannot even so use *waste* land which is his own property, *and to which no one else has probably even at any time advanced a claim or an interest.* I think such restrictions unjust. The provisions of sections 21 to 24 in regard to the profits of tenures and the enhancement of the rents of the same. In chapter V the provisions of section 49, allowing a ryot to acquire a right of occupancy in khamar land; of 50, taking away the right of contract in some matters, not allowing ejectment for non-payment of rent when due, allowing sub-letting without the zamindar's consent, making occupancy tenures transferable and heritable by the ryot; and of section 56, depriving the zamindar of the power of holding a right of occupancy, even when he has bought it, if he lets the land out again. In chapter VI the provisions of sections 59 and 61, not allowing the registration of a contract involving the payment of enhanced rent above a certain limit, even when a ryot is ready to pay a higher rent of 75 (*d*), 76, 77, 78 limiting the enhanced rent and prohibiting a further enhancement within 10 years. Though it may be clearly proved (as in cases within my knowledge) that the productive and market-value of land has increased fourfold, and from causes entirely unconnected with any action on the part of the ryot, the zamindar may not get a corresponding share or increase of rent; and if the increased value goes on increasing, he may not get any increase of rent at all for another 10 years. The provision of section 81 limiting the rent payable in kind of 85 and 86. In chapter VIII the sections depriving a zamindar of the power to eject an ordinary ryot, except on special grounds, and giving such a ryot ten times the amount of the increase of rent demanded in case of ejectment from land which he has no right to occupy, and the rent fixed on which he is unwilling to pay. In chapter IX, section 119, limiting the rent of an ordinary ryot. In chapter X the provisions of section 133 not allowing a zamindar to measure ryots' lands again for 10 years, even though in the first year a ryot may have occupied and included in his holding any quantity of additional land.

20. Apart from the great question of principle involved in the revolutionary portions of the Bill, it seems to me to have been framed with most unnecessary unfairness to zamindars. There is, so to speak, no reciprocity, and provisions in favour of the zamindar, which suggest themselves as a natural corollary to corresponding provisions for the benefit of the ryots, are not be found. For instance, though an occupancy ryot is to be allowed to sell or bequeath his holding, the zamindar is not allowed to sell it summarily for non-payment of rent, but must go into court and get a decree first. The boon to the ryot is a great one, and a great pecuniary loss to the zamindar. He would probably, however, consent to it if at the same time he were allowed to have all such tenures registered and made saleable like patni tenures. In the case of an occupancy holding paying rent to the zamindar while the ryot and most of their people

may hold a right of occupancy, there is one person in the world, and only one, who is prohibited from holding such a right as long as he likes, and that is the *proprietor* of the land, who is not allowed this even if he purchases the occupancy right from a ryot, if the zamindar subsequently allows another ryot to occupy it for 12 years.

21. The following provisions of the Bill will be decidedly beneficial, and I approve of them. Section 27 about registration of transfers of permanent tenures; chapter IV about patni tenures; section 83 about the Collector preparing lists of market prices; sections 97 to 99 about instalments of rent; sections 100 and 101 prescribing forms of rent receipts; section 138 about the Collector deciding the standards of local measurement; sections 142, &c., about the appointment of managers or rent-receivers in cases of disputes between shareholding zamindars; and most of the provisions of chapter XIV in regard to procedure in suits.

22. Referring to section 109, I think combinations not to pay rents, even when the rents asked are at the admitted rate, &c., of previous years, should be checked by making it compulsory on the court to award 25 per cent. damages in addition to 12 per cent. interest.

I do not think the plan of a table of rates will work, except in a few places, and I understand it has failed, in so far as the enquiries made by special officers during last cold season enabled Government and the Board to form an opinion about it. When a special officer was appointed in the Government estates in Bogra, and I saw a copy of the instructions he had received, I told Mr. Dampier I was sure it would not work in my division, as the rents paid in this and that estate for this and that class of land are not fixed on any principle which would afford a basis to work on, and so it turned out.

Section 151 (2) (a).—I would not allow this unless both parties assent to it; and the same as regards the similar case under section 164 (2) (a).

I think the provisions not to alter rents within 10 years, regardless of any improvement in the land, irrespective of the ryots' action, very objectionable, and the same as regards section 133 about the zamindar's right to measure land which may have been increased considerably by the ryots' encroachment.

23. In conclusion, I hope that, after all that was said and done in 1877, and the unchanged circumstances since then, a provision will be made in the Bill for the recovery of undisputed rents at the rates paid in former years. It seems to me very unjust to omit such a provision in favour of the zamindar from a Bill which proposes to deprive him of so much, and to do so much in favour of the ryots. In 1877 the zamindar asked for a bread; his claim to it was admitted by the Governments of Bengal and India; and in 1883 he is refused a crumb and given a very large stone. I believe my recollection is correct when I say that some Government officers who have warmly advocated the revolutionary Bills (Messrs. Reynolds and Mackenzie, for instance) warmly advocated in 1877 and 1878, or 1879 (Mr. Mackenzie in the Bengal Legislative Council) such relief as I now recommend to the zemindars, and it is not easy to understand how it can on any principle of justice be now refused. Though the Bill that was approved of in 1877 would be very beneficial, the measure I recommend is that the registration of occupancy tenures be made compulsory, and the tenures made saleable like putnee tenures. This is a simple and easy remedy, and would, I think, be very acceptable to the zemindars.

ENCLOSURE No. 1. KHAMAR LANDS.

CHAPTER II.

Pubna.—The pleaders object to the limitation of the zemindar's khamar lands.

Bogra.—It is the opinion of zemindar Abdoos Soobhan Chowdree that waste lands and lands under water should be classed with *khamar* lands.

Julpigoree.—Baboo Taruck Nath Mullick (an experienced Deputy Magistrate and Manager of a large estate under the Court of Wards) does not consider the provisions of this Chapter objectionable, though its preparation in the first instance might lead to litigation.

Darjeeling.—Mr. Wace approves of the principle which underlies the provision of Chapter II, by which the proprietors would be prevented from increasing the stock of khamar lands, but he thinks that it would work hardly against petty proprietors and lakhrajdars, and he would be glad to have it so altered as to protect them.

Section 22.—Baboo Taruck Nath Mullick thinks that the provision of this section would prove prejudicial to the interests of the zemindar. He knows of many cases in which the tenure-holders by gradual encroachment on khamar or other untenanted lands became possessed of more than three or four times the quantity of land originally comprised in their tenures. In such cases it would be very unfair if the landlord were not allowed to assess the whole quantity of land found on measurement in the possession of the tenure-holders, and thus increase their rents to three or four times the amounts they used to pay.

Pubna.—The pleaders of Pubna also disapprove the provision that enhanced rent should not be more than double the previous rent.

Registration of transfers of occupancy rights.

Dinagepore.—The Sub-Judge of Dinagepore suggests that transfer of occupancy rights should be registered under the same provision as laid down in sub-division D, Chapter III, for the registration of permanent tenures. The Collector does not approve of this suggestion, as he apprehends that such a provision would give the zemindars an opportunity to extort money (salamee) from the ryots.

Bogra.—Abdoos Soobhan Chowdree, zemindar, is of opinion that provision should be made for the registration of transfers of jotes, otherwise when a dispute will arise in regard to the tenancy of a jote, the landlord will have to wait for rent till the matter is decided by the court.

Darjeeling.—Mr. Wace holds that the system of registration should not be extended to occupancy ryots. He does not also approve of the alternative procedure in sections 27 and 28. If the application is to be made to the revenue officer, let him have the power enforcing his order, or section 28 might be omitted altogether. In that case the transferee would apply direct to the landlord, and on his refusal, go direct to the civil court.

Contracts between Landlords and Tenants—Sections 45, 47, 59 (2), 82, 85, and 98.

Bogra.—The zemindars are of opinion that it is unfair that all existing contracts between landlords and tenants should become null and void after the Bill is passed.

Rungpore.—Mr. Newbery says—

"I do not clearly understand the real purport of section 82. If it means that when the rent in kind is commuted to a money rent by an occupancy ryot, his rent is a fixed money rent, and must be paid every year, whether the land is cultivated or not, in the same way as the ryot mentioned in section 50 do, then I consider the meaning of this section ought to be made clearer by adding a few lines to the end of it to bring these cases clearly under the operation of section 59. clause 2. The clauses 2—b and 3 read with the immediately preceding section 81 seems not to distinctly say that the money rent in such cases cannot be fixed independent of any contract more than one-fifth of the gross annual produce. If, however, these ryots are not considered when his rent is so commuted to be exactly on the footing of the ryots mentioned in section 50, I do not see the reason of such consideration, because both of them are occupant ryots with fixed rents."

Julpigorie.—Baboo Taruck Nath Mullick is also of the same opinion. He thinks it would be unfair not to allow the landlord to enter into contract with the tenant, and to increase rent by private arrangements to any amount without limit. The Bill makes void all engagements which militates against the ryots' interests, but not those which are prejudicial to the landlords, although in both cases the contract might have been made in good faith.

Darjeeling.—Section 82. Mr. Wace would not give the court a discretion. He says:—"The two rules would undoubtedly give widely differing results, and the result would be inequality of treatment that would cause trouble. I prefer the second of the two methods as involving the small departure from existing relations between the parties."

Transferability of Occupancy Rights—Chapter V, Sections 43 to 57.

Dinagepore.—The zemindars do not at all approve of these sections, on the grounds (1) that they would bring in the mahajans as middlemen; (2) that they would give facility to hostile zemindars to settle on their neighbours' lands; and (3) that ryots might combine to force the landlord to exercise the right of pre-emption, or let his lands go into the hands of strangers. They think that the ryots should deem it a large concession even if the transfer were limited to inheritance and bequest.

Mr. Tute's own opinion is that if the right of occupancy is to be recognized at all, it must be made tangible marketable commodity. He approves of the provisions of this chapter. As a protection to the zemindar against the machinations of his enemies, and the combination of the ryots, and to prevent any breach of the peace, he proposes an alteration of clause 2 of section 51, such as would give the zemindar an opportunity to prove to the Collector that the sale was intended as a means to annoy him, and the Collector in such a case should have the power to stop the sale.

Rajshahye.—Baboo Hara Gobind Sen, Professor, Rajshahye College, thinks that the restrictions on the transferability of occupancy rights in sections 51 to 54 would lessen the value of the right, and prevent the ryots from improving the land. The Collector agrees in this opinion, and thinks that such transfers should be quite free, subject only to registration in the landlord's *sherista*.

Bogra.—The zemindars are of opinion that the consequence of the provision of section 51 would be that money-lenders and rich zemindars would manage to have the rights of all occupancy ryots transferred to them, and the money-lenders would be the *de facto* proprietors of the soil.

The Collector himself is in favour of the Bill, and has no suggestions to make.

Julpigorie.—Baboo Taruck Nath Mullick thinks that the provisions in Chapter V would unfairly create rights to the prejudice of the landlords, and would virtually reduce them to mere annuitants. The exercise of occupancy rights would give rise to constant litigation.

Darjeeling.—Mr. Wace says:—

"Reading sections 51, 52, 53, and 55 with section 56, a landlord may well exclaim "*timeo Danaos et dona ferentes.*" Having regard to the provisions of Chapter II, by which the increase of khamar land is limited, I do not think section 56 either fair or expedient. If an occupancy right falls in any of the ways mentioned in sections 51-55, I really cannot see why a landlord should not have the power to re-let it without creating "*ipso facto*" another such right. It is surely sufficient that he should be barred under section 45 from stipulating against an accrual of that right. If, however, the legislature will not accept this view, it might at least insert the words "being a settled ryot in respect of other land in the village" after the word "person" in section 56. There would be some reason in this, but why should an outsider suddenly step into occupancy right simply because another man with whom he has no concern had those rights. These petty interferences with the powers of landlords seem to me to discredit our section with the zemindar class, and to challenge their opposition without in any way helping the class in whose interests we are professedly legislating.

Preparation of Table of Rates—Chapter VI, Sections 62 to 72.

Julpigoree.—Baboo T. N. Mullick. The power of Government to direct the preparation of Table of Rates of Rent should be limited to cases in which the landlord or the ryots apply for it.

Darjeeling.—The provisions of section 72 are not very fair; for why should the people of a local area dealt with under division B pay heavier for the decision of their cases than those dealt with under division C? Government should bear all expenses incurred in the preparation of tables.

Section 73.—Darjeeling.—Mr. Wace says:—

"In the second proviso of section 73, I would omit the words 'or on some equitable ground' unless a corresponding proviso is inserted in favour of the landlord. It is conceivable that a ryot, performing certain duties, may by contract or custom be entitled to hold at a rate lower than the rate of the table, but the words I have proposed to omit seem to me too general, and likely to raise questions at any time, which may make the Table of Rates utterly useless. Baboo Taruck Nath Mullick thinks section 73 is not open to objection."

Bastoo land—Sections 85 to 87.

Pubna.—The pleaders approve of the provisions.

Bogra.—Abdoos Soobhan Chowdree is of opinion that the acquisition of occupancy right in homestead lands is a new encroachment on the interests of the landlord.

Julpigoree.—Baboo Taruck Nath Mullick. These sections protect the ryots' interests, but not those of the landlord. It would be unfair to the latter if he were to maintain a person who was at one time a settled ryot in possession of his bastu lands, after he has ceased to be such a ryot.

Enhancement of Rent—Chapter VI, sections 95 (2), 61 (2), and 75 (d); Chapter VIII, section 91, and Chapter IX, section 119.

Pubna.—Mr. Glazier objects to the maximum rates fixed in the Bill, *viz.*, one-fifth of the value of gross produce for occupancy and five-sixteenths for ordinary ryots. In the Serajgunge Sub-division hardly any one

pays more than one-eighth, and the majority probably one-twelfth. He proposes a lower rate, *viz.*, one-fourth to one-fifth for non-occupancy, and one-sixth to one-twelfth for occupancy ryots, according to the discretion of the authority deciding the case. He thinks suits for enhancement of rent should be tried by the revenue courts.

Rajshahye.—Baboo Loke Nath Chuckerbutty, a teacher, points out this anomaly in the provisions of the Bill. Suppose the rent of an ordinary ryot is enhanced to the maximum rate provided in the Bill, namely, five-sixteenths of the value of the produce. He continues to hold the land for upwards of 12 years, and acquires a right of occupancy, would he continue paying the five-sixteenths rate? The Baboo considers the five-sixteenths rate too high.

Bogra.—Abdoos Soobhan Chowdree, zemindar, thinks that an occupancy ryot would gain too much advantage by being allowed to sub-let at so much profit, himself paying one-fifth and realizing five-sixteenths of the value of gross produce from the sub-tenants.

Rungpore.—Some propose that the maximum rate of rent for occupancy ryots should be increased from one-fifth to one-fourth of the value of produce, but the Collector, Mr. Newbery, does not agree with them. As regards the other class of ryots, he is of opinion that their maximum rate should not also be more than five-sixteenths or 30 per cent. of the value of produce.

Julpigoree.—Baboo Taruck Nath Mullick thinks that the restrictions under which the rent of an ordinary ryot is enhanceable and the limit, are unfair to the landlord.

Darjeeling.—Mr. Wace thinks the one-fourth limit originally proposed was fairer than the one-fifth mentioned in sections 59 and 75. Section 76 would prevent the higher limit working oppressively.

Ordinary Ryots—Chapter VIII, sections 88 to 95.

Dinagepore.—Mr. Tute strongly objects to the principle which underlies the provision of section 93, which he thinks has been borrowed from the Irish Land Bill. It would simply be the deliberate creation of a right which has hitherto never existed, and which would deprive the landlord of a part of his property.

Rajshahye.—According to Baboo Loke Nath Chuckerbutty, ten times the yearly increase provided in section 93 (*b*) as compensation is exorbitant.

Pubna.—The Collector quite approves of the provision about compensation for ejectment, as he thinks a reasonable amount of protection should be afforded to every class of ryot. It is not clear whether an under-tenant can under the Bill acquire rights of occupancy, but it is desirable that he should.

Bogra.—Abdoos Soobhan Chowdree thinks that sub-tenants should be permitted to acquire occupancy rights which he might enjoy as long as the superior tenant retained the same.

Julpigoree—Baboo Taruck Nath Mullick thinks sections 88 to 95 would injuriously affect the interests of the landlord.

Darjeeling.—Mr. Wace says :—

CHAPTER VIII.

Seems to me unduly hard on the landlord in two respects. Section 93 (*b*) provides for compensation for disturbance amounting to ten times the yearly increase of rent demanded. I think this should be the maximum, and that it should be at the discretion of the court to award less, the guide being the number of years that the ordinary ryot has held the land. I do not see why a man, who has held land for two years only, should get the same compensation as a man who has held it for eight. Then in section 95 it seems to me hard that because a decree becomes void under section 94, the landlord should be barred from all enhancements for ten years. That he should be barred for that time, if he gets his claim, is fair enough, but circumstances might prevent him from paying the compensation awarded under section 93 within the very short time fixed, and a failure to do so should not, I think, tie his hands for longer than five years at the outside."

CHAPTER IX.

Chapter IXc, section 100 (4) and section 102 (1).—The double penalty seems to me unnecessarily severe. If the payment, for which an informal receipt is given, did not clear the ryot to the date thereof, the landlord forfeits by reason of the informality all balances really due in excess thereof. This is surely quite sufficient without a fine. If the payment really cleared all dues to date, the informality does not matter to the ryot, because he can at the end of the year get a statement of account, and recover a penalty under 102 (2) for refusal thereof. Anyhow might not the loss of real dues entailed by section 100 (4) be deducted from the penalty under section 102 (1), if it is considered necessary to maintain both provisions. It should be remembered that a landlord has often careless and occasionally disaffected servants. Imagine the trouble a gomashta, who was to be turned out at the end of the year, might bring on his master under these sections without any fault of the latter. Surely some provision should be added to provide for such cases. The power to recover damages in the Civil Court from such a servant would be a poor remedy."

CHAPTER IXD.

I hope Government is prepared either to increase the establishments of all revenue officers and treasuries, as a result of the extension of the power to deposit or to create new offices for the purposes of dealing with the applications which will be made. There can be little doubt that the rush on the public offices, whatever they may be, will be great; and I would advise that, as some sort of check, section 107 be expunged. A tenant is not likely to pay anything, unless he knows it to be due to somebody; why then should he get it back at the end of three years. If it were allowed to lapse to Government after that period, the receipts might go towards covering part of the expenditure, to which Government will undoubtedly be committed by these provisions in the tenants' favour.

CHAPTER IXE.

Section 109.—I would add at end of the proviso "on such damages." I do not see why a landlord should not be allowed from a really recusant tenant both interest on his dues and damages.

Julpigoree.—Baboo Taruck Nath Mullick says section 102 (1) is a re-enactment of the existing law on the subject, and sub-sections 2 and 3, though new, are not open to any grave objection, sections 103 to 107 are generally fair, and require no modifications.

Rungpore.—Mr. Newbery would distinctly insert the fee "khurrutcha" in section 123, instead of including it in the words "other like appellations."

Improvements on ryots' holdings, and compensation therefor—Chapter X, sections 126 to 132.

Bogra.—Abdoos Sobhan Chowdree considers the provision of section 129 objectionable, inasmuch as it makes the landlord liable to pay compensation even if the tenant is ousted for wilful non-payment of rent.

Julpigoree.—Baboo Taruck Nath Mullick does not see anything objectionable in these sections.

Darjeeling.—Mr. Wace says :—

"CHAPTER XA.

"The provisions seem to me judicious and fair, but, with reference to section 126, sub-section (2) is not, I suppose, meant to be exhaustive? It includes what is mentioned, but does not, I presume, exclude such improvements as the planting of fruit trees, bamboos, &c."

CHAPTER XB.

I do not see that the power to measure rent-free land, which paragraph 92 of the statements says it is intended to give, accrues on the section as worded. The "which" therein might as well apply to the "lands" as to the "estate" or "tenure."

The Procedure for the recovery of rent—Chapter XIII.

Dinagepore.—There should be some summary procedure to enable the zemindars to realize rents from the ryots. It is also desirable, in view of the very long time which a civil court takes to dispose of a rent suit, to revert to the old procedure under which revenue officers could decide simple rent-suits, and they are more competent for it than moonsiffs.

Bogra.—Radha Raman Moonshee, zemindar, thinks that there should be some easier means for the landlord to realize the rent from the tenants.

Julpigoree.—Baboo Taruck Nath Mullick is of opinion that the provisions of Chapter XIII are decided improvement on the existing law on the subject, and they would prevent an unscrupulous landlord from harassing his ryots.

Pubna.—The pleaders object to the restrictions on distraint, paragraph 3 (6).

Darjeeling.—The provision of Chapter XIII is a judicious compromise between contending parties, but it would be better if applications for distraint were made to revenue officers whose proceedings are prompter than those of the civil courts.

ENCLOSURE No. 2.

There is one point in which the bearing of this Act on the Hill Tract, should it be extended to Darjeeling under the Scheduled Districts Act, has to be considered. You are aware that a portion of most tea estates is cultivated with native crops by the labourers of the estate, no rent is charged for the little plots these men hold: the plots really represent part of the wages of labour. There is, however, no doubt that on the older tea gardens there are many men who have cultivated land for 12 years or more thereon. I presume that in the land allotted to labourers under these circumstances, no rights of occupancy could accrue, and that the holding of the labourer would not be considered the holding of a raiyat under section 45 (1). I state the case, because there is no definition of a "raiyat" in the Act, though I presume that payment of rent is necessary to constitute such a relation, and because the land I have described scarcely falls within the definition of "khamar land" as given in section 5, and section 6 declares that all land, not khamar, shall be deemed "raiyati." The tenure described might perhaps be brought within the scope of section 4 (9) as a service-tenure, and thus be unaffected by the Act; but I would draw your attention to the definition of the word "tenure" in section 3 (3), and would suggest the addition of the word "tenancy" in section 4 (9). Tenancy meaning the holding of a "tenant" [section 3 (8)].

6. Considering now the Act with reference to that tract which it will chiefly affect, viz., the Terai, I have to make the following observations:—Chapter I. It seems to me that, as it stands, it will work a revolution there in one respect: our jotedars will, on the wording of section 3, become "proprietors"; each of the Terai jotes is entered in the registers maintained under Act VII of 1876 (B.C.) I may state briefly the history of this proceeding. Mr. Edgar, in this office No. 324, dated 24th November 1876, with reference to the introduction of that Act, remarked—"It appears clear that the Terai jotes are revenue-paying estates." You stated the case to the Board in your No. 788, dated 28th February 1877, giving it as your opinion that "all these tenures in Government tracts of land held khas should be treated as tenures." The Board accepted this view in their No. 703A, dated 16th March 1877, and declared that "the Terai jotes should not be registered under any circumstances as estates." Mr. Edgar then recommended that, though recognised as "tenures," they should be dealt with under clause *c*, paragraph 2, section 3, of Act VII of 1876 (B.C.) *vide* paragraph 6 of this office No. 185, dated 16th June 1877). You supported this suggestion, and the Board in their No. 287A, dated 7th July 1877, ruled that the 808 jotes of the Terai should be "dealt with under clause *c*, paragraph 2, section 3, each jote being treated as a separate Government estate, and entered in Register A." As the definitions, therefore, now stand in section 3 of the Draft Act, our jotedars are "proprietors," for, according to the definition of their rights in the Terai pottah, they seem to me to "own" their jotes.

7. Now so far as their relations with Government are concerned, the Act will make no difference. Section 4 saves "enactments regulating procedure for realization of rents in estates belonging to Government." It is in the position of their sub-tenants that the alteration of their status involved in the definition alluded to would make the difference. Their sub-tenants are known by the names of "ticcadars" or "mallandars" and "adhyadars." The ticcadar tenure of the Terai must not be confounded with that of Behar and the rest of Bengal. The ticcadar is really an "under-raiyat," the "kurfa" of the greater part of Bengal. The "adhyadar" gets a share of the crop, generally half of it, in consideration of his labour throughout the year. He is practically a farm labourer, the jotedar supplying seed, cattle, and implements.

8. If our jotedars are raiyats, their ticcadars cannot be recognized, either at once or hereafter, as occupancy or settled raiyats, for they will fall within the definition of "under-raiyat," and there is no such established custom as would give them as such a right of occupancy under section 4(*a*), and the illustration attached thereto. On the other hand, if the Act stands as it is, our jotedars become "proprietors," and the majority of their ticcadars will become occupancy or settled raiyats.

9. If it should not be the intention of Government to give our jotedars the position of "proprietors," then an alteration of section 3 is necessary, so as to make "estate" applicable only to lands registered under clauses *a* and *b* of paragraph 2 of section 3 of the Land Registration Act. The question should, to my mind, be decided with reference chiefly to the interest of the under-tenants. Although it has been the fashion in the past to deny that the sub-tenants of Terai jotedars have any occupancy rights, I believe that even under the Acts now in force such rights have been acquired, were this class only in a position to assert them. But anyhow it would be entirely in accordance with the spirit of the new Act to recognize the majority of these men as settled ryots. Let us then by all means call our jotedars proprietors, if this is the only way of making their subordinates "raiyats." If, however, it can be held on the Act as worded, or as it may be altered, that the jotedar is a "tenure-holder," and that his ticcadar may be a raiyat under him, I think it would be more consistent with the history of the registration of jotes, as stated above, and with actual facts, to call the jotedars "tenure-holders," and to make the alteration in the definition of "estate," which I have suggested.

10. It will perhaps facilitate the settlement of this question, if I give the following particulars as to the position of our jotedars. The settlement papers show them to be 782 in number, and the total assessed area being 123,670 acres. The average size of a jote may be taken as 158 acres. About 163 of the jotes are held by absentees, and these are generally sublet to ticcadars, who again sublet what they cannot cultivate themselves to dur-ticcadars. Few of the resident jotedars are in a position to cultivate the whole of their jotes, and what they cannot manage either by their own or a dhyadar's labours, they sublet to ticcadars.

11. If the jotedar can be held to be a "tenure-holder," perhaps the simplest way out of the difficulty I have exposed would be to add at the end of section 3 (4) the following words :—"The registration of a 'tenure' under clause (c) of paragraph 2 of section 3 of the Land Registration Act VII of 1876 (B.C) shall not thereby constitute it an estate within the meaning of paragraph (1). Possibly this difficulty may have arisen in other districts with reference to large holdings similar to our Terai jotes. I can, however, only suggest an amendment which will suit the circumstances of this district.

12. Anyhow, it seems to me doubtful whether the bearing of the definitions now given, or the position of kurfa raiyats in Government estates, has been fully considered. There must surely be lands in Julpigorie, Noakholly, and Chittagong, if not elsewhere, held by men of substance, who are above the position of what I presume the Act means by a "raiyat," and whose sub-tenants, even if they have not already acquired occupancy rights, should at least now be given the benefit of sections 44 and 45 of the Draft Act. I cannot but think it a mistake that a positive definition of the word "raiyat" has not been attempted.

CHAPTER II.

13. What I have said above as to the Act, as now worded, making the Terai jotedars "proprietors," must be borne in mind also with reference to the definition of "khamar" land. If they do get this status, no occupancy rights are likely to accrue after the passing of this Act in lands to which jotedars now apply their own seed, cattle, and implements, even though the labour by which these are worked be not theirs, but that of adhyadars. This seems to me an additional reason for wording the Act, so as to make them tenure-holders only. I must declare myself in favour of the general principle involved in this chapter, viz., the disability of the proprietor to increase, after the passing of this Act, the existing stock of "khamar" land so far as large proprietors are concerned.

14. The provision, however, would in my opinion work hardly against petty proprietors and lakhrajdars, and I should be glad to see it altered so as to protect them. It must be considered with section 56, and I beg that what I urge against that section may be read with the following remarks. I sympathise with the desire to prevent the unwarranted extension of zerat lands in Behar beyond what is necessary for the purposes of the "malik," and often entirely in the interests of an indigo planter holding a temporary lease of the village, but I do think it hard that in consequence of the scandals of past years in one division of this province, the hands of poor men in the other divisions should be tied, and their means of subsistence curtailed. The provisions of the law are strong enough to protect a settled and an ordinary ryot from arbitrary ejectment, but if an owner of a small property does in any legal way got possession of "ryoti" land, it would be a grievous hardship to prevent him from doing as he liked with it. He might be able to make more of it by cultivating it himself than by letting it, especially if the letting could only be on the terms of section 56. No one with any knowledge of mofussil life will deny that among the class of proprietors, as defined in section 3, there are numerous persons whose circumstances are harder than many of the raiyat class in whose interests these sweeping proposals are made, and to sacrifice them on account of the grasping propensities of wealthy maliks and planters in Behar would be a gross injustice.

CHAPTER V.

16. The bearing of the definition of the word "estate" in section 3 on the Terai jotes must be again borne in mind here. If the definition is left as it is, and the "jote" is an "estate," which is to be taken as the area within which the continuous holding of section 45 must take place—the village or the estate? The 782 jotes are comprised within 13 mouzahs, and the average size of a jote is, as I have said, only 158 acres. If the area is taken as the "mouzah," A having held a portion of jote 604 in mouzah Talas continuously for 12 years, may, if he gets a footing as a ryot in jote 605 in the same mouzah next year, set himself up as a settled ryot in jote 605 also The difficulty remains the same even if the Act is altered, so as to make a jote a tenure, and not an estate. Then the area would clearly be the mouzah, and it seems to me rather hard that, in the case above quoted, A should merely, by reason of his position in jote 604 belonging to B, jump suddenly into the status of a settled ryot. As regards land acquired in jote 605 belonging to C, you may say it is C's own look-out if he lets A into jote 605, so it is; but it seems to me a great mistake to put obstacles in the way of C letting his land to a man like A, who, from his status in jote 604, would probably be an infinitely better tenant and a better subject of Government than the squatter whom C would be compelled to get hold of if he could not let the land to A.

17. This, of course, is one corollary of the words "notwithstanding any contract to the contrary." But for these words C would be able to say to A, "I will let you the land in jote 605, on condition that your status as a settled ryot in jote 604 does not extend to my jote." I entirely sympathise with the object with which these clauses are inserted, as stated in paragraph 33 of the "statement," but, as it stands, it seems to me to go too far. The difficulty might perhaps be surmounted by a proviso to section 45, declaring that the contract alluded to in sub-section shall be a contract between the raiyat and the owner of the village or estate within which the status of a settled raiyat has been acquired, sub-section (b) of section 43 would prevent this proviso working unfavourably against raiyats of an estate which has been partitioned. There must be in every district parallel cases to that now put. For instance, why should Z, who may in respect of the mal land in a mouzah be fairly considered a settled raiyat, assume the same position against X, a lakhirajdar, if the latter thought fit to let to him part of his lakhiraj holding. The principle for which I contend is the same as that involved in the proviso of section 57.

Comdg. 1st Battn., Rifle Brigade.

BOARD OF REVENUE.

NOTIFICATION.

Calcutta, the 27th September 1883.

No. 1135½ *B.*—The following rules have been made under section 9 of Act VIII of 1878 by the Board of Revenue, Lower Provinces, with the sanction of the Local Government, and are under Section 204 of the same Act notified for general information :—

CALCUTTA INTERNATIONAL EXHIBITION, 1883-84.

Custom House Arrangements.

1. All entries of goods for the Exhibition must be passed at the Custom House in accordance with the arrangements made by the Collector of Customs.
2. In respect of dutiable goods the Exhibition building is appointed a public warehouse under the provisions of section 15 of Act VIII of 1878, of which Mr. Jules Joubert shall be deemed to be the keeper for the purposes of section 96 of that Act.
3. Packages containing dutiable goods, upon which duty has not been paid, must be entered for bond and appraised and taken in charge of an officer to the Exhibition building in the usual manner. Pending appraisement and removal to the Exhibition building, all such packages will be allowed to remain rent-free in a portion of the Custom House premises set apart for the purpose.

4. At the close of the Exhibition, exhibitors will have to account to the Custom House authorities for all dutiable goods admitted into the Exhibition in accordance with the bond bill of entry. Goods intended for delivery in Calcutta on sale or otherwise will on payment of duty be cleared from bond, and goods intended for re-exportation will be re-shipped from bond in the usual manner.

5. The charges mentioned in the schedule attached to these rules are remitted in respect of goods intended for the Exhibition.

6. No duty will be payable for wines, spirits, or other liquors consumed in the Exhibition for tasting or judging purposes, and a certificate of the amount thus consumed must be obtained from the Secretary to the Executive Committee of the Exhibition and presented by exhibitors to the Custom House officer when accounting for the dutiable goods admitted into the Exhibition. Without such certificate duty will be assessed on all dutiable goods shown by the bills of entry as having been admitted into the Exhibition and which are not forthcoming at its close.

7. The Custom House officers will not have custody of, or be in any way responsible for, goods in the Exhibition building, the custody of which as a public warehouse will rest with Mr. Jules Joubert.

8. These rules apply only to goods intended *bonâ fide* for Exhibition.

SCHEDULE.

HENRY F. BLANFORD,
Meteorological Reporter to the Government of India.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The "Indian Law Reports," published under the authority of the Governor General in Council, will appear in monthly parts, published as soon as possible after the first of each month at Calcutta, Madras, Bombay, and Allahabad, and will comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court will be reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court will be reported in the Calcutta Series. The Parts of each Series can be had separately, or all four Parts can be had stitched into one wrapper at the option of subscribers and purchasers. It will be observed from the following statement of the terms of subscription and sale, that a considerable reduction is allowed to persons taking the complete set :

Terms of subscription, payable annually in advance.

	Without Postage.	With Postage.
For the CALCUTTA SERIES	R35	R37-8
„ MADRAS SERIES	„ 8	„ 9
„ BOMBAY SERIES	„ 8	„ 9
„ ALLAHABAD SERIES	„ 8	„ 9
Complete set	„45	„47-8

The price of each Part purchased separately will vary according to the amount of matter it contains, and will be printed on the wrapper. It will, however, never be below the following:—

For a Part of the CALCUTTA SERIES	R3	8
" " MADRAS SERIES	" 1	0
" " BOMBAY SERIES	" 1	0
" " ALLAHABAD SERIES	" 1	0
Complete set	" 4	0

Persons desiring to subscribe for or purchase the Reports, should apply to—
MESSRS. THACKER, SPINK AND CO., CALCUTTA;
MESSRS. THACKER AND CO., BOMBAY:
MESSRS. HIGGINBOTHAM AND CO., MADRAS;
THE GOVERNMENT CENTRAL BOOK DEPOT, BOMBAY,
THE GOVERNMENT BOOK DEPOT, ALLAHABAD.

Orders and Subscriptions for 1875 should be at once remitted.

THE BENGAL LAW REPORTS.

A few sets of the Bengal Law Reports (Volumes 1 to 15) are available at Messrs. Thacker, Spink & Co., Calcutta, at R375 a set.

For sale in Rajputana to Officers stationed there.

Advertisements and Notices by Private Individuals and Corporations.

IN THE COURT OF THE JUDICIAL ASSISTANT COMMISSIONER, LAHORE.

IN THE MATTER OF THE INDIAN COMPANIES ACT, 1882, AND OF THE PUNJAB BANK, LIMITED.

Upon the application of the Official Liquidator, notice is hereby given that the Court will, on the 16th day of October 1883, proceed to pass orders in reference to the distribution of the remaining assets of the Punjab Bank, Limited.

The more immediate question for disposal is whether depositors are entitled to interest; or whether (depositors having been paid the amount of their respective deposits in full with interest to 30th June 1877) the whole of the surplus assets should be divided amongst the shareholders.

All persons concerned are desired to attend this Court on the above date, and to bring forward anything they may have to state in regard to the above question.

The 14th June 1883.

NOTICE.

Probate of the last Will and Testament and Codicil of Hannah Anne Rose, formerly of No. 5, Lindsay Street in Calcutta, in Bengal, formerly the wife and afterwards the widow of Captain Patrick Orr, deceased, and afterwards the wife and widow of William Grant Rose, deceased, and late of the Town of Newport, in the Isle of Wight in England, deceased, was on the 8th day of September 1883, granted by the District Judge of Lucknow to Arthur Benoni Sutherland, Esq., of No. 1, Commercial Buildings, in Calcutta, the sole executor named in the said Will to whom all parties claiming to be creditors of the estate of the said deceased are requested to send in their respective claims, and all parties indebted to the said estate are required to make payment of their respective debts.

BARROW & ORR,
Attorneys for the Executor.

6, OLD POST OFFICE STREET,
CALCUTTA
The 24th October 1883.

SUPPLEMENT TO

The Gazette of India.

Nº 43.} CALCUTTA, SATURDAY, OCTOBER 27, 1883.

OFFICIAL PAPERS.

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known.

Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of six Rupees per annum if delivered in Calcutta, or nine Rupees if sent by Post.

No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.

C. GRANT,
Secretary to the Government of India.

DEPARTMENT OF FINANCE AND COMMERCE.

NOTIFICATIONS.

Simla, the 31st October 1883.

No. 4050.—Whereas under the terms of Notification in the Department of Finance and Commerce, No. 3646, dated the 13th November 1880, the Commissioners for making improvements in the Port of Calcutta have paid Rs. 3,875 as composition for the stamp duty chargeable on a sum of Rs. 7,75,000, which has been raised by the said Commissioners, by the issue of the undermentioned debentures bearing date the 1st April 1883 :—

	Rs.
502 to 531 for Rs. 5,000 each	... 1,50,000
532 to 631 for " 1,000 "	... 1,00,000
632 to 731 for " 500 "	... 50,000
732 to 746 for " 5,000 "	... 75,000
747 to 756 for " 10,000 "	... 1,00,000
757 to 856 for " 1,000 "	... 1,00,000
857 to 876 for " 5,000 "	... 1,00,000
877 to 1076 for " 500 "	... 1,00,000
Total	... 7,75,000

Therefore, in exercise of the powers conferred by Section 8 of the Indian Stamp Act, 1879, the Governor General in Council has exempted the abovementioned debentures from the payment of any stamp duty with which they might otherwise be chargeable, whether on issue, renewal or sub-division.

No. 4100.

ORDER—By the Government of India, Department of Finance and Commerce.

Read the following :—

FINANCIAL; INDIA OFFICE;
No. 280. *London, 27th September 1883.*

To—His Excellency the Most Hon'ble the Governor General of India in Council.

MY LORD MARQUIS,—I forward herewith a copy of the report of the Deputy Master of the Royal Mint, dated the 7th of September 1883, on the pyx coins of the Calcutta and Bombay Mints issued in 1882, from which you will observe that the "Standard weight and fineness of the coins have been maintained with the usual approximation to accuracy.

I have, &c.,
(Sd.) KIMBERLEY.

ROYAL MINT;
7th September 1883.

To—The Secretary, Treasury.

SIR,—The examination of the pyx coins of the Indian Mints, transmitted to me by direction of the Lords Commissioners of Her Majesty's Treasury on the 17th ultimo, being completed, I have the honour to forward herewith a report on the weight and fineness of the coins, and to return the bullion remaining.

No. 14758-83.

CALCUTTA MINT.	
Gold.	oz.
Fine	·350
Silver.	
Fine	7·759
Standard	13·159
	20·918
BOMBAY MINT.	
Silver.	oz.
Fine	6·230
Standard	9·907
	... 16·137

The coins were first weighed singly by the Mint balance and were then handed to the Assayer of the Mint, by whom each coin has been separately assayed and reported upon.

The standard weight and fineness of the coins have been maintained with the usual approximation to accuracy.

In accordance with the directions of Their Lordships, I have caused parting assays to be made of the silver coins of each Presidency, in order to ascertain the average proportion of gold contained in them, and the result is shown in my report. These assays have been made in the manner detailed in my report of the 25th of October 1869.

I am, &c.,
(Sd.) C. W. FREMANTLE.

Memorandum of the weight and fineness of coins issued from the Indian Mints in the year 1882.

Mr. H. A. D. Wathen, Assistant Engineer, 2nd Grade.

The 31st October 1883.

No. 258.—Public Works Department Notification No. 173, dated 18th July 1883, appointing Major R. P. Tickell, R.E., Executive Engineer, 1st Grade, North-Western Provinces and Oudh, to officiate as Superintending Engineer during Major Harrison's absence on privilege leave is cancelled.

No. 259.—The services of Mr. C. V. MacIvor, Executive Engineer, 2nd Grade, Railway Branch, are, on his return from furlough, placed at the disposal of the Director General of Railways.

No. 260.—With reference to Public Works Department Notification No. 231, dated 16th October 1883, the services of the following Assistant Engineers, 2nd Grade, State Railways, are placed at the disposal of the Local Governments and Administration and of the Director General of Railways, as noted below :—

Madras.

Mr. C. S. Killick.
„ G. T. Thompson.

North-Western Provinces and Oudh.

Mr. W. J. Weightman.
„ J. C. Mills.
„ S. G. Batten.
„ W. D. Barrow.

Assam.

Mr. J. A. A. Wallace.

Director General of Railways.

Mr. L. A. Light.

The 1st November 1883.

No. 261.—Mr. J. Y. Davidson, Class II, State Railway Revenue Establishment, Manager of the Nagpur-Chhattisgarh and Wardah Coal Railways, is granted seven months' furlough to Europe, with ten days' subsidiary leave.

No. 262.—Mr. J. Conder, Class II, State Railway Revenue Establishment, Traffic Department, is, on return from furlough, appointed Officiating Manager of the Nagpur-Chhattisgarh and Wardah Coal State Railways.

No. 263.—With reference to Bombay Government, Public Works Department, Notification No. 30, dated 20th October 1883, the services of Mr. W. Drew, Assistant Engineer, 2nd Grade, are placed at the disposal of the Director General of Railways.

No. 264.—Mr. I. S. Hubbard, Deputy Examiner, is, on return from furlough, posted to the Office of Examiner of Public Works Accounts, Bengal.

Mr. W. H. Brand, Examiner, is transferred from the Office of Examiner, Public Works Accounts, Bengal, to that of the Examiner, Public Works Accounts, North-Western Provinces and Oudh, to join after arrival of Mr. Hubbard.

No. 266.—The services of Lieutenant-Colonel H. J. Nuthall, Executive Engineer, 1st Grade, Railway Branch, are, on his return from furlough, placed at the disposal of the Director General of Railways.

The 2nd November 1883.

No. 267.—The following promotions are made in the Public Works Department, Railway Branch :—

Names.	From	To	Date.	Nature of promotion.

TELEGRAPH.

The 31st October 1883.

No. 257.—Mr. R. Boteler, Superintendent, 4th Grade, Indian Telegraph Department, is appointed to officiate as Superintendent, 3rd Grade, with effect from the 6th October 1883, and until further orders.

The 1st November 1883.

No. 265.—The following Revised Rules and Rates for Inland Telegrams are published for general information :—

Rules and Tariff for Inland Messages.

Rules and Tariff, relating to the transmission of Telegraph Messages in India, sanctioned by the Governor General of India in Council, with effect from the 1st December 1883.

GENERAL.

***Rule 1.*—The accuracy of messages is not guaranteed, and the Sender and Receiver must accept all risks arising from non-delivery, errors or delays.**

Rule 2.—Telegraph Stations are divided into three classes, *viz.* :—

Class of office.	General working hours (local time).	Special working hours (local time) on Sundays, Christmas Day, New Year's Day, Good Friday, and the Queen's Birthday.
I.	Day and night ..	Day and night.
II.	7 A.M. to 9 P.M.*	7 to 9 A.M., and 4 to 9 P.M.
III.	10 A.M. to 5 P.M.*	7 to 9 A.M., and 4 to 6 P.M.

* These hours are subject to modification to suit local requirements.

In cases of life and death, or of extraordinary emergency, a message countersigned by the Chief Civil or Military Authority at a Station, or by any of the Authorities empowered to "clear the line" (see Rule 40), can be sent from any Office at any time.

Exception in favor of emergent telegrams signed by competent authority.

Rule 3.—Senders of messages are advised to write their messages in an unmistakable and distinct hand.

Messages should be legibly written.

ACCEPTANCE OF MESSAGES FOR TRANSMISSION.

Rule 4.—Messages are accepted at all Post Offices. Where the Post Office is unconnected by wire, the messages are despatched by first post "registered" to the nearest Telegraph Station without extra charge. Post Offices which accept and despatch messages by wire are called "Combined" Offices: Post Offices unconnected by wire are called "Receiving Offices."

Acceptance of messages at Post Offices.

Rule 5.—No message or messages of more than five hundred words can be sent at any one time by any private individual or firm, and no second messages by the same individual or firm till after the lapse of three hours, unless the lines be free and not required by any one else.

Limit to length of messages.

Rule 6.—All messages must be legibly written in the Roman character or in Arabic figures: subject to the above limitation, messages may be sent in the vernacular, or any foreign language, or in cipher, if written in Arabic numerals.

Messages must be in the Roman character or Arabic figures.

At Telegraph and Post Offices in Stations other than the Presidency Towns, every assistance possible is afforded to natives in the translation of messages into English, and *vice versâ*.

Messages translated for natives

Rule 7.—The body of the message must be preceded by the *address* (as defined in Rule 18). The true signature and address of the Sender must always be written at the foot of the message.

Form to be followed.

The Sender of a private message can always be called upon to prove that the signature attached to it is genuine.

Verification of signature to private messages may be insisted upon.

Rule 8.—The address must contain all the information necessary to ensure the delivery of the message at its destination, and the Sender in all cases supports the consequences of insufficiency of address. After the message is once despatched, it can neither be cancelled, completed, nor rectified, except by the despatch of a fresh *paid* message.

Full address necessary.

Rule 9.—Every interlineation, reference, erasure, or alteration of words must be authenticated by the Sender of the message, or by his representative.

Authentication of corrections necessary.

Rule 10.—Messages from places where there is no Telegraph Station should be tendered at the local Post Office with cash or with postage stamps, in which case the Post Master will grant a receipt for the amount, or they may at the option of the Sender be addressed to the nearest Government Telegraph Office by post registered, together with Telegraph or Postage stamps sufficient for their payment, in which case a Receipt for the amount will be posted free to the Sender.

Messages sent by post to telegraph stations for transmission.

In the case of a message sent by Post to a Telegraph Station with an insufficient number of stamps, the excess charge will be recovered from the addressee.

Treatment of messages received by post for transmission insufficiently stamped.

Rule 11.—Messages can be addressed to places where there are no Telegraph Stations. In such cases, the Sender must state (free) from what Telegraph Office delivery is to be effected.

Messages addressed to non-telegraph stations.

Example.—"To Sherghotty, Post Burhee."

No charge will be made for ordinary *Inland* postage, or for registration, but postal registration is compulsory in the case of messages which have to be posted in India to places beyond Indian limits, and in such cases both the postage and registration fees* must be prepaid by the Sender.

Rule 12.—With the following exception, all charges for messages must be prepaid in cash or in stamps:—

"Bearing" messages.

Messages are sent "bearing" from Sea-ports when received for despatch by mail steamers or other vessels, but no such message, whether "prepaid" or "bearing," will be received for transmission until the name of the vessel has been made known. *Bearing messages will not be delivered to the Addressees until after payment has been obtained.*

Rule 13.—All charges on telegrams tendered at Government Telegraph Offices are prepaid in Telegraph Stamps, which are procurable at every Treasury and every Government Telegraph Station.

Use of Stamps.

Telegraph stamps are double-headed, the object being that the *upper half* shall be returned on the Receipt (whereby the Sender receives a guarantee that his message has not been suppressed for the sake of the stamps), and the *lower half* shall be affixed to the message as voucher to Government that it has been prepaid.

Form of stamp provides a guarantee to the Sender and to Government.

The Senders of messages should be careful to affix their Telegraph stamps on the spaces left blank for the purpose on the message forms, *the upper half on the Receipt, the lower half on the message*, and to see that the stamps are defaced with the office stamp which bears the name of the station and the date.

Stamps to be properly affixed to the forms.

Telegraph stamps cut in two, before being sent into a Telegraph Office, or which are in any way defaced, discolored, or damaged, cannot be accepted.

Cut or defaced stamps cannot be received.

Application for the refund of the value of such stamps, accompanied by particulars of the way in which the stamps became damaged, may, however, be made to the Telegraph Check Office, Calcutta, which will ordinarily comply with the application when no doubt exists that the damaged stamps are genuine, and that the damage was not caused intentionally.

---

* 8 annas.

At "combined offices" (see Rule 4) telegrams can be prepayed in postage stamps.

Forms obtainable *gratis* at all stations.

Proper forms on which to write messages are available *gratis* at all Telegraph Stations and Post Offices, and *Senders are requested to use these forms only*.

Charges on *State* messages.

Rule 14.—State messages from all Public Functionaries must be paid for in cash or in stamps prior to despatch; the rates are the same for State messages as those charged to private individuals. This Rule will be relaxed in case of great emergency: *whenever an 'urgent' State message is tendered for despatch under this permission, the Sender must take the necessary steps to ascertain the charges on it, and pay them into the Telegraph Office within 24 hours.*

State messages take their turn for despatch with private, urgent or deferred messages.

Rule 15.—State messages not marked "urgent" will be treated as "deferred" (*see Rule 19*): they take their turn for despatch with "urgent" and "deferred" private messages according to the order in which they were tendered.

No unpaid messages to be despatched under penalty.

Rule 16.—No unpaid messages, except those specified in the Departmental Regulations, shall, on any account, be transmitted. A violation of this rule will subject the Signaller or Telegraph Master in charge of the station from which a message is improperly despatched to dismissal from the public service.

Objectionable messages to be refused acceptance.

Rule 17.—Telegraph Masters are required to refuse to transmit a message which may be of a decidedly objectionable or alarming character. Should the character of a message be open to doubt, the matter shall be referred to a Secretary to Government, if the message be tendered at the seat of Government, or the Chief Civil or Military Officer, if at a provincial station.

CHARGES.

Rule 18.—*No charge is made for the transmission of the Address.*

Free address.

The "Address" includes names of stations from and to which the message is to be despatched, the *bonâ fide* names or designations* of the Sender and Addressee, and the *latter's* address. No other words can be transmitted unless paid for as part of the body of the message, and the officers of the Telegraph Department are authorised to omit from the address any words which are not essential to the correct delivery of the message.

If the Sender of a message desire *his own* address to be telegraphed, it must be included in the body of the message, and paid for.

Charge for a message.

Rule 19.—The following are the rates of charges for a message:—

(*No charge is made for the transmission of the address.*)

	Local messages,—*i.e.*, those tendered during the working hours of a Telegraph Office for transmission in ordinary course within a radius of six miles of a Central Government Telegraph Office.		*Deferred* messages,—*i.e.* those tendered during the working hours of a Telegraph Office for transmission at night and to be delivered at destination early on the following morning.		*Ordinary* messages,—*i.e.*, those tendered during the working hours of a Telegraph Office for transmission and delivery in ordinary course.		*Urgent* messages.—*i.e.*, those tendered during the working hours of a Telegraph Office for immediate transmission with precedence over ordinary messages.	
	First eight words or groups of three figures.	Each additional eight words or groups of three figures	First eight words or groups of three figures.	Each additional word or group of three figures. Between any two stations in India	0 4	0 4	0 8	0 1	1 0	0 2	2 0	0 4

Messages despatched to and from railway stations without extra charge.

Rule 20.—A message can be sent from any Station of the Government Telegraph Department to any Railway Telegraph Station, or *vice versâ*, without additional charge.

APPLICATION OF CHARGES.

Rule 21.—The maximum length of a word is fixed at six syllables; the excess is counted as a word.

No unusual abbreviations or combinations permitted.

Rule 22.—Messages must not contain any unusual combinations, abbreviations, or constructions. Any word in common use, which, although requiring two words to express it, is generally recognised as one word, is charged as one word when so written; when the two parts are not joined by a hyphen or apostrophe, and when of, or less than, six syllables. "Halfpenny," "Twopence," "Threepence," &c., up to "Elevenpence," when written as a single word, count as one word only. "F. O. B.," "C. F. I.," "A. M.," and "P.M.," when written as separate letters, are each counted as two and three words, respectively, but when written "Fob," "Cfi," "Am," "Pm," as one word.

Words joined by a hyphen.

Rule 23.—Words joined by a hyphen are counted as so many separate words.

* Name and designation cannot both be admitted, *unless it would otherwise be obviously impossible for the Addressee to identify the Sender*.

A message can only be sent in the name of one individual or firm.

Rule 24.—Words separated by an apostrophe are counted as so many separate words. (*This rule does not apply to nouns in the possessive case, as "General's," "Charles'," "Brother's."*)

Words separated by an apostrophe.

Rule 25.—Proper names of towns and persons, names of places, streets, ships, titles, Christian names, prefixes, and qualifications, are counted for the number of words employed by the Sender to express them.

Proper names, titles, &c.

Rule 26.—Every *isolated* character, whether letter or figure, is counted as a word. The same applies to an underline.

Every *separate* character, including an underline, charged as a word.

Rule 27.—Signs of punctuation, hyphens, apostrophes, inverted commas, parentheses, fresh paragraphs, are not counted or signalled, but decimal points, commas, bars of division, &c., *used with figures*, are each counted as a figure and signalled.

Signs of punctuation.

Rule 28.—When numbers are expressed in figures, all the characters, figures, letters, or signs in each group are added together, the total divided by three, and the quotient, plus one for the remainder, if there be any, gives the number of words the group represents. Signs used to separate groups and letters added to figures to form ordinal numbers are counted each as a figure or letter; groups of letters not forming words (letter cipher) cannot be transmitted.

Charges for figures.

Method of counting figures.

Rule 29.—All that the Sender writes in his message to be transmitted to be included in the cost, but the Address of a message, as *defined in Rule 18*, will be transmitted without charge.

All words to be transmitted charged for.

The day, hour and minute (Madras time) of receipt of a message into a Telegraph Office for despatch are in every instance added by the Department *and telegraphed free of charge.* Senders may, however, date their messages if they think fit, but the Sender's date, if given, will be charged for.

Date and time of receipt added by the Department and transmitted free.

Rule 30.—A message addressed to several persons, or to the same person in localities where delivery is to be effected by different offices, is charged for as so many separate messages.

Multiple messages charged as separate messages.

Rule 31.—A message addressed to several persons in one locality, or to the same person at several places of residence in one locality, with or without transmission by post, is charged for as a single message; but a copying fee of four annas, independently of postage, if any, is charged for each destination after the first.

Multiple messages charged as one message.

REPETITION OF MESSAGES.

Rule 32.—The Sender of any message can require that it be repeated. In this case the different stations employed in its transmission collate it as it passes, repeating it to each other integrally.

Collation of message.

Rule 33.—The charge for repeating is equal to half the charge for the message. A repeated message is indicated by the word *"collated,"* which, to ensure the greatest accuracy, is telegraphed (free) both in the official instructions and as the first word of the text of the message.

Charge for collation.

ADVICE OF DELIVERY.

Rule 34.—Any Sender can require that a notice of the time at which his message is delivered be transmitted to him by telegraph. This advice of delivery may be addressed to him at any Station he may name.

Advice of delivery.

Rule 35.—If the message cannot be delivered, the return-telegram indicates the circumstances which prevented delivery, and, if possible, gives the information necessary to enable the Sender to cause his message to reach its destination.

Case of non-delivery.

The return-message has priority in transmission over "ordinary" messages.

Priority of return-message.

Rule 36.—The charge for an advice of delivery or non-delivery is one rupee.

Charge for advice of delivery.

PREPAYMENT OF REPLY.*

Rule 37.—The Sender of a message can prepay a reply, depositing for this purpose a sum not exceeding *ten times* the cost of his original telegram; but the message to which a reply is prepaid must not be addressed to more than one person. On depositing the corresponding sum, the Sender can add (free) the words *"Reply paid"* or *"Answer paid"* and the amount to which he wishes the reply to be limited. The Terminal Station pays to the Receiver, in Telegraph or Postage stamps, or in money, the amount prepaid, leaving it to him to send his answer how, and when, and to what address he pleases, or not to send one at all. The reply, if sent, is considered in every respect as a fresh message.

In the case of a message to which a reply is prepaid addressed to a station where there is no Telegraph Office, the amount is forwarded to destination from the nearest Government Telegraph Office, not in Telegraph stamps, but by currency notes and Postage stamps in an insured cover, the Sender must accordingly prepay the postal insurance fees.

Reply deposits exceeding Rs. 2 in value cannot be received at or delivered from any Railway Telegraph Office, or received at any Postal Receiving Office (see Rule 1). Messages addressed to Stations on Railways to which replies exceeding Rs. 2 in value are prepaid are *posted* with currency notes and Postage stamps enclosed from the nearest Government Telegraph Office, direct to the addressee. In the case of such messages also, the postal insurance fees are payable by the Sender.

Should it be impossible to effect delivery of a *"Reply paid"* message, the Terminal Station sends a Service telegram to that effect to the Sender, and the amount deposited will be refunded on application being made to the Telegraph Check Office, Calcutta. The words *"Reply paid" or "Answer paid" entitle the Addressee to receive the equivalent of the minimum charge only.*

* The Sender of a State message addressed to a Government official may not prepay a reply. And in the case of a State message addressed to other than a Government Official, any sum deposited by the Sender under this rule must be intended for no other purpose than to cover the cost of a return telegram.

It should be distinctly understood that it is not compulsory on the Addressee to send a reply. The duty of the Terminal Station consists simply in paying to him, in Telegraph stamps or in money, the amount prepaid, leaving him at liberty to do what he pleases with it.

DELIVERY.

Rule 38.—"Local" messages will be delivered free of charge within one mile, and other messages within five miles of a Telegraph Station. Beyond this distance messages will be sent by post without charge or by such other means as the Sender may arrange and pay for. Should the addressee of a message (other than a "local" message) have left the Station to which it is addressed, it will, if returned unopened with definite instructions as to the new address, be retransmitted without extra charge.

Free delivery radius.

If the Sender requests it, messages will be delivered open. In this case the words *Deliver open* must be included free in the body of the message.

The Telegraph Department may deliver "deferred" messages through the Post Office of the place of destination.

The messenger who delivers a message may be entrusted with the reply, provided he be not detained for this purpose more than five minutes. The fact of the reply having been given to the messenger, and the amount paid to him, should be mentioned on the receipt given for the original message.

Rule 39.—Any Firm or Individual expecting to receive Inland or Foreign messages can register an abbreviated address at the Government Telegraph Office from which such messages have to be delivered.

Rules for registration of abbreviated addresses.

No abbreviated address can be accepted which has already been registered *locally* by another Firm or Individual.

The fee for registration of *each* abbreviated address is Rs. 10 per annum, payable in advance on the 1st January in each year or Rs. 50 for all time, with a fine of Rs. 5 for every change of address. Abbreviated addresses are considered confidential.

The Department accepts no responsibility in respect of the delivery of any telegram having an abbreviated address if such address has not been registered.

CLEAR LINE MESSAGES.

Rule 40.—On emergent occasions of great importance, the public functionaries named below have the power to "clear the line," that is, to suspend the receipt and despatch of all messages until the one for which the line is "cleared" is passed on :—

(1)—The Governor General of India.
(2)—The Governors of Madras and Bombay.
(3)—Commanders-in-Chief, India, Madras and Bombay.
(4)—Lieutenant-Governors of Bengal, North-Western Provinces and the Punjab.
(5)—Secretaries to the Government of India.
(6)—Secretaries to the Governments of Madras, Bombay, Bengal, North-Western Provinces, and Punjab.
(7)—Chief Commissioners of Oudh, the Central Provinces, British Burma, and Assam.
(8)—Agents to the Governor General, Rajputana, Central India and Biluchistan.
(9)—Commissioners of Sind and Peshawar.
(10)—The Residents at Hyderabad (Deccan) and Mysore.
(11)—Director General of Telegraphs in India.
(12)—The Maharaja of Patiala; *from the Patiala Office only.*

The messages so sent are, however, to be paid for, in cash or in stamps, as other State messages.

REFUNDS.

Rule 41.—No refund will under any circumstances be made for a State message of any class or for a "local" or "deferred" private message; and no refund will be made for an "ordinary" or "urgent" private message delivered wholly or partially in an unintelligible state, unless the extra charge for repetition has been paid by the Sender.

No refund given for State messages or for "local" or "deferred" private messages or for errors in uncollated "ordinary" or "urgent" private messages.

Rule 42.—If an "ordinary" or "urgent" private message be not delivered, or be subjected to serious delay through the fault of the Telegraph Department, the whole charge made for it will be returned to the Sender.

Conditions of refund in the case of non-delivery or delay of private messages.

Rule 43.—Applications for refunds, as also all complaints respecting messages, should be addressed to the TELEGRAPH CHECK OFFICE, CALCUTTA. Such claims for refund should be made, under penalty of rejection, within two months from the date of the message; but this period is extended to six months in the case of a repeated message, or of a message for which a *Reply* or an *Advice of Delivery* has been prepaid. (*When an overcharge has been made on an inland message through the neglect of the Telegraph employés, and when there exists no doubt whatever as to the justice of the claim, the amount overcharged will be repaid at once by the Telegraph Master.*)

CANCELLATION OF MESSAGES.

Rule 44.—If the Sender of an inland message wishes to cancel it before transmission has commenced he can do so, but the charges upon it will not be returned when once the stamps are obliterated. If the message is in course of transmission, or has already been despatched, it can only be cancelled by a paid message from the Sender to the Telegraph Master of the Terminal Station. If in addition the Sender wishes to be informed by telegraph in what manner his request has been acted upon, he must deposit the cost of the return telegram.

Refund not admissible when a message is cancelled at the Sender's request.

OBLIGATION OF SECRECY.

Rule 45.—To secure secrecy as much as possible, all persons (including officers of the Department) not actually on duty are strictly prohibited from entering the Signal-room. Breach of this regulation renders an offender liable to a fine of Rs. 500 under Act I of 1876.

Rule 46.—Violation of secrecy on the part of any person in the Department will be punished by dismissal from office, forfeiture of arrears of pay, and a declaration in the official Gazette of the incapacity of the delinquent to serve the Government in any capacity. He

Penalties for divulging the contents of a message.

will also be liable to the further punishment of fine, or to imprisonment (with or without labor) not exceeding three years, or to both.

It is a violation of secrecy to mention the fact that a message has been received or despatched by any particular person or firm.

COPIES OF MESSAGES.

Rule 47.—The Sender and Receiver have a right to be furnished with certified true copies of any message sent or received by them; a fixed charge of four annas is made for every copy furnished. As no Telegraph Office keeps copies of messages longer than three days, applications for copies required after that time has elapsed should be made to the TELEGRAPH CHECK OFFICE, CALCUTTA.

Certified copies of messages obtainable by Sender and Receiver.

Applications for copies must be made within six months of the date of the message. At the expiration of that period all message drafts are destroyed.

One anna must be enclosed for postage of the reply—failing which, it will be sent "bearing."

Application may be made, as above, by an interested party for the preservation of specified telegrams exchanged between other persons on the ground of pending or contemplated judicial proceedings. Such telegrams will be preserved for a further period of six months, at the expiration of which they will, in default of a renewed application, be destroyed.

Should the particulars furnished be insufficient to enable the *Check Office* to trace the telegrams at once, the estimated cost of the required search must be deposited by the applicant. It must be understood that the duty of the Telegraph Department in the matter is confined to making the search and preserving the telegrams if found. No information as to the result of the search will be furnished, and any telegrams answering the description given which may be found will only be produced on the order of a competent court of law or other competent authority.

PRESS MESSAGES.

Rule 48.—*Bonâ fide* Press messages, *i.e.*, messages in the ordinary English language addressed to, and intended for publication in, a newspaper, can be despatched at the following rates:—

Urgent.—Two rupees for the first 32 words and four annas for every additional 4 words.

Ordinary.—One rupee for the first 32 words and two annas for every additional 4 words.

Deferred.—Eight annas for the first 32 words and one anna for every additional 4 words.

The 25th October 1883.

No. 303 T.

Despatch No. 16T., dated 5th December 1882, from the Government of India, to Her Majesty's Secretary of State for India.

Despatch No. 7T., dated 22nd February 1883, from Her Majesty's Secretary of State for India, to the Government of India.

Despatch No. 9T., dated 15th March 1883, from Her Majesty's Secretary of State for India, to the Government of India.

OBSERVATIONS.—In November 1881, licenses were granted by His Excellency the Governor General in Council to the Oriental Telephone Company, under which Telephone Exchanges have been established in Madras, Bombay, Calcutta and Rangoon. Permission was also given to the Oriental Telephone Company to establish and work, under separate licenses in each case, private telephone lines within the areas defined in the Telephone exchange licenses held by the Company. During the past year, various questions have arisen with regard to the further development of this class of enterprise; and His Excellency the Governor General in Council is pleased to lay down the following general rules under which licenses for similar purposes will be granted in future.

I.—Competition between the State Telegraph Department and the Company or between Rival Companies.

In its letter No. 401T., dated 10th November 1881, the Government of India addressed the Manager of the Oriental Telephone Company in the following terms:—

"The Government of India have expressly laid down that they will not give to any Company a monopoly for Telephone Exchanges. They reserve to

themselves full power to erect one for themselves anywhere or for the public in any place for which no license has been granted to a private Company ; as also to grant licenses to more than one Company on due application."

And again in its letter No. 465T., dated 9th December 1881, the Government of India wrote :—

"That in the event of any private Company wishing to work Telephone Exchanges in any city, in which the Government has already established such an institution, the Government of India will be willing to treat with any private Company, capable of working it properly, for a transfer of the exchange.

"While the Government of India has no desire to compete with private enterprise in the matter of Telephone Exchanges in this country, it reserves to itself the right to undertake such business in places where private agency is not prepared to take it up."

So far as the operations of the Oriental Telephone Company are concerned, the Government of India is by the wording of these letters to a certain extent debarred from a full exercise of the right of State competition in the exchange business. So long as the business is conducted satisfactorily and on sufficiently advantageous terms to the public, there will be no necessity for departing from the practice hitherto followed in this matter; but in view of the desirability of securing adequate protection of the public interests, it is necessary that full discretion should be reserved to the Government to step in and undertake the carrying on of telephonic communication in the event of failure, overcharge, or other misconduct on the part of a Company, or of other circumstances which appear to render such a course desirable. His Excellency the Governor General in Council is therefore pleased to rule that all future licenses will be granted, subject to a full reservation of the rights of Government in this respect.

The right of the Government to license more than one Company in any town has been maintained from the first, and is now reaffirmed.

The construction, maintenance, and working of all exchanges for, and lines between, Government offices will be undertaken in all cases by the Government Telegraph Department. The instructions contained in Public Works Department letter No. 309T., dated 13th June 1882, to the address of the Director General of Telegraphs are therefore cancelled.

II.—Connection between the companies exchanges and lines, and the Government system will be permitted under rules to be hereafter laid down, and on payment of a certain fee.

When such connections have been established the receipt and delivery at Telephone Exchanges of written messages for transmission over the Government wires will be permitted under rules hereafter to be laid down.

III.—Ultra-radial connections. Telephone Companies holding licenses for an exchange within certain defined limits may be permitted to connect with their exchange, isolated subscribers living beyond the limits defined subject to the payment of an extra royalty.

When connections are desired between towns each possessing a licensed xchange, the trunk line of communication will, in all cases, be erected, maintained, and owned by the Government Telegraph Department, and let to the Company at an annual rental.

But it must be understood that no Company has a right to *claim* the erection of a trunk line, and that the State is free to approve or decline in each individual case.

IV.—Royalties. The royalty fixed in the licenses to the Oriental Telephone Company is at the rate of 10 per cent. With a view to encouraging the development of telephone enterprise, Companies obtaining licenses in future under the conditions now laid down will be required to pay a royalty of 5 per cent., with an additional royalty of 1 per cent. on *ultra-radial* connections.

V.—Good-will. In all future licenses, it will be expressly stipulated in accordance with the English system, that, in case of purchase of the Company's

property by the Government, nothing will be paid for the "good-will" of the business.

VI.—On points not specially dealt with above the licenses will be based on the form already adopted and in force.

ORDER.—Ordered, that this Resolution be published in the Supplement to the *Gazette of India* for public information, and that a copy of it be forwarded to the Director General of Telegraphs for information and guidance.

W. S. TREVOR, *Colonel, R.E.*,
Secy. to the Govt. of India.

PART IV.

Acts of the Governor General's Council assented to by the Governor General

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

[Third publication.]

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 12th October, 1883, and is hereby promulgated for general information :—

ACT No. XX OF 1883.

THE PANJÁB DISTRICT BOARDS ACT, 1883.

CONTENTS.

CHAPTER I.

PRELIMINARY.

An act to make better provision for Local Self-government in the Districts of the Panjáb.

WHEREAS it is expedient to amend the law in force in the territories administered by the Lieutenant-Governor of the Panjáb for the levy and expenditure of rates on land; and

Whereas it is also expedient to provide for the constitution of district boards and local boards in those territories, and to define and regulate the powers to be exercised by those boards;

It is hereby enacted as follows:—

CHAPTER I.

PRELIMINARY.

Short title.

1. *(1)* This Act may be called the Panjáb District Boards Act, 1883.

Extent.

(2) It shall extend only to the territories for the time being administered by the Lieutenant-Governor of the Panjáb; and

Commencement.

(3) It shall come into force in each district on such date as the Local Government, by notification, directs.

Repeal of Act V of 1878.

2. From the date on which this Act comes into force in any district, the Panjáb Local Rates Act, 1878, shall be repealed throughout that district. But all rates imposed, sums credited to the Local Government, and notifications published under that Act, shall, so far as may be, be deemed to have been respectively imposed, credited and published under this Act.

V of 1878.

Definitions.

3. In this Act, unless there is something repugnant in the subject or context,—

(1) "Land" means land assessed to the land-revenue, and includes land whereof the land-revenue has been wholly, or in part, released, compounded for, redeemed or assigned.

(2) "Land-revenue" includes trini or grazing-dues levied for grazing on Government lands under section 48 of the Panjáb Laws Act, 1872.

IV of 1872.

(3) "Landholder" means any person responsible for the payment of the land-revenue, if any, assessed on land. It also includes the proprietor of land the land-revenue of which has been wholly, or in part, released, compounded for, redeemed or assigned.

(4) "Annual value" means—

(a) double the land-revenue for the time being assessed on any land, whether the assessment is leviable or not; or

(b) where the land-revenue has been permanently assessed, or has been wholly or in part compounded for or redeemed, double the amount which, but for such permanent assessment, composition or redemption, would have been leviable; or

(c) where no land-revenue has been assessed, double the amount which would have been assessed if the average village-rate had been applied:

Provided that, in any tract in which, under the settlement for the time being in force, the improvement of the land due to canal irrigation has been excluded from account in assessing the land-revenue, and a rate has been imposed in respect of such improvement, that rate shall be added to the land-revenue for the purpose of computing the annual value.

(5) "Financial year" means the year commencing on the first day of April.

(6) "Prescribed day" means such day as the Local Government may, from time to time, prescribe.

(7) "Notification" means a notification published in the official Gazette.

Panjáb District Boards Act, 1883.

(Chapter III.—Of District and Local Boards—Sections 4-11.)

(8) "Notified" means notified in the official Gazette.

(9) "Deputy Commissioner" means the Deputy Commissioner of a district, and includes any officer specially appointed by the Local Government to perform the functions of a Deputy Commissioner under this Act.

Powers exercisable from time to time.

4 All powers conferred by this Act may be exercised from time to time as occasion requires.

CHAPTER II.

OF THE LOCAL RATE ON LAND.

The local rate.

5. *(1)* All land shall be subject to the payment of a rate, to be called the local rate, not exceeding one anna for every rupee of its annual value.

(2) The proportion which the local rate shall bear to the annual value of land shall, except as provided in sub-section (3), be fixed for each district by the Local Government by notification.

(3) The Local Government may, by notification, delegate to the district board, subject to such restrictions or conditions as it thinks fit, its powers under sub-section (2), and may, by notification, cancel or vary any such notification.

Road, school and post cesses to merge in the rate.

6. From such date as may be notified in respect of each district by the Local Government, all authorized rates and cesses for the maintenance of roads, schools and the district-post shall merge in and become part of the local rate, and no rate or cess other than the local rate shall be thereafter leviable for those purposes.

Liability for local rate.

7. The landholder shall be liable for the local rate subject to the following provisoes, namely :—

(1) where the landholder pays the land-revenue in kind to any assignee of revenue or any village-headman, the assignee of revenue or village-headman shall be liable for the payment of the local rate instead of the landholder, and no demand shall be made by any such assignee or village-headman on the landholder in respect of the payment of the rate; and

(2) where the Government has, under any lease current at the time when this Act comes into force, paid the local rate on trini, it shall continue to pay the rate during the currency of the lease.

Power to recover a share of the rate from occupancy-tenant.

8. When a local rate is payable by a landholder in respect of lands held by a tenant with a right of occupancy holding at a favourable rent, the landholder may realize from the tenant a share of the rate, bearing the same proportion to the whole rate as the excess of the annual value over the rent paid by the tenant bears to half the annual value.

Appropriation of proceeds of local rate.

9. Four-fifths of the net proceeds of the local rate levied in each district, after deducting the expenses of collection, shall, except as provided in section 68, be allotted to the district board established for that district under this Act.

The remaining one-fifth shall be carried to the credit of the Local Government, and may—

(a) be allotted by that Government to any district board established under this Act; or

(b) be applied by that Government to provide in the territories to which this Act extends, or any part thereof, for any of the matters on which district boards may expend the funds at their disposal under this Act :

Provided that the Local Government may direct that the whole or any portion of the net proceeds of the local rate levied within the limits of any municipality or military cantonment, after deducting the expenses of collection, shall be carried to the credit of the municipal fund, or made available for the purpose of public improvement in the cantonment or for carrying out therein any rules made under section 25 of the Cantonments Act, 1880, as the case may be. III of 1880.

CHAPTER III.

OF DISTRICT AND LOCAL BOARDS.

A.—Constitution of District and Local Boards.

Establishment of district and local boards.

10. *(1)* The Local Government shall, by notification, establish a district board for each district.

(2) The Local Government may, by notification, establish a local board or local boards within the limits of any district, and may cancel or vary any such notification.

(3) A district board shall have authority throughout the district for which it is established, and a local board shall have authority throughout such portion of the district in which it is established, as the Local Government may, by notification, direct :

Provided that a board shall not have authority over any portion of a district which is for the time being included in a military cantonment or a municipality.

Number and appointment or election of members.

11. *(1)* A district board or local board shall consist of such number of members, not less than six, as the Local Government may fix in this behalf.

(2) The members may be appointed by the Local Government either by name or by official designation, or may be elected in accordance with rules made by the Local Government under this Act, or some may be appointed and some elected, as the Local Government directs :

Provided that—

(a) when the Local Government has directed that all or any proportion of the members shall be elected, it shall not thereafter direct that they shall be appointed, unless a majority of the electors declare that they so desire, or the Governor General in Council, for some reason affecting the public interests, sanctions the direction ;

(b) except with the approval of the Governor General in Council, or unless salaried officers of the Government are elected, not less than two-thirds of the members of every board shall be persons other than salaried officers of the Government; and

(c) not less than one-half of the members of the board shall be landholders in the district.

Panjáb District Boards Act, 1883.

(Chapter III.—Of District and Local Boards—Sections 12-20.)

(3) When, under a direction issued under sub-section (2), any places on a board are required to be filled by election, and a sufficient number of members is not elected, the Local Government may fill those places by appointment.

12. (1) A member of a district board or local board, when appointed by virtue of an office, shall, unless and until the Local Government otherwise directs, continue to be a member of the board while he continues to hold that office.

Term of office of members.

(2) The term of office of all other elected and appointed members respectively of a district board or local board shall be fixed by the Local Government by rules made under this Act, and may be so fixed as to provide for the retirement of members by rotation, but shall not exceed three years.

(3) An outgoing member shall, if otherwise qualified, be again eligible for election or appointment.

13. A member of a local board or of a district board may resign by notifying in writing his intention to do so to the Local Government; and, on the acceptance by the Local Government of such resignation, the member shall be deemed to have vacated his office.

Resignation of members.

14. The Local Government may remove any member of a district board or local board—

Powers of the Local Government as to removal of members.

(a) if he refuses to act, or becomes incapable of acting, or is declared insolvent, or is convicted of any such offence, or subjected by a Criminal Court to any such order, as implies, in the opinion of the Local Government, a defect of character which unfits him to be a member;

(b) if he has been declared by notification to be disqualified for employment in the public service;

(c) if he, being a member of a local board, without an excuse sufficient in the opinion of the Local Government, neglects for more than three consecutive months to be present at the meetings of that board, or, being a member of the district board, without such sufficient excuse, neglects for more than six consecutive months to be present at the meetings of that board;

(d) if his continuance in office is, in the opinion of the Local Government, dangerous to the public peace or order; or,

(e) when he is a salaried officer of the Government, if his continuance in office is, in the opinion of the Local Government, unnecessary or undesirable.

15. (1) When the place of an elected member of a local board or district board becomes vacant by the resignation or removal of the member or by his death, a new member shall be chosen in accordance with the rules made by the Local Government under this Act to fill the place:

Filling of casual vacancies.

Provided that the Local Government may direct in any such case that the vacancy shall be left unfilled.

(2) When the place of a member of a local board or district board appointed by name becomes vacant as aforesaid, the Local Government may, if it thinks fit, appoint a new member to fill the place.

(3) A person chosen or appointed under this section to fill a casual vacancy shall hold office until the person whose place he fills would regularly have gone out of office, and shall then go out of office, but shall be again eligible for election or appointment.

16. Every district board shall be a body corporate by the name of the district board of its district, and shall have perpetual succession and a common seal, with power to acquire and hold property, both moveable and immoveable, and, subject to any rules made by the Local Government under this Act, to transfer any such property held by it, and to contract and do all other things necessary for the purposes of its constitution, and may sue and be sued in its corporate name.

Incorporation of district boards.

17. The several district boards and local boards constituted under this Act shall come into existence at such time as the Local Government may, by notification, fix in this behalf.

Time for district and local boards coming into existence.

18. (1) A member of every district board or local board shall be elected or appointed to be chairman of the board, and shall hold office for such term, not exceeding three years, as the Local Government may, by a rule made under this Act, fix.

Chairman.

(2) The Local Government shall determine, as regards each board or as regards any class of boards, whether the chairman shall be a person appointed by virtue of his office or by name or be elected.

19. (1) A district board or local board may elect one of its members to be vice-chairman.

Vice-chairman.

(2) A vice-chairman so elected shall hold office for such term as the board may, by rule, fix.

B.—Duties of District and Local Boards.

20. (1) The following matters shall, subject to such exceptions and conditions as the Local Government may make and impose, be under the control and administration of each district board within the area subject to its authority:—

Duties of district board.

(a) the management of all property vested in the district board;

(b) the construction, repair and maintenance of public roads and other means of communication;

(c) the establishment, management, maintenance and visiting of public hospitals, dispensaries, saráís and schools, and the construction and repair of all buildings connected with these institutions;

(d) the training of teachers and the establishment of scholarships;

(e) the supply, storage and preservation from pollution of water for drinking, cooking and bathing purposes; and

(f) the planting and preservation of trees.

Panjáb District Boards Act, 1883.
(Chapter III.—Of District and Local Boards—Sections 21-26.)

(2) The Local Government may direct that any of the following matters shall, subject to such exceptions and conditions as it may make and impose, be under the control and administration of a district board within the area subject to its authority :—

(g) the management of any property vested in Her Majesty;

(h) the establishment, maintenance, visiting and management of markets, rest-houses, encamping-grounds and other public institutions, and the construction and repair of all buildings connected with these institutions;

(i) the construction and repair of embankments, and the supply, storage and control of water for agricultural purposes;

(j) the preservation and reclamation of soil, and the drainage and reclamation of swamps;

(k) the construction, repair and maintenance of famine preventive works, and the establishment and maintenance of such relief-works, relief-houses and other measures in time of famine or scarcity as may be entrusted to the charge of the board by the Local Government;

(l) the registration of births, marriages and deaths;

(m) fairs and agricultural shows and industrial exhibitions;

(n) the establishment and management of pounds, including, where the Cattle-trespass Act, 1871, is in force, such functions of the Local Government and the Magistrate of the district under that Act as may be transferred to the board by the Local Government; (I of 1871.)

(o) the management of such public ferries as may be entrusted to the charge of the board under section 7 A of the Northern India Ferries Act, 1878, as amended by this Act; (XVII of 1878.)

(p) any other local works or measures likely to promote the health, comfort, convenience and interests of the public or the agricultural or industrial prosperity of the country; and

(q) any other matters which the Local Government may declare to be fit and proper matters to be taken under the control and administration of the board.

(3) The Local Government may cancel or modify any direction given by it under sub-section (2).

(4) A district board shall, so far as the funds at its disposal permit, make due provision for all matters placed under its control or administration by or under this section.

21. (1) The Local Government, or, subject to the control of the Local Government, a district board, may direct that, within the area subject to the authority of a local board, any matter placed under the control and administration of the district board by or under section 20 shall be transferred to the control and administration of the local board.

Duties of local board.

(2) A local board, as the agent of, and subject to the control of, the district board, shall, so far as the funds at its disposal permit, make due provision for all matters transferred to its control and administration under sub-section (1).

(3) It shall be the duty of the district board to enforce the responsibility imposed on a local board by sub-section (2).

22. Except as otherwise provided by this Act, a local board shall not incur expenses or undertake liabilities to any amount exceeding the limit imposed by the district board of its district.

Limits on expenditure of local board.

23. (1) If a local board makes default in the performance of any duty imposed on it by or under this Act, the district board may, by order in writing, fix a period for the performance of the duty.

Power for district board to provide for performance of duty in default of local board.

(2) If the duty is not performed within that period, the district board may appoint some person to perform it, and may provide for the expenses of, and incidental to, its performance out of the funds appropriated to or for the purposes of the local board.

C.—Joint Committees.

24. A district board may concur with any other district board, or with any municipal committee or with any cantonment authority, or with more than one such board, committee or authority, in appointing, out of their respective bodies, a joint committee for any purpose in which they are jointly interested, and for delegating to any such joint committee any power which might be exercised by either or any of the boards, committees or authorities concerned, and in framing or modifying regulations as to the proceedings of any such joint committee, and as to the conduct of correspondence relating to the purpose for which the joint committee is appointed.

Joint committees.

D.—Conduct of Business.

25. (1) Minutes of the proceedings at each meeting of a district or local board shall be drawn up and recorded in a book to be kept for the purpose, and shall be signed by the chairman of the meeting or of the next ensuing meeting, and shall be published in such manner as the Local Government may, from time to time, direct, and shall, at all reasonable times and without charge, be open to the inspection of any inhabitant of the district who pays any rate or tax under this Act.

Record and publication of proceedings.

(2) A copy of every resolution passed by a local board at a meeting shall, within three days from the date of the meeting, be forwarded to the district board and to the Deputy Commissioner.

(3) A copy of every resolution passed by a district board at a meeting shall, within three days from the date of the meeting, be forwarded to the Deputy Commissioner.

26. Every district board, and every local board with the sanction of the district board, may make rules as to—

Power to make rules as to business and affairs.

(a) the time and place of its meetings and the manner in which notice of meetings shall be given;

(b) the conduct of proceedings at meetings and the adjournment of meetings;

(c) the custody of the common seal and the purposes for which it shall be used;

Panjáb District Boards Act, 1883.

(Chapter III.—Of District and Local Boards—Sections 27-32.)

(*d*) the division of duties amongst its members;

(*e*) the powers to be exercised by sub-committees or members to whom particular duties have been assigned;

(*f*) the persons by whom receipts shall be granted for money received under this Act;

(*g*) the duties, appointment, leave, suspension and removal of the officers and servants of the board;

(*h*) the term for which the vice-chairman shall hold office, and

(*i*) other similar matters:

Provided that every rule made under this section must be consistent with this Act and with any rules made by the Local Government under this Act, and shall be published in such manner as the Local Government may direct.

E.—Officers and Servants.

Employment of officers and servants.

27. *(1)* Subject to the provisions of this Act and to any rules which may be made under this Act in this behalf, every district board may employ and pay such officers and servants as may be necessary and proper for the efficient execution of its duties and of the duties of the local boards acting under it:

Provided that if, at any time, in the opinion of the Deputy Commissioner,—

(*a*) the number of persons employed by a board under this section, or the remuneration assigned by the board to those persons, or to any of them, is excessive, or

(*b*) any such person is unfit for his employment,

the board shall, on the requirement of the Deputy Commissioner, reduce the number, or remuneration, of those persons, or, as the case may be, dismiss the unfit person.

(2) The board may appeal against any requirement under this section to the Commissioner of the division, whose decision shall be final.

Pensions of Government officials serving boards.

28. In the case of a Government official, a district board may—

(*1*) if his services are wholly lent to it, contribute to his pension or gratuity and leave-allowances in accordance with the rules of the Government Civil Pension and Leave Codes for the time being in force; and

(*2*) if he devotes only a part of his time to the performance of duties in behalf of the board, contribute to his pension or gratuity and leave-allowances in such proportion as may be determined by the Government.

Pensions of servants of boards.

29. In the case of an officer or servant, not being a Government official referred to in section 28, a district board may—

(*1*) grant him leave-allowances and, if he is employed under the district committee when this Act comes into force and not entitled to pension, or if his monthly pay is less than ten rupees, a gratuity; and

(*2*) if empowered in this behalf by the Local Government—

(*a*) subscribe in his behalf for pension or gratuity and leave-allowances under the rules of the Government Civil Pension and Leave Codes for the time being in force; or

(*b*) purchase for him from the Government or otherwise an annuity on his retirement:

Provided that no pension, gratuity, leave-allowance or annuity shall exceed the sum to which, under the Government Civil Pension and Leave Codes for the time being in force, the servant would be entitled if the service had been service under the Government.

F.—Taxation and Finance.

Powers of taxation conferred on district boards.

30. Subject to any general rules or special orders which the Governor General in Council may make in this behalf, a district board may impose, in manner prescribed by section 31, such taxes as may be approved by the Local Government:

Provided that no such tax shall be imposed in respect of any property subject to the local rate.

Procedure in imposing taxes.

31. (*1*) A district board may resolve, at a meeting, convened and constituted in such manner as the Local Government may prescribe, to propose the imposition of any tax under section 30.

(*2*) When a resolution has been passed under sub-section (*1*), the board shall publish a notice defining the class of persons or description of property proposed to be taxed, the amount or rate of the tax to be imposed and the system of assessment to be adopted.

(*3*) Any person likely to be directly affected by the proposed tax, and objecting to the same, may, within thirty days from the publication of the notice, send his objection in writing to the board; and the board shall, at a meeting convened and constituted as aforesaid, take his objection into consideration.

(*4*) If no objection is sent within the said period of thirty days, or if the objections received, having been considered as aforesaid, are deemed insufficient, the board may submit its proposals to the Local Government, with the objections (if any) which have been sent in and with its decision thereon.

(*5*) The Local Government, on receiving proposals under sub-section (*4*), may sanction the same, or refuse to sanction them, or return them to the board for further consideration.

(*6*) When the proposals of a district board in respect of a tax have been sanctioned by the Local Government, the board may, at a meeting convened and constituted as aforesaid, direct the imposition of the tax in accordance with those proposals:

Provided that, in giving such direction, the board shall fix a date not less than one month from the date of the meeting on which the tax shall come into force.

(*7*) Every direction under sub-section (*6*) shall be notified, and the notification shall be conclusive evidence that the tax has been imposed in accordance with law.

Reduction and abolition of tax.

32. The Local Government may, by notification, and the district board may, with the sanction of the Local Government, by a resolution passed at a meeting

Panjáb District Boards Act, 1883.
(Chapter III.—Of District and Local Boards—Sections 33-39.)

convened and constituted as the Local Government may prescribe, abolish or reduce any tax imposed under sections 30 and 31.

Levy of fees.

33. With the previous sanction of the Local Government, or of such officer as the Local Government may authorize in this behalf, a district board or local board may fix and levy school-fees and fees for the use of, or benefits derived from, any of the works specified in section 20, clauses (*c*), (*e*), (*h*), (*i*) and (*j*), and fees at fairs, agricultural shows and industrial exhibitions held under its authority.

Additional funds to be provided by the Government.

34. When the control and administration of any matter is by or under this Act transferred to a district board, and at the time of the transfer the cost of that control and administration is defrayed from provincial revenue, the Local Government shall, from time to time, allot to the district board such funds, or place at the disposal of the board such sources of income, as may, in the opinion of the Local Government and of the board, be sufficient for maintaining the control and administration of the said matter in the state of efficiency existing at the date of transfer.

District fund.

35. There shall be formed for each district a fund, to be called the district fund, and there shall be placed to the credit thereof—

(*a*) the balance (if any) of the allotments made for the district under section 7 of the Panjáb Local Rates Act, 1878, and of the road and school cesses, which may be available for expenditure in the district on the day on which the district board comes into existence;

V of 1878.

(*b*) all proceeds of rates allotted to the district board under section 9;

(*c*) the proceeds of all taxes imposed in the district under sections 30 and 31;

(*d*) the amount of all fees levied by the district board or by local boards in the district under section 33;

(*e*) all funds allotted to the district board and the income arising from all sources of income placed at its disposal under section 34;

(*f*) all rents and profits accruing from property vested in the district board or managed by the district board or a local board in the district;

(*g*) all sums contributed to the fund by Government or by any committee, board or private person;

(*h*) all sums received by the district board or by a local board in the district in the discharge of functions exercised by it under this Act; and

(*i*) the proceeds of all sources of income which the Local Government may order to be placed at the disposal of the district board:

Provided that the Local Government may revoke any order made under clause (*i*).

Vesting, custody and investment of district fund.

36. (*1*) The district fund shall be vested in the district board, and the balance standing at the credit of the fund shall be kept in the Government treasury or sub-treasury or in the bank to which the Government treasury business has been made over, unless the Local Government in any cases otherwise permits.

(*2*) Subject to such rules as the Governor General in Council may make in this behalf, the district board may, with the previous sanction of the Local Government, invest any portion of the district fund in securities of the Government of India or such other securities as the Governor General in Council may approve in this behalf, and vary such investments for others of the same nature, or dispose of them. The income resulting from the securities, and the proceeds of the sale of the same, shall be credited to the district fund.

Application of district fund.

37. (*1*) The district fund shall be charged with the payment of the expenses of the district-post, the payment of the expenses of pauper lunatics sent to public asylums from the area under the authority of the district board, the expenses incurred in auditing the accounts of the district boards and local boards, and such portion of the cost of the Provincial Departments for education, sanitation, vaccination, medical relief and public works as may be held by the Local Government to be equitably debitable to the district board in return for services rendered to the board by those Departments.

(*2*) Subject to the charges specified in sub-section (1), and to such rules as the Local Government may make with respect to the priority to be given to the several duties of the board or otherwise, the district fund shall be applicable to the payment, in whole or in part, of the charges and expenses incidental to the matters specified in sections 20, 27, 28 and 29, and to the provision of grants-in-aid to educational and medical institutions, within the area subject to the authority of the district board, and, with the sanction of the Commissioner, outside that area when such application of the fund is for the benefit of the inhabitants of that area.

Works or undertakings benefiting several districts.

38. In the case of works or undertakings which benefit more districts than one, when the district boards cannot agree, the Commissioner or Commissioners of the division or divisions, or, when the districts are in different divisions and the Commissioners cannot agree, the Local Government, may determine what proportion of the expenses of the work or undertaking shall be borne by each of the district funds of the districts benefited thereby; and such proportion shall be payable out of the several district funds accordingly.

Annual estimates of income and expenditure of district boards.

39. (*1*) Every district board shall appoint a finance committee consisting of not less than three of its members.

(*2*) Every district board shall, on or before a prescribed day in each year, hold a meeting at which the finance committee shall submit to the board an estimate of the income and expenditure of the board for the next financial year, in such form as the Local Government may, by a rule made under this Act, prescribe.

(*3*) The board shall consider the estimate, and may provisionally approve of it with or without modification.

(*4*) The board shall, on or before a prescribed day, cause copies of the estimate, as provisionally

Panjáb District Boards Act, 1883.
(Chapter III.—Of District and Local Boards—Sections 40-45.)

approved by it, to be sent to the Deputy Commissioner.

(5) The Deputy Commissioner shall, on or before a prescribed day, signify in writing to the board his approval or disapproval of the estimate. When he disapproves of the estimate, he shall state the nature of his objection. The board shall then consider the matter, and either modify the estimate, so as to remove the objection, or refer it through the Deputy Commissioner to the Commissioner of the division. If the Commissioner concurs in the objection, he shall make such modification in the estimate as may, in his judgment, be necessary to remove the objection in whole or in part. If he does not concur in the objection, he shall pass the estimate, and his order shall be final and binding on the board.

(6) When the Deputy Commissioner has signified his approval of an estimate, or the board has modified an estimate so as to remove the Deputy Commissioner's objections, or when the Commissioner has passed orders as provided in sub-section (5), no expenditure which is not provided for in the estimate as approved or modified shall be incurred during the year to which the estimate relates without the previous sanction of the Deputy Commissioner.

(7) When the Deputy Commissioner is a member of the district board, the Commissioner and the Local Government shall take the place of the Deputy Commissioner and the Commissioner respectively for the purposes of this section.

Accounts of district boards.

40. Accounts of the receipts and expenditure of every district board shall be made up periodically to such days and in such form as the Local Government prescribes, and shall be examined and audited as soon as may be after they are so made up by such persons as the Local Government appoints in this behalf.

Estimates and accounts of local boards.

41. (1) Every local board shall submit annually to the district board of its district, on or before such date as the district board may appoint in this behalf, a statement of the requirements, and an estimate of the probable expenditure, of the local board for the coming financial year, and shall submit, as often as the district board may require, accounts of its receipts and expenditure.

(2) The district board shall signify in writing to the local board its approval or disapproval of an estimate submitted under this section, and powers similar to those conferred on the Deputy Commissioner and Commissioner by section 39, clauses (5) and (6), shall be exercised, in regard to the estimate, by the district board and the Deputy Commissioner, or (when the Deputy Commissioner is a member of the district board) the Commissioner, respectively:

Provided that, during the currency of any financial year, the Deputy Commissioner may sanction transfers of provision within the estimate finally approved, when inconvenience or undue delay would be caused by a previous reference to the district board.

(3) The district board shall make arrangements, subject to the approval of the Deputy Commissioner, for the examination and audit of accounts submitted to it under this section, and may arrange for the publication of such accounts.

Inspection of estimates and accounts.

42. Every district board shall cause a copy of every annual estimate provisionally or finally approved under section 39, and of every account made up under section 40, to be kept at its office; and any person paying rates or taxes under this Act may, at all reasonable times, inspect any such estimate or account without payment of any fee.

Publication of abstract of accounts.

43. A statement of the accounts of a district board for each financial year, showing the income of the district fund under each head of receipt, the charges for establishment, the works undertaken, the sums expended on each work, and the balance, if any, of the fund remaining unspent at the end of the year, shall be prepared by the board in such form as the Local Government prescribes; and an abstract of the same shall be published in the English and Vernacular official Gazettes, or in such other manner as the Local Government may direct.

G.—Control.

Control of Commissioner and Deputy Commissioner over boards and joint committees.

44. (1) The Commissioner of the division, or the Deputy Commissioner of the district when he is not a member of the district board, may—

(a) enter on and inspect, or cause to be entered on and inspected, any immoveable property within the limits of the division or district respectively occupied by any local board, district board or joint committee, or any work in progress within those limits under the direction of any such board or committee;

(b) by order in writing call for and inspect any document in the possession or under the control of any such board or committee having authority within those limits;

(c) by order in writing require any such board or committee to furnish such statements, accounts, reports and copies of documents relating to the proceedings or duties of the board or committee, as he may think fit to call for; and

(d) record in writing, for the consideration of any such board or committee, any observations he may think proper in regard to the proceedings or duties of the board or committee.

(2) If any difference of opinion arises between officers exercising the powers conferred by sub-section (1), it shall be referred—

(a) if it arises between two or more Deputy Commissioners in the same division, to the Commissioner; and

(b) if it arises between two or more Deputy Commissioners in different divisions or between two or more Commissioners, to the Local Government;

and the decision thereon of the Commissioner or of the Local Government, as the case may be, shall be final.

Power to suspend action.

45. The Commissioner of the division or the Deputy Commissioner of the district may, by order in writing, suspend, within the division or district respectively, the execution of any resolution or order of a district board or local board or joint committee, or prohibit the

Panjáb District Boards Act, 1883.
(Chapter III.—Of District and Local Boards—Sections 46-54.)

doing of any act within the said limits which is about to be done, or is being done, in pursuance of or under cover of this Act, if, in his opinion, the resolution, order or act is in excess of the powers conferred by law, or the execution of the resolution or order, or the doing of the act, is likely to lead to a breach of the peace, or to cause injury or annoyance to the public or to any class or body of persons.

Extraordinary powers of Deputy Commissioner in case of emergency.

46. *(1)* In cases of emergency, the Deputy Commissioner may provide for the execution of any work, or the doing of any act, which a district board or local board is empowered to execute or do, and the immediate execution or doing of which is, in his opinion, necessary for the service or safety of the public, and may direct that the expense of executing the work or of doing the act shall be forthwith paid by the district board.

(2) If the expense is not so paid, the Deputy Commissioner may make an order directing the person having the custody of the balance of the district fund to pay the expense, or so much thereof as is, from time to time, possible, from that balance in priority to all other charges against the same.

Power to provide for performance of duties in case of default of board.

47. *(1)* When the Commissioner, after due enquiry, is satisfied that a district board has made default in performing any duty imposed upon it by or under this Act, he may, by an order in writing, fix a period for the performance of that duty, and, if it is not performed within the period so fixed, he may appoint some person to perform it, and may direct that the expense of performing it shall be paid, within such time as he may fix, by the board to that person.

(2) If the expense is not so paid, the Commissioner may make an order directing the person having the custody of the balance of the district fund to pay the expense, or so much thereof as is, from time to time, possible, from that balance in priority to all other charges against the same.

Power to invest other officers with power of control.

48. When the control and administration of any public work is by or under this Act transferred to a district board, and at the time of the transfer the cost of that control and administration is defrayed from provincial revenue, the Local Government may invest any officer with respect to that work with the powers of a Commissioner under section 44 or section 47, or with the powers of a Deputy Commissioner under section 46.

Report of action under preceding sections.

49. When the Commissioner makes any order under section 15 or section 47, he shall forthwith forward to the Local Government, and when the Deputy Commissioner makes any order under section 45 or section 46, or an officer empowered under section 48 makes any order under section 46 or section 47, he shall forthwith forward to the Commissioner, for submission to the Local Government, a copy of the order, with a statement of the reasons for making it, and with such explanation, if any, as the board or committee concerned may wish to offer. The Local Government may thereupon confirm, modify or rescind the order.

Powers of Local Government and its officers over boards.

50. *(1)* It shall be the duty of the Local Government and of all Commissioners and Deputy Commissioners acting under its orders to require that the proceedings of district boards and local boards shall be in conformity with law and with the rules in force thereunder.

(2) The Local Government may exercise all powers necessary for the purpose of sub-section (1), and may, amongst other things, by order in writing, annul any proceeding which it considers not to be in conformity with law and with the said rules.

(3) The Commissioner of the division and the Deputy Commissioner of the district may, within their jurisdiction, for the same purpose, exercise such powers as may be conferred upon them by rules made in this behalf by the Local Government.

Power of Local Government to supersede in case of incompetency, persistent default or abuse of powers.

51 If a district board or local board is not competent to perform, or persistently makes default in the performance of, the duties imposed on it by or under this or any other Act, or exceeds or abuses its powers, the Local Government may, with the previous approval of the Governor General in Council, by notification, in which the reasons for so doing shall be stated, declare the board to be superseded:

Provided that, in case of public emergency, the notification may be issued without the previous approval of the Governor General in Council, but shall be immediately reported to the Governor General in Council and shall be subject to his orders.

Consequences of supersession.

52. When a district board or local board is superseded under section 51, the following consequences shall ensue:—

(a) All members of the board shall from the date of the notification vacate their offices as such members:

(b) All powers and duties of the board may, until the board is re-constituted, be exercised and performed by such person as the Local Government appoints in that behalf:

(c) Where a district board is superseded, all property vested in it shall, until it is re-constituted, vest in Her Majesty.

Constitution of new board, and transfer of functions of superseded local boards.

53. *(1)* When a district board is superseded, the Local Government shall, as soon as in its judgment conveniently may be, constitute another district board in its place.

(2) When a local board is superseded, the Local Government may either constitute another local board in its place, or transfer its functions to the district board or, by a notification under section 10, to any other local board.

Disputes.

54. *(1)* If any dispute, for the decision of which this Act does not otherwise provide, arises between two or more boards constituted under this Act, or between a municipal committee or cantonment authority and any such board, the matter shall be referred—

(a) to the Deputy Commissioner if the local authorities concerned are in the same district;

Panjáb District Boards Act, 1883.
(Chapter III.—Of District and Local Boards—Sections 55-59.)

(*b*) to the Commissioner or Commissioners of the division or divisions if the local authorities concerned are in different districts; and

(*c*) to the Local Government if the local authorities concerned are in different divisions and the Commissioners of those divisions cannot agree.

(*2*) The decision of the authority to which any dispute is referred under this section shall be final.

(*3*) If, in the case mentioned in clause (*a*), the Deputy Commissioner is a member of one of the boards or committees concerned, his functions under this section shall be discharged by the Commissioner.

(*4*) "Local authority" in this section means a district board, local board, municipal committee or cantonment authority.

Power of the Governor General in Council and the Local Government to make rules.

55. So far as may be consistent with the provisions of this Act—

(1) the Governor General in Council may—

(*a*) make general rules or special orders for the regulation of taxation under section 30; and

(*b*) make rules regulating the powers of district boards to make, vary and dispose of investments;

(2) the Local Government may, for any district or local board, or any class of such boards, make rules for—

(*c*) dividing boards into classes, and fixing the powers of boards of each class;

(*d*) determining the mode and time of appointment or election of members of boards, the term of office, allowances (if any), and the qualifications and disqualifications of such members, and the qualifications and disqualifications of voters, and generally for regulating all elections under this Act;

(*e*) regulating the powers of boards to transfer property;

(*f*) regulating the powers of boards to contract and do other things necessary for the purposes of their constitution and the mode of executing contracts;

(*g*) determining the intermediate offices, if any, through which correspondence between boards or members of boards and the Local Government or its officers shall pass;

(*h*) determining the language in which business shall be transacted;

(*i*) the employment, payment, suspension and removal of officers and servants under section 27;

(*j*) the apportionment of the district fund between the general purposes of the district and the purposes of particular parts of the district;

(*k*) the application of district funds;

(*l*) the form of estimates of income and expenditure under section 39;

(*m*) the form of accounts and the manner of periodical audit under section 40;

(*n*) the publication of abstracts of accounts under section 43;

(*o*) the preparation of plans and estimates for works which are to be partly or wholly constructed at the expense of boards, and as to the authority by which, and the conditions subject to which, such plans and estimates may be sanctioned;

(*p*) the powers of supervision to be exercised by Commissioners and Deputy Commissioners under section 50;

(*q*) the conduct of proceedings of boards, including the fixing of a quorum, the appointment or election of a chairman, and the term of office of a chairman and vice-chairman;

(*r*) the appointment and payment of auditors of the accounts of boards; and

(*s*) the guidance of district boards when suits or other proceedings are intended to be or have been instituted by or against them in Civil Courts; and

(*t*) generally determining the relations between district boards and local boards, and guiding boards and Government officers in all matters connected with the carrying out of the provisions of this Act.

All such rules and alterations of rules shall be notified, and no rules or alteration of rules under clause (2) (*d*) shall come into operation until three months after they have been notified.

II.—Regulations.

Power to make regulations.

56. (*1*) Every district board or local board empowered in this behalf by the Local Government may make regulations for carrying out all or any of the purposes of this Act.

(*2*) A regulation made under this section shall not have effect until it has been confirmed by the Local Government and published in such manner and for such time as the Local Government may direct.

Penalty for infringement of regulations.

57. (*1*) In making any regulation under section 56, a board may direct that a breach of the same shall be punished with fine which may extend to fifty rupees, and, in the case of a continuing breach, with a further fine which may extend to five rupees for every day during which the breach is continued after he has been convicted of such breach.

(*2*) In default of payment of any fine imposed under this section, the defaulter shall be liable to simple imprisonment for a term which may extend to eight days.

Prosecutions.

58. (*1*) Prosecutions under this Act for breach of regulations may be instituted by any board, or by any person authorized by the board in this behalf.

(*2*) A Judge or Magistrate shall not be deemed to be within the meaning of section 555 of the Code of Criminal Procedure a party to, or personally interested in, any case under this section merely because he is a member of the board.

X of 1882.

I.—Supplemental and Exceptional Provisions.

Liability of members of boards.

59. Every person shall be liable for the loss, waste or misapplication of any money or other property belonging to the district board, if such loss, waste or misapplication is a

Panjáb District Boards Act, 1883.

(Chapter III.—Of District and Local Boards—Sections 60-69.)

direct consequence of his neglect or misconduct while a member of a local board or of the district board, and a suit for compensation for the same may be instituted against him in such Court as the Local Government directs, by the district board with the sanction of the Commissioner, or by the Secretary of State for India in Council.

Procedure for making rules and regulations.

60. (*1*) The Local Government, before making any rules under section 55 or section 67, and a district or local board, before making any regulations under section 56, shall publish, in such manner as the Local Government may deem sufficient for giving information to persons interested, a draft of the proposed rules or regulations, together with a notice specifying a date on or after which the draft will be taken into consideration; and shall, before making the rules or regulations, receive and consider any objection or suggestion which may be made by any person with respect to the draft before the date so specified.

(*2*) Every such rule or regulation shall be published in the official Gazette in English and in such other language as the Local Government directs, and such publication shall be conclusive evidence that the rule or regulation has been made as required by this section.

Acquisition of land.

61. Where any land is required for the purposes of this Act, the Local Government may, at the request of a district board, proceed to acquire it under the provisions of the Land Acquisition Act, 1870; and, on the payment by the board of the compensation awarded under that Act, and of the charges incurred by the Government in connection with the proceedings, the land shall vest in the board.

X of 1870.

Penalty on member, officer or servant being interested in contracts made with a board or joint committee.

62. (*1*) If any member, officer or servant of a district or local board or joint committee appointed under this Act is, otherwise than with the permission in writing of the Commissioner, directly or indirectly interested in any contract made with that board or joint committee, he shall be deemed to have committed an offence under the Indian Penal Code, section 168.

XLV of 1860.

(*2*) A person shall not, by reason of being a shareholder in, or a member of, any incorporated or registered company, be held to be interested in any contract entered into between the company and a board or committee; but he shall not take part in any proceedings of the board or committee relating to any such contract.

Saving for Act XI of 1879.

63. Nothing in this Act shall affect the Local Authorities Loans Act, 1879.

XI of 1879.

General powers of Local Government and Commissioners.

64. In all matters connected with this Act, the Local Government shall have and exercise over Commissioners and Deputy Commissioners, and Commissioners shall have and exercise over Deputy Commissioners, the same authority and control as they respectively have and exercise over them in the general and revenue administration.

Contracts of local committees.

65. Every contract entered into, whether in its own name or in the name of the Government, by the committee appointed in a district under section 11 of the Panjáb Local Rates Act, 1878, may be enforced by and against the district board constituted for that district under this Act, in like manner as it might have been by and against the committee if this Act had not been passed.

V of 1878.

Government officers serving under committees to continue under board.

66. A Government officer employed under the committee appointed in a district as aforesaid at the time when a district board comes into existence for the district under section 17 of this Act shall be deemed to be similarly employed by the board, and shall not be dismissed from that employment without the sanction of the Local Government.

Power of Local Government to except local area from operation of Act.

67. (*1*) If the circumstances of any district or part of a district are, in the opinion of the Local Government, such that all or any of the provisions of this chapter are unsuited thereto, the Local Government may, by notification in the official Gazette, except the district or part from the operation of those provisions; and thereupon those provisions shall not apply to the excepted district or part until again applied thereto by a like notification.

(*2*) While any notification under this section is in force, the Local Government may make rules to provide for any matter dealt with by the provisions to which the notification applies.

Committee to be constituted for district wholly excepted from Act.

68. When a district is excepted, under section 67, from all the provisions of this chapter, a committee shall, except where the Local Government for special reasons otherwise directs, be constituted for the control and administration in that district of the matters mentioned in section 20, or of such of them as the Local Government may, from time to time, specify; and the Local Government shall, from time to time, determine the manner in which the members of the committee shall be appointed and removed, define the functions and authority of the committee, and place at its disposal, subject to such control as the Local Government thinks fit,—

(*a*) the balance standing at the credit of the district fund at the time when the district is excepted or, as the case may be, the balance of the allotments made for the district under section 7 of the Panjáb Local Rates Act, 1878, and of the road and school cesses, which may be available for expenditure in the district at that time;

V of 1878.

(*b*) all proceeds of rates which but for the district being excepted would be allotted to the district board under section 9 of this Act; and

(*c*) such other sources of income mentioned in section 35 of this Act as the Local Government thinks fit:

Provided that not less than one-half of the members of the committee shall be persons who own landed property or reside or carry on trade or business in the district and are not servants of the Government.

Power to direct that Act XX of 1856 shall cease to be in force.

69. (*1*) When any local area in which Act XX of 1856 (*an Act to make better provision for the appointment and maintenance of Police Chaukídárs in Cities, Towns, Stations,*

Suburbs and Bázárs in the Presidency of Fort William in Bengal) is in force is included in any local area over which a district board established under this Act has authority, the Local Government may, by notification, direct that that Act shall cease to be in force in the local area so included, and that every panchayat constituted under that Act for that local area shall cease to exist.

(2) When a direction is issued under this section in respect of any local area in which the said Act XX of 1856 is in force, the amount, if any, then available under section 36 of that Act for purposes of improvement in that local area shall be expended therein by the Deputy Commissioner for such purposes.

CHAPTER IV.

SUPPLEMENTAL PROVISIONS AS TO TAXATION.

Recovery of rates.

70. All rates and taxes imposed under this Act, and all arrears of such rates and taxes, may be recovered as if they were arrears of land-revenue.

Local rate or tax how to be assessed and collected.

71. (1) The Local Government may, by notification, determine the persons by whom the local rate or any tax imposed under this Act shall be assessed and collected, and make rules for the assessment and collection of the rate or tax, and direct in what manner persons employed in the assessment or collection shall be remunerated.

(2) The provisions of section 60 shall apply to all rules made under this section.

Appeals.

72. (1) In matters connected with the assessment and collection of any rate or tax leviable under this Act, an appeal shall lie from the order of any person authorized under this Act to make assessments or collections to such person as the Local Government appoints:

Provided that the appeal shall be presented within 30 days from the date of the order.

(2) The order passed on an appeal under this section shall be final.

Instalments of rates and taxes.

73. (1) The Local Government may, by notification, prescribe by what instalments and at what times any rate or tax leviable under this Act shall be payable:

Provided that every instalment of the local rate leviable under section 5 shall be payable with an instalment of the land-revenue.

(2) In any local area subject to the authority of a district board the Local Government may, by notification, delegate to the board, subject to such conditions as it thinks fit, its powers under this section.

Power of Local Government to exempt from taxation.

74. The Local Government may, by notification, remit or reduce any rate or tax imposed under this Act, or exempt any person or class of persons, or any description of property, wholly or in any part from liability to any such rate or tax, and cancel any such remission, reduction or exemption.

Power to direct measurements.

75. When measurements are necessary for the assessment of the local rate or of any tax imposed under this Act, the Local Government may, by notification, direct such measurements to be made.

Suits relating to rates and taxes under this Act cognizable by Courts having cognizance of suits for rent.

76. Suits for the recovery from co-sharers, tenants or others of any sum on account of any rate or tax imposed under this Act, and suits on account of illegal exaction of any such rate or tax, or for settlement of accounts connected therewith, shall, unless the Local Government otherwise directs, be cognizable by the Courts which for the time being have cognizance of suits for rent due on land.

Confirmation and recovery of existing rates.

77. All rates or the maintenance of roads, schools or the district-post, for the payment of which provision has been made in any settlement-record previous to the passing of this Act, or which have been habitually levied by Government, shall be deemed to have been and to be legally imposed, and to have been and to be legally recoverable as if they were arrears of land-revenue payable directly to Government and due on the land in respect of which they are payable.

CHAPTER V.

AMENDMENT OF THE NORTHERN INDIA FERRIES ACT, 1878.

Amendment of the Northern India Ferries Act.

78. After section 7 of the Northern India Ferries Act, 1878, the following shall be inserted, namely:— XVII of 1878.

Management of ferries may be vested in committees and boards.

"7A. The Local Government may direct that any public ferry, wholly or partly within the area subject to the authority of a district board or local board in any district in the territories under the administration of the Lieutenant-Governor of the Panjáb, shall be managed by that board, and may further direct that all or any part of the proceeds from such ferry be paid into the district fund; and thereupon such ferry shall be managed, and such proceeds or part thereof shall be paid, accordingly."

Further amendment.

79. In section 6 of the same Act, after the words "section seven," and in section 17 of the same Act, after the words "section seven" where they first occur, the following shall be inserted, namely:—"and section 7A."

D. FITZPATRICK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 30th OCTOBER 1883.

GENERAL REMARKS.—The rainfall has moderated in Southern India, and agricultural prospects are fair in Madras, Mysore, and Bombay, but the river remains low in Sind, and there is a scarcity of water. In Berar cotton has suffered from the late excessive rains, but other crops are doing well. Rain is wanted in parts of Central India and Rajputana for the *rabi*, otherwise prospects are favourable.

Very little rain has fallen in British Burma; some damage has already been done to rice on high lands, and serious fears are entertained for the later sown crop if the break continues.

There has been practically no rain during the week throughout the whole of Northern India. Rain is wanted for rice in Upper Assam, and the prospects of the rice harvest are growing worse in Bengal, where *rabi* operations are also being seriously delayed. In the Central Provinces the weather is seasonable and prospects are excellent. In the North-Western Provinces and Oudh and Punjab the *rabi* sowings are in need of rain, but prospects are on the whole fair.

Harvesting of the *kharif* is still in general progress. In Madras the yield of *cholum*, *ragi*, &c., is reported below the average in several districts, and in the North-Western Provinces the *kharif* crops have suffered from the comparatively deficient rainfall.

Fever is prevalent in parts of Bengal, otherwise the public health is satisfactory.

Prices continue to rise in Bengal, and are steady elsewhere.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(Oct. 31st)		
Bellary ...	1·22 (average of five stations).	Standing crops generally good. Harvest *cumboo*, yield below average Gingelly good *Ragi* moderate. Eight deaths from cholera in one town.
Kurnool ...	·24 (average of eight stations).	Crops damaged from excessive rain. Harvest *cholum*, *sajja*, *kewa*, and indigo, yield below average.
Ganjam ...	2·69 (average of twelve stations).	Standing crops generally good. Fever and small-pox in parts of one taluk.
Kistna ...	1·16 (average of eleven stations).	Standing crops good. Harvest *cumboo*, *cholum*, *korra*, and maize, yield below half. Cattle-disease and small-pox in parts.
Chingleput (Madras) ...	1·82 (average of eleven stations).	Standing crops good. Harvest *ragi* and *cumboo*, yield half. Small-pox slight in two taluks. Seven deaths from cholera in one village. Cattle-disease slight in two taluks.
Coimbatore ...	1·52 (average of sixteen stations).	Standing crops good. Harvest paddy, *cholum*, *ragi*, and *cumboo*. yield average. Twenty-two deaths from cholera in three taluks. Fever and cattle-disease slight.
Tanjore ...	2·29 (average of thirteen stations).	Standing crops good. Harvest paddy, *cholum*, *ragi*, and *cumboo*, yield below average. Fifteen cases of cholera.
Madura ...	1·23 (average of seven stations).	Standing crops fair. Harvest paddy, yield average. Slight cholera in parts.
Malabar ...	1·76 (average of fourteen stations).	Second crop cultivation progressing. Small-pox slight in eight taluks. Fever slight in three taluks.
Travancore ...	3·816	Sowings nearly over Fever in parts.
		General Remarks.—General prospects good.
Bombay—(Oct. 31st)		
Kurrachee ...	No rain	Weather sultry. River at Kotri on 27th, 6 feet 9 inches against 8 feet 5 inches on same date last year. Want of water much felt. Small-pox in two villages in Sehwan taluka, 8 fresh cases, 1 death, 3 remaining sick. Fever generally prevalent. Cattle-decease in four talukas. Harvesting operations in progress. Wheat, red rice, and *bajri* in Kurrachee 24, 28 and 36, in Sehwan 32 and 36, in Ghorabari 20, 30 and 40, and in Shahbandar 20, 32 and 40 lbs. per rupee, respectively.
Hyderabad ...	......	*Kharif* harvesting continues. *Rabi* operations in progress. Small-pox in three, fever in seven, and cattle-disease in five talukas. Wheat 25, *Bajri* 38, *juari* 44, red rice 26, and white rice 22 lbs. per rupee.
Ahmedabad ...	......	*Kharif* harvest continues. Standing crops thriving. Slight fever in some talukas. Cattle-disease in Viramgaum taluka. *Bajri* 28¾ and wheat 25 lbs. per rupee.
Baroda ...	......	Cholera in Attarsumba mahal of Kadi division, and in Gandevi. Harvesting of *kharif* and sowing of *rabi* commenced. Sugarcane and cotton in good condition. *Bajri* 28 and rice 22 lbs. per rupee.
Surat ...	......	Cutting operations continue. Fever in Olphad, Pardi, and Mandir. Locusts in Chorasi, no damage. Cholera in Jalalpur 31 cases, 15 deaths, in Bulsar 12 cases, 7 deaths, in Pardi 16 cases, 5 deaths, and in Surat 1 death. *Juari* 39 and *nagli* 41½ lbs. per rupee.
Nasik ...	......	Rain ceased. *Rabi* sowing commenced. Heavy rain damaged *bajri* and cotton crops. Locusts throughout the district, damaging crops in a few villages of Kalwan and Baglan and in rare cases elsewhere. Cattle-disease in Shirwadi and Wani, Niphad taluka. Cholera in Nasik 3 attacks, 1 death. Fever in Chandor taluka. *Bajri* 31, wheat 28, and rice 22 lbs. per rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Colaba (Bombay) ...	No rain	Abnormal temperature 1° warm to 1° cool. Abnormal wind north-easterly and dry from 27th to 30th.
Poona ...	......	Cold season set in. *Rabi* sowing progressing. *Bajri* 43 and *juari* 50 lbs ; in Poona *bajri* 31 and *juari* 43 lbs. per rupee.
Ahmednagar ...	Jamkhed, 1·69 ; Parner, ·51 ; Karjat, ·20 ; Shrigonda, ·15 ; none in the rest.	Average total rainfall in the district up to date 35·72. Reaping of *bajri* in progress and sowing of *rabi* continued throughout the district. Cholera 6 attacks, 2 deaths. *Bajri*—maximum 54 lbs. in Jamkhed, minimum 39 in Akola ; *juari*—maximum 78 lbs. in Shrigonda, minimum 48 in Akola.
Sholapur ...	No rain	*Kharif* crops in good condition. *Rabi* sowing in progress. *Bajri* 54 and *juari* 65 lbs. per rupee.
Dharwar ..	General rain throughout the district, heaviest being at Naigund, 3·35 ; Hangal and Karajgi above 2·00 ; Dharwar and five other stations above 1·0 ; Mundargi none and elsewhere less that 1·0.	Rice being harvested in western talukas. *Juari* crop coming into ear, all crops including cotton fairly good. Ague in two and cattle-disease in three places. *Juari* 49 to 88 lbs. and rice 26 to 41 per rupee.
Kanara ...	Karwar, ·22 ; Kumpta, ·31 ; Sirsi, 2·80 ; Hallial, 1·63.	Total rainfall 143·71. Small-pox continues in Siddapur. Fever in Akola and Yellapur. Rice harvest continues. Common rice at Karwar 12½, in district average 15¼ seers per rupee. Weather fair.
Rajkot ...	......	Weather fair. General health feverish. Earthquake in Songad on the 20th. *Bajri* 30 and *juari* 35 lbs. per rupee.
		General Remarks.—River still low in Sind. Want of water much felt in Kurrachee. Rain in a few districts. *Kharif* being harvested and *rabi* sown. Injury by locusts in parts of Tanna, Colaba, Nasik, and Satara. Cholera abated. Fever and cattle-disease continue.
Bengal—(Oct. 31st)		
Chittagong ...	*Nil*	Weather fine, with misty mornings at times. Prospects of crops favourable. Prices stationary. Cattle-disease continues. General health good.
Dacca ..	*Nil*	*Ashoo* paddy being harvested. Injury to *amun* paddy apprehended for want of rain. Prospects of winter crops good.
24-Pergunnahs (Calcutta)	*Nil*	Prospects of late paddy crops continue unfavourable. Cultivation of winter crop somewhat retarded by early cessation of the rains. Price of cotton and rice varies from 14 to 21¼ seers per rupee. Health of people generally good.
Moorshedabad ...	*Nil*	Bright cool weather. Strenuous efforts being made to save late rice by irrigation, which are likely to be partially successful. Sowings for cold weather harvest being vigorously pushed forward in spite of the drought. Prices rising. Public health good.
Rajshahye ...	*Nil*	Light clouds. *Ropa* paddy on high ground fast drying. Paddy on low lands fair in parts. *Rabi* sowings delayed for want of rain. Prices on the increase.
Burdwan ...	*Nil*	No prospect of rain, and no alteration can now be expected in the state of the crops. A 4-anna outturn may be expected.
Rungpore ...	......	No report received.
Bhagalpur ...	*Nil*	Prospects not favourable. High land paddy will yield nothing ; low land paddy where irrigation is possible will yield from 8 to 12 annas, but the general average will not exceed 8 annas. Preceding week's rain not enough for *rabi* sowings.
Purneah ...	*Nil*	Prospects of crops unfavourable. Rain wanted for *rabi* sowings Rice will probably average from 8 to 10 annas. Much fever. A little cholera spreading from Caragola.
Patna ...	*Nil*	The little rain of preceding week has done no good to paddy crops. Sowing of *rabi* crops in progress.
Durbhunga ...	*Nil*	Owing to early cessation of the rains, there will scarcely be an 8-anna rice crop in the district. *Rabi* sowings are also injuriously affected. Prices steadily rising.
Hazaribagh ...	*Nil*	Weather dry and growing cool. Paddy crops materially injured by the dry weather. *Rabi* crops sown in places are also perishing for want of moisture in the ground. Prices rising rapidly. General health good.
Cuttack ...	*Nil*	Weather seasonable. Cutting of early rice completed with indifferent outturn. Late rice on high lands suffering from drought. Rain urgently wanted. Public health generally good.
		General Remarks.—The rains have apparently ceased, and the cold weather is setting in. No rain fell in any of the reporting districts during the week. The rain of the preceding week in Behar and in certain other parts was very slight, and did no appreciable good to the withering rice crops ; on the other hand, it somewhat improved the prospects of the *rabi* cultivation in Behar. The *rabi* cultivation is also being seriously affected by the drought. Prices are steadily rising in most districts owing to the bad prospects of the rice harvest. The reports from the eastern districts and from Julpaigoorie and Cooch Behar are favourable. In these parts only the rice harvest is expected to turn out pretty fair. Fever is prevalent in some districts ; elsewhere the general health is reported to be satisfactory.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
N. W. Provinces and Oudh—		
Benares (Oct. 30th)	No rain	The crops lately sown have sprouted from last week's rain. The rice crop is almost entirely lost, and sugarcane will only be an 8-anna outturn. Slight fluctuation in prices. Bazaars well supplied.
Allahabad (" 31st)	No rain	Much rain is wanted in tracts where none fell last week; but prospects are good on the whole. *Rabi* sowings in progress, and *kharif* crops being harvested. Health good. Prices nearly stationary.
Gorakhpur (" 28th)	No rain	Rain wanted. *Rabi* ploughings well on. Cholera disappearing. Prices steady.
Jhansi (" 29th)	·8 in pargana Man	The rainfall was most beneficial to the crops in pargana Man. Cutting of *kharif* commenced. Sowing of *rabi* in progress; seed already sown is germinating. Prices stationary. Health of people and cattle good.
Agra (" 30th)	No rain	*Kharif* crops are suffering much from drought. *Rabi* sowings going on. Well irrigation continues. Slight fever in four parganas. General health good. Prices steady.
Bareilly (" ")	No rain	Harvest proceeding. Prices stationary. Common rice has fallen. Fever increasing with slight sporadic cholera
Meerut (" ")	No rain	Weather cool. Health good. *Kharif* crops are being harvested. Supplies sufficient. Prices steady
Kumaun (" ")	No rain	Sky sometimes cloudy. *Rabi* sowings begun. General health good. Cattle-disease continues. Prices unchanged.
Lucknow (" ")	No rain	Cool at night. *Rabi* sowing nearly finished. *Hewat* crops doing well; but rain is wanted Condition of people and cattle good. Markets well supplied. Prices steady,
Partabgarh (" ")	......	Prices almost stationary. *Rabi* sowings in full swing, where the water is available to moisten the soil. *Bajra* outturn a fair one. *Jarhan* is drying up in places. General health good.
Sitapur (" ")	......	Rain much wanted. Health good. Prices again somewhat fluctuating.
Fyzabad (" ")	No rain	Wheat, gram, and barley are being sown. *Mash* and *jarhan* dying for want of rain. Public health good. Condition of cattle fair
Rae Bareli (" 29th)	No rain	*Kharif* is being cut, outturn of unirrigated lands very poor. *Rabi* sowings in progress General health good. Supplies sufficient. Prices almost stationary.
Cawnpore (" 30th)	......	*Rabi* sowings in progress. The outturn of *kharif* will be small owing to early cessation of rains. Health of people good and no sickness among cattle. Prices steady.
Farukhabad (" ")	......	Weather seasonable. Fever abating. Crops fair on the whole, but poor in the Kaimganj tashil and parganas Muhammadabad and east Shamsabad of the Sadr tashil *Rabi* sowings going on.
		General Remarks.—The *rabi* sowings are in progress and prospects are fair, the *kharif* crops have suffered in most districts from the comparative want of rain The markets are sufficiently supplied and prices generally steady. The health of the people and cattle is good. There is some cattle-disease in Kumaun.
Punjab—(Oct. 31st)		
Delhi ...	......	Health good. Price of barley risen. Prices of other food-grains stationary.
Hissar ...	......	Health good. Prices stationary.
Umballa ...	......	Health good. *Kharif* crops harvested, yield below the average. Prices steady.
Jullundur ...	......	Health good. *Rabi* sowings in progress. Prices falling.
Amritsar ...	......	Health good. *Kharif* being harvested. Prices falling.
Sialkot ...	......	Health and crop prospects good Prices stationary.
Ferozepore ...	......	Health and crop prospects good. Prices stationary.
Lahore ...	......	Health and condition of crops good. Slight fall in price of wheat. Prices of other food-grains stationary.
Rawalpindi ...	·20	Seasonal fever in the Attock and Kahuta tahsils. Health elsewhere good. *Kharif* harvest average. *Rabi* under cultivation. Prices falling.
Mooltan ...	......	Health good. *Kharif* nearly harvested. Prices steady.
Dera Ismail Khan ...	......	Health good. *Rabi* sowings in progress. Prices steady.
Peshawar ...	......	Slight fever still prevalent. Prices falling.
		General Remarks.—Slight rain in the Rawalpindi district, none elsewhere. Health and *kharif* prospects are generally good, but rain is needed throughout the province for the *rabi* sowings.
Central Provinces—(Oct. 31st)		
Nagpur ...	......	Weather cloudy. Wheat sowing progressing. Health good. Prices steady.
Jubbulpore ...	......	Weather cloudy at times. Rice being reaped. *Kharif* outturn expected to be a little below average. Cotton good, picking commenced in places. *Rabi* sowing in progress. Prices stationary. Health good.
Saugor ...	......	*Rabi* sowings in progress. Crops favourable. Health fair. Prices steady.
Seoni ...	......	Weather cloudy. Reaping progressing. *Rabi* sowing in hand. Fever prevalent. Wheat 23 and rice 17 seers per rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Central Provinces—*contd.*		
Hoshangabad ...	......	Weather seasonable. Prospects good. *Rabi* sowings in progress. Fever prevalent. Wheat 15 and rice 10 seers per rupee.
Khandwa ...	......	Weather clear and cool. Prospects good. *Rabi* sowing in progress. 20 deaths from cholera. Prices steady.
Raipur ...	......	Prospects fair. Sowing in progress. Health good. Prices steady.
Sambalpur (Oct. 27th)	......	Weather clear and cool. Prospects good. Health good. Common rice 35 seers per rupee.
		General Remarks.—*Rabi* sowing in progress under exceedingly favourable circumstances. The late rain having placed the ground in excellent order; the cotton crop has however sustained some injury.
British Burma— (Oct. 29th)		
Akyab ...	*Nil*	Total rainfall 179·57. Public health good. 11 buffaloes died in Minbye township, elsewhere health of plough-cattle good. General appearance of crops good at present, but much rain wanted. *Lumphru* crops ripe in Naaf. If no rain falls soon, crops on high lands in Minbya will be destroyed. Crops near Akyab town appear good, but require more rain. Slight damage from insects in Koladan township.
Rangoon ...	0·66	Total rainfall 77·05. One death from small-pox, otherwise public health good. Price of paddy from Rs. 85 to 103 per 100 baskets.
Bassein ...	3·10	Total rainfall 89·58. One death from cholera and 1 death from small-pox in Myaungmya township. Cattle-disease slight in Bassein, Yegyi, and Lemyethna townships; 38 deaths in Myaungmya township. Crops promising, except in parts of Thabaung, Bassein, Ngapataw, and Yegyi townships. Floods have subsided later than usual in Thabaung and unprotected parts of Yegyi. Rain is required for recent plants. Slight damage from insects in four circles computing roughly about ⅛th of the paddy in affected circles is injured. Price of paddy from Rs. 90 to 100 per 100 baskets.
Amherst (Moulmein) ...	0·29	Total rainfall 164·34. Public health and health of cattle good. Slight damage to crops by insects in two circles. Rain much wanted. No actual damage yet, but cultivators anxious; about 10 or 12 per cent. of crops may be lost by continual drought. In Moulmein town public health and health of cattle good. Crops have suffered from insects and on elevated lands from want of rain. Prospects at present not bad. Price of paddy from Rs. 90 to 100 per 100 baskets.
Toungoo ...	0·02	Total rainfall 77·16. Public health and health of cattle good. General appearance of crops good. Damage of crops in some parts suffering from drought, anticipated.
Kyoukphyoo ...	*Nil*	Total rainfall 156·98. Two deaths from cholera in Raori township, otherwise public health good. Health of cattle good.
Sandoway ...	*Nil*	Total rainfall 206·49. Public health good. Early sowings ripening. More rain wanted for later sowings.
Hanthawaddy ...	......	Public health and health of cattle good. Ploughing and sowing completed. Rain wanted in Tamanaing township. Paddy in higher lands with little water beginning to suffer. General appearance of crops good. Price of paddy from Rs. 90 to 120 per 100 baskets.
Pegu	0·35	Total rainfall 119·18. Public health generally good. Cattle-disease lighter than usual at this season and not fatal. Rain has fallen during the week and prospects greatly improved altogether; crop prospects most favourable in low lands. Price of paddy from Rs. 95 to 100 per 100 baskets.
Tharrawaddy (Oct. 20th)	*Nil*	Total rainfall 98·97. Public health and health of cattle good. Ploughing finished and planting progressing. Crops reported in good condition. Reaping commenced, about 141 acres have been reaped in Sangwey township. Price of paddy from Rs. 95 to 125 per 100 baskets.
Do („ 27th)	......	No report received.
Prome ...	Rain has fallen during the week in Mahathaman township, 0·07.	Total rainfall 45·69. Public health and health of cattle good. Two deaths of cattle from small-pox reported from Mahathaman township only. Crops are reported to be in excellent condition. No rain has fallen elsewhere and although as yet no damage has been done, another week of drought is viewed with grave apprehension, as far as the later plantings are concerned. If no rain falls there will be considerable failures in the high-lying lands. A thunderstorm is now impending. Price of paddy Rs. 85 per 100 baskets.
Thonegwa ...	0·22	Total rainfall 83·03. Public health and health of cattle good. Re-planting progressing in Shweyloung township, but without success. Slight damage to crops in Pyapaw and Thonegwa townships. Price of paddy from Rs. 80 to 100 per 100 baskets.
Henzada ...	Good fall of rain at Okpa township on 26th.	Total rainfall 80·28. Public health and health of cattle good. Crops look healthy, but it is anticipated that unless rain falls soon, there will be a light yield of grain, perhaps 30 per cent. below average.
Thayetmyo ...	0·06	Total rainfall 39·73. Public health good. Three deaths from cattle-disease. Rice crop not yet all in ear. In Myede there will be five-sixths of full crops. Rain of three weeks ago would have increased cultivated area, but river floods have done damage in two circles. There may be two-thirds of full crop in Kama. Drought still doing damage there to an extent impossible at present to estimate. In Thayetmyo only one-third of culturable area is planted, a small fraction of this will yield nothing; in Mindon only half or three-fifths of full crops expected. Prices of paddy Rs. 100 per 100 baskets.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
British Burma—*contd.*		
Shwaygyin ...	*Nil*	Total rainfall 137·46. Public health and health of cattle good. Crops progressing favourably. No damage yet reported from want of rain, but owing to subsidence of floods, submerged crops have partly revived. Price of paddy Rs 80 per 100 baskets
Tavoy ...	Some rain fell in district, although none registered in town, 1·46.	Total rainfall 191·82. Public health and health of cattle good. The prospects of crops are reported to be in very good conditon.
Mergui (Oct. 13th)	......	No report received.
		General Remarks.—Public health good. Mortality of cattle very slight. Decided deficiency in the rainfall during the week, compared with last year; total rainfall up to date much less than last year over nearly the entire province The drought has done some injury to crops already and in most districts a continuance of drought seems likely to result in partial destruction of crops on the higher and lighter lands, and serious injury to the later transplanted paddy. Prices keeping up.
Assam— (Oct 31st)		
Gauhati ...	No rain	Weather seasonable. Mornings cool and foggy. *Sali* paddy in Barpetta doing well, but not in Sadr sub-division. Rain much wanted. Public health fair.
Sylhet ...	*Nil*	Crop prospects favourable. Public health generally good.
Silchar ...	*Nil*	Cold weather set in. Outturn of *aus* crops about 10 annas owing to the late floods. Prospects of *sali* crops good. Common rice 17¾ seers per rupee. Sowing of winter crops commenced. Six deaths from small-pox reported from Lakhimpur and 3 from Sadr.
Dibrugarh ...	*Nil*	Weather cold. Prospects of crops good. Cattle-disease reported. Public health good.
Mysore and Coorg— (Oct. 30th)		
Bangalore ...	·17	Standing crops and prospects of season good.
Mysore ...	·57	Crops in fair condition. Prospects continue favourable.
Mercara ...	1·31	Picking of coffee has commenced in some parts. Cardamom crop picked. An average outturn and prices fair. Prospects of rice crop good.
		General Remarks.—Standing crops in all districts reported in good condition. Agricultural operations continue active. Harvesting of paddy, *ragi* crops, gram, and other grains in progress. Public health good generally. Fever prevalent in parts. Prices steady.
Berar & Hyderabad— (Oct. 30th)		
Amraoti ...	.. ...	General prospects good. Some damage has been done by excessive rain to cotton plants. Wheat 16 and *juari* 26 seers per rupee.
Akola ...	......	Standing crops generally good, except cotton which suffered from excessive rain.
Hyderabad ...	·48	Total from 1st January 30·31. *Abi* crops in good condition. Reaping of *kharif* and sowing of *abi* and *tabi* crops continue. Cholera continues in one taluk. Cattle-disease broken out in another. Prices of wheat 15½, coarse rice 11, white *juari* 22½, yellow *juari* 27, and *tur* 22½ seers per current sicca rupee.
Central India States— (Oct. 31st)		
Indore ...	*Nil*	Weather seasonable. Nights cold. Agricultural prospects and health good. Prices steady.
Morar (Gwalior) ...	*Nil*	Health good. Rain wanted in northern districts for *rabi*.
Sutna ...	......	Health and prospects good.
Rutlam ...	... ..	No report received.
Neemuch ...	*Nil*	Weather seasonable. Prices of grain stationary. Public health good.
Goona ...	......	Health fair. Crops good.
Bhopal ...	......	No report received.
Agar ...	*Nil*	Weather seasonable. Health and prospects good.
Sehore ...	*Nil*	Weather clear. Health and prospects good.
Nowgong ...	·68	Rain wanted. *Kharif* prospects fair. Health good. Prices steady.
Manpur (Bhopawar) ...	*Nil*	Prospects good.

Presidency or Province and District.		Rainfall for week under report.	State of agricultural prospects.
Rajputana—			
Abu	(Oct. 31st)	No rain .	Weather seasonable.
Sirohi	(„ 28th)	No rain	Tanks and wells full. Health good. Crop prospects good. Fine mornings and nights. Weather cold.
Marwar	(„ 26th)	No rain	Eight months' water in Jodhpore city. Tanks and wells almost full. Health good. Crop prospects good. Prices steady. Weather cloudy. Nights close and warm.
Meywar	...	......	No report received.
Harowti	(Oct. 27th)	No rain	*Kharif* crops being harvested. Weather clear. Health good.
Jhallawar	(„ 26th)	......	Weather seasonable. Health and prospects good.
Ajmere	(„ 30th)	No rain	Weather seasonable. Ruddy sunsets continue. Sowing for *rabi* proceeds. Health good.
Jeypore	(„ „)	No rain	*Rabi* sowings completed. Weather seasonable. Health good.
Bhurtpore	..	.... .	No report received.
Ulwur	(Oct. 30th)	......	Wells failing. Rain wanted. Slight fever.

By order of the Directors,

BANK OF BENGAL,
Calcutta, 1st November 1883.

J. GORDON.
Chief Acctt. & Depy. Secretary.

R. HARDIE.
Secy. & Treasurer.

TREASURE TROVE.

It is hereby notified, under Section 5 of the Indian Treasure Trove Act (VI of 1878), that on or about the 16th August 1883, treasure, consisting of 18 star pagodas, *i.e.*, 14 "Varahalu" and 4 "Madalu," valued in the aggregate at R64, were discovered by certain persons ploughing Imam field No. 983, belonging to one Bhupanapaud Seethayya of Parriem village in the Nandyal Taluq, Kurnool District, in the Madras Presidency.

Any person or persons claiming the said treasure, or any part thereof, are hereby required to appear personally or by agent before the Collector of Kurnool, at Kurnool, on April 1st 1884, in order to the matter being inquired into and determined in accordance with the provisions of the law.

W. H. GLENNY,
Collector.

BOARD OF REVENUE.

NOTIFICATION.

Calcutta, the 27th September 1883.

No. 1135½ B.—The following rules have been made under section 9 of Act VIII of 1878 by the Board of Revenue, Lower Provinces, with the sanction of the Local Government, and are under Section 204 of the same Act notified for general information:—

CALCUTTA INTERNATIONAL EXHIBITION, 1883-84.
Custom House Arrangements.

1. All entries of goods for the Exhibition must be passed at the Custom House in accordance with the arrangements made by the Collector of Customs.
2. In respect of dutiable goods the Exhibition building is appointed a public warehouse under the provisions of section 15 of Act VIII of 1878, of which Mr. Jules Joubert shall be deemed to be the keeper for the purposes of section 96 of that Act.
3. Packages containing dutiable goods, upon which duty has not been paid, must be entered for bond and appraised and taken in charge of an officer to the Exhibition building in the usual manner. Pending appraisement and removal to the Exhibition building, all such packages will be allowed to remain rent-free in a portion of the Custom House premises set apart for the purpose.
4. At the close of the Exhibition, exhibitors will have to account to the Custom House authorities for all dutiable goods admitted into the Exhibition in accordance with the bond bill of entry. Goods intended for delivery in Calcutta on sale or otherwise will on payment of duty be cleared from bond, and goods intended for re-exportation will be re-shipped from bond in the usual manner.
5. The charges mentioned in the schedule attached to these rules are remitted in respect of goods intended for the Exhibition.
6. No duty will be payable for wines, spirits, or other liquors consumed in the Exhibition for tasting or judging purposes, and a certificate of the amount thus consumed must be obtained from the Secretary to the Executive Committee of the Exhibition and presented by exhibitors to the Custom House officer when accounting for the dutiable goods admitted into the Exhibition. Without such certificate duty will be assessed on all dutiable goods shown by the bills of entry as having been admitted into the Exhibition and which are not forthcoming at its close.
7. The Custom House officers will not have custody of, or be in any way responsible for, goods in the Exhibition building, the custody of which as a public warehouse will rest with Mr. Jules Joubert.
8. These rules apply only to goods intended *boná fide* for Exhibition.

SCHEDULE.

HENRY F. BLANFORD,
Meteorological Reporter to the Government of India.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The "Indian Law Reports," published under the authority of the Governor General in Council, will appear in monthly parts, published as soon as possible after the first of each month at

Calcutta, Madras, Bombay, and Allahabad, and will comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court will be reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court will be reported in the Calcutta Series. The Parts of each Series can be had separately, or all four Parts can be had stitched into one wrapper at the option of subscribers and purchasers. It will be observed from the following statement of the terms of subscription and sale, that a considerable reduction is allowed to persons taking the complete set:

Terms of subscription, payable annually in advance.

	Without Postage.	With Postage.
For the CALCUTTA SERIES	R35	R37-8
" MADRAS SERIES	" 8	" 9
" BOMBAY SERIES	" 8	" 9
" ALLAHABAD SERIES	" 8	" 9
Complete set	" 45	" 47-8

The price of each Part purchased separately will vary according to the amount of matter it contains, and will be printed on the wrapper. It will, however, never be below the following:—

	R	
For a Part of the CALCUTTA SERIES	R3	8
" " MADRAS SERIES	" 1	0
" " BOMBAY SERIES	" 1	0
" " ALLAHABAD SERIES	" 1	0
Complete set	" 4	0

Persons desiring to subscribe for or purchase the Reports, should apply to—

MESSRS. THACKER, SPINK AND CO., CALCUTTA;
MESSRS. THACKER AND CO., BOMBAY;
MESSRS. HIGGINBOTHAM AND CO., MADRAS;
THE GOVERNMENT CENTRAL BOOK DEPOT, BOMBAY;
THE GOVERNMENT BOOK DEPOT, ALLAHABAD.

Orders and Subscriptions for 1878 should be at once remitted.

THE BENGAL LAW REPORTS.

A few sets of the Bengal Law Reports (Volumes 1 to 15) are available at Messrs. Thacker, Spink & Co., Calcutta, at R375 a set.

List of Books for sale at the Library of the Asiatic Society of Bengal,

No. 57, PARK STREET, CALCUTTA,

UNCOVENANTED S. F. P. FUND;
CALCUTTA,
The 18th October 1883.

PROMISSORY NOTES.

Lost.

The Government Promissory Note, No. 021728, of the 4 per cent. Loan of 1879, for R700, originally standing in the name of the Dewan of Mysore, the proprietor, by whom it was never endorsed to any one, but bearing an unsigned endorsement for renewal. Interest has been drawn on the Note up to the 15th July 1883. Payment of the Note and of the interest thereupon have been stopped at the Public Debt Offices, Banks of Bengal, Madras and Bombay, and application is about to be made for the issue of duplicate in favor of the proprietor.

T. SRINIVASSIENGAR,
Under-Secy. to the Dewan of Mysore

BANGALORE,

Executive Engineer, Northern Division, Ganges Canal, reports that there was severe drought during the first three weeks of the month, after which there were scattered showers, which sufficed for miscellaneous crops. A heavy flood in the Ganges on the 6th checked supply in canal for three days.

Executive Engineer, Anúpshahr Branch, Ganges Canal, reports that there has been a great demand since the 10th August, but, owing to small areas of cane and indigo, the area irrigated does not exceed that of last year.

Executive Engineer, Meerut Division, Ganges Canal, reports that demand was full in the upper half of the Division during the whole month, and began about August 5th. The canal was maintained to full supply, and the very greatest difficulty was experienced in getting water equally distributed owing to the great gul clearance.

Executive Engineer, Bulandshahr Division, Ganges Canal, reports that the increase in irrigated area is due to the drought which commenced about the 4th August. More might have been done, if so large an area of old irrigation had not required water at the same time. The indigo stood the drought well, but got water about the end of August.

Executive Engineer, A[illegible] Division, Ganges Canal, reports that the long break in the rains [illegible]tated the opening of all distributaries between the 6th and 11th instant. The demand for water was very great till the 21st, when a general fall of rain was registered in the Division, varying from half an inch to three inches; this had the effect of stopping irrigation on some channels and reducing the demand for canal water.

Executive Engineer, Mainpuri Division, Lower Ganges Canal, reports a strong general demand for water from the 10th to the 20th; after that date demand limited to the central portion of the division. The increased area irrigated during the month is due entirely to the failure of the rains, and, it will be seen, is mainly under food grains. Average rainfall during the month over the whole Division 3 1 inch, but over the central portion only 1·3 inches.

Executive Engineer, Cawnpore Division, Lower Ganges Canal, reports that the decrease is due to the reasons noted in the return for May.

Executive Engineer, Bhognipur Division, Lower Ganges Canal, reports that hot west winds during the first half of the month caused general demand for irrigation, so distributaries were re-opened from the 15th, but heavy general rain falling from the 20th to the 23rd stopped all further demand during the month.

Executive Engineer, Eastern Jumna Canal, reports that the decrease in sugarcane and rice was explained in previous reports. The extended irrigation of other crops was mainly practised during the last few days of the month, and very little of it has come into this month's return. There was a serious stoppage of rain from the 17th July to the 27th August.

Executive Engineer, Agra Canal, reports that the dryness of the season caused some 5,000 acres of cotton and juar, &c., to be watered in August, chiefly in the Gurgaon and Muttra districts, but water was chiefly given to canal crops.

Executive Engineer, Rohilkhand Canals, reports that there was general light rain on the 4th, except at Bareilly and Nawabganj, and occasional showers until general rain fell on the 21st, and again still heavier rain from the 26th to the 28th, up to which date water was in steady demand for rice and kharif grain crops. Demand has temporarily ceased now in the 2nd sub-division, but more rain is wanted for rice in the 1st sub-division. All the earthen dams have been breached again. All the water was being utilized during the month, except in Dehra, where dams were broken and the river in flood.

Executive Engineer, Dún Canals, reports light but sufficient rain during the month, and a considerable falling-off in area of sugarcane, owing to little profit being realized from it last year.

No remarks from the other Divisions.

ALLAHABAD,
The 26th September 1883.

W. P. V. HÖRST,
Offg. Asst. Secy. to Govt., N.-W. P. and Oudh,

ALLAHABAD,
The 26th September 1883.

W. P. V. HORST,
Offg. Asst. Secy. to Govt., N.-W. P. & Oudh, P. W. D., Irrigation Branch.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

IRRIGATION OPERATIONS OF FASL KHARIF IN THE PUNJAB FOR 1883-84. UP TO 31st AUGUST 1883.

Canal Division.	Water distributed during August 1883. Depth in canal at regulating gauge. Full supply.	Actual throughout.	Gross consumption, cubic feet per second. Estimated full supply.	Actual average throughout.	Navigation, Return Canal. Principal items of traffic. Up.	Down.	Land irrigated (approximate). Zila.	Acres.	Rainfall. Average.	During month.	Chief crops (approximate). Name.	Area in acres.	Remarks.
Bári Doáb Canal. 1st Division	4·9	5·3	3,073·6	1,612	...	...	Gurdáspur	17,781	8·18	4·1	Cotton	21,921	The Bári Doáb Canal was closed for 17 hours on the 12th August for the repair of rapid No. 7. There is an increase of 21,147 acres, as compared with the corresponding month of last year; this is due to the partial failure of the rains which has necessitated the irrigation of much Jowár, Chari, and other fodder crops usually dependant on the rainfall. There has been heavy and general rain in September, so that the demand has since fallen off; but this Kharif promises to be the largest on record. The increase of irrigation during the month was 38,578 acres.
2nd Division, Main Branch, Lower	4 6	4·0		1,219	...	...	Amritsar	54,833	8·16	3·25	Rice	20,650

Mr. Hugh Cecil Cookson, North-Western Provinces, Punjab and Oudh.

Mr. William Hey Cobb, North-Western Provinces, Punjab and Oudh.

Mr. Percy Comyn Lyon, Bengal (Lower Provinces).

Mr. Norman Goodford Cholmeley, Burma.

Mr. Walter Maude, Bengal (Lower Provinces).

Mr. Arthur William Rees Cadell, Bengal (Lower Provinces).

Mr. John Lumgair Herald, Bengal (Lower Provinces).

Mr. John Stratheden Campbell, North-Western Provinces, Punjab and Oudh.

Mr. James Henry Monahan, Bengal (Lower Provinces).

MEDICAL.

The 3rd November 1883.

No. 396.—The services of Surgeon W. Deane are replaced at the disposal of the Military Department, with effect from the forenoon of the 2nd October 1883.

The 8th November 1883.

No. 399.—The services of Surgeon G. A. Dundas are replaced at the disposal of the Military Department, with effect from the afternoon of the 4th August 1883.

A. MACKENZIE,
Secy. to the Govt. of India.

FOREIGN DEPARTMENT.

NOTIFICATIONS.—POLITICAL.

Simla, the 6th November, 1883.

No. 2568 *G.*—With reference to Foreign Department Notification, No. 1427 G., dated the 16th May, 1883, Monsieur J. Gallian, Consul-General for Italy, at Calcutta, resumed charge of his office on the 25th October, 1883.

The 8th November 1883.

No. 2587 *G.*—Subject to the confirmation of Her Majesty's Government, the Governor General in Council is pleased to recognize Mr. James Duncan as in charge of the Netherlands Consulate, at Rangoon, during the absence of Mr. J. E. Borland.

No. 2589 *G.*—With the sanction of Her Majesty's Government, the Governor-General in Council is pleased to recognize the appointment of Mr. G. Buhmeyer as Consul for Austria, at Rangoon.

GENERAL.

The 1st November, 1883.

No. 2454 *A.G.*—Mr. H. S. Barnes, C.S., Officiating Political Assistant of the 1st Class, and Political Agent in Pishin, is appointed to be a Political Agent of the 3rd Class, and is posted as Political Agent in Quetta and Pishin, with effect from the 8th June, 1883.

No. 2454 *C.G.*—Subject to the sanction of Her Majesty's Secretary of State for India, Mr. J. A. Crawford, Bombay Civil Service, is appointed to be a Political Assistant of the 3rd Class, and is posted as an Attaché in the Foreign Department.

Mr. Crawford is appointed to officiate as a Political Assistant of the 1st Class.

The 6th November, 1883.

No. 2571 *G.*—Captain W. H. C. Wyllie, C.I.E., Political Agent of the 3rd Class, is posted as Assistant Commissioner of Ajmere, with effect from the date of assuming charge.

The 8th November, 1883.

No. 2581 *G.*—Surgeon G. H. D. Gimlette, M.D., Indian Medical Service, is appointed to be Residency Surgeon at Katmandhu, with effect from the date of assuming charge, *vice* Brigade-Surgeon J. Browne, M.D.

No. 2583 *G.*—The services of Brigade-Surgeon J. Browne, M.D., are replaced at the disposal of the Military Department.

No. 2585 *G.*—Surgeon-Major O. T. Duke, M.B., Indian Medical Service, is appointed to officiate as a Political Agent of the 3rd Class, and is posted for special duty under the orders of the Governor-General's Agent in Biluchistan, with effect from the date of assuming charge.

No. 2595 *G.*—Captain J. H. Newill, Political Assistant of the 1st Class, is posted as an Assistant to the Governor-General's Agent in Rajputana, with effect from the date of assuming charge.

JUDICIAL.

No. 2597 *G.*—Captain J. H. Newill, Assistant to the Agent to the Governor-General in Rajputana, is appointed to be Magistrate of Abu and Assistant to the General Superintendent of Operations for the Suppression of Thuggee and Dacoity in Lower Rajputana, with effect from the date of assuming charge.

While acting in the capacity of Magistrate at Abu, Captain Newill will exercise the powers of a Magistrate of the District as described in the Code of Criminal Procedure.

Captain Newill will also, during the same period, exercise the powers of a District Court for hearing original suits, whatever be the amount or value of the subject-matter, at Abu.

C. GRANT,

Secretary to the Government of India.

DEPARTMENT OF FINANCE AND COMMERCE.

NOTIFICATIONS.

Simla, the 6th November 1883.

No. 4196.—Privilege leave for two months, beginning on the 22nd November 1883, is granted to Mr. D. M. Barbour, B.C.S., Secretary to the Government of India in the Department of Finance and Commerce.

Mr. J. Westland, B.C.S., is appointed to officiate as Secretary to the Government of India in the Department of Finance and Commerce, during the absence on leave of Mr. Barbour.

Mr. E. F. T. Atkinson, B.C.S., is appointed to officiate as Comptroller General and Head Commissioner of Paper Currency, *vice* Mr. Westland.

J. F. FINLAY,

Offg. Under-Secy. to the Govt. of India.

The following Addenda and Corrigenda to the Codes of the Financial Department are published for general information :—

The 8th November 1883.

No. 4265.

C. P. C.

Page 31.

Section 70.

Insert the following as Rule 4A. under this Section :—

4A. In the State Railway Revenue Establishment, the different classes of service are as follows :—

(*a*) *Permanent pensionable,* that is—

Service in all permanent appointments made before the 1st September 1881, and service of officers, such as Civil Engineers and members of the Engineer and Upper Subordinate Establishment, who may be transferred to the Revenue Establishment as Managers, &c., even after 31st August 1881.

(*b*) *Permanent non-pensionable,* that is—

Service in all permanent appointments made after 31st August 1881, except as allowed for in clause (*a*).

(*c*) *Temporary,* that is—

Service in appointments made from time to time for periods not exceeding six months, according to the requirements of traffic.

(*d*) *Special service,* that is—

Service of engine drivers, firemen, and mechanics, &c., under covenant with the Secretary of State.

C. L. C.

Page 181.

Section 125.

Insert the following Note under this Section :—

[NOTE.—Members, Superior and Subordinate, of the State Railway Revenue Establishment, whose service is classed under clauses (*a*) and (*b*) in Rule 4A. under Section 70 of the Civil Pension Code, are entitled to leave under the Rules in this Chapter.]

Page 186.

Section 126.

Substitute the following for Exception (5) under this Section :—

(5) Leave on medical certificate, with half pay to the extent of 60 days in any calendar year, may, in addition to any leave admissible under the Rules in this chapter, be granted, at the discretion of the Manager, to drivers and other subordinate employés of the State Railway Revenue Establishment, whose service is classed under clauses (*a*) and (*b*) in Rule 4A. under Section 70 of the Civil Pension Code, and who are employed exclusively on out-door work, provided the illness has not been caused by the man's misconduct. The leave thus granted is included in the leave to which the limit of three years prescribed in Section 127 applies.

Insert the following as Exception (6) under this Section :—

(6) Members, subordinate, of the State Railway Revenue Establishment, whose service is classed under clause (*d*) in Rule 4A. under Section 70 of the Civil Pension Code, may, at the discretion of the Manager, be allowed privilege leave on full pay to the extent of one month in twelve, and also leave on medical certificate on half pay to the extent of 60 days in one calendar year, provided the illness has not been caused by misconduct. In the case of deserving men, the Manager may extend the leave on medical certificate admissible under this rule to a maximum of six months in one calendar year.

Pages 186 and 187.

Section 126, Rule 7.

Strike out the words in italics in the passage within parenthesis in this Rule.

Insert the following Note under the Rule:—

[NOTE.—This Rule does not apply to officers whose service is classed under clauses (c) and (d) in Rule 4A. under Section 70 of the Civil Pension Code.]

Page 187.

Section 127, Rule 1.

Strike out the passage within parenthesis.

Insert the following Note under this Rule:—

[NOTE.—See Note under Rule 7, Section 126.]

Pages 189 and 190.

Section 136, Rule 2.

Insert the following Note under this Rule:—

[NOTE.—See Note under Rule 7, Section 126.]

Page 190.

Section 136.

Cancel Rule 3.

Rule 4.

For the words "a subordinate" at the end of the Rule, substitute the following:—

"Officers whose case forms Exceptions (5) and (6) under Section 126."

Rule 5.

Substitute the following for this Rule:—

5. In applying Rule 1 under Section 73 to officers whose case forms *Exceptions (5) and (6)* under Section 126, the words "otherwise than as provided by *Exceptions (5) and (6)* under Section 126 should be added after certificate."

The 9th November 1883.

No. 4318.—Mr. E. J. Sinkinson, Officiating Accountant General and Deputy Commissioner of the Department of Issue of Paper Currency, North-Western Provinces and Oudh, having returned from privilege leave, resumed charge of his duties before noon on the 1st November 1883.

Privilege leave for three months having been granted to Mr. R. Logan, Officiating Accountant General and Deputy Commissioner of the Department of Issue of Paper Currency, North-Western Provinces and Oudh, Mr. Logan made over charge of his duties after noon on the 31st October 1883, and availed himself of leave, with effect from the 1st November 1883.

D. M. BARBOUR,
Secy. to the Govt. of India.

MILITARY DEPARTMENT.

Simla, the 9th November, 1883.

APPOINTMENTS.

Colonel H. C. Anderson, Bengal,—1st August, 1883,

in consequence of the transfer to the Unemployed Supernumerary List of the undermentioned officers on the dates specified:—

Lieutenant-General F. C. Maisey, Bengal Infantry,—16th July, 1883.
Major-General H B Stevens, Bengal Infantry,—16th July, 1883.
Major General J. Buchanan, Madras Cavalry,—16th July, 1883.
Major-General W. M. Cafe, V.C., Bengal Infantry,—16th July, 1883.
Colonel (Major-General on the Indian Gradation List) H. S Obbard, Bengal Staff Corps,—20th July, 1883.
Lieutenant-General W. H. Watts, Madras Infantry,—1st August, 1883.
Major-General G. T. Radcliffe, Madras Cavalry,—1st August, 1883.

No. 595.—MILITARY SECRETARIAT—

Captain J. E. Broadbent, R.E., Assistant Secretary to the Government of India in the Military Department, is promoted from Executive Engineer, 2nd grade, to Executive Engineer, 1st grade. Dated 23rd July, 1883.

No. 596.—NATIVE ARMY—

6th Native Infantry.

Jemadar Sibdial Sing to be Subadar, *vice* Soonder Misser, deceased; Havildar Soonder Sing to be Jemadar, *vice* Sibdial Sing, promoted,—9th August, 1883.

MILITARY WORKS DEPARTMENT.

PROMOTIONS.

No. 597.—The following promotions, *sub. pro tem.*, are made in the Engineering Establishment, with effect from the 23rd July, 1883:—

Captain S. C. Turner, R.E., Executive Engineer, 2nd grade, to the 1st grade.

Captain C. H. Brookes, R.E., Executive Engineer, 3rd grade, to the 2nd grade.

Captain S Grant, R.E., Executive Engineer, 4th grade, to the 3rd grade.

Captain A. C. Bruce, R.E., Assistant Engineer, 1st grade, to Executive Engineer, 4th grade.

G. CHESNEY,
Secretary to the Government of India.

PUBLIC WORKS DEPARTMENT.

NOTIFICATIONS.

Simla, the 7th November 1883.

No. 271.—During the absence of the Accountant General, Public Works Department, from Simla, Mr. J. C. Ledger, Executive Engineer, 1st grade, sub. *pro tem.*, attached to the Office of the Director General of Railways, will have charge of the Office of Deputy Examiner, State Railway Stores.

The 8th November 1883.

No. 272.—Mr. A. Morton, Class III, State Railway Revenue Establishment, Locomotive Department, is appointed to officiate, in addition to his own duties, as Manager of His Highness the Nizam's State Railway during the absence on privilege leave of Mr. H. W. Warden, or until further orders.

No. 274.—With reference to Public Works Department Notification No. 232, dated 16th October 1883, the services of the following Assistant Engineers, 2nd Grade, State Railways, are placed at the disposal of the Director General of Railways :—

Mr. H. S. Jones.
" H. McMillan.
" J. N. A. Eaton.

The 9th November 1883.

No. 275.—Mr. J. F. H. Collet, Assistant Engineer, 2nd Grade, Railway Branch, is transferred from the Establishment under the Director General of Railways to that under the Government of Bengal.

Mr. H. E. Haddon, Assistant Engineer, 1st Grade, Railway Branch, is transferred from the Establishment under the Government of Bengal to that under the Director General of Railways.

W. S. TREVOR, *Colonel, R.E.*,
Secy. to the Govt. of India.

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

DESTRUCTION OF WILD ANIMALS AND VENOMOUS SNAKES IN BRITISH INDIA.

No. $\frac{48}{1618-1628}$.

Extract from the Proceedings of the Government of India in the Home Department (Public),— dated Simla, the 3rd November 1883.

Read—

Resolution of the Home Department, No. 48—1780-90, dated 8th November 1882, reviewing the reports on the results of the measures adopted for exterminating wild animals and poisonous snakes in British India during the year 1881.

Read also the following letters from the Local Governments and Administrations submitting returns for the year 1882, and reports of special measures adopted in some cases:—

From the Government of Madras, No. 738A., dated 11th June 1883.
" " Bombay, No. 3052, dated 21st August 1883.
" " Bengal, No. 2531, dated 18th September 1883.
" " North-Western Provinces and Oudh, No. 2725, dated 1st August 1883.
" " Punjab, No. 1512, dated 29th June 1883.
" Chief Commissioner, Central Provinces, No. 1508-81, dated 12th April 1883.
" " British Burma, No. 482-66N., dated 19th March 1883.
" " Coorg, No. 2-1, dated 2nd April 1883.
" " Assam, No. 712, dated 25th May 1883.
" Resident at Hyderabad, No. 258, dated 27th June 1883.
" Chief Commissioner, Ajmere and Mhairwarra, No. 399, dated 16th May 1883.

RESOLUTION.

The Statement appended to this Resolution shows in detail for each Province the number of persons and cattle killed by wild animals and snakes, and the number of wild animals and snakes destroyed, with the rewards paid for their destruction during the year 1882, as compared with the previous year.

2. The following tables compare the general results of the year under report with those of the previous year:—

Number of human beings and cattle reported killed.

	Persons killed.						Cattle killed.					
	By wild animals.		By snakes.		Total.		By wild animals.		By snakes.		Total.	
	1881.	1882.	1881.	1883.	1881.	1882.	1881.	1883.	1881.	1882.	1881.	1882.

3. These figures show that the number of human beings killed has risen from 21,427 to 22,125, and of cattle from 43,669 to 46,707. If the cattle be valued at Rs. 20 per head, the actual money loss to the cultivators was Rs. 9,34,140. The largest mortality, as in the previous year, occurred in Bengal and in the North-Western Provinces and Oudh, in which Provinces 16,531 persons were returned as killed :—

	Bengal.	N. W. P. & Oudh.
By wild animals	1,267	393
„ snakes	9,191	5,680
	10,458	6,073

Snake-bite caused 19,519 of the total number of deaths. Of the remaining deaths, 895 were caused by tigers, 278 by wolves, and 207 by leopards. Under the head caused by " other animals " 1,037 deaths are shown, of which 661 occurred in Bengal and 143 in the North-Western Provinces and Oudh. Of the 661 deaths in Bengal, 359 were by jackals and 202 by alligators. No details are given in the North-Western Provinces and Oudh returns of the " other animals " which caused 143 deaths in those Provinces. Nor are the details under this head given in the returns of the Provinces of Madras, Punjab, Central Provinces, and British Burma.

It is noticed that in some cases deaths caused by domesticated animals and by hornets, bees, wasps, poisonous lizards, scorpions, and the like, are entered. Such deaths should not be shown in these returns.

4. The loss of cattle by wild animals and snakes amounted to 46,707 head, an increase of 3,038 over the figures of last year. The heaviest loss is reported from the Madras Presidency, *viz.*, 9,703 head. Bengal and the North-Western Provinces and Oudh were the next heaviest sufferers in this respect, the loss in these Provinces having amounted to 8,560 and 8,601 respectively. Tigers, leopards, and wolves were most destructive and account for 40,788 deaths, as under—

Tigers	16,157
Leopards	15,970
Wolves	8,661

Tigers and leopards were particularly destructive to cattle in the Central Provinces, the North-Western Provinces and Oudh, and wolves in the North-Western Provinces and Oudh and the Hyderabad Assigned Districts.

It is noticed that the Government of the North-Western Provinces and Oudh has directed the inclusion in the returns of sheep and goats under the heading " cattle." The attention of that Government is invited to paragraph 2 of the Resolution of this Department No. 48—1585-95, dated the 4th October 1881, which ordered the exclusion of sheep and goats from these returns.

5. The number of wild animals destroyed has increased from 15,279 to 18,591. The most satisfactory increase occurred in the Madras Presidency, where under the orders of the Local Government the full amount of the sanctioned reward is now given in every case, the practice hitherto having been to pay the full amount only in special cases. The number of wild animals destroyed in Bengal was 5,867 against 4,213 in the previous year; but the figures for the year under report erroneously include 879 dogs killed at Barrackpore, and also apparently a number of jackal cubs, for which rewards were paid in the belief that they were wolf cubs. The increase in this respect in the Central Provinces from 1,351 to 1,608 and in British Burma from 1,059 to 1,378 is satisfactory. In the North-Western Provinces and Oudh and Assam there was a decline in the number of wild animals destroyed, while the rise in the Bombay Presidency from 1,367 to 1,824 in the year under review was chiefly due to 870 animals being shown under the head "other animals" against the Thar and Parkur districts. No details of how this number is composed are given. In the other Provinces no appreciable increase has taken place.

6. The only Provinces which show a large destruction of snakes are Bombay, Bengal, the North-Western Provinces and Oudh, and the Punjab. The first mentioned Province returns 262,348 out of a total of 322,421 shown as destroyed throughout British India. In the other three Provinces the figures respectively stand at 32,187, 16,389, and 6,065. The large number of snakes killed in the Patna Division is explained to be mainly due to the prompt payment of rewards. Under the system sanctioned by the Local Governments last year, rewards are paid on the authority of certificates granted by selected indigo-planters, who not only grant certificates, but are also generally empowered to pay the rewards, and recoup themselves by bills, supported by the certificates as vouchers. This system meets with the entire approval of the Government of India. The Governor General in Council trusts that Municipalities will continue to pay attention to this matter, as it is chiefly in such places that measures of extermination are likely to prove most successful. At the same time Local Authorities should not fail to remember that one of the most effectual practical means of diminishing the danger to human life from venomous snakes is the removal from town or village sites or their vicinity of aloe, cactus or thorn hedges, ruined houses and walls, and the like, which harbour and afford cover to these reptiles.

7. The total amount paid in rewards compared with the preceding year was as follows:—

	For the destruction of—		
	Wild animals.	Snakes.	Total.
	Rs.	Rs.	Rs.
1881 ...	90,850	... 11,961	... 1,02,811
1882 ...	1,26,781	... 14,873	... 1,41,654
Increase ...	35,931	... 2,912	... 38,813

There was thus an increase of Rs. 35,931 in the expenditure incurred in the destruction of wild beasts and Rs. 2,912 in killing snakes. This result is principally due to increased rates of rewards given in Madras and British Burma, as well as to the larger number of animals destroyed in these Provinces.

8. The special measures adopted in the North-Western Provinces and Oudh, to which reference was made in paragraphs 6 and 7 in the Home Department Resolution of the 8th November 1882, have not proved satisfactory. In place of those measures the Local Government has sanctioned the grant of more liberal rewards in the divisions and districts which have been specially exposed to the ravages of wolves; and of a reward of 2 annas per head for all venomous snakes killed outside of municipal limits.

9. The results are, on the whole, slightly more satisfactory than in the previous year, so far as the returns relate to persons killed by wild animals; but cattle deaths and the mortality caused by snake-bites are considerably in advance of the previous year's figures. The Government of India again desire to express an earnest hope that practical measures to reduce the lamentable loss of life caused by wild animals and snakes will be energetically prosecuted by all Local Governments and Administrations.

Order.—Ordered, that this Resolution, with the appended Table, be forwarded to Local Governments and Administrations for information and guidance, and that it be published in the Supplement to the *Gazette of India*.

B

IMPORTATION OF PETROLEUM INTO INDIA.

No. 934, dated Calcutta, the 16th July 1883.

From—C. MACAULAY, Esq., Secretary to the Government of Bengal,
To—The Secretary to the Government of India, Home Department.

With your letter No. 891, dated the 26th June 1882, were forwarded two sets of rules framed by the Government of India under sections 7 and 9 of the Petroleum Act, VIII of 1881, and it was stated that if the Lieutenant-Governor found them sufficient for the purpose of controlling the petroleum trade in Bengal, and was prepared to accept them as they stood, they might be taken as sanctioned by the Government of India, and published under section 18 of the Act. If, on the other hand, they were found to be incomplete or inaccurate, it was requested that they might be resubmitted with the necessary explanations and amendments as soon as practicable.

2. As it was urgently necessary that Government should have legal power to stop cargoes of "dangerous petroleum" before their arrival within the port of Calcutta, the rules under section 7 were published under the notification of this Government, dated the 18th July 1882, in the form in which they had been received from the Government of India. They were, however, only intended to be merely provisional to obviate immediate inconvenience, and they were therefore simultaneously referred to the Bengal Chamber of Commerce for such modifications as they might desire to suggest. The publication of the rules under section 9 was postponed pending the receipt of the opinion of the Chamber as to their general applicability. The Chamber, however, expressed no opinion of their own in the matter. Meanwhile proposals were received from merchants interested in the petroleum trade for the establishment of a depôt for the landing and storage of oil at Matealnooj. As these proposals opened up other questions connected with the rules to be adopted, it was considered desirable that the subject should be considered as a whole. The Lieutenant-Governor therefore referred the question of the rules to be issued under section 9, and the measures to be taken to facilitate the storage, testing, and passing of oil, to a Committee specially appointed for the purpose. As the result of their deliberations, the Committee have submitted certain proposals which, if adopted, will necessitate considerable modifications in the rules under both section 7 and section 9. I am accordingly directed to submit, for the consideration of the Government of India, the accompanying copy of the Committee's report, and the dissents which have been recorded by some of their number, together with the following remarks of the Lieutenant-Governor.

3. Among other proposals, the Committee have, in paragraphs 9 to 18 of their report, recommended the adoption of a certain procedure in dealing with the case of oils either covered by a recognised certificate or not so covered, which, on arrival in India, and after landing is permitted, are found not to satisfy the test required by the Act; or, in other words, come under the definition of "dangerous petroleum." It appears to the Lieutenant-Governor, however, that before the course proposed by even the majority of the Committee can be adopted, and indeed before such measures as have already been adopted under the orders of Government during the past twelve months can be legally taken, it is necessary that the law should be amended. The word "import" is defined to mean "to bring into British India by sea or land." Any petroleum having its flashing point (*i.e.*, the *lowest* temperature at which it flashes) below 73° is "dangerous petroleum," and the law only provides for the import of dangerous petroleum under certain conditions, one of which is that it be declared that only dangerous petroleum can be used for the purpose for which the petroleum is intended. The law clearly contemplates proof that petroleum flashes at or above 73° before it can be landed [*vide* section 7, clause (*b*)] except as dangerous petroleum under license. The procedure recommended cannot therefore be prescribed by rules under the existing law. The proposals of the Committee can only be considered on the understanding that the law will be amended so as to render their adoption legal.

4. The principal points in the Committee's report which require consideration are—(1) whether American certificates should, under any circumstances, be accepted as conclusive, rendering a further test in this country unnecessary; and (2) whether the present definition of "dangerous petroleum" should be rigidly adhered to, and any oil which gives a single flash below 73° be considered dangerous.

As regards the first point, the Lieutenant-Governor agrees with the majority of the Committee in thinking that neither the American certificates nor any other well-recognized certificates can be accepted as obviating the necessity for testing the oil in India. The question is not whether the certificates which accompany the oil are reliable or not. Such certificates are possibly sufficient to prove that the oil, when tested at the port of shipment, gave a *bonâ fide* flash at or above 73° as certified; but experience has shewn that the same oil, on arrival in India, sometimes flashes at a lower temperature, and it is to avoid the risk of oil below the prescribed limit coming into the Indian market that the test in this country is necessary. The object is to provide, not against explosions in America or elsewhere, but against explosions in India. The Committee have recorded their opinion that, so

far as they are aware, "in no country where oil is imported, and where a standard exists, is the American certificate accepted as being conclusive," and the Lieutenant-Governor thinks that in India the Government can place itself in no more advanced position in this matter than other countries, which enforce a test. Indeed, in India there is all the stronger reason for enforcing a test on account of the great climatic differences, and the results of the experiments conducted last year by Mr. Redwood and the Government Chemical Analysts in Calcutta. The arguments put forward by Mr. Libby, of New York, in his letter of the 21st December last, a copy of which was received with your endorsement No. 111 of the 26th January last, in support of the proposal to accept the American certificates as conclusive, are therefore inconclusive, and the Lieutenant-Governor would not attach any importance to them.

5. As regards the second point, the Lieutenant-Governor thinks it is incumbent on Government to guard especially against any tendency to introduce inferior and more dangerous oils into Indian consumption. The question of limit of standard was fully considered before the Act of 1881 was passed; and after the fullest enquiry and consideration, in the course of which different standards were suggested, it was eventually decided that 73° was the lowest limit which could possibly be allowed. Though the importation and landing of all cargoes of oil for the purposes of testing in the manner proposed by the Committee might be legalised, the Lieutenant-Governor is of opinion that Government should adhere to the present legal standard of 73°, below which no oil should pass into use; and that, instead of the discretionary power which it is proposed should be exercised by Government in passing oil slightly below the standard, a provision should be made that, in the event of a flash, other than the first flash,—which should be disregarded,—being obtained below 73°, while if the average result of a number of samples does not fall below 70°, it shall devolve upon the consignee to pay a penalty of (as Messrs. Schroder, Smidt and Company suggest) three annas a case to Government, and to bear all the expenses of exposing such oil till its quality is improved so as to reach the legal standard. The result of such a procedure, which legislation could secure, would be to induce a careful exportation from America; to maintain the legal standard; and to ensure, as far as India is concerned, that no dangerous oil passed into consumption.

6. With reference to paragraphs 19 to 25 of their report, the Lieutenant-Governor agrees with the Committee in thinking that the establishment of a depôt of the kind described by them for the landing and storage of petroleum is desirable. It is not clear, however, that Ma'eabrooj would be the best site for it. A scheme is now under consideration for improving the port accommodation by constructing docks and jetties at or near Garden Reach, and this may interfere with the selection of Mateabrooj. Moreover, the Lieutenant-Governor does not see why, with the railway completed to Diamond Harbour, the depôt should not be placed there; but if this is to be done, it will be necessary to indent for a competent Examiner from England for this particular duty, and to fix his residence at Diamond Harbour. The rapid expansion of the trade appears to justify this course, and it is unlikely that the Chemical Examiner to Government, with all his other duties, would be equal to the requirements of the petroleum business.

7. The Lieutenant-Governor agrees with the Committee in the recommendations made by them in paragraphs 26 and 27 of their report regarding oil intended for batching and lubricating purposes, and small quantities of oil imported from the United Kingdom in iron drums, and in the rules proposed by them under section 9 of the Act.

No. 2621, dated Calcutta, the 8th June 1883.

From—H. J. REYNOLDS, Esq., President of the Petroleum Committee,

To—The Secretary to the Government of Bengal.

With reference to Mr. Baker's endorsement No. 393, dated the 19th February, I have the honour to submit, for the consideration and orders of Government, the report of the Committee appointed to report on the measures to be taken to facilitate the storage, testing and passing of oil, and the rules to be issued under section 9 of the Petroleum Act VIII of 1881.

REPORT.

The Members of the Committee appointed by the Resolution of the Government of Bengal in the Municipal Department, dated the 19th February 1883, to consider certain questions relating to the trade in petroleum, beg to submit the following report for the consideration and orders of the Government.

2. Meetings of the Committee were held at the office of the Port Commissioners on the 2nd, 9th, 16th and 30th of March. The papers forwarded with the Government Resolution were fully considered, and the Committee had also before them the correspondence relating to oil used for lubricating purposes, which was forwarded with Mr. Bayley's letter No. 513 of the 3rd March 1883, and the memorial from Mr. Gregory, which was sent under Mr. Baker's endorsement No. 571 of the 9th idem.

To the report thus drafted, a dissent was recorded by Mr. O'Keefe on behalf of himself and Mr. Bleeck, which supplied fresh information regarding the New York procedure. As

this appeared to be the most correct information that had been obtained, the Committee considered it right to reconsider that part of their report which was based on incomplete data and held another meeting on the 3rd May for this purpose. The report, as then amended, is that which is now submitted.

3. We desire to preface our report by saying that, while we fully recognise the necessity of legislating regarding the importation of petroleum, we are disposed to think that the dangers supposed to attend the storage and transport of the ordinary petroleum of commerce have been exaggerated. The importations into Calcutta alone were 5¾ millions of gallons in 1881-82, and the trade has since been increasing with startling rapidity, the quantity imported during the first eleven months of 1882 having exceeded 12 millions of gallons. Yet, in the handling of these enormous stocks, we can call to mind only one serious accident, which occurred when a cargo boat laden with oil caught fire in consequence of the oil which had escaped from a leaking case coming in contact with the fire used by the boatmen for cooking on board. This accident would not have happened if anything like reasonable care had been used, and we are therefore inclined to think that the past history of the trade does not show any urgent necessity for extraordinary precautions. Besides this, a few minor accidents have occurred, but of a kind which might have happened with any other inflammable substance; and we believe that it is unnecessary for us to point out that petroleum cannot explode or ignite spontaneously. The trade is of much commercial importance, and we should be unwilling to see it hampered by any kind of interference not really required for the protection of the public.

4. The orders under which we were appointed instruct us to report on the question of the rules to be issued under section 9 of the Act, and the measures to be taken to facilitate the storage, testing and passing of oil. We observe that no direct reference is made to rules under section 7; but as that section refers to the importation, testing and landing of petroleum, we do not understand ourselves to be precluded from offering suggestions connected with these matters. We have not, however, gone into the question (which is raised in some of the papers before us) of altering the standard of 73° Fahr., as that standard is fixed by the Act and cannot be modified without legislation.

5. The following remarks are intended to explain the system under which American petroleum is imported into Calcutta by sea, and at present this is almost the only* description of oil which enters the Hooghly. This oil is shipped from New York, and is imported in tins enclosed in wooden cases, the tins being assumed to be air-tight. A case contains 2 tins, each holding 5 American gallons, the net weight of the oil in a case being about 65 lbs. An oil vessel ordinarily brings no other cargo, and the number of cases sent by a single vessel is often from 40,000 to 50,000 and is sometimes as high as 70,000. The whole of the cargo of a vessel is usually consigned to a single Calcutta firm.

6. The oil is tested before shipment, and a certificate of its quality as ascertained by the test is sent by the shippers to the consignee. The method of testing as ascertained by Mr. O'Keefe is stated to be as follows As the oil leaves the refining stills, it is run into large receiving tanks, some of which will hold several hundred thousand gallons of oil. While the oil is being run into these tanks, it is tested by the refiners' own people, who add oil of an inferior or superior quality, or adopt other means to bring it up to such a standard as will pass the inspector's tests when it is required to be shipped. It is only run into the export tanks when actually sold and about to be shipped. It is at this stage that the duties of the inspectors commence. They are nominated and paid by the buyers, not by the refiners, and their duty is to prevent the shipment of any oil in the buyers' vessel that does not comply with the conditions of the contract made with the sellers.

7. The mode in which the testing is conducted is as follows. Certain export or filling tanks are told off to the cargo about to be packed and shipped, and these tanks are filled from the large storage tanks. The inspector then draws samples from the top, middle, and bottom of each filling tanks, and at once tests the samples so drawn. If the tests are in accordance with the terms of the contract, the oil in the filling tanks is passed, and packing and exporting at once commence. From time to time during the filling of the tins the inspectors draw samples from the taps through which the oil is being run from the filling tanks into the tins, and these samples are tested to eliminate any chance of the contents of the filling tanks being inferior. As fast as the tins are filled they are soldered, packed in wooden cases, and sent direct on board the ship; and one of the duties of the inspector is to satisfy himself that the oil he has tested is actually placed on board the buyer's vessel.

8. The question then arises, with reference to this procedure, whether the New York certificates might be accepted as final, as urged in Mr. Libby's letter to the Governor General. The majority of the Committee cannot recommend this. It should be placed on record that, so far as we are aware, in no country where oil is imported, and where a standard exists, is the American certificate accepted as being conclusive. On the contrary, in those places in which the question of the testing of oil has been carefully worked out, the American certificates have ceased to be accepted. We therefore find ourselves unable to recommend that the American certificate should be accepted as conclusive, and that a second test in this country should be dispensed with. It seems to us that the check of an Indian test is precisely what is required

* This was written before the recent information was received that there is a probability ere long of a large trade springing up in Rangoon and other oils.

to guarantee that no oil below 73° is imported. It is evident from the dissent of the minority of the Committee that every effort will be made to import oil as near the margin as possible, and this, if the New York tests are accepted as final, will infallibly result in some oil below the limit being imported into Calcutta.

9. The next point to be considered is when and where this test should be applied. Shall the oil be tested before the cargo is landed or afterwards? On this point we have no hesitation in recommending that all oil which purports to be covered by an American (or other recognised) certificate should be landed first and tested afterwards. The only argument in favour of testing the oil before it is landed is that if the oil turns out to be "dangerous," it is difficult to know what to do with it. It cannot be reshipped, for no ship will take it, and it cannot be allowed to pass into consumption. This objection is not, we believe, of any great practical importance. In the great majority of cases oil covered by an American certificate will be found to pass the test in this country. In a few exceptional cases, it may prove to be below the standard, but its quality can be improved by exposure, and it will never be necessary to reship it. On the other hand, the arguments in favour of applying the test after the oil is landed are practical and forcible. When oil is tested before landing, it is impossible to get an average sample of the cargo. The examiner must take a case from the limited number of cases to which alone access can be obtained, and there in no security that this really represents the quality of the entire shipment.

10. The American certificate is ordinarily sent to the consignee; but we understand that there would be no difficulty in having it, or a copy of it, appended to the captain's copy of the bill of lading. On the production of this certificate, whether by the captain or the agent, the oil would be allowed to be landed at the authorised place of import, and sample cases would be selected by the river police, or by the godown officers, and sent to the Chemical Examiner to be tested. One case in every 10,000 of the cargo should be selected for this purpose. The oil should not be removed from the godown till the Chemical Examiner has certified it not to be "dangerous" within the meaning of the Act; but as soon as this certificate has been received, the portion of the cargo which it covers may be removed.

11. Cargoes not protected by an American or other recognised certificate should not be allowed to be brought above Budge-Budge in the first instance. A sample case should be taken from the ship at Budge-Budge, and sent to the Chemical Examiner to be tested. If this sample passed the test, the vessel might then be brought up, and the oil landed under the same conditions as in the preceding paragraph.

12. It may be thought that this proposal is inconsistent with the remark which we have made above, that a sample taken from the ship affords no guarantee of the quality of the entire cargo. But the truth is that while we attach little or no value to the examination of this sample case, we attach very great importance to the detention of the vessel at Budge-Budge. The practical effect of our proposals would probably be that no vessel would ever come unprovided with the necessary certificate. An instance has been brought to our notice in which a Calcutta firm desired to import 2,000 gallons of highly refined oil from the United Kingdom. The firm had to wait nearly three months before they could obtain a shipping order, as there is no official in England authorised to give a certificate, and no ship would take the oil at the risk of detention in the Hooghly. We should wish to make it the interest of the vessel to bring a certificate, and we would give such a vessel every facility in landing its cargo as speedily as possible. These facilities would be denied to vessels not bringing such certificates, and the result would be that the certificate would always be brought.

13. It will be asked, what procedure we propose for adoption in the event of a cargo, or part of a cargo, being unable to pass the test, after authority has been given for landing it. In deciding this question, we think that a marked distinction should be made between samples which are only slightly below the test and those which are decidedly and dangerously below it. In testing a case, the Chemical Examiner will generally take the mean results obtained from six samples, If this result shows a flashing point of not less than 70°, we think the importer should be authorised to demand that five more cases should be similarly tested, and if none of these should give results below 70°, and the general average of all the six cases is not less than 73°, we would allow the oil to be passed, the average being taken as representing the quality of the cargo. But if the mean of the tests of any one case should give results below 70°, we think that this would afford *primâ facie* evidence that part of the oil is of decidedly inferior quality and that the cargo is of a mixed character, and we would lay down a rule that no part of it should be removed from the godown till it has been surveyed in the presence of a committee. The committee should consist of the Chemical Examiner, of one member to be nominated by the consignee, and one to be nominated by Government. The cargo should be examined in their presence, and if the result of the examination confirms the previous testing and shows that part of the oil flashes below 70°, we consider that no part of the cargo should be removed from the godown till the oil has been exposed, and its quality sufficiently improved to allow of its passing the test of 73°.

14. It seems desirable to explain somewhat more fully our reasons for drawing this distinction. We should not generally be in favour of the principle of allowing the average results of a number of cases to be taken into account, and thus permitting bad cases to be covered by good ones. But in view of the evidence which shows the variable results of the test to the extent of 2 or 3 degrees, we think there can be no serious danger in allowing an average

to be taken, so long as no case on which the average is based tests below 70° and the average of the whole together amounts to 73°. But if the mean testing of any case shows a figure below 70°, this implies an element of danger which ought not to be disregarded. It will have been seen from what has been said in paragraph 7 that the oil is tested by tanks, and therefore the fact of the oil in a single case being of a quality which flashes below 70° is sufficient to show that one whole tank, or, say, at least about 1,000 cases, a material proportion of the cargo, is of a kind which ought not to be permitted to pass. We are of opinion that the risk which would attend the passing of such oil into consumption is sufficient to justify the precautions which we have recommended to be taken. It must be remembered that cases of a bad quality mixed with cases of good quality are more likely to cause an accident owing to the purchasers being less on their guard than a cargo of uniformly inferior oil.

15. We have considered the case in which the general average of the samples examined proves to be not less than 73° and no sample falls below 70°. But suppose the general average to lie between 70° and 73°, no sample being below 70°. We find that some difference of opinion exists in this case upon the point whether any discretion shall be exercised in granting a certificate that such oil is not "dangerous." In testing a case the Chemical Examiner would perhaps take six samples, and would enter the mean of the results as the true figure. Suppose this average spread over 5 or 6 cases to give a flashing point of 72°. Is it desirable to allow a discretion that the oil should nevertheless be passed as being practically safe, and if so, by what authority is this discretion to be exercised?

16. In a paper of questions circulated by the Chamber of Commerce to the principal firms interested in the trade, question 15 ran as follows: Is it desirable that Government should have a discretionary power as to the admission of petroleum which, though slightly under the test required by the Act, may yet in their opinion be imported and used without danger to the public? To this question Messrs. Beer and Company say: "Certainly not, as this would interfere with the importation of high class oil." Messrs. Kettlewell, Bullen and Company, Messrs. Ernsthausen and Oesterley, and Messrs. Hobson and Connor all say—"Yes; the Government of India should have this discretionary power." Messrs. Hobson and Connor add that there should be no hard-and-fast rule; and that though in England the legal standard is 73°, the London Examiners practically pass oil which flashes at 70°. Messrs. Ralli Brothers say that if any discretionary power is left to Government, it should be as small as possible, and very strictly defined. Messrs. Schroder, Smidt and Company recommend that, if the oil is not below 72°, consignees should be allowed to import it on paying a fine of (say) 3 annas a case to Government.

17. On this it is to be observed that, although this last proposal would probably have a good practical effect, it is doubtful whether it could legally be carried out. Moreover, it does not allow any discretion to be used if the oil is below 72°. But if a rigid standard of 72° is to be adopted, or if (as Messrs. Ralli recommend) the limit of variation is to be strictly defined, we might as well keep to the rigid legal standard of 73°. It is said that every degree by which the flashing point is raised adds 1 per cent. to the cost price of the oil: and the danger of allowing any discretionary power lies (as Messrs. Beer have pointed out) in the fact that shippers will be tempted to send oil of the lowest quality which may be expected to have a fair chance of being passed. On the other hand, in view of the evidence which shows that two samples of oil from the same case have been known to give results differing by three or four degrees, we think it impossible to say that the fact of a sample flashing at 72° shows conclusively that the cargo of which it forms a part is in any degree more dangerous than another cargo which was found to flash at 74°.

18. On the whole, however, we are disposed to recommend that no discretionary power should be given. The standard of 73° was adopted after very full consideration. The Bengal Committee recommended 83°; the Government of Bengal proposed 78°; and the Select Committee eventually fixed on 73° as the minimum which could safely be allowed. It is also to be remembered that in paragraph 13 we have recommended that an importer should have the benefit of the average results of a number of samples, so long as no sample falls below 70. If this average does not reach the standard of 73°, it will only be necessary to keep the oil exposed till its quality is sufficiently improved. It is possible that a standard of 72° would practically be equally safe, but we should not wish to encourage the importation of oil which hovers upon the debateable ground between danger and safety. If it is known that the standard will be rigidly adhered to, consignees will be careful to import, not oil which may possibly pass the test, but oil which is certain to pass it. If it should be still thought however that a discretion should be permitted, we would allow it only in cases of cargoes covered by an American or other recognised certificate showing a flashing point of not less than 73°, and we would require the orders in each case to be issued by Government.

19. We are of opinion that Mateabrooj is the most suitable locality for a petroleum depôt, and we consider that with the exception mentioned in paragraph 27 no oil should be landed on the Howrah side of the river, nor on the Calcutta side at any other ghât than Mateabrooj. The Port Commissioners have lately had this question under their consideration, and they came to the conclusion that in view of the probable construction of additional jetties in the neighbourhood of Garden Reach, there would be some danger in establishing a petroleum depôt at Matteabrooj, and that it would be better to select a site about a mile lower down the river. We are quite prepared to admit that a petroleum depôt could not suitably be

placed in the immediate neighbourhood of jetties and shipping. But we see no objection to the selection of this site, at any rate as a provisional arrangement. It is important that the place of landing and storage should be as near the town as considerations of safety will permit: and it is to be remembered that while the construction of jetties at Garden Reach is a contingency still future, the requirements of the petroleum trade are immediate and pressing. There will be no insuperable difficulty in shifting the site of the depôt hereafter, if circumstances should make it necessary to do so.

20. The plot of ground immediately below Mateabrooj ghât is occupied by Messrs. Cook and Company, who have erected temporary stables there. This land has also been used of late for the storage of petroleum. The land further to the west belongs to Mr. Gregory, and is already used for landing and storing petroleum, and some pucka sheds have been erected on it. We think that the whole or a sufficient part of these two plots should be acquired by Government and made over to the Port Commissioners, who are the most suitable body to be entrusted with the regulation of the petroleum traffic. It would perhaps be found an economical arrangement in the end to take up at once the whole of both the above plots, as land in that neighbourhood is sure to rise greatly in value. There should be three (or possibly four) floating pontoons (which we should be inclined to prefer to fixed jetties), placed at a sufficient distance from each other to allow a ship to lie alongside each pontoon, and to discharge overside at all states of the tide. Each pontoon should be connected by a double line of tram rails with a godown behind. These godowns should be substantially but inexpensively built of brick and corrugated iron, should be well ventilated, and each of them should be large enough to contain a full cargo of petroleum, say 70,000 cases. The godowns should be at some distance from the river-bank, in order both to facilitate the removal of the cases by road, and to avoid the risk of oil escaping into the river. To each godown should be attached a shed, in which the work of repairing tins and cases might be carried on; and it would be advisable to have one or two separate godowns for the storage of oil which might be unable to pass the test. We do not think it would be necessary to have an office or laboratory for the Chemical Examiner at the depôt. The work of testing could be better done at his office at the Medical College.

21. The course of procedure would then be as follows: The vessel on arrival would take up her station at one of the pontoons under the directions of the Harbour Master. On the production of the required certificate, the work of landing would begin at once, the cases being delivered overside into the trucks, which would be run along the rails into the godown. Out of every 10,000 cases landed, a sample would be taken and sent to the Chemical Examiner to be tested. The landing and storing of a cargo of 50,000 cases could probably be completed in 12 to 15 days, and the Chemical Examiner's certificate would be ready for each 10,000 cases by the time the landing was completed, so that the oil could, if necessary, be transported at once as passed. At present a ship takes from 30 to 40 days to discharge a cargo of petroleum, and the time which would be saved represents a great saving of expense. We think that no special regulations would be necessary under clause (*d*) of section 7 of the Act. The arrangements for landing and storing the oil might safely be left to the discretion of the Port Commissioners and their officers.

22. It will be understood from what we have said that we desire to recommend that the discharge of cargoes of petroleum should be absolutely prohibited except at the authorised depôt; and the charges for landing and storing the oil must therefore be regulated in such a manner as not to lay any unreasonable burden on the trade. Neither the Government nor the Port Commissioners would desire to make any large profit out of the traffic; and it would only be necessary to fix such fees as would cover the interest on the capital outlay, and the cost of establishment and maintenance. If, however, the Port Commissioners are to be responsible for the oil, some thing must be added for insurance.

23. With regard to the expenditure required, we can give nothing more than a very vague estimate. We have no sufficient data for calculating the cost of acquiring the land. The valuations given in the Board of Revenue's letter No. 795A. of the 4th December 1882 are avowedly of the most approximate character; and an estimate which was prepared by Mr. Heysham at the request of the Port Commissioners gives very different results. The pontoons are estimted by the Port Commissioners to cost Rs. 36,600 each, and the total cost of three pontoons, complete with bridges and gangways, would be nearly two lakhs of rupees. The estimate of the Port Commissioners for each of the godowns (to contain 50,000 cases) is Rs. 55,560; but we consider that the proposed style of the godowns is needlessly expensive, and that a godown to hold 70,000 cases might be built for Rs. 20,000, or Rs. 25,000. There would be some further expenditure for roads, filling up tanks, laying rails, making up the river bank, &c.; and possibly the total capital expenditure might be represented by a sum of seven lakhs, which (at 6½ per cent. for interest and sinking fund) implies an annual charge of Rs. 45,500. The Port Commissioners estimate the necessary establishment at Rs. 58,920 annually, an estimate which we are inclined to think unnecessarily high; and the charges for repairs, municipal taxes and contingencies would perhaps bring up the total to Rs. 1,00,000, or possibly to Rs. 1,20,000 a year.

24. We find that 24 oil vessels arrived in the first 11 months of 1882, bringing 1,201,341 cases of oil. As the trade is still rapidly expanding, we may fairly estimate for 30 vessels and 1,500,000 cases. We have little doubt that the ships would be willing to pay Rs. 30 per diem for the use of the pontoons; and, taking 12 days as the minimum for each ship,

this would give 300 days' pontoon hire, and the actual amount would probably be more. A charge of one anna per case might be made for landing. This charge to include repair of leaky cases, storage in the godown for any period not exceeding one month, and delivery from the godown into carts. The receipts from this would be Rs. 93,750. Godown rent at the rate of 3 pie per month might be charged for all cases left in the godowns for more than a month; and we think it would be reasonable to estimate that there would always be 1,00,000 cases paying this rent. The receipts according to this estimate would be Rs. 10,800 + 93,750 + 18,750 = Rs. 1,22,300.

25. It will be clear that these estimates are little more than conjectural; and we merely put them forward as tending to show that, as far as it is possible to judge at present, a petroleum depôt at Mateabrooj might be worked on conditions which would be satisfactory to the trade, and at a cost lower than the charges now incurred. But it must be evident that no guarantee can be given to the importing firms that the charges will be upon the scale above suggested. The only pledge which Government can give would be that the charges shall be regulated by the expenses, and not with the view of making the trade a source of public revenue. In the general interests of the port it would be reasonable to allow the Port Commissioners to make some margin of profit, but a small percentage would be sufficient for this.

26. With regard to oil intended for batching and lubricating purposes, we do not think that any other orders are necessary than those already issued by the Government notification of the 19th February 1883.

27. We understand that two or three Calcutta firms are in the habit of importing from the United Kingdom small quantities of oil of a superior quality in iron drums for the purposes of their own business. The fact that the oil is imported in iron drums is alone a sufficient guarantee of its quality, as the drums are expensive, and are of little value when empty. This oil is imported as part of a general cargo, and we learn that the importing firms are put to much inconvenience by the application of the ordinary petroleum rules to these imports. We fully accept the principle that the trade should be left as free as is compatible with the provision of precautions necessary for the public safety; and we do not think that the public safety is in any way compromised by these small importations of highly refined oil. We are therefore disposed to recommend that the rules should be declared not to apply to importations from the United Kingdom of petroleum in iron drums in quantities not exceeding 2,000 gallons by one vessel, but that such petroleum may be brought up and landed in the same manner as ordinary cargo. We believe that there could be no possible element of danger in this relaxation of the rule, as it is practically certain that no dangerous petroleum would ever be imported as part of a general cargo.

28. The foregoing paragraphs sum up the recommendations which we desire to make regarding the importation, testing and landing of petroleum, and its storage at the depôt. We now proceed to consider the question of the rules to be passed under section 9 of the Act, for the grant of licenses for the possession and transport of petroleum.

29. The draft rules framed by the Government of India and forwarded to the Government of Bengal with Mr. Mackenzie's letter No. 891 of the 26th June 1882 are objected to in several particulars by the firms engaged in the trade, as involving unnecessary interference with the course of business, and containing some stipulations which it will be practically impossible to comply with. We have examined the rules, and we think that these objections are not altogether without reason.

30. The transport of oil is effected either by carts, by rail, or by boats. We are of opinion that no restrictions need be put on the removal of oil by carts (that is to say, by ordinary country carts); indeed we doubt whether the wording of the law would justify any such restrictions. The transport of non-dangerous petroleum in quantities not exceeding 500 gallons cannot legally be interfered with, and no cart will take more than 20 cases, or 200 gallons. We are of course aware that it is a common practice to send off a string of carts at the same time; but we think that each cart should be treated as a separate item of transport, and we are satisfied that the removal of petroleum during the daytime by ordinary country carts is not attended with any danger which calls for special orders for its regulation. The transport of petroleum in carts by night is dangerous, owing to the practice of carrying a lighted lantern under the the body of the cart. Oil from a leaking case may fall upon this lantern, and may cause a conflagration. We think, therefore, that petroleum should not be removed in carts except between sunrise and sunset; but this would seem to be more properly a matter for regulation by the police, and we doubt whether any rule on the subject could legally be issued under the Petroleum Act.

31. It also appears to us to be unnecessary that the Government should lay down rules under the Act for the transport of petroleum by railway. This is a matter which may safely be left to the Railway Companies, and on the State Railways it would be open to the Superintendent to make any regulations which might be thought proper.

32. The main difficulty is in regulating the transport of petroleum by boat. Boats are loaded at Cossipore for Lower Bengal and Midnapore. These are open dinghees, carrying perhaps 50 or 60 cases each. There is a large trade with Eastern Bengal, carried on in covered boats, which start from Kidderpore or Balliaghatta, and take up to 1,000 cases each. The

draft rules prescribe that the oil is to be taken in covered boats, that no fire or light is to be allowed on board, and that the route and the place of destination are to be specified in the license. Petroleum in quantities exceeding 500 gallons will generally, though not always, be taken in covered boats; but we are not aware that any special advantage or security is obtained by the use of covered boats, and the stipulation seems to us to be unnecessary. The rule that no fire or light shall be allowed on board the boat would, no doubt, be a useful safeguard, but the objection to it is that it is impracticable to enforce it. There is of course a certain element of danger in allowing fire on board a boat laden with inflammable oil; but the draft rule seems to treat petroleum as if it were much on the same level as gunpowder, and we think that such stringent precautions are not required by the real necessities of the case. The clauses requiring the route and the place of destination to be specified on the license seem to have been modelled on the rules of the Salt Department. The dealers object to them as unnecessarily hampering their business, and we see no sufficient reason for retaining them. We are inclined, however, to think it desirable that a boat laden with petroleum (in any quantity exceeding 500 gallons) should be required to carry a distinctive flag, which would indicate the nature of its cargo. This rule would not only warn other boats of the nature of the cargo, but also the necessity of carrying this flag would serve to impress upon the boatmen the fact that they were bound to use more than ordinary precautions against fire. We consider that the license need only state the place from which the petroleum is to be conveyed, the fact that it is to be conveyed by boat, the quantity of petroleum covered by it, and the time for which the license is to be in force. The fee for the transport of petroleum by boat we would recommend to be fixed at one rupee for every thousand gallons or part thereof, no license being, of course, required for the transport of a quantity not exceeding 500 gallons. A license should be in force for six months. We would not require licenses to be taken for the transport of petroleum by cart or by railway.

33. With regard to the possession of petroleum, we are disposed to think that if a strict rule were made (as we recommend should be done) that within the town of Calcutta no license shall be granted for the storage of more than 5,000 cases in one place, some of the conditions provided by the draft rules might be dispensed with. In the suburbs, this limitation to 5,000 cases would be less necessary, and we should not object to the grant of licenses up to 50,000 cases, if it were desired to have them But we doubt whether there would be any real occasion for the grant of licenses for more than 5,000 cases. Such a quantity would be quite sufficient for purposes of retail sale; and for other purposes it would be just as convenient, and much safer, to take the oil direct from the depot at Mateabrooj, which would in effect be a kind of bonded warehouse for petroleum. While, therefore, we would not absolutely prohibit the grant of licenses outside Calcutta for quantities in excess of 5,000 cases, we should be inclined to discourage them by requiring a considerable increase in the fee. We would suggest that the fee for a license not exceeding 1,000 cases should be Rs. 12 per annum, that an additional two rupees should be charged for each thousand cases, or part of a thousand cases, between 1,000 and 5,000, and that an additional fee of Rs 4 should be charged for every thousand cases above 5,000. With these limitations as to the quantities to be stored in one place, we think it would only be necessary to provide further that the building shall be of masonry with a terraced or iron roof, and that either the doors and other openings shall be built up to a height of two feet, or the floor shall be sunk to that depth. The condition in draft rule 4, which requires the building to be surrounded by an embankment and trench, need only be enforced in the case of premises situated within 100 yards of the river, or Tolly's Nullah, or the Circular Canal, and even in these localities we are not inclined to attach much value to the condition, as the trench, when filled with water, would be an element of danger rather than of security.

34. As to the forms of licenses, we think that the license for possession should be in the form C appended to the draft rules, and that the condition should be those proposed in the draft. Licenses for the transport of petroleum by boat might be in the following form, no conditions being endorsed on them, except the regulation which we have suggested, requiring the boat to carry a distinctive flag :—

License is hereby granted to *A. B.* to transport by boat from petroleum not exceeding cases of 10 gallons each, and the undersigned hereby acknowledges to have received a fee of Rs. on account of this license.

This license shall be in force until the day of 18 Dated

For Calcutta and the suburbs the license (whether for possession or transport) might be granted by the Commissioner or Deputy Commissioner of Police, and elsewhere by the District Magistrate or Joint Magistrate.

35. We would ask that it may be understood that our proposals in this report are intended to apply to the ordinary petroleum of commerce, that is to say, to petroleum which is, or purports to be, of a "non-dangerous" character. "Dangerous" petroleum is of two kinds,—imported cargoes which do not purport to be dangerous, but which may be unable to pass the test, and petroleum of an avowedly dangerous character imported in small quantities for special purposes. It will have been seen from the preceding paragraphs of this report how we propose to deal with the former of those classes. If it is covered by an American or other authorised certificate, we would allow it to be landed; but we would not permit it to be removed from the godown till it had passed the test. If no certificate is furnished, we would not permit the oil to be landed at all, unless a sample case of it passed the test. We do not believe that

oil of this class will be found to present any practical difficulties. We do not think that the orders under which we were appointed require us to submit any suggestions for the treatment of petroleum of an avowedly dangerous character.

H. J. REYNOLDS, *President.*

C. J. H. WARDEN, (Dissent, paragraph 13.)
J. W. O'KEEFE, (Dissenting from paras. 8 and 15 to 18.)
WM. BLEECK, (Dissenting from paras. 8 and 15 to 18, and also 13.)
} *Members.*

In signing this report, I wish to add that the compulsory testing of oil in this country makes it impertative upon the Government to provide the Chemical Examiner with thoroughly reliable testing instruments, which, it is evident from the report of the Board of Analysts, he does not at present possess.

HENRY PRATT.

The 2nd June 1883.

I dissent from the views of my colleagues as expressed in paragraph 8 of the report that a cargo of petroleum cannot be identified as that tested in New York. Importers receive—

1st.—The refiner's invoice or bill of parcels.

2nd.—The Inspector's certificate of testings.

3rd.—The certificate of the loading of the cargo.

4th.—The bill of lading and policy of insurance.

These documents go to prove that the oil is that originally tested and no other. A further certificate of the discharge of each cargo has to be given by importing firms, Collectors of Custom and United States Consuls in Indian ports on the discharge of each cargo. What further identification is necessary, I am at a loss to conceive. To suppose that the oil cannot be identified is to discredit the several documents on which the business is based.

I also dissent from the paragraphs 15 to 18 of the report in so far as a discretionary power is not recommended to be given to the Local Governments of the three presidencies. Against the views of Messrs. Beer & Co. (who are brokers and not importers) the views of four extensive importing firms are stated, and three of these firms agree that a discretionary power should, in certain extreme cases, vest in the Local Governments. To put a case in point, an importer buys in good faith a cargo of 60,000 cases refined petroleum for Calcutta properly vouched for as 73° in accordance with the Indian law. The cargo arrives here, is tested, and is found to be 72° or 72·5°, or half to one degree under the standard. Under the recommendation of my colleagues, the whole of this cargo would have to be exposed and improved at a first cost of Rs. 15,000 to Rs. 20,000. This loss would be increased materially if the cargo had been sold "to arrive" as is the custom, and the contract was cancelled by the buyer. Besides there would be the disrepute attaching to such a cargo owing to its having been pronounced "dangerous" on landing. When it is considered, *vide* paragraph 11 of the report, that there is frequently found to be a variation of 2° to 3° in the test of a sample of oil, taken from the same tin, tested by the same Abel's instrument, and manipulator; that different instruments and manipulators frequently give varying results; that the tests are affected prejudicially by the instrument being out of level by barometric and thermometric changes, &c., in fact in many different ways, I am in the interest of the trade (though not opposed to the limit of 73° in accordance with the law) strongly of opinion that a discretionary power to pass refined petroleum showing a variation of half to one degree should be vested in Local Governments, provided that in no single instance was any test found under 70°. My object in making this recommendation is to prevent the deadlock and heavy loss, which two or three importing firms here suffered in 1882, owing to the want of a discretionary power being vested in the Local Government under Act VIII of 1881. Petroleum which tests at 70° Abel is not less safe than oil testing 73° Abel, and it appears to me that an extensive and rapidly growing trade should not be subjected to an extreme hard-and-fast rule, especially when it is admitted that the test is in itself defective. If the recommendation of my colleagues is accepted, importers will have to buy oil 2° to 3° above that required by the law in this country, or they will not be safe in carrying on the trade. This was not contemplated by Act VIII of 1881. The Home Government, I am informed, pass refined petroleum down to 70°, if bought in good faith and certified in America as 73°. If

this is so in England, where the trade is done in casks, which are not air-tight, why should not the like liberal course be followed here in canned oil, the cases or tins being air-tight, and the oil incapable of improvement by contact with the air. I do not recommend so much as this; but I think it is very desirable not to hamper this new trade unduly. I should like to see it legislated for in a liberal manner, and not in the somewhat narrow spirit proposed.

That divergent results are obtained by the Abel's instrument is clearly proved.

For instance, it is mentioned in the report on petroleum testing in India made by Mr. Boverton Redwood, at the request of Her Majesty's Secretary of State for India, and dated London 11th November 1882, that when Dr Warden was testing official sample No. B6 (drawn from one of the four cargoes of petroleum stopped by the Indian Government upon Dr. Warden's report) that it did not comply with the terms of the Indian Act; he made it flash first at 66°, then at 70°, and then at 71°. Mr. Redwood then made three tests of the same sample by Dr. Warden's own instrument, and it flashed on each occasion at 76°!!

These extraordinary discrepancies appear to show that in the interest of an important trade, and as a measure of common justice to all, those whose pecuniary interests are affected by the Petroleum Act, it is the duty of the Government to procure a thoroughly experienced examiner either from England or America, before they assume the serious responsibility of stopping oil for alleged non-compliance with the terms of the law.

In legislating on the subject, the Government are dealing with the interest of one of the poorest populations in the world, to whom on the one hand the raising of the cost of one of their daily necessaries by even one pie is of importance, and a danger to be avoided; yet who, on the other hand, require to be protected by their Government from the consequences of their own ignorance of what is safe or unsafe in such an article as petroleum.

The decision as to what is judicious lies with the Government, and I must presume their opinion to be that a test of 73° Abel meets all requirements of safety as they have legislated on that basis.

I therefore fail to see that any obligation rests upon the merchants engaged in the trade to import oil of even one degree higher test than is laid down in the statute. Their proper course as business men is to secure oil that will comply with the requirements of the Indian Law, and in this respect their interests and those of the Indian consumers are identical.

Stripped of all verbiage, the argument used in the report means that the officials charged with the administration of the Act are unable to decide, within a few degrees, whether the oil that is imported does or does not comply with the law, and it is therefore recommended that importers should purchase oil several degrees above the legal standard to be on the safe side, whatever happens.

In all legislation dealing with standards, and more especially legislation that imposes what are practically *enormous pecuniary penalties* upon the importers of goods that are said not to comply with the legal standard, the very first duty of a Government is to provide an absolutely correct test standard, and no penalty can be properly inflicted upon a subject said to be in default, until such accurate standard of measurement has been provided and applied. This principle is recognised by every civilised Government.

In the case of petroleum there are, no doubt, difficulties in providing such a standard as will be found to be accurate under all conditions, climatic and otherwise, but a duty ought not to be evaded merely because it is difficult. Professors Abel and Redwood have advised Her Majesty's Secretary of State for India (*vide* Parliamentary Paper on East India Petroleum Testing, dated 20th July 1882) that it is practicable to devise precautions, the adoption of which shall insure the attainment of accurate results in testing petroleum in India, and the duty of the Indian Government is clearly to secure such results at whatever cost of trouble or experiment.

The Imperial German Government, before legislating on the petroleum question for the German Empire, made an exhaustive series of experiments, in the course of which it was found that the flashing point of petroleum varied with barometric and thermometric changes. Careful experiment enabled them to tabulate these variations for the use of their official examiners, and the variations are provided for in the German law. If, after careful experiment, it is found that the variations of the Indian climate have to be provided for, this should be done in the Indian Act, or we may again see the anomaly witnessed here in 1882 of petroleum being refused admittance into our ports, and pronounced to be "dangerous" in the hot season that might have been imported without challenge during the cold season. Until an accurate standard is devised for testing petroleum in India, I dissent from the views of my colleagues that the local Government should not have a discretionary power of passing oil, no portion of which tests under 70°, and the average of tests of which does not fall under 72°. I agree with the other portions of the report.

J. W. O'KEEFE.

I agree with the above.

W. BLEECK.

With the admitted variation in Abel's instrument, it may happen accidentally, as it has happened before, that a flash is obtained at 69° or under, and then several flashes up to or above 73°. I would recommend that any isolated flash showing a variation of three or more degrees should be discarded as casual and unreliable, as it appears to me that such flash must be due to influences affecting the correctness of the instrument.

W. BLEECK.

Calcutta, 26th May 1883.

---

1. I dissent regarding paragraph 13, in which the procedure recommended to be adopted in the case of oils which fail to flash at 73°F., the standard of the Petroleum Act of 1880, is discussed.

2. The testing of petroleum in this country is surrounded with certain difficulties, and this is more especially the case with low flash oils. Recognising the difficulty, paragraph 13 was elaborated in order to obviate, as much as possible, any loss which might ensue to importers who had *boná fide* imported oil which flashed in America above 73°F., Abel, but which, on arrival in India, might be found to flash at a somewhat lower temperature.

3. This concession demands, on the part of traders, co-operation. Knowing, as they well do, the difficulties which surround the application of the test here, it is their duty to meet the difficulty half-way, and not to import knowingly oils which, experience has shown, will fail to satisfy the requirements of the Indian Act. The spirit in which the suggested concession has been met by Messrs. Kettlewell Bullen and Messrs. Ernsthausen and Oesterly is evident from their joint dissent.

4. The Petroleum Act of 1880, as it at present stands, requires that an oil shall not flash below 73°F. when tested in India in Abel's apparatus. Hitherto the flash point of an oil as determined in America has been considered *the flash*; in other words, interested parties have attempted to give an impress of infallibility to the American certificates. The Secretary to the Bremen Chamber of Commerce thus records the German opinion on the infallible accuracy of the American Inspector's test:—"The Bremen petroleum exchange (being the largest of its kind in Europe) will, from the 1st January 1883, cease to act on the American Inspector's certificates, which have not always been found to be reliable."

5. The same sample of oil will not invariably give the same flash when tested by the same operator on the instrument; and when different operators using different apparatus test the same sample, the results are still less likely to be in perfect accord, unless the mean of a large number of determinations be compared. These are facts which the American trade do not like to admit, and for very obvious reasons.

6. More than one test, therefore, of each sample is requisite, and the instrument used, and the manner of manipulating the oil before testing, must be similar. The American certificates are based on the application of *one test* to each sample. There is no evidence to show that the apparatus used by the American Inspectors are verified instruments, and not, modifications of the Abel's instruments. In fact, there is no evidence to show that the American Inspectors are acquainted with the requirements of the Indian Petroleum Act, and in proof of this I would quote the following extract from a letter from Mr. J. McGee (case trade) to the address of Messrs. Rally & Co., New York, regarding the form of petroleum certificate suggested by me last year:—"Second, it would *be necessary that certified copies of Indian Petroleum Act of 1881 should be furnished to the Inspectors for their guidance.*"

7. The Indian Petroleum Act requires that imported oil shall not flash below 73° when the test is applied in a specified manner in India. The Act does not recognise any possible changes in the character of an oil through climatic causes; and inasmuch as the Act has not been amended, it is reasonable to infer that Government are at present not prepared to admit the possible deterioration of oil through the effects of climate.

8. After the experiences of last year, importers must be well acquainted with the brands which will, and which may not, pass the Indian test. If cargoes are purchased on the basis of 115° fire-test—which both Messrs. Redwood and Libby consider a very uncertain test, that it is a "toss up" whether when the oil is re-tested on Abel's apparatus if it will flash below or at 73°F.—any difficulty which may arise in India is due entirely to the importer's own fault.

9. I therefore suggest, in modification of paragraph 13, the following procedure for oils which are found to flash below 73°F. in India. After the Chemical Examiner has satisfied himself that an oil flashes below 73°F., a committee should be convened without delay, consisting of four members, to survey the cargo. One member to represent the importer, one the Chamber of Commerce, one to be appointed by Government, and the Chemical Examiner to be an *ex-officio* member. If, on examination of the cargo, a single sample is found to flash below 73°F., the penalty for illegal importation of petroleum as defined in the Act should be enforced, and the oil dealt with in such a manner as the Government of India may deem fit. The object therefore with which the committee suggested by me would meet would be somewhat different to the duties of the committee as suggested in the draft rules drawn by the Commission. It appears to me that this is the only mode by which the requirements of the Act can be carried

out; it entails no hardship on anybody, and will most certainly prevent the importation of low flash oils, and also a repetition of the unseemly squabbles which took place last year.

10. On the other hand, if the plan recommended by the committee be adopted, certain importers will knowingly bring in low flash oil, and then by threat and clamour try to "run" the ir consignments. Clap trap and verbiage regarding "killing the trade," "depriving the teeming millions in Hindustan of light" by demanding an oil which shall fully satisfy the requirements of our Indian Petroleum Act may be taken for what it is worth. Locally manufactured oil of 100° flash Abel is in the market, and will no doubt before long be supplied in sufficient amount to compete very seriously with the American product, unless, as a gentleman largely interested in the American oil trade remarked to me, "if we have any competition with Rangoon oil, we will buy up the little place and shut it up."

CALCUTTA MEDICAL COLLEGE;
The 10th May 1883.

C. J. H. WARDEN.

No. 111, dated India Office, London, 12th July 1883.

From—The Secretary of State for India,

To—The Government of India.

In continuation of my despatch No. 68, dated 26th April last, and with reference to your letter, No. 11 (Judicial) of 17th April last, and to previous correspondence, on the subject of the testing of petroleum oil in India, I now transmit, for the consideration of Your Excellency, a copy of a final letter from Sir F. Abel, enclosing a joint memorandum by himself, Mr. Boverton Redwood, and Surgeon-Major J. B. Lyon, the Chemical Analyser to the Bombay Government.

2. These papers will, I trust, enable you to deal satisfactorily with this subject. You will observe that there are three distinct points which will require your consideration:—

First. The question whether any, and if so what, amendments should be made in the schedule of the Petroleum Act, 1881. With reference to this, Sir F. Abel points out that the joint memorandum specifies the nature of certain precautions and corrections, the adoption of which will go very far to counteract or rectify variations between flashing points of petroleum observed in India and in other countries, and which are sufficiently definite and simple to enable your Government to dispose of this question.

Secondly. Sir F. Abel reiterates his opinion that the standard of petroleum oil, 73° F., fixed by the Act of 1881 as that at which the oil may be safely imported into or used in India, is too low, and ought to be raised to 78° F. It would appear from the correspondence transmitted with your letter of 17th April last, that this alteration is likely to be strongly opposed by the trade, as tending to raise the price of American petroleum to the Indian consumer. It will be for Your Excellency to decide, upon a careful consideration of the evidence as to the comparative danger of different qualities of the oil in a tropical climate, whether or not to follow the recommendation of Sir F. Abel upon this point in any amendment of the existing law.

Thirdly. The joint memorandum states, and Sir F. Abel in his letter repeats, that even with all precautions there is likely, especially in the case of oils close to the standard of 73° F., to be a variation of about 3° F. between the test of oil before shipment and its test on arrival in India. The joint memorandum suggests that "steps should be taken to acquaint the trade with the fact that the retesting in India of shipments of petroleum is liable to furnish results about 3° F. lower than the flashing point recorded before shipment." The result of this would of course be that the shipper of petroleum from America would be obliged to buy petroleum 3° F. better than the nominal Indian standard. Having regard to the fact that all petroleum exported from America to India must be officially tested and certified, and to the arguments urged by Mr. W. H. Libby in this letter addressed to Your Excellency, dated the 21st December 1882, I would suggest, for your consideration, whether, in the event of the flashing point being raised, as suggested by Sir F. Abel, to 78° F., a rule might not be laid down somewhat to the following effect. If an importer does not produce an American certificate showing that the petroleum, when shipped, was fully up to the Indian standard, he should be strictly bound by the Indian test, and the petroleum rejected if that test shows that the petroleum does not entirely comply with the requirements of the law. But if the petroleum is covered by such a certificate, in the form and under the conditions which the Government of India may lay down, a margin of variation of 3° F. might be allowed between the test shown in the certificate and that obtained in India, and the petroleum rejected only if the Indian test, with this allowance, shows it to be below the standard fixed by the law.

I desire to call the attention of Your Excellency to the fact that Surgeon-Major Lyon has spent his privilege leave in England in assisting Sir F. Abel in the investigations necessary for the preparation of the joint memorandum now transmitted, and I request that my acknowledgments for this service may be communicated to Mr. Lyon.

Dated Woolwich, 11th June 1883.

From—SIR F. A. ABEL,

To—SIR LOUIS MALLET, C.B.

REFERRING to my letter to you, dated 10th April, and to the correspondence relating to the difficulties experienced in the application of the Abel test for petroleum in India, I have now to report that Dr. Lyon and Mr. Redwood have in conjunction with one of my Assistants, Dr. Kellner, carried on many experiments in my Department for some weeks past, and that I have, from time to time, discussed with these gentlemen the results obtained, and their bearing upon the solution of the problems which have presented themselves.

Without venturing to suggest that the necessary experiments for completely establishing the satisfactory working of the test in India have reached finality, as this can only be done by a continuance of our experiments in India on Dr. Lyon's return, I am glad to be able to state that an understanding and definite conclusions have been arrived at between us on several important points, and that just before the departure of Dr. Lyon we were able to agree upon the terms of the accompanying memorandum, and upon the recommendations which it embodies.

I submit that those conclusions and recommendations are sufficiently definite and simple to enable the authorities in India to deal with them.

They specify, in the first place, the nature of certain simple precautions and corrections, the adoption of which will go very far to counteract or rectify variations between flashing points observed in India and in other countries, arising out of fluctuations in atmospheric pressure, and the effects of long exposure of the oils to tropical temperatures, or the prevalence of such temperatures at the time of testing.

Secondly, it is pointed out that, even with the adoption of the precautions recommended, it will be right and just to apprise the trade that a difference to the extent of 3° Fahrenheit may be liable to occur between the flashing point of an oil having a flashing point close to present standard, before shipment, and its flashing point when afterwards tested in India.

I enclose herewith a table of corrections to be used in allowing for variations in atmospheric pressure, in accordanc with section 1 of our joint memorandum.

With respect to the suggestions made by the Secretary of the Bombay Chamber of Commerce, which are referred to in the letter from the Government of India to the Secretary of State, and which are dealt with in a report* by Mr. Pritchard and Dr. Lyon, of February-March 1883, I have to offer the following few remarks:—"All general arguments" in favour of adopting a higher standard in India than 73° F., "such as that the average temperature of the air being higher in India than in England," &c., "were carefully considered" before the Indian Act was passed, as a reference to the papers will show, and the result of that careful consideration was the determination on the part of the Indian authorities to raise the standard, at any rate to 78°, which determination was altered, at the last moment, only upon representations of the Chamber of Commerce, which, with all respect, I consider did not furnish legitimate grounds for such alteration.

* No. 11 of 1883.

Very strong representations were made of the great hardship to the trade which would result from the raising of the standard a few degrees as proposed. In the face of this fact I received with much interest the intelligence from Dr. Lyon that, since the difficulties respecting the Calcutta shipments arose, the chief proportion of the oil which has been imported into India has had flashing points not lower than 76° F. The reasonableness of the proposal to raise the standard to 78°† has, I submit, been well demonstrated by the readiness with which oils approaching that flashing point have been supplied to India without any pressure being brought to bear upon the trade. The latter circumstance is also a sufficient answer to that part of the "demi-official" communication of Mr. Boverton Redwood to Mr. Libby, in which the former says that he has "no hesitation in affirming that any increase in the present standard of test for petroleum imported into British India . . . would unnecessarily embarrass the commercial future of the product." This statement is, moreover, scarcely in harmony with the admission some time since made to me by Mr. Redwood, that a raising of the standard to 78° would not be embarrassing to the trade. This admission I considered very valuable, as Mr. Redwood may be said to represent the interests of the trade in England; it is also shown to be well founded, by the facts above stated.

† Out of the 14 samples of petroleum received from India for examination on 17th February, and reported on by me on 30th April, five had flashing points of 78° and upwards.

I would only say, with respect to Mr. Libby's letter, that my view as to the reasonableness and the great desirability of adopting a decidedly higher standard for India than for England as demonstrated by the earlier correspondence, was at the time arrived at without any thought, as to whether the satisfactory working of the flashing tests would be promoted by the adoption of such a course. I would point out, at the same time, that the difficulties connected with the passing of oils in India by that test have been chiefly consequent upon the exportation from America to India of shipments, including oils, which only just comply (and some of which did not comply) with the legal standard.

There is no question that it is only with such oils that the difficulties in testing arise which it has been our endeavour to overcome, and it is a legitimate additional argument, furnished me by Mr. Libby, in favour of somewhat raising the standard (it having now been demonstrated that the trade can voluntarily raise it without embarrassing themselves), that such a step would have the effect of reducing to a minimum any possible cause of dispute between exporters and examiners in India.

There is no doubt of a so-called "deterioration" of some descriptions of petroleum taking place during transhipment to India and storage there during the hot season; that is, of a reduction of their flashing points by several degrees, which are only recovered by prolonged keeping of such oils at lower temperatures; this refers to oils having originally flashing points at about, or somewhat below, the standard.

As regards the acceptance of American certificates as final under conditions satisfactory to the Government of India, I cannot see any important objection to be raised to the adoption of such a course; but I consider that the raising of the present legal standard to 78° is most desirable, and that valid and reasonable objections to such course do not exist.

Memorandum relating to the employment of the Abel test for determining the flashing point of petroleum in India.

The difficulties which have arisen in applying the Abel test to the examination of samples of petroleum in India, in accordance with the instructions laid down in the Indian Petroleum Act, 1879 (12 & 13 Vict., c. 47), have been carefully considered and thoroughly discussed by us, and we have also conducted joint experiments bearing upon several points which relate to the application of the test in a tropical climate.

The following are the conclusions to which we have been led:—

1. The necessity for making corrections in the flashing points observed with the Abel test, for variations in atmospheric pressure, has been established by experimental observations here and in Germany, and also in India. These have shown that variations to the extent of 1° 6′ to 2° F. occur in the observed flashing point of one and the same sample of oil for every inch of variation in the height of the barometer.

In Germany a scale of corrections has been officially adopted, which is based upon an average variation of 1° 6′ F. in the flashing point per inch of barometer, and we recommend that the same scale of corrections be adopted for use in India, as, although it may be somewhat within the mark, its employment has the advantage of promoting uniformity in recording observations.

2. The liability of petroleum oils to exhibit in tropical countries flashing points as much as 6° to 7° lower than those furnished by the same oils in a temperate climate, which has been demonstrated by experiments at Woolwich and in India, is due to a great extent to the separation of vapour from the oil, consequent upon the agitation of the liquid, when the cup of the test apparatus is filled.

The depression of the flashing point may also be due, in part, to the effect of a tropical temperature upon the oil, or upon the operation of testing.

Several methods have suggested themselves for counteracting the difficulties arising out of these circumstances, the relative efficiency of which we have carefully considered, while bearing in mind the importance of securing uniformity in practice, on this point, at the hands of different operators, and the necessity for guarding against a possibility of the introduction of modifications by different workers, in the prescribed mode of proceeding. We have come to the conclusion that, when an oil, tested in accordance with the present instructions, furnishes a flash at 66° F., upon first applying the test flame, or, subsequently, at some other temperature intermediate between that and 73° F., the best course to be pursued is to recommence the test at 56° F., the oil having been first cooled down sufficiently to allow of this being done.

With this simple modification of the existing instructions we believe that oils, which it has hitherto been impossible to test satisfactorily in India, will furnish concordant results in the hands of different operators, and results not differing to any great extent from those obtained in a temperate climate with the particular oils tested.

3. Our experiments have not, however, so far, indicated that there is any practically available method of entirely overcoming in all cases the effect of a tropical climate upon the flashing point of petroleum oils, or upon the results obtained with the Abel test; hence, even with the adoption of the modification proposed in the instructions for testing, some oils will still be liable to show a depression of the flashing point to the extent of about 3° F. We therefore consider it necessary that steps should be taken to acquaint the trade with the fact that the re-testing in India of shipments of petroleum is liable to furnish results about 3° lower than the flashing point recorded before shipment.

In accordance with the conclusions given in the foregoing, we recommend that the following instructions should, in the Schedule of the Indian Petroleum Act, be substituted for the "Note" (paragraphs 3 and 4) of Section 5:—

"When a sample of oil has furnished a flashing point below 73° F., the test having been applied in accordance with the instructions laid down by the Act, a fresh portion of the sample

is to be re-tested, having in the first instance been cooled down to such an extent that the operation of testing may be commenced when the indicated temperature of the oil is 56° F.

"If it is desired to employ the test apparatus to determine the flashing points of oils of very high volatility, the mode of proceeding is to be modified as follows:—The air chamber which surrounds the cup is filled with cold water to a depth of 1½ inches, and the heating vessel or water bath is filled as usual, but also with cold water. The lamp is then placed under the apparatus, and kept there during the entire operation. If a very heavy oil is being dealt with, the operation may be commenced with water previously heated to 120° instead of with cold water."

We consider that, with the adoption of these recommendations, the carrying out of the instructions, as laid down in the Schedule of the Act, suffice for the attainment of trustworthy and concordant results with the Abel test in India.

At the same time, as an instance has occurred in which a somewhat different construction to that intended was put upon the second paragraph of Section 5 of the Schedule, whereby the result attained was liable to be somewhat affected, we consider that it will be desirable, on a revision of the Schedule, to adopt measures which will preclude the possibility of any practically applicable variation in the period during which the test flame is dipped into the cup.

F. A. ABEL.

BOVERTON REDWOOD.

11th June 1883. J. B. LYON, *Surgeon-Major*.

which they recommend for adoption to counteract or rectify variations and secure trustworthy and concordant results between flashing points observed with the Abel test in India and in other countries. The amendments suggested, however, do not seem to be altogether complete. It is stated at the close of the memorandum that, on a revision of the schedule, measures should be adopted to "preclude the possibility of any practically applicable variation in the *period* during which the test flame is dipped into the cup." This period is thus described in clause 1, paragraph 5: "The slide is slowly drawn open, while the pendulum performs three oscillations, and is closed during the fourth oscillation." The memorandum omits to state how this particular clause is to be amended, nor is it stated whether any modification is required where gas or oil torches are respectively used. In view to the preparation of a complete and satisfactory schedule, the Board of Analysts in Bengal will, with the permission of His Honour the Lieutenant-Governor, be requested to consider the suggestions in the memorandum and in Sir F. Abel's reports, and to submit (in communication with Surgeon-Major Lyon, the Analyst at Bombay, who has been in personal consultation with Sir F. Abel on the subject) a carefully revised set of instructions, taking into special account the foregoing points and incorporating a reference to the corrections to be made for atmospheric pressure.

5. The next question is whether any change in the standard for dangerous petroleum is demanded. Sir F. Abel is of opinion that the standard of 73°F. fixed by the Act is too low and ought to be raised to 78°F. It may be true, as Sir F. Abel says, that petroleum, especially oil having originally a flashing point about, or somewhat below, the present legal standard, has a tendency to deteriorate during the voyage to India and during storage there in the hot season; but, on the other hand, it has been found by experience that once the tins are opened the oil rapidly loses its volatile vapours and rises in flashing point under the conditions of Indian heat. Moreover, the proposed alteration in the standard would, the Government of India believe, be strongly opposed by those engaged in the petroleum trade. The Calcutta Committee remark in paragraph 3 of their report "that the past history of the trade does not show any urgent necessity for extraordinary precautions." The Bombay Chamber of Commerce have arrived at the same conclusion, and state their belief that any advance in the present standard of 73° of Abel's test is not only unnecessary in the interests of the public safety, but would impose a serious restriction on the trade. For these reasons the Government of India are of opinion that no sufficient grounds have been shown for raising by law the standard deliberately adopted in 1881, and which experience has not proved to be in fact really dangerous.

6. The third and last point to which the Secretary of State directs attention in the despatch quoted is the desirability of enacting, in the case of petroleum covered by an American certificate, a rule allowing, under such conditions as the Government of India may lay down, a margin of variation of 3°F., the oil being rejected only if the Indian test with this allowance shows it to be below the legal standard. The Secretary of State would not approve of any modification of the present practice so long as the standard remains at 73°; but he suggests for consideration whether in the event of the flashing point being raised to 78°, effect might not be given to such a rule. This point has been carefully considered, and the Governor General in Council has come to the conclusion that it would be dangerous to sanction any departure from the principle of the strict maintenance of the legal standard, or to allow oil which, when fairly tested, fails to satisfy that standard to pass merely on the ground of possible climatic variations. Since the Government of india have decided, as indicated in the preceding paragraph, to preserve the present standard prescribed by the Act, adherence to this principle will be the more necessary, and accordingly those engaged in the petroleum traffic should understand that any oil imported as ordinary petroleum which does not entirely comply with the requirements of the law will be rigorously rejected. As shipments of the oil from more temperate climates are occasionally liable when re-tested in India to furnish results about 3°F. lower than the flashing point recorded before shipment, trade arrangements should be made in view of that contingency.

7. The Government of India observe with satisfaction that the conclusion at which they have arrived on this question is supported by the opinion of the Calcutta Committee. The majority of that Committee declare that they cannot recommend the acceptance of the American certificates as final, or support the proposal to dispense with a second test in this country. They further desire it to be placed on record that so far as they are aware, in no country where oil is imported, and where a standard exists, is the American certificate accepted as conclusive; but that, on the contrary, in those countries in which the question of the testing of the oil has been carefully worked out, the American certificates have ceased to be accepted. It seems to them that the check of an Indian test is precisely what is required to guarantee that no oil below 73° is imported. If any relaxation is permitted, they believe that every effort will be made to import oil as near the margin as possible, and that the infallible result will be that some oil below the limit will be imported.

8. The Government of India now pass on to consider the points in which the existing procedure on importation may be impoved so as to facilitate the storage, testing and passing of the oil. It is their desire that the rules which may be framed for this purpose, while providing sufficient safeguards against the entry of oil which does not strictly comply with the requriements of the law, shall at the same time serve to relieve the trade from all unnecessary risk and restriction. The contemplated legislation will accordingly provide that the Local Government may make rules as to the selection of samples for testing and as to the averaging

of samples. Where different tins selected from a consignment represented to be of one uniform quality give different flashing points, legal provision will be made, by rule or otherwise, that if the oil from no single sample tin flashes below 70°, the oil should be passed, provided the average of all the sample tins examined gives a flashing point of 73° or over. The Government of India concur in the view of the Calcutta Committee that no discretion should be allowed when the average given by the tins examined falls below 73°, and that a consignment represented to be of one uniform quality should not be admitted without rectification of which any one sample tin flashes below 70°. It is to be understood that in determining the flashing point of the oil contained in any single tin, the analyst will not be bound by the first experiment, but that after a series of experiments he may set off against one another, by striking an average or otherwise, such of the results obtained as would be so set off by a scientific man making like experiments for any other purpose and pronounce as the final result of the series of experiments what he finds the true flashing point of the contents of the tin to be.

9. As regards the procedure to be followed in regulating importation, the Act at present recognises only two classes of oil—(*a*) "dangerous petroleum," avowedly imported as such under license; and (*b*) petroleum which is not dangerous. The importation or the bringing into British India by sea or land of "dangerous petroleum," *i.e.*, petroleum flashing below 73°, otherwise than as allowed by section 4 of the Act of 1881 is illegal. The Calcutta Committee, while, as already stated, not prepared to grant any advantage to "certificated petroleum of the non-dangerous class in respect of the fulfilment of the legal test, recommend that a distinction should be recognised between "certificated" and "uncertificated" oil in regard to the conditions of time and place in the application of the test. They would allow oil certified and shipment not to fall below the standard required by the Indian law to be landed first and tested afterwards, while "uncertificated" cargoes would be detained at some distance from the port, and not allowed to enter until samples had been submitted and been found to satisfy the test. The object the Committee have in view is to induce all shippers to accompany their consignments of petroleum with certificates. The Government of India have however, in legislating in the matter, to consider the cases of other ports besides Calcutta. In Madras, for instance, it is often impossible owing to the surf to insist on a vessel lying by until samples have been tested, while from the smaller ports samples might have to be sent all the way to Madras. In consequence, it seems to His Excellency the Governor General in Council that the simpler course will be to continue to regulate the importation of petroleum "declared dangerous" and intended for manufacturing purposes by sections 4 to 6 of the Act, and to provide in the case of all other petroleum that no restriction shall be placed on its importation, but that power shall be taken for the Local Government to regulate the landing of the oil at such places and under such conditions as to storage as the Government may prescribe, no petroleum being allowed to be removed for consumption until it has been certified by the Government Examiners to satisfy the legal standard. In modifying the law in this manner, it will be further necessary to empower the Local Government—

(1) to order the rectification by the consignees within a time to be fixed by the Government in each case of any oil found to be below the standard; or as an alternative—

(2) to allow, within a time fixed as before, the oil to be passed out for manufacturing purposes as dangerous petroleum, subject to the rules regulating dangerous petroleum; and

(3) failing (1) and (2), to order the destruction of the oil.

10. In amending the Act, power will taken to provide for the special treatment of exceptional cases, such as the importation of small quantities of highly rectified oil in iron drums. The levy of fees to cover warehouse rent and the cost of the necessary buildings and establishments will also be legalised.

ORDER.—Ordered, that this Resolution be forwarded to the Governments of Madras and Bombay and to the Chief Commissioner of British Burma for information; also to the Government of Bengal, with a request that, with the permission of His Honour the Lieutenant-Governor, steps may be taken to obtain from the Board of Analysts at Calcutta, and submit to the Government of India, a set of instructions referred to in paragraph 3.

A. MACKENZIE,

Secretary to the Government of India.

Letter from the Government of Bengal, No. 934, dated the 16th July 1883, forwarding the report of a Committee appointed by the Lieutenant-Governor to consider certain questions connected with the importation and testing of petroleum.

Statistics and Commerce Despatch from the Secretary of State, No. 111, dated the 12th July 1883, forwarding a copy of a final latter from Sir. F. Abel enclosing a joint memorandum by himself, Mr. Boverton Redwood and Surgeon-Major J. B. Lyon, the Chemical Examiner to the Bombay Government, relating to the application in India of the Abel's test for determining the flashing point of Petroleum.

RESOLUTION.

Last year several large cargoes of petroleum oil which, as appeared from certificates obtained by the consignors, had before shipment in America satisfied flashing tests purporting to be equivalent to those prescribed by the Petroleum Act, 1881, were refused admittance at Indian ports by reason of failing, when examined in India, to pass the test required by the Act. This test, which is embodied in the schedule to the Act, is that generally known in the trade as Abel's test. In consequence of the detention of these cargoes, questions were raised by the consignees and others interested in the petroleum trade as to the suitablity of the standard test and the uniformity of the results obtained by it when applied under the conditions of a tropical climate. Steps were accordingly taken by the Government of India to have the whole subject of the definition of the legal standard and of the manner of its application thoroughly investigated, in view to a final and authoritative solution of the difficulties and doubts which had arisen. In respect of those points which depend upon scientific considerations, a patient and careful inquiry has now been completed by experts both in England and in this country. The final report of the English analysts, including Sir Frederick Abel himself, is appended to the despatch of the Secretary of State of the 12th July last read in the preamble. In addition, however, to the scientific questions regarding the present standard, the Government of India have also had under consideration the improvement of the existing practice in regard to the storage, testing and passing of shipments of the oil and of the procedure to be followed in respect of its importation generally. On this subject the Governor General in Council has derived very valuable assistance from the labours of the Calcutta Committee appointed by the Lieutenant-Governor of Bengal, whose report is forwarded with the letter from that Government, No. 934, dated 16th July 1883.

2. With regard to the measures which should be taken to place the importation of petroleum into India on a safe and satisfactory basis, the Governor General in Council has resolved to initiate legislation in amendment of the present law, so as to give effect to the modifications which appeared to be desirable in the existing procedure.

3. The following are the points to which the Secretary of State in his despatch read in the preamble draws attention as requiring to be now finally settled :—

First, the question whether any, and if so what, amendments should be made in the schedule of the Petroleum Act, 1881.

Secondly, the expediency of raising the standard at which petroleum may be safely imported into or used in India from 75°F., as now fixed by the Act, to 78°F.

Thirdly, the desirability of allowing in the case of petroleum imported under an American certificate a margin of variation of 3°F. between the test shown in the certificate (not being under 78°F.) and that obtained in India, the oil being rejected only if the Indian test, with this allowance, shows it to be below the standard fixed by the law.

4. As regard the first point—the amendment of the schedule to the Act—it is now generally admitted that the directions as given in the schedule for applying the test require modification. The joint memorandum of Sir F. Abel and Messrs. Redwood and Lyon forwarded with the despatch quoted indicates the nature of the precautions and corrections

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 6th NOVEMBER 1883.

GENERAL REMARKS.—There has been heavy rain during the past week in the coast districts of the Madras Presidency which has inundated the crops in parts, but general prospects continue good in Madras and Mysore. Rain has also fallen throughout the Deccan and Southern Mahratta Country, doing slight injury to standing crops in several districts. Great scarcity of water prevails in Kurrachee and locusts are destructive in three districts of the Deccan. Rain is needed in Ulwar, otherwise the reports from Central India and Rajputana are favourable.

No rain fell in Assam and very little in Burma and more is wanted in both for the rice crop, but general prospects are good.

Slight and partial showers have occurred in the Central and Southern parts of Bengal, which have done some good, but, except in the Eastern districts and Cooch Behar and Jalpaiguri, the greater part of the rice crop on high lands has been already destroyed, and the crops on low lands are in a critical condition. *Rabi* sowings are also seriously impeded. In the Central Provinces the outlook continues favourable, although some injury has been caused to cotton and linseed by cloudy weather. In the North-Western Provinces and Oudh and Punjab, prospects are fair, but rain is much needed for the *rabi* in both provinces.

Harvesting of the *kharif* is still in progress in most provinces, and the outturn has generally proved to be under the average. *Rabi* sowings are also progressing and promise fairly well, except in Bengal.

Cholera in a sporadic form exists in Madras and parts of Northern India, and fever is prevalent, otherwise the public health is fair.

Prices continue to rise in Bengal.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(Nov. 7th)		
Bellary ...	1·47 (average of eight stations).	Standing crops generally good. Harvest *cumboo* and *cholum*, yield below average. *Ragi*, *kowa*, and gingelly about average. Six deaths from cholera.
Kurnool ...	1·78 (average of eight stations).	Crops damaged from excessive rain. Harvest *cholum*, *sujja*, *kowa*, and indigo, yield below average.
Ganjam ...	4·19 (average of seventeen stations).	Standing crops generally good. Fever and small-pox slight in one taluk.
Kistna ...	9·55 (average of nine stations).	Crops under water in two taluks, elsewhere in good condition. Cattle-disease, fever, and small-pox in parts.
Chingleput (Madras) ...	5·72 (average of eleven stations)	Standing crops good. Harvest *ragi*, &c., yield half. Fifteen deaths from cholera. Small-pox slight in one taluk.
Coimbatore ...	2·32 (average of sixteen stations).	Standing crops good. Harvest paddy, *cholum*, *ragi*, and *cumboo* yield average. Fifty-four deaths from cholera. Fever, small-pox, and cattle-disease slight.
Tanjore ...	3·44 (average of thirteen stations).	Standing crops generally good. Harvest paddy, *cholum*, *ragi*, and *cumboo* yield below average. Fourteen deaths from cholera.
Madura ...	2·48 (average of eight stations).	Standing crop fair. Harvest paddy, yield above average. Dry crops average. Slight cholera in parts.
Malabar ...	1·65 (average of fourteen stations).	Second crop cultivation progressing. Small-pox and fever slight.
Travancore ...	6·651	Sowing nearly over. Fever in parts. *General Remarks.*—General prospects good.
Bombay—(Nov. 7th)		
Kurrachee ...	No rain	Fever generally prevalent. River at Kotri on 5th, 6 feet 4 inches against 7 feet 5 inches on same date last year. Want of water much felt. Small-pox prevalent in two villages of Sehwan taluka, 11 fresh cases, 1 death, 10 remaining sick. Cattle-disease in three talukas. *Keen* worm in *til* crop in Tatta. Harvesting going on. Wheat, red rice and *bajri* in Kurrachee 24, 28 and 36, in Manjhand 22, 30 and 40, in Tatta 21, 32 and 36, and in Sujawal 21, 32 and 42 lbs. per rupee, respectively.
Hyderabad ...	......	*Kharif* harvesting continues. *Rabi* operations in progress. Small-pox in five, fever in eleven, and cattle-disease in five talukas. Wheat 25, *bajri* 38, *juari* 40, red rice 26, and white rice 22 lbs. per rupee.
Ahmedabad ...	......	*Kharif* harvest progressing. Standing crops healthy. Fever in some talukas. Cattle-disease in Viramgaum. *Bajri* 29 and wheat 26 lbs. per rupee.
Baroda ...	......	Slight cholera continues in the Navsari and Attarsumba mahals. Harvesting of *kharif* and *rabi* sowing in progress. *Bajri* 31 and rice 24 lbs. per rupee.
Surat ...	......	Sowing of *rabi* crops commenced. Cutting of *kharif* crops continues. Fever in some talukas. Cholera in Jalalpur, 20 cases, 7 deaths, Bulsar 13 cases, 7 deaths, and Surat 16 cases, 6 deaths. Destruction of locusts continues. *Juari* 39 and *nagli* 44 lbs. per rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Nasik ...	Heavy rain at Niphad	*Bajri* and cotton suffered from excessive rain. *Kharif* reaping and *rabi* sowings vigorously continue. Locusts damaging crops in ghat villages. Health good. *Bajri* 33, wheat 28½, and rice 22½ lbs. per rupee.
Colaba (Bombay) ...	·86 on 3rd	Abnormal temperature 1° cool to 3° warm. Vapour in air defective on 31st and very excessive from 2nd to 6th. Abnormal wind northerly.
Poona ...	......	The unseasonable rain has injured crops. Weather clearing. Prices—*bajri* 44 and *juari* 50 lbs.; in Poona *bajri* 34 and *juari* 43 lbs. per rupee.
Ahmednagar ...	Nagar, 1·31; Shrigonda, ·83; Parner, ·82; and from 05 to ·32 in six talukas; and none in two.	Total rainfall in the district 36·10. Reaping of *bajri* and sowing of *rabi* in progress throughout the district. Cholera 9 attacks, 3 deaths. *Bajri*—maximum 54 lbs. in Shrigonda, minimum 36 in Nagar, *jauri*—maximum 72 in Nowasa, minimum 51 in Akola.
Sholapur ...	1·54	Total rainfall 39·92. *Rabi* sowings retarded in places, owing to excessive rain in Karmala taluka. *Rabi* sown second time. If rain continues cotton crops will suffer. Cholera in Malsiras taluka 7 cases, 3 fatal. *Juari* 55 and *bajri* 34 lbs. per rupee.
Dharwar ...	Rain at Dharwar, Ranibennur and Kod, 1·25, elsewhere less than 1·0; minimum at Hubli, ·23.	Reaping of rice in Dharwar, Hangal, and Kalghatgi talukas interrupted by rain. Early crops good and in ear in most places; late crops germinated in parts and being sown in others. Cattle-disease in three and ague in two talukas. Prices unchanged.
Kanara ...	Karwar, 3·67; Kumpta, 3·39; Sirsi, ·66; Hallial, 1·22.	Total rainfall 147·38. Rice harvest continues still. Small-pox 1 death in Siddapur and 1 in Sirsi. Fever prevails in three talukas. Common rice at Karwar 13 and in district average 15¼ seers per rupee. Weather rainy.
Rajkot ...	......	General health feverish. Weather fair. *Bajri* 30 and *juari* 35 lbs. per rupee.
		General Remarks.—River very low in Sind. Rain throughout the Deccan and Southern Mahratta Country. Crops injured by it in parts of Poona, Nasik, Belgaum, and Kaladgi. Locusts doing damage in parts of Colaba, Satara, and Nasik. *Kharif* harvest and *rabi* sowing continue. Fever generally prevalent. Cholera, cattle-disease, and small-pox in a few districts.
Bengal—(Nov. 7th)		
Chittagong ...	*Nil*	Weather fine. Rain wanted for standing crops. Prospects favourable. Prices steady. General health good. Cattle-disease still reported.
Dacca ...	*Nil*	Paddy being harvested. Good crops. Sowing of mustard and pulses continues.
24-Pergunnahs (Calcutta)	·01	Prospects of late rice on high lands very unsatisfactory; crops on low lands promise fairly. Rain very much needed, but seems unlikely to fall. Cultivation of winter crops partially hindered by early cessation of the rains. Price of common rice varies from 12 seers 5 chittaks to 19 seers per rupee. Public health generally good.
Moorshedabad ...	There was an insignificant shower of rain confined to the centre of the district in the north.	Weather overcast with bursts of sunshine. Failure of late rice expected elsewhere; one-third to half of an average crop will probably be saved by irrigation. Indigo suffered irretrievably, and oil seeds, pulses, and cereals more or less damaged by insects. Sugarcane promises well. There is a reaction against the excessive rise in price of rice reported last week which was evidently due to a panic on the part of the holders.
Rajshahye ...	*Nil*	*Amun* on high land destroyed and being used as fodder. *Rabi* likely to be a short crop.
Burdwan ...	Slight rain; Cutwa, ·23; Raneegunge, ·57.	Prospects decidedly bad. Rain much wanted. Public health not very good. Fever prevalent.
Rungpore ...	*Nil*	Weather cool and seasonable. Prospects of crops gloomy. Prices risen. Fever prevalent.
Bhagalpur ...	*Nil*	Prospects not favourable. Paddy on high lands suffering. About 8 annas outturn expected. *Rabi* sowings also being delayed. Price of rice 15 seers 2 chittacks per rupee. Fever reported from Soopole sub-division.
Purneah ...	*Nil*	Prospects unfavourable Rain wanted for *rabi* crops; probable outturn of rice crop from 8 to 10 annas Common rice 16 seers per rupee. Fever raging; sporadic cases of cholera reported.
Patna ...	*Nil*	Paddy suffering much for want of rain. *Rabi* sowing going on. Cholera and fever still reported from interior.
Durbhunga ...	*Nil*	*Labi* sowings obstructed, except in south of district. There will scarcely be an 8-anna rice cro: throughout the district and prices will be very high. No distress noted, yet fever very prevalent.
Hazaribagh ...	·86	Weather clear and growing cool. Late rain has done material good to *rabi* crops, but little to paddy. Prices steady. Public health good.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bengal—*contd.*		
Cuttack ...	·40	Weather now and then cloudy. *Laghu sarad* ripening; *garu sarad* in ear; high land paddy suffering from drought. Coarse rice 20 seers per rupee. Public health good. *General Remarks.*—Slight rainfall has been reported from parts of Burdwan, Orissa, and Chota Nagpore divisions, and also from the districts of Gya and the Sonthal Parganas. It has been of some benefit to the rice on the low and irrigated lands and to the cultivation of the *rabi* crops in those parts. The general outlook of the province, however, is serious, save in the eastern districts, and in the northern districts of Julpaigoorie and Cooch Behar, from which the reports are rather favourable. The rice on the high lands has been mostly destroyed, and has also suffered to a more or less extent on the low lands. The prospects of the *rabi* crops also are not good, and unless rain falls soon, they too will be very deficient. Prices have risen throughout the province. From some districts the rise has been reported to be very considerable. Fever, as usual at this season, is prevalent in some districts; elsewhere the public health is pretty good.
N. W. Provinces and Oudh—		
Benares (Nov. 6th)	*Nil*	Prospects of *rabi* sowing good. Autumn fever moderating. Prices fluctuating slightly. Bazars well supplied.
Allahabad („ 7th)	*Nli*	Weather seasonable. *Kharif* being harvested. *Rabi* sowings continue. Late rice being irrigated. Health good. Prospects good. Prices lower.
Gorakhpur („ 5th)	*Nil*	*Rabi* ploughings advanced. Rain wanted. No cholera in city, but some sporadic cases in district. Prices steady.
Jhansi („ „)	*Nil*	*Kharif* crops suffering from deficiency of rain. *Rabi* sowings continue. Prices show a tendency to fall. Health of people and cattle good. Fodder scarce.
Agra („ 6th)	*Nil*	*Kharif* crops continue to suffer from drought. *Rabi* sowings going on where water is available. Fever in four parganas, but general health good. Prices steady.
Bareilly („ „)	*Nil*	Harvest approaching completion. Prices stationary. Fever continues. Cholera in one village only. Cattle in good health.
Meerut („ „)	*Nil*	*Kharif* harvest almost completed. *Rabi* sowings in full progress, and nearly all wheat. Health good. Supplies sufficient. Prices steady.
Kumaun („ „)	......	Weather fine, getting colder at nights. Wheat is being sown. General health good. Cattle-disease continues. Prices unchanged.
Lucknow („ „)	*Nil*	Winter setting in. *Rabi* sowings nearly finished. Rain wanted for the *mash* crop. Condition of people and cattle good. Markets well supplied. Prices stationary.
Partabgarh („ „)	......	Grains cheap. *Rabi* sowings well in hand and germinating fairly, but tanks are almost dry, and the spring level in wells has fallen very considerably, rendering irrigation precarious. General health good.
Sitapur („ „)	*Nil*	General health good.
Fyzabad („ „	*Nil*	Sowing of wheat, barley, and gram is going on; *mash* and *jarhan* injured for want of rain. *Rabi* sowings also need rain. Public health and condition of cattle good.
Rae Bareli („ 5th)	*Nil*	Weather seasonable. *Urd, motha, juari*, and rice withering for want of rain. *Rabi* sowings in full swing. General health good. Supplies sufficient. Prices steady.
Cawnpore („ 6th)	......	Late *kharif* crops being harvested, and *rabi* sowings in progress. Health of people and cattle good. Prices almost stationary.
Farukhabad („ „	......	Weather seasonable. Health fair, but fever still lingers in some parts. *Rabi* sowings nearly complete, but some dry land will be left unsown. No cattle-disease. *General Remarks.*—The *rabi* sowings are progressing, and the seed germinating fairly: some dry land, however, in Farukhabad and elsewhere cannot be sown without rain. Slight cholera lingers in Bareilly and Gorakhpur. The markets are well supplied, but fodder is scarce in Jhansi.
Punjab—(Nov. 7th)		
Delhi ...	......	Health good. *Kharif* harvesting in progress. Outturn below the average. *Rabi* sowings commenced. Prices stationary.
Hissar ...	......	Health good. Prices stationary. Crop prospects unaltered.
Umballa ...	......	Health good. *Kharif* crops harvested. Yield below the average. Prices steady.
Jullundur ...	......	Health good. Yield of *kharif* crops average. *Rabi* sowings continue. Prices steady.
Amritsar ...	......	Health good. Prices stationary.
Sialkot ...	......	Health and crop prospects good. Prices falling.
Ferozepore ...	......	Health and crop prospects good. Prices steady.
Lahore ...	......	Health and condition of crop good. *Rabi* sowings are flourishing. Prices steady.
Rawalpindi ...	......	Seasonable fever in three tahsils. Health elsewhere good. *Kharif* crop harvested, outturn average. Prices stationary.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Punjab—*contd.*		
Mooltan ...	......	Health good. *Kharif* harvested. *Rabi* sowings in progress. Prices steady.
Dera Ismail Khan ...	......	Fever slightly prevalent. *Rabi* sowings in progress. Prices steady.
Peshawar ...	......	Fever still prevalent. Prices falling.
		General Remarks.—There has been no rain during the week, but it is needed throughout the province for the *rabi* sowings. Fever is prevalent in the Rawalpindi, Dera Ismail Khan, and Peshawar districts. Health elsewhere is good.
Central Provinces—(Nov. 7th)		
Nagpur ...	......	Weather bright and cool. Cotton and linseed somewhat damaged. Wheat sowings progressing. Prices slightly fallen.
Jubbulpore ...	......	No report received.
Saugor (Nov. 6th)	......	Weather clear. *Rabi* sowings nearly finished. *Til* and rice being cut. Prospects good. Prices stationary. Health fair.
Seoni ...	......	Weather clear and cool. *Rabi* sowings progressing. Cotton being picked. Fever increasing. Prices falling.
Hoshangabad ...	......	Weather seasonable. Prospects good. *Rabi* sowings in progress. Fever prevalent. Wheat 16 seers and rice 11 seers per rupee.
Khandwa ...	......	Weather cool and pleasant. Prospects good. *Rabi* sowings progressing. Nine deaths from cholera. Wheat 17½, *juari* 18¾, and gram 20¼ seers per rupee.
Raipur ...	·78	*Kharif* outturn expected to be below average. *Rabi* sowings progressing. Health good. Prices steady.
Sambalpur (Nov. 3rd)	·78	Weather close and cloudy. Prospects favourable. Inferior rice nearly all reaped. Pulses promising. Health good. Common rice 33½ seers per rupee.
		General Remarks.—The late cloudy weather has done some damage to the young linseed as well as to cotton. *Rabi* sowings are now rapidly progressing under most favourable circumstances.
British Burma—(Nov. 3rd)		
Akyab ...	*Nil*	Total rainfall 179·57. Three deaths from cholera in Kaladan, otherwise public health good. Eight deaths of cattle in Kaladan township, elsewhere health of cattle good. Crops in good condition in Naaf township. *Laungbi* paddy ripe but unreaped yet. Rain much wanted in Rathidoung township and crops suffering somewhat. Crops slightly injured by insects in Kyoet and suffering from want of rain in East Writtoung.
Rangoon ...	0·12	Total rainfall 77·67. Two fatal cases of small-pox reported, otherwise public health during the week good. Price of paddy from Rs. 90 to Rs. 108 per 100 baskets.
Bassein (Oct. 27th)	0·30	Total rainfall 88·16. Public health good. Eleven deaths of cattle in Bassein, 9 in Thaboung, 11 in Yegyi, and 15 in Kyoupow townships. Crops in fair condition. Rain still required in some parts for late planting. Price of paddy from Rs. 100 per 100 baskets.
Do (Nov. 3rd)	1·68	
Amherst (Moulmein) ...	*Nil*	Total rainfall 164·34. Public health and health of cattle good. Damage to crops by insects in five townships and by salt water in three townships. About 10 per cent. of crops liable to damage from drought. In Moulmein town public health and health of cattle good. Crops have suffered from insects and in elevated lands from want of rain. Prospects on the whole not bad. Price of paddy from Rs. 90 to Rs. 100 per 100 baskets. From the 23rd October small portion of early paddy reaped.
Toungoo ...	·29	Total rainfall 77·75. Public health and health of cattle good. Rain wanted. General appearance of crops good.
Kyoukphyoo ...	*Nil*	Total rainfall 156·08. Slight cholera in sporadic form in district. Health of cattle good. Crops on sandy parts of district and at distance from water courses suffering much from want of rain. Crops in low-lying and stiffer soil in good condition.
Sandoway ...	0·38	Total rainfall 2..·87. Public health and health of cattle good. Crops favourably reported on from all parts of districts. Early sowings reaped in a few places. A little more rain wanted for later sowings.
Hanthawaddy ..	......	Public health and health of cattle good. Ploughing and sowing completed. General appearance of crops good. Price of paddy Rs. 100 per 100 baskets.
Pegu ...	*Nil*	Total rainfall 119·18. Public health fairly good. Very little cattle-disease. Crops on low lands good, on uplands suffering somewhat from want of rain, but not extensively as yet. Heat intense during week, but rain expected. Price of paddy Rs. 95 per 100 baskets.
Tharrawaddy (Oct. 27th)	1·0	Total rainfall 99·97. Public health and health of cattle good. Ploughing completed; 229,798 acres have been planted. Crops reported in good condition except in Moza circle, Gyobingonk township, where crops have been slightly damaged by rats. About 171 acres have been reaped in the Sangiva township. Price of paddy from Rs. 95 to Rs. 150 per 100 baskets.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
British Burma—*contd.*		
Prome ...	·06	Total rainfall 45·75. Public health and health of cattle good. Area under paddy about 6,500 acres more than last year. Prospects of crops remain the same as reported last week. Price of paddy Rs. 83 per 100 baskets.
Thonegwa ...	*Nil*	Total rainfall 83·03. Public health good. Eight deaths of cattle in Dyedye township. More rain wanted in Donabyoo township. Part of destroyed crops replanted in Yandoon and Shweyloung townships. Crops in Pyopon and Dyedye townships good. About 700 acres destroyed by floods during last rise of river in part of Thonegwa township. Price of paddy Rs. 85 to Rs. 100 per 100 baskets.
Henzada ...	*Nil*	Total rainfall 80·28. Public health and health of cattle good. Some rainfall in Myandung township; still fear of scarcity, unless more rain falls, especially in northern townships.
Thayetmyo ...	*Nil*	Total rainfall 39·73. Public health good.
Shwaygyin ...	·18	Total rainfall 137·64. Public health and health of cattle good. Crops progressing favourably. Price of paddy Rs. 80 per 100 baskets.
Tavoy ...	*Nil*	Total rainfall 191·82. Public health and health of cattle good. Prospects of crops very good. The early crop is being reaped. Wages of reaping from 25 to 30 baskets of paddy per man.
Mergui (Oct. 20th)	3·10	Total rainfall 168·64. Public health good. Cattle and crops healthy.
Do. („ 27th)	4·10	Price of paddy Rs. 80 per 100 baskets.
		General Remarks.—Public health good. No increase of cattle-disease. Rainfall for the week and up to date very deficient compared with last year. Crops on the low-lying lands progressing favourably. The later paddy and the crops on high lands suffering in parts from want of rain. On the whole the outlook appears more favourable than was reported last week. Price of paddy keeps steady.
Assam— (Nov. 7th)		
Gauhati ...	*Nil*	Weather seasonable. Mornings and nights cool and foggy. Rain much needed for rice crop. Land being ploughed for mustard. Public health fair.
Sylhet ...	*Nil*	State and prospects of crops satisfactory. Public health good.
Silchar ...	*Nil*	Weather cloudy. Prospects of *sali* crops good. Sowing of winter crops continues. Common rice 16¼ seers per rupee. No fresh cases of small-pox reported.
Dibrugarh ...	*Nil*	Weather cold. Prospects of crops good. Public health good.
Mysore and Coorg— (Nov. 6th)		
Bangalore ...	3·20	
Mysore ...	2·75	
Mercara ...	4·53	Cardamom picking completed, yield fair. Coffee picking commenced on several estates, crop good, but recent rains interfered with drying. Rice crop coming into ear.
		General Remarks.—Rain has fallen generally throughout the province; Kolah, 5·16; Chickmagalur, 2·82. Standing crops in good condition. Agricultural operations in fair progress. Prospects satisfactory. Prices stationary. Public health good.
Berar & Hyderabad— (Nov. 6th)		
Amraoti ...	......	Weather clear and cool. *Rabi* sowing commenced. Cotton being picked. Wheat 16 and *juari* 26 seers per rupee.
Akola ...	......	*Kharif* outturn expected to be below the average. *Rabi* sowings in hand.
Hyderabad (Nov. 8th)	·57	Total rainfall from 1st January 30·88. Reaping of *kharif* and sowing of *rabi* and *tabi* crops continue. *Abi* crops flourishing. Cholera prevails in two and cattle-disease in one taluka. Prices—wheat 16, coarse rice 11¾, white *juari* 22¾, yellow *juari* 27¾, and *tur* 21½ seers per current sicca rupee.
Central India States— (Nov. 7th)		
Indore ...	*Nil*	No change. Weather seasonable. Nights cold. Health good. Prices much the same as last week.
Morar (Gwalior) ...	*Nil*	Health good. Weather seasonable. Prices stationary.
Sutna ...	......	Health and prospects good.
Rutlam ...	......	No report received.
Neemuch ...	*Nil*	Weather cold. Prospects and public health good.
Goona ...	......	Health fair. Crops good.
Bhopal ...	......	No report received.
Agar ...	*Nil*	Health and prospects good.
Sehore ...	*Nil*	Health and prospects good.
Nowgong ...	*Nil*	Prospects fair. Public health good. Prices steady.
Manpur (Bhopawar) ...	0·20	Health good. Prices stationary. The sowing of *rabi* crops commenced.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Rajputana—		
Abu (Nov. 7th)	......	Weather seasonable. Fever prevalent.
Sirohi (" 4th)	......	Tanks and wells good. Health good. Crops being cut. Weather seasonable.
Marwar (" 2nd)	......	Eight months' water in Jodhpore city. Tanks and wells almost full. Health good. Crop prospects good. Weather clear. Prices stationary.
Meywar ...	......	No report received.
Harowti (Nov. 3rd)	......	*Rabi* prospects—at Kotah good, in other districts fairly good. Cholera reported from Kotah, elsewhere health good.
Jhallawar (" 2nd)	......	*Kharif* crops good. *Rabi* sowings in progress. Health good.
Ajmere (" 6th)	......	Fever prevalent in district. *Rabi* sowing progressing.
Jeypore (" ")	......	Crops thriving. Health good.
Bhurtpore ...	......	No report received.
Ulwur (Nov. 6th)	......	*Rabi* sowings commenced. Rain wanted. Wells failing. Health good.

No. 4172 *G.*—Mr. W. R. Lawrence, C.S., Assistant Agent to the Governor General, Rajputana, returned to duty, on the forenoon of the 31st October 1883, from the privilege leave granted him in this Office Notification No. 2364 G., dated 16th July 1883.

By Order,

E. A. FRASER,

1st Asst. Agent to the Govr. Genl.

CHIEF COMMISSIONER OF COORG.

NOTIFICATION.

Camp Mercara, the 25th October 1883.

No. 1.—In supersession of the rules published under the Notification dated the 25th May 1883, No. 338-117, the following revised rules prescribing the use of adhesive stamps for denoting Court Fees amounting to less than R10, and impressed stamps for denoting fees amounting to or exceeding R10, framed under Section 27(*b*) of the Court Fees Act, 1870, are published for general information:—

1. When in the case of fees amounting to less than R10 the amount can be denoted by a single adhesive stamp, such fee shall be denoted by a single adhesive stamp of the required value. But if the amount cannot be denoted by a single adhesive stamp, or if a single adhesive stamp of the required value is not available, the next lower value available shall be used, and the deficiency shall be made up by the use of one or more additional adhesive stamps of the next lower values, which may be required to make up the exact amount of the fee.

2. When in the case of fees amounting to or exceeding R10 the amount can be denoted by a single impressed stamp, the fee shall be denoted by a single impressed stamp of the required value. But if the amount cannot be denoted by a single impressed stamp, or if a single impressed stamp of the required value is not available, an impressed stamp of the next lower value available shall be used, and the deficiency shall be made up by the use of one or more additional impressed stamps of the next lower values available, which may be required to make up the exact amount of the fee, in combination with adhesive stamps to make up fractions of less than R10.

3. Any adhesive stamps which may be used under Clause (2) shall be affixed to the impressed stamp of the highest value employed in denoting the fee.

4. When two or more impressed stamps are used to make up the amount of the fee chargeable under the Court Fees Act, a portion of the subject-matter shall be written on each impressed stamp so used, and the writing on each stamp shall be attested by the signature of the person or persons executing the document.

5. When one or more impressed stamps used to denote a fee are found insufficient to admit of the entire document being written on the side of the paper which bears the stamp, so much plain paper may be joined thereto as may be necessary for the complete writing of the document, and the writing on the impressed stamps and on the plain paper shall be attested by the signature of the person or persons executing the document.

By Order,

H. WYLIE, *Major*,

Secretary to the Chief Commr. of Coorg.

TREASURE TROVE.

It is hereby notified, under Section 5 of the Indian Treasure Trove Act (VI of 1878), that on the 20th July 1883, treasure, consisting of 46 whole-rupee coins and 12 half-rupee coins, which appear to have been current during the time of the Nabob of Carnatic, valued at R52, were discovered, concealed in a small pot, while levelling an old shed in the garden of Virapa Kavannaw, of Manjanayakawpatti, in Palni Taluq, Madura District, Madras Presidency.

All persons claiming the said treasure, or any part thereof, are hereby required to appear personally or by agent before the Collector, at his Office, at 11 A.M., on the 10th April 1884, in order that the matter may be inquired into and determined according to the provisions of the Act.

C. S. CROLE,
Acting Collector.

MADURA,
The 20th October 1883.

TREASURE TROVE.

It is hereby notified, under Section 5(*a*) of the Indian Treasure Trove Act (VI of 1878), that on or about the 10th of July 1883, treasure consisting of the undermentioned gold coins and jewels, valued at R313, was found under a ruined wall in the vacant ground in front of the house of one Nallthambigounden, a ryot in Aulamputty, a hamlet attached to Arur village, in the Nambal Taluq, Salem District, in the Presidency of Fort St. George:—

Description of Coins and Jewels.

	R	a.	p.
16 Gold Mohurs, valued at R15 each	240	0	0
4 Gold Mohurs, valued at R7-8 each	30	0	0
2 Gold rings, worth about	35	0	0
2 Gold ear pendants, worth about	8	0	0
TOTAL	313	0	0

All persons claiming the treasure, or any part thereof, are required to appear either in person or by agent before the Collector of Salem, on the 19th March 1884, in view to the matter being inquired into according to law.

L. MOORE,
Acting Collector.

The 27th October 1883.

BOARD OF REVENUE.

NOTIFICATION.

Calcutta, the 27th September 1883.

No. 1135½ *B.*—The following rules have been made under section 9 of Act VIII of 1878 by the Board of Revenue, Lower Provinces, with the sanction of the Local Government, and are under Section 204 of the same Act notified for general information:—

CALCUTTA INTERNATIONAL EXHIBITION, 1883-84.

Custom House Arrangements.

1. All entries of goods for the Exhibition must be passed at the Custom House in accordance with the arrangements made by the Collector of Customs.
2. In respect of dutiable goods the Exhibition building is appointed a public warehouse under the provisions of section 15 of Act VIII of 1878, of which Mr. Jules Joubert shall be deemed to be the keeper for the purposes of section 96 of that Act.
3. Packages containing dutiable goods, upon which duty has not been paid, must be entered for bond and appraised and taken in charge of an officer to the Exhibition building in the usual manner. Pending appraisement and removal to the Exhibition building, all such packages will be allowed to remain rent-free in a portion of the Custom House premises set apart for the purpose.
4. At the close of the Exhibition, exhibitors will have to account to the Custom House authorities for all dutiable goods admitted into the Exhibition in accordance with the bond bill of entry. Goods intended for delivery in Calcutta on sale or otherwise will on payment of duty be cleared from bond, and goods intended for re-exportation will be re-shipped from bond in the usual manner.
5. The charges mentioned in the schedule attached to these rules are remitted in respect of goods intended for the Exhibition.
6. No duty will be payable for wines, spirits, or other liquors consumed in the Exhibition for tasting or judging purposes, and a certificate of the amount thus consumed must be obtained from the Secretary to the Executive Committee of the Exhibition and presented by exhibitors to the Custom House officer when accounting for the dutiable goods admitted into the Exhibition. Without such certificate duty will be assessed on all dutiable goods shown by the bills of entry as having been admitted into the Exhibition and which are not forthcoming at its close.

7. The Custom House officers will not have custody of, or be in any way responsible for, goods in the Exhibition building, the custody of which as a public warehouse will rest with Mr. Jules Joubert.
8. These rules apply only to goods intended *bonâ fide* for Exhibition.

HENRY F. BLANFORD,

Meteorological Reporter to the Government of India.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The "Indian Law Reports," published under the authority of the Governor General in Council, will appear in monthly parts, published as soon as possible after the first of each month at Calcutta, Madras, Bombay, and Allahabad, and will comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court will be reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court will be reported in the Calcutta Series. The Parts of each Series can be had separately, or all four Parts can be had stitched into one wrapper at the option of subscribers and purchasers. It will be observed from the following statement of the terms of subscription and sale, that a considerable reduction is allowed to persons taking the complete set:

Terms of subscription, payable annually in advance.

	Without Postage.	With Postage.
For the CALCUTTA SERIES .	R35	R37-8
„ MADRAS SERIES .	„ 8	„ 9
„ BOMBAY SERIES .	„ 8	„ 9
„ ALLAHABAD SERIES .	„ 8	„ 9
Complete set	„ 45	„ 47-8

The price of each Part purchased separately will vary according to the amount of matter it contains, and will be printed on the wrapper. It will, however, never be below the following:—

For a Part of the CALCUTTA SERIES .	R3	8
„ „ MADRAS SERIES .	„ 1	0
„ „ BOMBAY SERIES .	„ 1	0
„ „ ALLAHABAD SERIES	„ 1	0
Complete set	„ 4	0

Persons desiring to subscribe for or purchase the Reports, should apply to—

MESSRS. THACKER, SPINK AND CO., CALCUTTA;
MESSRS. THACKER AND CO., BOMBAY:
MESSRS. HIGGINBOTHAM AND CO., MADRAS;
THE GOVERNMENT CENTRAL BOOK DEPOT, BOMBAY;
THE GOVERNMENT BOOK DEPOT, ALLAHABAD.

Orders and Subscriptions for 1876 should be at once remitted.

THE BENGAL LAW REPORTS.

A few sets of the Bengal Law Reports (Volumes 1 to 15) are available at Messrs. Thacker, Spink & Co., Calcutta, at R375 a set.

For sale in Rajputana to Officers stationed there.

Moore's Manual of Family Medicine for India, 4th Edition. *Price*—

To Government Officers (except those mentioned below) and to the public at large, *R4*.

To all Officers employed in Government Departments who are in receipt of salaries under R500 per mensem, on a certificate being furnished declaring that the book is to be purchased only for the personal use of the officer, *R3; packing and postage, 8 annas.*

Apply to the Superintendent, Commissioner's Office, Ajmere.

☞ The following books may be purchased from the Office of Superintendent of Government Printing, India, No. 166, Dhurrumtollah Street, for private use only, which should be stated in the requisition.

No orders can be attended to unless accompanied by a remittance. When postage stamps are forwarded, one anna additional should be sent for every Rupee's worth of stamps, for discount in exchanging them for cash. Service labels or Court Fee stamps are not received.

Books required for the public service cannot be supplied on payment; they are only issued on the authority of the Department to which the indenting officer is subordinate. Applications for them should be made through the Local Government under which the applicant serves.

Army List—New Number.

The Official Quarterly Bengal Army List corrected up to 30th September 1883.

☞ *From January 1881 the price of the Army List has been reduced to 1 Rupee per copy; packing and postage, 6 annas.*

E. N. BAKER,
Offg. Under-Secy. to the Govt. of Bengal.

The Gazette of India.

PUBLISHED BY AUTHORITY.

CALCUTTA, SATURDAY, NOVEMBER 10, 1883.

☞ Separate paging is given to this Part in order that it may be filed as a separate compilation.

PART III.

Advertisements and Notices by Private Individuals and Corporations.

NOTICE.

The interest and responsibility of Mr. William Watson in our firm ceased from 30th September 1883.

THOMAS WATSON & CO.

CALCUTTA,
The 5th November 1883.

PROMISSORY NOTES.

Lost.

The Government Promissory Note, No. 021728, of the 4 per cent. Loan of 1879, for R700, originally standing in the name of the Dewan of Mysore, the proprietor, by whom it was never endorsed to any one, but bearing an unsigned endorsement for renewal. Interest has been drawn on the Note up to the 15th July 1883. Payment of the Note and of the interest thereupon have been stopped at the Public Debt Offices, Banks of Bengal, Madras and Bombay, and application is about to be made for the issue of duplicate in favor of the proprietor.

T. SRINIVASSIENGAR,
Under-Secy. to the Dewan of Mysore.

BANGALORE,
The 22nd October 1883.

SUPPLEMENT TO

The Gazette of India.

No. 45.} CALCUTTA, SATURDAY, NOVEMBER 10, 1883.

OFFICIAL PAPERS.

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known.

Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of six Rupees per annum if delivered in Calcutta, or nine Rupees if sent by Post.

No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.

FitzGerald, Officiating Political Agent of the 3rd Class, and First Assistant to the Governor-General's Agent in Biluchistan, is appointed to hold charge of the current duties of the office of Agent to the Governor-General in Biluchistan, in addition to his own duties, with effect from the date of assuming charge, during the absence on deputation of Lieutenant-Colonel Sir R. G. Sandeman, K.C.S.I.

MILITARY.

No. 2635 *G.*—The following promotions are made in the Mhairwarra Battalion, with effect from the 24th September, 1883:—

Jemadar Ramlall to be Subadar, *vice* Sunkurlall, dismissed.

Havildar Subba to be Jemadar, *vice* Ramlall, promoted.

JUDICIAL.

No. 3463 *I.*—In exercise of the powers conferred by Sections 8 and 9 respectively of the Indian Christian Marriage Act, 1872, the Governor-General in Council is pleased—

(*a*) to appoint the Reverend G. Hiram Greenig, a Missionary of the Methodist Episcopal Church, to be a Marriage Registrar in respect of all places within the territories of Mysore, including the civil and military station of Bangalore; and

(*b*) to license the said Reverend G. Hiram Greenig to grant certificates of marriage between Native Christians within the said territories.

No. 3465 *I.*—In exercise of the powers conferred by Sections 8 and 9 respectively of the Indian Christian Marriage Act, 1872, the Governor-General in Council is pleased—

(*a*) to appoint Mr. William Alfred Redwood, a Missionary, to be a Marriage Registrar in respect of all places within the district of Kolar in the State of Mysore; and

(*b*) to license the said Mr. William Alfred Redwood to grant certificates of marriage between Native Christians within the said district.

The 16th November, 1883.

No. 3495 *I.*—In supersession of the Notification by the Government of India in the Foreign Department, No. 391.J., dated the 27th January 1881, the Governor-General in Council is pleased to extend the Cantonments Act, 1880, to the Cantonment of Deesa, subject to the following modifications, namely:—

(i) The second paragraph in Section 1 shall be omitted.

(ii) For the words "Local Government," or "such Government," wherever they occur, the words "the Governor of Bombay in Council" shall be substituted.

(iii) For the words "any cantonment," or "a cantonment," wherever the occur, the words "the cantonment of Deesa" shall be substituted.

(iv) For section 9 the following section shall be substituted:—

"9. Bombay Act VII of 1867 (The Bombay District Police Act, 1867) shall apply to the cantonment of Deesa, and all the provisions of that Act shall, as far as may be, apply to the police force employed in that cantonment.

"The administration of the police in the cantonment of Deesa shall be vested in such person as the Governor of Bombay in Council may, by name, or in virtue of his office, appoint in this behalf, subject to the general control and direction of the Commanding Officer of the cantonment."

(v) Sections 10, 12, and 13 shall be omitted

(vi) The second paragraph in section 25 shall be omitted.

(vii) Sections 31 and 32 shall be omitted.

(viii) In section 34, for the words "Commanding Officers of cantonments or" the words "the Commanding Officer of the Cantonment, or of Commanding Officers" shall be substituted.

(ix) Section 35 shall be omitted.

C. GRANT,

Secretary to the Government of India.

GENERAL.

The 14th November, 1883.

No. 2624 *G.*—Mr. C. Grant, C.S.I., C.S., Secretary to the Government of India in the Foreign Department, is granted three months' privilege leave, with effect from the 30th November 1883, or the subsequent date on which he may avail himself of the same.

J. W. RIDGEWAY, *Lt.-Col.*,

Offg. Under-Secy. to the Govt. of India.

MILITARY DEPARTMENT.

Simla, the 16th November, 1883.

FURLOUGH AND LEAVE.

No. 598.—The undermentioned officer is granted furlough out of India, with the necessary subsidiary leave:—

Conductor P. Wyer, Ordnance Department, (m. c.) for one year, under rule VI of the regulations of 1875.

No. 599.—The undermentioned officers have been granted extensions of furlough by the Right Hon'ble the Secretary of State for India:—

Lieutenant-Colonel (Brevet Colonel) L. H. Williams, Bengal S. C., (m. c.) for 182 days.

Lieutenant-Colonel (Brevet Colonel) P. C. Dalmahoy, Infantry, (p. a.) for ninety-six days.

Major C. S. Beauchamp, R.E., (m. c.) for three months.

Major T. O. Wingate, Bengal S. C., (m. c.) for three months.

Major S. H. Cowan, Bengal S. C., (p. a.) for sixty-one days.

Major A. L'E. H. Holmes, Bengal S. C., (p. a.) for ninety-two days.

Major R. E. S. Smyth, General List, Infantry, (m. c.) for six months.

Captain F. C. N. Goldney, Bengal S. C., (m. c.) for 122 days.

Lieutenant V. M. Stockley, Bengal S. C., (u. p. a.) without pay, for two months.

Surgeon F. J. Tuohy, M.D., (m. c.) for six months.

PROMOTIONS.

No. 600.—The following promotion is made, subject to Her Majesty's approval:—

BREVET.

To be Colonel.

Lieutenant-Colonel Edward Ridley Colbourne Bradford, C.S.I., Madras S. C.,—13th November, 1883.

No. 601.—NATIVE ARMY—

1st Goorkha Regiment.

Jemadar Bahadoor Goorung to be Subadar, *vice* Ruttonbeer Thappa; Color-Havildar Gujbeer Rana to be Jemadar, *vice* Bahadoor Goorung, promoted,—14th August, 1883.

RETIREMENTS.

No. 602.—Lieutenant-Colonel (Brevet Colonel) John Roberts, Bengal S. C., has been permitted to retire from the service, with effect from the 28th September, 1883, subject to Her Majesty's approval.

G. CHESNEY,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

No. 994 R.C., dated Simla, November 8, 1883.

ORDER—By the Government of India, Public Works Department.

ASSAM-BEHAR RAILWAY.

Proposal for establishing through railway communication *viâ* Tirhoot and Northern Bengal between the North-Western Provinces and Oudh on the one side and Assam on the other.

Read the following papers:—

Despatch No. 72 Railway, dated Simla, 26th May 1883.

From—The Government of India, Public Works Department,

To—The Right Hon'ble the Secretary of State for India.

We have had under consideration the question of establishing through railway communication, *viâ* Tirhoot and Northern Bengal, between the North-Western Provinces and Oudh on the one side and Assam on the other, by uniting the lines already constructed and in course of construction as portions of the Tirhoot and Northern Bengal Railways, and by an extension of the Rungpore Branch to Dhubri.

2. The necessity for the completion of this east and west line of communication on the north of the Ganges has long been recognised, and at our request the Government of Bengal has now submitted a complete scheme connecting Sonepore, the terminus of the Bengal and North-Western Railway on the north bank of the Ganges, with Dhubri on the Brahmaputra, in Assam.

3. After full deliberation, we are strongly impressed with the importance of completing this project, unconnected portions of which already exist; the communications will be most valuable as affording to the redundant population of Tirhoot a ready means of transport to the Province of Assam, where the demand for labor is ever increasing, as well as in opening out some of the richest tracts of Upper Bengal; as a famine protection work too, its benefits in time of drought would be incalculable. The Famine Commission of 1880 in their Report state: "The parts in which the effect of drought have been most serious are,—(1) a tract extending along the borders of Nepal, from the Gunduk to the Kosi river, 250 miles by 50." Again: "In Northern Bengal the districts of Behar and Bhagalpore north of the Ganges also require the extension of the lines already constructed."

4. Towards the completion of these lines considerable progress has already been made. Parbattipore having been selected, after careful surveys, as the point at which such an Assam-Behar connection should cross the Northern Bengal Railway, a branch of that Railway was carried eastward as far as Kaunia on the river Teesta. But in view of the anticipated heavy expense of bridging that river, as well as three others beyond, the continuation to Dhubri, which is finally accepted as the connecting point with Assam, was deferred indefinitely after the embankment had made considerable progress, and temporary arrangements consisting of light tramways and ferries were established. The construction of these tramways we reported to your Lordship in our Railway Despatch No. 165 of the 26th December 1881.

Westward from Parbattipore, a branch to Dinagepore is approaching completion.

A

On the Tirhoot side a considerable advance has been made. The Tirhoot Railway system, starting from the Ganges nearly opposite the Mokameh Station of the East Indian Railway, has been opened as far as Bettiah to the north-west, and Jhinjharpore to the east of Durbhunga, and a second connection with the Ganges is in progress, *viz.*, from Mozufferpore to Hajipore, where a bridge across the Gunduk will effect a junction with the Bengal and North-Western Railway.

5. In order to establish complete communication between both Bettiah and Baraitch in the west with Dhubri, whence Messrs. McNeile and Company's fast steamers and vessels of other Companies run to Upper Assam, it is only necessary to make good three breaks, *viz.* :—

(1) To connect Sonepore with Hajipore by a bridge over the Gunduk.

(2) To complete communication between Jhinjharpore and Dinagepore.

(3) To extend the Rungpore Branch from Kaunia to Dhubri, a distance of 54 miles.

6. In regard to the first break we would invite your Lordship's attention to paragraph 4 of the note by the Chief Engineer of Bengal, which is enclosed. The bridge with its connections has been estimated to cost Rs. 14,24,114; but after consultation with our Consulting Engineer for State Railways, we are of opinion that by the substitution of ten spans for eight, this work can be constructed for Rs. 12,00,000. With respect to the question whether the bridge should form part of the Bengal and North-Western or of the Tirhoot Railway, we would point out that it is only by crossing the river Gunduk that the Hajipore section of the Tirhoot Railway system can be placed in connection with the line of communication about to be established by the Bengal and North-Western Railway Company from Baraitch to Sonepore, and thence by a ferry across the Ganges to the East Indian Railway. This bridge, while thus of vital importance to the Tirhoot system, is of comparatively less moment to the Bengal and North-Western Company. We therefore consider that on the former and not on the latter the duty of construction should devolve. Moreover, the Bengal Government have already agreed (*vide* paragraph 7 of letter No. 2529R., dated 1st August 1882, which accompanied our Despatch No 173R. of the 26th December 1882) to undertake this connection as a Provincial work, and we consider that there are no sufficient grounds for relieving them of the obligation. It would be manifestly inexpedient to interpose a small piece of line, some two or three miles in length, between two Railways constructed on totally different terms. This question has been discussed at some length, and we trust that your Lordship will concur in the conclusion we have arrived at.

7. The second break has been for some time under survey, together with a short Branch from Saifgunge to Munihari on the Ganges, whence a conection with the East Indian Railway at Sahibgunge may be effected by a ferry. The Bengal Government consider that this will be a very valuable feeder.

8. With reference to the third break, we beg to explain that in December last the inadequacy of the temporary arrangements referred to above in our 4th paragraph was strongly urged upon us by the Chief Commissioner of Assam personally; and in February our Hon'ble Colleague Mr. Hope, in company with our Director General of Railways, and the Chief Engineer to the Government of Bengal, thoroughly examined the line of communication. Proceeding from Kaunia to Mogulhât, and thence to Dhubri along the unfinished embankment of the projected railway, the return journey was accomplished by steamer, tramway, cart, ferry, and light tramway, through Kurigaon. This return journey was found to fully justify the complaints of the Chief Commissioner; the existing arrangements are utterly unfit for the main communication between two provinces. The Dhurla and Brahmaputra rivers alter their courses perpetually, throwing up banks here and cutting away there, so that any arrangement made on this route can only be most temporary, involving serious incovenience to passengers. The frequent changes, moreover, entail considerable outlay, so much so that during the last half-year the working expenses of the tramways were 97·10 per cent. of the gross earnings. The result of this visit thus was to condemn the existing route entirely. On the other hand, the original line, *viâ* Mogulhât, was proved, by the condition of

the embankment, to need the provision of much less water-way than had been supposed. Through this advantage, together with the adoption of a different system of bridging, it was evident that the connection could be established for a sum considerably less than the amount, one and a quarter million sterling originally estimated for its completion.

9. In consequence of the additional information thus gained on this question, the Government of Bengal were requested to have a careful revision of the project carried out, which resulted, we are glad to state, in it being shown that the line of rails could be extended to Dhubri at a cost of about 56 lakhs of rupees.

10. The importance of this extension has of late been much enhanced by the fact that the construction of the Assam Railway from the Makum Coal Field will enable coal to be brought down to Dhubri, and effect large savings in the working expenses of the Northern Bengal and Tirhoot Railways.

The value of the connection, moreover, to the Province of Assam, and the overcrowded territories to the westward, is emphatically stated in the concluding paragraph of the letter from the Government of Bengal, of which a copy is enclosed.

11. Notwithstanding, however, the great importance we attach to the completion of the entire line of communication, we do not at the present time ask your Lordship's sanction to the extension of the Rungpore Branch to Dhubri, as, although this forms an integral part of the whole scheme, it was not included in Schedule A of our Despatch of the 23rd January last on Railway Policy. We hope, however, to be before long in a position to show such savings on the estimates in that schedule as will unable us to carry out this extension without causing any excess in the aggregate estimates, and we may then address your Lordship again on the subject.

12. Excluding the Rungpore-Dhubri section then, our present proposals, to which we ask your Lordship's sanction, comprise—

		Miles.	Estimate rupees	Miles.	Estimate rupees.
1.	Sonepore to Hajipore ...		..	2·5	14,24,114
2.	A. Jhunjharpore to Gongareeria	16·5	10,85,485	206·5	1,46,49,650
	B. Gongareeria to the Kosi ...	25·5	22,61,500		
	C. Ferry across the Kosi ..	4 0	4,09,000		
	D. Kosi to Purneah ...	55·0	30,24,975		
	E. Purneah to Dinajpore ...	87 0	66,11,055		
	F. Munihari Branch and Ferry	18·5	12,51,635		
			Total ...	209	1,60,73,764

We have not yet received detailed estimates for the sections marked B, C, and D, and the figures therefore entered above must be taken as approximate only. The complete estimates will be awaited before final sanction is communicated to the Government of Bengal for the construction of these portions, but we have no reason to believe that the amounts now entered will prove insufficient to any appreciable extent.

13. For those works, we have provided Rs. 1,69,00,000 in the Schedule A. (*b*) to our Despatch No. 29 of the 23rd January 1883, *viz.* :—

	Rs.
Hajipore-Sonepore	12,00,000
Pipraghat-Saifgunj } Munihari-Dinajpore }	1,57,00,000

14. With reference to the requests made by the Lieutenant-Governor of Bengal in paragraphs 18 and 19 of the enclosure, we may state that we consider that the Gunduk bridge should be a Provincial work, for the reasons given in our separate Despatch of this date, and also that we see no necessity for disturbing existing arrangements and calculations by writing back certain sums already spent from Provincial balances. The suggestion that the Rungpore-Dhurbi connection should be Imperial, and that the amount already laid out by the Government of Bengal should be refunded to them, will not require consideration until the line is about to be taken in hand.

15. We have already briefly alluded to some of the benefits which may be expected from the completion of these lines, and your Lordship will observe, from paragraph 17 of letter No. 1761R. of the 6th April 1883 from the Government of Bengal, that the net return on the capital cost is estimated at upwards of 4½ per cent. As a financial undertaking, therefore, the prospects are good; and as a means of opening out a country rich in produce, but subject at times to the evils of severe drought, we consider it of the greatest importance, and trust that we may receive at an early date the approval of your Lordship to the construction of the works specified in paragraph 11. Bearing in mind the traffic results of the Northern Bengal and the open portions of the Tirhoot Railway, we have no hesitation in saying that the conditions required of a Productive Public Work will be fulfilled.

16. We attach an index map showing the sections of railway constructed, in course of construction, and now proposed.

No. 1761R., dated 6th April 1883.

From—The Secretary to the Government of Bengal, Public Works Department,

To—The Secretary to the Government of India, Public Works Department.

In reply to your No. 206R.E. of the 1st instant, I am directed to say that the Lieutenant-Governor fully concurs in the remarks regarding the exceedingly unsatisfactory state of the route between Kaunia and Dhubri, owing to the uncertain character of the Dhurla and Brahmaputra rivers. Every effort has been made to meet the existing difficulties; but the Lieutenant-Governor is quite satisfied that they cannot be effectually overcome till a through and uninterrupted line of railway communication has been established to Assam.

2. The orders conveyed in the letter under reply have received the careful attention of the Chief Engineer, and the best estimates that can be framed from all available information have been prepared for each section of the line of 410½ miles between Sonepore, the terminus of the Bengal and North-Western Railway, and Dhubri, the nearest point in the province of Assam.

3. Full particulars are given in the accompanying note by the Chief Engineer, but for convenience of reference the totals are here brought out in tabular form, and indirect charges have been added:—

Number.	Description.	Miles.	Sections completed and opened for public traffic.	Sections under construction.	Sections for which estimates have been submitted for sanction.	Sections for which estimates are submitted herewith.	Totals.	Remarks.
			Rs.	Rs.	Rs.	Rs.	Rs.

		.	97,90,126	34,28,280	94,21,175	1,40,19,263	3,67,51,452	Grand Total Direct and Indirect charges.

The estimates provide for a branch line to Munihari, 13½ miles, and a steam ferry to Sahebgunge on the East Indian Railway, from which considerable traffic may be expected.

4. From the above statement it appears, as remarked by the Chief Engineer, "that of the 410½ miles, 113¼ are open for traffic and 53¾ are under construction. For 103¾ miles estimates have been submitted to the Government of India for sanction, and for the remaining 88 miles estimates, more or less in detail, are now submitted. In addition to the above, and in connection with item VIII, estimates for a branch line to Munihari, 13½ miles, and for a steam ferry across the Ganges to Sahebgunge, 5 miles, have been submitted."

5. The first section from Sonepore to Hajipore includes the bridge across the river Gunduck, consisting of eight spans of 250 feet each, and an approach on 110 brick arches from the western side. The necessity for this latter work has been explained in the letter from this office No. 3689R. of the 7th December, from which a quotation will be found in the 5th paragraph of the Chief Engineer's note. The Lieutenant-Governor again recommends the adoption of this description of approach, and the concession of the use of the arches to the proprietor of the ground on which the fair is held, on the condition that he makes a free gift of all the land required for the construction of the works.

6. Regarding the second and third sections, Hajipore to Muzufferpore and Mozufferpore to Jhinjharpore, no remarks are necessary; the works on the second section are already making good progress, and the third section was formally opened to public traffic by the Lieutenant-Governor in January last.

7. The plans and estimates for the fourth section, Jhinjharpore to Gongareria, 16½ miles, have been submitted to the Government of India with this office No. 1082R.C. of the 5th March 1883, in which, and the papers accompanying it, particulars of this part of the project will be found. In reply, this Government has been informed in the letter noted on the margin that sanction to the construction of this section is withheld pending the consideration of the whole project. The Lieutenant-Governor regrets this delay, because it is obviously impossible that the railway can be allowed to terminate abortively in a paddy field, as is literally true of Jhinjharpore, and in any case the line must be carried on to the banks of the Kosi. For the reasons advanced in the letter above quoted, he would again urge that early sanction to the estimates for this section be accorded, so that the work may be put in hand without any further loss of time.

No. 259R.C. of 15th March 1883.

8. During the past cold season the fifth section from Gongareria to the right bank of the Kosi at Bulloah has been located, and the detailed estimates are now under preparation; but an approximate estimate, amounting with rolling stock to Rs. 22,64,500, has been furnished by the Manager of the Tirhoot State Railway. The distance being only 25½ miles, the mileage rate reaches the high figure of Rs. 88,803; the country itself is level, but the numerous streams crossed require a large amount of waterway, which accounts for the high mileage rate.

9. It cannot be disguised that the establishment of a ferry across the river Kosi presents many formidable difficulties; but to bridge it would be out of the question at present, and the best arrangement for the crossing of the river, about four miles in width, would be to provide three steamers of light draught. With these, and temporary lines on the *dearah*, we must content ourselves until the growth of traffic warrants the expenditure required for the construction of a bridge.

10. From the Kosi to Purneah the country is said by the Manager of the Northern Bengal State Railway, to be exceedingly easy for the construction of a line of railway, which would run on a high ridge of well cultivated country free from floods and pass through at least one important mart. No rivers are crossed, and, with the exception of four miles near the Kosi and five miles near Purneah, hardly any waterway will be required. The estimated cost of this section is therefore, as may be expected, exceedingly low—Rs. 55,000 per mile.

11. For the description of the ninth section from Purneah to Dinagepore, 87 miles, with the branch to Munihari, 13½ miles, and ferry to Shahebgunge, reference is made to this office No. 1581R. of the 22nd March 1883, and papers which accompanied it. The Lieutenant-Governor trusts that early sanction may be accorded to these estimates.

12. Between Dinagepore and Parbatipore, on the Northern Bengal Railway, 19¼ miles, the construction of the line is well advanced, and the Lieutenant-Governor hopes to open it for traffic at the end of the next rainy season, when the banks have thoroughly consolidated.

13. The tenth section from Parbatipore to Kaunia forms a portion of the already completed line of the Northern Bengal Railway, and needs no remarks.

14. Between Kaunia and Dhubri, 54 miles, the embankment is throughout ready to receive the rails. The first portion between the rivers Teesta and Dhurla, a distance of 14 miles, is occupied by the light railway on two feet six inch gauge, which will be taken up if it is decided that the rivers are to be bridged. A most careful revision of the estimates of this section has been made in the Chief Engineer's office, with the result that the amount has been reduced from Rs. 1,22,26,473, the sum originally estimated by Mr. White, to Rs. 92,26,074, inclusive of the expenditure already incurred. The amount required to complete the section is, however, only Rs. 53,88,148. The manner in which this immense reduction in the estimates has been effected is fully explained in the note by the Chief Engineer, paragraphs 18 and 19. In the estimates for the bridges over the four large rivers—Teesta, Dhurla, Sunkosh, and

Gungadhur—a saving of Rs. 48,13,541 has been made by (1) reducing the amount of waterway originally allowed by 2,751 lineal feet (paragraph 18 of note); and (2) by a complete change in the designs. For the costly brick cylinders, which were to have been sunk 80 feet below the river-bed, and the wide spans of 250 feet originally proposed, it is intended now to substitute girders, with spans of 100 feet, supported on screw-piles sunk 50 feet into the bed protected by rubble-stone brought from Dhubri.

15. The expenditure, which has actually been incurred on the road from Kaunia to Dhubri, is shown in the statement which accompanies the estimates of this section as follows :—

Province.	Works.	Establishment.	Tools and Plant.	Total.
	Rs.	Rs.	Rs.	Rs.
Bengal	2,91,007	72,750	29,101	3,92,859
Assam	1,85,235	46,309	18,523	2,50,067
Total ...	4,76,242	1,19,060	47,624	6,42,926

Expenditure on works has been ascertained from the accounts, after excluding that incurred on timber bridges and all other temporary works which will not be useful for the metre-gauge railroad. The figures entered for establishment and tools and plant have been calculated at the usual rates of 25 and 10 per cent. respectively on the cost of the works, as actual expenditure on those heads cannot be ascertained.

16. The amount for which the sanction of the Government of India is now required to complete the whole project is Rs. 2,16,56,912, exclusive of indirect charges made up as shown in the following statement —

No. of section.	Description.	Miles.	Sections for which estimates have been submitted for sanction.	Sections for which estimates are submitted herewith.	Total.
			Rs.	Rs.	Rs.
I	Sonepore to Hajipore	2·5	...	14,24,114	14,24,114
IV	Jhinjharpore to Gongareria ..	16·5	10,85,485	...	10,85,485
V	Gongareria to the Kosi ..	25·5	...	22,64,500	22,64,500
VI	Ferry across the Kosi ...	4·0	...	4,09,000	4,09,000
VII	Left bank of Kosi to Purneah ...	55	...	30,24,975	30,24,975
VIII	Purneah to Dinagepore ...	87	66,11,05		66,11,055
XI	Kaunia to Dhubri	54	...	55,83,148	55,83,148
	Total ...	244·5	76,96,540	1,27,05,737	2,04,02,277
	Munihari Branch	13·5	9,04,635	...	9,04,635
	Sahebgunge ferry	5	3,50,000	...	3,50,000
		263·0	89,51,175	1,27,05,737	2,16,56,912
	Indirect charges	...	4,70,000	6,70,600	11,40,600

17. It is difficult to say what the receipts on the whole line will be, but there seems to be no valid reason why they should fall short proportionately of those on the Tirhoot and Northern Bengal State Railways. During the past year the mileage receipts were Rs. 6,912 and Rs. 8,049 respectively, the average of which, Rs. 7,480, applied to the total length of the line under notice (410¼ miles) would give the sum of Rs. 30,70,540 on the gross receipts, and allowing one-half for working expenses, the net profits would yield 4·69 per cent. on the total cost of the line, Rs. 3,26,72,217. It may be accepted that this result will be attained in the course of a very few years after the opening of the line, and there is every ground for the assurance that the rapid development of traffic, evidenced every where on the railways of Bengal, will extent to this line also with ultimate promise of still better results. The Chief Engineer alludes, in the last paragraph of his note, to the saving that may be effected in working expenses on these lines of railway by the use of coal from Assam. This is not an unreasonable prospect, but the Lieutenant-Governor defers comment on the subject until there has been a further development of the operations on the Makum coal-fields.

18. It remains now to consider to what extent this Government may fairly be expected to accept financial responsibility for the undertaking. It will be remembered that the ninth section, Dinagepore to Parbatipore, is being constructed with Provincial funds, and that a sum of Rs. 3,92,859 has been expended on works in the eleventh section, which will be permanently useful for the metre-gauge railway. The Lieutenant-Governor trusts the Government of India, when according sanction to the whole project, will be in a position to order a refund of the amount expended from Provincial sources in these two sections. The Parbatipore-Dinagepore section was commenced by the Bengal Government at a time when money was not available from the Government of India; but a large Imperial scheme, such as that which is now under consideration, it would be open to many administrative objections that a small section of this extensive undertaking should be classed under a separate heading.

19. Mr. Rivers Thompson is of opinion that the bridge across the river Gunduck with its western approach, constituting section No. I, and the line from Kaunia to Dhubri, section XI, should be treated as Imperial works—the first in its connection with Bengal and North-Western Railway, and the second in consideration of the immense benefit which will certainly accrue to the province of Assam from the construction of the line. In his opinion these two sections should therefore be excluded from the category of works for which this Government may be expected to render itself financially liable. On this basis the sum for which the Bengal Government will have to pay interest into the Imperial Treasury will be represented by the capital cost of the whole system of railways from Hajipore on the river Gunduck to Kaunia on the Teesta. For the greater portion of this the Government of India have already accepted the Lieutenant-Governor's guarantee, and for the remainder, as shown in the statement below, he is willing now to undertake the responsibility :—

1	2	3	4	5	6
Section.	Description.	Section to which sanction has been accorded as Provincial.	Section for which estimates have been already submitted, but to which sanction has not been accorded.	Sections for which estimates are now submitted.	Total.
		Rs.	Rs.	Rs.	Rs.

	Total ...	11,49,324	89,51,175	56,98,475	1,57,98,974

20. In conclusion, I am to say that the Lieutenant-Governor attaches very great importance to the early completion of this main line of railway, and urges that no delay may be allowed to occur in according sanction to the estimates, and especially to that of the last section. The present communication with Assam is acknowledged to be as bad as it can well be, and at the same time it is incapable of any practical improvement even by temporary expedients. The completion of the great scheme to which these papers refer will bring incalculable advantages to that province, especially in the promotion of its tea industry, and in the facilities to a free immigration from over-crowded districts for the clearance of its waste lands; and it is only by bridging the four intervening rivers, and thus enabling the metre-gauge engine to pass without interruption to Dhubri, that an effective and permanent solution of the difficulty can be arrived at.

Note by H. C. LEVINGE, Esq., *Chief Engineer, Bengal, Railway Branch, on the project for a line of railway from Sonepore, nearly opposite Patna, to Dhubri in Assam, dated 11th March 1883.*

It is desired that the line of railway from Sonepore, the terminus of the Bengal and North-Western Railway nearly opposite Patna, to Dhubri on the river Brahmaputra in Assam be considered as one project. This line, which passes through the Tirhoot and Northern Bengal Railway systems, and thus connects them, will be 410½ miles in length. Of this, some portions have been opened for traffic, and some are under construction, while for others estimates have been submitted, and for others again only surveys have been made, as follows :—

	Miles.	
I.—From Sonepore, the terminus of the Bengal and North-Western Railway, to Hajipore, including the bridge across the Gunduck	2·5	Estimate and plan submitted herewith.
II.—From Hajipore to Mozufferpore ...	34·0	Estimate sanctioned, and work in progress.
III.—From Mozufferpore to Jhinjharpore ...	79·5	Line open for traffic.
IV.—From Jhinjharpore to Gongareria ...	16·5	Estimates submitted for sanction with No. 1082R., dated 5th March 1883.
V.—From Gongareria to the Kosi ...	25·50	Line has been located; approximate estimate given; detailed estimates are under preparation.
VI.—Ferry across the Kosi	4·	
VII.—From the Kosi (left bank) to Purneah ...	55·0	Preliminary investigation made and approximate estimate prepared.
VIII.—From Purneah to Dinagepore ...	87·0	Estimate submitted for sanction with No. 1581R., dated 22nd March 1883.
IX.—From Dinagepore to Parbattipore on the Northern Bengal Railway ...	19·25	Works in progress.
X.—From Parbattipore to Kaunia on the Teesta	33·25	Line open for traffic.
XI.—From Kaunia to Dhubri ...	54·00	Estimates submitted herewith.
Total ...	410·5	

2. It thus appears that of the 410½ miles, 113¾ are open for traffic, and 58½ are under construction. For 103½ miles estimates have been submitted to the Government of India for sanction, and for the remaining 86 miles estimates, more or less in detail, are now submitted. In addition to the above, and in connection with item VIII, estimates for a branch line to Munihari, 13½ miles, and for a steam ferry across the Ganges to Sahebgunge, 5 miles, have been submitted.

3. It will be necessary, in the first place, in order to arrive at a clear understanding of the whole project, to consider each part separately.

4. *I.—Sonepore to Hajipore.*—The terminus of the Bengal and North-Western Railway has been located opposite the race course at Sonepore, somewhat over one mile from the bank of the Gunduck, across which it is considered necessary, for reasons given in the note by the Chief Engineer on the Hajipore-Mozufferpore Railway, to construct a bridge. He remarks: "If this is not done, three ferries—two across the Ganges and one across the Gunduck—will be permanently required, as well as a *dearah* line, estimated by the Manager of the Tirhoot State Railway at 10 miles in length, which would have to be removed annually at great expense; whereas after the construction of the bridge only one ferry will be necessary." The bridge, which has been designed by Mr. Wardon, will be a handsome structure, consisting of 8 spans of 250 feet each, with ample headway for boats, the girders resting on masonry piers, founded on brick cylinders sunk from 33 feet to 80 feet into the bed of the river, where a hard stratum of red clay exists. The banks are hard and quite permanent, so that no danger from their erosion need be apprehended.

5. The approach to the bridge from the west passes through the ground occupied by the great annual fair at Sonepore, and it has been found absolutely necessary to construct it on arches. The reasons for adopting this description of approach have been fully set forth in the letter from this office to the Government of India quoted in the margin, as follows:—

No. 2689R. of the 7th December 1882.

Para. 2. The delay in replying to your letter has been caused by the necessity of making full and careful enquiry regarding the alignment of the railway to the east of the station (Sonepore), and the position of the proposed bridge across the Gunduck. As laid out, the line will run at a high level through the whole length of the fair at which vast numbers of people annually assemble. This alignment was objected to by the owner of the land, who memorialized the Lieutenant-Governor urging alteration of the line, on the ground that the fair would otherwise be virtually destroyed. The Chief Engineer has, however, satisfied himself by personal inspection that it is not possible to alter the line so as to avoid the fair, and at the same time to secure a favorable crossing of the river. Along with the local civil officers and the owner of the land on which the fair is held, he went over the whole of the ground, and it has now been finally decided to adopt the present alignment, * * * and to construct an arched viaduct as the approach to the bridge. This will add to the cost of the line; but on no other condition is it possible to secure at once the advantages of a site for the station near Sonepore, and a good crossing of the river. The zemindar has promised, in the presence of the Magistrate and Collector of the district (Mr. Quinn), to make a free gift of the land required for the viaduct, if he is allowed the use of the arches, and this concession the Lieutenant-Governor considers should be granted.

6. The estimated cost of the bridge and approaches is as follows:—

	Rs.
Bridge as per detailed estimate	11,93,016
Viaduct of 140 arches ditto	1,11,367
Land	5,000
Earthwork	18,331
Ballast	8,400
Permanent-way, 2½ miles	40,000
Plant	40,000
Establishment as per detailed estimate	1,08,000
	14,24,114

In the Note by the Chief Engineer on the Hajipore-Mozufferpore Railway, dated 17th June 1882, it was stated that the cost of the bridge, including approaches, would probably not exceed 12 lakhs of rupees; but at that time it was not anticipated that an arched viaduct would be required on the western side. The viaduct as designed consists of 134 semi-circular brick arches of 15 feet span each and 6 of 5 feet.

7. The estimate now submitted make no provision for a ferry across the Ganges, or a branch line from the East Indian Railway at Bankipore to Deegah on the bank of that river, as it is understood that these works will be carried out by the Bengal and North-Western Railway Company, and that the ferry will be established and worked by that Company.

8. *II.—Hajipore to Mozufferpore.*—The estimates for this part of the line were sanctioned in letter from the Government of India No. 132R.C. of the 8th February last, and the works are in progress. The cost, including 12 miles of permanent-way for temporary lines on the *dearah*, is estimated at Rs. 21,35,464, exclusive of indirect charges.

9. *III.—Mozufferpore to Jhinjharpore.*—This portion of the line is open for public traffic, and may be divided into two portions—*1st*, Mozufferpore to Durbhunga, which has been open some years; and *2nd*, Durbhunga to Jhinjharpore, known as the Eastern Extension, which has only recently been opened. There is no possibility of arriving at the exact cost of the first portion, as the accounts have been kept for the whole line; but as the total cost of the Tirhoot Railway up to November last was Rs. 55,91,708, and the length open was 78 miles, the mileage cost was Rs. 71,688, which would give for the 55 miles from Mozufferpore to Durbhunga

the sum of Rs. 39,42,840. For the Eastern Extension, 24½ miles, to Jhinjharpore, the estimate is Rs. 15,80,353. The cost of the third section may therefore be taken as Rs. 55,23,193 for the length, 79·5 miles, or Rs. 69,476 per mile.

10. *IV.—Jhinjharpore to Gongareria.*—The estimates for this short length, 16½ miles, were submitted to the Government of India for sanction with this office letter No. 1082R. of the 5th March 1883. Exclusive of indirect charges, the estimate is Rs. 10,85,485, or Rs. 65,787 per mile.

11. *V.—Gongareria to the right bank of the Kosi near Bulloonah.*—This portion of the line, 25¼ miles in length, has been located during the present season, and the plans and estimates are under preparation. The estimated cost of the line has been approximately stated by the Manager of the Tirhoot State Railway at Rs. 21,37,000, exclusive of rolling stock, and allowing Rs. 5,000 per mile on that account, the cost will be Rs. 22,64,500, or Rs. 88,803 per mile. The mileage rate for this length is therefore higher than in any other part of the Tirhoot system; but this is accounted for by the larger amount of waterway required.

12. *VI.—Ferry across the river Kosi.*—The Manager, Northern Bengal Railway, in his report No. 127W. of the 8th February last, states that "the width of the river is about three miles, of which, on the 20th January, only ¼ mile was running water, the remainder being a sandy *chur*. Between Nawabgunge and the Kosi are two considerable channels, and two smaller ones, which would probably require 1,000 feet of bridging to enable trains to run throughout the year to the ferry. No better position can be obtained for a ferry within British territory, as the river widens very rapidly, and at Nathpore only about five miles south of Nawabgunge it is five miles in breadth. From enquiry made on the spot, there would appear to be sufficient water in the running channel of the Kosi for a steamer of two feet draught to ply throughout the year." The distance may be taken at four miles, and for the ferry itself three steamers of light draught and four flats should be provided; the cost of all this will amount to Rs. 4,09,000 *

		Rs.
* 4 miles permanent-way @	... 16,000 =	64,000
3 Steamers @ .	... 75,000 —	2,25,000
4 Flats @ ...	... 30,000 —	1,20,000
		409,000

13. *VII.—Left bank of the Kosi to Purneah.*—With the exception of the four miles of line between the bank of the river and Nawabgunge, and of about five miles of low ground between Kusbah and Purneah, "the line," says the Manager, "will run on a high ridge of country shown as nearly as possible on the map by yellow dots, which is free from floods; no rivers are crossed, and only local drainage will have to be dealt with. The country traversed is highly cultivated, and a very heavy traffic leads to Kusbah." The estimated cost Rs. 30,24,975, or Rs. 55,000 per mile, which, judging from the very easy character of the country to be traversed, should be sufficient.

14. *VIII.—Purneah and Dinagepore.*—This protion of the railway has been fully described in the Chief Engineer's note of the 23rd February last, and in the report of the Manager of the Northern Bengal Railway. The distance *viâ* Saifgunge is 87 miles, and the estimated cost Rs. 66,11,055, or Rs. 75,987 per mile, exclusive of indirect charges. To this must, however, be added the sum of Rs. 9,04,635 for the branch to Munihari, 13½ miles, and Rs. 3,50,000 for the Sahebgunge ferry flotilla, making the total Rs. 78,65,690. Between Purneah and Dinagepore there are several large rivers and some heavily flooded country to be encountered, which raise the cost of construction; but the traffic receipts calculated in two different ways quite independently of each other show that a net profit of nearly 5½ per cent. on the capital may be expected soon after the opening of the line.

15. *IX.—Dinagepore to Parbattipore on the Northern Bengal Railway.*—Length 19¼ miles. This line is under construction and in an advanced state. The works are being carried out with *Provincial* funds at an estimated cost of Rs. 11,49,334.

16. *X.—Parbattipore to Kaunia.*—This length, 33¼ miles, which is open for traffic, forming part of the Northern Bengal Railway, brings the line up to the right bank of the Teesta. As in the case of item No. 3, there are no means of arriving at the actual cost of this portion of the Northern Bengal Railway, the average mileage cost of the whole line must be ascertained and applied to the length under notice. The total cost of the 230 miles of the Northern Bengal Railway has been Rs. 1,95,00,000, which gives an average of Rs. 84,783 per mile. The cost of the 33¼ miles from Parbattipore to Kaunia may, therefore, be taken as Rs. 28,19,033.

17. *XI.—Kaunia to Dhubri*—For the whole distance, 54 miles, the embankment has been thrown up, and the earthwork completed in a most satisfactory manner; it is, in fact, throughout the whole length ready to receive the rails; but the rivers and streams have not been bridged. On so much of the road as lies in the province of Assam, and in places in Bengal also, substantial wooden bridges have been constructed at the larger flood openings and brick culverts for the minor drainages; the latter in Assam only. It will be necessary, however, to substitute permanent bridges for the wooden structures now existing, and to bridge the main rivers and streams. For all this, the estimates, now submitted, provide. Between the rivers Teesta and Dhurla opposite Mogulhat a railway of 2' 6" gauge has been laid down, and is being worked with fair success. It is proposed, as soon as the bridge across the Teesta has been constructed, to take up the rails and utilise them elsewhere.

18. The estimates of the cost of the whole 54 miles, which were originally prepared by Mr. White, amounted to Rs. 1,22,26,473. Since then most of the land has been acquired. The earthwork, except inclined approaches to bridges, has been completed, and several minor bridges have been constructed. The estimates now submitted provide for the works required to complete and equip the line. Opportunity has been taken to ascertain carefully the waterway required at the larger bridges, for which allowance on far too liberal a scale had been made in the first estimates. The designs for the bridges have also been changed. Mr. White proposed brick piers on wells sunk 80 feet in the sand, with spans of 250 feet. In the altered design the spans have been reduced to 100 feet, and cast-iron screw piles substituted for the piers. It is proposed to sink these piles 50 feet, and to protect them with rubble stone brought from Dhubri. Examination of Mr. White's drawings shows that he had allowed in most cases a number of land spans; but as the embankments have for several years been in existence for the full height, far above flood level, and quite up to the margins of the rivers on each side, it is evident that no additional waterway, beyond that included between the banks of the rivers, is required, and all that has been allowed in the designs now prepared is one hundred feet on either side on which to come and go in case of erosion of the bank, and possibly it may be deemed advisable, in actual construction, not to allow even this. The comparison in the case of the four larger rivers is as follows:—

Name of river.	Actual widths between banks.	Waterway allowed by Mr. White.	Waterway now allowed.	Difference saved.
Teesta	3,500	4,194	3,733	461
Dhurla	2,920	4,194	3,200	994
Sunkosh	1,640	2,884	1,813	1,071
Gungadhur	1,900	2,360	2,135	225
Total ...	9,960	13,632	10,881	2,751

19. The whole of the estimates have been most carefully revised by Mr. Warden, with the result that the amount required to complete the railway on the metre gauge from Kaunia to Dhubri is Rs. 55,83,118 only. Even allowing for works already done, the saving on the original estimates is so great that it may be as well to run through the several items and note the principal points of difference:—

Preliminary.—Rs. 14,175 provided in the original estimates not now required, as all preliminary investigation has been done.

Land.—Rs. 1,10,544. Most of the land having been acquired, Rs. 10,000 only have been retained for station sites, &c.

Earthwork.—Most of the earthwork having been done, Rs. 80,000 out of an estimate of Rs. 5,87,190 have been retained.

Bridges.—Culverts already constructed in the province of Assam reduce the estimate of minor bridges from Rs. 1,66,681 to Rs. 1,04,208. The alteration of design and the reduction in water way of major bridges from 17,055 feet to 14,304 feet effect a saving of no less than Rs. 48,13,541. The whole of these reductions in the major bridging are in the four bridges over the Teesta, Dhurla, Sonkosh, and Gungadhur. Each pier has been calculated to, bear, with safety, 190 tons and a wind pressure of 50lbs. per square foot.

Fencing—Has been increased from Rs. 1,35,713 to Rs. 1,72,800, as Mr. White's rates were too low.

Ballast and Permanent-way.—The rates in the original estimates under this head were also too low. The estimates now stand at Rs. 11,17,622 instead of Rs. 10,80,362.

Stations and Offices.—The original estimate of Rs. 3,78,845 has been reduced to Rs. 3,38,200, the provision made for temporary buildings in the original estimate having been considered very unnecessarily large.

Station Machinery.—This item, on the other hand, was under-estimated, only Rs. 30,639 having been provided, whereas not less than Rs. 1,08,000 will be required.

Plant.—For this Rs. 1,62,000 has been allowed in the new estimate, instead of Rs. 3,02,883 as there is a large quantity of plant on the Northern Bengal Railway available for the work which can be transferred at a low rate.

Rolling Stock.—For first equipment of the line Rs. 5,000 per mile should be sufficient Rs. 2,70,000 has, therefore, been provided, instead of Rs. 4,86,000 in the original estimate.

Electric Telegraph.—For this Rs. 67,935 was included in the first estimate. The whole amount has now been struck out as not being required under the rules in force.

Establishment.—Ten per cent. has been taken as usual on all items except rolling stock and plant. This amounts to Rs. 4,68,286 as against Rs. 11,94,033 in the original estimate.

20. The actual expenditure already incurred on works which will be permanently useful for the metre-gauge railway is shown in the accompanying statement. Including the usual allowance for establishments and tools and plant, it may be taken at Rs. 6,42,926, of which Rs. 3,92,859 were expended in Bengal and Rs. 2,50,067 in Assam. This sum added to the estimate now submitted for the completion of the line, Rs. 55,83,148, brings up the total cost of this section to Rs. 62,26,074, and the mileage rate to Rs. 1,15,297.

21. We can now, from the figures above given for each section, summarize the total cost of the 410½ miles from Sonepore to Dhubri:—

	Miles.	Estimate or cost. Rs.
I.—From Sonepore to Hajipore	2·5	14,24,114
II.—From Hajipore to Muzufferpore	34·0	21,35,464
III.—From Mozufferpore to Jhinjharpore	79·5	55,23,193
IV.—From Jhinjharpore to Gongareria	16·5	10,85,485
V.—From Gongareria to the Kosi	25·5	22,64,500
VI.—Ferry across the Kosi	4·0	4,09,000
VII.—From the Kosi to Purneah	55·0	30,24,975
VIII.—From Purneah to Dinagepore	87·0	66,11,055
IX.—From Dinagepore to Parbattipore	19·25	11,49,324
X.—From Parbattipore to Kaunia	33·25	28,19,033
XI.—From Kaunia to Dhubri	54·0	62,26,074
Total ...	410 5	3,26,72,217

The mileage cost of the main line, including the Gunduck bridge and viaduct and the heavy bridging in the XIth section, is only Rs. 79,591, which, it will be observed, is considerably under the actual cost of the Northern Bengal Railway. To this estimate should also be added that of the branch to Munihari, 13½ miles, and that of the steam flotilla for the Sahebgunge ferry, amounting to Rs. 12,54,635. The total estimated cost will therefore be Rs. 3,39,26,852, exclusive of indirect charges.

22. The amount for which sanction is required is, however, Rs. 2,16,47,937 as follows:—

	Miles.	Rs.
I.—Sonepore to Hajipore	2·5	14,24,114
IV.—Jhinjharpore to Gongareria	16·5	10,85,485*
V.—Gongareria to the Kosi	25·5	22,64,500
VI.—Ferry across the Kosi	4·0	4,09,000
VII.—Kosi to Purneah	55·0	30,24,975
VIII.—Purneah to Dinagepore	87·0	66,11,055*
XI.—Kaunia to Dhubri	54	55,83,148
	244·5	2,04,02,277
Munihari branch	13·5	9,04,635*
Sahebgunge ferry	5 0	3,50,000*
Total ...	263·0	2,16,56,912

23. No statistics are available from which to compute the probable receipts on the whole line. There is, however, no reason to believe that they will fall short, proportionally, of those on the Northern Bengal Railway. It is confidently expected that that line will, in the current official year, give a net profit of nearly 6 per cent. on its capital. Now, as the capital cost of this project will be less than that of the Northern Bengal Railway mile for mile, and as the working expenses are invariably less in proportion as the line is longer, it follows that the net profits, if the mileage receipts are equal, will be more than on the Northern Bengal Railway. It must not be forgotten also that on the completion of the line to Dhubri, Assam coal can be introduced for use on this Railway and the Northern Bengal Railway main line, by

* Estimates already submitted for sanction.

which the working expenses will be still further reduced. On this subject further information will be given when particulars have been obtained. If this view of the prospects of the line be accepted, there can be no doubt the work should be pushed on as fast as possible.

Telegram, dated 17th October 1883.

ORDNANCE DEPARTMENT.

NOTICE.

Calcutta, the 14th November 1883.

It is notified that the Government of India, with the object of giving European and Eurasian lads the opportunity of qualifying as mechanics and tradesmen, has decided, as a tentative measure, to entertain 12 apprentices to be trained, 8 as Carpenters, Fitters, Smiths, Turners and Moulders in the Foundry and Shell Factory at Cossipore, near Calcutta, and 4 as Tanners, Curriers, Saddlers and Smiths in the Harness and Saddlery Factory at Cawnpore. Applicants desirous to avail themselves of the opening are invited to send in their names to the Inspector General of Ordnance, Bengal, at Nos. 3 and 4, Garstin's Buildings, Calcutta.

2. Applicants not to be less than 14 or above 16 years of age, and to be able to read and write. They will be required to serve as apprentices for a period of 5 years.

3. The terms under which the apprentices are to be employed can be ascertained by application, either personally or in writing, to the Inspector-General of Ordnance.

NAPIER CAMPBELL, *Lieut.-Genl.,*
Inspector-General of Ordnance.

HENRY F. BLANFORD,

Meteorological Reporter to the Government of India.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The "Indian Law Reports," published under the authority of the Governor General in Council, will appear in monthly parts, published as soon as possible after the first of each month at Calcutta, Madras, Bombay, and Allahabad, and will comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court will be reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court will be reported in the Calcutta Series. The Parts of each Series can be had separately, or all four Parts can be had stitched into one wrapper at the option of subscribers and purchasers. It will be observed from the following statement of the terms of subscription and sale, that a considerable reduction is allowed to persons taking the complete set:

Terms of subscription, payable annually in advance.

	Without Postage	With Postage
For the CALCUTTA SERIES .	R35	R37-8
" MADRAS SERIES .	" 8	" 9
" BOMBAY SERIES .	" 8	" 9
" ALLAHABAD SERIES .	" 8	" 9
Complete set . . .	" 45	" 47-8

The price of each Part purchased separately will vary according to the amount of matter it contains, and will be printed on the wrapper. It will, however, never be below the following:—

	R	
For a Part of the CALCUTTA SERIES .	R3	8
" " MADRAS SERIES .	" 1	0
" " BOMBAY SERIES .	" 1	0
" " ALLAHABAD SERIES	" 1	0
Complete set	" 4	0

Persons desiring to subscribe for or purchase the Reports, should apply to—

MESSRS. THACKER, SPINK AND CO., CALCUTTA;
MESSRS. THACKER AND CO., BOMBAY;
MESSRS. HIGGINBOTHAM AND CO., MADRAS;
THE GOVERNMENT CENTRAL BOOK DEPOT, BOMBAY;
THE GOVERNMENT BOOK DEPOT, ALLAHABAD.

Orders and Subscriptions for 1875 should be at once remitted.

THE BENGAL LAW REPORTS.

A few sets of the Bengal Law Reports (Volumes 1 to 15) are available at Messrs. Thacker, Spink & Co., Calcutta, at R375 a set.

For sale in Rajputana to Officers stationed there.

SUPPLEMENT TO

The Gazette of India.

No 47.} CALCUTTA, SATURDAY, NOVEMBER 24, 1883.

OFFICIAL PAPERS.

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known.

Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of six Rupees per annum if delivered in Calcutta, or nine Rupees if sent by Post.

No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

RAILWAY TRAFFIC.

RETURNS OF ACCIDENTS ON INDIAN RAILWAYS FOR THE SECOND QUARTER OF 1883.

No. 1244R. T., dated Simla, the 7th November 1883.

RESOLUTION—By the Government of India, Public Works Department.

Read again—

Public Works Department Resolution No. 1040R.T., dated 19th October 1882.

Public Works Department Resolution No. 933R.T., dated 27th August 1883.

Read also—

Returns of accidents to trains, &c., on the open lines of railway in India for the quarter ending 30th June 1883.

OBSERVATIONS.—As compared with the corresponding quarter of the previous year, with an increase of 398 miles, or 4 per cent. in the open mileage, and of 1,987,479 miles, or 19·84 per cent. in the train mileage, the number of accidents to trains, rolling stock, permanent way, &c., shows an increase of 21, or 1·94 per cent. only. The numbers chiefly vary on the following railways :—

	Increase.	Decrease.
South Indian	30	...
Great Indian Peninsula	...	24
Sind, Punjab and Delhi	30	...
Oudh and Rohilkhand	24	...
Punjab Northern	26	...
Indus Valley and Kandahar	22	...
Rajputana-Malwa	...	18
Wardha Coal	...	35
Tirhoot	...	17
Rangoon and Irrawaddy Valley	10	...

2. On the South Indian Railway the increase principally took place under "trains running over cattle" and "fire in trains," the number of

accidents under the former being 74 against 52, and under the latter 9 against 2.

3. Of the decrease of 24 accidents on the Great Indian Peninsula Railway, 14 were under "goods trains, or parts of goods trains, engines, &c., leaving the rails," and 9 under "slips in cuttings or embankments."

4. On the Sind, Punjab and Delhi Railway the number of cases of "failure of machinery, &c., of engines" increased from 3 to 17, and that of "failure of couplings" from 1 to 15.

5. The increase on the Oudh and Rohilkhand Railway chiefly occurred under "cattle accidents," the number being 43 against 22.

6. On the Punjab Northern State Railway the increase was due to the number of cases of "fire in trains" having been 32 against 5 in the corresponding quarter of 1882.

7. On the Indus Valley and Kandahar State Railway the increase was the largest under "bursting of boilers or tubes, &c., of engines" and "miscellaneous accidents." The number of accidents under each of these two heads was larger by 11. Under "trains running over cattle" there was a decrease of 10 accidents.

8. On the Rajputana-Malwa Railway, while the number of catte accidents decreased from 76 to 66 and that of miscellaneous accidents from 37 to 3, there were increases under other heads, the total showing a decrease of 18 accidents.

9. Of the decrease of 35 accidents on the Wardha Coal Railway 14 were under "failure of tyres" and 15 under "fire in trains." The number of accidents under the former was *nil* against 14, and under the latter 8 against 23.

10. The decrease on the Tirhoot Railway was almost wholly due to there being not a single case of "failure of machinery, &c., of engines" during the quarter under review, while in the corresponding previous period there were 16 accidents of this description.

11. On the Rangoon and Irrawaddy Valley State Railway there was no noticeable increase under any particular head.

12. The casualties resulting from accidents to trains, &c., were, among passengers, 19 injured against 1 killed and 9 injured, and among servants 12 injured against 13 killed and 16 injured. The increase in the number of casualties to passengers appears to be due to six passengers having received slight bruises by a collision which took place on the Madras Railway, on the 31st May 1883, between a mail and a goods train, due to the pointsman turning the former on to the main line instead of on to the platform siding; and five passengers having been slightly injured by a collision on the Calcutta and South-Eastern Railway between two passenger trains, caused by the carelessness of the pointsman in allowing both the trains into the same siding.

13. As regards the decrease in the casualties to servants, it is observed that in the corresponding quarter of 1882 four men were killed on the Great Indian Peninsula Railway by a collision between a goods train and a pump truck, and 1 killed and 5 injured on the Madras Railway by a wagon getting away while being shunted, and colliding with an Inspector's trolly.

14. The following table exhibits the number of accidents under the different classes, and the number of persons killed and injured thereby :—

Description of Accidents.	Number of Accidents.	Number of Passengers and Others.		Number of Servants.		Total.	
		Killed.	Injured.	Killed.	Injured.	Killed.	Injured.
Collisions between passenger trains, or parts of passenger trains	2	. .	5	. .	. .	. .	5
Collisions between passenger trains and goods or mineral trains, engines, and vehicles standing foul of the line	20	. .	10	. .	. .	. .	10

Broken rails	10	. .	. .	. .	. .	. .	. .
The flooding of portions of permanent way	9	. .	. .	. .	. .	. .	. .
Slips in cuttings or embankments	12	. .	. .	. .	. .	. .	. .
Fire in trains	158	. .	. .	. .	. .	. .	. .
Fire at stations, or involving injury to bridges or viaducts	21	. .	. .	. .	. .	. .	. .
Other accidents	92	1	4	. .	4	1	8
Total	1,104	3	19	. .	12	3	31

15. The number of derailments of goods trains or parts of goods trains, engines, &c., decreased from 109 to 75, or by 34, of which 6 are due to the East Indian Railway, and 14 to the Great Indian Peninsula Railway.

16. While the number of cattle accidents increased by 10 on the East Indian Railway, 9 on the Madras, 22 on the South Indian, and 21 on the Oudh and Rohilkhand Railway, the number on the Indus Valley and Kandahar and the Rajputana-Malwa Railways decreased by 10 on each line.

17. The number of cases of "bursting of boilers or tubes, &c., of engines" rose from 16 to 34, of which 10 were on the Sind, Punjab and Delhi Railway, 18 on the Indus Valley and Kandahar, and 5 on the Rajputana-Malwa. The number of cases of "failure of machinery, springs, &c., of engines" were also large on these lines, being 17, 22, and 15 respectively out of a total of 74. It is noteworthy that there was no accident of this kind on the Tirhoot State Railway, although 16 such cases occurred on that line during the corresponding period of the previous year.

18. Out of a total of 44 cases of failure of couplings, 15 were on the Sind, Punjab and Delhi Railway, and 11 on the Rajputana-Malwa.

19. On the Muttra-Hathras Railway the number of cases of broken rails shows a large decrease, being only 2 against 14.

20. Fire broke out in trains in 158 instances, of which 57 or 36 per cent. were on the Great Indian Peninsula Railway, 32 or 20 per cent. on the Punjab Northern, and 30 or 19 per cent. on the Indus Valley and Kandahar Railway.

21. The casualties to passengers from causes other than accidents to trains, &c., were —

———	Killed.	Injured.
From falling between carriages and platforms	. .	2
Falling on to the platform, ballast, &c., when getting into or out of trains	2	3
Whilst crossing the line at stations	1	. .
Falling out of carriages during the travelling of trains	7	31
Other accidents	. .	3
TOTAL	10	39

22. And the accidents to servants in the employ of railways, or of contractors, whilst performing duties connected directly with the transit of passengers and goods, from causes other than accidents to trains, &c., were—

———	Killed.	Injured.
During shunting operations	6	15
Falling off engines, vans, wagons, &c.	4	16
Coming in contact with overbridges, &c., during the travelling of trains	. .	3
Coming in contact, while shunting with vehicles, &c., standing in adjoining lines	1	. .
Getting on or off trains, engines, &c.	1	13
Whilst loading, unloading, or sheeting	. .	14
Whilst breaking, spragging, or chocking wheels	. .	1
Whilst working at cranes or capstans	1	. .
Whilst working on the permanent way or in sidings	1	. .
Whilst walking along the line on the way home or to work	1	. .
Whilst walking, crossing, or standing on the line	12	12
Whilst passing between vehicles	2	. .
Whilst attending to the machinery of engines, cleaning them, &c.	. .	2
Whilst attending to gates at level crossings	1	2
Falling or being caught between vehicles and platforms	1	1
Falling off ladders, scaffolds, platforms, &c.	. .	1
By falling of lamps, wagon-doors, timber, weights, &c.	. .	2
Whilst coupling or uncoupling wagons	. .	9
Miscellaneous	3	25
TOTAL	34	116

23. Of other persons killed and injured by running trains, &c., 1 was killed and 1 injured whilst passing over the line at level-crossings; 31 were killed and 3 injured whilst trespassing on the line; 7 are supposed to have committed suicide; and 6 were killed and 2 injured from miscellaneous causes.

24. The following table shows the total number of persons killed and injured from causes connected with the working of trains as compared with the corresponding quarter of 1882 :—

———	2ND QUARTER, 1882.		2ND QUARTER, 1883.	
	Killed.	Injured.	Killed.	Injured.
PASSENGERS.				
From causes beyond their own control	. .	10	. .	22
From misconduct or want of caution	5	26	10	36

	2nd Quarter, 1882.		2nd Quarter, 1883.	
	Killed.	Injured.	Killed.	Injured.
Servants.				
From causes beyond their own control	16	33	2	28
From misconduct or want of caution	26	91	32	100
Others.				
Whilst passing at level crossings	7	1	1	1
Trespassers, including suicides	26	8	38	3
Other persons	3	1	6	2
Total	83	170	89	192

25. In addition to the above, 17 persons are reported to have been killed and 73 injured in yards, workshops, &c., and 72 passengers to have met death in carriages and at stations from causes unconnected with the working of trains.

Resolution.—The attention of the officers concerned should be invited to the increase in the number of cases of failure of "machinery, springs, &c., of engines" and of couplings on the Sind, Punjab and Delhi Railway, and cases of "fire in trains" on the Punjab Northern State Railway.

Order.—Ordered, that this Resolution, together with the abstract returns compiled by the Government of India, be communicated to the Governments, Administrations, and Officers noted in the margin for information.

The Governments of Madras, Bombay, Bengal, the North-Western Provinces and Oudh, and the Punjab.
The Chief Commissioners, Central Provinces, Assam, and British Burma.
The Residents, Hyderabad and Mysore.
The Agents to the Governor General for Rajputana, Central India, and Beluchistan.
The Director General of Railways.
The Consulting Engineers to the Government of India for Guaranteed Railways.

Ordered also, that copies be forwarded to the Secretary of State for the information of Her Majesty's Government.

Ordered further, that this Resolution, with the abstract returns, be published in the Supplement to the *Gazette of India*.

G. F. L. MARSHALL, *Major, R.E.*,
Under-Secretary.

TABLE No. 1.

GENERAL TOTAL.

NUMBER of PERSONS reported during the Second Quarter of 1883 as KILLED or INJURED on the several RAILWAYS open for Traffic in INDIA, distinguishing between PASSENGERS, RAILWAY SERVANTS, and OTHER PERSONS; and distinguishing also, in the case of the two former Classes, between ACCIDENTS happening from Causes beyond their own Control and ACCIDENTS happening otherwise.

Mean mileage open.	RAILWAYS.		Passengers.						Railway Servants or Servants of Contractors.						Other Persons.								Total all Classes.

SIMLA,
The 19th November 1883.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

MEMORANDUM ON THE WEATHER EXPERIENCE IN INDIA DURING THE SIX MONTHS, MAY TO OCTOBER 1883.

No. 111 Met.

Extract from the Proceedings of the Government of India, in the Revenue and Agricultural Department,—dated Calcutta, the 23rd November 1883.

METEOROLOGY.

RESOLUTION.

Read the following—

Memorandum on the Weather experience in India during the six months, May to October 1883.

The weather of May, in Northern India, was far from uniform. During the first two-thirds of the month in North-Western and Central India, the temperature was excessive and the atmosphere very dry; while in Bengal and Assam the weather was cool and wet. In the latter Province, the rainfall was very heavy (27 inches having fallen in ten days at Silchar), causing the river Barák to rise 41½ feet above its zero level. After the 21st, however, these conditions were reversed. Showery weather set in over the Punjab and North-Western and Central Provinces, and the temperature fell to about 20° below the average; while in Assam and Bengal, the weather cleared and became warm and dry. In the Peninsula and Burma, there was but little worthy of note.

The monsoon rains were ushered in in Bengal and Orissa by a small cyclonic storm, which was apparently formed over the head of the Bay on the 13th June, reached the land on the 14th, and travelling to the north-west, occasioned heavy rain as far as Behar, beyond which Province the rains did not extend until quite the close of the month. The heaviest fall attributable to this depression was 12½ inches at Mozufferpore. On the Bombay side, the earlier portion of the month was characterized either by strong winds from a non-monsoon direction, or by light variable breezes; but, on the 24th, the regular monsoon current set in, and from that time onward blew steadily. About the 26th of the month a second cyclone of the weaker or monsoon type was formed over the Bay of Bengal. Thence it passed to Cuttack on the 30th, reached Seoni on July 1st, Indore on the 2nd, and lay between Rajkot and Karachi on the 3rd of that month. It thus passed on a due westerly course right across the Peninsula. The rain accompanying this cyclone was very heavy, and the resulting floods of the Taptee and in Gujarat were very destructive, interrupting railway communication and submerging much of the city of Surat.

As the general result, the monsoon rains were late in setting in on the Bombay side and throughout Western and North-Western India, and in the Peninsula the rainfall of the month was deficient; only in Bengal was it up to or above the average amount. These latter peculiarities were more or less characteristic of a large part of the season.

The disappearance of the cyclonic storm noticed above was followed by two or three days of fine weather and high barometric pressure. Rain then recommenced, and in Southern India, Bengal and the Eastern Peninsula, continued more or less steadily till the close of July. But in the Punjab, Rajputana and a large part of the North West and Central Provinces, the rain ceased about the 19th, and a drought set in, which lasted without intermission till nearly or quite the end of August.

August was a month of deficient rainfall in all parts of India, except the Provinces of Madras, Berar and Assam. The drought increased in extent and intensity during the earlier part of the month, the air became dry, the temperature high, and, on some days during the height of the drought, no rain fell over the whole of that part of the country lying to the northward of Belgaum and to the westward of Benares. On the 19th, however, when the prospects of the season were becoming critical, the weather changed, the air became damper, rain fell in the Central Provinces, and extending slowly to the North-West, reached the extreme north of the Punjab by the end of the month.

This changed weather lasted in North-Western India till about the middle of September, when the sky cleared, and the fine bright weather characteristic of the close of the rainy season set in. But, in the meantime, the amount of rainfall over the Punjab, Rajputana and Central Provinces was so heavy as considerably to exceed the normal total of the month. In other parts of India, rain continued to fall more or less steadily till near the close of September, and on the whole, the meteorological conditions of the month were of about the usual character. The rains apparently ceased in—

The Punjab, on the 10th.
Rajputana, on the 14th.
The North-Western Provinces, on the 18th.
Central Provinces, on the 25th.

With the cessation of the rains, the usual rise of temperature occurred in these Provinces.

In October, the fine dry weather which had already become established in North-Western India, extended further to south and east, and the autumnal rains of the transitional period set in on the Coromandel Coast. In each case, the change occurred rather earlier than usual. Over

Bengal and Assam, in the first ten days of the month, the rainfall was very light as compared with the normal average. There were sharp showers on the 12th, 13th and 14th, and with these showers the rains ceased, apparently for the season, so that the total at the end of the month was very small. The deficiency was greatest in Orissa and Lower Bengal, where it amounted to over 9 inches, while at Darjeeling it was 6 and at Burdwan 4 inches. The Madras reports shew that north winds were felt on the Ganjam Coast on October 9th, whence they gradually extended towards Madras. The sky during this time became much more cloudy all over the Presidency, and from the 12th, heavy rain fell almost daily until the 18th, the wind on many occasions blowing from a south-east rather than from a north-east direction. After that date, until the 27th, the weather was much more settled. But quite at the close of the month conditions again changed; a small barometric depression was formed in the south-west of the Bay, and proceding slowly northward, occasioned a good deal of rain all along the Coromandel and Ganjam Coasts. On the Bombay side, generally, fine weather, chequered by occasional showers, prevailed till the 18th, when a small disturbance was formed over the Presidency, accompanied with very unsettled weather and heavy rain. This lasted for three days, when the depression broke up, the sky cleared, and the wind changed. From the 22nd to the end of the month the weather was fine.

Summing up the rainfall of the whole season from June 1st to October 31st, it appears that five-eighths of the stations enumerated in the daily reports had less than the average amount and three-eighths more than the average. Akyab shows the greatest deficiency, *viz.*, 38 inches, and Akola the greatest excess, *viz.*, 41½ inches. And taking the mean of the stations as classified under their respective Provinces, there has been a mean deficiency in—

The Punjab of	3·4 inches.	Central India of	8·8 inches.
The North-Western Provinces	12·0 „	Rajputana	6·8 „
Assam	7·1 „	Sind, Gujrat, &c.	2·7 „
Bengal	3·7 „	Burma of	14·2 „

and a mean excess in—

The Central Provinces, of	2·8 inches.	Madras, Mysore and Coorg	1·1 inches.
Berar	33·8 „	Ceylon	12·0 „
Bombay	7·4 „		

W. L. DALLAS,
Asst. Metl. Reporter to the Govt. of India.

ADDITIONAL NOTE.

In a note appended to the last semi-annual weather report, after adverting to the unusually heavy winter and spring snowfall on the North-West Himalaya, to which the latest addition was made on the 28th and 29th May, it was stated—"If the mountains of Lahoul, Spiti and other more distant ranges have shared this fall, if it is as extensive as it is apparently heavy on the visible ranges, and if the views which the experience of recent years seems to justify, *viz.*, that an unusual extent and thickness of snow on the Himalaya is productive of dry north-west and west winds in North-Western India are valid, we must be prepared for a long spell of dry weather and a retarded rainfall in the Upper Provinces. The present season will serve as a test of the validity of the above view."

The result has been stated in the foregoing memorandum. It was not exactly in accordance with the terms of the above forecast, inasmuch as the setting in of the rains in the Upper Provinces took place only a few days later than on the average, and rather more than a fortnight of rainy weather preceded the period of drought which had been foreseen, and which set in on the 19th July. But there were indications that throughout this rainy interval the influence of the snowfall was operative. On the North-West Himalaya the rain of the first half of July was accompanied with frequent thunder-storms and hail-storms (always a sign of an unsteady monsoon), and in clear intervals the upper clouds could be seen drifting steadily from the north-west, proving the existence at no great height of the dry current which, about the 19th, descended and replaced the monsoon, prevailing over the whole of North-Western India and Rajputana, and influencing the winds even down to the Deccan on the south and to Behar on the east.

Notwithstanding then, that, as subsequent information showed, the heavy snowfall of the winter did not extend to Lahoul, Spiti, the Pangi Valley and Ladak, but was restricted to the outer snowy range, even this sufficed to cause a prolonged drought, and I am decidedly of opinion that the experience of the present season has given strong confirmation of the validity of the view on which the forecast was based.

H. F. BLANFORD,
Meteorological Reporter to the Govt. of India.

ORDER.—Ordered that the papers be printed in the Supplement to the *Gazette of India.*

(True Extract.)
E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASONS AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 13th NOVEMBER 1883.

GENERAL REMARKS.—Rain continues in Madras and the southern districts of Bombay, and general prospects are good in both Presidencies, though some damage has been done by unusually heavy rain in parts of the former. Scarcity of water is still felt in Sind. In Hyderabad, Central India, and Rajputana the *rabi* crops are generally in good condition and promise well. Recent rain in Burma has improved the condition of rice on high lands and later transplanting and clear weather is now needed. In Assam and Bengal there has been no rain, and serious injury has been done to the rice crop in the western and southern districts of Bengal, the crop on high lands having been mostly destroyed.

Prospects continue excellent in the Central Provinces. In the North-Western Provinces and Oudh slight showers have fallen in a few districts; the *rabi* crops are fair but require rain.

The *kharif* harvest is now approaching completion in most provinces; *rabi* sowings continue, but are backward in Bengal owing to absence of rain.

Prices are rising in Bengal and Burma and are generally steady elsewhere.

The public health is good, but cholera still lingers in some districts in Southern India.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects
Madras—(Nov. 14th)		
Bellary	·14 (average of 4 stations).	Standing crops generally good; harvest *cholum*, *cumbu*, yield below average; gingelly, *ragi*, *karra*, about average; 14 deaths from cholera.
Kurnool	1·22 (average of 6 stations).	Harvest *cholum*, *sajja*, *karra*, indigo, yield below average.
Ganjam	·71 (average of 6 stations).	Standing crops generally good; fever and small-pox slight in one taluk.
Kistna	·9 (average of 11 stations).	Standing crops good; those submerged recovering; harvest black paddy, *cholum*, *karra*, yield below average; small-pox, fever and cattle-disease in parts.
Chingleput (Madras)	3·4 (average of 11 stations).	Standing crops injured by excess of rain in parts, elsewhere in good condition; harvest *kar*, paddy, &c., yield half; 12 deaths from cholera; small-pox slight in 3 talukas.
Coimbatore	2·79 (average of 16 stations).	Standing crops damaged by excessive rain in parts, elsewhere in good condition; harvest paddy, *cholum*, *ragi*, *cumbu*, yield about average; 83 deaths from cholera; fever, small-pox, and cattle-disease slight.
Tanjore	3·33 (average of 14 stations).	Standing crops generally good; harvest paddy, *cholum*, *ragi*, *cumbu*, yield about average; 14 deaths from cholera.
Madura	2·74 (average of 8 stations).	Standing crops fair; harvest dry crops, yield average; cholera in parts.
Malabar	3·4 (average of 14 stations).	Second crop cultivation progressing; small-pox and fever slight.
Travancore	·668	Sowing over; fever in parts. *General Remarks.*—General prospects good.
Bombay—(Nov. 14th)		
Kurrachee	*Nil*	River at Kotri on 11th 6 ft. 2 inches against 6 ft. 9 inches on same date last year; fever generally prevalent; cattle-disease in 2 talukas; some loss of cows in Mirpur Batoro; harvesting in progress; small pox prevalent in 3 villages in district; 9 fresh cases, 6 deaths; wheat, red rice and *bajri* in Kurrachee 24, 28, and 36; in Kotri 32 and 32; in Sakro 16, 26 and 44, and in Mirpur Batoro 22, 30 and 36 lbs. per rupee respectively.
Hyderabad	. . .	Cold has set in fairly; small-pox in 5, fever in 9 and cattle-disease in 5 talukas; wheat 26, *bajri* 38, *jowari* 42, red rice 26, and white rice 22 lbs. per rupee.
Ahmedabad	. . .	*Kharif* harvest progressing; *rabi* sowing commenced; standing crops healthy; fever in some talukas; *bajri* 28¾ and wheat 25½ lbs. per rupee
Baroda	. . .	Slight cholera in Navsari, Mahuwa and Sangad mahals; fast disappearing from Attansamba; harvesting of *kharif* and sowing of *rabi* in progress; *bajri* 31 and rice 24 lbs. per rupee.
Surat	. . .	Sowing of *rabi* crops continues; fever generally prevailing in district; cholera in Surat; 6 cases, 5 deaths; in Jalalpur 40 cases, 14 deaths, and in Bulsar 9 cases, 2 deaths; few locusts remain to be destroyed; *jowari* 38 and *nagli* 43 lbs. per rupee.
Nasik	*Nil*	*Kharif* reaping and *rabi* sowing vigorously continued; locusts diminishing; full grown locusts have appeared from other parts; public health good; fever in Chandor Taluka; *bajri* 33, wheat 28½ and rice 22½ lbs. per rupee.
Colaba (Bombay)	*Nil*	Abnormal temperature 1° warm to 3° cool; vapour in air excessive on 7th and 13th; abnormal wind southerly from 9th to 11th.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*contd.*		
Poona	. . . . .	Weather clear; *rabi* sowing progressing; prices—*bajri* 44 and *jowari* 52 lbs. per rupee; in Poona *bajri* 34 and *jowari* 43 lbs
Ahmednagar	·12 in Parner	*Bajri* reaping and *rabi* sowing in progress; cholera in Karjat, 7 attacks, 2 deaths; locusts in Shrigonda; cattle-disease in Newasa; *bajri* maximum 57 lbs. per rupee in Shrigonda; minimum 39 lbs. in Nagar; *jowari* maximum 72 lbs. in Shrigonda, minimum 54 lbs. in Akola.
Sholapore	At Sholapore ·01, total 39·93.	Cholera in Malsiras taluka, 15 cases, 3 fatal; reaping of *kharif* and sowing of *rabi* crops being completed; *jowari* 65 and *bajri* 57 lbs. per rupee.
Dharwar	Slight rain throughout the district.	Reaping of rice generally commenced; other early crops good and in ears; sowing of late crops nearly completed; fever and cattle-disease in 2 talukas; rice 24 to 41 lbs. and *jowari* 49 to 88 lbs. per rupee.
Kanara	In Karwar ·23, in Kumta 1·65, Sirsi 1·42, and in Halial ·52, total 147·61.	Rice harvest continues above ghât but nearly completed on coast; fever prevails above ghât talukas; small-pox in Panawar; common rice in Karwar 11 seers 51 tolas, in district average 15½ seers.
Rajkot	. . . . .	In some parts of Sorath Halar and Goholvad fever prevailing, in other parts general health good; weather cool; *bajri* 30 and *jowari* 35 lbs. per rupee.
		General Remarks.—River still low in Sindh; slight rain in 7 districts; agricultural prospects generally good; *kharif* harvesting and *rabi* sowing nearly completed in some districts, in progress in others; fever in most districts; cholera in parts of Guzerat and the Deccan; cattle-disease and small-pox in a few places.
Bengal—(14th Nov.)		
Chittagong	*Nil*	Weather fine with cloudy mornings at times; prospects of crops fair, but rain is wanted; prices somewhat high; general health good; cattle-disease continues.
Dacca	*Nil*	Paddy being harvested; rain wanted for winter crops.
24-Pergunnahs	*Nil*	Prospects of late paddy crop continue very unfavourable; yield not expected more than average eight annas, except in south of district; cultivation of winter crops hindered by early cessation of the rains; common rice 13 to 19 seers per rupee; health of people generally good, though cases of fever reported from Baraset, Bussirhat and Sudder Sub-divisions.
Moorshedabad	*Nil*	Weather cool and dry; *amun* on high land in a bad state, on low land and in irrigated places it is good; on the whole an eight-anna crop expected; *rabi* sowings being hindered owing to want of rain fever prevalent in thana Dewanserai and in Jungipore town.
Rajshahye	*Nil*	Weather cool; *amun* on high land being used as fodder; *rabi* being sown in most places; fever here and there; cholera has appeared in Nattore town.
Burdwan	*Nil*	Prospects of crops unfavourable; public health fair.
Rungpore	*Nil*	Weather seasonable; prospects of *amun* paddy bad; other crops good; prices of food-grains stationary; fever prevalent.
Bhagulpore	*Nil*	Rice on high land withering up and being used as fodder, on low land still reported good; *rabi* cultivation going on, but prospects not favourable; fever prevalent in Soopole Sub-division; rice 13 seers 14 chittacks per rupee.
Purneah	*Nil*	Prospects of rice crop not favourable; *rabi* sowings being pushed on; common rice 16 seers per rupee; fever raging; cases of cholera reported here and there.
Patna	*Nil*	Rice crop failing except where water can be obtained; *rabi* sowing continues, but rain is required; *rahar*, cotton and sugarcane growing well; public health good.
Durbhanga	*Nil*	Paddy on high land withering; *rabi* germinated looks green yet, but wants rain; prices rising; fever prevalent in south.
Hazareebagh	*Nil*	Weather clear and cold; prospects of rice not improved, a four to six-anna crop expected; *rabi* plants doing well; public health good.
Cuttack	*Nil*	Late rice crop ripening, in some places being cut; partial loss of crops apprehended for want of rain; price of rice almost unchanged; public health good.
		General Remarks.—The week has been rainless throughout these provinces, and the cold weather is fairly setting in; the reports on the state and prospects of the crops continue to be satisfactory from the eastern districts with the exception of Furreedpore and Mymensingh, and from the districts of Julpigoree and Cooch Behar; from Orissa and Manbhoom also the reports are not bad, as the injury done to the rice crop is said to have been partial and not considerable; from all other parts, however, the accounts are very unfavourable; the rice crop has been mostly destroyed on the high land, and has also been damaged to a greater or less extent on the low land; in these parts the *rabi* crops also are not favourable; in some places cultivation is going on, but not satisfactorily for want of sufficient moisture in the ground, in others it is quite at a standstill; prices of rice generally continue to rise; in some districts the rise is said to have been already very considerable; general health of these provinces is pretty satisfactory, though fever is reported to be prevalent in some districts.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
N.-W. Provinces and Oudh—(Nov. 14th)		
Benares (Nov. 13th)	*Nil*	Weather colder; no fever; *rabi* prospects good; prices rising slightly.
Allahabad („ 14th)	*Nil*	*Rabi* sowings in great part completed and young crops germinating well; health good; prices stationary.
Gorakpur („ 12th)	*Nil*	*Rabi* ploughings well advanced; late rice lost; tanks nearly dry; health fair; prices steady.
Jhansi („ 13th)	*Nil*	Cutting of *juar* and *tili* commenced; *kharif* outturn will be below average owing to insufficiency of rain; *rabi* sowings are in progress; prices falling; health of people and cattle good; fodder and water for cattle becoming scarce.
Cawnpore („ „)		Weather clear; harvesting of late *kharif* crops approaching completion and *rabi* sowings in progress; health good; prices slightly fallen.
Farukhabad („ „)		Weather seasonable; fever still lingers in Chibramau, otherwise health of people fair; *kharif* outturn moderate; *rabi* sowings still going on in some villages.
Agra . („ „)	*Nil*	*Kharif* crops suffering; *rabi* sowings continue; slight fever in four parganas; but general health good.
Bareilly („ „)	Slight shower in parts.	*Kharif* harvest nearly finished; *rabi* crops doing well; market stationary except a fall in rice; health of people and cattle good.
Meerut („ „)	Slight rain, prospect of more	Weather cloudy; *rabi* sowings nearly completed; health good; supplies sufficient; prices stationary.
Kumaun („ „)	. . . . .	Rain on the 11th probably general over the district and enough for the present for sowing the *rabi*; public health good; cattle-disease continues; prices unchanged.
Lucknow („ „)	No appearance of rain.	Weather becoming colder; *rabi* sowing finished; *hewat* crops doing well; rain wanted; condition of cattle normal and of people good; markets well supplied; prices stationary.
Partabgrah („ „)	. . . . .	Grain cheap; *rabi* crops germinating fairly; rain is much wanted.
Rae Bareli („ 12th)	*Nil*	Weather seasonable; no rain; on unirrigated land *rabi* sowings retarded for want of rain; general health good; prices steady; supplies sufficient.
Sitapur („ 13th)	. . . . .	Weather cloudy during the week for 2 days; wind variable; rain much wanted; *rabi* sowings almost completed; markets well supplied.
Fyzabad („ „)	. . . . .	*Rabi* sowings nearly finished; condition of cattle and people good. *General Remarks.*—Rain has fallen in Kumaon and Saharanpore; clouds and slight showers are reported in several other northern districts; elsewhere the weather is clear with falling temperature; *rabi* prospects fair; public health good.
Punjab—(Nov. 14th)		
Delhi	. . . . .	Health good; *rabi* sowings in progress; prices stationary.
Hissar . . .	Slight rain in Hissar and Sirsi.	Health good; prices stationary.
Umballa	1·9	*Rabi* sowings in progress; health good; prices steady.
Jullundur . . .	. . . . .	Health good; *kharif* harvested; *rabi* sowings continue; prices steady
Amritsar . . .	·9	Health good; prices fluctuating.
Lahore . . .	·7	Crop prospects improved; prices steady.
Ferozepore . . .	. . . . .	Health and crop prospects good; prices fluctuating.
Sialkot . . .	. . . . .	Health and crop prospects good; *rabi* sowings in progress; prices stationary.
Rawalpindi . . .	·9	Health good; prices falling.
Peshawar . . .	1·05	Fever decreasing; *rabi* sowings commenced; prices fluctuating.
Mooltan . . .	. . . . .	Health good; *rabi* sowings in progress; prices steady.
Dera Ismail Khan .	·8	Health good; *rabi* sowings in progress; prices steady. *General Remarks.*—Rain in a few districts; health good; *rabi* sowings in progress.
Central Provinces—(Nov. 14th)		
Nagpur . . .	. . . . .	Weather clear and cool; *rabi* sowings completed; prospects good; public health good; prices stationary.
Jubbulpore . . .	. . . . .	Weather clear and cold; reaping of *kharif* crops and cotton-picking continue; *rabi* sowings in progress; wheat 25 and rice 14 seers per rupee; health good.
Saugor (Nov. 13th) .	. . . . .	Weather cloudy; *rabi* sowings finished; *kharif* crops being harvested; cotton being picked; prices stationary; health fair.
Seoni . . .	. . . . .	Weather cool; *rabi* sowings nearly finished; inferior rices nearly all reaped; fever very prevalent and fatal; price of wheat stationary, of rice risen.
Hoshangabad . .	. . . . .	Weather seasonable; prospects good; *rabi* sowings in progress; fever prevalent; wheat 16 and rice 10 seers per rupee.
Khandwa . . .	. . . . .	Weather clear; *rabi* sowings continue; prospects good; 9 deaths from cholera; prices steady.
Raipur . . .	. . . . .	Rice being harvested; outturn of *kodo* and *til* expected to be better than last year; cotton-picking in hand; *rabi* prospects good; public health good; prices steady.
Sambalpur (Nov. 10th) .	. . . . .	Weather cold and seasonable; prospects good; health good; common rice 33½ seers per rupee. *General Remarks.*—*Rabi* prospects very favourable; sowings continue; weather pleasant and seasonable.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
British Burmah—(Nov. 14th)		
Akyab	0·16	Total rainfall 179·73; public health good; 43 cattle died in two townships; elsewhere health of plough cattle good; in Naaf crops in very good condition, not suffering from want of rain; in Myohung where crops were suffering, late rains caused improvement; in Kyelet appearance of crops good.
Rangoon	2·19	Three deaths from small-pox, otherwise public health good; price of paddy Rs. 100 to 103 per 100 baskets; total rainfall 79·86 inches.
Bassein	0·29	Public health good; rain of last few days has improved the crop; price of paddy Rs. 100 to 120 per 100 baskets; total rainfall 88·75 inches.
Prome	2·41	Public health good; 24 deaths of cattle in Mahathaman; rain has fallen but it is feared too late; crops on the higher lands have not matured; in many places the ears are without grain; some are being reaped for fodder; from information given by Thugyes it would appear that loss from drought will be comparatively small; total rainfall 48·16 inches.
Kyoukpyu	0·49	Public health good; health of cattle good; no alteration in price of paddy; total rainfall 156·87.
Sandoway	1·98	One death from cholera in Sandoway town, elsewhere public health good; agricultural prospects favourable; total rainfall 208·85 inches.
Hanthwaddy	. . . .	Public health good; health of cattle good; ploughing and sowing completed; general appearance of crops good; price of paddy Rs. 80 to 100 per 100 baskets.
Pegu	3·50 inches rain fell in last two days, accompanied by high wind.	Public health good; cattle-disease rare; crop prospects good; damage to crops by wind near sea, but not excessive; crops on high lands excellent; price of paddy Rs 85 to 90 per 100 baskets.
Thongwa	4·19	Public health good; 5 deaths of cattle; crops throughout the district much benefited by the rain, which has fallen everywhere; slight damage from drought previous to rainfall, reported from Dedaye and Donabyoo townships; price of paddy Rs. 85 to 100 per 100 baskets; total rainfall 87·22 inches.
Henzada	Rain throughout Henzada sub-division. 045	Public health and health of cattle good; prospects of crops much improved and now good; total rainfall 80·73 inches.
Thyetmyo	1·27	Public health good; paddy area 45,077, 16,927 acres less than last year; prospects little altered by rainfall; total rainfall 41·inches.
Moulmein	0·73	Public health and health of cattle good; about 1,315 acres under paddy or 270 less than last year; prospects and general appearance not bad; crops have suffered from insects and in high lands from drought; reaping of early paddy commenced on the 23rd October; price of paddy Rs. 90 to 100 per 100 baskets; total rainfall 165·07 inches.
Amherest (Moulmein)	. . . .	Public health and health of cattle good; slight damages to crops from insects in 7, from floods in 3 townships; about 10 per cent. of crops liable to damage from drought.
Tovoy	2·97	Public health and health of cattle good; prospect of crops very good; yield expected to be over the average; area under paddy about 51,670 acres or about 700 acres more than last year; total rainfall 194·79 inches.
Shwegyin	0·58	Public health and health of cattle good; harvest prospects promising; about 80,200 acres under paddy against 79,100 last year; price of Rs. 85 per 100 baskets; total rainfall 138·22 inches.
Toungoo	1·32	Public health and health of cattle good; general appearance of crops good; total rainfall 79·07 inches. *General Remarks.*—Rainfall for the week in excess of the rainfall for the corresponding week last year, but total for the year still very deficient; public health and health of cattle good; the rain during the week has revived much of the failing crop on the high lands and has done good to the later transplanted paddy; if fine ripening weather sets in soon now the prospects of the crop will be good; price of paddy rising a little.
Assam—(Nov. 14th).		
Gauhati	*Nil*	Weather seasonable; mornings foggy and nights cool; rain much wanted; prospects of crops not good; public health good.
Sylhet	*Nil*	State and prospects of crops good except in Karimganj sub-division where the prospects of *sali* crop is said to be not favourable; public health is also on the whole good.
Cachar	*Nil*	Days warm, nights cool; sowing of winter crops in progress; prospects of *sail* crops good; common rice 16¼ seers per rupee; small-pox abating.
Dibrugarh	*Nil*	Weather cloudy; prospects of crops good; district healthy.
Mysore and Coorg—		
Bangalore (Nov. 14th)	·03	Rain has fallen throughout the province; crops in a thriving condition; agricultural operation in active progress; prospects good; prices satisfactory; seven deaths from cholera reported in the Hannalli and Davangeri taluks, Shimoga district, otherwise public health good.
Mysore	1·30	(See Bangalore)
Mercara	·22	Picking of coffee proceeding; crop good; paddy crop coming into ear; fair weather desired.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Berar & Hyderabad—		
Amraoti (Nov. 14th)	. . . .	Weather cool and pleasant; cotton-picking commenced; *rabi* sowings in progress; wheat 16 and *jowari* 26 seers per rupee.
Akola . . .	. . . .	Weather cool; *rabi* sowings progressing; prospects good.
Hyderabad (Nov. 14th)	Average rainfall during week ·12. Total from 1st January 31 inches.	Sowings *rabi* and *tabi* and reaping of *kharif* crops continue; cholera continues in one taluka; no cattle disease; prices, wheat 15¼, coarse rice 12, white *jowar* 23, yellow *jowar* 27½ and *tur* 21 seers per hali sicca rupee.
Central India States— (Nov. 14th)		
Indore . . .	*Nil*	Weather cloudy; days warm, nights cold; weather good; prices stationary.
Sutna	. . . .	Health and prospects good.
Neemuch . . .	*Nil*	Health good; weather seasonable.
Goona . . .	. . . .	Health fair; crops good; wheat 26 seers per rupee.
Agar	*Nil*	Crop prospects satisfactory; *rabi* sowing commenced; health good.
Sehore	. . . .	Weather clear; crops and public health good.
Nowgong . . .	. . . .	Weather unseasonably hot; rain wanted; agricultural prospects fair; harvest failed in Datia; prices steady.
Bhopawur, Manpur . .	*Nil*	Prospects good; two fatal cases of cholera reported from Burwani between 23rd and 29th October 1883.
Rajputana—		
Abu (Nov. 14th)	Drops	Weather cloudy and windy; fever prevalent.
Sirohee (" 11th)	Drops	Tanks and wells in good condition; health good; crops all cut; sowing for barley crops begun; weather fairly cool; cloudy last day or two.
Marwar . . .	. . . .	Only 8 months' water in Jodhpur city; tanks and wells almost full; health good; crops good; weather clear; nights moderately cool; prices stationary; *rabi* sowings in progress.
Meywar (Nov. 11th)	. . . .	Tanks, wells and health very good; sowing completed; young crops thriving; weather seasonable.
Harowtee (" 10th)	. . . .	Crop prospects fairly good; health good.
Jhallawar (" 9th)	. . . .	Weather seasonable; health and prospects good.
Ajmere (" 13th	. . . .	Sowing for *rabi* proceeds; weather cloudy and warm.
Jeypore (" ")	Drops	Weather cloudy; prices unchanged; health fair.
Ulwur (" ")	. . . .	*Rabi* sowings continue; prices rising; health good.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 20th NOVEMBER 1883.

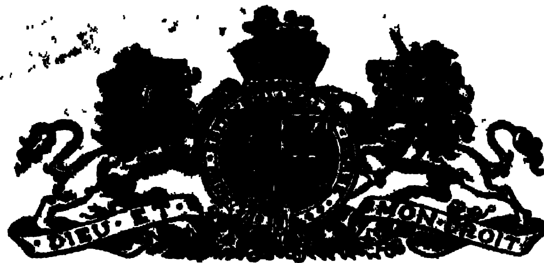
General Remarks.—There has been no noticeable alteration in the weather and prospects recorded in the previous week's summary. The rainfall has been lighter in Madras and entirely absent from Bombay. The crops in those Presidencies and in Central India, Rajputana, Punjab, North-Western Provinces and Oudh and the Central Provinces are generally doing well, but an early rainfall would much benefit the young *rabi* crops in Northern and Central India.

In Bengal the weather continues clear and rainless, and prospects are unchanged. No report has been received from British Burma.

The public health continues fair, except for the prevalence of fever and slight cholera in parts.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Bellary . . .	. . . .	Standing crops generally good; harvest *cholum*, *cumbu*, *ragi*, oil-seeds, yield below average; twenty-seven deaths from cholera.
Kurnool . . .	. . . .	Standing crops good; harvest yellow *cholum*, *koora*, indigo, yield below average.
Ganjam . . .	. . . .	Standing crops generally good; harvest paddy; cholera, small-pox slight in one taluk.
Kistna . . .	. . . .	Standing crops good; harvest *cholum*, maize, gingelly, black paddy, *koora*, yield below average; fever increasing; small-pox, cattle-disease in parts.
Chingleput (Madras) .	. . . .	Standing crops injured by excess of rain in two taluks, elsewhere in good condition; harvest *kar*, &c., yield half; eight deaths from cholera; small-pox slight.
Coimbatore . . .	·24 (average of 6 stations).	Standing crops damaged by excessive rain in two taluks, elsewhere fair; harvest paddy, *cholum*, *ragi*, *cumbu*, yield about average; twelve deaths from cholera; fever, small-pox, cattle-disease slight.
Tanjore . . .	2·38 (average of 10 stations).	Standing crops generally good; harvest paddy, *cholum*, *ragi*, *cumbu*, yield below average; forty deaths from cholera.
Madura . . .	·57 (average of 7 stations).	Standing crops fair; harvest dry crops, yield average; cholera severe in Madura town and slight elsewhere.
Malabar . . .	·99 (average of 9 stations).	Second crop cultivation progressing; small-pox, fever, cattle-disease slight.
Travancore . . .	1·122	Standing crops good; fever in parts. *General Remarks.*—General prospects good.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—(Nov. 21st)		
Kurrachee . . .	No rain	River at Kotri on 14th 5 feet 10 inches, against 6 feet 15 inches on same date last year; fever generally prevalent; cattle-disease in 3 talukas; harvesting operations in progress; prices—in Karachi wheat 24, red rice 28 and *bajri* 36; in Dadú 30 and 48; Tatta 24, 32 and 36, and in Jate 20, 32 and 40 respectively.
Hyderabad . . .	. . . . .	Cotton-picking has commenced; fever in eight, small-pox in four, and cattle-disease in four talukas; wheat 25, *bajri* 35½, *jowari* 40, red rice 26, and white rice 28 pounds per rupee.
Ahmedabad . . .	. . . . .	*Kharif* crops nearly harvested; *rabi* sowing continued; fever in some talukas; *bajri* 29 and wheat 25½ pounds.
Baroda . . .	. . . . .	Slight cholera in Navsari and Mohwa mahals; fever in some parts of Navsari and Kadi divisions; harvesting of *kharif* and sowing of *rabi* in progress; *bajri* 32 and rice 24 pounds.
Surat	. . . . .	Crops healthy; fever and cholera more or less in some talukas; *jowari* 37 and *nagli* 45 pounds.
Nasik . . .	No rain	*Kharif* reaping and *rabi* sowing vigorously continued; crops damaged by locusts in parts of Baglan, Kalwan and Dindori; locusts in flight southwest; public health good; fever in Kalwan taluka; wheat 31, *bajri* 32, and rice 25.
Colaba (Bombay) . .	No rain	Abnormal temperature 1° cool to 1° warm; vapour in air normal; wind normal.
Poona . . .	. . . . .	*Kharif* crops being reaped; *rabi* sowing completed; two deaths from cholera in Indapur taluka; *bajri* 44 and *jowari* 52 pounds, in Poona *bajri* 34 and *jowari* 43.
Ahmednagar . .	No rain	*Bajri* reaping nearly finished and *rabi* sowing in progress; cholera in Karjat one attack; locusts in Shrigonda; cattle-disease in Newasa; *bajri* maximum 54 pounds in Jamkhed, minimum 39 in Nagar: *jowari* maximum 72 pounds in Jamkhed, minimum 54 in Akola.
Sholapore . . .	No rain	Cholera in Malsiras taluka; four cases, one fatal; reaping of *kharif* and sowing of *rabi* crops being completed; *jowari* 64 and *bajri* 55 pounds.
Dharwar . . .	. . . . .	Reaping of rice crop in progress; that of early *jowari* commenced in 6 talukas; other early crops good; sowing of late crops nearly completed; fever and cattle-disease in 2 talukas; rice 25 to 41 and *jowari* 52 to 88 pounds per rupee.
Kanara . . .	. . . . .	Weather fair; small-pox continues in Kumpta, Nonalvar and Siddapur; reaping of *bakal* crops such as *ragi*, &c., continues above ghat; common rice *Karwar* 11 seers 51 tolas, district average 15½ seers per rupee.
Rajkot . . .	. . . . .	Weather cool; fever continues in some parts; *bajri* 30 and *jowari* 35 pounds.
		General Remarks.—River continues low in Sind; *kharif* reaping and *rabi* sowing being completed in some districts; injury from young locusts in parts of Satara and Nasik; fever generally prevalent; slight cholera; cattle-disease and small-pox in few places.
Bengal—(Nov. 21st)		
Chittagong . . .	*Nil*	Weather clear and cold; there are complaints of want of rain causing short outturn, but the harvest will be generally good; prices steady; health good; cattle-disease lingers in a few places.
Dacca	*Nil*	Paddy being harvested; sowing of pulses going on; prospects good, but rain wanted.
24-Pergunnahs . .	*Nil*	Prospects of late rice continue unfavourable; average yield estimated at from eight to ten annas; *rabi* sowings partly retarded by drought; price of common rice varies from 11½ to 19 seers per rupee; public health generally good, except in Bussirhat where fever rather prevalent.
Moorshedabad . .	*Nil*	Weather getting cooler; *amun* in south-east of district promises a 12 to 14-anna crop; on irrigated lands it is doing well; want of rain prevents *rabi* sowings, and will impair the crop that is on the ground; fever prevalent in Jungipore town, and in several other places of the sub-division.
Rajshahye . . .	*Nil*	Weather cold; outturn of paddy on high lands considered likely to be from two to four annas, and of paddy on low lands four annas; *rabi* except in low lands requires rain.
Burdwan . . .	*Nil*	Yield of *amun* will be about one-third of a full crop; prospects of *rabi* crops also not favourable.
Rungpore . . .	*Nil*	Weather cool; prospects of *amun* paddy bad; other crops good; prices stationary; fever prevalent.
Bhaugulpore . .	*Nil*	Rice on high lands is a failure; crop on low ground will yield from six to ten annas outturn; prospects of *rabi* crops also not favourable; a good deal of *rabi* lands not sown this year; much fever in north; price of rice 13 seers 14 chittacks per rupee.
Purneah . . .	*Nil*	Yield of rice crop very poor; *rabi* sowing progressing; price of common rice 15 seers per rupee, with tendency to rise daily; public health not good; much fever and a few cases of cholera.
Patna	*Nil*	Rice on high lands has withered; on low lands the *rabi* crop will be fair, but on high lands rain is still wanted; public health good.
Durbhunga . . .	*Nil*	Paddy on high-lands drying up; *rabi* sowings still going on, but rain is much wanted; prices rising; fever prevailing in Tajpore and Madhubani sub-divisions.



Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*contd.*		
Hazareebagh . .	*Nil*	Weather seasonably cold; rice harvest commenced; a 4-anna crop expected; prospects in the Giridi sub-division gloomy; a total failure of rice in portions of three or four thanas reported; rices rising; a few cases of small-pox reported; general health good.
Cuttack . . .	*Nil*	Earlier sorts of rice crop being cut; later sorts ripening; partial loss of rice crop apprehended for want of rain; *rabi* crops promising well; price of common rice 21 seers per rupee; public health good. *General Remarks.*—The cold weather has now fairly set in; there has been no rain in any part of the province during the week; in almost all parts of Eastern Bengal and Orissa, and in Julpigoree and Cooch Behar the rice harvest, as already reported, will be fair, but in all other parts of the Province it will be very poor; in these parts most of the crop on the high lands has been lost, and even on the low lands the rice has suffered; the state of the *rabi* cultivation also is backward; sowings are being retarded for want of rain, except where means of irrigation exist; fever is prevalent in some districts, otherwise the public health is good.
N. W. Provinces and Oudh—(Nov. 21st)		
Benares .(Nov. 20th)	*Nil*	Rain required in Chandauli Tahsil; health of men and cattle good; outturn of sugarcane crop only half the average; bazars well supplied; prices fluctuating slightly.
Allahabad .(„ 21st)	*Nil*	*Rabi* sowings nearly finished; young *rabi* doing well; health good; *kuari* rice risen 3 seers the rupee; no other material change.
Gorakhpore .(„ 19th)	*Nil*	Tanks nearly empty; *rabi* sowings in progress; health fair; prices steady.
Jhansi .(„ „)	*Nil*	*Kharif* crops suffering; area sown with *rabi* crops is much smaller than in former years for want of moisture; prices almost stationary; health of people and cattle good.
Rai Bareli .(„ „)	*Nil*	*Rabi* crops germinating fairly; *kharif* is being harvested; general health good; markets well supplied; prices almost steady.
Cawnpore .(„ 20th)	. . . . .	Outturn of late *kharif* crops on unirrigated land poor; *rabi* sowings progressing; health of people and cattle good; market steady.
Farukhabad .(„ „)	. . . . .	Weather seasonable and occasionally cloudy; fever in parts of the district; *rabi* sowings going on in some places.
Agra („ „)	*Nil*	*Kharif* continues to suffer; *rabi* being sown and irrigated; slight fever in 2 parganas; general health good; prices steady.
Bareilly („ „)	. . . . .	Rain required for *rabi*; prices steady; health good.
Meerut („ „)	. . . . .	Weather cold and clear; *rabi* sowings nearly completed; cane pressing commenced; health good; supplies sufficient; prices stationary.
Kumaun („ „)	. . . . .	Weather fair; wheat has been sown; general health good; cattle-disease continues; prices unchanged.
Lucknow („ „)	. . . . .	Weather becoming colder; some of the *kewat* crops are being cut; rain wanted; condition of people and of cattle normal; markets well supplied; prices stationary.
Partabgarh („ „)	. . . . .	*Rabi* sowings continue; fields have to be irrigated before being sown; *jarhan* where irrigated ripening; where unirrigated, drying up; prices steady; health good.
Sitapur („ „)	*Nil*	*Rabi* germinating well and so far prospects are favourable; general health good.
Fyzabad („ „)	*Nil*	Wind westerly; rain wanted; *mash* and *jarhan* suffering from drought in part of district; public health and condition of cattle good. *General Remarks.*—No rain has fallen during the weak; the *rabi* sowings continue with irrigation where possible; the public health is good and the markets sufficiently supplied; cattle-disease is still reported from Kumaon.
Punjab—(Nov. 21st).		
Delhi	. . . . .	Health good; *rabi* sowings nearly completed; prices stationary.
Hissar	. . . . .	Health good; *rabi* sowings continue; prices stationary.
Umballa . . .	. . . . .	Health good; *kharif* harvested; yield below average; *rabi* sowings continue; prices falling.
Jullunder . . .	. . . . .	Health good; *kharif* harvested; *rabi* sowings in progress; prices steady.
Amritsar . . .	. . . . .	Health good; prices stationary.
Lahore . . .	. . . . .	Health and crop prospects good: fall in price of Indian-corn; prices of other food-grains stationary.
Ferozepur . . .	·6 at Sadr, ·4 at Ferozepur city and ·2 at Jellalabad.	Health and crop prospects good; prices steady.
Sialkot	1	Health and crop prospects good; *rabi* showings continue; slight fall in prices.
Rawalpindi . . .	1·9	Health good; prices falling.
Peshawar . . .	. . . . .	Small-pox prevalent; *rabi* sowings completed; prices steady.
Mooltan . . .	. . . . .	Health good; *rabi* sowings continue; slight rise in prices.
Dera Ismail Khan .	. . . . .	Health good; *rabi* sowings in progress; prices stationary. *General Remarks.*—Rain in the Sialkot, Ferozepur, Rawalpindi and Shapur districts; small-pox is prevalent in Peshawar; health elsewhere good; *rabi* sowings in progress.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Central Provinces—		
Nagpur (Nov. 21st)	. . . .	Weather clear and cool; *rabi* crops promise well; health generally good; prices stationary.
Jubbulpore („ „)	. . . .	Weather clear and cold; reaping of *kharif* crops and cotton-picking progressing; *rabi* sowings continue; wheat 25 seers, rice 15 seers per rupee; health good.
Saugor („ 20th)	. . . .	Weather cloudy; *kharif* harvest in progress; cotton being picked; *rabi* crops favourable; prices stationary; health fair.
Seoni („ 21st)	. . . .	Weather clear and cool; *rabi* sowings completed; *kharif* harvest produced average outturn; fever prevalent; prices stationary.
Hoshangabad („ „)	. . . .	Weather seasonable; prospects good; *rabi* sowings continue; *juari* being harvested; fever prevalent; wheat 18 seers, rice 10 seers per rupee.
Raipur („ „)	. . . .	Weather cool; cutting of rice and *tili* progressing; *rabi* sowings almost completed; cotton-picking continues; health good; prices steady.
Sambalpur („ 17th)	. . . .	Weather cold and clear; inferior rices cut; prospects favourable; health good; common rice 33½ seers per rupee.
Khandwa . . .	. . . .	Weather clear; prospects good; *rabi* sowings continue; two deaths from cholera; prices steady.
		General Remarks.—Harvesting of *kharif* crops in progress; *rabi* sowings almost completed; a few cases of cholera in the Narbada valley, and the Nimar district.
Assam—(Nov. 20th)		
Gauhati . . .	No rain	Weather seasonable; *paddy* crop doing rather poorly owing to want of rain; mustard cultivation in progress; public health fair.
Sylhet	No rain	State and prospects of crops fair; public health good.
Cachar . . .	2·20	Weather cold; reaping of *sail* crops commenced; sowing of winter crops nearly finished; common rice 16 seers per rupee; no small-pox reported.
Dibrugarh . . .	0·13	Weather cold; prospects of crops good; district healthy.
Mysore and Coorg—		
Bangalore . . .	·35	There has been an absence of rain throughout the province; the break has benefited the crops which are in excellent condition; prospects very good; cholera still prevalent in the Shimoga district; health of the province otherwise good; prices satisfactory.
Mysore . . .	No rain	(see above)
Mercara . . .	·43	Showers of rain which have fallen have done more harm than good to the standing rice crops; picking of coffee proceeding.
Berar & Hyderabad—		
Amraoti . . .	. . . .	Weather cool; cotton-picking progressing; *rabi* sowings nearly completed; wheat 16, *jowari* 26 seers.
Akola . . .	. . . .	*Rabi* sowings progressing; *kharif* crops being cut.
Hyderabad . . .	No rain	Sowing of *abi* and reaping of *abi* crops continue; fever and ague prevail in two taluks and cholera in one; no cattle disease; prices—wheat 15½, coarse rice 11¼, white *juar* 23, yellow *juar* 29½, and *tur* 20 seers per hali sicca rupee.
Central India States—		
Indore . . .	No rain	Health good; weather seasonable; prices stationary.
Morar (Gwalior) . .	No rain	Health good; weather seasonable; rain wanted for *rabi* crops; prices stationary.
Sutna . . .	No rain	Health good.
Neemuch . . .	. . . .	Crops thriving; public health good.
Goona . . .	. . . .	Health and crops good.
Sehore . . .	No rain	Weather clear; crops and public health good.
Nowgong . . .	No rain	Rain wanted; prospects fair; weather seasonable; general health good; prices steady.
Bhopawur . . .	No rain	Prices steady; health good; one fatal case of cholera occurred at Bawi Bagot on 10th instant.
Manpur . . .	(see above)	(see above)
Rajputana—		
Abu . (Nov. 21st)	. . . .	Seasonable and cold; fever abated.
Sirohee . („ 18th)	. . . .	Tanks, wells and health good; crop sowing, seasonable; cold nights and mornings.
Marwar . („ 16th)	. . . .	Three months' water in Jodhpore city; tanks and wells almost full; health good; *kharif* almost gathered; *rabi* sowings in progress; partially cloudy; few drops on night of 10th; cold increasing; prospects of existing crops good; prices stationary.
Meywar . („ 18th)	. . . .	Tanks, wells and health very good; young crops thriving; seasonable.
Harowtee . („ 17th)	. . . .	Crop prospects fairly good but rain needed; cool, clear; health good; prices stationary.
Jhallawar („ 16th)	. . . .	*Rabi* sowing continues; fever reported in some districts.
Ajmere . („ 20th)	No rain	Seasonable; health good.
Jeypore . („ „)	. . . .	Seasonable; prospects fair; health good.
Ulwur . („ „)	. . . .	*Rabi* sowings continue; prices falling; health good.

Government of India Notifications, Appointments, Promotions, &c.

MILITARY SECRETARY'S OFFICE.

NOTIFICATION.

Calcutta, the 30th November, 1833.

PROGRAMME
FOR
THE ARRIVAL IN CALCUTTA
OF
HIS ROYAL HIGHNESS THE DUKE OF CONNAUGHT.

Their Royal Highnesses the Duke and Duchess of Connaught will arrive in Calcutta by a Special Train on Monday, the 3rd December 1883, at 8 A.M. Railway time, or 8-33 Calcutta time.

Their Royal Highnesses will be received at the Howrah Railway Station by the Military Secretary and an Aide-de-Camp to the Viceroy, the Deputy Commissioner of Police, Calcutta, and the Magistrate of Howrah.

A Guard of Honor of the East Indian Railway Volunteers will be drawn up on the platform of the Howrah Railway Station, and a Guard of Honor of Native Troops with Band outside the Station.

The route taken will be by the Strand Road to Fairlie Place, down Fairlie Place, Clive Street to Dalhousie Square, Dalhousie Square North, Dalhousie Square East, and Old Court House Street to Government House, and will be lined by the Police.

Their Royal Highnesses will be escorted from Howrah Station to Government House by His Excellency the Viceroy's Body-Guard.

Guards of Honor of British Infantry and of the Calcutta Volunteer Rifle Corps with Bands will be drawn up in front of the Grand Staircase of Government House.

A Royal Salute will be fired from the ramparts of Fort William as Their Royal Highnesses pass the Hooghly Bridge.

At Government House Their Royal Highnesses will be received by His Excellency the Viceroy, attended by his Personal Staff, His Honor the Lieutenant-Governor and his Personal Staff, the Chief Justice of Bengal, the Bishop of Calcutta, the Members of Council, the principal Civil and Military Officers, and other Gentlemen who are desirous of attending.

After being received by His Excellency, an address of welcome will be presented to Their Royal Highnesses by the Corporation of Calcutta and the representative Committee of its inhabitants.

Full dress will be worn by Officers entitled to uniform. Gentlemen not entitled to wear uniform will appear in morning dress.

His Excellency the Viceroy and Governor-General will open the Calcutta International Exhibition in State on Tuesday the 4th December 1883.

Full dress will be worn by officers entitled to uniform. Gentlemen not entitled to wear uniform will appear in morning dress.

By Command,

WILLIAM BERESFORD, *Captain,*
Military Secretary to the Viceroy

LEGISLATIVE DEPARTMENT.

NOTIFICATIONS.

Fort William, the 24th November, 1883

No. 19.—In exercise of the power conferred by the Statute 24 & 25 Vic., cap. 67, section 17, the Governor General in Council has been pleased to appoint Friday, the 7th December next, at 11 o'clock A.M., as the time, and the Council Chamber in the Government House, Calcutta, as the place, for a meeting of the Council of the Governor General for the purpose of making Laws and Regulations.

The 30th November, 1883

No. 20.—His Excellency the Viceroy and Governor General, under the authority vested in him by the Statute 24 & 25 Vic., cap 67, section 10, has been pleased to nominate Mr. R. Miller to be an additional Member of the Council of the Governor General for the purpose of making Laws and Regulations.

D. FITZPATRICK,
Secretary to the Government of India

HOME DEPARTMENT.

NOTIFICATIONS.—PUBLIC.

Calcutta, the 29th November 1883.

No. 1722.—With reference to paragraph 5 of Home Department Resolution Nos. 26—953 to 968, dated the 19th July 1883, it is hereby notified that the examination prescribed for the filling up of vacancies in the clerical establishments of the Secretariat Offices of the Government of India and the Departments directly attached thereto, will be held at Calcutta, in the Senate House of the Calcutta University, on Tuesday, the 15th January 1884, and following days. The hours of examination will be from 10 A.M. to 1 P.M., and from 1-30 P.M. to 4-30 P.M., daily.

The probable number of vacancies to be competed for is 4 in the Upper Division of Clerkships and 30 in the Lower Division. These figures represent the number of vacancies which may be expected to occur during the year 1884 in the two Divisions, respectively, but it is not possible to estimate with absolute accuracy the number of vacancies which will actually occur.

Candidates should pay the prescribed fees* into the nearest Treasury and forward the Treasury receipt to the Secretary to the Board of Examiners. Candidates paying their fees in Calcutta should pay them into the Bank of Bengal.

*	R
For Upper Division . . .	20
For Lower Division . . .	10

Application for permission to appear at the examination should, as directed in the Home Department Resolution of 19th July last, be made to the Secretary to the Board of Examiners, Calcutta, between the 1st and 15th days of December next (inclusive).

The attention of intending candidates is called to paragraphs 7 and 8 of the Resolution of 19th July last prescribing the particulars and documents* which should accompany the application for permission to appear at the examination.

* (1) Evidence that the candidate is not less than 18 and not more than 24 years of age
(2) A certificate that the candidate is of good moral character from the head of the institution in which he has last been educated, or (when a year or more has elapsed since his education terminated) from some respectable householder, to whom he is well known in private life, and who is himself personally known to the head of some Government Office—this last fact being certified by the countersignature of the officer in question

---

ESTABLISHMENTS.

The 27th November 1883.

No. 232.—The services of Mr. J. Kennedy, B.C.S., are placed at the disposal of the Chief Commissioner of Assam.

MEDICAL.

PORT BLAIR.

The 28th November 1883.

No. 501.—Lieutenant-Colonel T. Cadell, V.C., Chief Commissioner of the Andaman and Nicobar Islands, and Superintendent of Port Blair and the Nicobars, is granted subsidiary leave from the 30th October to the 28th November 1883, to enable him to resume charge of his duties on return from furlough.

ECCLESIASTICAL.

The 26th November 1883.

No. 311.—The Reverend F. Horton, B.A., a Junior Chaplain on the Bengal Establishment, reported his arrival at Calcutta on the afternoon of the 12th instant.

Mr. Horton is appointed to be Chaplain of Nowgong, Bundelcund, with effect from the date of assuming charge.

The 28th November 1883.

No. 316.—Privilege leave for six weeks is granted to the Venerable B. T. Atlay, Officiating Archdeacon of Calcutta, with effect from the 15th ultimo, or from such subsequent date as he may have availed himself of it.

The 29th November 1883.

No. 318.—The services of the Reverend R. J. Langford, M.A., Chaplain of Kamptee in the Central Provinces, are placed at the disposal of the Government of the North-Western Provinces and Oudh with effect from the 15th instant.

The Reverend J. O'F. Willcocks, M.A., is appointed to be Chaplain of Kamptee with effect from the date of his taking over charge from the Reverend R. J. Langford.

The 30th November 1883.

No. 322.—The services of the Revd. T. B. Speedy, B.A., Chaplain of Nowgong, Bundelcund, are placed at the disposal of the Government of Bengal, with effect from the date of giving over charge to the Reverend F. Horton, B.A.

FORESTS.

The 29th November 1883.

No. 878 F.—Consequent on the retirement from the service of Mr. H. Leeds, Deputy Conservator of Forests of the 1st Grade in the Punjab, the following promotions are made among Deputy Conservators of Forests, with effect from the 1st October 1883:—

Mr. W. R. J. Brereton, Deputy Conservator of the 2nd Grade, in the North-Western Provinces and Oudh (on furlough)—to be a Deputy Conservator of the 1st Grade.

Mr. M. H. Ferrars, B.A., Deputy Conservator of the 2nd Grade, in British Burma (on deputation to the Andamans)—to officiate in the 1st Grade of Deputy Conservators, until the issue of further orders.

A. MACKENZIE,
Secretary to the Government of India.

FOREIGN DEPARTMENT.

NOTIFICATIONS.—GENERAL.

Fort William, the 28th November, 1883.

No. 2677 G.—Mr. H. S. Barnes, C.S., Political Agent of the 3rd Class, and Political Agent in Quetta and Pishin, is granted privilege leave for one month, with effect from the 25th November, 1883, or the subsequent date on which he may avail himself of the same

No. 2679 G.—Hak Nawaz Khan, Native Assistant to the Agent to the Governor General in Biluchistan, at Harnai, was on leave on medical certificate from the 1st April to the 25th August, 1883.

This cancels that part of Foreign Department Notification, No. 1276 G., dated the 1st May, 1883, which granted three months' privilege leave to Hak Nawaz Khan.

POLITICAL.

The 28th November, 1883.

No. 2681 G.—Subject to the confirmation of Her Majesty's Government, the Governor General in Council is pleased to recognize the appointment of Mr. Alfred Ritz as Acting Consul for the Austro-Hungarian Empire at Calcutta during the absence of Mr. H. Reinhold.

H. M. DURAND,
Officiating. Secretary to the Government of India.

DEPARTMENT OF FINANCE AND COMMERCE.

NOTIFICATIONS.

Fort William, the 29th November 1883.

No. 1681.—Privilege leave for one month and eighteen days having been granted to Surgeon-Major H. W. Graham, Assay Master, Bombay Mint, and Surgeon J. Scully having, in consequence, been appointed to officiate as Assay Master, Bombay Mint, Surgeon J. Scully received charge of the said office from Surgeon-Major H. W. Graham, after noon, on the 19th November 1883.

The 30th November 1883.

No. 1673.—Whereas under the terms of Notification in the Department of Finance and Commerce, No. 3646, dated 15th November 1880, the Municipality of Calcutta have paid to the Collector of Stamp Revenue, Calcutta, R459 as composition for the stamp duty chargeable on a sum of R97,800 which the said Municipality were authorised to borrow and which has been raised by the issue of the undermentioned debentures, dated 1st August 1883, *viz.*:—

Nos.		R	Amount. R
1 to 15	@	1,000 each	15,000
16 " 26	"	500 "	5,500
27 " 40	"	1,000 "	14,000
41 " 43	"	4,000 "	12,000
44 & 45	"	1,000 "	2,000
46 " 47	"	500 "	1,000
48 to 53	"	5,000 "	30,000
54			5,400
55			2,400
56			500
57			10,000

In exercise of the powers conferred by Section 8 of the Indian Stamp Act, 1879, the Governor General in Council has exempted the above-mentioned debentures from any stamp duty with which they might otherwise be chargeable, whether on issue, renewal, or sub-division.

No. 1659.—The following addendum to the Codes of the Financial Department is published for general information:—

CODES OF THE FINANCIAL DEPARTMENT.

Definitions.

Page iii.

Insert the following under ACTIVE SERVICE:—

In the case of Engineers appointed from the Royal Indian Engineering College at Cooper's

Hill who passed out of the College from the years 1878 to 1886, inclusive, Active Service includes also the whole period from date of appointment to the service to date of joining their appointments in India, provided they fulfil the conditions in regard to date of landing in India specified in Section 64 (a) of the Civil Pension Code.

[NOTE.—The exception in favour of officers of these years is made in consequence of an error in the letters of appointment and in the College prospectus which affected students of these years, as ruled in Secretary of State's Despatch No. 24, dated 26th April 1883.]

J. WESTLAND,
Officiating Secretary to the Government of India.

MILITARY DEPARTMENT.

Fort William, the 30th November, 1883.

APPOINTMENTS.

No. 616.—STAFF CORPS—

RESIDENT IN MYSORE.

NOTIFICATIONS

Camp Mercara, the 15th November 1883.

No. 19.—ERRATUM.—In Resident's Notification No. 16, dated 10th September 1883, under the heading No. VI or High Ground Division, *for the words* "Bounded on the west by Miller's Road and its continuation along the high ground up to Boundary Stone XI," *read* "Bounded on the west by Avenue and Miller's Roads."

The 24th November 1883.

No. 20.—Whereas by the Foreign Department Notification No. 2252 I., dated the 7th August 1883, the Indian Christian Marriage Act, 1872, was, with certain modifications, declared to apply to the Civil and Military Station of Bangalore, so far as regards marriages between persons one of whom is a Native Christian subject of Mysore and neither of whom is a Christian British subject. In exercise of the powers conferred by Sections 7 and 9, respectively, of the Act as so declared in force, the Resident in Mysore is pleased—

(*a*) to appoint the Reverend G. Hiram Greenig, a Missionary of the Methodist Episcopal Church, to be a Marriage Registrar for the territories included in the Civil and Military Station of Bangalore, and

(*b*) to license the said Reverend G. H. Greenig to grant certificates of marriage within the said territories, between Native Christians one of whom is a Native Christian.

By Order,

H. WYLIE, *Major*,

Assistant to the Resident.

HENRY F. BLANFORD,
Meteorological Reporter to the Government of India.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The "Indian Law Reports," published under the authority of the Governor General in Council, will appear in monthly parts, published as soon as possible after the first of each mouth at Calcutta, Madras, Bombay, and Allahabad, and will comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court will be reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court will be reported in the Calcutta Series. The Parts of each Series can be had separately, or all four Parts can be had stitched into one wrapper at the option of subscribers and purchasers. It will be observed from the following statement of the terms of subscription and sale, that a considerable reduction is allowed to persons taking the complete set :

Terms of subscription, payable annually in advance.

	Without Postage.	With Postage.
For the CALCUTTA SERIES	R35	R37-8
" MADRAS SERIES	" 8	" 9
" BOMBAY SERIES	" 8	" 9
" ALLAHABAD SERIES	" 8	" 9
Complete set	" 45	" 47-8

The price of each Part purchased separately will vary according to the amount of matter it contains, and will be printed on the wrapper. It will, however, never be below the following:—

		R	
For a Part of the CALCUTTA SERIES		R3	8
" " MADRAS SERIES		" 1	0
" " BOMBAY SERIES		" 1	0
" " ALLAHABAD SERIES		" 1	0
Complete set		" 4	0

Persons desiring to subscribe for or purchase the Reports, should apply to—

MESSRS. THACKER, SPINK AND CO., CALCUTTA;
MESSRS. THACKER AND CO., BOMBAY;
MESSRS. HIGGINBOTHAM AND CO., MADRAS;
THE GOVERNMENT CENTRAL BOOK DEPOT, BOMBAY;
THE GOVERNMENT BOOK DEPOT, ALLAHABAD.

Orders and Subscriptions for 1876 should be at once remitted.

THE BENGAL LAW REPORTS.

A few sets of the Bengal Law Reports (Volumes 1 to 15) are available at Messrs. Thacker, Spink & Co., Calcutta, at R375 a set.

Read—

Report of the Curator of Ancient Monuments for 1881-82.

RESOLUTION.

The appointment of Curator of Ancient Monuments was sanctioned by the Secretary of State in November 1880 for a term of

three years only, in view to the settlement within that period by each Local Government of a complete scheme of conservation for each province. Major Cole has, since he took charge of his office in January 1881, visited most of the Local Governments, and in the notes and memoranda which form Appendices of his reports has indicated in respect of many of the principal monuments what measures of conservation are in his opinion required. It is important that the Local Governments should now settle, in communication with the Government of India, the general lines upon which their operations will in future be conducted. The lists of objects of antiquarian interest received from the different provinces show that very much information as to the number and character of existing monuments has been collected; and the Curator's memoranda and suggestions indicate sufficiently clearly the general direction which measures of conservation ought to follow.

2. The Governor General in Council notices, however, that the Curator has not apparently placed himself in such free communication with the officers of the Archæological Survey as was desirable, and this is to be regretted. It is true the reports show that Major Cole has at times consulted General Cunningham; but as far as Madras and Bombay are concerned, he appears to have had no communication with Dr. Burgess whose great experience and sound knowledge, both archæological and architectural, would have been of much service in preparing the necessary lists, and determining the mode in which repairs should be planned.

3. The Governor General in Council desires that each Local Government will now, with as little delay as possible, take up the lists of ancient monuments for its province as given in Major Cole's Report for the year 1882-83, and, as regards Northern, Eastern and Central India, in communication with General Cunningham, and as regards Madras and Bombay, in communication with the Archæological Surveyor of Southern and Western India, prepare classified lists and a detailed report showing—

I.—Those monuments which from their present condition and historical or archæological value ought to be maintained in permanent good repair.

II.—Those monuments which it is now only possible or desirable to save from further decay by such minor measures as the eradication of vegetation, the exclusion of water from the walls, and the like.

III.—Those monuments which from their advanced stage of decay or comparative unimportance it is impossible or unnecessary to preserve.

4. The monuments in classes I and II should be further subdivided, thus—

I (*a*) and II (*a*).—Monuments in the possession or charge of Government, or in respect of which Government must undertake the cost of all measures of conservation.

I (*b*) and II (*b*).—Monuments in the possession or charge of private bodies or individuals.

In respect of classes I (*a*) and II (*a*), the report should show what arrangements it is proposed to make for the due carrying out of the necessary measures of conservation. Definite provision should be made for the proper custody and up-keep of each monument in

these classes. The Government of India do not wish to interfere in the details of these arrangements, but they desire to be satisfied that each Local Government has at its disposal the means for the intelligent and judicious treatment of any questions that may arise in connection with the preservation of buildings of such importance. The Governor General in Council considers that the cost of these measures is a legitimate charge upon the Public Works allotment of each province, but will be prepared to consider in very special cases whether any further assistance should be granted from Imperial funds.

In respect of classes I (*b*) and II (*b*), it should be reported what funds are available for their conservation; and whether the custodians can be induced to allow the inspection, direction, and control of Government officers in such matters. It may be advisable in some instances to offer small subsidies in view to securing the necessary amount of supervision, but this should only be proposed where the monument is one of primary importance, and its due conservation cannot be otherwise secured. In general it may be hoped that the local officers and the Local Government will be able to induce those interested to take proper steps for maintaining the buildings in their charge.

5. If hereafter it should become apparent that the Local Governments require advice or instructions with reference to the proper mode of preserving or treating any monument, the Government of India will be happy to arrange for procuring this from the best available authorities. Meantime, as above intimated, the Local Governments should, besides referring to General Cunningham and Dr. Burgess, freely consult the Curator of Ancient Monuments in the preparation of the lists and reports now ordered, remembering that Major Cole's services will not be available in that capacity after the 28th January 1884 when the period for which his appointment was sanctioned by the Secretary of State will expire.

6. In the Annual Administration Reports of each province full information should be given as to the measures of conservation carried out during the year and as to the condition of all monuments in classes I and II.

ORDER.—Ordered that a copy of this Resolution be forwarded to Local Governments and Administrations, to the Director General of the Archæological Survey, and to the Curator of Ancient Monuments in India for information and guidance. The Curator, before his term of office expires, should arrange to visit any important monuments not yet seen by him, submitting his notes, as before, to the Local Governments concerned.

Ordered also that a copy be forwarded to the Foreign, Public Works and Finance Departments for information; and that the Resolution be published in the Supplement to the *Gazette of India*.

(True Extract.)

A. MACKENZIE,

Secretary to the Government of India.

The following Resolution is to be substituted for Resolution bearing the same numbers and date :—

No. $\frac{5}{196-212}$

Extract from the Proceedings of the Government of India, in the Home Department (Ecclesiastical)—under date Simla, the 9th August 1883.

Read again—

Home Department Resolution Nos. 4—248-63A., dated the 27th December 1882, sanctioning certain alterations in Rule II of Section II of the Rules contained in Home Department Notification, dated 12th December 1877, for the levy and expenditure of fees on masonry graves and monuments in cemeteries and churches throughout India.

Read also—

A letter from the Government of the Punjab, No. 1527, dated the 2nd ultimo, bringing to notice an alleged inconsistency in revised Rule II.

RESOLUTION.

The Governor General in Council is pleased to decide that revised Rule II of the Rules referred to in the preamble shall run as follows :—

A further fee of one rupee per square foot shall be levied for the erection of a masonry monument in a burial ground, reduced to eight annas per square foot when the monument is of stone or marble, provided that the minimum fee payable for a monument shall be Rs. 5. No monument shall in any case be more than 3 feet in height. For a simple headstone or flat slab of stone or marble not more than 3 feet 6 inches in height and 2 feet in width, a fee of Rs. 5 shall be payable. A fee of Rs. 75 shall be levied on a faculty for the erection of a monument in a church.

Notes.—(1) A tablet on the wall of a cemetery shall be regarded as a monument.

(2) "Simple headstone."—A cross of not greater height or length than 3 feet 6 inches is included in this description.

(3) In the case of a monument erected over a masonry grave, the aggregate of the fees under this Rule and Rule I will be one and a half rupees for each square foot of ground occupied, but when the monument is of "stone or marble," the aggregate of the fees in question will be one rupee per square foot.

(4) The term "stone or marble" does not include "slate."

(5) The fees of Rs. 75 levied on a faculty, drawn in the case of non-Government churches by the present incumbents of the office of Registrar of the Diocese in Calcutta and Bombay, shall cease on a vacancy occurring in that appointment. The money is to be spent in charity as in the case of Government churches.

ORDER.—Ordered, that this Resolution be forwarded to the Government of the Punjab, with reference to the letter thence, No. 1527, dated the 2nd July 1883, and to other Local* Governments and Administrations for information; to the Public Works and Military Departments, and the Department of Finance and Commerce; to the Bishop's Chaplain, the Venerable the Archdeacon of Calcutta, and the Senior Chaplain of the Church of Scotland.

*Madras.	Central Provinces.
Bombay.	British Burma.
Bengal.	Assam.
North-Western Provinces and Oudh.	Coorg.
	Hyderabad.

Ordered further, that the Resolution be published in the Supplement to the *Gazette of India.*

J. WESTLAND,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASONS AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 27th NOVEMBER 1883.

GENERAL REMARKS.—With the exception of the Madras Presidency and one district in Assam, no rain is reported for the past week from any of the reporting stations. The want of rain has involved to a large extent the failure of the rice crop in Bengal and has greatly retarded the *rabi*. In all other Provinces the *rabi* prospects are fair, but the young crops in the North-Western Provinces and Oudh require rain. The *kharif* harvest and *rabi* sowings have been nearly completed in the Bombay Presidency and Central and Northern India. Some damage is still caused by locusts in one district of Bombay, but the plague has generally abated. In Sindh the river continues low.

The latest report received from Burma is for the week ending 17th November and shows that the paddy crop promises a good yield in spite of some damage from past unfavourable weather.

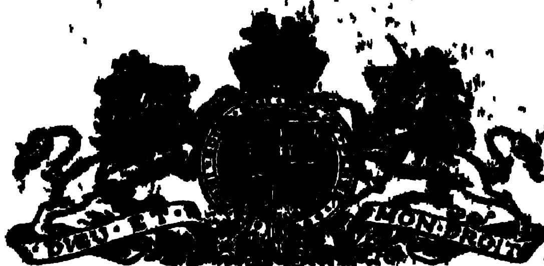
The public health is generally good, but slight cholera, small-pox, and fever exist in some provinces.

Prices remain unchanged except in Bengal, where they are unsteady.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects
Madras—(Nov. 28th)		
Bellary	. . . . .	Standing crops generally good; harvest paddy, *ragi*, yield average; *cholum*, *cumbu*, oil-seeds, below average; 36 deaths from cholera.
Kurnool	. . . . .	Standing crops good; harvest, yellow *cholum*, paddy, yield about average.
Ganjam	. . . . .	Standing crops generally good; fever, small-pox slight in one taluk.
Kistna	. . . . .	Dry paddy partially blighted in one taluk, otherwise standing crops good; harvest, black paddy, *cholum*, *korra*, yield below average; fever prevalent; small-pox, cattle-disease in parts.
Chingleput (Madras)	3·51 (average of 11 stations).	Standing crops good; harvest, *kar* and dry grains, yield half; eight deaths from cholera, small-pox slight.
Coimbatore	·8 (average of 14 stations).	Standing crops, *cumbu*, *cholum* damaged by excessive rain in two taluks, elsewhere fair; harvest paddy, *cholum*, *ragi*, *cumbu*, yield average; 350 deaths from cholera including those not reported last week; small-pox, cattle-disease in parts.
Tanjore	2·12 (average of 14 stations).	Standing crops generally good; harvest paddy, *cholum*, *ragi*, *cumbu*, yield below average; seventy-six deaths from cholera.
Madura	1·58 (average of 8 stations).	Standing crops fail; harvest, dry crops, yield about average; cholera severe in Madura town, and elsewhere slight.
Malabar	·85 (average of 10 stations).	Second crops progressing; cholera, fever, small-pox slight.
Travancore	·19	Standing crops good; fever in parts. *General Remarks.*—General prospects good.
Bombay—(Nov. 28th)		
Kurrachee	No rain	River at Kotri on 22nd, 5 feet 7 inches against 5 feet 8 inches on corresponding date of last year; one case of small-pox occurred in Kurrachee on 19th, imported by a lad who arrived from Makran on 15th; disease also prevalent in five villages in districts, four fresh cases, sixteen remaining sick; fever generally prevalent; cattle-disease in Gorabari and Sujawal talukas; early *rabi* crops coming on; prices—wheat, red rice and *bajri* in Kurrachee 24, 28 and 32; Sehwan 32 and 36; Sakro 16, 28 and 42, and Shahbandar 20, 32 and 40 lbs. per rupee, respectively.
Hyderabad	. . . .	Weather unseasonably warm; fever in eight, small-pox in three, and cattle-disease in four talukas; prices of grains steady.
Ahmedabad	. . . .	*Rabi* sowing progressing; slight fever in Viramgam, Dholka, and Modasa; *bajri* 29 and wheat 25½ pounds per rupee.
Baroda	. . . .	Slight cholera in Naosari mahal still continues; fever in some parts of Naosari and Kadi Divisions; harvesting of *kharif* and sowing of *rabi* almost completed; prices—*bajri* 33 and rice 24 pounds per rupee.
Surat	. . . . .	Crops healthy; fever and cholera more or less in some talukas; *juari* 37 and *nagli* 45 pounds per rupee.
Nasik	No rain	*Kharif* reaping and *rabi* sowing nearly completed; *rabi* crops where sown have germinated well; locusts have damaged crops in parts of Baglan, Kalwan, and Dindori; public health good; fever in Kalwan taluka; wheat 31, *bajri* 32, and rice 25 pounds per rupee.
Colaba (Bombay)	No rain	Abnormal temperature 0° to 3° cool; vapour in air defective; wind normal.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*concld.*		
Poona	. . . . .	Sowing of *rabi* nearly completed, *bajri* 44 and *juari* 52; in Poona *bajri* 34 and *juari* 43 pounds per rupee.
Ahmednagar	No rain	*Bajri* reaping finished; *rabi* sowing continued; locusts in Shrigonda cattle-disease in Newasa; *bajri*—maximum 55 pounds per rupee in Sheogaon, minimum 39 lbs. in Nagar; *juari*—maximum 72 lbs. in Jamkhed, minimum 54 lbs. in Sangamner.
Sholapore	No rain	Cholera in Malsiras taluka, 30 cases, 12 fatal; sowing of *rabi* completed; *juari* 63 and *bajri* 54 pounds per ruppee.
Dharwar	. . . . .	Rice crops being reaped; reaping of other early crops commenced sowing of late crops nearly completed; cholera at Medleri in Ranebennur, out of 5 cases, 4 fatal; fever in five and cattle-disease in one taluka; rice 25 to 41 and *juari* 45 to 88 pounds per rupee.
Kanara	. . . . .	Fever in Halliyal and Mundgud; small-pox in Kumpta and Honawar, 9 cases, 1 death in Siddapur; preparing land for cultivating second rice crops on coast; common rice at Karwar 11½, disrict average 15 seers per rupee.
Rajkot	. . . . .	Weather cold; fever continues in some parts; *bajri* 31 and *juari* 35 pounds per rupee. *General Remarks.*—River still falling in Sind; damage from locusts continues in parts of Nasik; *kharif* harvesting and *rabi* sowing completed in most districts; fever general: slight cholera and small-pox in seven, and cattle-disease in ten districts.
Bengal—(Nov. 29th)		
Chittagong	*Nil*	Yield of rice will not be favourable; earlier sorts of the crop being harvested; prices steady; cattle-disease lingers; public health good.
Dacca	*Nil*	Paddy being cut; sowing of pulses continues; prospects fair, but some damage to crops apprehended for want of rain.
24-Pergunnahs	*Nil*	Prospects of late rice continue unfavourable; average outturn estimated at from eight to ten annas; cultivation of *rabi* crops much hindered by want of rain; price of common rice varies from 12 to 19 seers per rupee; public health generally good; sporadic cases of cholera reported from the Baraset, Barrackpore, and Dum Dum sub-divisions, and fever prevalent in the Bussirhat sub-division.
Moorshedabad	*Nil*	Weather overcast; harvesting of late rice has commenced; the crop is a total failure, except on irrigated and low-lying lands; cold weather crops have generally suffered from drought, but *teel, arhar* and *kalai* are doing fairly well; prices falling slightly; public health good, except in the north, where fever is still prevalent.
Rajshahye	*Nil*	Some of the *amun* rice being reaped; in Nattore yield will not be good; transplanted paddy will be about a 4-anna crop; paddy on low lands may average 6 annas for the whole district; *rabi* crops want rain.
Burdwan	*Nil*	State of *amun* rice and *rabi* crops bad; sowing of *rabi* crops partially stopped for want of rain; sugarcane also suffering; public health fair.
Rungpore	*Nil*	Weather seasonable; prospects of *amun* rice bad, other crops fair; prices stationary; fever prevalent.
Bhagulpore	*Nil*	*Rabi* sowings still going on, the soil being moistened by irrigation wherever this is possible; prospects of *rabi* crops not good; a good deal of rice which suffered from drought has been cut as fodder price of rice 13 seers 14 chittacks per rupee.
Purneah	*Nil*	Prospects of crops not good; *rabi* sowings going on; price common rice 15 seers per rupee; much fever and a few cases of cholera reported.
Patna	*Nil*	Harvesting of paddy has commenced; *rabi* germinating well rain wanted; public health good.
Durbhanga	*Nil*	There will be a six to eight-anna rice crop in the north of the district, but less in the centre, and very little indeed in the south; unless rain falls within the next few days the *rabi* will be destroyed entirely; prices very high; fever very prevalent, though not in an epidemic form.
Hazareebagh	*Nil*	Weather clear and cold; harvesting of paddy continues; prospects of *rabi* crops not favourable owing to want of rain; common rice selling at 15 seers per rupee; general health good.
Cuttack	*Nil*	Earlier sorts of *sarad* rice being cut; later kinds flowering in some places; crops on high lands partially suffering from drought; common rice selling at 20 seers per rupee at Cuttack, and 28 to 36 seers in the interior; public health good. *General Remarks.*—There has been no rain in any part of the province; the rice crop has to a great extent failed, and will be very poor; the prospects of the *rabi* crops also are generally reported to be very unfavourable; want of rain is very much felt for the progress of the *rabi* sowings, and for the growth of the crops already sown; prices are high all over the province; in some districts they are rising still, in some they remain stationary, and in others they are falling slightly; fever, as usual at this season, is prevalent in some districts, otherwise the public health is satisfactory.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
N.-W. Provinces and Oudh—		
Benares . (Nov. 27th)	*Nil*	Prospects of *rabi* harvest good, but rain is somewhat wanted; health of men and cattle good; prices rising slightly.
Allahabad . (" 28th)	*Nil*	*Rabi* sowings nearly completed; crops doing well; irrigation where possible in progress, health good; prices risen; prospects good.
Gorakhpore . (" 26th)	*Nil*	*Rabi* prospects poor; prices slightly rising.
Jhansi . (" ")	*Nil*	Harvesting of *kharif* commenced; the area sown with *rabi* is smaller than usual and the crops are germinating.
Agra . (" 27th)	*Nil*	The *rabi* sowings continue with irrigation where possible; health good; prices steady.
Bareilly . (" ")	*Nil*	Prices steady; health of people and cattle good.
Meerut . (" ")	*Nil*	*Rabi* sowings completed; crops generally germinating well; rain would be beneficial; health good; prices steady and supplies sufficient.
Kumaun . (" ")	*Nil*	Clouds collected, but have gone; *rabi* germinating well; health good; cattle-disease still prevalent, but slighter; prices stationary.
Lucknow . (" ")	*Nil*	Weather cold with west wind; *bajri* and *mash* are being cut; cultivators irrigating their newly sown *rabi* crops; condition of people good; markets well supplied; prices stationary.
Partabgrah . (" ")	. . . . .	Prices show a slight rise; *rabi* sowings still continue; *jarhan* being cut everywhere; outturn in parts of Kunda fair, but in the remaining tahsils very poor; small-pox in one or two villages in Kunda tahsil; general health good.
Sitapur . (" ")	. . . . .	Clear during week with light west wind; *rabi* being irrigated; health good.
Fyzabad . (" ")	*Nil*	*Rabi* crops germinating fairly; condition of people good and of cattle normal; markets well supplied; prices almost steady.
Cawnpore . (" ")	*Nil*	Prospects of *rabi* crops on irrigated land good; sowing nearly finished; general health of people good and no sickness amongst cattle; prices cheaper.
Rae Bareli . (" 26th)	*Nil*	*Rabi* crops geminating fairly, *kharif* is being harvested; general health good, except a few cases of small-pox in tahsil Rae Bareli; markets well supplied; prices almost steady.
Farukhabad . (" 27th)	. . . . .	Weather seasonable, clear sky throughout the week; fever diminished; *rabi* well up, but rain wanted.
		General Remarks.—No rain has fallen; the *rabi* prospects are generally fair; the markets are sufficiently supplied, and prices in most districts steady; a few cases of small-pox are reported in Rae Bareli and Partabgarh, and there is some fever in Saharanpur and Farukhabad, otherwise the public health is good.
Punjab—		
Delhi . (Nov. 28th)	. . . . .	Health good; *rabi* sowings nearly completed; prices almost stationary.
Hissar . (" ")	. . . . .	Health good; crop prospects unchanged; prices steady.
Umballa . (" ")	. . . . .	Health good; *rabi* sowings in progress; prices stationary.
Jullundur . (" ")	. . . . .	Health good; *rabi* sowings in progress; prices steady.
Lahore . (" ")	. . . . .	Health and crop prospects good; prices stationary.
Ferozepur . (" ")	. . . . .	Health and crop prospects good; prices stationary.
Sialkot . (" ")	. . . . .	Health and crop prospects good; prices stationary.
Rawalpindi . (" ")	. . . . .	Health and crop prospects good; rise in prices.
Peshawar . (" ")	. . . . .	Small-pox and fever prevalent; prices falling.
Mooltan . (" ")	. . . . .	Health good; *rabi* sowings nearly finished; prices steady.
D. I. Khan . (" ")	. . . . .	Health and crop prospects good; prices stationary.
Amritsar . (" ")	. . . . .	Health good; prices fluctuating.
		General Remarks—There has been no rain during the week; the health of the province, except in the Peshawar district, is good; *rabi* sowings still continue, but are nearly finished.
Central Provinces—		
Nagpur . (Nov. 27th)	. . . . .	Weather cool and clear; rice and other crops being cut; *rabi* sowings finished; prices stationary.
Jubbulpore . (" ")	. . . . .	Weather clear and cold; *kharif* crops being reaped; cotton picking continues; *rabi* sowings progressing; prospects favourable; wheat 24 and rice 15 seers per rupee; health good.
Saugor . (" ")	. . . . .	Occasionally cloudy; *kharif* harvest in progress; *rabi* crops favourable; prices steady; health fair.
Seoni . (" ")	. . . . .	Weather clear and cold; reaping of rice progressing; fever unusually prevalent; prices stationary.
Hoshangabad (" ")	. . . . .	Weather seasonable; prospects good; *rabi* sowings completed; cotton picking in progress; fever prevalent; wheat 16 and rice 10 seers per rupee.
Raipur . (" ")	. . . . .	Weather cool and pleasant; harvesting of rice and *tili* continues; cotton picking in progress; *rabi* sowings finished; public health good; prices fluctuating; common rice 29¼ and wheat 26½ seers per rupee.
Sambalpur . (" 24th)	. . . . .	Weather cold and clear; prospects good; harvesting in progress; later rice ripening; health good; common rice 28¾ seers per rupee.
Khandwa . (" ")	. . . . .	Weather clear; *rabi* sowings continue; one death from cholera; prices steady.
		General Remarks.—*Kharif* harvesting almost completed; *rabi* sowings continue in some districts; prospects favourable; health fair.



Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
British Burma—		
Akyab (Nov. 17th)	. . . . .	Report not received.
Kyoukpyu . . .	. . . . .	Report not received.
Sandoway . . .	. . . . .	Report not received.
Rangoon (Nov. 17th)	. . . . .	One death from small-pox, otherwise public health good; paddy no supplies; prices nominal.
Hanthawaddy („ „)	. . . . .	Public health and health of cattle good; ploughing and sowing completed; paddy area about 1,720 acres more than last year; rain of past 8 or 10 days has done great good; if no more rain falls full crop expected; general appearance of crops good; prices of paddy from Rs. 90 to 95 per 100 baskets.
Pegu . . („ „)	For week ending 10th Nov. 1·32 For week ending 17th Nov. 3·50	Public health good; cattle-disease slight; scarcely any damage to crops from high winds last week; generally a great improvement on higher lands; prospects unusually good throughout; total rainfall 124 inches.
Tharrawaddy (Nov. 3rd)	0·10	Public health good; two deaths of cattle reported; about 251,606 acres of paddy land have been ploughed and 229,798 acres planted; crops reported in good condition; about 170 acres have been reaped in the Sangwe township; price of paddy from Rs. 95 to 115 per 100 baskets; total rainfall 100·07 inches.
„ . („ 10th)	3	Public health and health of cattle good; slight damage to crops in Gyobingook from floods; paddy area about 22,604 acres more than past year; the later paddy and the crops on high lands suffering in parts from drought; general appearance favourable; price of paddy Rs. 95 to 150 per 100 baskets; total rainfall 103·07 inches.
„ . („ 17th)	. . . . .	Report not received.
Prome . . .	4·53	Public health and health of cattle good; ploughed fields all planted out, but the area 1,379 acres less than last year; this decrease is attributed to deficient rainfall on higher lands; heavy rains of week have done some damage to plants in Paungde Sub-division but have on the whole much improved the prospects of crops throughout the district; price of paddy Rs. 85 per 100 baskets; total rainfall 52·69 inches.
Bassein . . .	14·87	Public health good; 17 deaths of cattle; heavy rain of week has irretrievably spoilt the reaped paddy, one-third of planted, and one-fifth of sown; ordinary crops, judging from fields near Bassein, are badly injured, only later crops have benefited; price of paddy Rs. 100 to 120 per 100 baskets; total rainfall 103·64 inches.
Thongwa . . .	6 87	Public health and health of cattle good; slight damage from drought reported from Shwelaung and Pautonaw townships and from wild elephants from Dedaye; price of paddy Rs. 85 to 100 per 100 baskets; total rainfall 94·09 inches.
Henzada . . .	5·90	Public health and health of cattle good; prospects of crops in Myanoung Sub-division much improved; great damage has been caused in Kyangin by floods; rice selling at Rs. 5 a basket; total rainfall 86·63 inches.
Thayetmyo . . .	6·28	Public health good; 56 deaths of cattle; crop mostly in ear; heavy rain of week has prevented much loss; crops will be two-fourths or one-half short; price of paddy Rs. 100 per 100 baskets; total rainfall 47·28 inches.
Amherst . . .	. . . . .	Public health and health of cattle good; ripening crops very good; reaping commenced; paddy area estimated to be 20,000 acres more than last year; some damage has been caused by drought and inundation by sea; season's loss has been averted by late rain.
Moulmein town . .	1·21	Public health and health of cattle good; about 1,315 acres under paddy; about 200 acres have been reaped, outturn about 5,000 baskets; wages of reaping 8 annas per day, by contract about Rs 3-4 per acre; condition of ripening paddy good; outlook favourable; opening price of paddy Rs. 88 per 100 baskets; total rainfall 166·28 inches.
Shwegyin . . .	1·30	Public health and health of cattle good; harvest prospects promising; price of paddy Rs. 88 per 100 baskets; total rainfall 139·52 inches.
Tavoy . . .	·65	Public health and health of cattle good; prospects of crops very good; reaping of early paddy progressing; total rainfall 195·44 inches.
Mergui . (Nov. 3rd)	1·15	Public health good; crops and cattle healthy; reaping has commenced in some places; but the main portion of the crops is unripe yet; 35 acres destroyed by flood; price of paddy Rs. 80 per 100 baskets; total rainfall 169·79 inches.
„ . („ 10th)	1·40	Public health good; cattle healthy; reaping has commenced in some places, but the main portion of the crop is unripe yet; price of paddy Rs. 80 per 100 baskets; total rainfall 171·19 inches.
Toungoo . .	·61	Public health and health of cattle good; prospects of crops good; total rainfall 9·08 inches.
		General Remarks.—Public health good; no excessive mortality among cattle except in Thayetmyo, where there has been a slight increase of disease; rainfall for the week has been considerably in excess of the fall last year in the same week; all over the province and in the four districts of the Irrawaddy Division, the fall has been heavy; Bassein had unprecedentedly heavy rain for this time of the year; the rain has on the whole done great good to the

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
		paddy crop; in Bassein however damage has been caused to some reaped paddy and to a considerable area of standing crop by the excessive rain; the prospects in the chief paddy-producing districts, Hanthawaddy, Pegu, Thongwa, Tharrawaddy, and Amherst, are excellent; a larger area is under paddy than last year, and full crops are expected; the prospects in Henzada, which is also a large paddy-growing and exporting district, are good; the rain appears to have come too late in Prome and Thayetmyo to retrieve the loss in crop and deficiency in cropped area caused by the past unseasonable drought; on the whole there is promise of a full crop on a larger area than last year.
Assam—		
Gauhati . (Nov. 28th)	No rain	Weather seasonable; mornings foggy; prospects of *sali* crops not satisfactory for want of rain; sowing of mustard in progress; public health fair.
Sylhet . . .	*Nil*	Prospects of crops fair; cholera and small-pox reported from parts of interior.
Cachar . . .	*Nil*	Weather cold; reaping of *sali* crops continues, sowing of winter crops not finished; common rice 16 seers per rupee; public health good.
Dibrugarh . . .	0·21	Weather cloudy; reaping of sali *dhan* commenced; cholera reported in the station.
Mysore and Coorg—		
Bangalore . . } Mysore . . . }	*Nil*	Crops in good condition, harvesting of *ragi* commenced; agricultural operations in active progress throughout the province; prospects good; cholera still prevalent in Davangere taluk, Shimoga district; public health otherwise good; no material change in prices.
Mercara . . .	*Nil*	Picking and pulping of coffee proceeding, outturn good and will fully realize estimates; rice crop ripening fast.
Berar & Hyderabad—		
Amraoti (Nov. 28th)	. . . .	Weather cool, *kharif* harvest in progress, *rabi* sowings continue; cotton picking in hand, wheat 16 and *juari* 26 seers per rupee.
Akola	. . .	Reaping of *kharif* crops and cotton picking progressing, *rabi* sowings continue.
Hyderabad (Nov. 28th)	*Nil*	Sowing of *rabi* and reaping of *abi* crops continue; fever and ague prevailing in some talukas; no cattle-disease; prices—wheat 15, coarse rice 11⅓, white *juari* 24, yellow *juari* 30, and *tur* 20¼ seers per current sicca rupee.
Central India States—		
Indore . (Nov. 28th)	*Nil*	Health good; weather seasonable; prices slightly less than last week.
Morar (Gwalior) . .	*Nil*	Health good; weather seasonable.
Sutna	*Nil*	Health good.
Neemuch	*Nil*	*Rabi* crops thriving, public health good.
Goona	. . . .	Health and prospects good.
Agar	*Nil*	Health and prospects good.
Nowgong	*Nil*	Weather fair, health good, prices falling.
Bhopawur . . } Manpur . . }	*Nil*	Prices stationary; sixteen cases of cholera reported at Dharampur, Dhar of which nine were fatal.
Sehore	*Nil*	Weather clear; crops and public health good.
Rajputana—		
Abu . (Nov. 28th)	. . .	Weather seasonable.
Sirohee . („ 25th)	. . .	Tanks, wells, and health good; crops being sown; weather seasonable.
Marwar . („ 23rd)	. . .	Three months' water in Jodhpore city; tanks and wells almost full, health good, *kharif* gathered; *rabi* sowing still continues; weather partially cloudy and moderately cold, night close and warm, [indi-]cations of rain. prices stationary.
Meywar . („ 25th)	. . . .	Tanks, wells, health, and crop prospects good; weather seasonable.
Harowtee . („ 24th)	. . . .	Weather seasonable; health good.
Jhallawar („ 23rd)	. . . .	Weather seasonable; health and prospects good.
Ajmere . („ 27th)	. . . .	*Rabi* sowings completed; weather cold and seasonable.
Jeypore . („ „)	. . . .	Weather seasonable; prices steady, health good.
Ulwur . („ „)	. . . .	*Rabi* sowing continues; prices steady; health good.

Government of India Notifications, Appointments, Promotions, &c.

LEGISLATIVE DEPARTMENT.

NOTIFICATIONS.

Fort William, the 4th December, 1883.

No. 21.—His Excellency the Viceroy and Governor General has been pleased to accept the resignation by the Hon'ble Sayyad Ahmad Khán, Bahádur, C.S.I., of his office of Additional Member of the Council of the Governor General for the purpose of making Laws and Regulations.

No. 22.—His Excellency the Viceroy and Governor General, under the authority vested in him by the Statute 24 & 25 Vic., cap. 67, section 10, has been pleased to nominate Mr. Amír Alí, Barrister-at-Law, to be an Additional Member of the Council of the Governor General for the purpose of making Laws and Regulations.

The 7th December, 1883.

No. 23.—The following Statutes are published for general information:—

45 & 46 VICT., CHAPTER 45.

An Act to make provision for the transfer of the Assets and Liabilities of the Provident Branch of the Bombay Civil Fund and other Funds to the Secretary of State for India in Council. [*18th August 1882.*]

WHEREAS an institution known as the Provident Branch of the Bombay Civil Fund (founded on the Bombay Civil Fund of earlier date) was established in Bombay under the authority given by the Court of Directors of the East India Company in a public despatch to the Governor in Council at Bombay, dated the thirty-first of December one thousand eight hundred and twenty-four, the said Provident Branch having a separate capital for making provision for such of the civil servants of the said company as should be obliged by ill-health to leave India either temporarily or permanently, and for the granting of annuities to the widows and children of its members and of portions for the children of members, and the said fund was supported by the subscriptions of the civil servants of the said company and by certain contributions from the said company;

And whereas in a Financial despatch to the Government of India, dated the twenty-first of July one thousand eight hundred and eighty-one, certain changes respecting the grant of annuities to widows were authorised by the Secretary of State for India in Council, and certain terms were stated on which the Secretary of State for India in Council was willing to take over the assets, liabilities, and management of the said institution:

And whereas in accordance with the instructions contained in the aforesaid despatch the Government of India caused the inquiry to be made, whether upon the terms offered by the Secretary of State for India in Council in the said despatch the subscribers to the said fund were willing to surrender the accumulated fund to the Secretary of State for India in Council; and the proposition so to make over the accumulated fund on the terms

offered by the Secretary of State for India in Council was carried in the affirmative by the subscribers by a large majority of votes :

And whereas in order to avoid any doubt that may arise in regard to the legality of such transfer it is necessary to make provision by law for enabling the trustees of the said fund to transfer the assets and liabilities thereof to the Secretary of State for India in Council, and for enabling the Secretary of State for India in Council to accept the same :

Be it therefore enacted by the Queen's most Excellent Majesty, by and with the advice and consent of the Lords Spiritual and Temporal and Commons, in this present Parliament assembled, and by the authority of the same, as follows :

Assets, &c., of Provident Branch of Bombay Civil Fund transferred to Secretary of State.

1. It shall be lawful for the trustees of the Provident Branch of the Bombay Civil Fund to transfer to the Secretary of State for India in Council the assets and liabilities of the fund, including any assets and liabilities to which the said trustees may have succeeded as representing the trustees of the earlier fund at Bombay, and for the Secretary of State for India in Council to accept the same.

Payments charged on said fund to be payable from revenues of India.

2. As soon as the assets and liabilities of the said fund, including as aforesaid, shall be transferred to the Secretary of State for India in Council, and the acceptance thereof by the Secretary of State for India in Council notified by the Government of India, all existing liabilities of the said fund shall be deemed to be liabilities of the revenues of India, and all such liabilities may be enforced against the Secretary of State for India in Council in like manner as they might have been enforced against the trustees of the said fund if this Act had not been passed ; and every civil servant, or widow or child of a civil servant, who shall at the date of such notification be an incumbent of an annuity from the said fund or from any earlier fund, the assets and liabilities of which shall have been transferred as aforesaid, shall be entitled to receive from time to time the amount of such annuity from the revenues of India ; and every civil servant, and every widow or child of a civil servant, who shall be a subscriber to the said fund, or shall be an incumbent annuitant of the said fund at or after the date of such notification, shall be entitled to the benefits to which they are entitled under the existing rules at the date of the passing of this Act, with the additional benefit in the case of widows of a pension of sixty pounds per annum, such additional benefit to take effect as from the first of April one thousand eight hundred and eighty-two.

Provided that nothing in this Act contained shall be held to preclude the Secretary of State for India in Council from assigning to the incumbents on and subscribers to the said fund, or to any such widow or child as aforesaid, any benefits in addition to those secured to them by this Act, if on considering the assets and liabilities of the said fund the Secretary of State for India in Council shall deem it reasonable so to do.

How notifications, &c., to be given.

3. All notifications or applications on the part of the subscribers to or beneficiaries under the said fund which are required or prescribed by the rules of the said fund as existing at the date of this Act shall be given and made in such manner and to such person or persons as the Secretary of State for India in Council shall from time to time appoint.

Powers of trustees of fund vested in Secretary of State.

4. From and after the passing of this Act there shall vest in the Secretary of State for India in Council all powers and authorities, discretionary or otherwise, which were prior to the date of this Act vested in the trustees of the said fund, or the subscribers thereto in general meeting : Provided always, that notwithstanding anything herein contained, the Secretary of State for India in Council shall, as far as may be practicable, conform to and adopt the practice heretofore followed in the management of the said fund.

Saving for subscribers' claims.

5. Provided that nothing in this Act shall prejudice any claim which may be made by any subscriber to or beneficiary under the said fund, or by the representatives of any such subscriber or beneficiary upon the funds so transferred, and in case any question shall arise between any such subscriber, or the representatives of any deceased subscriber, or the widow or a child of any such subscriber, or the representatives of any such widow or child on the one hand, and the Secretary of State for India in Council on the other, as to any liability or alleged liability of the said fund, such question shall be determined by Her Majesty's Court of Appeal in such manner as may be provided by any General Orders, or as the said Court may on special application think fit to prescribe, anything in the Statute of Limitations to the contrary notwithstanding.

Assets, &c., of Bengal and Madras Funds may be transferred to Secretary of State, after vote.

6. And whereas it may be expedient that the Secretary of State for India in Council should have authority in like manner to accept the transfer of the assets, liabilities, and management of other institutions, known as the Bengal Civil Fund and the Madras Civil Fund, with the consent of the subscribers to the said institutions respectively : It shall be lawful for the managers or trustees to make over the assets, liabilities, and management of both or either of the said funds, and for the Secretary of State for India in Council to take and assume the same upon such terms as the Secretary of State for India in Council may approve, if at any time hereafter it shall appear by a vote, specially taken for the purpose, that a majority of not less than three-fourths of the subscribers to those institutions who may vote upon the question are in favour of such transfer.

---

45 & 46 VICT., CHAPTER 55.

An Act to amend the Law with respect to the Charges on and Payments to the Mercantile Marine Fund, and to Expenses of Prosecutions for Offences committed at Sea. [*18th August 1882.*]

WHEREAS with a view to the adjustment of the receipts and expenditure under the Merchant Shipping Acts between the Mercantile Marine Fund and moneys provided by Parliament it is expedient to make the provision hereinafter mentioned :

Be it therefore enacted by the Queen's most Excellent Majesty, by and with the advice and consent of the Lords Spiritual and Temporal, and Commons, in this present Parliament assem-

lied, and by the authority of the same, as follows:—

Short title and construction.

1. This Act may be cited as the Merchant Shipping (Expenses) Act, 1882.

This Act shall be construed as one with the Merchant Shipping Acts, 1854 to 1880, and together with those Acts may be cited as the Merchant Shipping Acts, 1854 to 1882.

17 & 18 Vict. 104, &c.

Commencement of Act.

2. This Act (save as is in this Act otherwise expressly provided) shall come into operation on the first day of April, one thousand eight hundred and eighty-three, which day is in this Act referred to as the commencement of this Act.

Charges on Mercantile Marine Fund.

3. There shall be charged on and payable out of the Mercantile Marine Fund the following sums, so far as they are not paid by any private person:—

(a) The salaries of all surveyors and officers appointed, and all expenses incurred in connection with the survey and measurement of ships under the Merchant Shipping Acts, 1854 to 1876:

(b) The salaries and expenses of persons employed under the Passengers Act, 1855, as amended by the Merchant Shipping Act, 1872:

18 & 19 Vict. 119.

35 & 36 Vict. 73.

(c) The superannuation allowances, gratuities, pensions, and other allowances granted either before or after the passing of this Act to any of the said surveyors or persons:

(d) The expenses of obtaining depositions, reports, and returns respecting wrecks and casualties:

(e) The allowances and expenses paid for the relief of distressed British seamen and apprentices, including the expenses declared by any of the Merchant Shipping Acts, 1854 to 1882, to be payable as such expenses, and any contributions to seamen's refuges and hospitals:

(f) Any sums which the Board of Trade, in their discretion, think fit to pay in respect of claims to moneys carried to the Mercantile Marine Fund on account of the wages and effects of deceased seamen, or on account of the proceeds of wreck:

(g) All costs and expenses incurred by the Board of Trade under the Boiler Explosions Act, 1882 (so far as not otherwise provided for) including any remuneration paid in pursuance of section seven of that Act, and any costs and expenses ordered by the court in pursuance of that Act to be paid by the Board of Trade.

45 & 46 Vict. 22.

Payments to the Mercantile Marine Fund.

4. There shall be accounted for and paid to the Mercantile Marine Fund—

(a) All fees, charges, and expenses payable in respect of the survey or measurement of ships under the Merchant Shipping Acts, 1854 to 1876:

(b) All fees and other sums payable in respect of any services performed by any person employed under the authority of the Passengers Act, 1855, as amended by the Merchant Shipping Act, 1872:

(c) The net proceeds of wreck which otherwise would be payable into the Exchequer under section four hundred and seventy-five of the Merchant Shipping Act, 1854, as amended by section fifty-three of the Merchant Shipping Act Amendment Act, 1862:

25 & 26 Vict. c. 63.

(d) The moneys arising from the unclaimed wages and effects of deceased seamen, except where the same are required to be paid as directed by the Accountant General of Her Majesty's navy:

(e) All such sums in respect of expenses incurred with respect to distressed seamen and apprentices as are recovered by the Board of Trade under section two hundred and thirteen of the Merchant Shipping Act, 1854, and the enactments amending the same:

(f) All costs and expenses ordered by the court to be paid to the Board of Trade in pursuance of the Boiler Explosions Act, 1882.

All the fees in this section mentioned shall be paid at such times and in such manner as the Board of Trade from time to time direct.

Subsidy out of moneys provided by Parliament to the Mercantile Marine Fund.

5. There shall be paid to the Mercantile Marine Fund out of moneys provided by Parliament an annual sum of forty thousand pounds, or after the expiration of five years from the commencement of this Act such other sum as may be from time to time determined by the Commissioners of Her Majesty's Treasury, with the concurrence of the Board of Trade, having regard to the receipts and expenditure of the Mercantile Marine Fund under sections three and four of this Act.

Suspension of fees on engagements and discharges under 17 & 18 Vict. c. 104, s. 125.

6. The Board of Trade may, if they think fit, at any time after the passing of this Act, abolish or suspend the fees payable upon engagements and discharges effected before shipping masters in pursuance of section one hundred and twenty-five of the Merchant Shipping Act, 1854, and in the event of such abolition, or pending such suspension, no deduction shall be made in pursuance of section one hundred and twenty-six of the said Act from the wages of any person engaged or discharged.

Audit of accounts of Mercantile Marine Fund.

7. The accounts of the Mercantile Marine Fund shall be deemed to be public accounts within the meaning of section thirty-three of the Exchequer and Audit Departments Act, 1866, and shall be examined and audited accordingly.

29 & 30 Vict. c. 39.

Grant of pension to existing officers.

8. Where a surveyor appointed under the Merchant Shipping Acts, 1854 to 1876, or a person employed under the Passengers Act, 1855, has in pursuance of section thirty-nine of the Merchant Shipping Act, 1876, received during part of his term of service his salary out of moneys provided by Parliament, his service during the period that his salary was paid out of moneys provided by Parliament, and his service during the period that his salary was paid out of the Mercantile Marine Fund shall be reckoned indifferently as the same service for the purpose of entitling him to any superannuation allowance, gratuity,

39 & 40 Vict. c. 80.

pension, or other allowance, out of the Mercantile Marine Fund.

Costs of prosecution for offences committed at sea.

9. Such costs and expenses of and incidental to any prosecution for a felony or misdemeanour as are by law payable out of any county or other local rate shall, where such felony or misdemeanour was committed within the jurisdiction of the Admiralty of England, be paid in the same manner and subject to the same regulations as if such felony or misdemeanour had been committed in the county in which the same is heard and determined, or when the same is heard and determined at the Central Criminal Court as if the same had been committed in the county of Middlesex, and all sums properly paid out of any county or other local rate in respect of the said costs and expenses shall be repaid out of moneys provided by Parliament.

The expenses under section two hundred and sixty-eight of the Merchant Shipping Act, 1854, of imprisoning any such offender as therein mentioned, and of conveying him and the witnesses to the United Kingdom, or to such British possession as mentioned in that section, in any manner other than in the ship to which they respectively belong, shall, where not paid as part of the costs of the prosecution, be paid out of moneys provided by Parliament.

Repeal.

10. The Acts in the Schedule to this Act shall be repealed to the extent in the third column of that Schedule mentioned, without prejudice to anything done or suffered, or any right acquired or accrued in pursuance of the enactments hereby repealed.

SCHEDULE.

ENACTMENTS REPEALED.

A description or citation of a portion of an Act in this Schedule is inclusive of the word section or other part first and last mentioned, or otherwise referred to as forming the beginning or as forming the end of the portion described in the description or citation.

Section and chapter.	Title.	Extent of Repeal.
7 Geo. 4 c. 64	An Act for improving the administration of criminal justice in England.	Section twenty-seven.
4 & 5 Will. 4. c. 36	An Act for establishing a new court for the trial of offences committed in the metropolis and parts adjoining.	Section twenty-two from "and that it shall and may be lawful for any three" to the end of the section.
7 & 8 Vict. c. 2	An Act for the more speedy trial of offences committed on the high seas.	Section one from "and it shall be lawful for the court to order" to the end of the section.
17 & 18 Vict. c. 104	The Merchant Shipping Act, 1854.	Section two-hundred and two from "and subject to the provision hereinafter contained" to the end of the section. Section two hundred and eleven from "out of any money applicable" to "for the purpose." Section two hundred and sixty-eight from "and the expense of imprisoning" to the end of the section. Section four hundred and twenty-eight.
39 & 40 Vict. c. 80	The Merchant Shipping Act, 1876.	Section thirty-nine from the beginning down to "vested in the Board of Trade," and the words "there may be paid out of moneys provided by Parliament all costs and compensation payable by the Board of Trade in pursuance of this Act."
40 & 41 Vict. c. 44	The Superannuation (Mercantile Marine Fund Officers) Act, 1877.	The whole Act.

45 & 46 VICT. CHAPTER 76.

An Act to amend the Merchant Shipping Acts, 1854 to 1880, with respect to Colonial Courts of Inquiry. [*18th August 1882.*]

17 & 18 Vict. c. 104, &c.

WHEREAS it is expedient to amend the Merchant Shipping Acts, 1854 to 1880, with respect to Inquiries held in British possessions abroad into charges of incompetency or misconduct on the part of masters, mates, or engineers of ships, or into shipwrecks or other casualties affecting ships:

Be it enacted by the Queen's most Excellent Majesty, by and with the advice and consent of the Lords Spiritual and Temporal, and Commons, in this present Parliament assembled, and by the authority of the same, as follows:

Short title.

1. This Act may be cited as the Merchant Shipping (Colonial Inquiries) Act, 1882.

Construction of Act.

2. This Act shall be construed as one with the Merchant Shipping Act, 1854, and the Acts amending the same, and the said Acts and this Act may be cited collectively as the Merchant Shipping Acts, 1854 to 1882.

Colonial courts or tribunals to have jurisdiction to make inquiry into charges of misconduct or incompetency and shipping casualties in certain cases occurring outside the limits of the colony.

3. Every court or tribunal which is already authorised or which may hereafter be authorised by the legislative authority in any British possession to make inquiry into charges of incompetency or misconduct on the part of masters, mates, or engineers of ships, or as to shipwrecks or other casualties affecting ships, shall in the cases following; that is to say,

I. When the incompetency or misconduct has occurred on board of a British ship on or near the coasts of the British possession or on board of a British ship in the course of a voyage to a port within the British possession:

II. When the incompetency or misconduct has occurred in any part of the world on board a British ship registered in the British possession:

III. When the shipwreck or casualty occurs to a British ship on or near the coasts of the British possession or to a British ship in the course of a voyage to a port within the British possession:

IV. When the shipwreck or casualty occurs in any part of the world to a British ship registered in the British possession:

V. When the master, mate, or engineer of a British ship who is charged with incompetency or misconduct on board of such British ship is found in the British possession:

VI. When some of the crew of a British ship which has been wrecked or to which a casualty has occurred, and who are competent witnesses to the facts, are found in the British possession:

wherever the incompetency, misconduct, shipwreck, or casualty has occurred, have the same jurisdiction as such court or tribunal would have had if such incompetency, misconduct, shipwreck, or casualty had occurred within the ordinary jurisdiction of such court or tribunal, but subject to all provisions, restrictions, and conditions which would have been applicable if they had so occurred: Provided that no inquiry shall be held under this Act into any shipwreck, or other casualty, or charge of incompetency or misconduct, which has once been the subject of such an inquiry and has been reported on by any competent court or tribunal in any part of Her Majesty's dominions, or in respect of which the certificate of a master, mate, or engineer has been suspended or cancelled by a naval court; and provided also, that where any inquiry has been commenced in the United Kingdom no inquiry shall be made in the same case under the authority of this Act in any British possession.

In all the above cases the "British possession" shall mean the British possession by the legislative authority whereof the court or tribunal is authorised to make inquiry.

Colonial legislative authorities empowered to authorise inquiries into shipping casualties and charges of misconduct and incompetency in certain cases.

4. The legislative authority in any British possession is hereby empowered to authorise courts or tribunals to make inquiries in the cases enumerated in the last preceding section of this Act into charges of incompetency or misconduct on the part of masters, mates, or engineers of ships, or as to shipwrecks or other casualties affecting ships, subject to the provisions in the last preceding section of this Act mentioned.

Suspension or cancellation of certificates.

5. The powers of suspending or cancelling the certificate of any master, mate, or engineer of a ship, conferred by the provisions of the Merchant Shipping Acts, 1854 to 1880, upon or after any inquiry or investigation held under the provisions of the said Acts, shall be applicable to and be exercised upon or after any inquiry by any court or tribunal authorised by this Act, or authorised by the legislative authority of any British possession under the powers conferred by this Act. Such power of suspension or cancellation shall be exercised by the court or tribunal holding the inquiry in the manner provided by section twenty-three of the Merchant Shipping Act Amendment Act, 1862, and the Board of Trade shall in such cases have all the powers conferred upon them by the said section.

[25 & 26 Vict. c. 63.]

Appeal from colonial courts.

6. Whenever any inquiry authorised by or in pursuance of this Act has been held, a rehearing for the case may be ordered, and if an application for such rehearing has not been made or has been refused, an appeal shall lie from any order of finding of the court or tribunal holding such inquiry to the following court, namely, the Probate, Divorce, and Admiralty Division of Her Majesty's High Court of Justice in England.

Provided always, that no appeal shall lie from any order or finding in an inquiry into a casualty affecting a ship registered in a British possession, or from any decision respecting the suspension or cancellation of the certificate of a master, mate, or engineer, unless such certificate has been granted under the authority of the Merchant Shipping Act, 1854, or any Act amending the same, or of the Merchant Shipping Colonial Act, 1869.

32 & 33 Vict. c. 11.

Any such appeal shall be subject to and conducted in accordance with such conditions and regulations as may from time to time be prescribed by general rules made under section thirty of the Merchant Shipping Act, 1876.

39 & 40 Vict. c. 80.

Repeal of part of 17 & 18 Vict. c. 104, s. 242.

7. The words "and such report is confirmed by the governor or person administering the government of such possession" in case (V) of the cases enumerated in section two hundred and forty-two of the Merchant Shipping Act, 1854, are hereby repealed, and this repeal shall be deemed to take effect as if the said words had been expressly repealed by the Merchant Shipping Act Amendment Act, 1862. The confirmation of the report required by the said words shall be deemed to have been no longer necessary after the passing of the Merchant Shipping Act Amendment Act, 1862, as a condition precedent to the suspension or cancellation of the certificate of any master, mate, or engineer.

---

45 & 46 VICT. CHAPTER 79.

An Act to make provision for the arrangement of Accounts between the Commissioners of Her Majesty's Treasury and the Secretary of State in Council of India in respect of certain Home Charges for Her Majesty's Forces serving in India. [18th August 1882.]

WHEREAS certain home charges of Her Majesty's forces serving in India payable out of the revenues of India are defrayed in the first instance out of the Exchequer, and under an arrangement in force since the thirty-first day of March one thousand eight hundred and seventy advances were from time to time made out of the revenues of India to the Exchequer by way of repayment of those charges, and the actual expenditure was to be subsequently ascertained and adjusted:

And whereas differences have been pending between the Secretary of State for the War Department and the Secretary of State in Council of India which prevented such adjustment, and in consequence the accounts of the said actual expenditure fell into arrear; so that while the claim on the part of the Exchequer for the period from the thirty-first day of March one thousand eight hundred and seventy to the thirty-first day of March one thousand eight hundred and seventy-seven amounted to three million three hundred and two thousand two hundred and forty-six pounds eleven shillings and eight pence the total amount advanced by way of repayment to the Exchequer out of the revenues of India amounted only to two million eight hundred and ninety thousand pounds, and the balance claimed by the Commissioners of Her Majesty's Treasury as due to the Exchequer, but disputed in part by the Secretary of State in Council of India, amounted to four hundred and twelve thousand two hundred and forty-six pounds eleven shillings and eight pence,

which balance was reduced by a subsequent settlement of twenty-one thousand six hundred and thirty-five pounds to a net claim of three hundred and ninety thousand six hundred and eleven pounds eleven shillings and eight pence as due to the Exchequer but in part disputed as before mentioned:

And whereas the Commissioners of Her Majesty's Treasury, by a Minute dated the second day of July one thousand eight hundred and seventy-eight, proposed as an arrangement of the said differences and accounts that the sums actually advanced out of the revenues of India to the Exchequer by way of repayment of the said charges during the years abovementioned should be taken in full discharge of all the claims of the Exchequer upon the revenues of India in respect of the aforesaid charges:

And whereas it is expedient to sanction the said arrangement:

Be it therefore enacted by the Queen's most Excellent Majesty, by and with the advice and consent of the Lords Spiritual and Temporal, and Commons, in this present Parliament assembled, and by the authority of the same, as follows:

Short title.

1. This Act may be cited as the India (Home Charges Arrears) Act, 1882.

Sanction of arrangement of Treasury Minute of 2nd July, 1878.

2. The arrangement of the above-recited differences and accounts proposed in the said Minute of the Commissioners of Her Majesty's Treasury, dated the second day of July one thousand eight hundred and seventy-eight, is hereby sanctioned.

---

46 & 47 VICT. CHAPTER 30.

An Act to authorise Companies registered under the Companies' Act, 1862, to keep Local Registers of their Members in British Colonies. [20th August 1883.]

WHEREAS many companies registered under the Companies Act, 1862, carry on business in British colonies, and dealings in their shares are frequent in such colonies, but delay, inconvenience, and expense are occasioned by reason of the absence of any legal provision for keeping local registers of members, and it is expedient that such provisions as this Act contains be made in that behalf:

Be it therefore enacted by the Queen's most Excellent Majesty, by and with the advice and consent of the Lords Spiritual and Temporal, and Commons, in this present Parliament assembled, and by the authority of the same, as follows:

Short title and construction.

1. This Act may be cited for all purposes as the Companies (Colonial Registers) Act, 1883; and this Act shall, so far as is consistent with the tenor thereof, be construed as one with the Companies Acts, 1862 to 1880, and the said Acts and this Act may be referred to as the Companies Acts, 1862 to 1883.

Definitions.

2. In this Act the term "company" means a company registered under the Companies Act, 1862, and having a capital divided into shares; the term "shares" includes stock; the term "colony" does not include any place within the United Kingdom, the Isle of Man, or the Channel Islands, but includes such territories as may for the time being be vested in Her Majesty by virtue of an Act of Parliament for the Government of India, and any plantation, territory, or settlement situate elsewhere within Her Majesty's dominions.

Power for companies to keep colonial registers.

3. (1) Any company whose objects comprise the transaction of business in a colony may, if authorised so to do by its regulations, as originally framed or as altered by special resolution, cause to be kept in any colony in which it transacts business a branch register or registers of members resident in such colony.

(2) The company shall give to the registrar of joint stock companies notice of the situation of the office where any such branch register (in this Act called a colonial register) is kept, and of any change therein, and of the discontinuance of any such office in the event of the same being discontinued.

(3) A colonial register shall, as regards the particulars entered therein, be deemed to be a part of the company's register of members, and shall be *primâ facie* evidence of all particulars entered therein. Any such register shall be kept in the manner provided by the Companies Acts, 1862 to 1880, with this qualification, that the advertisement mentioned in section thirty-three of the Companies Act, 1862, shall be inserted in some newspaper circulating in the district wherein the register to be closed is kept, and that any competent court in the colony where such register is kept shall be entitled to exercise the same jurisdiction of rectifying the same as is by section thirty-five of the Companies Act, 1862, vested, as respects a register, in England and Ireland in Her Majesty's superior courts of law or equity, and that all offences under section thirty-two of the Companies Act, 1862, may, as regards a colonial register, be prosecuted summarily before any tribunal in the colony where such register is kept having summary criminal jurisdiction.

25 & 26 Vic. c. 89.

(4) The company shall transmit to its registered office a copy of every entry in its colonial register or registers as soon as may be after such entry is made, and the company shall cause to be kept at its registered office, duly entered up from time to time, a duplicate or duplicates of its colonial register or registers. The provisions of section thirty-two of the Companies Act, 1862, shall apply to every such duplicate, and every such duplicate shall, for all the purposes of the Companies Acts, 1862 to 1880, be deemed to be part of the register of members of the company.

(5) Subject to the provisions of this Act with respect to the duplicate register, the shares registered in a colonial register shall be distinguished from the shares registered in the principal register, and no transaction with respect to any shares registered in a colonial register shall, during the continuance of the registration of such shares in such colonial register, be registered in any other register.

(6) The company may discontinue to keep any colonial register, and thereupon all entries in that register shall be transferred to some other colonial register kept by the company in the same colony, or to the register of members kept at the registered office of the company.

(7) In relation to stamp duties the following provisions shall have effect:—

(*a*) An instrument of transfer of a share registered in a colonial register under this

Act shall be deemed to be a transfer of property situated out of the United Kingdom, and unless executed in any part of the United Kingdom shall be exempt from British stamp duty.

(b) Upon the death of a member registered in a colonial register under this Act, the share or other interest of the deceased member shall for the purposes of this Act so far as relates to British duties be deemed to be part of his estate and effects situated in the United Kingdom for or in respect of which probate or letters of administration is or are to be granted, or whereof an inventory is to be exhibited and recorded in like manner as if he were registered in the register of members kept at the registered office of the company.

(8) Subject to the provisions of this Act, any company may, by its regulations as originally framed, or as altered by special resolution, make such provisions as it may think fit respecting the keeping of colonial registers.

---

46 & 47 VICT. CHAPTER 58.

An Act to amend the Post Office (Money Orders) Acts, 1848 and 1880, and extend the same to Her Majesty's Dominions out of the United Kingdom. [*25th August 1883.*]

43 & 44 Vict. c. 33.

WHEREAS by the Post Office (Money Orders) Act, 1880, it is provided that, subject to the Post Office regulations as defined by that Act, the Postmaster General, with the consent of the Treasury, may authorise his officers to issue orders in the form set forth in the schedule to that Act, subject to the proviso that the order shall be for one of the amounts therein named, and in respect thereof the poundage therein named shall be taken for the use of Her Majesty:

And whereas it is expedient to make such further provision respecting the same as hereinafter appears:

Be it enacted by the Queen's most Excellent Majesty, by and with the advice and consent of the Lords Spiritual and Temporal, and Commons, in this present Parliament assembled, and by the authority of the same, as follows:

Alteration of form of orders.

1. Notwithstanding anything in the Post Office (Money Orders) Act, 1880, any of the orders issued in pursuance of that Act shall, in lieu of the form specified in that Act, be in the form set forth in the Schedule to this Act with such modifications as may be prescribed.

Alteration of amounts of orders.

2. An order issued in pursuance of the Post Office (Money Orders) Act, 1880, shall be for the prescribed amount not exceeding twenty shillings, and there shall be taken in respect thereof, for the use of Her Majesty, the prescribed poundage not exceeding two pence.

Issue of orders by officers of the Crown.

3. The Postmaster General may, if the post office regulations so provide, authorise any person holding office under the Crown to issue an order in pursuance of the Post Office (Money Orders) Act, 1880, and a person so authorised shall be deemed for the purpose of the issue and payment of such order, to be an officer of the Postmaster General and of the Post Office within the meaning of the said Act.

Extension of 43 & 44 Vict. c. 33, respecting money orders to British possessions.

4. (1) Whereas by reason of the form of the order issued under the Post Office (Money Orders) Act, 1880, and of the provisions of that Act authorising the issue thereof by officers of the Postmaster General only, doubts have arisen with respect to the application of the Post Office (Money Orders) Act, 1880, to orders issued in pursuance of arrangements made with the governments of Her Majesty's dominions out of the United Kingdom, and it is expedient to remove such doubts: Be it therefore enacted as follows:

Where an arrangement is made with the Government of any British possession for the transmission of small sums through the post offices of the United Kingdom and such British possession by means of money orders, of a like character to those issued under the Post Office (Money Orders) Act, 1880, as amended by this Act, the said Act, as amended by this Act, shall, so far as is consistent with the tenour thereof, and subject to the prescribed modifications, apply in like manner as if an order issued in pursuance of such arrangement, whether by an officer of the Post Office or of such British possession, was an order under the said Act, as amended by this Act, and such portions of the said Act as enact punishments shall apply accordingly.

Provided that—

(a) Any Post Office regulations in relation to any money orders issued in pursuance of any such arrangement as aforesaid may differ from the regulations respecting any other money orders; and

(b) Any money orders issued in pursuance of any such arrangement as aforesaid may be of such amount not exceeding the maximum amount in this Act mentioned and in such form and subject to such conditions respecting poundage, commission, the periods during which they are payable and other matters, as the Treasury, on the recommendation of the Postmaster General, may direct.

(2) In this section the expression "United Kingdom" includes the Channel Islands and the Isle of Man, and the expression "British possession" means any part of Her Majesty's dominions other than the United Kingdom, the Channel Islands, and the Isle of Man.

Commencement of Act.

5. This Act shall come into operation on the first day of January one thousand eight hundred and eighty-four.

Construction of Act.

6. This Act shall be construed as one with the Post Office (Money Orders) Acts, 1848 and 1880.

Short title.

11 & 12 Vict. c. 88. 43 & 44 Vict. c. 33.

7. This Act may be cited as the Post Office (Money Orders) Act, 1883, and together with the Post Office Money Orders Acts, 1848 and 1880, may be cited as the Post Office (Money Orders) Acts, 1848 to 1883.

8. The Post Office (Money Orders) Act, 1880, is hereby repealed to the extent mentioned in the third column of the second schedule to this Act;

Partial repeal of 43 & 44 Vict. c. 33.

Provided that all money orders issued before the commencement of this Act shall have effect, and be paid in like manner in all respects as if this Act had not passed.

FIRST SCHEDULE.

FORM OF ORDER.

Section 1.

[No. of Order.]

5s.*

Postal Order for* [five shillings].

To the Postmaster in charge of the money order office at† , pay to† at any time within three calendar months from the last day of the month of issue the sum of* [five shillings] on account of Her Majesty's Postmaster General.

Inland Revenue Stamp. Postal Order, *[One Penny.]

_______________Postmaster.

* Alter according to amount.

† The person to whom this order is issued must, before parting with it, fill in the name of the person to whom the amount is to be paid, and may fill in the name of the money order office at which the amount is to be paid.

Except when the order is paid through a banker, the person so named must sign the receipt at the foot hereof, and must also fill in the name of the money order office if that has not already been done.

Paying Office Stamp, with date cancelling this Order.

1. If this order be crossed " & Co.," payment will only be made through a banker, and if the name of a banker is added payment will only be made through that banker.

2. After this order has once been paid,—to whomsoever it is paid,—the Postmaster General will not be liable for any further claim.

3. If any erasure or alteration be made, or if this order be cut, defaced, or mutilated, payment may be refused.

4. The regulations under which this order is issued allow the postmaster to refuse or delay the payment of this order, but he must at once report his reasons for so doing to the Postmaster General.

5. After the expiration of three months from the last day of the month of issue this order will be payable only on payment of a commission equal to the amount of the original poundage, with the addition (if more than three months have elapsed since the said expiration) of the amount of the original poundage for every further period of three months which has so elapsed, and for every portion of any such period of three months over and above every complete period.

Received the abovenamed sum.

_______________, Signature.

SECOND SCHEDULE.

Section 8.

ACT REPEALED.

Section and Chapter.	Title.	Extent of Repeal.
43 & 44 Vict. c. 33	The Post Office (Money Orders) Act, 1880.	In section one, the first proviso, namely, from "any such order" down to "twenty shillings two pence"; and the Schedule.

D. FITZPATRICK,
Secretary to the Government of India.

PAGE 143.

Section 14.

Add the following to this Section :—

If the absence exceeds a month, an officer is not entitled to draw his local allowance for any part of the absence. This rule applies also to an officer in receipt of Presidency allowance at a Presidency town who is absent from the Presidency town on duty connected with his office; but an officer in receipt of house-rent at a Presidency town may, during absence from the Presidency town, whether on other duty or on duty connected with his office, continue to draw his house-rent, provided the term of his absence does not exceed two months, exclusive of the months of departure and return; if the absence exceeds this term, the house-rent is not admissible for any part of the absence. A claim to house-rent under this rule must be supported by a certificate by the officer that his previous rate of expenditure for a house at the Presidency town continued during his absence.

PAGES 164 AND 165.

Section 75.

Insert the following as Rule 4A:—

4A. A local allowance may be drawn by an officer on privilege leave provided that it is not drawn by his *locum tenens*.

[NOTE.—An officer on privilege leave may draw Presidency allowance or Presidency house-rent, provided that no extra expense is thereby caused to the State.]

Cancel Rules 9 and 10.

The 6th December 1883.

No. 1755.—The services of Major-General J. F. Tennant, R.E., C.I.E., Mint Master, Calcutta, are placed at the disposal of the Military Department, with effect from the 10th January 1884.

No. 1751.

RESOLUTION,—By the Government of India, Department of Finance and Commerce.

Read—

Letter from the Mint Master, Calcutta, No. 858, dated 27th September 1883, forwarding the Administration Reports of the Mints at Calcutta and Bombay for the year 1882-83.

RESOLUTION.—The value of gold received in the Calcutta Mint from private persons during 1882-83 amounted to Rs. 1,88,216 against Rs. 2,80,393 in the

previous year, thus showing a decrease of Rs. 42,174. The net imports of gold into India during the year amounted to Rs. 4,93,08,715, so that, as in former years, but a fraction of the large quantity of gold imported into the country found its way into the Mints. Silver amounting to Rs. 81,00,533 was received from private persons in the year under review. That received in 1881-82 was Rs. 61,11,750. The amount transferred for coinage from the Paper Currency Department was Rs. 88,58,710 against Rs. 55,60,066 in the previous year.

2. In the Bombay Mint the sum transferred by the Paper Currency Department for coinage in 1882-83 was Rs. 4,25,82,408 against Rs. 1,54,06,664 in 1881-82. Uncurrent coin to the value of Rs. 23,14,549 was received against Rs. 19,71,168 in the previous year. Old Portuguese coin, amounting to Rs. 8,61,564, was also received at that Mint for recoinage, the amount so received in 1881-82 having been Rs. 9,97,034. The total coinage of gold, silver, and copper at each Mint is shown separately for the last four years in the following table:—

	Calcutta.				Bombay.			
	1879-80.	1880-81.	1881-82.	1882-83.	1879-80.	1880-81.	1881-82.	1882-83.
Tale of pieces of all kinds	74,181,243	24,408,796	17,785,160	90,298,537	81,215,596	31,086,936	22,207,320	71,076,831
Value—	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Gold	1,46,040	1,33,545	3,39,705	1,74,945	1,258	...	...	...
Silver	2,13,54,164	1,05,09,825	84,77,510	1,42,99,076	8,12,15,511	3,19,86,936	1,33,85,242	5,07,85,494
Copper	7,07,900	1,85,600	39,050	8,62,580	...		50,009	2,14,214
Total	2,22,08,104	1,08,28,970	88,57,165	1,53,36,601	8,12,16,769	3,19,86,936	1,34,35,251	5,09,99,708

4. Gold was coined in the Calcutta Mint to the value of Rs. 1,74,945 against Rs. 3,39,705 in 1881-82. The increase in the coinage in 1881-82 is attributed by the Mint Master to a larger influx of gold and to a desire to increase the balance in the Bank, in order to avoid the necessity of further coinage until after repairs to the Mint could be effected. In the Bombay Mint 1,050 medallions were struck for the Travancore Government (350 of the value of sovereigns and 700 of half sovereigns), but the value was not brought to account in the year under review, as the amount of the bill was paid by the State during the current official year. No gold was coined either in 1880-81 or 1881-82.

5. The coinage of silver at both Mints during 1882-83 largely exceeded that of the previous year, amounting in value to Rs. 6,50,84,570 against Rs. 2,18,62,752 in 1881-82. The Calcutta Mint struck a larger number of coins than the Mint at Bombay, but the value of the total coinage in Bombay was greater, more rupees having been coined than at Calcutta. The increased coinage of silver is due chiefly to short sales of bills by the Secretary of State during a portion of the year. As bills were not offered for sale below a certain rate, it was found more profitable to import silver than to buy bills.

6. The copper coinage of the Calcutta Mint amounted to Rs. 8,62,580 against Rs. 2,14,214 at Bombay. The coinage in Bombay includes Rs. 8,10,561 and Rs. 4,941 worth of silver and copper coins struck for the Portuguese Government. The copper coins were struck in 1881-82, but issued to the copper coin depôt during the year under review.

7. The net imports of silver and the coinage in each year from 1872-73 are—

	Net imports. Lakhs.	Coinage. Lakhs.
1872-73	72	393
1873-74	249	237
1874-75	464	490
1875-76	155	255
1876-77	720	627
1877-78	1,468	1,618
1878-79	397	721
1879-80	787	1,025
1880-81	389	425
1881-82	538	219
1882-83	748	651

8. Besides imported silver, bullion in the form of native coin and ornaments was received for coinage in the Bombay Mint as follows—

	Native silver ornaments. Lakhs.	Native coin. Lakhs.
1877-78	124	...
1878-79	116	67
1879-80	92	45
1880-81	10	25¼
1881-82	4	1
1882-83	½	15½

The native coins tendered in 1882-83 were more by 14½ lakhs than in the previous year.

9. The operative losses during the year 1881-82 and 1882-83 were respectively,—in Calcutta Rs. 61,103 and 1,05,258, and in Bombay Rs. 36,908 and 94,289. These sums include losses on account of the withdrawal of old coins to the extent of Rs. 48,883 and 68,455 in the Calcutta Mint, and Rs.15,184 and 29,694 in the Bombay Mint.

10. The proportion of loss in the melting of silver in Calcutta during 1882-83 is stated to be Rs. 40·9 per lakh of tolahs against Rs. 39·8 in Bombay. The loss in both Mints is slightly in excess of that for the year 1881-82.

11. The proportion of loss in the coining of silver in the number of pieces of coins coined at Calcutta during 1882-83 was Rs. 44·1 per lakh against Rs. 53·3 at Bombay. If calculated on the value of the coinage for the year, the rate per lakh would be for Calcutta Rs. 99·2, while at Bombay the proportion is taken, after making certain adjustments, at Rs. 61·2.

12. In accordance with instructions conveyed in the Resolution in this Department, No. 401, dated 22nd January 1883, the charge for interest on capital sunk in the Mints has been reduced from 4½ to 4 per cent., and interest has been calculated on the average balance of silver actually locked up in the Mints and not available for other purposes during the year, whether such silver is held on behalf of the General Treasury or of the Paper Currency Department.

13. The total revenue of each of the Mints and the total charges to be made against them from 1878-79 to 1882-83, according to the new classification, are shown below :—

	REVENUE.		EXPENDITURE.	
	Calcutta.	Bombay.	Calcutta.	Bombay.
	Rs.	Rs.	Rs.	Rs.
1878-79 . . .	5,41,985	11,59,614	11,42,489	9,80,356
1879-80 . . .	5,17,277	18,51,834	10,60,646	11,06,803
1880-81 . . .	2,32,366	6,41,704	8,61,901	7,74,325
1881-82 . . .	2,11,295	3,83,528	8,90,413	6,45,716
1882-83 . . .	2,70,213	11,57,658	10,51,988	9,42,708
TOTAL .	17,73,136	51,94,338	50,07,437	44,49,911

The total revenue of both Mints during the last five years has been Rs. 69,67,474, and the total charges Rs. 94,57,348, showing a total loss for this period of Rs. 24,89,874, or an average annual loss of Rs. 4,97,975. The chief item under receipts is the seignorage duty of 2 per cent. on silver coined.

14. The expenditure on account of salaries and establishments in the two Mints was as follows:—

	CALCUTTA.		BOMBAY.	
	1881-82.	1882-83.	1881-82.	1882-83.
	Rs.	Rs.	Rs.	Rs.
Fixed establishment	2,13,319	2,19,700	2,10,577	2,21,041
Extra establishment	47,955	67,632	17,295	48,607
TOTAL	2,61,274	2,87,332	2,27,872	2,69,648

The increase in 1882-83 over 1881-82 is mainly due to additional establishments required on account of heavier coinage.

The expenditure on stores was Rs. 54,931 and 63,594 in the Calcutta Mint, and Rs. 45,574 and 87,650 in Bombay. The increase in the two Mints during the year under review is due to larger coinage. The increase of expenditure in the Bombay Mint over that in Calcutta is on account of heavier silver coinage.

15. The capital expenditure in 1882-83 amounted to Rs. 4,673 in the Calcutta Mint against Rs. 9,408 in Bombay.

The total at debit of the Capital Accounts to end of 1882-83 was Rs. 74,08,988 in Calcutta against Rs. 34,24,238 in Bombay. A sum of Rs. 18,67,865 has been added in the year under review on account of a revised and more accurate valuation of land, buildings, and plant of the Calcutta Mint.

16. The saving effected in the Bombay Mint by the adoption of the electro-plating process was Rs. 3,553 against Rs. 2,878 in 1881-82.

17. In the Bombay accounts a sum of Rs. 1,34,228 is shown as gain on copper coinage. Such gain is taken credit for in the accounts of Government only as the coin passes from the Mint and Depôts into actual circulation; and its amount depends upon many other circumstances besides the quantity of coin manufactured at the Mints. It is in fact not specifically separable between the two Mints, and the entry in the Bombay Mint accounts appears to arise merely from the fact that that Mint has not adopted the same method of stating its figures as is adopted in the Calcutta Mint and in the accounts of Government. The attention of the Comptroller General is directed to the point, and he is requested to report the gain on copper coinage for each of the past few years, and to report it in future years in time for inclusion in the annual Resolution on the reports of the Mints.

ORDERED, that this Resolution be published in the *Gazette of India*, and communicated to the Mint Masters, Calcutta and Bombay, and, with special reference to paragraph 11 to the Comptroller General.

The 7th December 1883.

No. 1773.—In exercise of the power conferred by Section 5 of the Scheduled Districts Act, 1874, the Chief Commissioner of Assam is pleased, with the previous sanction of the Governor General in Council, to extend Act I (B.C.) of 1883 (an Act to amend the Bengal Excise Act, 1878), with the exception of Section 13, to the Chief Commissionership of Assam.

By Order,
E. A. FRASER,
1st Asst. to the Chief Commr.

CHIEF COMMISSIONER OF COORG.

NOTIFICATIONS.

Camp Mercara, the 27th November 1883.

No. 3.—Mr. M. Muttannah, Sub-Assistant Conservator, delivered over, and Mr. F. B. Dickinson, Deputy Conservator of Forests, resumed, charge of the Office of the Deputy Conservator of Forests in Coorg, on the forenoon of the 12th November 1883.

No. 4.—The Officiating Chief Commissioner is pleased to confirm the following Vaccination Rules for the Municipality of Mercara framed by the Municipal Board under Sections 19 and 21 of the Indian Vaccination Act, XIII of 1880:—

Vaccination Rules for the Municipality of Mercara under Act XIII of 1880.

1. The vaccine-station for Mercara shall be the Branch Dispensary in the Pettah, at which a notice board shall be hung up stating on what day and hours vaccination will be performed.
2. The vaccinators shall be able to read and write in the vernacular, and satisfy the Superintendent that they have a proper knowledge of, and skill in, the performance of the operation of vaccination.
3. The Civil Surgeon of Coorg shall be the Superintendent of Vaccination. The vaccinators shall be appointed by the Superintendent, who shall have power to suspend them, and, with the concurrence of the Municipal Committee, to dismiss them.
4. The vaccinator or vaccinators shall attend daily between 8 and 11 A.M. at the appointed station. The remainder of the day they shall work at the houses of persons who cannot bring their children to the vaccine-station, at schools, &c.
5. Persons desirous of having their children vaccinated at their own houses shall pay a fee of annas 8 per case; when parents have more than one child unvaccinated, they shall be charged 4 annas per child.

6. A form of certificate of successful vaccination, of unfitness for vaccination, or of insusceptibility of vaccination, shall be printed and supplied to the vaccinators, who are empowered to fill them up.
7. The lymph used shall be human lymph, and arm to arm vaccination practised as far as possible.
8. Registers of operations performed by the vaccinators shall be kept, showing name, age, sex, father's name, residence, date, and result.
9. Registers of all children born after the date of the introduction of the Act shall be supplied monthly to the vaccinators by the Town Subedar, who will see that every child on such register is vaccinated within one year of its birth, or that the parents are prosecuted under the Act. Should the child be not in a proper state of health for the operation, a certificate to this effect shall be given postponing the operation for three or six months.
10. A register of all children unprotected, under the age of 14 years, if boys, and of 8 years, if girls, being within the municipal limits, and of such children as may be brought within those limits and have resided there over a month, shall also be prepared under the direction of the Town Subedar, and delivered to the vaccinators for the same purpose as in rule 9.
11. Monthly and Annual Reports on the work done shall be presented to the Municipal Committee by the Superintendent of Vaccination.

By Order,

H. WYLIE, *Major*,

Secretary to the Chief Commr. of Coorg.

CALCUTTA MINT,
The 3rd December 1883.

GOVERNMENT ENGINEERING COLLEGE, HOWRAH.

NOTICE.

Candidates for admission to the Engineer Classes should apply to the Principal before the 31st January 1884. The Session begins on Monday, the 4th February 1884. Candidates for this class must furnish proof that they have passed the Calcutta University Entrance Examination.

An examination for admission to the Mechanical Apprentice Classes will be held at this College on Wednesday and Thursday, the 30th and 31st January. The subjects for examination are—

Arithmetic (the whole).
Algebra (to Simple Equations, inclusive).
Euclid (Books I and II).
English (Grammar and Composition).

Applications for permission to appear at the examination should reach the Principal not later than the 25th January 1884.

Ten scholarships will be awarded to students entering the Engineer Class not being already holders of junior scholarships. The scholarships will be awarded with general reference to the place taken by candidates at the Entrance Examination.

Applications for scholarships will be received by the Principal up to the 30th January.

Every applicant, before admission to the College, will be examined by the College Surgeon as to his physical strength, fitness for manual labour, and eye-sight.

Further particulars will be supplied on application to the Principal.

G. BELLETT,

Officiating Director of Public Instruction.

HENRY F. BLANFORD,
Meteorological Reporter to the Government of India.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The "Indian Law Reports," published under the authority of the Governor General in Council, will appear in monthly parts, published as soon as possible after the first of each month at Calcutta, Madras, Bombay, and Allahabad, and will comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court will be reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court will be reported in the Calcutta Series. The Parts of each Series can be had separately, or all four Parts can be had stitched into one wrapper at the option of subscribers and purchasers. It will be observed from the following statement of the terms of subscription and sale, that a considerable reduction is allowed to persons taking the complete set:

Terms of subscription, payable annually in advance.

	Without Postage.	With Postage.
For the CALCUTTA SERIES	R35	R37-8
" MADRAS SERIES	" 8	" 9
" BOMBAY SERIES	" 8	" 9
" ALLAHABAD SERIES	" 8	" 9
Complete set	"45	"47-8

The price of each Part purchased separately will vary according to the amount of matter it contains, and will be printed on the wrapper. It will, however, never be below the following:—

	R	a
For a Part of the CALCUTTA SERIES	R3	8
" " MADRAS SERIES	" 1	0
" " BOMBAY SERIES	" 1	0
" " ALLAHABAD SERIES	" 1	0
Complete set	" 4	0

Persons desiring to subscribe for or purchase the Reports, should apply to—

MESSRS. THACKER, SPINK AND CO., CALCUTTA;
MESSRS. THACKER AND CO., BOMBAY;
MESSRS. HIGGINBOTHAM AND CO., MADRAS;
THE GOVERNMENT CENTRAL BOOK DEPOT, BOMBAY;
THE GOVERNMENT BOOK DEPOT, ALLAHABAD.

Orders and Subscriptions for 1876 should be at once remitted.

THE BENGAL LAW REPORTS.

A few sets of the Bengal Law Reports (Volumes 1 to 15) are available at Messrs. Thacker, Spink & Co., Calcutta, at R375 a set.

PAPERS REGARDING THE SUGGESTED ABOLITION OF THE ENGLISH DUTY ON GOLD AND SILVER PLATE, AND THE SYSTEM OF COMPULSORY HALL-MARKING.

The following papers are published for general information :—

Dated 11th January, 1883.

From—G. HICKIE, Esq., Secretary to the Calcutta Trades' Association,

To—The Secretary to the Government of India, DEPARTMENT OF FINANCE.

In the year 1880 an earnest attempt was made in England by those interested in the silversmiths' and goldsmiths' trade to procure the abolition of the English duty on silver plate, and an alteration of the restrictive laws relating to compulsory Hall-marking of silver and gold wares. A petition, presented to the English Parliament by certain artists and designers in metal work, and which is annexed hereto (see Appendix A), clearly sets forth the grievance of which they complain, and shows that the duty of 1*s.* 6*d.* an ounce imposed by the English law on all silver wares manufactured for sale in England tends materially to limit the demand for artistic work in silver, and, coupled with the system of compulsory Hall-marking, greatly lessens the consumption of silver as a raw material.

2. As bearing on the same important question, the Committee of the Trades' Association submit herewith a copy of certain resolutions adopted by the Goldsmiths' and Silversmiths' Free Trade Association at a meeting held in London in September 1880 (see Appendix B).

3. It seemed at first that these efforts to procure the repeal of an injurious tax, which, taken in connection with the laws for compulsory Hall-marking, is of a protective character, would be successful, but other considerations ulti-

mately prevailed, and the matter was referred to by Mr. Gladstone in his Budget speech in these words:—

"The next subject is one of very small dimensions indeed, but one which presents very considerable difficulty as well as inducement, and that is the subject of the duties on silver plate. The revenue it produces is no more than about £48,000 a year; but there are two reasons why, if we could, we ought to get rid of it. The first is the general advantage which never fails to attend the removal of Excise duty upon the products of British industry; and there is another special reason, which is, that there is every reason to believe that India is well qualified to supply us with silver wares in a manner advantageous to herself and to the trade and people of this country. These are the reasons in favour of the alteration of the duty, and they are very weighty reasons, but unfortunately there are reasons against the removal of the duty, in the ordinary manner which the House may consider as weighty, or weightier still. When I say 'the ordinary manner,' I mean the immediate removal of the duty. In the first place, in order to get rid of this £48,000 a year, you must not only give up that sum—which you might be willing enough to do—but if you remove this duty immediately which undoubtedly would be the best way of doing it, you must be prepared to meet a claim for drawbacks, which, in the first place, is enormous, in relation to the amount of duty, and totally transcends all the dimensions of ordinary ideas as to the drawbacks on taxable commodities, but which is open to the still greater objection that it is impossible to shut the door against drawbacks in the nature of fraud. When I come to make enquiry as to this drawback, gentlemen of the greatest intelligence and respectability in the trade say they think the drawback might be perfectly well covered by £170,000, or three and a half years' revenue. I have not the smallest doubt as to the perfect good faith of all that proceeds from the leading members of the trade; but it is not in their power, nor in the power of anybody, to assure us that we should not be subject to another demand, perhaps as great, in respect of fraudulent claims. I cannot say what that would be; but in the whole circumstances we do not see our way to proceed to the removal of this duty by the ordinary form of an immediate removal altogether without a corresponding claim in another direction. I am sorry to say the problem puzzles me, and I can suggest nothing better than that which is, as a rule, not to be resorted to, *viz.*, that the difficulties of this case might very gradually be provided for by such an annual reduction of the duty as would not disturb sensibly the course of trade; and I shall submit to the House a Resolution proposing that instead of 1*s.* 6*d.* an ounce, which is the amount now chargeable, the duty shall be reduced annually by three pence an ounce until it expires. The gold duty we do not propose to touch. That is a duty so peculiar that I really do not know how to deal with it under present circumstances; but I do not think there is any such reason for touching the duty of gold as there is for touching the ordinary duty on silver. I make that proposal not as the best thing conceivable, but as being the best that can be done under present circumstances."

4. Subsequently Mr. Gladstone moved the omission of the clause relating to the silver duty from the Revenue Bill in the following terms:—

"The Customs and Inland Revenue Bill was in Committee of the House of Commons on May 23rd, and Mr. Gladstone moved the omission of clause 7, dealing with the silver plate duty. On Sir G. Campbell asking why the clause was to be abandoned, Mr. Gladstone said the difficulties attending drawback on this subject were very great—much more serious than he had imagined. He had had considerable doubt as to the validity of the claim for drawback, and specially for full drawback; but under the clause it had not been proposed to give any drawback at all, but to proceed by a gradual method of reduction. Representations which had been made to him induced him to think that he could not persevere with a clause which affected not so much the interests of the trade, so called, as those of the working people. There had been great deadness in the condition of the trade, and he shrank from applying to it any measure which would have had a more or less paralysing effect. He had been obliged to let the matter stand over at this time, but other communications might yet take place. Mr. Ritchie then suggested that the right honourable gentleman should definitely abandon the clause, as the members of the trade would suffer if it were to be held *in terrorem* over them, but Mr. Gladstone said he could not give a pledge that, under no circumstances, would the question be reopened. There might arise other modes of dealing with it. Sir A. Lusk then observed that the clock and watch-making trade had entirely gone away from Clerkenwell. The people wanted something to do and could not get it; and it was no use to tell them to buy in the cheapest market if they had nothing to buy with. After a few more words from Mr. Onslow and Mr. Maciver the clause was negatived."

5. It will be seen that the importance of this question to the people of India is fully recognised in the above remarks, and there can, the Committee think, be no doubt that the repeal of this protective duty, which is imposed on all foreign silver plate imported into England, would, in course of time, tend to the improvement of exchange by promoting the consumption of silver and developing a large trade in silver goods, where none now exists, between this country and Great Britain; no trade is possible under the existing conditions of the law, because all Indian silver manufactures are subject to the tax of

1s. 6d. per ounce; they are also required to be Hall-marked before they are submitted for sale, under a penalty, in failure of their being so marked, of £10 for each piece of plate so exposed; the articles are, further, liable to be broken up by the Assay Office if the silver of which they are made fails by one-fourth of a grain to come up to the English standard of fineness, which differs considerably from the Indian standard of the rupee. English manufactures other than plain ware are submitted for the assay mark in the rough state, and before they are finished, to avoid the defacing operation of assaying and marking; but this is manifestly impossible in the case of Indian manufactures. The beautiful silver work of Cashmere, Guzerat, Cutch, the Punjab, and Southern India, is therefore kept entirely out of the English market by these prohibitive and protective duties, to the manifest disadvantage of the English purchaser as well as to the detriment of the Indian manufacturer.

6. One of the greatest evils of the present Hall-marking system in England is the destruction of the work if the silver is found to be only a quarter of a grain under the specific standard; in such cases the articles are entirely broken up and rendered fit only for the melting pot. So small a deviation from the English standard can make no real difference in the intrinsic value of silver ware to the purchaser, since it represents the value of only about the eighth of a farthing per ounce. Much of the highly-chased and elaborate work of the Indian silversmith cannot be made in soft pure silver, as the metal requires to be alloyed to a certain degree of hardness to enable it to be worked up to perfection.

7. The complicated and elaborate system of working this tax in England also operates unfavourably in many ways for the English manufacturers and exporters of silver goods. A firm in Calcutta recently had an elaborate and artistic piece of mechanical silver work made in London to order, the drawback for which for export amounted to £20; they were obliged, however, to forego this considerable sum because the English Custom House refused to allow the drawback unless the work was taken to pieces and the silver weighed, for the purpose of the drawback, separately from the other parts, and as the article was from the nature of its construction an extremely difficult piece of work, and could not be undone and put together again without much delay, the firm were obliged unjustly to suffer the loss.

8. The Committee annex a paper from the "Jeweller and Metal-worker" on the tax on silver plate, which gives some interesting information on the matter (see Appendix C).

9. The Committee think that they have now said enough to show the great importance of this subject to the Public and the Government of India as well as to the Indian manufacturer of silver goods. It has also an important bearing on the general question of a larger consumption of silver, and the consequent amelioration of its present reduced value, and above all on the possible development of a considerable trade in silver manufactures with England. The Committee would therefore respectfully urge on the Government the desirability of bringing the subject prominently to the notice of the British Government, with a view to the speedy repeal of this most restrictive and impolitic tax, and the amendment of the laws applying to the system of Hall-marking to the extent of rendering the application of that system non-compulsory.

APPENDIX A.

Petition of Artists on the Silver Duty.

(This petition was presented to Parliament by Mr. Mundella, M.P., *and* Mr. L. Courtney, M.P.)

To—The Honourable the Commons of the United Kingdom of Great Britain and Ireland in Parliament assembled

The humble petition of the undersigned Artists, designers in metal work, educated in schools in connection with the Science and Art Department, South Kensington.

Most respectfully sheweth,—That your petitioners are greatly interested in the attempt now being made to abolish the taxation of gold and silver plate, and to alter the laws relating to Hall-marking of those wares.

2. That your petitioners have long since found that the trade of the silversmith offers no inducement to artists to adopt it as a profession, owing to the limited demand for artistic silver productions.

3. That your petitioners are convinced that the duty of 1*s*. 6*d*. an ounce, which amounts, at the present price of silver, to a tax of 33 1-3 per cent. upon the value of the raw material, materially assists in limiting the demand for artistic productions.

4. That your petitioners are further convinced that the duty, coupled with the laws relating to the system of compulsory Hall-marking, limits the number of manufacturers, inasmuch as the hindrances to trade are such as prevent "outsiders" from engaging in the business, although there is nothing in silver, as distinguished from other metals, offering difficulties to the amateur.

5. That your petitioners have great reason to believe that if the duty were abolished, and if Hall-marking were rendered a voluntary institution under a system more in accordance with the practice of modern trade, an important development of the art of the silversmith might confidently be expected in the United Kingdom.

6. That the laws relating to the gold and silver trades have lately been under the consideration of a Select Committee of your honourable House, and that, with a single dissentient the duties have been condemned, the report recommending their abolition "whenever the state of the revenue shall permit."

7. That although the Select Committee, by a majority of one, recommended that Hall-marking should remain as at present—a compulsory proceeding—your petitioners humbly submit that the balance of evidence brought before honourable members was strongly in favour of a voluntary system of Hall-marking.

8. The freedom of trade being an established principle in the case of all other kindred trades, a *primâ facie* case was presented by several of the witnesses in favour of an extension of those principles to the gold and silver trades.

9. That artists have a direct interest in freedom of trade which, as it affects the demand for commodities, opens out new fields for their employment, encouraging them to study at home and abroad, with a view to the cultivation of their taste and the acquirement of knowledge of the respective manufactures.

10. That art would suggest that the quality of the material is of but little importance as compared with the artistic design and execution of manufactures.

And your petitioners therefore humbly pray that your honourable House, taking all these facts into consideration, will "as soon as the state of the revenue shall permit," give effect to the recommendation of the Select Committee, by abolishing the duties upon gold and silver plate, and that the laws relating to the gold and silver trades may all be abolished, and that a new Act may be passed providing for a voluntary system of Hall-marking easily accessible to manufacturers and dealers throughout the United Kingdom.

And your petitioners, as in duty bound, will ever pray.

APPENDIX B.

At a meeting of "The Goldsmiths' and Silversmiths' Free Trade Association" held September 10th at the Office of the Association, 12, Pall-Mall East, Mr. Edward J. Watherston presiding, it was unanimously resolved—(1) "That the question of the depreciation in the price of silver and the fall in the value of

the Indian rupee demands the early attention of Her Majesty's Government; that, in order to restore its market value, it is desirable that no hindrances to its use for manufacturing should be permitted any longer to prevail; that the duty of 1*s*. 6*d*. per ounce upon manufactured plåte, and the laws relating to the system of compulsory Hall-marking, in addition to being unjust and subversive of the principles of modern commercial legislation, are in the highest degree impolitic, as inviting the consumption of a raw material the value of which for currency purposes it is essential should be maintained." (2) "That a copy of the foregoing Resolution be forwarded to Her Majesty's Ministers."

APPENDIX C.

A tax upon silver plate was first originated in the year 1719, to assist in the reduction of the National Debt, which had become considerably enlarged by the cost of the *Spanish War*, and it was thought to reduce those costs principally by taxing the British silversmiths' industry. This tax, by the mode in which it was made to apply to the trade, soon proved very depressive to it; even at that time, for in 1758 it was repealed, the main cause being "for the encouragement of trade." It, however, was soon again imposed, namely, 1784, this time to pay for the *American War*. The tax was soon afterwards increased, and again in the years 1804 and 1815, and all for war purposes. The *French War*, which occurred at the last-named period, having cost £601,500,343, an enormous addition to the National Debt. To the makers of heavy silver goods paying duty, its retention may prove a source of profit, by the charging of the purchasing public the full duty of 1*s*. 6*d*. per ounce upon all their purchases, and pocketing the allowance usual for drawback. Therefore we may expect a few, and very naturally too, exclaiming in favour of things remaining as they are.

We have said to manufacturers of *special and heavy goods* doubtless a profit may be made of some magnitude where a considerable trade is annually conducted out of the tax. But why should the few profit by it to the injury of the many? The makers of *light and fancy goods*—which have to pay the tax—cannot possibly make any such profit by the means just indicated. The time occupied in finishing the work—which is much more defaced in marking than the heavy and solid—by the workman after the process of *compulsory Hall-marking* more than absorbing the value of the drawback allowed, and instead of a gain there is an *actual loss*. Assuming, then, that the duty tax is a net gain to a few manufacturers, it is a disadvantage and a drawback to a great many others, who would like to see its entire abolition, acting as it does injuriously to them, not only pecuniarily, but also in other ways. Firstly, because it so enhances the selling price of an article as to almost forbid its sale. The fact is readily enough shown by taking any small article of jewellery, and comparing it with one of the same weight and design of execution that has paid duty on the manufacture. We have simply to point out that the former, while equal to the latter in every way, can be purchased at from 20 to 40 per cent. less, an unusually large margin of difference in the cost of an article, when contending with dull times, such as have been experienced in the jewellery trades for a very considerable period now. Secondly, because the retention of the duty tax for the advantage of the comparatively few, as against the interests of great numbers, is really and absolutely bad in principle; it fosters a tax upon knowledge; it inflicts an injustice upon the precious metal trades by harassing its members; it crushes skilled enterprise in the production of artistic work; in the manufacture of plate—which is now the principal work taxed—*especially* it keeps old patterns and designs in the market which are best able to stand the cumbersome system of marking now in operation at the assay halls, to the exclusion of the more showy and tastefully designed work. Such obstacles to the gold and silver plate trade discourage a taste for design, as well as business enterprise, by having a tendency to lessen the demand for such articles, and so cause manufacturers' stocks to move but slowly through there being too much sameness of design, and which our present system of compulsory Hall-marking every article of plate—as well

as some other—has every tendency to encourage. The system of compulsory Hall-marking in England, to which all duty-paying articles are subjected, being so crude and distinctive in its application, that it has in a manner prevented the production of designs in conformity with the times, as regards style and taste; it has, therefore, as it were, hampered the English silver trades, and promoted the advancement of foreign trade in place of our own. A very good argument in support of this testimony is to be raised by the gradual decrease in the number of ounces upon which duty has of late years been paid, and of drawback allowed for exportation. The statistics show a remarkable and continuous diminution in the weight of silver on which duty has been paid.

During the period of the five years between 1855-59, the decrease was 192,500ozs., being 994,360ozs. in the former year and 801,860ozs. in the latter, and the weight on which the drawback was allowed from 156,440ozs. to 116,146ozs., a decrease of 40,294ozs. And during the period of five years from 1875-79 the decrease was 140,152ozs., being 880,493ozs., on which duty was paid in the former year, and 740,239ozs. in 1879. In the same period the weight on which the drawback was allowed decreased 35,059ozs., from 120,280ozs. to 85,121ozs. And last year the weight on which the duty was paid still showed a further decrease of 101,619ozs. from the former year, the amount being 638,620ozs These figures show a rapidly increasing decline in both the manufacture and exports of silver plate, and it is more than obvious that this decline must still continue year by year as time rolls on, unless the existing restrictions are removed.

As a further proof of the injury this unjust tax does the silver trade, we may mention the enormous increase in the manufacture of silver chains, lockets, and bracelets, since the duty was removed about two years ago. Before the duty was taken off these articles, there was no demand, and the manufacture was avoided, the call being for articles not Hall-marked, which of course meant the evasion of the duty, and not an objection to Hall-marked work, but purchasers preferred the risk of having a little inferior metal in their wares to paying so much above the nominal value of the metal they were purchasing in the shape of a heavy tax. Now the duty has been wisely taken off these articles, an enormous demand has sprung up for them with the Hall-mark upon them, clearly showing that it was the duty *alone* that proved such a source of hindrance to their former manufacture, by the considerably enhanced price it caused to be put upon the work, subject to its restrictions.

Dated 30th December, 1882.

From—Robert G. Orr, Esq., Chairman, Madras Trade Association,

To—The Right Honourable the Governor of Madras.

I have the honour, by the direction of the Committee of the Madras Trade Association, to address Your Excellency with reference to the serious disadvantages which operate against the importation into England of Indian silver plate, and which, under the existing English law and procedure, virtually amount to prohibition.

2. In the hope that it will please Your Excellency to take such steps as may be deemed desirable towards bringing prominently before the Secretary of State for India the anomalous position in which the silver industries of India are placed with regard to importation into England, the Association beg leave to offer the following explanatory observations.

3. In the first instance, *all* silver *plate* taken into England, whether as private property or intended for sale, is charged at the Customs with a duty of eighteen pence per ounce. It is scarcely necessary to say that this duty operates as a serious discouragement to the development of any silver industry; it has been well said that "it is subversive of the principles of modern fiscal legislation, obstructive to art progress, and an insurmountable obstacle to technical education in its application to silversmith's work;" and, if this be

true as to levying an invidious duty in England, it is equally true in its effects upon the silver industries of India.

4. Notwithstanding the levy of this burdensome and obstructive duty, the curious anomaly exists that, even after the English Government receive that duty, they forbid the goods being dealt in, excepting under conditions which amount practically, as concerns the Indian produce, to prohibition of sale in England.

5. Under laws dating back more than 500 years, the gold and silversmiths of London were empowered to furnish those who manufactured silver below a certain standard, and in the present day the "Hall" authorities, against whom there is no remedy and no appeal, wield with absolute despotism the extraordinary powers conferred upon them in the middle ages.

6. The law is that all silver plate, but not jewellery, shall be of a certain standard of fineness and then "Hall-marked" under a penalty of £10 and confiscation. If the manufactured plate, under any circumstances, be found below the English standard, it is at once mercilessly "smashed and battered" as if it contained or embodied the plague or some other fell disease.

7. But even if the Indian manufacturer have complied with the law, if he has specially obtained English standard silver—the rupee is considerably below that standard—and has paid eighteen pence per ounce, he is met with a further difficulty and an insurmountable objection. The silver plate must, before marking, be "scraped and assayed," and this process is performed so clumsily and ruthlessly that the English manufacturer finds it necessary to take back his goods to the workshop to be repaired and "done up;" he, therefere, sends his wares to the Hall in an unfinished state before being polished or burnished.

8. It is obvious that this course is not open to the Indian manufacturer (except at prohibitive cost), who must be content to run the risk of seeing his *finished* goods "mauled," and in some instances injured beyond recovery.

9. This simple statement of the difficulties which attend the importation of Indian silver plate into England appear to the Trades' Association to present strong grounds for an urgent representation to the Home Authorities for the removal of an impolitic and invidious duty. The Association are of opinion that the recent large-minded abolition of duties in India on English manufactures might well be followed by the mother country, in promptly and completely abolishing the silver duties, or at least in sweeping away the absurd and anomalous privileges so successfully exercised by the Hall authorities, manifestly to the protection of the English silver trade interest, but banefully injurious to the production of Indian art and industry.

Extract from the Proceedings of the Government of Madras, Revenue Department,—No. 8, dated 8th January 1883.

Read—

Memorial from the Chairman, Madras Trade Association, dated 30th December 1882.

Order thereon by the Government of Madras.

Ordered that of the two copies furnished of this memorial, one be forwarded for the favourable consideration of the Secretary of State for India and the other to the Government of India.

No. 1, dated 9th January, 1883

From—The Government of Madras,

To—The Secretary of State for India.

We have the honour to submit a memorial from the Madras Trade Association pointing out the difficulties which the importer of silver plate into England has to encounter.

2. We believe that these difficulties have not been in any degree exaggerated, and we trust that Her Majesty's Government will consider whether their removal is not possible. As matters stand at present, the English market is closed to plate of Indian manufacture, and one of those industries for which there is in this Presidency undoubted aptitude and which it is our special desire to foster, is greatly discouraged.

No. 26, dated 23rd January, 1883.
From—The Government of India,
To—The Secretary of State for India.

On the 17th March 1882, we telegraphed to Your Lordship's predecessor in the following terms:—

"We desire very earnestly to press upon Her Majesty's Government the importance of repealing the silver duty this year if possible. We believe that this would be a very gracious act at a time when we have repealed our custom duties; it would give much satisfaction to the public here, and would be highly politic."

2. In a Despatch No. 137 of May 4th, 1882, Lord Hartington made the following remarks:—

"I caused the substance of your telegram of the 17th of March last, relative to the importance of repealing the silver duty, to be communicated to the Lords Commissioners of Her Majesty's Treasury. The Chancellor of the Exchequer, in his Financial Statement, delivered in Parliament on the 24th of April, remarked that he is not prepared to make any proposals for the repeal of the duty at the present time, although he recognised that there were two reasons which recommended its abolition, the first and special one being the strong opinion expressed by Your Government in favour of its early removal, and the second the embarrassment to the market and hindrance to trade caused by its maintenance."

3. The Madras Government have forwarded to us a copy of their Revenue despatch of January 9th, 1883, in which they submit to Your Lordship a memorial from the Madras Trades' Association, pointing out the difficulties which the importer of silver plate into England has to encounter. "We believe", the Madras Government add—

"that these difficulties have not been in any degree exaggerated, and we trust that Her Majesty's Government will consider whether their removal is not possible. As matters stand at present, the English market is closed to plate of Indian manufacture, and one of those industries for which there is in this Presidency undoubted aptitude, and which it is our special desire to foster, is greatly discouraged."

4. We have now the honour to forward a representation from the Calcutta Trades' Association on the same subject.

5. Whether we consider this question from the point of view of the English consumers or from that of the foreign importers of silver, the desirability of abolishing the present duty, if the adoption of such a course be possible, is so obvious that we need not dwell on the subject at any length. Mr. Gladstone, in the speech of which an extract is given in paragraph 3 of the memorial from the Calcutta Trades' Association, stated that "the reasons in favour of the alteration of the duty" were "very weighty." We venture to think, however, that there are two considerations in connection with this subject which render the repeal of this duty specially desirable. The first of these considerations is that, inasmuch as the system under which the duty is at present levied places the English silversmith at an advantage compared to his foreign competitor, it is not in harmony with the general policy of Her Majesty's Government in such matters. The second is that the repeal of the duty, whilst conferring a benefit on the English consumers of silver, will also act beneficially on the general financial position of the Government of India.

6. As regards the first of these two points, we think there can be no doubt that, under the existing system, the English silversmith is to a certain extent protected against foreign competition. If the fineness of the imported articles is inferior in however slight a degree to the English standard of fineness, which differs considerably from the Indian standard of the rupee, not only is the sale of the articles in England prohibited, but they are liable to be broken up and

thus rendered valueless as works of art. It may be said that Indian silversmiths should only manufacture articles for export of the required fineness. But this is not in all cases possible. The Calcutta Trades' Association points out that—

"much of the highly-chased and elaborate work of the Indian silversmith cannot be made in soft pure silver, as the metal requires to be alloyed to a certain degree of hardness to enable it to be worked up to perfection."

Again, many of the articles manufactured in India are of very delicate workmanship which cannot, when they have once been finished, be assayed and hall-marked without being injured. On this subject the Calcutta Trades' Association say that—

"English manufactures other than plain ware are subjected to the assay and marked in the rough state, and before they are finished, to avoid the defacing operations of assaying and marking, but this is manifestly impossible in the case of Indian manufactures."

7. Turning to the second point mentioned above, namely, the extent to which the repeal of the duty would act beneficially on the general financial position of the Government of India, we need hardly point out that any measure tending to increase Indian exports and draw some portion of the population, however small, away from agriculture to manufactures, would, in any case, be very desirable. To these general considerations may, however, be added the argument that, in view of the large sterling payments to be made annually in England by the Government of India, it is especially to be desired in Indian interests that any duty tending to obstruct the consumption of silver in the form of plate, &c., should no longer be levied.

8. To these considerations we may perhaps add another which is of a political rather than a purely fiscal nature. It cannot be doubted that the recent abolition of the import duties, although highly beneficial to India, has been regarded by a considerable section of the Indian community as having been dictated in the interests of England. By those who hold such views it is urged that, after the large sacrifices India has made to give complete freedom to trade, it is not unreasonable to expect that a small fiscal reform of this nature, which would benefit India, should be made by Her Majesty's Government in England. Apart from the purely fiscal aspects of the question, we venture to think it would be desirable, on political grounds, to remove this grievance.

9. For these reasons we beg strongly to support the request of the Trades' Associations of Calcutta and Madras. We trust that it will be found possible to abolish the silver duty in connection with the financial arrangements of the year 1883-84.

10. As regards the question of drawbacks, which we understand constituted a consideradle difficulty when the matter was under consideration a year ago, we may perhaps be allowed to mention that in all the customs reforms carried out in India, no drawback has ever been allowed, although we have received frequent representations from individuals to the effect that, by reason of certain fiscal changes, a pecuniary loss has been entailed upon them.

No. 74, dated 10th May, 1883.

From—The Secretary of State for India,

To—The Government of India.

With reference to your letter dated the 23rd January last, No. 26 (Finance and Commerce), I forward herewith, for the information of Your Excellency, a copy of correspondence with the Treasury on the subject of the English plate duties, and of the system of compulsory Hall-marking.

Dated 22nd February, 1883.

From—J. K. Cross, Esq., Under-Secretary of State for India,

To—The Secretary to the Treasury.

In continuation of Sir Louis Mallet's letter of the 7th instant, I am directed by the Secretary of State for India in Council to forward herewith, for

submission to the Lords Commissioners of Her Majesty's Treasury, a copy of a letter from the Government of India, forwarding with their strong support a memorial from the Calcutta Trades' Association, in which that Association presses for the early repeal of the English import duties on Indian plate.

I am to request that you will direct their Lordships' attention to the last paragraph of the letter of the Government of India on the subject of drawbacks.

Dated 13th March, 1883.

From—LEONARD COURTNEY, Esq., Secretary to the Treasury,

To—The Under-Secretary of State for India.

I am directed by the Lords Commissioners of Her Majesty's Treasury to acquaint you, for the information of the Secretary of State in Council of India, that they have read with attention the memorial presented to the Secretary of State by the Gold and Silversmiths' Free Trade Association, and the letter from the Government of India, forwarding with strong support a memorial from the Calcutta Trades' Association in favour of the repeal of the gold and silver plate duties.

I am to say that the strongly-expressed wishes of the Government of India are entitled to, and receive the respectful consideration of Her Majesty's Government.

I am at the same time to point out that the financial equilibrium of the Budget must be a primary consideration with the Imperial Government, and that the question at issue in this case is complicated by the large amount of drawback for which a claim was put forward.

My Lords fear that they cannot hold out strong hopes of compliance with the wishes of the Indian Government, even in more favourable circumstances than now exist, until the trade are prepared to propose or accept such an arrangement in respect to drawback as Her Majesty's Government can recommend to Parliament.

My Lords have communicated to the Board of Trade and the Goldsmiths' Company the paper on Hall-marking received by Lord Kimberley from the Governor of Madras, and have requested to be favoured with the views both of the Company and of their Lordships of the Board of Trade upon the grievance therein stated.

My Lords desire to judge the whole question on its own merits, and they therefore will only note the difference, of which the Secretary of State in Council is doubtless aware, between the cotton duties imposed until recently in India, and the gold and silver plate duty. The former were purely and avowedly protective, but the latter is not so, the Customs duty on gold and silver plate being only framed to countervail the excise duty imposed upon the home manufacture.

Dated 9th May, 1883.

From— SIR LOUIS MALLET, C.B., Under-Secretary of State for India,

To—The Secretary to the Treasury.

I am directed by the Secretary of State for India in Council to acknowledge the receipt of your letter of the 13th March, and to request that you will convey to the Lords of the Treasury the Earl of Kimberley's great regret that their Lordships can hold out no stronger hope than that given in your letter of the repeal during the present Session of the duties on gold and silver plate.

With regard to the remarks in the 2nd paragraph of your letter, as to the difficulty which the question of drawbacks occasions, Lord Kimberley desires me again to request their Lordships' attention to the statement of the Government of India, referred to in my letter of 22nd February, that no drawbracks have ever been allowed in that country in cases of customs reforms, notwithstanding frequent representations of pecuniary loss entailed.

I am directed to add that Lord Kimberley is unwillingly to pass over without notice the statement, which appears to His Lordship inaccurate, at the close of your letter that the Indian cotton duties were "purely and avowedly protective." These duties, I am to remind you, were originally imposed purely for fiscal purposes, and at a time when no Indian manufactures existed which they could operate to protect; they were subsequently modified at different times in order to remove the protection which it was found that they were alleged to afford to certain classes of Indian-made goods; and they have recently been entirely abolished, in common with import duties upon many other articles.

No. 39, dated 22nd June, 1883.

From—The Government of India,

To—The Secretary of State for India.

We have the honour to acknowledge the receipt of Your Lordship's Despatch No. 74 (Statistics and Commerce) of May 10th, 1883, enclosing for our information a copy of correspondence with the Treasury on the subject of the English plate duties and of the system of compulsory Hall-marking.

2. In Mr. Leonard Courtney's letter of March 13th, 1883, which forms the second enclosure to this Despatch, the following passage occurs:—

"My Lords" (*i.e.*, the Lords Commissioners of Her Majesty's Treasury) "desire to judge the whole question on its own merits, and they therefore will only note the difference, of which the Secretary of State in Council is doubtless aware, between the cotton duties imposed until recently in India and the gold and silver plate duty. The former were purely and avowedly protective, but the latter is not so, the customs duty on gold and silver plate being only framed to countervail the excise duty imposed upon the Home manufacture."

3. In Sir Louis Mallet's letter of May 9th, 1883, which forms the third enclosure of the Despatch under reply, Your Lordship has pointed out, in terms in which we entirely agree, the inaccuracy of the statement which we have quoted above. Not only is it inaccurate to say that the Indian cotton duties were "avowedly protective," for, as is remarked in Sir Louis Mallet's letter, "these duties were originally imposed purely for fiscal purposes," but, as a matter of fact, the greater portion of the Indian cotton duties never acted protectively at all. The protective element was entirely eliminated from the Indian Tariff, so far as the cotton duties were concerned, on March 13th, 1879, when all cotton goods containing no yarn of a higher number than 30s were exempted from duty. The duties which were abolished in March 1882 did not act protectively. On this subject we beg to draw Your Lordship's attention to paragraphs 82-86 of the Financial Statement for 1883-84, which are to the following effect:—

"The twist which is imported from Europe does not compete with Indian twist. For years past the great bulk of the twist imported has been of counts much higher than any that can as yet be made in the Indian mills, which limit themselves to the production of twist of counts not exceeding 32 (mule) and 20 (water). All such kinds of English twist were freed from duty in March 1878.

"Of the grey piece-goods imported, those classes which compete with Indian-made goods were also exempted from duty in March 1879.

"White piece-goods are hardly produced at all as yet in India, except experimentally in one or two of the Bombay mills. As I have already mentioned, there has been a large decline in the imports of this class of goods.

"The piece-goods classed as 'other sorts' are not made in India.

"The remission of the Customs duties last year did not, therefore, in any way affect Indian mills, which have had to work without the protection of 3½ per cent. on twist since March 1878, and 5 per cent. on grey piece-goods of counts below 30s since March 1879. As was pointed out in the Financial Statement of last year (paragraphs 210 and 211), the duty which was abolished last March really protected one class of Manchester goods against another, and even to some slight extent protected English goods against those manufactured in India. The duty forced trade into an artificial channel by stimulating the consumption of the coarser kinds of goods and discouraging the use of medium and finer classes to the extent of a differential rate of 5 per cent."

4. If the Lords Commissioners of Her Majesty's Treasury are still under any misapprehension on this point, we think it would be very desirable that their attention should be again drawn to it. There can, in our opinion, be no comparison whatsoever between the Indian cotton duties, as they existed subsequent to March 13th, 1879, and the gold and silver plate duties in England which, as we remarked in the 6th paragraph of our Despatch of 23rd

January 1883, protect the English silversmith to a certain extent against foreign competition.

5. As regards the question of drawbacks, we would again draw attention to the point to which allusion is made in the 10th paragraph of our Despatch No. 26 of January 23rd, 1883, and in Sir Louis Mallet's letter to the Secretary to the Treasury of May 9th, 1883. No drawbacks have ever been allowed in India in the case of customs reforms, notwithstanding the frequent representations of pecuniary loss entailed upon individuals by reason of these reforms.

6. It was with great regret that we learned that Her Majesty's Government were not only unable to abolish the gold and silver plate duties immediately, but that the Lords Commissioners of Her Majesty's Treasury could not "hold out strong hopes of compliance with the wishes of the Indian Government, even in more favourable circumstances than now exist, until the traders are prepared to propose or accept such an arrangement in respect to drawbacks as Her Majesty's Government can recommend to Parliament." We are, of course, aware, in the words of Mr. Courtney's letter of March 13th, 1883, that "the financial equilibrium of the Budget must be a primary consideration with the Imperial Government;" but we venture to hope that, in view of the smallness of the amount of revenue involved, it will be possible at some early date to preserve fiscal equilibrium without the maintenance of these highly objectionable duties; whilst we cannot but consider that the payment of drawbacks should not be allowed to stand in the way of their abolition. Under these circumstances, we would again press the matter upon the consideration of Her Majesty's Government.

No. 186, dated 18th October, 1883.
From—The Secretary of State for India,
To—The Government of India.

With reference to your letter No. 39 (Separate Revenue) of 22nd June last, I enclose, for Your Excellency's information, a copy of further correspondence with the Treasury on the subject of plate duties.

2. I do not think it advisable to continue the discussion on this subject with the Treasury at present.

Dated 10th August, 1883.
From—Sir Louis Mallet, C.B., Under-Secretary of State for India,
To—The Secretary to the Treasury.

In continuation of my letter dated May 9th last, relative to the proposed repeal of the duties upon gold and silver plate, I am directed by the Secretary of State for India in Council to transmit herewith, for the consideration of the Lords of the Treasury, a copy of a letter from the Government of India, No. 39, Separate Revenue, dated 22nd June last.

I am directed to request that you will be so good as to call the attention of their Lordships to the last paragraph of the letter.

Dated 22nd September, 1883.
From—Leonard Courtney, Esq., Secretary to the Treasury,
To—The Under-Secretary of State for India.

With reference to Sir Louis Mallet's letter of 10th ultimo (R. S. & C. 1643), I am directed by the Lords Commissioners of Her Majesty's Treasury to request you to inform the Secretary of State for India in Council that my Lords have read with interest the remarks by the Government of India on the protective character of the former duties of cotton imported into India.

It would not be seemly for my Lords to controvert the views expressed by the Government of India on the objects of their fiscal arrangements. But, on the other hand, with reference to the last paragraph of the letter from the Government of India to which Lord Kimberley calls their Lordship's attention, they must remark that it is for them to judge whether, and when, Parliament can be asked to charge on the tax-payers large sums (under the name of drawback) to be paid to the holders of silver goods in order to relieve the purchasers of silver, who generally belong to the wealthier class of the community, from the present tax on plate.

PUBLIC WORKS DEPARTMENT.

IRRIGATION OPERATIONS OF FASL KHARIF IN THE PUNJAB FOR 1883-84, UP TO 30th SEPTEMBER 1883.

Canal Division.	Water distributed during September 1883. Depth in Canal at Regulating Gauge. Full supply.	Actual throughout.	Gross Consumption, cubic feet per second. Estimated full supply.	Actual average throughout.	Navigation Return Canal. Principal items of Traffic. Up.	Down.	Land irrigated (approximate). Zila.	Acres.	Rainfall. Average	During month.	Chief crops (approximate). Name.	Area in acres.	Remarks.
Bari Doab Canal. 1st Division	4·9	4·4	3,073·60	1,199	. .	. . . .	Gurdáspur	18,655	5·59	8·70	Cotton	22,076	On the Bári Doáb Canal, there is an increase of 15,730 acres as compared with the corresponding month of last year, and of 41,464 acres as compared with the season of 1881-82. The increase during the month has been rather small (only 12,544 acres); this is due to the heavy rain in the early part of the month. The demand for water however again increased towards the end of the month, and there can now be no reasonable doubt that this Kharif will be the largest on record.

Executive Engineer, Northern Division, Ganges Canal, reports that during the month the supply in river met all demands, on the 28th September the rope was put across the river and work on head bunds begun. There was fair rain during the early part of the month, but not sufficient for rice; sugar in parts also took water. The outturn of irrigated crops is good.

Executive Engineer, Meerut Division, Ganges Canal, reports that the demand latterly has been universal for late autumn crops and *paleo* of *do fasli*; the closure of Rajbahas in the upper part of the division was impossible on account of sugar and rice.

Executive Engineer, Bulandshahr Division, Ganges Canal, reports that on the 4th and 5th of the month there was heavy rain all over the division which completely stopped irrigation, it was showery up to the 15th after which west wind began to blow which created a demand again for water for sugar, cotton, and maize, about the 24th September.

Executive Engineer, Aligarh Division, Ganges Canal, reports a general and heavy fall of rain on the 4th and 5th of the month which stopped the demand for canal water.

Executive Engineer, Narora Division, Lower Ganges Canal, reports that there were showers and rain up to the 15th when they ceased altogether, and there was little or no demand.

Executive Engineer, Mainpuri Division, Lower Ganges Canal, reports that the demand for water was limited to the first and last few days of the month, and that general rain fell over the division from the 4th to the 15th

Executive Engineer, Cawnpore Division, Lower Ganges Canal, reports that the deficiency is due to the rainfall of the 10th to 16th which stopped all further demand.

Executive Engineer, Etáwah Division, Lower Ganges Canal, reports that the decrease is chiefly in indigo, for reasons given in former reports.

Executive Engineer, Bhognipur Division, Lower Ganges Canal, reports that all distributaries were closed throughout the month; rain fell at intervals up to the 15th sufficient for most kharif crops.

Executive Engineer, Eastern Jumna Canal, reports that there was general rain on the 2nd and 3rd, and that canal was closed from the 5th to the 14th inclusively; the increase in area is due to the dry weather of August, and is principally under maize and cotton.

Executive Engineer, Rohilkhand Canals, reports that heavy rain fell on the 6th, and again on the 9th, 10th and 13th, which brought the rains to a close; the water was all used for rice irrigation except on the Dhora river, where it could not be utilized owing to dams being breached; there was a steady demand throughout after the rain ceased; the Kicha and Kailas canals had to be closed for silt clearance, and were not re-opened till the end of the month. Water is now in great demand and will be wanted for rabi paleo.

Hamirpur return reported blank.

No remarks from the other Divisions.

ALLAHABAD,
The 25th October 1883.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASONS AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 4th DECEMBER 1883.

GENERAL REMARKS.—During the past week there has been light rain in British Burma, Assam, and Eastern Bengal, but none elsewhere.

In Madras and Mysore harvesting is still going on. Standing crops are in good condition. In Bombay the *kharif* harvest is nearly over and the *rabi* crops are doing well; but in two districts cotton has been injured by late rains. The river is now rising in Sindh. In the Berars and Hyderabad cotton is being picked and the *kharif* harvested, and the prospects of the *rabi* are favourable.

In Central India and Rajputana rain is required for the *rabi* crops in parts; but general prospects continue good.

In the Punjab and North-Western Provinces and Oudh *rabi* sowings have been nearly finished and are germinating fairly well, but rain is wanted. Cloudy weather has prevailed in the Northern Districts, but no rain has fallen.

In the Central Provinces the prospects of the *rabi* crop are reported to be very favourable.

In Bengal there has been a change of weather, the sky being overcast and slight showers having fallen. General prospects continue unfavourable; the *rabi* sowings have been greatly affected by want of rain, much land has been left unsown, and the outturn of the rice crop, which is now being harvested, is expected to be very poor in all save the Eastern Districts and Orissa.

In British Burma the prospects of the rice crop, which has been sown over a larger area than usual, are generally good, but some loss has been caused in the Arakan Division and Bassein by excessive rain.

Slight small-pox and fever are prevalent in most Provinces, and sporadic outbreaks of cholera still occur in Southern India, otherwise the public health is good.

Prices continue to fluctuate in Bengal.

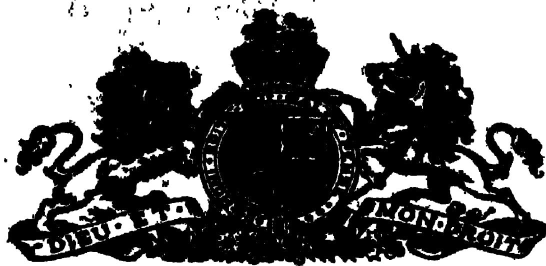
Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects
Madras—(Dec. 5th)		
Bellary	. . . . .	Standing crops generally good; harvest paddy and *ragi*, yield average; *cholum*, *cumbu*, *korra*, and oil-seeds, below average; nineteen deaths from cholera.
Kurnool	. . . . .	Standing crops good; harvest paddy, yield above average.
Ganjam	. . . . .	Fever and small-pox slight in one taluk.
Kistna	. . . . .	*Cholum* partly affected by insects in two taluks, otherwise standing crops good; harvest dry grains and black paddy, yield below average; fever prevalent, small-pox and cattle-disease in parts.
Coimbatore	. . . . .	Harvest paddy and *ragi*, yield average; *cumbu* below average; 79 deaths from cholera; fever, small-pox, and cattle disease in parts.
Tanjore	·18 (average of 1 station).	Standing crops generally good; harvest paddy, *cholum*, and *ragi*, yield below average; 152 deaths from cholera.
Madura	. . . . .	Standing crops fair; harvest dry crops, yield about average; cholera severe in Madura town; elsewhere slight.
Malabar	. . . . .	Second crop in good condition; small-pox and fever slight.
Travancore	. . . . .	Standing crops good; fever in parts.
		General Remarks.—General prospects good.
Bombay—(Dec. 5th)		
Kurrachee	. . . . .	Fever generally prevalent; cattle-disease in 3 talukas, loss of 60 buffaloes, 57 cows, and 89 sheep and goats; river at Kotri on 28th 6 feet 3 inches against 5 feet 2 inches on same date last year; no fresh case of small-pox in Karachi; disease prevalent in 5 villages in districts, 20 fresh cases, 3 deaths, 16 remaining sick; prices—wheat, red rice, and *bajri* in Karachi 24, 28, and 32; in Manjhand 22, 30, and 40; in Ghorabari 20, 30, and 40; and in Sajawal 24, 36, and 44 lbs. per rupee respectively.
Hyderabad	. . . . .	Average outturn of *kharif* crop is reported to be 11 annas 4 pies; weather seasonable; small-pox in 6, fever in 10, and cattle-disease in 4 talukas; wheat 26, *bajri* 35½, *jowari* 41, red rice 24, and white rice 20 lbs. per rupee.
Ahmedabad	. . . . .	*Rabi* sowing nearly completed; standing crops healthy; slight fever in Viramgaum, Sanand, Molasa, and Dholka; *bajri* 30 and wheat 26½ lbs. per rupee.
Baroda	. . . . .	Slight cholera in Naosari Mahal still continues; fever in some parts of Naosari, Baroda, and Kadi divisions; cotton and sugar crops in good condition; *rabi* sowing almost completed; prices—34 to 35 and rice 24 to 25 lbs. per rupee.
Surat	. . . . .	*Rabi* crops healthy; fever and cholera still prevailing in some talukas; *jowari* 38 and *nagli* 47 lbs. per rupee.
Nasik	. . . . .	Reaping of *kharif* and sowing of *rabi* crops nearly completed; *rabi* crops healthy; public health good; no cattle disease; wheat 33, *bajri* 34, and rice 24 lbs. per rupee.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*contd.*		
Colaba (Bombay)	. . . .	Average abnormal temperature 3° cool; vapour in air defective; wind normal.
Poona	. . . .	Harvesting of *kharif* completed; *bajri* 43 and *jowari* 50 lbs. per rupee; in Poona, *bajri* 34 and *jowari* 43 lbs. per rupee.
Ahmednagar	. . . .	*Bajri* reaping finished; *rabi* sowing finished, except in Newasa and Akola; locusts in Shrigonda; *bajri* maximum 57 lbs. per rupee in Shrigonda, minimum 39 lbs. in Nagar; *jowari* maximum 72 lbs. in Jamkhed, minimum 49 lbs. in Sheogaon.
Sholapore	. . . .	Cholera in Malsiras taluka, 6 cases, 3 fatal; cotton crop somewhat injured in Barsi and Sholapore talukas; *jowari* 62 and *bajri* 55 lbs. per rupee.
Dharwar	. . . .	Reaping of rice crops nearly completed, that of other early crops in progress; sowing of late crops completed; cholera in 3 villages of Ranibennur, out of 8 cases 2 fatal; fever in 5 and cattle-disease in 2 talukas; rice 24 to 41 and *jowari* 52 to 88 lbs. per rupee.
Kanara	. . . .	Much fever in Haliyal and Mundgod; small-pox in Hanawar and Sidapore; sowing second rice crop on coast; common rice in Karwar 11½ seers per rupee, in district average 15½ seers per rupee.
Rajkot	. . . .	Weather cold; fever continues in some parts; *bajri* 31 and *jowari* 35 lbs. per rupee.
		General Remarks.—River rising in Sindh; *kharif* harvesting and *rabi* sowing operations completed except in 5 districts; young *rabi* crops doing well; cotton crops slightly injured by late rain in parts of Sholapore and Satara; fever in most districts; slight cholera, cattle-disease, and small-pox in a few places.
Bengal—(Dec. 5th)		
Chittagong	·11	Weather alternately cloudy and fair; outturn of rice crops not promising; cold-weather crops doing well; prices stationary; cattle-disease has abated; general health good.
Dacca	*Nil*	Rice crop good; rain wanted for cold-weather crops.
24-Pergunnahs	·06	Prospects of both late rice and winter crops unfavourable; harvesting of late rice proceeding, average yield estimated at about 8 to 10 annas; cultivation of pulses and other winter crops not progressing favourably owing to the dryness of the soil; average price of common rice from 12½ to 16 seers per rupee; public health fair, though sporadic cases of cholera and fever reported from most parts of the district.
Moorshedabad	*Nil*	Weather bright and cool; *amun* is being reaped; an eight-anna crop is expected on an average; winter crops suffering from want of rain, but those on *dearah* lands doing well; fever still prevails in the Jungypore town; cholera has broken out in thana Shamshirgunge.
Rajshahye	*Nil*	Weather cloudy; *amun* reaped in parts of the district; *rabi* wants rain, but on *dearah* lands it is said to be a good crop; prices easier.
Burdwan	. . . .	A few drops of rain; weather overcast; in the Raneegunge subdivision the *amun* is estimated at a 4½-anna crops; sugarcane is beginning to feel the effects of drought, and rain is much wanted for winter crops; general health indifferent.
Rungpore	*Nil*	Weather cloudy and cool; *amun* is being reaped; prospects bad; the crop on high lands is almost a total failure; transplanting of tobacco going on; prices stationary; fever prevalent.
Bhagulpore	*Nil*	Prospects unfavourable; rice harvest has commenced; the crop on high lands has almost altogether failed, on low lands it is expected to yield on an average an outturn of from 4 to 8 annas; *rabi*, where sown, is still green and strong, and, if rain falls, may yield a fair outturn, but a good deal of land has remained unsown; price of rice 13 seers 14 chittacks per rupee.
Purneah	*Nil*	Weather cloudy to-day (4th); prospects of crops bad if no rain falls; *rabi* sowings only made here and there; price of common rice 14 seers per rupee; fever still continues.
Patna	*Nil*	Paddy is being reaped, it will be a poor crop; *rabi* coming on well; irrigation is being resorted to where practicable, but rain is much wanted; public health good.
Durbhanga	*Nil*	Weather cloudy to-day (4th); a very poor rice crop is being harvested; *rabi* stunted for want of moisture in the soil; fever not increasing.
Hazareebagh	*Nil*	Weather cold and cloudy since the night of 3rd; rice harvest continues, but outturn unfavourable; *rabi* prospects not improved; a few cases of small-pox still reported; public health good.
Cuttack	. . . .	Weather cool and cloudy; slight rain on 3rd, and it was rainin gat the time of report; rice crop on high lands is being reaped, on low lands it is ripening; winter crops doing well; price of rice almost unchanged; public health generally good.
		General Remarks.—The weather was cloudy in almost all districts, and there was a slight rainfall in Chittagong, the 24-Pergunnahs, Burdwan, and Cuttack; it is still raining in Calcutta; the general prospects of the crops continue to be very unfavourable; the cold-weather crops are generally much in need of rain, so also is sugarcane in some places; a good deal of land is said to have remained unsown with cold-weather crops on account of the continued drought;

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
		the earlier kind of the rice crop is being harvested, and the later kind is ripening; the rice crop, as already reported, will yield a very poor outturn; in some districts the average outturn will not exceed four annas; Eastern Bengal and Orissa will have a fair crop, but even in these parts it will be much below the average in some places; in some districts the prices continue to rise, in others they have fallen slightly, and in others again they remain stationary; fever is still prevalent in several districts.
N.-W. Provinces and Oudh—		
Benares .(Dec. 4th)	No rain	Land being irrigated where feasible; in other parts rain is required; bazars well supplied; prices falling slightly; no sickness of men or cattle.
Allahabad .(„ 5th)	No rain	Crops doing well; health good; prices risen.
Gorakhpore .(„ 3rd)	No rain	Tanks nearly dry and rain much wanted; small-pox and fever in north; prices slightly rising.
Jhansi .(„ „)	No rain	*Kharif* outturn will be below the average; harvesting in progress; *rabi* crops germinating; prices stationary; health of people and cattle good.
Cawnpore . („ 4th)	. . .	Weather seasonable; *rabi* crops being irrigated and have germinated fairly well; health of people good, except few cases of small-pox in 3 tahsils; markets well supplied.
Farukhabad . („ „)	. . . .	Weather seasonable; sky clear; fever here and there, but not extensive; prospects of crops hopeful, but rain wanted; condition of cattle good; markets well supplied
Agra .(„ „)	No rain	*Rabi* sowings nearly completed; health good; prices steady.
Bareilly .(„ „)	. . . .	*Rabi* being irrigated extensively; rain much wanted; weather cloudy.
Meerut .(„ „)	No rain	*Rabi* crops flourishing; irrigation commenced; health good; supplies ample; prices steady.
Kumaun .(„ „)	. . . .	Clouds again gathering, otherwise no change in agricultural prospects; health good; cattle-disease still prevails; prices unchanged.
Lucknow .(„ „)	No rain	Weather cold; westerly wind; *kewat* crops nearly harvested; *rabi* crops are being watered from wells and tanks; rain wanted; condition of people and cattle good; markets well supplied; prices steady.
Partabgarh .(„ „)	. . . .	Reports as to *rabi* crops from all tahsils fairly good; sowings still continue; small-pox reported from a few villages in Kunda, health otherwise good.
Rae Bareli .(„ 3rd)	No rain	Wind westerly; *rabi* prospects fair; isolated cases of small-pox in the districts; markets well stocked; prices almost stationary.
Sitapur .(„ „)	No rain	Prospects fair; prices fluctuating; markets well supplied; general health good.
Fyzabad .(„ „)	No rain	Prospects of *rabi* crops on irrigated land good; general health good; prices stationary.
		General Remarks.—The weather has been cloudy in several northern districts, but no rain has fallen; *rabi* prospects are fair, but rain is generally needed; the markets are sufficiently supplied and prices in most districts steady; the public health is fairly good, some fever and small-pox being reported.
Punjab—(Dec. 5th)—		
Delhi	. . . .	Health good; *rabi* sowing completed; prices stationary.
Hissar . . .	. . . .	Health good; rain required for *rabi* sowings.
Umballa . . .	. . . .	Health good; *rabi* sowings finished; prospects good; prices steady.
Jullundur . . .	. . . .	Health good; *rabi* sowings finished; prices falling.
Lahore . . .	. . . .	Health and condition of crops good; prices steady.
Ferozepur . . .	. . . .	Health and crop prospects good; prices falling.
Sialkot . . .	. . . .	Health and crop prospects good; prices stationary.
Rawalpindi . . .	. . . .	Health and crop prospects good; prices falling.
Peshawar . . .	. . . .	Small-pox prevalent; prices falling.
Mooltan . . .	. . . .	Health good; *rabi* sowings nearly finished; prices fluctuating.
Dera Ismail Khan .	. . . .	Health and harvest prospects good; prices steady.
Amritsar . . .	. . . .	Health good; rise in prices of barley, *jowar*, and rice; prices of other food-grains stationary.
		General Remarks.—No rain during the week; small-pox is prevalent in Peshawar, health elsewhere good; *rabi* sowings nearly completed.
Central Provinces—		
Nagpur . (Dec. 5th)	. . . .	Weather clear and cold; crop prospects good; fever prevails to some extent; prices of wheat falling.
Jubbulpore . („ „)	. . . .	Weather clear and cold; reaping and cotton picking continues; *rabi* sowings approaching completion; wheat 25 seers and rice 15 seers per rupee; health good.
Saugor . („ 4th)	. . . .	Weather clear and cool; *kharif* harvest nearly finished; prospects favourable; health good; prices stationary.
Seoni . („ 5th)	. . . .	Weather cool; reaping and threshing of rice progressing; *rabi* crops promising; fever prevalent; prices stationary.
Hoshangabad („ „)	. . . .	Weather seasonable; crop prospects good; cotton picking in progress; fever prevalent; wheat 16 seers and rice 10 seers per rupee.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Central Provs.—*contd.*		
Raipur . (Dec. 5th)	. . . .	Weather chilly and cloudy latterly; *kharif* harvest almost finished; estimated outturn of rice in Sunga and portions of Drug varies from 4 to 8 annas in the rupee; cotton being picked; *rabi* prospects good; public health good; prices fluctuating; common rice 27½ seers, and wheat 28¾ seers per rupee.
Khandwa . („ „)	. . . .	Weather cold and clear; crop prospects good; *rabi* sowings continue; fever prevalent; prices steady.
		General Remarks.—*Kharif* harvest approaching completion; prospect of *rabi* crops very favourable; health good.
British Burma— **(Nov. 29th)**		
Akyab .(Nov. 17th)	3·36	Total rainfall 183·09 inches; public health and health of cattle good; crops in Naaf township and Koladan damaged by salt water inundation; reports from other townships favourable.
„ . („ 24th)	*Nil*	Total rainfall 183·09 inches; public health and health of plough cattle good; Naaf and Koladan slight damage of crops by salt water inundation in the former; *loungphroo* crops being reaped; in Writaung west about 136 acres destroyed by salt water inundation; in Rathaidaung late rainfall not sufficient, and crops in some places suffered a little, in other townships crops good.
Kyoukphyu . („ 17th)	2·62	Total rainfall 159·19 inches; public health and health of cattle good; cyclone of 14th and 15th has damaged crops in vicinity of Kyoukphyu, extent not known; price of paddy and rice gone up 25 per cent., but will probably fall again shortly.
„ . („ 24th)	*Nil*	Total rainfall 159·19 inches; public health and health of cattle good; crops much damaged in Ramri and Kyoukphyu townships by cyclone of 13th and 14th instant, estimated yield will not be more than half that of last year.
Sandoway . („ 17th)	11·32	Total rainfall 220·17 inches; three deaths from sporadic cholera in town, otherwise public health good; weather stormy; heavy rain and wind has caused some damage to crops, actual loss unknown.
„ . („ 24th)	*Nil*	Total rainfall 220·17 inches; three deaths from cholera in town, otherwise public health good; estimated damage to crops in central township owing to heavy rain and wind reported last week 72¾ tons.
Rangoon . .	. . . .	Four fatal cases of small-pox, otherwise public health good; paddy no supplies; prices nominal.
Hanthawaddy . .	. . . .	Public health and health of cattle good; 44,224 acres have been ploughed in Hmawbi township; one-seventh of the paddy crops in Hmawbi have been destroyed by floods; price of paddy Rs. 100 per 100 baskets.
Pegu	*Nil*	Total rainfall 124·00 inches; public health and health of cattle good; crops unusually heavy and in fine condition; price of paddy nominal up to 100.
Tharrawaddy (Nov. 17th)	2·40	Total rainfall 105·47 inches; public health good; 7 deaths of cattle in Sanywe township; crops good; about 322 acres have been reaped in the 5 townships; slight damage done to crops in Gyobingauk and Minhla townships from flooding of Myitmaka, Bawbin and Myole Chaungs; price of paddy from Rs. 100 to 125 per 100 baskets.
„ .(„ 24th)	*Nil*	Total rainfall 105·47 inches; public health good; cattle-disease rare; about 702 acres of paddy land have been reaped in the Sanywe township; the crops on higher lands have not matured; in some places the ears are without grain; slight damage on account of flooding has been done to the crops in the Minhla township and loss from drought in the Tapon township; report of areas affected not received; crops in other places flourishing; price of paddy stationary.
Prome . . .	*Nil*	Total rainfall 52·69 inches; public health and health of cattle good; ploughed fields all planted out; crops much benefited by late rains and there is every prospect of good harvest; on high-lying lands the rain has come too late, but the heavy rains 10 days ago seem to have freshened up the country all round, and much is now promising which before seemed likely to turn out a failure; price of paddy Rs. 65 per 100 baskets.
Bassein . . .	*Nil*	Total rainfall 103·64 inches; public health good; cattle-disease slight in Lemyethna; 17 deaths in Bassein township; reaping commenced in parts of district; price of paddy from Rs 100 to 125 per 100 baskets.
Thongwa . . .	*Nil*	Total rainfall 94·09 inches; public health and health of cattle good; about ½ of the replanted crops in the flooded parts of the Shwelaung township good; slight damage to crops from floods in Kyonton and Kyriklat circles, Pyapon township, and from drought in Seitha and Kyonmange circles, Thongwa township, otherwise agricultural prospects good; price of paddy from Rs. 95 to 100 per 100 baskets.
Henzada . . .	*Nil*	Total rainfall 86·63 inches; public health and health of cattle good; prospects of crops good; owing to recent heavy rains, crops have been slightly damaged by flood in Myanoung sub-division and Okepo township; reaping commenced.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
British Burma— (Nov. 29th)—*contd.*		
Amherst (Moulmein)	. . . . .	Total rainfall 166·28 inches; public health and health of cattle good; condition of ripening crops good; reaping progressing on early paddy; in Moulmein town public health and health of cattle good; reaping progressing of *shangale* and *yakine* paddy, average outturn about 20 baskets an acre; nearly 180 acres reaped this week; wages of reaping same as last reported; ripening paddy in good condition; price of *shangale* risen to 100 and *yakine* to Rs. 90 per 100 baskets.
Shwegyin	*Nil*	Total rainfall 139·52 inches; public health and health of cattle good; price of paddy Rs. 85 per per 100 baskets.
Toungoo	*Nil*	Total rainfall 79·68 inches; public health and health of cattle good; prospects of crops good.
Tavoy	*Nil*	Total rainfall 195·44 inches; public health and health of cattle good; prospects of crops very good; estimated area of crops damaged up to date 300 acres.
		General Remarks.—No rain during the week; monsoon at an end total rainfall considerably less in Akyab and Bassein and in the coast districts of the Tenasserim Division than last year; elsewhere rainfall up to average; in Akyab damage caused by inundation of salt water in parts of the Naaf and Koladan townships, and in Kyoukpyu and Sandoway some injury to the ripening crop by the hurricane of 14th and 15th November; in parts of Prome and Tharrawaddy the rain of the middle of November came too late to save the crops on the higher and more thirsty lands, much of which had dried up before the rainfall; some slight damage by floods in Thongwa and Henzada; with these exceptions the prospects of a full crop appear excellent; reaping has commenced of the early rice; cattle-disease very rare; public health good.
(Dec. 1st)		
Akyab	0·06	Total rainfall 183·15; public health and health of cattle good; *letori* crops in Naaf ripe; 50 acres injured in Naaf and 236 in Writtaung west Chittagong by salt water inundation; also slight damage in Koladan and Kyelet townships; crops not sufficiently matured in some places in Rathidaung for want of rain; in other townships crops fair.
Rangoon	*Nil*	Total rainfall 84·23; two deaths from small-pox, otherwise public health good; paddy no supplies; prices nominal.
Bassein	2·40	Total rainfall 106·04; public health good; cattle-disease slight in Thaboung township; one-third of crop in Myoungmeya sub-division reported injured by late rain; price of paddy Rs. 100 to 130 per 100 baskets.
Prome	0·79	Total rainfall 53·48; public health and health of cattle good; crops reported in good condition; rain has done great good, but continuance would be injurious; price of paddy Rs. 85 per 100 baskets.
Kyoukphyu	1·66	Total rainfall 160·85; public health and health of cattle good; damage to crops in Kyoukphyu and Ramri townships estimated at one-third of average yield; township officers' reports not yet received; price of paddy Rs. 25 per 100 baskets.
Sandoway	2·27	Total rainfall 222·24; two deaths from cholera in districts, otherwise public health good; agricultural prospects slightly unfavourable; early sowings all reaped; reaping of later sowings retarded on account of rain; reaping wages Rs. 2 per acre.
Hanthawaddy	. . . . .	Public health and health of cattle good; 45,303 acres ploughed in Hmawbi township, but one-seventh has been destroyed by floods; price of paddy from Rs. 90 to 100 per 100 baskets.
Tharrawaddy	0·80	Total rainfall 106·27; public health and health of cattle good; probable area actually cultivated with paddy 229,798 acres, or an increase of about 23,624 acres; monsoon at an end; condition of reaping crop good, about 1,099 acres have been reaped in Sangune township; price of paddy Rs. 95 to 125 per hundred baskets.
Thonegwa	0·55	Total rainfall 94·64; one death from small-pox, otherwise public health good; 2 deaths of cattle; some damage from recent excessive rain in Shwayloung township and from floods caused by cyclonic wave in Dedaye township; plants in flower somewhat injured; price of paddy Rs. 90 to 100 per 100 baskets.
Henzada	0·20	Total rainfall 86·83; public health and health of cattle good; prospects of crops good; reaping progressing; 500 acres of miscellaneous cultivation reported destroyed by floods in Zaloom township.
Thayetmyo	1·37	Total rainfall 48·65; public health good; 4 deaths of cattle in Myede sub-division from cow-pox; reaping begun; rain during last few days has slightly damaged the crops; prices of paddy Rs. 110 per 100 baskets.
Shwaygyin	0·16	Total rainfall 139·68; 17 deaths from small-pox reported, otherwise public health good; health of cattle good.
Mergui (Nov. 17th)	4·65	Total rainfall 175·84; public health good; cattle healthy; reaping commenced, but main portion of crop not yet ripe; 8 acres destroyed by blight; paddy area about 580 acres more than last year; price of paddy Rs. 80 per 100 baskets.
„ („ 24th)	*Nil*	Total rainfall 175·84; public health good; cattle healthy; reaping commenced, but main portion of crop not ripe yet; price of paddy Rs. 80 per 100 baskets.



Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
British Burmah—*contd.*		
Amherst (Moulmein)	*Nil*	Total rainfall 166·28; public health and health of cattle good; some 2,000 acres damaged by salt-water in Suaton township; reaping of *kankyi* paddy commenced; reaping wages 10 annas per man per day; price of early paddy about Rs. 87 per 100 baskets; in Moulmein town public health and health of cattle good; 200 acres of *shangale* and *yalune* paddy reaped during the week, outturn about 20 baskets an acre; price of paddy from Rs. 90 to 95 per 100 baskets.
Toungoo	0·20	Total rainfall 79 78; public health good; prospects of crops good.
Tavoy	*Nil*	Total rainfall, 195·44; public health and health of cattle good; prospects of crops very good; estimated area of damaged crop 300 acres; price of paddy from Rs. 60 to 65 per 100 baskets. *General Remarks.*—Public health good; no cattle-disease worth speaking of; some rain has fallen over most districts during the week; reaping commenced; the area under paddy is larger than last year, but the increase is not yet accurately ascertained; the crop prospects are still good throughout the province with the exception of parts of the Arakan division and Bassein where considerable damage has been caused by excessive rain.
Assam—		
Gauhati . (Dec. 4th)	No rain	Weather cloudy; lands being broken for *ahu* cultivation; rain wanted for mustard; public health fair.
Sylhet	*Nil*	Crop prospects unchanged; cattle-disease has appeared.
Cachar	0·12	Weather cold and cloudy; sowing of winter crops finished; reaping of *sali* crops in progress; common rice 16 seers per rupee; no small-pox reported.
Dibrugarh	0 08	Weather cloudy; harvesting *sali dhan*; cholera reported in the station.
Mysore and Coorg—		
Bangalore . (Dec. 5th)	No rain	Harvesting of *ragi* continues; crops in good condition; agricultural operations in progress throughout the province; cholera and small-pox still prevalent in Darangere taluk, Shimogah district; prices have slightly fallen; public health good.
Mercara	No rain	Picking and pulping coffee proceeding, outturn good; every promise of a fine rice crop.
Berar & Hyderabad—		
Amraoti	. . . .	*Kharif* harvest in progress; *rabi* crops favourable; wheat 16 and *jowari* 26 seers per rupee.
Akola	. . . .	Weather cool; *rabi* crops good; cotton gathering in progress.
Hyderabad	No rain	Sowing of *rabi* and reaping of *abi* crops continue; fever, ague and cattle-disease prevail in some talukas; prices—wheat 15½, coarse rice 12¼, white *jowar* 23½; yellow *jowar* 31 and *tur* 21¾ seers per current sicca rupee.
Central India States—		
Indore . (Dec. 5th)	*Nil*	Health good; weather seasonable; prices slightly less than last week.
Morar (Gwalior)	*Nil*	Health good; weather seasonable; rain required for *rabi* crops.
Sutna	*Nil*	Health and prospects good.
Neemuch	. . . .	Weather cold; crops thriving; public health good.
Goona	. . . .	Health and prospects good.
Agar	*Nil*	Health and prospects good.
Sehore	*Nil*	Health and prospects good.
Nowgong	*Nil*	Health good; weather seasonable; prices falling.
Rajputana—		
Abu . (Dec. 5th)	. . . .	Cold moderate; weather seasonable.
Sirohee . („ 2nd)	. . . .	Tanks, wells, and health good; crops all sown; weather seasonable.
Marwar . (Nov. 30th)	. . . .	Three months' water in Jodhpur City; tanks and wells almost full; health good; *kharif* all gathered; *rabi* in good condition; cold increasing; prices stationary.
Meywar . (Dec. 2nd)	. . . .	State of wells and tanks very good; health and crops good; weather seasonable.
Harowtee . („ 1st)	. . . .	Weather seasonable; health good; crop prospects fair; prices fallen.
Jhallawar (Nov. 30th)	. . . .	*Kharif* harvested; *rabi* sowings completed; health good.
Ajmere . (Dec. 4th)	. . . .	Slight fever prevalent in district.
Jeypore . („ „)	. . . .	Weather cold and seasonable; prospects fair; prices stationary; health good.
Ulwur . („ „)	. . . .	*Rabi* crops coming up; wells failing; prices steady; health good.
Nepal—		
Katmandu (Nov. 30th)	*Nil*	Weather cold and seasonable; fields being prepared for the sowing of spring crops; rain wanted.

Presidency Post Master.

GOVERNMENT ENGINEERING COLLEGE, HOWRAH.

NOTICE.

Candidates for admission to the Engineer Classes should apply to the Principal before the 31st January 1884. The Session begins on Monday, the 4th February 1884. Candidates for this class must furnish proof that they have passed the Calcutta University Entrance Examination.

An examination for admission to the Mechanical Apprentice Classes will be held at this College on Wednesday and Thursday, the 30th and 31st January. The subjects for examination are—

Arithmetic (the whole).
Algebra (to Simple Equations, inclusive).
Euclid (Books I and II).
English (Grammar and Composition).

Applications for permission to appear at the examination should reach the Principal not later than the 25th January 1884.

Ten scholarships will be awarded to students entering the Engineer Class not being already holders of junior scholarships. The scholarships will be awarded with general reference to the place taken by candidates at the Entrance Examination.

Applications for scholarships will be received by the Principal up to the 30th January.

Every applicant, before admission to the College, will be examined by the College Surgeon as to his physical strength, fitness for manual labour, and eye-sight.

Further particulars will be supplied on application to the Principal.

G. BELLETT,

Officiating Director of Public Instruction.

GOVERNMENT CINCHONA FEBRIFUGE.

This preparation is an efficient substitute for Quinine and can be purchased by Government officers for public and charitable purposes, and by any one taking *twenty pounds* at a time, from the Superintendent, Botanical Garden, Calcutta, *for cash only*, at the following rates:—per four ounce tin *R4-8*; per eight ounce tin, *R8-8*; per pound tin, *R16-8*. The general public can be supplied by the Superintendent, Botanical Gardens, *for cash only*, at the under-noted rates:—per four ounce tin *R5-8*; per eight ounce tin *R10-8*, per pound tin, *R20*. This medicine is also sold by the principal European and Native druggists in Calcutta. Postage 8 annas per four and eight ounce tins, and 12 annas per pound tin, in addition to the foregoing rates.

HENRY F. BLANFORD,

Meteorological Reporter to the Government of India.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The "Indian Law Reports," published under the authority of the Governor General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Office of the Legislative Department at Calcutta, except the copies for officials in the Bengal Presidency, which are distributed by the Bengal Secretariat, and the copies for subscribers registered by Messrs. Thacker, Spink & Co., which are distributed by that firm; and the Madras, Bombay and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

On and from the 1st January, 1884, the terms of subscription and sale will be reduced as follow:—

Terms of subscription, payable annually in advance.

	Without postage.		With postage.	
For the Calcutta Series . .	R10	0	R12	8
" Madras " . . .	" 5	0	" 6	0
" Bombay " . . .	" 7	8	" 8	8
" Allahabad " . . .	" 5	0	" 6	0
Complete set	" 20	0	" 22	8

A part of any series purchased separately, R1.

Persons desiring to subscribe for or purchase the Reports should apply to—

Messrs. Thacker, Spink & Co., Calcutta.
" Thacker & Co., Bombay.
" Higginbotham & Co., Madras.
The Government Central Book Depôt, Bombay.
" " Book Depôt, Allahabad.

Orders and subscriptions for 1884 should be at once remitted.

THE BENGAL LAW REPORTS.

A few sets of the Bengal Law Reports (Volumes 1 to 15) are available at Messrs. Thacker, Spink & Co., Calcutta, at R375 a set.

For sale in Rajputana to Officers stationed there.

Moore's Manual of Family Medicine for India, 4th Edition. *Price—*

To Government Officers (except those mentioned below) and to the public at large, *R4*.

To all Officers employed in Government Departments who are in receipt of salaries under R500 per mensem, on a certificate being furnished declaring that the book is to be purchased only for the personal use of the officer, *R8; packing and postage, 8 annas.*

Apply to the Superintendent, Commissioner's Office, Ajmer.

The following books may be purchased from the Office of Superintendent of Government Printing, India, No. 166, Dhurrumtollah Street, for private use only, which should be stated in the requisition.

No orders can be attended to unless accompanied by a remittance. When postage stamps are forwarded, one anna additional should be sent for every Rupee's worth of stamps, for discount in exchanging them for cash. Service labels or Court Fee stamps are not received.

Books required for the public service cannot be supplied on payment; they are only issued on the authority of the Department to which the indenting officer is subordinate. Applications for them should be made through the Local Government under which the applicant serves.

Just published.

Report of the Indian Education Commission, with Appendices and Statistical Tables. *Price, R5; packing and postage, R1.*

PART V.

Bills introduced into the Council of the Governor General for making Laws and Regulations, or published under Rule 22.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

[First publication.]

The following Bill was introduced into the Council of the Governor General of India for the purpose of making Laws and Regulations on the 14th December, 1883 :—

No. 24 OF 1883.

A Bill to repeal Bengal Regulation XIX of 1810 within the territories administered by the Lieutenant-Governor of the North-Western Provinces.

WHEREAS the provisions of Bengal Regulation XIX of 1810 (*for the due appropriation of the rents and produce of lands granted for the support of mosques, Hindu temples, colleges and other purposes; for the maintenance and repair of bridges, serdis, kattras and other public buildings; and for the custody and disposal of nazúl property or escheats,*) are, in so far as they are still in force within the territories administered by the Lieutenant-Governor of the North-Western Provinces, either obsolete or unnecessary, and it is therefore expedient entirely to repeal the Regulation within those territories; It is hereby enacted as follows :—

Repeal of Bengal Regulation XIX of 1810 in the North-Western Provinces.

1. Bengal Regulation XIX of 1810 is hereby repealed within the territories administered by the Lieutenant-Governor of the North-Western Provinces.

STATEMENT OF OBJECTS AND REASONS.

The object of this Bill, which has been prepared on the recommendation of the Local Government, is to repeal Bengal Regulation XIX of 1810 (*for the due appropriation of the rents and produce of lands granted for the support of mosques, Hindu temples, colleges, and other purposes; for the maintenance and repair of bridges, serdis, kattras, and other public buildings; and for the custody and disposal of nazúl property or escheats*) within the territories administered by the Lieutenant-Governor of the North-Western Provinces. So far as the Regulation vests the superintendence of serâis in the Board of Revenue, it is at variance with the existing practice, as serâis are now managed in the North-Western Provinces entirely by the executive authorities under the immediate orders of the Government, and the Local Government reports that the other provisions of the Regulation, which provide for the management of lands granted as charitable and educational endowments and the superintendence of escheats, are not required for the territories under its administration.

Though the Regulation, in so far as it relates to serâis, is obsolete also in the Lower Provinces, it is still in active operation in those Provinces with regard to a few trusts and small endowments administered by the Board of Revenue, and still governs the procedure there with regard to escheats. Under these circumstances it has been considered best to confine the Bill to the North-Western Provinces and leave it to the Bengal Legislature to legislate for the Lower Provinces if it thinks necessary.

C. P. ILBERT.

The 7th December, 1883.

D. FITZPATRICK,

Secretary to the Government of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

[First publication.]

The following Bill was introduced into the Council of the Governor General of India for the purpose of making Laws and Regulations on the 14th December 1883, and was referred to a Select Committee:—

No. 25 OF 1883.

A Bill to amend the Burma Courts Act, 1875.

XVII of 1875. WHEREAS it is expedient to amend the Burma Courts Act, 1875; It is hereby enacted as follows:—

Short title. 1. (1) This Act may be called the Burma Courts Act, 1883; and

Commencement. (2) It shall come into force at once.

Definition of "section." 2. In this Act, unless there is something repugnant in the subject or context, "section" means a section of the Burma Courts Act, 1875. XVII of 1875.

Alteration of names of certain Courts. 3. (1) In section 6, in clause (a), for the words "Extra Assistant Commissioner of the third class" the word "Myo-ôk" shall be substituted, and in clause (b) the words "of the second class, the Extra Assistant Commissioner of the first class" shall be omitted.

(2) In the table subjoined to section 12, in clause (a), for the words "Extra Assistant Commissioner of the third class" the word "Myo-ôk" shall be substituted, and in clause (b), the words "of the second class, the Court of the Extra Assistant Commissioner of the first class" shall be omitted.

(3) In section 13, the words "of the first or second class" shall be omitted.

(4) The substitutions and omissions made by this section shall be deemed to have been made from the thirty-first day of March, 1882.

Substitution of new section for section 8. 4. For section 8 the following section shall be substituted:—

"8. The Governor General in Council and the Chief Commissioner may, respectively, from time to time, vary the number of Courts mentioned in section six, in clauses (c), (d), (e) and (f), and in clauses (a) and (b)."

Substitution of new section for section 9. 5. For section 9 the following section shall be substituted:—

"9. The Chief Commissioner may, from time to time, vary the local limits of the jurisdiction of any Court mentioned in section six, clauses (a) and (b), and, with the previous sanction of the Governor General in Council, of any Court mentioned in section six, clauses (c), (d), (e) and (f)."

Insertion of section after section 9. 6. After section 9 the following section shall be inserted, namely:—

Validation of certain proceedings already taken. "9A. Any order heretofore passed, or decree made or proceeding taken by any Civil Court in British Burma acting as if it had the jurisdiction of a Court mentioned in section six, clause (a) or clause (b), shall not be invalid merely because the Court was established by the Chief Commissioner instead of by the Governor General in Council or because the local limits of its jurisdiction were varied by the Chief Commissioner without the previous sanction of the Governor General in Council."

Amendment of section 23. 7. In section 23 the following amendments shall be made, namely:—

(a) after the word "Commissioner" each time it occurs, the words "or Deputy Commissioner,"

(b) after the words "Judicial Commissioner" the first time they occur, the words "or Commissioner respectively," and

(c) after the words "Judicial Commissioner," the second time they occur, the words "or Commissioner,"

shall be respectively inserted.

Insertion of section after section 23. 8. After section 23 the following section shall be inserted, namely:—

Power for Chief Commissioner to invest Assistant Commissioners with appellate powers. "23A. The Chief Commissioner may invest any Assistant Commissioner with power to hear appeals from decrees and orders in original suits and proceedings of any Court mentioned in section six, clause (a) or (b).

"The Chief Commissioner may withdraw the power with which any Assistant Commissioner has been invested under this section."

Substitution of new section for section 38. 9. For section 38 the following section shall be substituted, namely:—

Appointment of officers. "38. The presiding officer of the Court of the Judicial Commissioner shall be appointed by the Governor General in Council.

"The presiding officers of all the other Courts mentioned in section six may be appointed and may be removed by the Chief Commissioner."

STATEMENT OF OBJECTS AND REASONS.

THE object of this Bill is to make certain amendments in the Burma Courts Act, 1875 (XVII of 1875), which experience has shown to be required.

2. In the Act as it at present stands the presiding officers of the Courts of the lowest grades are termed Extra Assistant Commissioners of the 1st, 2nd and 3rd class respectively. In 1882 the Subordinate Executive and Judicial Service in British Burma was reorganized, and the designations of the service were changed. The term Extra Assistant Commissioner was restricted to Extra Assistant Commissioners of the 1st and 2nd classes under the old system; and Extra Assistant Commissioners of the 3rd class were styled Myo-ôks. The result is that the present designations of the Subordinate Judicial Officers do not correspond with the designations given to the Subordinate Civil Courts by the Act. This difficulty has hitherto been ignored. Now, however, the Judicial Commissioner, Mr. Jardine, is of opinion that, as the law stands, the nomenclature used in the Courts Act should be adhered to as regards all officers of the Subordinate Judicial Service appointed to preside in Civil Courts. He advises the Chief Commissioner that questions of jurisdiction may arise and may cause inconvenience and loss to suitors; and he reports that a case of the kind has already occurred. This being the view taken by the Judge of the highest Appellate Court, the Chief Commissioner has addressed the Government of India on the subject. He wishes that all doubt on the point should be removed by substituting the words "Extra Assistant Commissioner" for the words "Extra Assistant Commissioner of the 1st and 2nd class," and the word "Myo-ôk" for the words "Extra Assistant Commissioner of the 3rd class" wherever they occur in the Courts Act. With this view section 3 of the Bill has been drafted. It gives the amendments made by the section retrospective effect from the 1st April, 1882, the date of the re-organization of the Subordinate Service.

3. Further difficulties have also arisen from the provisions of sections 8 and 9 of the Act. Under recent orders the Chief Commissioner has power to create additional Myo-ôkships; but in consequence of the provisions of section 8 of the Act additional Myo-ôks appointed by the Chief Commissioner can do no civil work unless the sanction of the Government of India is first obtained to the creation of an additional Civil Court. Again, the duties performed by Extra Assistant Commissioners and those performed by Myo-ôks are practically of the same description. The exigencies of the public service often render necessary the appointment of a Myo-ôk to succeed an Extra Assistant Commissioner or of an Extra Assistant Commissioner to succeed a Myo-ôk in the charge of a township; and the result is that an officer who should preside in a Court of grade (*a*) is appointed to preside in a Court which has hitherto been a Court of grade (*b*), or *vice versâ*. Such changes have from time to time been made by the Chief Commissioner. The Judicial Commissioner is of opinion that, having regard to the provisions of sections 8 and 9 of the Act, such an interchange cannot legally be effected except by, or with the previous sanction of, the Governor General in Council. The inconvenience which would arise if it were held to be necessary to submit a reference to the Government of India on every occasion such as those described is apparent. The administration of the province, and particularly the administration of civil justice, would be seriously hampered. Sections 4 and 5 of the Bill therefore re-enact sections 8 and 9 of the Act in such a form that the Local Government is empowered to vary the number of Courts of grades (*a*) and (*b*), and to vary the local limits of the jurisdiction of these Courts without the previous sanction of the Government of India, and section 6 legalizes the variations in the numbers, and limits of the local jurisdictions, of these Courts, which have heretofore from time to time been made by the Chief Commissioner instead of by the Governor General in Council or by the Chief Commissioner without the previous sanction of the Governor General in Council.

4. The Chief Commissioner states that the Deputy Commissioners in certain districts are overburdened by the pressure of civil appellate duties to the detriment of their executive work, and that, in order to increase their efficiency as executive officers, it is necessary to relieve them of some portion of their appellate jurisdiction. With this object sections 7 and 8 of the Bill have been prepared. The latter section, which is based on the recommendation of the Chief Commissioner, gives him authority to invest an Assistant Commissioner with power to hear certain civil appeals which would ordinarily be heard by the Deputy Commissioner. The former section empowers the Chief Commissioner to transfer to Commissioners of Divisions all or any part of the appellate jurisdiction exercisable under the Act by Deputy Commissioners. It seems desirable to provide this second and additional mode of affording the proposed relief to Deputy Commissioners, as it is possible that the result of transferring civil appellate work from the Deputy Commissioner to the Assistant Commissioner may not always prove satisfactory.

Lastly, under section 38 of the Act, the Chief Commissioner is only empowered to appoint and remove the presiding officers of the Court of the Extra Assistant Commissioner of the 3rd class (now styled the Myo-ôk). The presiding officers of all the other Courts under the Act must be appointed by the Governor General in Council. These provisions have been found to cause practical inconvenience, and the Government of India see no reason why the Chief Commissioner should not have, in regard to civil jurisdiction, like powers to those which the Criminal Procedure Code gives him in regard to criminal jurisdiction. Accordingly, section 9 of the Bill amends section 38 of the Act, and confers power on the Chief Commissioner to appoint and remove the presiding officers of all the Courts mentioned in section 6 of the Act with the exception of the Court of the Judicial Commissioner; the power to appoint the presiding officer of that Court being reserved to the Governor General in Council.

C. P. ILBERT.

The 7th December, 1883.

D. FITZPATRICK,

Secretary to the Government of India.

SUPPLEMENT TO

The Gazette of India.

No. 50.} CALCUTTA, SATURDAY, DECEMBER 15, 1883.

OFFICIAL PAPERS.

A Supplement to the Gazette of India will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known.

Non-Subscribers to the Gazette may receive the Supplement separately on a payment of six Rupees per annum if delivered in Calcutta, or nine Rupees if sent by Post.

No Official Orders or Notifications, the publication of which in the Gazette of India is required by Law, or which it has been customary to publish in the Calcutta Gazette, will be included in the Supplement. For such Orders and Notifications the body of the Gazette must be looked to.

J. WESTLAND,

Offg. Secretary to the Government of India.

DEPARTMENT OF FINANCE AND COMMERCE,

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

INTERNATIONAL EXHIBITION PROPOSED TO BE HELD AT SYDENHAM.

CIR. No. 89 EX.

Extract from the Proceedings of the Government of India, in the Revenue and Agricultural Department,—dated Calcutta, the 11th December 1883.

MUSEUMS AND EXHIBITIONS.

RESOLUTION.

Read the following despatch—

No. 185 (Statis. and Comce.), dated India Office, London, the 18th October 1883.

From—Her Majesty's Secretary of State for India,

To—The Government of India.

I enclose a copy of a letter from the Crystal Palace Company with reference to an International Exhibition proposed to be held at Sydenham next year.

Dated Crystal Palace, London, the 12th September 1883.

From—G. G. CLEATHER, ESQ., *Manager, Crystal Palace Company,*

To—Her Majesty's Secretary of State for India.

I have the honour to inform you that the Directors of the Crystal Palace propose to hold an International Exhibition of arts, manufactures, and scientific, agricultural, and industrial products at the Crystal Palace next year, commencing about April 3rd and closing the end of October.

The Directors have appointed as Executive Commissioner Mr. G. C. Levy, C.M.G., a gentlemen who has had considerable experience in the management of Exhibitions.

The Directors venture to hope that Your Lordship will notify to the Governor General of India the fact that such an Exhibition is to be held, with the view to his bringing it under the notice of the various Governments.

As it is important that no time should be lost, I shall be obliged by your giving the subject of this letter your earliest consideration.

ORDER.—Ordered, that copy of the foregoing papers be forwarded to the Local Governments and Administrations noted in the margin, with a request that publicity may be given to them in the Local Government Gazettes.

Madras.	Punjab.
Bombay.	Central Provinces.
Bengal.	British Burma.
North-Western Provinces and Oudh.	Assam.

Ordered also, that the papers be published in the Supplement to the *Gazette of India.*

GOVERNMENT OF INDIA.

Executive Engineer, Northern Division, Ganges Canal, reports that there has been only a small demand for "paleo," considering the previous drought. Previously irrigated sugar has taken water steadily

Executive Engineer Meerut Division, Ganges Canal, reports that the high supply in the canal has enabled much paleo to be done

Executive Engineer, Bulandshahr Division Ganges Canal, reports that the demand for water has been excessive, and that seed sown on unirrigated land is germinating badly

Executive Engineer Aligarh Division, Ganges Canal, reports that there was a strong demand throughout the month for rabi paleo and kharif crops that had been irrigated previously.

Executive Engineer, Narora Division, Lower Ganges Canal, reports that the demand for "paleo" was, considering the dryness of the season, very slack, and that the cultivators have evidently given up hope of securing crops off 'dofash' land this rabi. Cotton and juar suffered from the dryness of the season in places, but it was a little too late for economical irrigation of them this month

Executive Engineer, Mainpuri Division, Lower Ganges Canal, reports that the Bewar Branch was opened on the 6th, and that there was a strong demand for kharif irrigation and rabi paleo, late kharif crops being cut and rabi crops being sown towards the end of the month.

Executive Engineer, Cawnpore Division, Lower Ganges Canal, reports that the decrease is in the wheat and barley crops, the early sowings of which have not as yet received their first water

Executive Engineer, Etawah Division, Lower Ganges Canal, reports that water is being taken for kharif crops and for preparing land for rabi sowings.

Executive Engineer, Bhognipur Division, Lower Ganges Canal, reports that there was no rain during the month, that distributaries were re-opened after clearances about the 20th, and that there was a moderate demand for paleo.

Executive Engineer, Eastern Jumna Canal, reports that water has been in great demand The area irrigated is far in excess of what is shown, but it will come into next month's return

Executive Engineer, Agra Canal, reports that 'paleo' for rabi began at the end of September, and there has been universal demand for it throughout October. Cotton, juar, and sugarcane also took water up to the 20th October

Executive Engineer, Rohilkhand Canals, reports that there was a demand throughout the month for late rice and rabi paleo, that the supply in all the rivers and canals is below the average and insufficient to meet the demand, and that about 3,000 acres of rabi paleo were done during the month in addition to the rice.

No remarks from the other divisions.

Note.—In addition to the above the following kharif irrigation was also effected, exclusive of that in the Etawah Division, which has not been reported :—

R. A. SARGEAUNT, *Major, R.E.,*
Offg. Under Secretary.

FORT WILLIAM,
The 14th December 1883.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASONS AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 11th DECEMBER 1883.

GENERAL REMARKS.—There has been slight rain in three districts of the Madras Presidency, where the standing crops are good. In the Bombay Presidency some injury has been caused in one district by past excessive rain and in two others by blight, but on the whole the *rabi* crops promise well.

In the Berars and Hyderabad cotton-picking is in progress, and the *rabi* crops are satisfactory. In Central India and Rajputana prospects continue good, but rain is much wanted in one of the Rajputana States, and grass is scarce.

In the Punjab *rabi* sowings are still going on, and prospects are favourable. Rain is generally needed in the North-Western Provinces and Oudh for the *rabi* crops, but those on irrigated lands are doing well. In the Central Provinces the crops are generally promising, though some injury has occurred from frost.

Rain has fallen throughout the greater part of Bengal and Assam, the heaviest falls being reported from Chittagong and Cachar. It has greatly benefited the *rabi* crops in Bengal which were very backward. More rain is needed in western districts, particularly in the Patna Division where none fell. Harvesting of rice is in progress, and, except in Eastern Bengal, and Orissa, the yield will probably be very poor.

An unusually heavy fall of rain occurred in Akyab, and rain has also fallen in three other districts of British Burma. The rice crop which is now being reaped has suffered from salt water, floods and other causes, but the outturn on the whole is expected to be good.

Fever, small-pox, and cholera exist in several districts, but are not epidemic.

Prices are falling in the Punjab.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras (Dec. 12th)—		
Bellary	. . . . .	Standing crops generally good; harvest paddy and *ragi*, yield average, other dry grains, pulse, and oil seed below average; seven deaths from cholera.
Kurnool	. . . . .	Standing crops good; harvest paddy, yield above average.
Ganjam	1·42 (average of 15 stations).	Paddy harvest commenced; fever and small-pox slight in one taluk.
Kistna	·3 (average of 1 station).	Standing crops good; harvest dry paddy and *cholum*, yield below average; fever and small-pox prevalent, cattle-disease in parts.
Chingleput (Madras)	. . . . .	Standing crops good; harvest *kar* paddy and dry grains, yield below average; twenty-two deaths from cholera.
Coimbatore	. . . . .	Standing crops generally good; harvest paddy, *cholum*, *ragi*, and *cumbu*, yield average; 128 deaths from cholera, fever and cattle-disease in parts.
Tanjore	·20 (average of 11 stations).	Standing crops generally good; rain wanted in parts of one taluk; harvest paddy, *cholum*, and *ragi*, yield below average; 223 deaths from cholera.
Madura	. . . . .	Standing crops fair; harvest dry crops, yield about average; cholera decreasing in Madura town, elsewhere slight.
Malabar	. . . . .	Second crop in good condition, except in two taluks; small-pox, fever, and cattle-disease slight.
Travancore	. . . . .	Standing crops good; yield of first crop average; cholera slight. *General Remarks.*—General prospects good.
Bombay—(Dec. 12th)—		
Kurrachee	. . . . .	River at Kotri on 6th 5 feet 4 inches, against 4 feet 6 inches on corresponding date last year; fever generally prevalent; cattle-disease in 5 talukas; loss of 60 buffaloes in Sujawal; 2 fresh cases of small pox in Kurrachee, one imported from Mekran and the other from Bombay; disease prevalent in 5 villages; in districts 8 fresh cases, 2 deaths, 14 remaining sick; *rabi* crops coming on; prices—wheat, red rice, and *bajri* in Kurrachee 24, 28 and 30, in Kotri 36 and 34, in Tatta 24, 28 and 36, and in Jati 20 and 32 lbs. per rupee respectively.
Hyderabad	. . . . .	Weather seasonable; small-pox in mild type in 5, fever in 11, and cattle-disease in 4 talukas; wheat 25½, *bajri* 25½, *jowari* 40, red rice 24, and white rice 20 pounds per rupee.
Ahmedabad	. . . . .	Standing crops healthy; slight fever in Dholka, Viramgaum, and Sanaud; small-pox in Gogo; *bajri* 29¾ and wheat 26½ pounds per rupee.
Baroda	. . . . .	Cholera disappeared from Naosari division; fever in some parts of Naosari, Baroda, and Kadi divisions; cotton and sugarcane in good condition; *rabi* sowing completed; harvesting of *kharif* crops almost finished; prices—*bajri* 33, rice 23 and 24 pounds per rupee.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay,—contd.		
Surat	. . . . .	*Rabi* crops healthy; fever generally prevails in almost all talukas; cholera in Chikli, 15 cases, 9 deaths; *jowari* 40 and *nagli* 48 pounds per rupee.
Nasik	. . . . .	*Kharif* crops nearly reaped; young *rabi* crops healthy; public health good; no cattle-disease; *bajri* 31, wheat 33, and rice 29 pounds per rupee.
Colaba (Bombay) .	. . . . .	Abnormal temperature 6° to 2° cool; vapour in air defective; wind normal.
Poona	. . . . .	*Rabi* crops thriving; prices—*bajri* 41 and *jowari* 52; in Poona *bajri* 35 and *jowari* 48 pounds per rupee.
Ahmednagar . .	. . . . .	*Rabi* sowing finished in parts; *bajri*—maximum 54 pounds in Jamkhed, minimum 39 in Sangamner; *jowari*—maximum 72 in Jamkhed, minimum 48 in Sangamner.
Sholapore . . .	. . . . .	Cholera in Malsiras taluka, 3 cases, 1 fatal; *rabi* crops, especially *jowari*, have suffered from the late excessive rains; *jowari* 59 and *bajri* 55 pounds per rupee.
Dharwar . . .	. . . . .	Reaping of rice crop completed, that of other early crops in progress; cotton suffering from blight in Ron; other crops good; cholera decreasing, one case fatal; fever in 5 and cattle-disease in one taluka; rice 25 to 41 and *jowari* 52 to 88 pounds per rupee.
Kanara	. . . . .	Much fever in Halyal and Mundgod; small-pox in Kumpta, Hanawar, and Siddapur; rice harvest nearly completed above ghat; common rice in Karwar 12, in district average 17 seers per rupee.
Rajkot	. . . . .	General health good; weather cold; *bajri* 29 and *jowari* 35 pounds per rupee. *General Remarks.*—River low in Sind; *rabi* crops in Sholapur injured by late excessive rain; cotton and *jowari* suffering from blight in parts of Dharwar and Kaladgi; *rabi* prospects otherwise good; fever, cholera, cattle-disease, and small-pox in several districts.
Bengal—(Dec. 13th).		
Chittagong . . .	8·45	Heavy rain has partly damaged the standing crop, and the outturn will be indifferent; prices gradually rising; general health good.
Dacca	1·59	Harvesting of *amun* paddy nearly completed; *roachia* paddy being cut; prospects of winter crops good.
24-Pergunnahs . .	3·34	Prospects of crops continue unfavourable; rain has done some injury to the paddy already cut, but not removed from the field, but has done good to *rabi* crops; average yield of the rice harvest estimated at from 8 to 10 annas; price of common rice 16 seers per rupee; public health fair, though cases of cholera and fever reported from almost all parts of the district.
Moorshedabad . .	1·08	Weather seasonable; the rain has come too late to benefit the *amun* rice, the prospects of which are unchanged; it has, however, much improved the condition of the *rabi* crops; prices stationary; fever still prevalent in the north of the district.
Rajshahye . . .	1·09	Crops benefited by rain, but mustard has suffered slightly; price of rice reported easier in Nowgong.
Burdwan . . .	2·2 Cutwa . 0·63 Culna . 1·76 Raneegunge 0·54	Rain has improved prospects of *rabi* crops; fever prevalent in the sudder, elsewhere public health fair.
Rungpore . . .	0·32	Weather seasonable; *amun* is being reaped; *rabi* crops benefited by rain; fever prevalent.
Bhagulpore . . .	0·26	Prospects of *aghani* rice not good; average expected yield in Banka 6 annas, in the sudder sub-division from 4 to 8 annas, except in thana Colgong, where the outturn will be only 2 annas; in Mudehpoorah from 6 to 8 annas; prospects of *rabi* crops not absolutely bad, but more rain is much needed for them; price of rice 14 seers per rupee.
Purneah . . .	0·10	On the 5th; prospects of both late rice and winter crops unfavourable; late rice is being harvested; average yield estimated at from 6 to 8 annas; cultivation of winter crops retarded, owing to want of moisture; common rice selling at 14 seers per rupee; public health improving.
Patna	*Nil*	*Rabi* crops germinating well, but rain is much wanted; reaping of paddy still going on; public health good.
Durbhanga . . .	*Nil*	Rice crop is being harvested with a poor outturn; *rabi* suffering from want of rain; prices slightly falling; fever very prevalent.
Hazareebagh . .	0·44	Weather bright and cold; more rain would benefit the pulses and oilseeds to a great extent; small-pox in the sudder station; public health generally good.
Cuttack . . .	0·96	Weather cold; *sarad* rice on high lands is being cut, and on low lands it is ripening; *rabi* crops doing well; price of rice almost unchanged; public health generally good. *General Remarks.*—More or less rain fell throughout the province during the week, except in Darjeeling and Julpigoree, and in the Patna division and parts of the Bhagalpur division; the rain has been very beneficial to the *rabi* crops; in Backergunge, it is said that

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
		the rain, accompanied by wind, has done considerable damage by making the paddy fall and breeding insects; the paddy harvest is in progress, and will generally yield a very poor crop, except in Eastern Bengal and Orissa where the outturn is expected to be fair; fever is still reported to be prevalent in several districts.
N.-W. Provinces and Oudh—		
Benares .(Dec. 11th)	No rain	Peas and mustard have flowered and gram has budded; prospects fair; no sickness of men or cattle; prices of food-grains have risen as importations into the city from surrounding parts have slackened.
Allahabad .(„ 12th)	No rain	Crops on dry tracts want rain; health good; prices slightly fallen.
Gorakhpore .(„ 9th)	No rain	Irrigation actively carried on; small-pox and fever in north; prices stationary.
Jhansi .(„ 10th)	No rain	Harvesting of *kharif* still in progress; *rabi* crops doing well; winter rains much needed; prices almost stationary; health of people and cattle good.
Agra .(„ 11th)	No rain	*Rabi* being irrigated, but rain much needed; health good; prices steady.
Bareilly .(„ „)	. . . .	Rain much needed; a slight rise in prices of *juar* and rice; health of people and cattle satisfactory.
Meerut .(„ „)	No rain	Rain wanted for unirrigated crops; health good; supplies sufficient and prices steady.
Kumaun .(„ „)	. . . .	Weather quite fair; wheat springing up; general health good, cattle-disease continues; prices unchanged.
Lucknow .(„ „)	. . . .	Weather clear; no rain; *rabi* and poppy crops are being watered; condition of people and cattle good; markets well supplied; prices unchanged.
Partabgarh .(„ „)	. . . .	*Rabi* crops fairly good; barley and wheat being irrigated; prices almost stationary; fever and small-pox reported from a few villages in Kunda tahsil, health otherwise good.
Sitapur .(„ „)	. . . .	Rain much wanted throughout the district; general health good.
Fyzabad .(„ „)	No rain	Irrigation of *rabi* crops going on; prospects fair; public health good; condition of cattle normal.
Rae Bareilly („ 10th)	No rain	*Rabi* crops on irrigated land look well; rain much needed; general health fair; markets well stocked; prices steady.
Cawnpore .(„ 11th)	. . . .	Weather clear and cold; young *rabi* crops on irrigated land flourishing, but rain much wanted; small-pox in 4 parganas, otherwise health of the people good; prices slightly cheaper.
Farukhabad („ „)	. . . .	Weather seasonable; sky clear; slight fever and small-pox here and there; prospects of crops hopeful.
		General Remarks.—No rain has fallen, it is generally needed; the markets are sufficiently supplied, and prices in most districts steady; the public health and condition of cattle are on the whole good, though slight fever and small-pox continue in several districts, and cattle-disease is still reported in Kumaun.
Punjab—(Dec. 12th)—		
Delhi	. . . .	Health good; slight fall in prices.
Hissar	. . . .	Health good; prices steady.
Umballa	. . . .	Health and *rabi* prospects good; prices stationary.
Jullundur	. . . .	Health good; prices falling.
Lahore	. . . .	Health good and crop prospects good; prices steady.
Ferozepur	. . . .	Health good; *rabi* sowings in progress; fall in prices of barley, grain and *jowar*; slight rise in price of wheat.
Sialkot	. . . .	Health and harvest prospects good; prices stationary.
Rawalpindi	. . . .	Health good and *rabi* prospects good; prices falling.
Peshawar	. . . .	Small-pox still prevalent; prices falling.
Mooltan	. . . .	Health good; *rabi* sowings nearly completed; prices steady.
Dera Ismail Khan .	. . . .	Health and harvest prospects good; prices steady.
Amritsar	. . . .	Health good; prices falling.
		General Remarks.—No rain during the week; small-pox is still prevalent in Peshawar; health elsewhere is good; *rabi* sowings nearly completed.
Central Provinces—		
Nagpur . (Dec. 13th)	. . . .	Weather clear and cold; prospects continue favourable; rice, *juari*, and cotton being gathered; fever declining; prices of *juari* falling.
Jubbulpore . („ „)	. . . .	Weather clear and cold; reaping continues, outturn anticipated below average; cotton picking in progress; *rabi* sowings almost completed; prices stationary; health good.
Saugor . („ 11th)	. . . .	Weather very cold; *kharif* harvest nearly finished; *rabi* prospects excellent; slight damage caused by frost; health good; prices stationary.
Seoni . („ 13th)	. . . .	Weather cool; rice threshing in progress; *tur* damaged by frost; fever prevalent; wheat 23½ seers, and rice 18 seers per rupee.
Hoshangabad („ „)	. . . .	Weather clear and cold; prospects good; cotton picking in progress; fever prevalent; wheat 18 seers, *juari* 24 seers, and rice 10 seers per rupee.
Raipur . („ „)	. . . .	Weather clear and chilly; *kharif* crops almost harvested; *rabi* prospects favourable; public health good; prices rising; common rice 27½ seers, and wheat 25¼ seers per rupee.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Central Provs.—*contd.*		
Sambalpur . (Dec. 8th)	·90	Weather clear and cold; inferior rices being threshed, and found to be light in grain; health good; common rice 38¼ seers per rupee.
Khandwa . („ 13th)	. . . .	Weather cold; *rabi* sowings completed; prospects good; fever prevalent; prices stationary.
		General Remarks.—Weather clear and cold; threshing is in progress; *rabi* prospects generally good; fever in some districts.
British Burma— (Dec. 8th)		
Akyab . . .	7·43	Total rainfall 190·58; public health good; 15 deaths of cattle; 112 acres in Naaf damaged by drought and 200 acres in Writtoung east, also 30 acres from inundation of salt water; no reports yet received of damage on account of late rains.
Rangoon . .	*Nil*	Total rainfall 84·23; 3 deaths from small-pox, otherwise public health good; paddy no supplies; prices nominal.
Bassein . . .	0·28	Total rainfall 106·32; public health good; 76 deaths of cattle; land revenue remissions largely applied for in Shegwin and Kangyidaung townships; on the whole a crop equal to last year's cannot be anticipated; price of paddy Rs. 100 to 125 per 100 baskets.
Prome . . .	*Nil*	Total rainfall 53·48; public health and health of cattle good; only 6 deaths of latter reported; crops reported in good condition; harvest commenced on 26th November; price of paddy Rs. 85 per 100 baskets.
Kyonkphyu . . .	. . . .	District report not yet received.
Sandoway . . .	0·42	Total rainfall 222·86; 2 deaths from cholera, otherwise public health good; agricultural prospects same as last week; reaping later sowings commenced.
Hanthawaddy . .	. . . .	Public health and health of cattle good; some damage from inundation of salt water in Tamanaing township; one-seventh of crop destroyed by floods in Hmawbi township; some damage also in Hlaing township; price of paddy from Rs. 95 to 105 per 100 baskets.
Pegu (Dec. 7th) . .	3·75	Total rainfall 128·34; small-pox and measles reported in two circles, otherwise public health good; health of cattle generally good; prospects of crops good; some slight damage by insects reported; late rains have improved paddy in high lands; reaping commenced in some circles; price of paddy Rs. 120 per 100 baskets.
„ („ 8th) .	*Nil*	Total rainfall 128·34; small-pox and measles still prevailing to a limited extent, otherwise public health good; cattle healthy; paddy being reaped; price of paddy Rs. 90 to 100 per 100 baskets.
Tharrawaddy . .	*Nil*	Total rainfall 106·27; public health good; cattle healthy; paddy area 229,798 acres or an increase of 51,176, not 23,624 acres as reported last week, over last year's area; 230 acres reported as destroyed by drought and flood in the Minhla and Gyobingouk townships; condition of reaping crop good; about 7,884 acres reaped in Samgre township; price of paddy Rs. 95 to Rs. 125 per 100 baskets.
Thonegwa . . .	*Nil*	Total rainfall 94·64; public health good; 12 deaths of cattle; slight damage to crops by insects in Shweyloung township, otherwise agricultural prospects good; price of paddy Rs. 90 to 100 per 100 baskets.
Henzada . . .	*Nil*	Total rainfall 86·83; public health and health of cattle good; paddy estimated destroyed by flooding of hill stream, 4,200 acres in Okpo, 2,000 in Kanaung, and 4,037 in Kyangin townships; reaping progressing; crops promise well where not destroyed by floods.
Thayetmyo . . .	*Nil*	Total rainfall 48·65; public health good; reaping begun; price of paddy Rs. 110 per 100 baskets.
Shweygyin . . .	*Nil*	Total rainfall 139·68; public health and health of cattle good, harvesting commenced in high lands; price of paddy Rs. 90 per 100 baskets.
Amherst (Moulmein) .	*Nil*	Total rainfall 166·28; public health and health of cattle good, reaping progressing; in Moulmein town public health and health of cattle good; reaping of *kankyi* paddy commenced on 4th instant, nearly 20 acres of *kankyi* and 200 acres of *shangli* and *yahaing* paddy reaped, outturn about 4,400 baskets; price of paddy Rs. 80 to 90 per 100 baskets.
Toungoo . . .	*Nil*	Total rainfall 79·88; public health good; prospects of crops good.
Tavoy . . .	*Nil*	Total rainfall 195·44, public health and health of cattle good; prospect of crops very good; reaping of early paddy completed, price of paddy Rs. 50 to 65 per 100 baskets.
Mergui . . .	. . . .	No report received
		General Remarks.—Health of man and beast good; no rain during week, except in Akyab where an unusually heavy fall took place for this season of the year; considerable damage has been done in various districts by inundations of salt water, floods, drought and here and there by insects; but these causes of damage are always more or less present, and cannot materially affect the general character of this year's crop compared with the crop of last year; Bassein is the only district which was suffered seriously from the unprecedentedly heavy rain of the middle of November; on the whole the prospects of the crops continue good; reaping has begun in several districts.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Assam—(Dec. 12th)		
Gauhati . . .	0·75	Weather seasonable; mornings and nights foggy; reaping of *sali* crops in progress; sowing of mustard nearly finished; public health fair.
Sylhet . . .	2·57	Unusual heavy rain has done harm to rice crops; prospects not favourable; public health good.
Cachar . . .	7·21	Weather cold; reaping of *sali* crops continues; common rice 15 seers per rupee; general health good.
Dibrugarh . . .	0·21	Weather cold; harvesting *sali dhan*; cholera abating.
Mysore and Coorg—		
Bangalore . (Dec. 12th)	*Nil*	Standing crops in good condition; harvesting of *ragi* continues; prospects of season favourable; public health good; prices stationary.
Mysore . . .	. . . .	No report received.
Mercara . (Dec. 12th)	*Nil*	Paddy harvest commencing, yield likely to be good; coffee crop half picked, yield satisfactory; much difficulty experienced in obtaining carriage for the crop to the coast, cart hire demanded high.
Berar & Hyderabad—		
Amraoti . (Dec. 12th)	. . . .	Weather cool; cotton gathering and *kharif* harvest progressing; *rabi* crops good; wheat 16 and *jowari* 26 seers per rupee.
Akola . . .	. . . .	Cotton picking in hand; *rabi* crops in good condition.
Hyderabad . (Dec. 12th)	*Nil*	Sowing of *rabi* and *abi* crops continues; public health generally good, but cholera prevails in one taluka; prices—wheat 15¾, coarse rice 12½, white *juar* 24½, yellow *juar* 29, and *tur* 23½ seers per current sicca rupee.
Central India States—		
Indore . (Dec. 12th)	*Nil*	Health good; weather seasonable; prices same as last week.
Morar (Gwalior) . .	*Nil*	Health good; weather seasonable; prices stationary.
Sutna . . .	*Nil*	Health good.
Neemuch . . .	. . . .	Public health and agricultural prospects good; prices of grain rising.
Goona . . .	. . . .	Health and prospects good.
Agar . . .	*Nil*	Health and prospects good.
Sehore . . .	*Nil*	Weather clear; prospects and health good.
Nowgong . . .	*Nil*	Weather clear; health good; prices steady.
Rajputana—		
Abu . (Dec. 12th)	. . . .	Cold pretty severe; weather seasonable.
Sirohee . („ 9th)	. . . .	Tanks and wells fair; health and crop prospects good; weather seasonable.
Marwar . („ 7th)	. . . .	Three months' water in Jodhpur city; tanks and wells almost full; health good; *kharif* gathered; *rabi* crops flourishing; cold intense; prices stationary.
Harowtee . („ 8th)	. . . .	Crops fair, but rain urgently needed; weather clear; crops and health good; some small-pox; prices steady; grass supply scanty.
Jhallawar („ 7th)	. . . .	Weather seasonable; *rabi* crops good; some fever.
Ajmere . („ 11th)	*Nil*	Few cases of cattle-disease reported from Merwara.
Jeypore . („ „)	*Nil*	Weather seasonable; prospects fair; prices steady; health good.
Ulwur . („ „)	. . . .	*Rabi* sowings continue; prices steady; health good.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House on Friday, the 7th December, 1883.

PRESENT:

His Excellency the Viceroy and Governor General of India, K.G., G.M.S.I., G.M.I.E., *presiding*.
The Hon'ble J. Gibbs, C.S.I., C.I.E.
The Hon'ble C. P. Ilbert, C.I.E.
The Hon'ble Sir S. C. Bayley, K.C.S.I., C.I.E.
The Hon'ble T. C. Hope, C.S.I., C.I.E.
The Hon'ble Sir A. Colvin, K.C.M.G.
The Hon'ble Rájá Siva Prasád, C.S.I.
The Hon'ble W. W. Hunter, LL.D., C.I.E.
The Hon'ble Durgá Charan Láhá.
The Hon'ble H. J. Reynolds.
The Hon'ble H. S. Thomas.
The Hon'ble G. H. P. Evans.
The Hon'ble Kristodás Pál, Rai Bahádur, C.I.E.
The Hon'ble J. W. Quinton.
The Hon'ble T. M. Gibbon, C.I.E.
The Hon'ble R. Miller.
The Hon'ble Amír Alí.

NEW MEMBERS.

The Hon'ble MR. GIBBON, the Hon'ble MR. MILLER and the Hon'ble MR. AMÍR ALÍ took their seats as Additional Members.

BENGAL REGULATION XIX OF 1810 REPEAL BILL

The Hon'ble MR. ILBERT moved for leave to introduce a Bill to repeal Bengal Regulation XIX of 1810 within the territories administered by the Lieutenant-Governor of the North-Western Provinces. He said:—

"The object of this Bill, which has been prepared on the recommendation of the Local Government, is to repeal Bengal Regulation XIX of 1810 (*for the due appropriation of the rents and produce of lands granted for the support of mosques, Hindú temples, colleges, and other purposes; for the maintenance and repair of bridges, saráis, kattras, and other public buildings; and for the custody and disposal of nazúl property or escheats*) within the territories administered by the Lieutenant-Governor of the North-Western Provinces. So far as the Regulation vests the superintendence of saráis in the Board of Revenue, it is at variance with the existing practice, as saráis are now managed in the North-Western Provinces entirely by the executive authorities under the immediate orders of the Government, and the Local Government reports that the other provisions of the Regulation, which provide for the management of lands granted as charitable and educational endowments and the superintendence of escheats, are not required for the territories under its administration.

"Though the Regulation, in so far as it relates to saráis, is obsolete also in the Lower Provinces, it is still in active operation in those Provinces with regard to a few trusts and small endowments administered by the Board of Revenue, and still governs the procedure there with regard to escheats. Under these circumstances, it has been considered best to confine the Bill to the North-

Western Provinces and to leave it to the Bengal Legislature to legislate for the Lower Provinces if it thinks necessary."

The Motion was put and agreed to.

BURMA COURTS BILL.

The Hon'ble Mr. Ilbert also moved for leave to introduce a Bill to amend the Burma Courts Act, 1875. He said :—

"The object of this Bill is to make certain amendments in the Burma Courts Act, 1875 (XVII of 1875), which experience has shown to be required.

"In the Act as it at present stands, the presiding officers of the Courts of the lowest grades are termed Extra Assistant Commissioners of the 1st, 2nd and 3rd class respectively. In 1882, the Subordinate Executive and Judicial Service in British Burma was reorganized, and the designations of the service were changed. The term Extra Assistant Commissioner was restricted to Extra Assistant Commissioners of the 1st and 2nd classes under the old system; and Extra Assistant Commissioners of the 3rd class were styled Myo-ôks. The result is that the present designations of the Subordinate Judicial Officers do not correspond with the designations given to the Subordinate Civil Courts by the Act. This difficulty has hitherto been ignored. Now, however, the Judicial Commissioner, Mr. Jardine, is of opinion that, as the law stands, the nomenclature used in the Courts Act should be adhered to as regards all officers of the Subordinate Judicial Service appointed to preside in Civil Courts. He advises the Chief Commissioner that questions of jurisdiction may arise and may cause inconvenience and loss to suitors; and he reports that a case of the kind has already occurred. This being the view taken by the Judge of the highest Appellate Court, the Chief Commissioner has addressed the Government of India on the subject. He wishes that all doubt on the point should be removed by substituting the words 'Extra Assistant Commissioner' for the words 'Extra Assistant Commissioner of the 1st and 2nd class,' and the word 'Myo-ôk' for the words 'Extra Assistant Commissioner of the 3rd class,' wherever they occur in the Courts Act. With this view section 3 of the Bill has been drafted. It gives the amendments made by the section retrospective effect from the 1st April, 1882, the date of the reorganization of the Subordinate Service.

"Further difficulties have also arisen from the provisions of sections 8 and 9 of the Act. Under recent orders, the Chief Commissioner has power to create additional Myo-ôkships; but, in consequence of the provisions of section 8 of the Act, additional Myo-ôks appointed by the Chief Commissioner can do no civil work unless the sanction of the Government of India is first obtained to the creation of an additional Civil Court. Again, the duties performed by Extra Assistant Commissioners and those performed by Myo-ôks are practically of the same description. The exigencies of the public service often render necessary the appointment of a Myo-ôk to succeed an Extra Assistant Commissioner or of an Extra Assistant Commissioner to succeed a Myo ôk in the charge of a township; and the result is that an officer who should preside in a Court of grade (*a*) is appointed to preside in a Court which has hitherto been a Court of grade (*b*), or *vice versâ*. Such changes have from time to time been made by the Chief Commissioner. The Judicial Commissioner is of opinion that, having regard to the provisions of sections 8 and 9 of the Act, such an interchange cannot legally be effected except by, or with the previous sanction of, the Governor General in Council. The inconvenience which would arise if it were held to be necessary to submit a reference to the Government of India on every occasion such as those described is apparent. The administration of the province, and particularly the administration of civil justice, would be seriously hampered. Sections 4 and 5 of the Bill therefore re-enact sections 8 and 9 of the Act in such a form that the Local Government is empowered to vary the number of Courts of grades (*a*) and (*b*), and to vary the local limits of the jurisdiction of these Courts without the previous sanction of the Government of India, and section 6 legalizes the variations in the numbers, and

limits of the local jurisdictions, of these Courts, which have heretofore from time to time been made by the Chief Commissioner instead of by the Governor General in Council or by the Chief Commissioner without the previous sanction of the Governor General in Council.

"The Chief Commissioner states that the Deputy Commissioners in certain districts are overburdened by the pressure of civil appellate duties to the detriment of their executive work, and that, in order to increase their efficiency as executive officers, it is necessary to relieve them of some portion of their appellate jurisdiction. With this object, sections 7 and 8 of the Bill have been prepared. The latter section, which is based on the recommendation of the Chief Commissioner, gives him authority to invest an Assistant Commissioner with power to hear certain civil appeals which would ordinarily be heard by the Deputy Commissioner. The former section empowers the Chief Commissioner to transfer to Commissioners of Divisions all or any part of the appellate jurisdiction exercisable under the Act by Deputy Commissioners. It seems desirable to provide this second and additional mode of affording the proposed relief to Deputy Commissioners, as it is possible that the result of transferring civil appellate work from the Deputy Commissioner to the Assistant Commissioner may not always prove satisfactory.

"Lastly, under section 38 of the Act, the Chief Commissioner is only empowered to appoint and remove the presiding officers of the Court of the Extra Assistant Commissioner of the 3rd class (now styled the Myo-ôk). The presiding officers of all the other Courts under the Act must be appointed by the Governor General in Council. These provisions have been found to cause practical inconvenience, and the Government of India see no reason why the Chief Commissioner should not have, in regard to civil jurisdiction, like powers to those which the Criminal Procedure Code gives him in regard to criminal jurisdiction. Accordingly, section 9 of the Bill amends section 38 of the Act and confers power on the Chief Commissioner to appoint and remove the presiding officers of all the Courts mentioned in section 6 of the Act with the exception of the Court of the Judicial Commissioner; the power to appoint the presiding officer of that Court being reserved to the Governor General in Council."

The Motion was put and agreed to.

INDIAN EMIGRATION BILL.

The Hon'ble Mr. Ilbert also presented the Report of the Select Committee on the Bill to amend the law relating to the Emigration of Natives of India.

RANGOON TRAMWAYS BILL.

The Hon'ble Mr. Ilbert also presented the Report of the Select Committee on the Bill to authorize the making, and to regulate the working, of Street Tramways in Rangoon.

BENGAL TENANCY BILL.

The Hon'ble Sir Steuart Bayley moved that the Hon'ble Mr. Amír Alí be added to the Select Committee on the Bill to amend and consolidate certain enactments relating to the law of Landlord and Tenant within the territories under the administration of the Lieutenant-Governor of Bengal.

The Motion was put and agreed to.

CRIMINAL PROCEDURE CODE AMENDMENT BILL.

His Excellency the President said :—

"I would now ask the members of this Council to remain for a short time, while I make a statement upon the important subject of the Bill, which is now before the Council, for the amendment of the Criminal Procedure Code. The

course which I am taking upon this occasion is, no doubt, not provided for by the Rules of Business of this Council, but it is not without precedent, and it cannot be doubted that it is advantageous, upon special occasions, that the Viceroy should reserve to himself the right to make, upon behalf of the Government, a statement in this Council, although no question is technically before it, in reference to a matter of great public interest. And I am the more justified, as it seems to me, in taking this somewhat unusual course, because I have observed that complaints have been made in many quarters of the silence of the Government during the last two months upon the question to which I am about to refer, and that it has been said that they ought, before this, to have given some explanation to the public of the steps which they had been taking in regard to this matter. I, and I am sure all my colleagues, greatly regret that it should have been thought by any one that the Government of India have in any respect acted with a want of consideration for the feelings of the opponents of this measure, or with any want of courtesy to those who have addressed representations to the Government upon the subject. I can truly say that nothing could be further from our intention than any such want of courtesy or of consideration, and I hope I may be pardoned for saying that nothing could be further from my personal character and disposition than to treat those who are opposed to me on any public measure with any want of consideration or courtesy.

"The statement which I am now about to make will show, as it seems to me, conclusively, that this is the case in regard to the complaint of which I have just spoken, because that statement will establish clearly that the Government were not, until within the last few days, in a position to make any public declaration whatever on any part of their proceedings in reference to this matter. And even now what I have to say may be looked upon as somewhat premature, and must, in some respects, be incomplete, because in the absence of two important members of the Executive Council, who have not yet arrived in Calcutta,—His Excellency the Commander-in-Chief and General Wilson, without whose presence various matters connected with the measure itself, and the mode of proceeding in regard to it, ought not to be determined by the Government,—I am not yet, on some points, in a position to say more than that these points have still to be considered by the Executive Council. But, nevertheless, under the circumstances to which I have adverted, I have thought it right not to delay to state to this Council, at its first meeting here in Calcutta, what has been the action of the Government in regard to this Bill since the conclusion of the sittings of the Legislative Council in this city last March. But as there is no question before the Council at this moment, and as, therefore, this is not the occasion for discussion, I feel bound to abstain from anything like controversy or even argument, and to confine myself for the present as much as possible to a bare statement of facts.

"It will be in the recollection of all the members of this Council that the last step which was taken with respect to this Bill, on the 9th of March last, was to order that it should be referred, in the usual manner, to the Local Governments for their consideration and report. That reference was duly made, and in course of time the opinions of the Local Governments began to come in. As they came in, they were, of course, each of them carefully examined by the members of the Government. The last of these reports of Local Governments reached Simla on the 24th of July, and the Government then lost no time in carefully and deliberately considering the course which they thought ought to be pursued with respect to this measure, after the examination of the various opinions which had been offered upon it; and they were in a position to address the Secretary of State upon the subject on the 10th of August last.

"I do not think that any one will say, looking to the great importance of this question, and the necessity of proceeding with all due deliberation in regard to it, that any time was lost by the Government, if, having received the last of the opinions of Local Governments on the 24th July, they were ready to lay their views before the Secretary of State in a despatch which left Simla on the 10th of August following.

"In that despatch, the Government of India, while expressing their opinion that the principles of policy upon which the Bill is founded ought not to be abandoned, proposed certain modifications of the measure, calculated, as they hoped and believed, to remove objections which had been urged against some of its proposals upon grounds which did not raise the question of principle. These modifications were the following:—They proposed that the jurisdiction to be conferred by the Bill upon Native Magistrates over European British subjects should be confined to District Magistrates and Sessions Judges *ex officio*. They proposed to leave unchanged the present powers of the Local Governments with respect to the appointment of Justices of the Peace; and they also proposed to adopt a suggestion of Sir Charles Turner, the Chief Justice of Madras, for amending section 526 of the Code of Criminal Procedure. That section enacts that 'whenever it is made to appear that a fair and impartial enquiry cannot be had in any Criminal Court, or that some question of law of unusual difficulty is likely to arise,' the High Court may transfer a case to another Court or to itself. Sir Charles Turner suggested that the High Court should be authorised to make the transfer in any case in which it should be made to appear that 'it was expedient for the ends of justice,' and that it would be desirable to supply what appeared to be a defect in the section by directing that in any case in which, before the commencement of the hearing, the Government, the complainant, or the accused should notify to the Court an intention to make an application for transfer, the Court should adjourn the hearing for such reasonable time as might be required to enable an application to be made and an order obtained upon it.

"These were the modifications which were suggested in our despatch on the 10th August to the Secretary of State. I, in accordance with what I have said just now, shall not upon the present occasion enter into any arguments of these points. Whenever an opportunity for debate arrives, the Government will be quite ready to state the grounds upon which they suggested those modifications, and the views which they entertain in respect to the effect which they will have upon the provisions of the Bill.

"That, in brief, was the nature of the proposals contained in the despatch. To make this statement complete, I ought to say that our hon'ble friend and colleague General Wilson, in regard to this despatch as to the former one, maintained the position which he had previously taken up of objecting to the measure altogether. The despatch, as I have said, went home on the 10th of August; it was considered by Her Majesty's Government at home and by the Secretary of State in Council; and in a reply, dated the 8th of November last, the Secretary of State in Council expressed his concurrence in the proposals of the Government of India. That reply reached Calcutta last Saturday, the 1st of December, and this, consequently, is the earliest opportunity which has been afforded to me since that despatch came into the hands of the Government for making any statement with regard to this matter.

"There is also another question, connected not with the substance of this measure but with the manner of proceeding with it, to which I wish to refer on this the earliest opportunity. In the month of September last, the Government received a memorial from the Chairman of the Anglo-Indian Defence Association, which contained two requests. The first was that the papers which had been received from the Local Governments in connection with this Bill should be published at once; and the second was that further proceedings with regard to the Bill should be stayed until Parliament had had an opportunity of considering the Bill and expressing its opinion upon it. In the reply which was sent to that memorial the memorialists were informed that their first request had already been complied with, and that the papers relating to the matter had been published in the Gazette, where they appeared, I think, on the 8th of September. They were published at the earliest moment possible; we only waited until we had ascertained that the despatch we had sent home was in the hands of the Secretary of State, and until we were informed that he had no objection to the publication of the papers. The second request of the memorialists, namely, that any further proceedings with regard to the Bill should be put off until Parlia-

ment had had an opportunity of discussing the question and of pronouncing an opinion upon it, related to a matter which was essentially and entirely in the hands of Her Majesty's Government. Any question concerning proceedings in Parliament necessarily can only be determined by the Government at home. Such questions are altogether beyond the scope of the Government of India, and the Cabinet alone can decide what course should be taken upon any matter involving the proceedings of either House of Parliament. The memorial was forwarded by the next mail after it had been received to the Secretary of State, and his opinion on the subject of postponement was asked by the Government of India, who only said that the questions raised by the Bill ought in their judgment to be settled, one way or the other, before the end of the next sittings of the Legislative Council in Calcutta. In the same despatch in which the Secretary of State replied to our general proposals, he replied also to that particular request of the Anglo-Indian memorial, and he informed us that Her Majesty's Government do not see any good reason why a measure, which lies entirely within the competence of this Legislative Council and is already before that body, should be postponed till Parliament meets, and they conclude therefore that the Bill will be taken up in the ordinary course of business, so that it may be disposed of during the usual session of the Legislative Council at Calcutta.

"I stated in the debate on the 9th March last as my personal opinion that, if the opponents of the Bill desired to appeal to the House of Commons, I should be the last person to object to such a course. I entertain the same feeling still, and I have made no concealment of it. It will be observed that the Secretary of State in his reply leaves a certain discretion to the Government of India as to the mode of proceeding with regard to this Bill within well-defined limits. I am not yet in a position, in consequence of the absence of the two members of the Executive Council to whom I have referred just now, to say exactly when the next step with regard to this Bill will be taken. It is a subject which will be considered shortly by that Council. The next step, in the ordinary course of business, will be the reference of the Bill to a Select Committee, who will consider the Bill and any amendments which may be proposed in it, and due notice will of course be given to hon'ble members of this Council before any motion to refer the Bill to a Select Committee is brought before them.

"Such is the statement which I desire to make as to the action of the Government of India in respect to this Bill since March last. It shows clearly, as it seems to me, that, until last Saturday, when the despatch from the Secretary of State reached Calcutta, the Government here was not in a position to make any public declaration on the subject. The question was one which was originally referred to the Secretary of State, and the proposed proceedings of the Government of India received his sanction. It was one which, from the circumstances of the case, could not be dealt with by the Government of India, except in consultation with Her Majesty's Government; and one of the points, that relating to the proposal to postpone the Bill until after the meeting of Parliament, was wholly within the province of Her Majesty's Government at home, and could only be decided by them. Until, therefore, we were in possession of the views of Her Majesty's Government, we were debarred altogether from saying anything in public on the subject. I have, however, seen it said that, when Her Majesty's Government at home determined on the course which they were going to take, and the answer which they proposed to send, that course might have been communicated to the Government of India by telegram, and that, after having received that telegram, the Government of India might have made a statement to the public. Now, it appears to me, first, that it would have been inconsistent with ordinary practice, and with official propriety, to make a public statement of this kind upon a telegram unless Her Majesty's Government had directed that we should do so. But, further than that, I cannot think it would have been at all safe for the Government of India to have made any such statement upon a telegraphic communication. Suppose that that had been done, and suppose that when the despatch came, and had been made known to the public, it had been possible to say that there was any inconsistency between the statement made upon the

telegraphic communication and the precise words of the despatch from the Secretary of State. I leave it to the members of this Council to consider whether that would not have produced a result very far from desirable.

"It seems to me that it was absolutely necessary that I should be in a position to do what I have done to-day, namely, to use the precise language of the Secretary of State in explaining his views. Until the words in which those views were expressed were in my possession, I could not with any discretion have spoken in public upon the subject. Then I must also say that it appears to me that the proper place to make the first public declaration upon any proceedings connected with a measure which is before this Legislative Council is in this Legislative Council itself. I think that members of Council might have complained perhaps, if I, as the President of this Council, had made any such statement elsewhere. I am sure that most legislative bodies would undoubtedly have felt that in such a case some kind of slight had been cast upon them, although I have such confidence in the good feeling of the members of this body that I believe that, if I had been in a position to make such a statement, and had thought it right in the interest of the public to do so, some weeks ago, and at a time when this Council was not sitting, they would have overlooked any apparent discourtesy which might have been involved in such course; and, if an opportunity had been afforded me, I should probably not have hesitated to avail myself of it. But, as I have said before, the information was not in my possession until last Saturday, and this is the first public occasion on which a statement of that kind could have been made.

"I will say no more now. The immediate occasion is not, as I have said, one which admits of the introduction of any controversial matter, but I cannot conclude these few remarks without repeating that those who think that I or my colleagues have felt a cold indifference to the representations of those who are opposed to this Bill, are entirely in error. The silence we have maintained till now has, as I have shown, been a necessary silence. Now that I have spoken, I earnestly trust that no word which has fallen from me will tend to add to the bitterness of the present controversy."

The Council adjourned to Friday, the 14th December, 1883.

D. FITZPATRICK,
Secretary to the Government of India,
Legislative Department.

The 21st December 1883.

No. 1676.—Under the provisions of Section 3, Act XXVI of 1881 (The Negotiable Instruments Act, 1881), the Governor General in Council has been pleased to appoint the following persons in the Lower Provinces of the Bengal Presidency to perform the functions of Notaries Public under that Act:—

Syed Hossain Quilly Khan, Sub-Registrar.
Abdur Rohaman, Sub-Registrar.
Babu Kanti Chundra Mitra, Pleader.

PATENTS.

The 20th December 1883.

No. 1869.—Specifications of the undermentioned inventions have been filed, under the provisions of Act XV of 1859, in the Office of the Secretary to the Government of India in the Home Department. Copies have been sent to one of the Secretaries to each of the Governments of Bengal, Fort St. George, Bombay, and the North-Western Provinces. A copy of every specification is open to public inspection, at all reasonable hours, at the Office of the Secretary to the Government of India in the Home Department at the Presidency, upon payment of a fee of one Rupee. A certified copy of any specification will be given to any person requiring the same on payment of the expense of copying:—

No. 188 of 1882.—David Decimus Coath, Engineer, Rangoon, British Burma, for improvements in machinery for preparing, cleaning, and whitening rice.

No. 49 of 1883.—Arthur Butler, of Moteeharee, in the District of Chumparun, Engineer, for improvements in the construction of drills for sowing seed.

No. 84 of 1883.—William Buller Fullerton Elphinstone, Baron Elphinstone, of Carberry Tower, Musselburgh, North Britain, and Charles Wilson Vincent, of Holloway, in the County of Middlesex, England, Electrician, for improvements in dynamo-electric machines.

No. 89 of 1883.—Oswald Rose, of Manchester, in the County of Lancaster, in that part of the United Kingdom, called England, Engineer, for improvements in heating by electricity and in apparatus therefor.

No. 99 of 1883.—James Anthony Graham, Chemist, of Coleman Street, in the City of London, in the United Kingdom of Great Britain and Ireland, for improvements in the method of treating certain vegetable fibrous substances for the production of fibres for spinning, paper-making, and other purposes.

No. 132 of 1883.—Lazare Weiller, of Angoulême, France, Chemist, for improvements in the manufacture of silicious copper and silicious bronze, and the preparation of certain compounds suitable to be employed in such manufacture.

No. 139 of 1883.—Henry Hamilton Remfry, of No. 5, Fancy Lane, in Calcutta, Solicitor and Patent Agent, for improvements in the method of, and means and apparatus for, effectually deodorising and purifying human excreta and rendering same valuable for manurial and fertilizing purposes.

No. 147 of 1883.—Victor Müller, of Panipoota Factory, Tezpore, Assam, for the Borelli Sifter.

No 161 of 1883.—Alfred Cornwell, of Burnswick, in the Colony of Victoria, Potter and Michael Egan, of William Street, Melbourne, in the said Colony, Architect, for an improved process of manufacturing artificial stone.

No 166 of 1883.—Louis John Crossley, of Halifax, John Frederic Harrison, of Bradford, and Walter Emmott, of Halifax aforesaid, all in the County of York, England, Manufacturers, for improvements in electric signalling apparatus, applicable also to other purposes.

No. 182 of 1883.—John William Post, of the City, County, and State of New York, in the United States of America, for improvements in sewing machines.

No. 185 of 1883.—Richard William Palmer and Richard Randell, both of Cheetham, Manchester, in the County of Lancaster, England, Coach-builders, and William Hely, of Bath, in the County of Somerset, England, Coach-builder, for improvements in means for raising, supporting, and lowering the hoods or coverings of carriages.

No. 186 of 1883.—Carroll Livingston Riker, of Brooklyn, in the State of New York and United States of America, Mechanical Engineer, for improvements in combined boiler and steam vacuum

pumps, and in the regulation of the boiler feed and of the water level therein.

No. 190 of 1883.—Brice Tydeman, of Manor House, Crossness, in the Parish of Erith, Kent, England, for improvements in apparatus for bulking or mixing tea, and for weighing and re-filling tea into chests or boxes.

No. 489.—His Excellency the Governor General in Council is pleased to authorize the extension for a period of seven years from 18th June 1884 of the term of the exclusive privilege granted to Richard Johnson, of Allahabad, Coach-builder and Government Contractor, on the 18th June 1870, in respect of his invention for the improvement of thermantidotes.

A. MACKENZIE,

Secretary to the Government of India.

FOREIGN DEPARTMENT.

NOTIFICATIONS.—JUDICIAL.

Fort William, the 20th December, 1883.

No. 3792 *I*.—Under Section 9 of the Cantonments Act, 1880, as extended to the Cantonment of Baroda, in Foreign Department Notification, No. 38 I.-J., dated the 27th January, 1881, the Governor-General in Council is pleased to vest the administration of the Police in the Cantonment of Baroda in the officer holding for the time being the appointment of Cantonment Magistrate at Baroda.

No. 2919 *E*.—The services of Surgeon M. L. Bartholomeusz, lately Agency Surgeon at Zanzibar, are replaced at the disposal of the Government of Bombay.

The 17th December, 1883.

No. 2795 *G*.—With the sanction of Her Majesty's Government, the Governor-General in Council is pleased to recognize the appointment of Mr. L. Biedermann as Consul for Belgium, at Rangoon.

H. M. DURAND,

Offg. Secy. to the Govt. of India.

DEPARTMENT OF FINANCE AND COMMERCE.

NOTIFICATIONS.

Fort William, the 17th December 1883.

No. 1920.—Major Robert Vansittart Riddell, R.E., is appointed to be Mint Master, Calcutta, with effect from the 10th January 1884, or such later date as he may assume charge.

The 21st December 1883.

No. 1931.—Mr. J. E. Cooke, Deputy Accountant General, Bengal, was in charge of the Office of Accountant General, Bengal, from the 18th to the 20th October, 1883, and officiated as Accountant General, Bengal, from the 10th November, 1883, after noon, to the 22nd idem after noon.

No. 1995.—In exercise of the power conferred by Sections 20 and 21 of the Indian Post Office Act, 1866 (XIV of 1866), the Governor General in Council authorises, with effect from the 1st February 1884, the transmission by letter post of Inland Reply Postcards, bearing embossed stamps of ½ anna on each of their two portions, and of Foreign Reply Postcards, bearing embossed stamps of 1½ anna on each of their two portions.

2. Inland Reply Postcards are subject to the conditions which govern inland single postcards: Foreign Reply Postcards are subject to the conditions which govern foreign single postcards.

The 18th December 1883.

No. 1937.

RESOLUTION,—By the Government of India, Department of Finance and Commerce.

READ again the following Proceedings recorded in this Department on the subject of the best means of obtaining early information regarding the monthly receipts and disbursements at the Civil Treasuries in India, in anticipation of the audited and final accounts :—

Account Proceedings, July 1881, Nos. 1152—1161.
" " November 1881, Nos. 2007—17.

RESOLUTION.—In July 1880 the Secretary of State appointed a Committee to enquire into the system of military account and estimate in India, to ascertain

the relations between the Military Account Department and the Comptroller General, and to report whether any defects existed in the system, and the best mode of remedying those defects. This Committee, among other conclusions, decided that for purposes of current finance it was necessary to establish a system by which the Government of India should be informed of the receipts and issues of the Civil Treasuries of the country at a much earlier period than that at which the accounts of audited expenditure could under any circumstances be rendered. In accordance with this decision, the Comptroller General was directed to report to the Department of Finance and Commerce on the 9th of each month the receipts into, and issues from, Civil Treasuries in the preceding month under certain heads; and he was also directed to publish the information in the *Gazette of India*, in order to give the public an approximate idea of the extent to which, as the year goes on, the estimates of revenue and expenditure were being realised. It is not known that the published statements have attracted much attention up to the present time, and as this result may be due to the fact that the account as published is not in such form and detail as to be readily intelligible to the public, the Governor General in Council has now decided to postpone the publication of this information from the 9th to the 16th of the month following that to which the figures relate, because on the latter date the distribution of the revenue under each of the eleven principal heads is known, and the expenditure under *Interest on Ordinary Debt and that charged on Productive Public Works, Opium*, and *Exchange* is ascertained and can be supplied. The form has also been simplified with a view to public convenience.

A copy of the revised form is appended, and an explanatory memorandum of the figures is added.

ORDERED, that the foregoing Resolution be communicated to the Comptroller General, with the request that, commencing with the preliminary accounts for November 1883, the revised form may be adopted, and copies regularly supplied to the Government of India in the Department of Finance and Commerce. The statement will henceforth be published in Part I of the *Gazette of India* under the signature of the Secretary to Government, instead of in Part II as heretofore.

Ordered also, that the foregoing Resolution, and the revised form of account, with explanations, be published in the *Gazette of India* for general information; and also that copies be forwarded to the Press Commissioner for communication to the Public Press.

Explanatory Memorandum.

The receipts in India of the Government of India are as a rule paid into the Civil Treasuries and Presidency Banks, and all outgoings of the Government are disbursed from the same Treasuries and Banks. It is only in the case of a few Departments, and with regard to receipts of no great magnitude, that a Department is allowed to appropriate receipts before they have reached the Treasury and to devote them to meeting the obligations of Government.

2. But a simple account of the receipts and disbursements of the various Civil Treasuries does not correspond, with even the slightest approach to accuracy, to the Revenue and Expenditure account of the Government of India. This is due to the fact that the transactions at the Treasuries include Debt, Deposit, Advance and Remittance transactions, as well as Revenue and Expenditure. Thus, among the receipts and disbursements of the Civil Treasuries are necessarily shown such transactions as those on account of the Public Debt, Judicial, Departmental and Savings Bank Deposits, Money Orders, Remittances, &c.

3. Although the receipts and issues at the Civil Treasuries do not represent even approximately the Revenue and Expenditure of the Government of India, it is manifest that they must always stand in a certain relation to the Revenue and Expenditure, and that the transactions at the Civil Treasuries are the outcome of the receipts of Revenue and disbursements of Expenditure coupled with the Debt and Remittance transactions of the Government of India.

Moreover, it is possible as regards certain heads of Revenue and Expenditure to distinguish at the Treasury between transactions dealing with Revenue or Expenditure and receipts and disbursements which merely represent Debt or Remittance transactions

It is possible, for instance, to draw this distinction in the case of Land Revenue, Opium, Salt, &c., and generally as regards branches of what is techni-

cally called the Civil Department, namely, those branches of the Administration which do not appertain to Departments having a separate organisation for purposes of account and audit. Thus the receipts in connection with the Land Revenue are known to be Revenue, and the disbursements in connection with it are known to be Expenditure; but the receipts from, and issues to, the Post Office deal, for example, with money on account of Money Orders and Savings Banks and cannot be taken as Revenue and Expenditure. The same holds good in the case of the Marine Department, the Public Works Department, the Forest Department (other than in Bombay and Madras), and the Military Department.

4. It is therefore possible to prepare at the Treasuries a monthly account which will show—

(1) the Revenue and Expenditure under certain heads;

(2) the receipts from, and issues to, certain Departments which have a separate system of audit and account.

The Preliminary Statement of Receipts and Payments at Treasuries in India to which this memorandum is attached has been prepared on this principle.

The Revenue, as distinguished from the receipts, under certain heads, which are called Civil Heads, is shown separately, and in the same way the expenditure under certain heads, which are called Heads of Civil Expenditure, is also separately shown.

In the case of the Departments referred to in the preceding portion of this memorandum, which have a separate organisation for purposes of account and audit, the receipts and issues at the Treasuries are shown without any attempt being made to discriminate between Revenue and Expenditure on the one hand and Debt and Remittance transactions on the other.

In the case of the Post Office, the Forest, Telegraph, and Marine Departments, and of the Guaranteed and Subsidized Railways, a net figure is given, *i.e.*, the figure entered in the account is the difference between the receipts and the issues. In the case of the Military Department and the Public Works Department, the transactions of which are heavy, both receipts and issues are given.

In a separate section are shown the Civil Debt and Remittance transactions, namely, the Debt and Remittance transactions not included in the transactions of the Departments for which receipts and issues are shown.

The account necessarily works from the opening to the closing balance of the Treasuries and Banks concerned.

5. An explanation will now be given in detail of the figures included in the four sections of the account. These sections are—

I.—Civil Revenue.

II.—Civil Expenditure.

III.—Receipts into and issues from the Civil Treasuries in the case of Departments which audit and make up their own accounts.

IV.—Debt and remittance transactions other than those of the Departments referred to under III.

6. *Civil Revenue.*—The figures under the heads *Land Revenue, Opium, Salt, Stamps, Excise, Provincial Rates, Customs, Assessed Taxes, Registration,* and *Tributes* represent the entire revenue received in India under those heads. The figures against *Forest* represent the realisations in the Madras and Bombay Presidencies only, together with some very small "Local" transactions in the India section of the accounts. The following table shows the several heads which are included under the head "*Other Civil Revenue,*" and the extent to which the actual Revenue under these heads is shown.

Other Civil Revenue, viz.:—

XII.—Post Office	(Local only.)	XXI.—Interest	(The whole.)
XIV.—Mint	(The whole.)	XXII.—Receipts in aid of Superannuations	"
XV.—Law and Justice	"	XXIII.—Stationery and Printing	"
XVI.—Police	"	XXIV.—Miscellaneous	"
XVII.—Marine	(Non-Departmental.)	XXVIII. & XXXIII. Irrigation and Navigation:—Productive and Non-productive	(The portion in charge of Civil Officers.)
XVIII.—Education	(The whole.)	XXXV.—Civil Buildings, Roads and Services.	(The portion in charge of Civil Officers.)
XIX.—Medical	"		
XX.—Scientific and other Minor Departments	"		

In cases in which only a portion of the revenue under any head is shown under "*Civil Revenue,*" the balance appears under the appropriate head in "*Receipts into Civil Treasuries from, and issues from those Treasuries to, Non-Civil Departments.*"

7. *Civil Expenditure.*—Under *Interest on Ordinary Debt and that charged on Productive Public Works,* and under *Opium,* and *Exchange* is shown the whole expenditure brought to account in India under these heads; nearly the whole of the net exchange figure represents exchange on Secretary of State's bills drawn. The annexed table gives details of the combined head, *Other Civil Expenditure,* and shows the portion of expenditure taken directly under each head. As in the case of *Other Civil Revenue,* any portion of the expenditure under the Heads included in *Other Civil Expenditure* which is not shown under *Other Civil Expenditure* appears under "*Receipts into Civil Treasuries from, and issues from those Treasuries to, Non-Civil Departments.*"

Head	Portion
2. Interest on deposits	(The whole.)
3. Refunds and Drawbacks	"
4. Assignments and Compensations	"
5. Land Revenue	"
7. Salt	"
8. Stamps	"
9. Excise	"
10. Provincial Rates	"
11. Customs	"

17. Mint	(The whole)
18. General Administration	"
19. Law and Justice	"
20. Police	"
21. Marine	(Non-Departmental.)
22. Education	(The whole.)
23. Ecclesiastical	"
24. Medical	(The whole.)
25. Political	"
26. Scientific and other Minor Departments	"
27. Territorial and Political Pensions	"
28. Civil Furlough and Absentee Allowances	"
29. Superannuation Allowances and Pensions	"
30. Stationery and Printing	"
31. Miscellaneous	"
32. Famine Relief	(Outlay by Civil Officers.)
35 Reduction of Debt	(The whole.)
39 & 46. Irrigation and Navigation:—Productive and Non-productive.	(The portion in charge of Civil Officers.)
48. Civil Buildings, Roads and Services.	(The portion in charge of Civil Officers.)

8. *Receipts into Civil Treasuries, &c.*—These figures simply represent Treasury receipts from, and issues to, the several Non-Civil Departments on all the accounts on which they pay in, and draw out, money. In other words, the figures comprise Revenue and Expenditure proper, and Debt and Remittance transactions. It is only when the accounts are made up, by the several Non-Civil Departments having dealings with the Civil Treasuries, *i.e.*, between three and four months after occurrence of the transactions, that it can be stated how much of the receipts and issues represents Revenue and Expenditure. For information on this point, the final account of each month published in the *Gazette of India* must be referred to.

9. *Civil Debt and Remittance transactions.*—The collective head "Other Debt Heads Nett" comprises the following:—

1. Temporary Loans.
2. Special Loans.
3. Treasury Notes.
4. Deposits of Service Funds.
5. Savings Bank Deposits.
6. Balances of Provincial Savings.
7. Appropriation for Reduction of Debt.
8. Excluded Local Funds.
9. Political Funds.
10. Railway Funds.
11. Military Prize Funds.
12. Departmental and Judicial Deposits.
13. Advances Repayable.
14. Permanent Advances.
15. Accounts with Foreign States.
16. Suspense Accounts.
17. Cheques and Bills.
18. Departmental Balances.
19. Miscellaneous.
20. Loans to Municipalities, Native States, &c.
21. Local Remittances and Adjustments.
22. Local Bills.
23. Foreign Bills.
24. Foreign Remittances.
25. Accounts between Civil and Civil.
26. Remittance Account between England and India, excluding Council Bills.

10. Finally, the figures shown in the present account as the Budget of 1883-84 and Accounts of 1882-83 represent the Estimates and Accounts of payments into, and issues from, Civil Treasuries, and are not the Estimates and Accounts attached to the Budget Statement as Estimates and Accounts of Revenue and Expenditure only, including transactions both in India and in England. As already explained, the figures in some cases represent Revenue and Expenditure, while in other cases they represent Revenue and Expenditure combined with Debt and Remittance transactions.

Monthly Preliminary Statement of Receipts and Payments at Civil Treasuries in India published in accordance with Resolution in this Department, No. 1937, dated the 18th December 1883.

HENRY F. BLANFORD,

Meteorological Reporter to the Government of India.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The "Indian Law Reports," published under the authority of the Governor General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Office of the Legislative D partment at Calcutta, except the copies for officials in the Bengal Presidency, which are distributed by the Bengal Secretariat, and the copies for subscribers registered by Messrs. Thacker, Spink & Co., which are distributed by that firm; and the Madras, Bombay and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

On and from the 1st January, 1884, the terms of subscription and sale will be reduced as follow:—

Terms of subscription, payable annually in advance.

	Without postage.		With postage.	
For the Calcutta Series	R10	0	R12	8
" Madras "	" 5	0	" 6	0
" Bombay "	" 7	8	" 8	8
" Allahabad "	" 5	0	" 6	0
Complete set	" 20	0	" 22	8

A part of any series purchased separately, R1.

Persons desiring to subscribe for or purchase the Reports should apply to—

Messrs. Thacker, Spink & Co., Calcutta.
„ Thacker & Co., Bombay.
„ Higginbotham & Co., Madras.
The Government Central Book Depôt, Bombay.
„ „ Book Depôt, Allahabad.

Orders and subscriptions for 1884 should be at once remitted.

THE BENGAL LAW REPORTS.

A few sets of the Bengal Law Reports (Volumes 1 to 15) are available at Messrs. Thacker, Spink & Co., Calcutta, at R375 a set.

For sale in Rajputana to Officers stationed there.

Moore's Manual of Family Medicine for India, 4th Edition. *Price*—
To Government Officers (except those mentioned below) and to the public at large, *R4*.
To all Officers employed in Government Departments who are in receipt of salaries under R500 per mensem, on a certificate being furnished declaring that the book is to be purchased only for the personal use of the officer, *R3; packing and postage, 6 annas.*
Apply to the Superintendent, Commissioner's Office, Ajmer.

☞ The following books may be purchased from the Office of Superintendent of Government Printing, India, No. 166, Dhurrumtollah Street, for private use only, which should be stated in the requisition.

No orders can be attended to unless accompanied by a remittance. When postage stamps are forwarded, one anna additional should be sent for every Rupee's worth of stamps, for discount in exchanging them for cash. Service labels or Court Fee stamps are not received.

Books required for the public service cannot be supplied on payment; they are only issued on the authority of the Department to which the indenting officer is subordinate. Applications for them should be made through the Local Government under which the applicant serves.

Just published.

102. Emigration to Straits Settlements and adjoining Native States.
103. Application of Act to emigration from British ports to French and Dutch colonies.
104. Application of Act to proceedings in British India connected with emigration from French ports in India to French colonies.
105. Prohibition of departure by land of a Native of India under an agreement to labour for hire in some country beyond the sea.

SCHEDULE I.—COUNTRIES TO WHICH EMIGRATION IS LAWFUL.

SCHEDULE II.—FORM OF RECRUITER'S LICENSE.

SCHEDULE III.—PROBABLE LENGTHS OF VOYAGE UNDER THIS ACT.

Indian Emigration Act, 1883.

(Chapter II.—Ports from which, and Countries to which, Emigration is lawful.)

An Act to amend the law relating to the Emigration of Natives of India.

WHEREAS it is expedient to amend the law relating to the emigration of Natives of India; It is hereby enacted as follows:—

CHAPTER I.

PRELIMINARY.

Short title and extent.

1. (1) This Act may be called the Indian Emigration Act, 1883.

(2) It extends to the whole of British India.

Exemption of Government vessels.

2. Nothing in this Act or in any rule made under this Act shall apply to any vessel belonging to, or in the service of, Her Majesty or of the Government of India.

Commencement.

3. Except as to the power to make rules, this Act shall come into force on such day as the Governor General in Council, by notification in the *Gazette of India*, appoints.

Repeal of enactments.

4. On and from the day on which this Act comes into force, the Indian Emigration Act, 1871, and Act No. XIV of 1872 (*to exempt the Straits Settlements from the Indian Emigration Act, 1871*) shall be repealed.

Saving for proceedings under repealed enactments.

5. All notifications issued, contracts entered into, rules and appointments made, and licenses granted under any enactment hereby repealed, and in force on the day on which this Act comes into force, shall (so far as they are consistent with this Act) be deemed to have been respectively issued, entered into, made and granted under this Act.

Definitions.

6. In this Act, unless there is something repugnant in the subject or context,—

(1) "Emigrate" and "emigration" denote the departure by sea out of British India of a Native of India under an agreement to labour for hire in some country beyond the limits of India other than the island of Ceylon or the Straits Settlements:

Provided that a domestic servant when accompanying his employer shall not be deemed to emigrate within the meaning of the above definition:

(2) "Emigrant" means any Native of India who emigrates, or has emigrated, within the meaning of the above definition, or who has been registered under this Act as an emigrant, and includes any dependent of an emigrant:

(3) "Dependent" means any of the following persons accompanying any emigrant, namely:—

(a) any woman who has not entered into an agreement to emigrate under this Act;

(b) any child in whose name and on whose behalf any such agreement has not been entered into; and

(c) any aged or incapacitated relative or friend:

(4) "Magistrate" means, in the Presidency-towns, a Presidency Magistrate, and elsewhere a District Magistrate or a Sub-divisional Magistrate, and includes also any person appointed by the Local Government, by name or by virtue of his office, to perform in any local area the functions of a Magistrate under this Act:

(5) "Registering Officer" means any person appointed by the Local Government, by name or by virtue of his office, to perform in any local area the functions of a Registering Officer under this Act:

(6) "Recruiter" includes a head recruiter or other person who collects or receives emigrants recruited by other persons:

(7) "Vessel" includes anything made for the conveyance by water of human beings or property:

(8) "Emigrant-vessel" means a vessel the master of which is licensed under this Act to carry emigrants therein: and

(9) "Master" means any person (except a pilot or harbour-master) having for the time being control or charge of a vessel.

CHAPTER II.

PORTS FROM WHICH, AND COUNTRIES TO WHICH, EMIGRATION IS LAWFUL.

Ports from which emigration is lawful.

7. (1) Emigration shall not be lawful except from the ports of Calcutta, Madras and Bombay, and from such other ports as the Governor General in Council, from time to time, by notification in the *Gazette of India*, declares to be ports from which emigration is lawful.

(2) The Governor General in Council may at any time, by a like notification, revoke any notification issued under this section.

(3) The Local Government may, from time to time, by notification in the official Gazette, fix for the purposes of this Act the limits of any port from which emigration is lawful.

Countries to which emigration is lawful.

8. (1) Emigration shall not be lawful except to the countries specified in the first schedule hereto annexed, and to such other countries

Indian Emigration Act, 1883.
(Chapter IV.—Protectors of Emigrants and Medical Inspectors.)

as the Governor General in Council, from time to time, by notification in the *Gazette of India*, declares to be countries to which emigration is lawful.

(2) Every notification under this section must contain a declaration that the Governor General in Council has been duly certified that the Government of the country to which the notification refers has made such laws and other provisions as the Governor General in Council thinks sufficient for the protection of emigrants to that country during their residence therein.

Power for Governor General in Council to prohibit emigration to any country.

9. (1) Whenever the Governor General in Council has reason to believe that any of the grounds, hereinafter mentioned, for prohibiting emigration to any country to which emigration is lawful, exists, he may, by notification in the *Gazette of India*, declare that emigration to that country shall cease to be lawful from a day specified in the notification; and from that day emigration to that country shall accordingly cease to be lawful.

(2) The grounds referred to in sub-section (1) of this section are—

(a) that the plague or any other epidemic disease dangerous to human life has broken out in the country;

(b) that the mortality among emigrants in the country is excessive;

(c) that proper measures have not been taken for the protection of emigrants immediately on their arrival in the country or during their residence therein;

(d) that the agreements made with emigrants, as such, before their departure from India are not duly enforced by the Government of the country; and

(e) that the Governor General in Council, having, either directly or through the Secretary of State for India in Council, addressed the Government of the country with a view to obtain information regarding the condition or treatment of emigrants therein, has not within a reasonable time received the information asked for.

Power for Local Government to suspend emigration pending reference to Governor General in Council.

10. (1) Whenever the Local Government has reason to believe that, in any country to which emigration is lawful, the plague or other epidemic disease dangerous to human life has broken out, and that emigrants, if allowed to emigrate to that country, would be exposed to serious risk of life on arrival there, it may, by notification in the official Gazette, declare that emigration to that country from any port in the territories administered by it shall cease to be lawful pending a reference to the Governor General in Council.

(2) The Local Government shall at once report the publication of a notification under this section, with the reasons for it, to the Governor General in Council, who shall thereupon publish a notification in the *Gazette of India* confirming or cancelling the notification published by the Local Government.

Revocation of prohibition.

11. Whenever the Governor General in Council is satisfied that the ground on which a notification has been published by him under either of the two last foregoing sections with respect to any country has ceased to exist, he may, by notification in the *Gazette of India*, declare that emigration to that country shall again be lawful from a day to be specified in the notification.

Power for Local Government to prohibit emigration to specified country from the whole or any specified part of its territories.

12. (1) The Local Government may, with the previous sanction of the Governor General in Council, by notification in the official Gazette, prohibit, from a day specified in the notification, all Natives of India or any specified class of Natives, from emigrating from the whole or any specified part of the territories under its administration to any specified country.

(2) The Local Government may, with the like sanction, in like manner, vary or cancel any notification published under this section.

Saving for acts done before publication of notification.

13. The publication of a notification under any of the four last foregoing sections shall not affect any act done, offence committed or proceedings commenced before the publication.

CHAPTER III.

EMIGRATION AGENTS.

Appointment of Emigration Agents.

14. (1) The Government of every country to which emigration is lawful may, from time to time, appoint a person to be Emigration Agent in any port from which emigration is lawful, and may suspend or remove any person so appointed.

(2) An appointment under this section shall not take effect until the Local Government, by notification in the official Gazette, has declared its approval of the appointment.

Remuneration of Agents.

15. The remuneration to be given to an Emigration Agent shall not depend on, or be regulated by, the number of emigrants sent by him, but shall be in the nature of a fixed salary:

Provided that the Governor General in Council may, from time to time, authorize the payment to specified Emigration Agents of special fees for occasional work.

CHAPTER IV.

PROTECTORS OF EMIGRANTS AND MEDICAL INSPECTORS.

Appointment of Protectors of Emigrants.

16. (1) The Local Government may, from time to time, appoint a proper person to be the Protector of

Indian Emigration Act, 1883.
(Chapter V.—Recruiters.)

Emigrants for any port within the territories administered by it from which emigration is lawful.

(2) The Governor General in Council may, from time to time, define the local area to which the authority of any Protector of Emigrants so appointed shall extend.

(3) Every Protector of Emigrants may be suspended or removed by the Local Government which appointed him.

(4) Every Protector of Emigrants shall be a public servant within the meaning of the Indian Penal Code. XLV of 1860.

General duties of Protector.

17. Every Protector of Emigrants, in addition to the special duties assigned to him by this Act or the rules made under this Act, shall—

(a) protect and aid with his advice all emigrants;

(b) cause, so far as he can, all the provisions of this Act, and of the rules made under this Act, to be complied with;

(c) inspect, on arrival, all vessels bringing return-emigrants to the port for which he is Protector;

(d) enquire into the treatment received by the return-emigrants both during the period of their service in the country to which they emigrated, and also during the return voyage, and report thereon to the Local Government; and

(e) aid and advise the return-emigrants so far as he reasonably can.

Appointment of Medical Inspector.

18. (1) The Local Government may, from time to time, appoint a Medical Inspector of Emigrants at each port from which emigration is lawful, and may suspend or remove him.

(2) Every Medical Inspector of Emigrants shall be a public servant within the meaning of the Indian Penal Code. XLV of 1860.

Protector and Medical Inspector to have facilities for inspection.

19. Every Emigration Agent, and all persons in charge of, or employed in, any depôt established under this Act, or in charge of, or employed in, any emigrant-vessel, shall give the Protector of Emigrants and the Medical Inspector of Emigrants every facility for making such inspections, examinations and surveys as are required by this Act, or by the rules made under this Act, or as those officers may deem necessary or proper, and shall afford them all such information as they may reasonably require.

CHAPTER V.

RECRUITERS.

Protector of Emigrants to recruiters.

20. (1) The Protector of Emigrants at each of the ports from which emigration is lawful shall, on the application of the Emigration Agent for any country to which emigration is lawful, grant licenses to so many fit persons as to the Protector seems necessary to be recruiters of emigrants within the local area to which the authority of the Protector extends.

(2) A person shall not, unless he holds a license granted under this chapter,—

(a) enter into, or attempt to enter into, any agreement with any person purporting to bind him to emigrate, or

(b) in consideration of any hire or reward, induce, or attempt to induce, any person to leave any place for the purpose of emigrating, or

(c) act or be employed in any other respect as a recruiter of emigrants.

(3) Every recruiter shall produce his license when called upon to do so by any Magistrate or officer in charge of a police-station.

Form of license.

21. Every license granted under this chapter shall specify the particular country for which, and the local area within which, the holder is licensed to recruit, and may be in the form set forth in the second schedule hereto annexed.

Duration of license.

22. (1) A license granted under this chapter shall not be in force for a longer period than one year from the day on which it comes into force.

(2) The Protector of Emigrants may, on the ground of misconduct, cancel any license granted by him under this chapter before the expiration of the period for which it is in force.

Countersignature of license.

23. (1) A recruiter shall not, in any place beyond the limits of a port from which emigration is lawful, enter, or attempt to enter, into any agreement with any person purporting to bind him to emigrate, or induce or assist, or attempt to induce or assist, any person to leave any place for the purpose of emigrating, or act or be employed in any other respect as a recruiter of emigrants, unless his license bears the countersignature of the District Magistrate.

(2) If a District Magistrate has satisfied himself, after such enquiry as he thinks necessary, that the licensee is, by character or from any other cause, unfitted to be a recruiter under this Act, he may refuse to countersign a recruiter's license.

(3) If a District Magistrate has satisfied himself, after such enquiry as aforesaid, that sufficient and proper accommodation has not been provided in a suitable place, or is not available, for such intending emigrants or emigrants as may be collected by the recruiter pending their registration or removal to the depôt at the port of embarkation, he may refuse to countersign a recruiter's license or to decide whether he will countersign his license until after the expiration of such time as may in his opinion be reasonable.

(4) Before a Magistrate refuses to countersign, or defers his countersignature of, a recruiter's license, he shall record in writing his reasons for so doing.

Indian Emigration Act, 1883.
(Chapter VI.—Registration of Emigrants and Execution of Agreements to emigrate.)

24. If any Magistrate, having countersigned a recruiter's license, afterwards finds reason to think that the licensee is, by character or from any other cause, unfitted to be a recruiter under this Act, or that the accommodation provided for intending emigrants or emigrants collected by him has become unsuitable or has ceased to be available, he may require the licensee to produce his license, and may cancel the countersignature on it, or may impound the license and send it for cancellation to the Protector of Emigrants who granted it.

Power for Magistrate to cancel countersignature in certain cases.

25. When a Magistrate countersigns, or refuses to countersign, a recruiter's license, or cancels the countersignature on it, he shall at once report the countersignature, or the refusal or cancellation, and the grounds of the refusal or cancellation, to the Protector of Emigrants who granted the license.

Notice to Protector of Emigrants of countersignature, refusal to countersign or cancellation of countersignature.

26. (*1*) The Emigration Agent on whose application any recruiter is licensed shall supply the recruiter with a written or printed statement, signed by the Agent, and countersigned by the Protector of Emigrants, of the terms of agreement which the recruiter is authorized to offer on behalf of the Agent to intending emigrants.

Recruiter to be supplied with statement of terms of agreement he is authorised to offer.

(*2*) The statement shall be both in English and in the Vernacular language or languages of the local area within which the recruiter is licensed to recruit.

(*3*) The recruiter shall give a true copy of the statement to every person whom he invites to emigrate, and shall produce the statement for the information of any Magistrate or officer in charge of a police-station, when called upon to do so by the Magistrate or officer.

27. (*1*) Every recruiter shall provide sufficient and proper accommodation in a suitable place for such intending emigrants or emigrants as may be collected by him pending their registration or removal to the port of embarkation.

Accommodation to be provided by recruiters.

(*2*) The place where the accommodation is provided shall have a board fixed in some conspicuous position specifying the purpose for which the place is used.

(*3*) Every District Magistrate, and any subordinate Magistrate or officer of Police authorised in this behalf by a rule made under this Act, shall have, for the supervision and regulation of the places where accommodation is provided under this section, the same powers as are by this Act conferred on a Protector of Emigrants in respect of depôts at the port of embarkation.

(*4*) All recruiters or other persons in charge of these places shall afford every Magistrate and any officer of Police authorised as aforesaid in this behalf every facility for visiting and inspecting them.

CHAPTER VI.

REGISTRATION OF EMIGRANTS AND EXECUTION OF AGREEMENTS TO EMIGRATE.

28. The Local Government may, from time to time, appoint any person, by name or by virtue of his office, to perform in a specified local area, but subject to the control of the District Magistrate or such other officer as the Local Government appoints, by name or by virtue of his office, in this behalf, the functions of a Registering Officer under this Act.

Power for Local Government to appoint Registering Officers.

29. Every agreement to emigrate entered into by any person must—

Execution of agreements.

(*a*) if executed within the limits of any port from which emigration is lawful, be executed in the presence of the Protector;

(*b*) if executed elsewhere, be executed in the presence of a Registering Officer.

30. Every recruiter who desires to engage any person to emigrate shall appear before a Registering Officer or the Protector of Emigrants (as the case may be) with that person, and with any persons intending to accompany that person as his dependents.

Appearance of intending emigrants before Registering Officer.

31. (*1*) The Registering Officer or Protector shall thereupon examine the person, apart from the recruiter, with reference to his intended agreement; and, if it appears that he is competent and willing to enter into the agreement and understands its nature, that he has not been induced to enter into it by any coercion, undue influence, fraud, misrepresentation or mistake, that its terms are in conformity with law, and are such as, according to the statement furnished to the recruiter under section twenty-six, he was authorized to offer, shall, subject to the provisions of section thirty-three, register in a book to be kept for the purpose, in such form as the Governor-General in Council, from time to time, by rules made under this Act, prescribes, the name, sex, name of the father, caste, occupation and age of the intending emigrant, and the name of the village or place of which he is a resident, and such other particulars (if any) concerning him and his dependents (if any) as the Governor General in Council, from time to time, by rules made under this Act, prescribes.

Examination and registration of emigrant.

32. (*1*) Notwithstanding anything contained in the last foregoing section, the Registering Officer or Protector may refuse to register any married woman under that section if he finds that her husband does not consent to her emigrating.

Power to refuse registration in case of married women.

Indian Emigration Act, 1883.
(Chapter VII.—Emigration Depôts.)

(2) The Registering Officer or Protector may also, in the case of any woman whom he believes to be married, refuse to decide whether he will register her until after the expiration of such time, not exceeding ten days, as he thinks fit.

Examination of dependent.

33. (1) When any person appears before a Registering Officer or Protector under section thirty as a dependent of an intending emigrant, the Registering Officer or Protector shall, if the person is able to give intelligent answers to questions, examine him, apart from the recruiter, as to his dependence on the intending emigrant whom he is about to accompany and as to his willingness to emigrate.

(2) Where the Registering Officer or Protector sees reason to doubt the existence of the dependence or willingness, he may, if he thinks fit, refuse to register the intending emigrant unless the name of the dependent is omitted from the register.

Record of reasons for refusal to register.

34. Whenever the Registering Officer or Protector refuses to register any intending emigrant, he shall record his reasons for the refusal.

Execution and attestation of agreement.

35. (1) When the particulars concerning any intending emigrant and his dependents (if any) have been registered, the Registering Officer or Protector shall cause an agreement to be prepared in triplicate, and shall call on the recruiter and the intending emigrant to execute the agreement in triplicate in his presence, and, if they execute it, shall attest the execution with his signature.

(2) An agreement to emigrate shall not be of any effect until the particulars concerning the intending emigrant and his dependents (if any) have been registered, and the agreement has been executed and attested under this Act.

(3) When the particulars concerning any intending emigrant and his dependents (if any) have been registered, and an agreement has been executed and attested under this Act, the intending emigrant shall be deemed to be registered under this Act as an emigrant.

Contents of agreement.

36. Every agreement to emigrate shall contain a copy of the particulars registered concerning the intending emigrant and his dependents (if any) under section thirty-one, and on the reverse such particulars concerning the nature, duration and term of service and the remuneration of the emigrant, and such other matters (if any) as the Governor General in Council, from time to time, by rules made under this Act, prescribes.

Disposal of copies of agreement.

37. When the agreement has been executed and attested, one copy thereof shall be delivered to the recruiter for transmission to the Emigration Agent, another shall be delivered to the emigrant, and the third shall be retained by the Protector or sent by the Registering Officer to him.

Fee for preparation of agreement.

38. For the preparation of every agreement under this chapter the recruiter or Emigration Agent shall pay such fee as the Governor General in Council, from time to time, by notification in the *Gazette of India*, prescribes :

Provided that the Governor General in Council may at any time, by like notification, declare that the fee payable under this section shall be consolidated, either generally or in any specified local area, with the fee payable under section seventy-three.

Power to make agreement if over 16.

39. Notwithstanding anything to the contrary in the Indian Contract Act, 1872, it shall be lawful for any person of the age of sixteen years or upwards to enter in manner in this Act provided into an agreement to emigrate to any place to which emigration is lawful.

IX of 1872

Power to make agreement on behalf of child or ward.

40. Any person entering into an agreement to emigrate, and being the parent or guardian of a child under the age of sixteen years and above the age of ten years, may, in the name of and on behalf of the child, enter into an agreement in manner in this Act provided binding the child to emigrate with him.

CHAPTER VII.

EMIGRATION DEPÔTS.

Depôts to be established at ports of embarkation.

41. Every Emigration Agent shall establish at the port for which he is appointed a suitable depôt for the reception and lodging of emigrants before embarkation for the country for which he is Emigration Agent, and shall provide all necessary food and clothing for all emigrants during their stay at the depôt.

Licensing of depôts.

42. (1) A depôt established under the last foregoing section shall not be used for the reception and lodging of emigrants until it has been inspected and approved by the Protector of Emigrants and the Medical Inspector of Emigrants, and a license for its use has been granted by the Protector.

(2) A license under this section shall not be granted for a longer period than one year from the day on which it comes into force.

(3) The Protector of Emigrants may at any time cancel a license under this section—

(a) if he considers that the depôt for which it was granted is unhealthy, or has in any respect become unsuitable for the purpose for which it was established, or

Indian Emigration Act, 1883.
(Chapter VIII.—Conveyance of Emigrants to Depôts and Procedure on Arrival).

(*b*) if the Emigration Agent fails, after reasonable notice, to comply with any of the requirements of this Act or of the rules made under this Act.

Inspection by Protector and Medical Inspector.

43. The Protector of Emigrants and the Medical Inspector shall, from time to time, and at least once in every week during which any emigrants may be kept in any depôt at the port for which they are Protector and Medical Inspector, respectively, inspect the emigrants in that depôt, and examine the state of the depôt, and the manner in which the emigrants therein are lodged, fed, clothed and otherwise provided for and attended to.

Report by Medical Inspector.

44. The Medical Inspector shall report to the Protector of Emigrants any circumstance that may come to his knowledge showing that any depôt is not suitable for its purpose, or that the emigrants lodged therein are treated with any oppression or neglect.

Treatment of emigrant suffering from disease.

45. (*1*) The Medical Inspector may, if he thinks fit, direct that any emigrant suffering from any disease likely to be dangerous to his neighbours shall be isolated or excluded from the depôt.

(*2*) The Medical Inspector may, if he thinks fit, order the removal of any emigrant so suffering to a proper hospital for treatment at the expense of the Emigration Agent; and the expense (if any) incurred by the Protector of Emigrants in respect of the removal of the emigrant and his treatment in the hospital shall be recoverable from the Emigration Agent by the Protector of Emigrants, with interest thereon at the rate of six per centum per annum from the date on which the expense was incurred.

CHAPTER VIII.

CONVEYANCE OF EMIGRANTS TO DEPÔTS AND PROCEDURE ON ARRIVAL.

Emigrant not to be removed before registration.

46. A recruiter shall not remove or attempt to remove any intending emigrant to a depôt, or induce or attempt to induce him to go to a depôt, or to leave the local limits of the jurisdiction of the Magistrate by whom the recruiter's license has been countersigned, or aid him in going to a depôt, or in leaving any such local limits, until the intending emigrant has been registered under this Act as an emigrant.

Conveyance of emigrant to depôt.

47. (*1*) Every emigrant must, after he has been registered under this Act, be conveyed with all convenient despatch, by or under the orders of the recruiter or Emigration Agent, to the depôt established at the port of embarkation by the Emigration Agent on whose application the recruiter has been licensed.

(*2*) When an emigrant has been registered at a place beyond the limits of the port of embarkation, he must, while proceeding to the depôt, be accompanied throughout the journey either by the recruiter himself, or by a competent person appointed by him with the approval of a Magistrate.

(*3*) The Magistrate shall give to the person so appointed a certificate signed by him stating that he has been appointed for the journey to the depôt.

(*4*) The recruiter or the person so appointed shall, throughout the journey, provide the emigrant with proper and sufficient food and lodging.

Report of arrival at depôt.

48. The arrival at a depôt of each emigrant must immediately be reported by the person in charge of the depôt to the Emigration Agent, and by the Agent to the Protector of Emigrants.

Examination by Medical Inspector.

49. (*1*) The copy of the agreement received by the recruiter from the Registering Officer or Protector must, as soon as conveniently may be after the arrival of the emigrant at the depôt, be shown by the Emigration Agent to the Medical Inspector of Emigrants.

(*2*) The Medical Inspector shall examine each emigrant entered in the agreement to ascertain whether he is fit, having regard to his age and state of health, to undertake the journey to the country to which he has agreed to emigrate.

(*3*) The Medical Inspector, if satisfied of his fitness, shall give a certificate to that effect to the Emigration Agent. If not so satisfied, he shall give a certificate to that effect to the Protector of Emigrants.

Power for Protector to order payment of expenses of return of emigrant in certain cases.

50. (*1*) In any of the following cases, namely:—

(*a*) if the Medical Inspector of Emigrants finds that an emigrant is, or has become, unfit to undertake the journey to the country to which he has agreed to emigrate, and if the Protector of Emigrants considers that the emigrant has not dishonestly represented himself as fit to undertake the journey, or

(*b*) if the Protector finds that any such irregularity has occurred in the recruitment or treatment by the recruiter of any emigrant as makes it just to rescind the agreement to emigrate, or

(*c*) if the Emigration Agent refuses to fulfil the agreement entered into with the emigrant,

the Protector may order the Emigration Agent to pay to the emigrant such sum as the Protector deems reasonable as compensation, and when the emigrant has been registered at a place beyond the

Indian Emigration Act, 1883.
(Chapter IX.—Emigrant-vessels.)

limits of the port of embarkation, such reasonable sum as is necessary to enable him to return to the place at which he was registered, and may take any steps which he thinks necessary for the conveyance of the emigrant to that place.

(2) Any emigrant who has been registered at any place beyond the limits of the port of embarkation, and who from his state of health is, in the opinion of the Medical Inspector of Emigrants, unfit to undertake at once the return-journey to the place at which he was registered, shall be entitled to be fed, lodged, clothed and attended to at the depôt at the expense of the Emigration Agent until he is reported by the Medical Inspector fit to undertake the return-journey.

Payment of expenses of dependents and relatives.

51. (1) When any order is made under the last foregoing section with reference to any emigrant who was registered at any place beyond the limits of the port of embarkation, any emigrant who has been registered as his dependent,

or any emigrant who, not being a dependent, is the father, mother, wife, husband, son, daughter, brother, sister, guardian or ward of the emigrant, shall be entitled—

(a) to be conveyed at the expense of the Emigration Agent with the emigrant to the place at which he was registered; and

(b) if the emigrant is unable to travel, to be lodged, fed and clothed in the depôt at the expense of the Emigration Agent until the emigrant is able to travel.

(2) The Protector of Emigrants may include any expenses incurred under this section in an order made under the last foregoing section with respect to the emigrant.

Compensation to emigrant for ill-treatment on journey.

52. If it appears that during the journey to the depôt any emigrant has suffered any ill-treatment, or that, in the case of any emigrant who has been registered at a place beyond the limits of the port of embarkation, the provisions of section forty-seven have not been complied with, the Protector of Emigrants may order the Emigration Agent to pay—

(a) to the emigrant a reasonable sum by way of compensation, and

(b) if any expenses have been incurred by or under the orders of the Protector on behalf of the emigrant by reason of the neglect to comply with the provisions of section forty-seven, to the Protector the expenses so incurred.

Power for Protector to pay and recover expenses incurred on behalf of emigrant.

53. (1) On failure of the Emigration Agent for twenty-four hours to comply with an order of the Protector for the payment of any sum to an emigrant under any of the last three foregoing sections, the Protector may pay the same to the emigrant.

(2) Every sum paid by the Protector to an emigrant under sub-section (1), and, on failure of the Emigration Agent for twenty-four hours to comply with an order for payment thereof under the last foregoing section, every sum which the Protector may have ordered the Emigration Agent to pay to him under that section, shall be recoverable from the Emigration Agent with interest thereon at the rate of six per centum per annum from the date of payment.

(3) Further proof shall not be required by any Court in any such case than that the Protector gave the Emigration Agent an order to pay the sum, and that the Emigration Agent for twenty-four hours failed to comply with the order.

CHAPTER IX.

EMIGRANT-VESSELS.

Master of emigrant-vessel to be licensed.

54. It shall not be lawful to receive any emigrant on board any vessel unless a license to carry emigrants in the vessel has been obtained from the Local Government.

Application for license.

55. (1) When the master or owner of any vessel desires to obtain a license to carry emigrants in his vessel, he shall apply in writing through the Protector of Emigrants to the Local Government for the license.

(2) The application must state the number of emigrants which, according to the rules as to space contained in this chapter, the applicant deems the vessel capable of carrying, and the tonnage and such other particulars respecting the vessel as the Governor General in Council, from time to time, by rules made under this Act, prescribes.

Survey and licensing of vessel.

56. (1) The Protector of Emigrants shall cause the vessel to be surveyed by a competent person at the cost of the master or owner, with a view to ascertain her seaworthiness, and the extent and nature of her accommodation for emigrants, and to ascertain that she is properly ventilated, and is supplied with all the tackle, apparel and furniture requisite for her intended voyage.

(2) If the Local Government is of opinion that the vessel is in all respects suitable for the carrying of emigrants under this Act, and is properly manned and officered, it shall give to the master of the vessel a license to carry emigrants therein specifying the number of emigrants which may be received on board.

Accommodation required on board emigrant-vessel.

57. (1) A license shall not be granted under the last foregoing section unless—

(a) there is provided for the emigrants, either between-decks or, subject to the approval

Indian Emigration Act, 1883.
(Chapter X.—Embarkation and Departure.)

of the Protector of Emigrants and the Medical Inspector, in cabins on the upper deck, a space devoted to the exclusive use of the emigrants having in every part a height of not less than six feet;

(*b*) a separate place is fitted up for a hospital; and

(*c*) such arrangements are made for the separation of women (married or single) and children from the other emigrants as the Governor General in Council, from time to time, by rules made under this Act, prescribes.

(*2*) The cabins on the upper deck provided under clause (*a*) of this section must be firmly secured and entirely covered in.

Rules as to space on board emigrant-vessel.

58. Every emigrant-vessel must contain within the space referred to in clause (*a*) of the last foregoing section at least twelve superficial feet and seventy-two cubic feet of space for each emigrant:

Provided that two emigrants under the age of ten years shall for the purposes of this section count as one only.

Provisions, clothing, fuel and water.

59. There must be on board every emigrant-vessel, at the time of departure of the vessel from the port at which they embark, provisions, clothing, fuel and water for the emigrants (over and above the supply for the master, officers and crew, and of the cabin and other passengers, if any), in such quantity and of such description and quality as the Governor General in Council, from time to time, by rules made under this Act, prescribes.

Surgeons, attendants, medicines and stores.

60. Every emigrant-vessel must, at the time of departure of the vessel from the port at which the emigrants embark, have on board, and must carry with her, a properly qualified surgeon, and also such compounders, interpreters and attendants subordinate to the surgeon, and such medicines and other stores, in such quantity and of such quality as the Governor General in Council, from time to time, by rules made under this Act, prescribes.

Duty of Protector and Medical Inspector with respect to enforcement of foregoing sections.

61. The Protector of Emigrants and the Medical Inspector of Emigrants shall see personally that all the provisions of the last two foregoing sections are complied with.

Bond to be executed by master of emigrant-vessel.

62. (*1*) Every master licensed under this Act shall, on the requisition of the Protector of Emigrants, and before any emigrant embarks on board his vessel, execute to the Protector, in duplicate, a bond, in such form as the Local Government, from time to time, prescribes, binding himself and the owner of the vessel in a penal sum of ten thousand rupees, to perform the duties imposed by this Act or any rule made under this Act on a master and owner respectively.

(*2*) The Protector of Emigrants shall forward one copy of the bond to such officer as may be appointed in this behalf by the Government of the country to which the emigrants are to be conveyed, or, in the case of a foreign colony, to the British Consular Agent, and the other copy to the Local Government.

CHAPTER X.

EMBARKATION AND DEPARTURE.

Time of embarkation after arrival.

63. An emigrant shall not embark, except with the permission of the Protector of Emigrants, until seven days have elapsed from the date of his arrival at the depôt.

Time at which emigrant-vessels may leave India.

64. (*1*) An emigrant-vessel shall not sail from any port in British India—

(*a*) to any country west of the Cape of Good Hope, except at such seasons as the Governor General in Council, from time to time, by rules made under this Act, prescribes as seasons during which it shall be lawful for emigrant-vessels generally, or of a class to which the vessel belongs, to sail to that country;

(*b*) to any country during any season which the Governor General in Council, from time to time, by notification in the *Gazette of India*, declares to be a season during which the sailing of emigrant-vessels to that country is prohibited.

Procedure if emigrant refuses to embark.

65. If any emigrant without sufficient cause refuses or neglects to embark when called on by the Emigration Agent to do so, it shall not be lawful to compel the emigrant to embark; but nothing in this section shall affect the civil or criminal liabilities which an emigrant incurs by reason or in respect of any such refusal or neglect.

List of, and passes for, emigrants.

66. (*1*) When any emigrants are about to embark on board any vessel, the Emigration Agent shall supply the master of the vessel with four copies of a list, specifying, as accurately as may be, the names, ages and occupations of the emigrants, and the names of their respective fathers.

(*2*) The master shall not receive any emigrant on board unless he is provided with a pass, signed by the Emigration Agent, and countersigned by the Protector, stating the name and age of the emigrant, the name of his father, and the country to which he has agreed to emigrate, and certifying that he is in a fit state of health to undertake the voyage to that country.

Indian Emigration Act, 1883.
(Chapter X.—Embarkation and Departure.)

(*3*) Every emigrant shall on embarkation deliver the pass to the master.

(*4*) The master shall compare the emigrants who embark and the passes delivered by them with the list supplied by the Emigration Agent; and, if the list appears to be correct and to correspond with the passes delivered and with the emigrants embarked, the master shall sign the four copies of the list.

(*5*) The master shall not permit any emigrant to remain on board who has not delivered up his pass to the master, or is not mentioned in the list.

Disposal of the two copies of list to be given by master to Protector.

67. (*1*) When the copies of the list have been signed, the master shall give two of the copies to the Protector of Emigrants, who shall sign them if he believes them to be correct.

(*2*) The Protector shall send one of the copies so signed by him by the vessel which carries the emigrants to such officer as may be appointed in this behalf by the Government of the country to which the emigrants have agreed to emigrate, or, in the case of a foreign colony, to the British Consular Agent, and shall file the other copy in his own office.

Disposal of the two copies of list to be given by master to Emigration Agent.

68. (*1*) The master shall give to the Emigration Agent the two remaining copies of the list.

(*2*) The Emigration Agent shall thereupon sign the copies, and shall return one of them to the master.

(*3*) The master shall, on the arrival of the vessel at the country to which the emigrants have agreed to emigrate, and before their disembarkation, deliver the copy so returned to him to such officer as may be appointed in this behalf by the Government of the country, or, in the case of a foreign colony, to the British Consular Agent.

Examination of emigrants by Medical Inspector.

69. (*1*) The Medical Inspector shall be present at the embarkation of all emigrants, and shall examine each emigrant to ascertain if he is in a fit state of health to undertake the voyage to the country to which he has agreed to emigrate; and, if he finds that he is not fit to undertake the voyage, he shall inform the Protector accordingly.

(*2*) The Protector may thereupon refuse to permit the emigrant to embark; and any emigrant, registered as a dependent of an emigrant whom the Protector has refused to permit to embark, or any emigrant who, not being a dependent, is the father, mother, wife, husband, son, daughter, brother, sister, guardian, or ward of the emigrant, may, notwithstanding anything in this Act, refuse to embark.

(*3*) The provisions of sections fifty, fifty-one and fifty-three shall apply to emigrants who under this section are not permitted to embark, and to any emigrants who under this section refuse to embark, and to the recovery of expenses incurred under this Act in respect of them.

Emigration Agent to deliver agreements to emigrate to master.

70. The Emigration Agent shall, after all the emigrants have embarked, deliver to the master all the agreements made by the Emigration Agent or under his authority with the emigrants, and delivered or sent to him under this Act; and the master shall, on arrival at the country to which the emigrants are to be conveyed, deliver these agreements to such officer as may be appointed in this behalf by the Government of the country, or, in the case of a foreign colony, to the British Consular Agent.

Certificates from Protector of Emigrants and Emigration Agent.

71. Before any emigrant-vessel clears out of any port, the master of the vessel shall obtain from the Protector of Emigrants at the port, and from the Emigration Agent for the country to which the emigrants are to be conveyed, certificates, signed by the Protector and Emigration Agent, respectively, to the effect that the Protector and Agent have, in respect of all the emigrants embarking at that port in the vessel, done all that is required by the foregoing provisions of this Act, or by the rules made under this Act, to be done on the part of the Protector and Agent, respectively, and that all the directions for the security, well-being and protection of emigrants which are contained in this Act, or in the rules made under this Act, have in the case of that vessel been complied with.

Copies of Act and rules to be kept on board.

72. The master of every emigrant-vessel shall keep on board the vessel during the whole voyage two copies of this Act and of all rules made under this Act, and two copies of a translation of this Act, and of those rules, in such language or languages as the Local Government directs, and shall, on request made at any reasonable time, produce one of those copies to any emigrant for his perusal.

Fee for each embarked emigrant.

73. For each emigrant who embarks on board an emigrant-vessel the Emigration Agent shall pay to the Protector of Emigrants a fee of such amount as the Governor General in Council, from time to time, by notification in the *Gazette of India*, prescribes:

Provided as follows:—

(*a*) the fee payable under this section shall not be more than is, in the opinion of the Governor General in Council, sufficient to raise the total income from fees under this Act to an amount which will cover the cost of any establishment or supervision which the Governor General in Council thinks necessary to provide for the control of emigration:

(*b*) if it appears to the Governor General in Council expedient to provide, in the case of any country, any special establishment or

Indian Emigration Act, 1883:
(Chapter XI.—Rules.)

expenditure for the protection of Indian emigrants to that country, the Governor General in Council may increase the fee payable in the case of emigrants to that country to an amount sufficient, in his opinion, to cover the cost of the special establishment or expenditure.

Duty of master to see to observance of Act and rules on board his vessel.

74. It shall be the duty of every master licensed under this Act to see that all the provisions of this Act and the rules made under this Act are observed on board his vessel during the voyage from British India to the country to which the emigrants are to be conveyed.

Return of pass to emigrant.

75. The master shall return his pass to each emigrant before he disembarks in the country to which he has agreed to emigrate.

Special Provisions as to Vessels sailing from Calcutta.

Emigrant-vessel sailing from Calcutta to depart within 24 hours of embarkation.

76. The master of every vessel carrying emigrants from the port of Calcutta shall proceed on his voyage and depart with his vessel from Garden Reach within twenty-four hours after the embarkation of such of the emigrants as have first embarked.

Emigrant-vessel sailing from Calcutta to be towed to sea.

77. Every sailing-vessel leaving the port of Calcutta with emigrants shall proceed from Garden Reach to sea under tow of a steamer declared to be competent by such officer as the Local Government appoints in this behalf.

Power of surgeon of emigrant-vessel leaving Calcutta to require sick emigrants to be sent to hospital.

78. (*1*) When an emigrant-vessel leaves the port of Calcutta, if during her passage down the river, and while between Garden Reach and Diamond Harbour, the disease of measles, scarlet-fever or small-pox appears on board, the master shall, if so required by the surgeon in charge of the emigrants, send to the hospital at Diamond Harbour all emigrants suffering from the disease, with any emigrants registered as their dependents, and any emigrant who, not being a dependent, is the father, mother, wife, husband, son, daughter, brother, sister, guardian or ward of any such emigrant and who wishes to accompany him or her, and shall at once inform the Protector of Emigrants at Calcutta of the number and names of the emigrants so sent to hospital.

(*2*) The provisions of sections fifty, fifty-one and fifty-three shall, so far as may be, apply to emigrants landed under this section, and to the recovery of expenses incurred in respect of them.

Power of surgeon of emigrant-vessel leaving Calcutta to require all emigrants to be landed when cholera appears.

79. (*1*) In the event of cholera in an epidemic form appearing among the emigrants on board any such vessel carrying emigrants from the port of Calcutta, the surgeon in charge of the emigrants may require the master to land all the emigrants on board the vessel at Diamond Harbour.

(*2*) The master shall at once comply with the request of the surgeon, and shall immediately give notice of his having done so to the Protector of Emigrants at Calcutta, who shall take such action thereon as the Governor General in Council, from time to time, by rules made under this Act, prescribes.

CHAPTER XI.

RULES.

Power for Governor General in Council to make rules.

80. (*1*) The Governor General in Council may, from time to time, make rules consistent with this Act—

(*a*) to provide for the supervision and regulation of places of accommodation provided under this Act, and to define the classes of Magistrates and the officers of Police to be authorized to visit and inspect those places;

(*b*) to prescribe the form of the register required under this Act, and the particulars to be entered therein, and to regulate the control to be exercised over Registering Officers by the District Magistrate or officer (if any) appointed in this behalf under this Act;

(*c*) to prescribe the forms of the agreements to be made under this Act, and the particulars to be contained therein and the language or languages in which agreements must be expressed;

(*d*) to prescribe the conditions on which licenses for the establishment of depôts under this Act may be given, to provide for the supervision and regulation of depôts, and for the medical care of the emigrants during their residence there, and the measures to be taken on the outbreak of any epidemic or infectious disease there;

(*e*) to prescribe the forms to be supplied by Emigration Agents and recruiters for the purposes of this Act;

(*f*) to prescribe the particulars which the owner or master of a vessel applying for a license to carry emigrants in his vessel must state;

(*g*) to regulate the proportion of women to be ordinarily carried in any emigrant-vessel with male emigrants, and to prescribe the arrangements to be made for the separation of women (married or single) and children from the other emigrants on board an emigrant-vessel;

(*h*) to prescribe the description, quantity and quality of provisions, fuel and water to be taken by emigrant-vessels, the daily allowance of food and water to be issued, and the nature and amount of clothing to be supplied to each emigrant during the voyage;

(*i*) to fix the number of the compounders, interpreters and attendants subordinate to the surgeon to be carried for the care of the sick or weakly on board each emigrant-vessel;

Indian Emigration Act, 1883.
(Chapter XII.—Offences.)

(*j*) to prescribe the nature, quantity and quality of medicines and other stores to be carried on board emigrant-vessels;

(*k*) to provide for the ventilation and cleanliness of every emigrant-vessel during a voyage, and for its being furnished with a sufficient number of life-buoys, boats, water-buckets and other appliances to be used in case of shipwreck or fire;

(*l*) to prescribe the seasons at which alone emigrant-vessels or specified classes of emigrant-vessels may sail from any port in British India to any country west of the Cape of Good Hope to which emigration is for the time being lawful;

(*m*) to provide for the disposal of emigrants who may be landed under section seventy-nine;

(*n*) to provide for the medical care of the emigrants on the voyage, and to provide for the measures to be taken on the outbreak of any epidemic or infectious disease on a voyage;

(*o*) to provide for a journal being kept by the surgeon of every emigrant-vessel, recording the health of the emigrants, and his treatment of the sick, with full explanation of the causes of every death; and to define the duties and powers of the surgeon in respect of the emigrants committed to his care;

(*p*) to define and regulate the powers and duties of the several officers appointed by the Government under this Act; and

(*q*) generally to provide for the security, well-being and protection of emigrants:

Provided that the Local Government may, in special cases, notwithstanding anything contained in rules made under clause (*g*) of this section, permit an emigrant-vessel to sail though it does not carry the proportion of women required to be carried in ordinary cases.

(*2*) The power to make rules conferred by this section may be exercised at any time after the passing of this Act, but any rule made under this section shall not take effect until the Act comes into force.

Publication of drafts and rules.

81. (*1*) The Governor General in Council shall, before making rules under the last foregoing section, publish a draft of the proposed rules in such manner as may, in his opinion, be sufficient for the information of persons likely to be affected thereby.

(*2*) There shall be published with the draft a notice specifying a date at or after which the draft will be taken into consideration.

(*3*) The Governor General in Council shall receive and consider any objection or suggestion which may be made by any person with respect to the draft before the date so specified.

(*4*) Every rule made under the last foregoing section shall be published in the *Gazette of India*, and the publication in the *Gazette of India* of a rule purporting to be made under that section shall be conclusive evidence that it has been duly made.

CHAPTER XII.

OFFENCES.

Unlawful recruiting.

82. (*1*) Whoever, except in conformity with the provisions of this Act or of the rules made under this Act,—

(*a*) makes, or attempts to make, any agreement with any Native of India purporting to bind him to emigrate, or

(*b*) in consideration of any hire or reward, induces, or attempts to induce, any Native of India to leave any place for the purpose of emigrating, or otherwise acts or is employed as a recruiter of emigrants, or

(*c*) in consideration of any hire or reward, receives into or detains in any place, or, being a recruiter, in any place other than a place in which accommodation has been provided in accordance with this Act or the rules made under this Act, any person with a view to his being registered as an emigrant, or after his registration as an emigrant and before his departure for the depôt at the port of embarkation,

shall be punished with fine which may extend to five hundred rupees.

(*2*) If any person, other than a recruiter licensed under this Act, commits an offence under this section, any Police-officer may arrest him without warrant.

Recruiters removing unregistered emigrants to depôt.

83. Whoever, being a recruiter licensed under this Act,—

(*a*) removes, or attempts to remove, any intending emigrant to a depôt before he has been registered under this Act as an emigrant, or induces, or attempts to induce, him to leave the local limits of the jurisdiction of the Magistrate by whom the recruiter's license has been countersigned before he has been so registered, or aids, or attempts to aid, him in leaving any such local limits or going to any depôt before he has been so registered, or

(*b*) fails to give a true copy of the statement with which he is provided under section twenty-six to any person whom he invites to emigrate, or

(*c*) fails to provide any emigrant whom he has engaged, and who has been registered at a place beyond the limits of the port of embarkation, with suitable lodging and food, or otherwise ill-treats any emigrant on his journey to the depôt,

shall be punished with fine which may extend to five hundred rupees.

Fraudulently inducing Native to emigrate.

84. (*1*) Whoever, by means of intoxication, coercion or fraud, causes or induces, or attempts to cause or induce, any Native of India

Indian Emigration Act, 1883.
(Chapter XII.—Offences.)

to emigrate, or to enter into any agreement to emigrate, or to leave any place with a view to emigrating, shall be punished with imprisonment for a term which may extend to one year, or with fine, or with both.

False representation of Government authority.

85. Whoever, without lawful authority, issues any written order to the Police to assist himself or any other person to procure emigrants, or falsely represents that any emigrants are required by the Government or are to be engaged on behalf of the Government, shall be punished with imprisonment for a term which may extend to six months, or with fine which may extend to five hundred rupees, or with both.

Receiving emigrants on board vessel in contravention of Act.

86. If any master of a vessel—

(*a*) knowingly receives on board his vessel any emigrant who has not complied with the provisions of this Act, or the rules made under this Act, so far as they are binding on him, or

(*b*) not being licensed under this Act, knowingly receives any emigrant on board his vessel, or

(*c*) being licensed under this Act, knowingly receives on board his vessel any emigrant in excess of the number specified in his license,

he shall be punished with imprisonment for a term which may extend to one year, or with fine which may extend to one thousand rupees for each emigrant so received, or with both; and the vessel, her tackle, apparel and furniture, may be declared by the Court before which the master is tried to be forfeited to Her Majesty.

Fraudulent acts on part of master.

87. If any master licensed under this Act fraudulently does, or suffers to be done, any act or thing whereby the license becomes inapplicable to the altered state of the vessel or other matter to which the license relates, he shall be punished with fine which may extend to five thousand rupees;

and he may also be sued on any bond which he may have executed under section sixty-two.

Clearance without compliance with Act.

88. If any master of an emigrant-vessel clears, or attempts to clear, his vessel outwards when any of the provisions of section fifty-seven, fifty-nine or sixty have not been complied with in respect of his vessel, he shall be punished with fine which may extend to four thousand rupees.

Failure of master to comply with provisions as to lists and passes.

89. If any master receives on board his vessel any emigrants and fails to comply with the requirements of sections sixty-six, sixty-seven and sixty-eight in respect of those emigrants, he shall be punished with fine which may extend to two hundred rupees for each emigrant so received on board.

Master taking on board, after clearance, emigrants not entered in list.

90. If any master, having cleared his vessel, takes on board any emigrant not entered in the list mentioned in section sixty-six or not furnished with a pass required by that section, he shall be punished with fine which may extend to two hundred rupees for each emigrant so taken.

Master landing emigrant at other than specified country.

91. If any master lands any emigrant in any country other than the country for which he has been shipped by the Emigration Agent, he shall be punished for every emigrant so landed with fine which may extend to two hundred rupees, or with imprisonment for a term which may extend to one month, or with both, unless the landing has been caused by stress of weather or unavoidable accident, or has taken place under the provisions of section seventy-eight or seventy-nine.

Failure to comply with provisions as to leaving Calcutta.

92. If any master of a sailing-vessel leaving the port of Calcutta with emigrants on board—

(*a*) does not leave Garden Reach with his vessel within the time prescribed in section seventy-six, or

(*b*) without reasonable excuse, causes or allows his vessel to go below Garden Reach without being in tow of such a steamer as is referred to in section seventy-seven,

he shall be punished with fine which may extend to one thousand rupees.

Emigrant deserting or refusing to proceed to depôt.

93. (*1*) If any emigrant deserts before arrival at depôt, or refuses without reasonable cause to proceed to the depôt, he shall be punished with fine which may extend to twenty rupees, or to the cost incurred in entering into an agreement with, registering and conveying him to the depôt, whichever is greater, and, in default of payment of the fine, with imprisonment which may extend to one month.

(*2*) Any fine levied under this section may, in the discretion of the convicting Magistrate, be paid to the Emigration Agent or recruiter by whom the cost was incurred.

Emigrant deserting from depôt or failing to embark.

94. (*1*) If any emigrant—

(*a*) deserts from the depôt, or

(*b*) without reasonable cause, refuses or neglects to embark when called upon to do so by the Emigration Agent,

he shall be punished with imprisonment for a term which may extend to one month, or with fine which may extend to fifty rupees, or to double the amount of the cost incurred in entering into an agreement with, registering and conveying him to the depôt, and maintaining him therein, or with both.

(*2*) Any fine levied under this section may, in the discretion of the convicting Magistrate, be

Indian Emigration Act, 1883.
(Chapter XIII.—Supplemental.)

paid to the Emigration Agent or recruiter by whom the cost was incurred.

Causing, or permitting, embarkation of emigrant in contravention of section 63.

95. If any person causes, or if any master knowingly permits, any emigrant to embark contrary to the provisions of section sixty-three, he shall be punished with fine which may extend to two hundred rupees for each emigrant so embarked.

Institution of prosecutions.

96. (*1*) Prosecutions under sections eighty-six to ninety-five (both inclusive) shall not be instituted except as follows, namely :—

(*a*) Prosecutions under sections eighty-six to ninety-two, both inclusive, by the Emigration Agent, or by the Protector of Emigrants or by an officer appointed for the purpose by the Local Government.

(*b*) Prosecutions under section ninety-three, by or with the sanction of a Magistrate or Registering Officer or of the Protector of Emigrants at the port of embarkation.

(*c*) Prosecutions under section ninety-four, by the Emigration Agent with the sanction of the Protector.

(*d*) Prosecutions under section ninety-five, by the Protector of Emigrants or by an officer appointed for the purpose by the Local Government.

Defence to charges of desertion.

97. The following shall be good defences to charges under section ninety-three and ninety-four, respectively, namely :—

(*a*) to a charge under section ninety-three, that the accused person or other emigrants accompanying him has or have been ill treated, deceived or defrauded by the recruiter or any person under his control ;

(*b*) to a charge under section ninety-four, that the emigrant has suffered any ill-treatment or neglect in the depôt or on the journey thither.

Power for Customs-officers to search and detain for purposes of Act.

98. All the powers for the time being conferred by law on officers of sea-customs with regard to the searching and detention of vessels, or otherwise for the prevention of smuggling on board thereof, may be exercised by those officers for the prevention of offences against this Act.

CHAPTER XIII.

SUPPLEMENTAL.

Power for Local Government to appoint Magistrates for purposes of Act.

99. The Local Government may, from time to time, appoint any person, by name or by virtue of his office, to perform within a specified local area the functions of a Magistrate under this Act.

Suits against Emigration Agent for breach of duty.

100. (*1*) Whenever an Emigration Agent is chargeable with a breach of any duty to an emigrant arising from any agreement with the emigrant or imposed by this Act or the rules made under this Act, the Protector of Emigrants may, if he thinks fit, institute a suit on behalf of the emigrant against the Emigration Agent for the recovery of compensation for the breach.

(*2*) In awarding compensation under this section, all sums ordered to be paid under section fifty or section fifty-two shall be taken into consideration.

Power for Governor General in Council to determine probable lengths of voyages for purposes of Act.

101. (*1*) The Governor General in Council may, from time to time, by notification in the *Gazette of India*, determine what shall be held to be, for the purposes of this Act, the probable length of the voyages by sailing-vessels and vessels using steam-power, respectively, from any port from which, to any country to which, emigration is for the time being lawful.

(*2*) Until otherwise determined under this section, the probable length of the voyage by sailing-vessels from the ports mentioned in the third schedule hereto annexed to the countries mentioned in that schedule shall be deemed to be the lengths stated in that schedule.

Emigration to Straits Settlements and adjoining Native States.

102. (*1*) The Governor General in Council may, by notification in the *Gazette of India*, extend the Straits Settlements Emigration Act, 1877, to the whole or any part of British India.

(*2*) The Governor General in Council may also, from time to time, by a like notification, declare that all or any of the protected Native States adjoining the Straits Settlements shall, for the purposes of any law relating to emigration to those settlements, form part of those settlements.

(*3*) On and from the date of any notification published under sub-section (2), a Native of India who departs by sea out of British India under an agreement to labour for hire in the Native State or States to which the notification refers shall not be deemed to emigrate within the meaning of this Act.

Application of Act to emigration from British ports to French and Dutch colonies.

103. The provisions of this Act shall apply to emigration from British Indian ports—

(*a*) to the French colonies, under the terms of the Convention executed at Paris on the first day of July, 1861, and ratified at the same place on the 30th day of July, 1861, between Her Majesty the Queen of the United Kingdom of Great Britain and Ireland and His Majesty the Emperor of the French ; and

(*b*) to the Netherlands colony of Dutch Guiana, under the terms of the Convention

executed at the Hague on the 8th day of September, 1870, and ratified at the same place on the 17th day of February, 1872, between Her Majesty the Queen of the United Kingdom of Great Britain and Ireland and His Majesty the King of the Netherlands:

Provided that, in any case in which there is any conflict between the provisions of this Act and those contained in either of those Conventions, the latter shall prevail.

Application of Act to proceedings in British India connected with emigration from French ports in India to French colonies.

104. The provisions of this Act shall, so far as they relate to proceedings which are to be conducted in British India, apply, in the case of Natives of India who depart by sea from a French port in India under an agreement to labour for hire in a French colony under the Convention between Her Majesty the Queen of the United Kingdom of Great Britain and Ireland and His Majesty the Emperor of the French referred to in the last foregoing section, as if such Natives were emigrants within the meaning of this Act:

Provided that, in any case in which there is any conflict between the provisions of this Act and those contained in that Convention, the latter shall prevail.

Prohibition of departure by land of a Native of India under an agreement to labour for hire in some country beyond the sea.

105. (*1*) The departure by land out of British India of a Native of India under a contract to labour for hire in some country beyond the sea other than the Island of Ceylon or the Straits Settlements is prohibited:

Provided that nothing in this section applies to the departure by land—

(*a*) of a domestic servant when accompanying his employer;

(*b*) of a Native of India, for the purpose of departing by sea from a French port in India under an agreement to labour for hire in a French colony in accordance with the Convention referred to in section one hundred and two.

(*2*) Whoever induces, or attempts to induce, any Native of India to depart by land out of British India in contravention of this section shall be deemed to have committed an offence under section eighty-two.

SCHEDULE I.

(*See Section 8.*)

COUNTRIES TO WHICH EMIGRATION IS LAWFUL.

I.—The British Colonies of Mauritius, Jamaica, British Guiana, Trinidad, St. Lucia, Grenada, St. Vincent, Natal, St. Kitts, Nevis and Fiji.

II.—The French Colonies of Martinique, Guadeloupe and its dependencies, and Guiana.

III.—The Netherlands Colony of Dutch Guiana.

IV.—The Danish Colony of St. Croix.

SCHEDULE II.

(*See Section 21.*)

FORM OF RECRUITER'S LICENSE.

OFFICE of the Protector of Emigrants at the Port of .

A. B., described in the descriptive roll annexed, is hereby licensed under the Indian Emigration Act, 1883, to be a recruiter of emigrants for [*here state the country for which the recruiter is licensed to recruit*] in [*here specify the local area within which the recruiter is licensed to recruit*].

This license will be in force until the of , unless previously cancelled.

To Natal ...	Ten weeks.
To Fiji ...	Seventeen weeks.

D. FITZPATRICK,

Secretary to the Government of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

[First publication.]

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 18th December, 1883, and is hereby promulgated for general information :—

ACT No. XXII OF 1883.

THE RANGOON TRAMWAYS ACT, 1883.

CONTENTS.

An Act to authorize the making, and to regulate the working, of Street Tramways in Rangoon.

WHEREAS the Municipal Committee of the town of Rangoon, by an agreement dated the 22nd day of June, 1882, a copy whereof is set forth in the schedule annexed to this Act, granted, for the considerations therein expressed, to John William Darwood, his heirs, executors, administrators and assigns, hereinafter called the Grantee, the right to construct, maintain and use a tramway or tramways in Rangoon upon the terms, subject to the conditions and in the manner mentioned in the said agreement, but the said agreement was made subject to the confirmation thereof by the Chief Commissioner of British Burma and to the recognition thereof by an Act of the Governor General in Council;

and whereas the said agreement was, on the 13th day of November, 1882, confirmed by the Chief Commissioner of British Burma; and it is now expedient to recognise it and give effect to it, subject to the provisions and limitations hereinafter contained; It is hereby enacted as follows:—

A.—Preliminary.

Short title. Commencement.

1. This Act may be called the Rangoon Tramways Act, 1883; and it shall come into force at once.

Definitions.

2. In this Act, unless there is something repugnant in the subject or context,—

"Committee" means the Committee for the town of Rangoon appointed under the British Burma Municipal Act, 1874: VII of 1874.

"tramway" means a tramway, or any part of a tramway, or any siding, turnout, connection, line or track belonging to a tramway:

"street" means the way of any street, road, thoroughfare, passage or place along or across which any tramway authorized by this Act is or is intended to be laid, and includes the surface-soil and sub-soil of any such street, and the foot-way and drains of any such street, and any bridge, culvert or causeway forming part of any such street.

B.—Powers of Grantee generally.

Powers to make, maintain and use tramways.

3. Subject to the provisions of this Act, and to the terms and conditions of the said agreement so far as the same are not inconsistent with this Act, the Grantee may make, maintain and use any of the tramways for the construction, maintenance and use of which provision is made in the said agreement:

Provided that any such tramway shall not be opened for public traffic until it has been inspected and certified by the engineer to the Committee to be fit for such traffic.

C.—Construction and Maintenance of Tramways and of Streets on which they are laid.

Power to Grantee to break up streets and lay rails, &c.

4. Subject to the terms and conditions of the said agreement, the Grantee may, from time to time, for the purpose of constructing, maintaining or renewing any tramway under this Act, open or break up any street, and therein or thereon lay sleepers and rails, and repair, alter or remove the same; and may, for the purposes aforesaid, do in and on any such street all other acts which may, from time to time, be necessary for constructing, maintaining or renewing the tramway:

Provided that he shall not, without the consent of the Committee, open or break up at any one time a greater length than one hundred yards of any street which does not exceed a quarter of a mile in length; and, in the case of any street exceeding a quarter of a mile in length, he shall leave an interval of at least a quarter of a mile between any two places at which he may open or break up the street, and shall not open or break up at any such place a greater length than one hundred yards.

Grantee to keep tramways and adjoining part of street in repair.

5. The Grantee shall, at his own expense, at all times maintain and keep in good condition and repair, in such manner as the Committee from time to time direct, all tramways constructed by him under this Act, and so much of any street as lies between the rails of any such tramway; and, in the case of double lines or turn-outs or sidings, the portion of the road between the tramways, and in every case so much of the road as extends eighteen inches beyond the rails of and on each side of any such tramway.

Obligations of Grantee when he has broken up street.

6. When the Grantee has, for the purposes of section 4 or section 5, opened or broken up any portion of a street, he shall be under the following further obligations, namely:—

(*a*) he shall, with all convenient speed, and in all cases within six weeks at the most, unless the Committee otherwise consent in writing, complete the work for which the street has been opened or broken up, fill in the ground and make good the surface, and, to the satisfaction of the Committee, restore the street to as good a condition as that in which it was before it was opened or broken up, and clear away all surplus materials or rubbish occasioned thereby;

(*b*) he shall, in the meantime, cause the place where the street is opened or broken up to be fenced and watched, and to be properly lighted at night, and

(*c*) he shall make good all damage done to drains, sewers, water-pipes and gas-pipes, and to the wires or other materials or things used for any system of lighting, and whether belonging to the Committee, to the Government or to private persons, and shall make compensation for any other damage done in the execution of the powers granted to him.

Reservation of power of Committee and Government over streets.

7. (*1*) Nothing in this Act shall prevent the Committee or any Government officers from opening, breaking up, widening, altering, diverting or improving any street traversed by a tramway for the purposes for which they might otherwise under the law for the time being in force lawfully open, break up, widen, alter, divert or improve such street:

Provided that—

(*a*) they shall cause as little detriment or inconvenience to the Grantee as circumstances admit, and

(*b*) before they commence any work whereby the traffic on the tramway will be interrupted, they shall (except in cases of urgency, in which cases no notice shall be necessary) give to the Grantee not less than eighteen hours previous notice of their intention to commence the work, specifying the time at which they will commence it.

(*2*) The Committee or officers aforesaid or the Secretary of State for India in Council shall not be liable to pay to the Grantee any compensation for injury done to the tramway by the execution of any work referred to in sub-section (*1*), or for loss of traffic occasioned by the reasonable use of any power lawfully exercised in connection with the same.

D.—Rights over Tramways and Streets on which they are laid.

Grantee's exclusive right over tramways.

8. The Grantee shall, subject to the provisions of this Act and to the terms and conditions of the said agreement, have the exclusive use of his tramways for carriages with flange wheels or other wheels suitable only to run on a grooved rail:

Provided that nothing in this Act shall affect—

(*a*) the right of the public to pass along or across any part of any road along or across which any tramway is laid, whether on or off the tramway, with carriages not having flange wheels or wheels suitable to run on a grooved rail, or

(*b*) the right of the Commissioners for the port of Rangoon, or of any other body or person entitled at the time of the commencement of this Act to work and main-

tain a tramway, to pass across any tramway constructed under this Act with carriages having flange wheels or wheels suitable to run on a grooved rail.

Grantee to have right of user only.

9. Notwithstanding anything in this Act or in the said agreement, the Grantee shall not acquire any right other than that of user over any street along or across which he lays any tramway.

Power of Committee and Government officers to regulate traffic on streets.

10. Nothing in this Act shall affect the powers of the Committee or of any Government officers to regulate the passage of any traffic along or across any street along or across which any tramway is laid down, and the Committee or officers aforesaid may exercise their authority as well on as off the tramway, and with respect as well to the traffic of the Grantee as to the traffic of other persons.

E.—Traffic on Tramways.

Rates of fares and charges.

11. The Grantee may, from time to time, by a notice published in such languages and in such manner as the Chief Commissioner may prescribe, fix the rates of fares and charges for carrying passengers and goods in his carriages:

Provided that the rates of passenger fares shall not exceed one anna per mile for each passenger in the lower class and two annas per mile for each passenger in the higher or first class.

Mode of payment of fares and charges.

12. The fares and charges by this Act authorized shall be paid to such persons, at such places upon or near to the tramways, and in such manner and under such regulations as the Grantee may, by a notice published as aforesaid, from time to time prescribe.

Carriage of dangerous or offensive goods.

13. (*1*) No person shall be entitled to carry or to require to be carried on any tramway constructed under this Act any goods of a dangerous or offensive nature.

(*2*) Every person taking such goods with him on any such tramway shall, before entering the carriage, give notice of their nature to the servant of the Grantee in charge of the carriage.

(*3*) Every person sending such goods by any such tramway shall distinctly mark their nature on the outside of the package containing them, or otherwise give notice thereof in writing to the book-keeper or other servant of the Grantee with whom they are left at the time of such sending.

(*4*) The Grantee may refuse to take any parcel which he may suspect to contain goods of a dangerous or offensive nature, or require it to be opened to ascertain the fact.

F.—Offences and Penalties.

Penalty for failure of Grantee to comply with certain provisions of Act and agreement.

14. If the Grantee—

(*a*) constructs or maintains any tramway, or runs any car or carriage thereon, otherwise than in accordance with the said agreement;

(*b*) opens any tramway for traffic before it has been inspected and certified in manner required by section 3;

(*c*) opens or breaks up any street otherwise than as permitted by this Act, or having opened or broken up a street fails to discharge any of the obligations imposed on him by section 6, clauses (*a*) and (*b*); or

(*d*) fails to keep the rails of any tramway and the portions of the street adjoining the same in repair as required by section 5—

he shall (without prejudice to the enforcement of specific performance of the requirements of this Act or of the said agreement or to any other remedy against him), on complaint of the Committee or of any person injuriously affected thereby, be punished with fine which may extend to two hundred rupees, and in the case of a continuing offence to a further fine which may extend to fifty rupees for each day after the first day during which the offence continues to be committed.

Penalty for obstructing Grantee in the exercise of his powers.

15. Any person who without lawful excuse (the proof whereof shall lie on him) wilfully obstructs any person acting under the authority of the Grantee in the lawful exercise of his powers in constructing, repairing or renewing a tramway, or injures or destroys any mark made for the purpose of setting out the line of the tramway, shall be punished with fine which may extend to fifty rupees.

Penalty for interfering with tramway.

16. Any person who without lawful excuse (the proof whereof shall lie on him) wilfully does any of the following things, namely:—

(*a*) interferes with, removes or alters any part of a tramway constructed under this Act, or of the works connected therewith;

(*b*) does anything in such a manner as to obstruct any carriage using any such tramway; or

(*c*) abets within the meaning of the Indian Penal Code the doing of anything mentioned in clause (*a*) or clause (*b*),—

shall be punished with fine which may extend to one hundred rupees.

Penalty for taking or sending dangerous or offensive goods without giving notice.

17. Any person taking or sending by any tramway any goods of a dangerous or offensive nature without giving the notice required by section 13 shall be punished with fine which may extend to fifty rupees.

Penalty for avoiding payment of proper fare.

18. If any person travelling or having travelled in any carriage of the Grantee avoids or attempts to avoid payment of his fare, or if any person having paid his fare for a certain distance wilfully proceeds in any such carriage beyond that distance and does not pay the additional fare for the additional distance or attempts to avoid payment thereof, or if any person wilfully refuses or neglects on arriving at the point to which he has paid his fare to quit the carriage, he shall be punished with fine which may extend to ten rupees.

4 f

19. Any servant of the Grantee, and any person called in by him for his assistance, may arrest and take to the nearest police-station any person who is discovered either in or after committing or attempting to commit an offence punishable under section 18 and whose name and residence are refused by him and are unknown to such servant or person, and the police-officer in charge of the police-station, on receiving a complaint that such an offence has been committed, shall adopt such legal measures as may be necessary to cause the accused person to be taken before a Magistrate with the least possible delay.

Power of servant of Grantee to arrest persons avoiding payment of fare.

G.—Powers to make Rules.

20. (*1*) The Committee in special meeting may, with the sanction of the Chief Commissioner, from time to time, make such rules consistent with this Act as to the rate of speed, number of passengers and mode of use of the tramways; and as to the licensing and control of drivers, conductors and other persons having charge of the carriages of the Grantee, as the convenience and safety of the public may, in the opinion of the Committee, require.

Powers to make rules.

(*2*) The Grantee may, with the like sanction, from time to time, make rules consistent with this Act for preventing the commission of any nuisance in or upon any carriage, or in or against any premises belonging to him, and

for regulating the travelling in any carriage belonging to him.

(*3*) The authority making any rule under this section may prescribe as a punishment for the breach of it a fine which may extend to twenty rupees.

(*4*) All rules made under this section shall be published in the *British Burma Gazette.*

H.—Miscellaneous

21. For the purpose of clause 15 of the agreement set forth in the schedule annexed to this Act, the want of sufficient funds shall not be deemed to be a circumstance beyond the control of the Grantee.

Construction of clause 15 of agreement.

22. The plant, rolling-stock and other vehicles, yards, workshops, engine-sheds and depôts of the Grantee shall, for a period of five years from the passing of this Act, be exempt from all municipal taxation except such lighting and water-rates as may, from time to time, be payable in respect of the yards, workshops, engine-sheds and depôts.

Exemption from certain municipal taxation.

23. Nothing in this Act shall exempt the Grantee or any tramway constructed by him under this Act from the provisions of any general enactment relating to tramways now in force or which may hereafter be passed.

Provisions as to general Acts.

And whereas the agreement set forth in the schedule annexed to this Act was executed by the parties thereto under a belief that all the streets specified in the first article thereof as streets along which the construction of tramways was authorized were situate within the Municipality of Rangoon, and it now appears that some portion of those streets is not so situate; It is hereby enacted as follows:—

24. All streets specified in the first article of the said agreement as streets along which the construction of tramways is authorized shall, for the purposes of the agreement and of this Act, be deemed to be, and to have been, on and from the date of the agreement, situate within the limits of the Municipality of Rangoon.

Certain streets to be deemed within the Municipality.

SCHEDULE.

ARTICLES OF AGREEMENT made this 22nd day of June, 1882, BETWEEN THE MUNICIPAL COMMITTEE OF THE CITY OF RANGOON appointed under the British Burma Municipal Act, 1874, hereinafter called the said Committee, of the one part, and JOHN WILLIAM DARWOOD, of Rangoon, hereinafter called the said Grantee, of the other part. WHEREAS the said Committee have, subject to the confirmation thereof by the Chief Commissioner of British Burma and to the recognition of this agreement by an Act of the Governor General of India in Council, agreed to grant to the said Grantee the right to construct, maintain and use a tramway or tramways in Rangoon upon the terms and conditions hereinafter contained, NOW THESE PRESENTS WITNESS that, in consideration of the covenants and agreements hereinafter contained, and on the part of the said Committee to be performed, the said Grantee for himself, his heirs, executors, administrators and assigns doth covenant with the said Committee, so far as the covenants and conditions hereinafter contained are to be performed by the said Grantee and his heirs, executors, administrators and assigns, and the said Committee, for and in consideration of the convenants and agreements hereinafter contained and on the part of the said Grantee, his heirs, executors, administrators and assigns to be performed, do hereby covenant with the said Grantee, his heirs, executors, administrators and assigns so far as the covenants and agreements hereinafter contained are to be performed by the said Committee in manner following, that is to say:—

VII of 1874.

1. The said Committee grant to the said Grantee and his heirs, executors, administrators and assigns, all which persons are hereinafter included in the words "the said Grantee," the right to construct, maintain and use a tramway or tramways, with single or double tracks or lines, and with all necessary sidings, turnouts, connections and lines, or tracks of whatever nature which may be required to connect the said tramway or tramways with the depôts of the said Grantee (but in the case of sidings and turnouts, only in such places as the said Committee may sanction), on the following

routes and between such other places and by such other routes as may be hereafter approved of by the said Committee:—

The tramways referred to and now authorized for construction, subject to such confirmation as aforesaid, are:—

(i) A tramway with a double track or line along China Street and Pagoda Road from the Strand Road at its junction with China Street to the Shway Dagone Pagoda.

(ii) A tramway with a double track or line along the Strand Road from East Street to West Street.

(iii) A tramway with a double track or line along Dalhousie Street from East Street to the junction of Dalhousie Street with the Strand Road.

(iv) A tramway with a double track or line along Soolay Pagoda Road from the Strand Road to Montgomery Street and along Montgomery Street to the Phayre Street Railway Station and along Montgomery Road to the iron bridge near the bázár at Poozoondoung.

(v) A tramway with a double track or line from the Strand Road down Barr Street to Shafraz Road round the Public Buildings back into the Strand Road.

2. When approved of and desired by the said Committee, tramways with such tracks or lines as may be approved of by the said Committee from East Street to Monkey Point and along the Upper and Lower Poozoondoung Roads to Monkey Point, and along Merchant Street, Fraser Street and Canal Street, and along Lower Kemmendine Road from the Strand Road, Kemmendine, to the junction of West Street with the Strand Road.

3. The said tramway or tramways to be constructed and maintained in such form and manner and upon such gradient and with such gauge as the said Committee may approve, and the cars and carriages intended to run on the said rails shall be such as are approved of by the said Committee.

4. The cars and carriages of the Grantee on the tracks or lines of the said tramway shall, unless with the consent of the said Committee, be worked with steam power of the most approved engine of the time only, and the said Committee shall have power at all times to make such regulations as to the rate of speed and mode and use of the said tracks or lines as the convenience and safety of the public using the streets may require.

5. The said Grantee shall have power from time to time to fix the rate of fares for carrying persons and goods in the cars or carriages to be run on the said tramway or tramways: provided that the rates of fares shall for any distance not exceed the rate of one anna per mile for the lower class and two annas per mile for the higher or first class for each passenger.

6. The said Grantee may, for the purpose of constructing and maintaining such tramways under such superintendence as is hereinafter specified open and break up the soil and metalled way of the several streets, roads and bridges in the city and thereon lay sleepers and rails, and from time to time repair, alter or remove the same, and may, for the purposes aforesaid, remove and use all earth and materials in such streets, roads and bridges, and the said Grantee may, in and on such streets, roads and bridges, do all other acts which he shall from time to time deem necessary for constructing and maintaining street tramways in the said city, doing as little damage as may be in the execution of the powers hereby granted, and shall make good all damage done to drains, sewers, water and gas-pipes, or to the wires or other materials or things used for any other system of lighting, and whether belonging to the said municipality or to private individuals, and shall make compensation for any other damage done in the execution of such powers.

7. Before the said Grantee proceeds to open or break up any street, road or bridge other than those referred to in sub-clauses from (i) to (v) in clause 1, he shall obtain the approval in writing of the said Committee to the tracks or lines of the said tramway being laid down on the said streets, roads or bridges, and the said Grantee, before opening or breaking up any street, road or bridge, shall give to the said Committee or their Executive Engineer, or other municipal officer duly appointed for that purpose, notice in writing of his intention to open or break up the same not less than three clear days before beginning such work, except in such cases of emergency arising from defects in any of the rails or other work, and then so soon as is possible after the beginning of the work or the necessity for the same shall have arisen.

8. No street, road or bridge shall, except in cases of emergency as aforesaid, be opened or broken up, except under the superintendence of the said Committee or of their Executive Engineer, or of some other municipal officer duly appointed for that purpose, and according to such plans as shall be approved of by him or them: provided always that, if the said Committee or their Engineer or other such officer as aforesaid fail to attend at the time fixed for the opening of any such street, road or bridge after having had such notice of the said Grantee's intention as aforesaid, or shall not propose any plan for breaking up or opening the same, or shall refuse or neglect to superintend the operation, the said Grantee may perform the work specified in such notice without such superintendence as aforesaid.

9. When the said Grantee opens or breaks up the roadway or pavement of any street, road or bridge, he shall with all convenient speed complete the work for which the same shall be broken up, and fill in the ground and make good the roadway or pavement so opened or broken up as aforesaid, and carry away the rubbish occasioned thereby and deposit the same for the use of the said Committee at such place as the Executive Engineer of the said municipality shall direct, and shall at all

times, whilst any such roadway or pavement shall be so opened or broken up, cause the same to be guarded, and shall cause a light sufficient for the warning of passengers to be set up and maintained against or near such roadway or pavement where the same shall be open or broken up every night during which the same shall continue open or broken up.

10. If the said Grantee opens or breaks up any street, road or bridge without giving such notice as hereinbefore mentioned, or in a manner different from that which shall have been approved of or determined as aforesaid, except in the cases in which the said Grantee is hereby authorized to perform such work without any superintendence or notice, or if the said Grantee shall make any unnecessary delay in completing any such work or in filling in the ground or reinstating and making good, so far as is consistent with the existence of the said tramway, the roadway or pavement so opened or broken up, or in carrying away the rubbish occasioned thereby, or if he neglect to cause the place where such roadway or pavement has been broken up to be guarded and lighted, he shall forfeit to the said Committee a sum not exceeding fifty (50) rupees for every such offence, and he shall forfeit an additional sum not exceeding fifty (50) rupees for each day during which any such delay or neglect as aforesaid shall continue after he shall have received notice thereof.

11. The said Grantee shall maintain and keep in repair such portion of the streets, roads and bridges in the city of Rangoon as shall be occupied by his tracks or lines, including therein, not only the space between his tracks or lines, but a space eighteen inches on either side thereof, and in consideration of the maintenance of such streets, roads and bridges as aforesaid, and of the yearly rent hereinafter mentioned to be paid by the Grantee, the plant, rolling-stock and other vehicles, yards, workshops, engine-sheds and depôts of the said Grantee shall be exempt from municipal taxation for a period of five years, except lighting and water-rates for such yards, workshops, engine-sheds and depôts.

12. The said Grantee shall be liable for any loss, damage or injuries that any person or persons may sustain by reason of any defect or want of repairs in any of the plant, rolling-stock or other properties of the said Grantee, or by reason of any carelessness, neglect or misconduct of his agents or servants in the management, construction or use of the said tramways or any portion thereof, or in the exercise of the power given by clauses 6, 7, 8, and 11; the same shall be made good by the said Grantee, and in the event of any suit being instituted against the said Committee in respect of any of the matters hereinbefore mentioned the said Grantee shall, within fourteen days from the receipt of a notice thereof from the said Committee, settle the same; but if the said Grantee choose to defend such suit he shall be at liberty to do so upon his undertaking to indemnify the said Committee against all losses, damages and expenses in respect thereof: provided always that, if the said Grantee fail to settle such suit or to indemnify the said Committee as is hereinbefore provided, it shall be lawful for the said Committee to settle the same without any consent or concurrence on the part of the said Grantee, and the sums which they shall have to pay in making such settlement, together with interest thereon at the rate of 8 per cent. per annum from the date of payment, and with all expenses which they may be put to, shall be recoverable as a debt from the said Grantee.

13. Nothing in this agreement shall be construed to prevent the said Committee from taking up any of the public streets or roads traversed by the said tramway for the purposes for which the said Committee may lawfully take up the same, and the said Grantee shall have no right to claim cost from the said Committee for obstructing the tramway or causing delay in the traffic so long as the delay shall not be unreasonable for the work to be performed.

14. If the said Committee shall hereafter alter the level of any street, road or bridge along or across which any tramway by this agreement authorized is laid or authorized to be laid, the Grantee shall alter or (as the case may be) lay his rails to suit the altered level of such street, road or bridge: provided always that any such alteration as aforesaid shall be so made as to interfere as little as possible with the safe and convenient working of the said tramways, and in any case so as not to stop or prevent the free use or working thereof.

15. If at any time after the opening of any tramway for traffic the said Grantee shall discontinue the working of such tramway or any part thereof for the space of six calendar months (such discontinuance not being occasioned by circumstances beyond the control of the said Grantee), it shall be lawful for the said Committee, without any previous notice to the said Grantee, to remove the tramway or part of the tramway so discontinued, and the said Grantee shall pay to the said Committee the cost of such removal and of the making good of the street, road or bridge, and the certificate of the said Committee or of their Engineer as to such cost shall be conclusive.

16. The provisions of this agreement shall remain and be in force for a term not less than twenty-one (21) years from the date thereof. The said Committee shall have the right of purchasing the said tramways, with the plant, stores, rolling-stock, sheds, depôts and yards, and everything connected therewith, after the expiration of the said twenty-one (21) years upon declaring its intention so to do within six months after the expiration of the said twenty-one (21) years; the amount to be paid in the event of such purchase shall be the actual *bonâ fide* value at the termination of this agreement, exclusive of any compensation for goodwill, premium on compulsory sale or other consideration whatever of the tramways and of the work and materials connected therewith, and of the lands and buildings and all the other property of the Grantee, such value to be decided by mutual agreement or by arbitration as hereinafter provided.

17. The provisions hereinbefore contained shall, so far as applicable, apply to all tramways to be constructed by the said Grantee by any route or routes to be hereafter sanctioned by the said Committee, and to the works connected with or incidental to such tramways, it being agreed that in the event of the municipality failing to declare its intention as above provided to purchase the property of the said Grantee the terms of this contract shall continue in force during the period of six months from the date of the determination of

these presents and for a further period of six months, and if the said Committee shall not within that time exercise the option of purchase hereby given, the said Committee and the said Grantee shall enter into a fresh agreement.

18. The said Grantee will, if required by the said Committee, before opening up the roadway of any street, road or bridge, deposit with the Bank of Bengal in the name of the said Committee the sum of rupees five thousand (5,000) or, in their option, promissory notes of the Government of India of the nominal value of rupees five thousand (5,000), and the same will remain so deposited until the completion by the said Grantee of the above mentioned lines of tramway herein sanctioned for construction. All interest accruing on the said sum, or the said notes, shall be credited to the said Grantee, and, subject as next hereinafter mentioned, be paid to him as the same accrues due. The said Committee shall be entitled to deduct all fines recoverable by the said Committee and all monies to which they may be entitled under any clause or clauses of these presents out of the sum so deposited, or the interest accruing on the said sum or notes, or out of the proceeds of sale of a portion of the said notes on completion of the tramways herein sanctioned for immediate construction.

19. In consideration of the concession herein granted, the said Grantee undertakes on behalf of himself, his heirs, executors, administrators and assigns that he will pay to the said Committee a yearly rent of rupees three thousand (3,000) per mile of double track or line and rupees two thousand (2,000) per mile of single track or line, payable half-yearly; the date on which such rent on each line of tramway shall begin to accrue shall be the date on which such line of tramways is open for public traffic.

20. It is agreed that the tramway or tramways from the Strand Road along Barr Street and Shafraz Road round the Public Buildings and back to the Strand Road should not be included, and that no sidings, turnouts or tracks necessary to connect the traffic lines with the carriage-sheds engine-sheds, factories, depôts, yards or other property or properties of the said Grantee shall be included in the mileage on which rent is to be paid, the tramway or tramways more particularly described in this paragraph, and such sidings, turnouts and necessary connecting tracks or lines, being free of rent.

21. The sleepers, rails, materials and implements and other erections placed and erected by the said Grantee on the streets, bridges or roads under the powers hereby granted shall be and remain the property of the said Grantee, and the said Grantee shall have the exclusive use of his tramway or tramways for carriages with flanged wheels or other wheels suitable only to run on the prescribed rail.

22. The prescribed rail is that known as the box-rail introduced by Mr. Robinson Souttar, to be made of Bessemer steel of the weight of sixty pounds to the yard, or such other rail of such weight as may be approved by the said Committee.

23. The said Grantee shall have the exclusive right of laying and using tramways within the limit of the Rangoon Municipality on the term herein stated; but in the event of the said Grantee refusing to lay down any line when the said Committee may consider it necessary, the said Committee shall be at liberty to grant the right of laying and using such line to any other party.

24. Unless the said Grantee shall have commenced the work of laying down the said tramways within twelve months from the date of the execution of these articles of agreement, the said Committee shall be at liberty to cease and determine this contract and to enter into arrangements with any other person or persons for the construction of tramways; it being agreed, however, that these conditions of contract are subject to the sanction of Government, and that, in the event of their being executed prior to such sanction being given, the said 12 months shall date from the day on which notice of such sanction is given to the said Grantee: provided also that any delay in commencing the work beyond 12 months shall not have been due to any cause beyond the control of the said Grantee.

25. If any doubt, difference or dispute shall arise between the said Grantee and the said Committee touching the construction of these presents or anything herein contained, or touching or concerning any other matter or thing relating to these presents, then and in every such case such doubt, difference or dispute shall be referred to the arbitration of two persons, one to be chosen by the said Grantee and the other by the said Committee within one calendar month after either of them shall have made to the other a requisition to that effect, and should the arbitrators fail to agree they shall refer the question or questions at issue to the decision of an umpire to be chosen by the said arbitrators, and the decision of such arbitrators if they agree, or of such umpire if they disagree, shall be final; and in case either party shall neglect or refuse to appoint an arbitrator within the specified time, the arbitrator appointed by the other party shall make a decision alone, and the decision of such arbitrators, umpire or arbitrator, as the case may be, shall be effectual and binding upon both parties.

26. The said Grantee is to be at liberty to form a Company or Limited Liability Company for the purpose of constructing, maintaining and working the tramways authorized by or hereafter to be authorized under the terms of this agreement. The words "the said Grantee" used in this agreement shall include such Company or Limited Liability Company so formed as aforesaid.

27. The words "the said Committee" used in this agreement shall include the present Committee and their successors, and also persons empowered by the said Committee or their successors or by other duly constituted authority to do any act or thing or exercise any powers or authorities which the said Committee are hereinbefore authorized or empowered to do or exercise.

PART V.

Bills introduced into the Council of the Governor General for making Laws and Regulations, or published under Rule 22.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

[Second publication.]

The following Bill was introduced into the Council of the Governor General of India for the purpose of making Laws and Regulations on the 14th December, 1883:—

No. 24 OF 1883.

A Bill to repeal Bengal Regulation XIX of 1810 within the territories administered by the Lieutenant-Governor of the North-Western Provinces.

WHEREAS the provisions of Bengal Regulation XIX of 1810 (*for the due appropriation of the rents and produce of lands granted for the support of mosques, Hindu temples, colleges and other purposes; for the maintenance and repair of bridges, serdis, kattras and other public buildings; and for the custody and disposal of nazúl property or escheats,*) are, in so far as they are still in force within the territories administered by the Lieutenant-Governor of the North-Western Provinces, either obsolete or unnecessary, and it is therefore expedient entirely to repeal the Regulation within those territories; It is hereby enacted as follows:—

Repeal of Bengal Regulation XIX of 1810 in the North-Western Provinces.

1. Bengal Regulation XIX of 1810 is hereby repealed within the territories administered by the Lieutenant-Governor of the North-Western Provinces.

STATEMENT OF OBJECTS AND REASONS.

The object of this Bill, which has been prepared on the recommendation of the Local Government, is to repeal Bengal Regulation XIX of 1810 (*for the due appropriation of the rents and produce of lands granted for the support of mosques, Hindu temples, colleges, and other purposes; for the maintenance and repair of bridges, serdis, kattras, and other public buildings; and for the custody and disposal of nazúl property or escheats*) within the territories administered by the Lieutenant-Governor of the North-Western Provinces. So far as the Regulation vests the superintendence of serdis in the Board of Revenue, it is at variance with the existing practice, as serdis are now managed in the North-Western Provinces entirely by the executive authorities under the immediate orders of the Government, and the Local Government reports that the other provisions of the Regulation, which provide for the management of lands granted as charitable and educational endowments and the superintendence of escheats, are not required for the territories under its administration.

Though the Regulation, in so far as it relates to serdis, is obsolete also in the Lower Provinces, it is still in active operation in those Provinces with regard to a few trusts and small endowments administered by the Board of Revenue, and still governs the procedure there with regard to escheats. Under these circumstances it has been considered best to confine the Bill to the North-Western Provinces and leave it to the Bengal Legislature to legislate for the Lower Provinces if it thinks necessary.

C. P. ILBERT.

The 7th December, 1883.

D. FITZPATRICK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

[Second publication.]

The following Bill was introduced into the Council of the Governor General of India for the purpose of making Laws and Regulations on the 14th December, 1883, and was referred to a Select Committee:—

No. 25 OF 1883.

A Bill to amend the Burma Courts Act, 1875.

WHEREAS it is expedient to amend the Burma Courts Act, 1875; It is hereby enacted as follows:— I of 1875.

Short title. Commencement.

1. (*1*) This Act may be called the Burma Courts Act, 1883; and

(*2*) It shall come into force at once.

Definition of "section."

2. In this Act, unless there is something repugnant in the subject or context, "section" means a section of the Burma Courts Act, 1875. II of 1875.

Alteration of names of certain Courts.

3. (*1*) In section 6, in clause (*a*), for the words "Extra Assistant Commissioner of the third class" the word "Myo-ôk" shall be substituted, and in clause (*b*) the words "of the second class, the Extra Assistant Commissioner of the first class" shall be omitted.

(*2*) In the table subjoined to section 12, in clause (*a*), for the words "Extra Assistant Commissioner of the third class" the word "Myo-ôk" shall be substituted, and in clause (*b*), the words "of the second class, the Court of the Extra Assistant Commissioner of the first class" shall be omitted.

(*3*) In section 13, the words "of the first or second class" shall be omitted.

(*4*) The substitutions and omissions made by this section shall be deemed to have been made from the thirty-first day of March, 1882.

Substitution of new section for section 8.

4. For section 8 the following section shall be substituted:—

"8. The Governor General in Council and the Chief Commissioner may, respectively, from time to time, vary the number of Courts mentioned in section six, in clauses (*c*), (*d*), (*e*) and (*f*), and in clauses (*a*) and (*b*)."

Substitution of new section for section 9.

5. For section 9 the following section shall be substituted:—

"9. The Chief Commissioner may, from time to time, vary the local limits of the jurisdiction of any Court mentioned in section six, clauses (*a*) and (*b*), and, with the previous sanction of the Governor General in Council, of any Court mentioned in section six, clauses (*c*), (*d*), (*e*) and (*f*)."

Insertion of section after section 9.

6. After section 9 the following section shall be inserted, namely:—

Validation of certain proceedings already taken.

"9A. Any order heretofore passed, or decree made or proceeding taken by any Civil Court in British Burma acting as if it had the jurisdiction of a Court mentioned in section six, clause (*a*) or clause (*b*), shall not be invalid merely because the Court was established by the Chief Commissioner instead of by the Governor General in Council or because the local limits of its jurisdiction were varied by the Chief Commissioner without the previous sanction of the Governor General in Council."

Amendment of section 23.

7. In section 23 the following amendments shall be made, namely:—

(*a*) after the word "Commissioner" each time it occurs, the words "or Deputy Commissioner,"

(*b*) after the words "Judicial Commissioner" the first time they occur, the words "or Commissioner respectively," and

(*c*) after the words "Judicial Commissioner," the second time they occur, the words "or Commissioner,"

shall be respectively inserted.

Insertion of section after section 23.

8. After section 23 the following section shall be inserted, namely:—

Power for Chief Commissioner to invest Assistant Commissioners with appellate powers.

"23A. The Chief Commissioner may invest any Assistant Commissioner with power to hear appeals from decrees and orders in original suits and proceedings of any Court mentioned in section six, clause (*a*) or (*b*).

"The Chief Commissioner may withdraw the power with which any Assistant Commissioner has been invested under this section."

Substitution of new section for section 38.

9. For section 38 the following section shall be substituted, namely:—

Appointment of officers.

"38. The presiding officer of the Court of the Judicial Commissioner shall be appointed by the Governor General in Council.

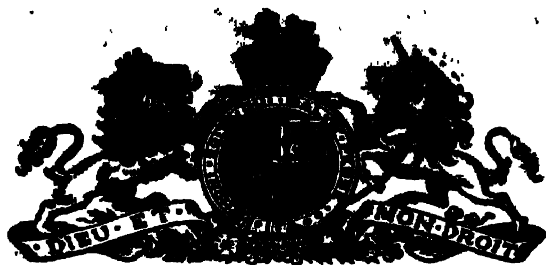
"The presiding officers of all the other Courts mentioned in section six may be appointed and may be removed by the Chief Commissioner."

STATEMENT OF OBJECTS AND REASONS.

THE object of this Bill is to make certain amendments in the Burma Courts Act, 1875 (XVII of 1875), which experience has shown to be required.

2. In the Act as it at present stands the presiding officers of the Courts of the lowest grades are termed Extra Assistant Commissioners of the 1st, 2nd and 3rd class respectively. In 1882 the Subordinate Executive and Judicial Service in British Burma was reorganized, and the designations of the service were changed. The term Extra Assistant Commissioner was restricted to Extra Assistant Commissioners of the 1st and 2nd classes under the old system; and Extra Assistant Commissioners of the 3rd class were styled Myo-ôks. The result is that the present designations of the Subordinate Judicial Officers do not correspond with the designations given to the Subordinate Civil Courts by the Act. This difficulty has hitherto been ignored. Now, however, the Judicial Commissioner, Mr. Jardine, is of opinion that, as the law stands, the nomenclature used in the Courts Act should be adhered to as regards all officers of the Subordinate Judicial Service appointed to preside in Civil Courts. He advises the Chief Commissioner that questions of jurisdiction may arise and may cause inconvenience and loss to suitors; and he reports that a case of the kind has already occurred. This being the view taken by the Judge of the highest Appellate Court, the Chief Commissioner has addressed the Government of India on the subject. He wishes that all doubt on the point should be removed by substituting the words "Extra Assistant Commissioner" for the words "Extra Assistant Commissioner of the 1st and 2nd class," and the word "Myo-ôk" for the words "Extra Assistant Commissioner of the 3rd class" wherever they occur in the Courts Act. With this view section 3 of the Bill has been drafted. It gives the amendments made by the section retrospective effect from the 1st April, 1882, the date of the re-organization of the Subordinate Service.

3. Further difficulties have also arisen from the provisions of sections 8 and 9 of the Act. Under recent orders the Chief Commissioner has power to create additional Myo-ôkships; but in consequence of the provisions of section 8 of the Act additional Myo-ôks appointed by the Chief Commissioner can do no civil work unless the sanction of the Government of India is first obtained to the creation of an additional Civil Court. Again, the duties performed by Extra Assistant Commissioners and those performed by Myo-ôks are practically of the same description. The exigencies of the public service often render necessary the appointment of a Myo-ôk to succeed an Extra Assistant Commissioner or of an Extra Assistant Commissioner to succeed a Myo-ôk in the charge of a township; and the result is that an officer who should preside in a Court of grade (*a*) is appointed to preside in a Court which has hitherto been a Court of grade (*b*), or *vice versâ*. Such changes have from time to time been made by the Chief Commissioner. The Judicial Commissioner is of opinion that, having regard to the provisions of sections 8 and 9 of the Act, such an interchange cannot legally be effected except by, or with the previous sanction of, the Governor General in Council. The inconvenience which would arise if it were held to be necessary to submit a reference to the Government of India on every occasion such as those described is apparent. The administration of the province, and particularly the administration of civil justice, would be seriously hampered. Sections 4 and 5 of the Bill therefore re-enact sections 8 and 9 of the Act in such a form that the Local Government is empowered to vary the number of Courts of grades (*a*) and (*b*), and to vary the local limits of the jurisdiction of these Courts without the previous sanction of the Government of India, and section 6 legalizes the variations in the numbers, and limits of the local jurisdictions, of these Courts, which have heretofore from time to time been made by the Chief Commissioner instead of by the Governor General in Council or by the Chief Commissioner without the previous sanction of the Governor General in Council.



4. The Chief Commissioner states that the Deputy Commissioners in certain districts are overburdened by the pressure of civil appellate duties to the detriment of their executive work, and that, in order to increase their efficiency as executive officers, it is necessary to relieve them of some portion of their appellate jurisdiction. With this object sections 7 and 8 of the Bill have been prepared. The latter section, which is based on the recommendation of the Chief Commissioner, gives him authority to invest an Assistant Commissioner with power to hear certain civil appeals which would ordinarily be heard by the Deputy Commissioner. The former section empowers the Chief Commissioner to transfer to Commissioners of Divisions all or any part of the appellate jurisdiction exercisable under the Act by Deputy Commissioners. It seems desirable to provide this second and additional mode of affording the proposed relief to Deputy Commissioners, as it is possible that the result of transferring civil appellate work from the Deputy Commissioner to the Assistant Commissioner may not always prove satisfactory.

Lastly, under section 38 of the Act, the Chief Commissioner is only empowered to appoint and remove the presiding officers of the Court of the Extra Assistant Commissioner of the 3rd class (now styled the Myo-ôk). The presiding officers of all the other Courts under the Act must be appointed by the Governor General in Council. These provisions have been found to cause practical inconvenience, and the Government of India see no reason why the Chief Commissioner should not have, in regard to civil jurisdiction, like powers to those which the Criminal Procedure Code gives him in regard to criminal jurisdiction. Accordingly, section 9 of the Bill amends section 38 of the Act, and confers power on the Chief Commissioner to appoint and remove the presiding officers of all the Courts mentioned in section 6 of the Act with the exception of the Court of the Judicial Commissioner; the power to appoint the presiding officer of that Court being reserved to the Governor General in Council.

C. P. ILBERT.

The 7th December, 1883.

D. FITZPATRICK,
Secretary to the Government of India.

SUPPLEMENT TO

The Gazette of India.

No. 51.] CALCUTTA, SATURDAY, DECEMBER 22, 1883.

OFFICIAL PAPERS.

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known.

Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of six Rupees per annum if delivered in Calcutta, or nine Rupees if sent by Post.

No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

PRICE LIST OF CAST-IRON GOODS MANUFACTURED AT THE BURRAKUR IRON WORKS.

[The prices are given in rupees per ton delivered into wagons at Sitarampore Railway Station.]

Number of item.	DESCRIPTION.	Rate per ton.	REMARKS.
		R	
1	Cast-iron sleeper plates with jaws, Denham Olphert's patent, for broad gauge railways	66	The material used is of such quality that a test bar of 2″ × 1″ section, by 3 feet bearing, carries in the centre a weight of 28½ cwt., with ⅜th inch deflection before fracture.
2	Cast-iron sleeper plates with jaws, Denham Olphert's patent, for metre gauge railways	68	
3	Cast-iron sleeper plates with jaws, for small gauge railways, Denham Olphert's patent, with Molesworth's wedge (for curves).	70	
4	Cast-iron railway chairs	66	
5	Cast-iron socket pipes, ordinary dimensions, tested, with turned spigots and fossets	95	
6	Cast-iron socket pipes, tested, but not faced	90	
7	Flange pipes, ordinary dimensions, tested, with faced joints	120	
8	Bends, tee and cross pieces for pipings of ordinary dimensions	120 to 150	
9	Plain columns with moveable capital and bottom plate	110	
10	Cast-iron floor plates, 4′ × 2′ × ⅝″ to ¾″ thick	90	
	Any other dimension	90 to 110	
11	Fire bars	120 to 130	
12	Castings for the Telegraph Department—		
	1. Sockets for telegraph posts—

T. W. HOLDERNESS,

Under-Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASONS AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 18th DECEMBER 1883.

GENERAL REMARKS.—Rain has fallen generally over the Madras Presidency, Mysore, and Coorg. Slight falls have also occurred in two districts of Assam, but none elsewhere. Harvesting continues in Madras, and the standing crops promise well. In Coorg the ripe paddy has suffered slightly from the unusual rain, which has however done good to backward crops. In Bombay cotton is attacked by blight in two districts, but *rabi* prospects are generally favourable. In the Berars, Hyderabad, Central India, and Rajputana the prospects are also favourable, but rain is needed for the *rabi* in Jaipur and Ulwar. *Rabi* sowings have been completed in the Punjab, and the crops are looking well, though rain is required. In the North-Western Provinces and Oudh prospects are fair, but the *rabi* crops on unirrigated lands stand in need of rain. In the Central Provinces the weather is favourable, and prospects good.

Last week's rain in Bengal, while benefiting the *rabi* crops, has been unfavourable to rice, which, except in Eastern Bengal and Orissa, will yield much below the average. The *rabi* in Behar is reported to be suffering much from want of rain.

In Burma the rice harvest is well advanced, and promises a good yield, though rain and floods have caused some loss in several districts.

Late heavy rains have also much injured the crops in the Sylhet district of Assam.

The public health is generally fair, but cholera is prevalent in parts of Madras.

Prices are high in Bengal, and normal elsewhere.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras (Dec. 19th)—		
Bellary	. . . . .	Standing crops generally good; harvest paddy, and *ragi*, yield average, other dry grains, pulse, and oil seeds below average.
Kurnool	·65 (average of 5 stations).	Standing crops good; harvest paddy, yield above average.
Ganjam	. . . . .	Standing crops good; harvest paddy progressing; fever and small-pox slight in one taluk.
Kistna	. . . . .	Standing crops generally good; harvest black paddy progressing; fever and small-pox prevalent; cattle-disease in parts.
Chingleput (Madras)	7·56 (average of 11 stations).	Standing crops generally good; harvest *kar* paddy, yield below average; 35 deaths from cholera.
Coimbatore	1·62 (average of 14 stations).	Harvest paddy, *ragi*, *cumbu* and *cholum*, yield average; 194 deaths from cholera, fever, small-pox and cattle-disease in parts.
Tanjore	1·5 (average of 13 stations).	Standing crops generally good; harvest paddy, yield below average; 275 deaths from cholera.
Madura	·95 (average of 5 stations).	Standing crops fair; harvest dry crops, yield about average; cholera decreasing in Madura town, elsewhere slight.
Malabar	1·02 (average of 4 stations).	Second crop generally in good condition; small-pox, fever, and cattle-disease slight; four deaths from cholera.
Travancore	0·46	Standing crops good; cholera slight. *General Remarks.*—General prospects good
Bombay—(Dec. 19th)—		
Kurrachee	. . . . .	River at Kotri on 13th 4 feet 9 inches against 4 feet 8 inches on same date last year; two fresh cases of small-pox in Karachi on 12th among Mekranis, in Bagdadi lines total 5, 1 death; disease in 9 villages, in district 53 fresh cases, 2 deaths, 49 remaining sick; cattle-disease in five talukas; some loss in Sujawal and Mirpur Batoro; *kharif* harvest completed; *rabi* sowing progressing; prices—wheat, red rice, and *bajri* in Karachi 24, 28, and 32, in Dadu 30 and 40. in Sakro 16, 29, and 42, and in Shahbandar 20, 32, and 40 pounds per rupee, respectively.
Hyderabad	. . . . .	Small-pox in 7 and cattle-disease in 5 talukas; prices of grain steady.
Ahmedabad	. . . . .	Young crops healthy; fever in Sanand; *bajri* 30 and wheat 26 pounds per rupee.
Baroda	. . . . .	Fever continues in some parts of Naosari division; cotton and *rabi* crops in good condition; pressing of sugarcane going on in Naosari division; prices—*bajri* 31 to 31½ and rice 24½ to 25½ pounds per rupee.
Surat	. . . . .	*Rabi* crops healthy; fever in many talukas; cholera in Chikli, 14 cases, 12 deaths; *juari* 38 and *nagli* 48 pounds per rupee.
Nasik	. . . . .	*Kharif* crops mostly harvested; *rabi* crops in good condition; public health good, except in 3 villages in which small-pox and fever exist; wheat 31, *bajri* 28, and rice 24 pounds per rupee.
Colaba (Bombay)	. . . . .	Abnormal temperature 2° to 6° cool; vapour in air defective; wind normal.
Poona	. . . . .	*Rabi* crops thriving; prices—*bajri* 40 and *juari* 50; in Poona *bajri* 35 and *juari* 48 pounds per rupee.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*contd.*		
Ahmednagar	. . . . .	*Bajri* threshing commenced; *rabi* sowing finished in parts; locusts in Shrigonda, *bajri* maximum 54 pounds in Jamkhed, minimum 39 in Sangamner, *juari* maximum 72 in Jamkhed, minimum 48 in Kopargaon.
Sholapore	. . . . .	Cholera disappeared from Malsiras Taluk; *juari* 56 and *bajri* 54 pounds per rupee.
Dharwar	. . . . .	Slight rain in 6 talukas; rice being harvested; reaping of other early crops nearly completed; cotton suffering from blight in Karajgi and Ron; other late crops good cholera disappeared; disease in one taluka; rice 25 to 41 and *juari* 52 to 88 pounds per rupee.
Kanara	. . . . .	Fever continues in Hallyal and Mandgod, small-pox in Kumpta and Hanawar; cattle-disease in Karwar and Hanawar; rice common Karwar 12, in district average 15½ seers per rupee.
Rajkot	. . . . .	General health good; weather cold; *bajri* 31 and *juari* 36 pounds per rupee.
		General Remarks.—River still low in Sind; slight rain in parts of Dharwar and Belgaon; *rabi* prospects generally favourable; cotton suffering from blight in parts of Dharwar and Kaladgi; fever in most districts; slight cholera in four, and cattle-disease and small-pox in eight districts.
Bengal—(Dec. 19th)		
Chittagong	*Nil*	Weather seasonable; *amun* is being harvested, outturn indifferent; prices stationary; general health good.
Dacca	*Nil*	Paddy being cut; prospects of winter crops good; safflower being sown.
24-Pergunnahs	*Nil*	Paddy is being harvested; the late rain has done some injury to the crop lying cut, but not stored; yield of paddy estimated at from 8 to 10 annas; prospects of *rabi* crops fair; price of common rice from 14 to 17½ seers per rupee; public health generally good, though cases of cholera and fever continue to be reported from some parts of the district.
Moorshedabad	*Nil*	Weather warmer than last week; harvesting of *amun* proceeding; outturn will be rather more than half an average crop; *rabi* looking well; the rainfall of last week has allowed of large additional areas being sown; indigo very fine indeed; prices easier; public health good.
Rajshahye	*Nil*	Weather cold; reaping of *amun* still going on; prospects of winter crops improving; public health fair.
Burdwan	*Nil*	Weather fine and cool; harvesting of *amun* continues, outturn expected to be bad; *rabi* crops slightly improved; public health fair.
Rungpore	*Nil*	Weather seasonable; harvesting of *amun* in progress, outturn short; prospects of cold-weather crops fair; sugarcane promises well; prices stationary; fever prevalent.
Bhagulpore	*Nil*	Rice crop is being harvested, outturn poor; rain much wanted for *rabi*; prospects not good; new rice selling at 15 seers per rupee; public health good.
Purneah	*Nil*	Paddy is being cut, outturn expected to be about 6 annas; *rabi* crops growing only on low-lying lands; price of coarse rice from 14 to 18 seers per rupee; public health improving.
Patna	*Nil*	Harvesting of paddy continues; rain much wanted for *rabi* crops; poppy growing splendidly; public health good.
Durbhanga	*Nil*	Harvesting of paddy proceeding, outturn poor; rain much wanted for *rabi*; prices rising slightly; fever decreasing.
Hazareebagh	*Nil*	Weather very cold; rice harvest nearly over; *rabi* crops not promising owing to want of rain; small-pox still prevalent in the sudder station; public health generally good.
Cuttack	*Nil*	Weather cold; cutting of rice on high lands continues; on low lands it has commenced; lands being prepared for *dalua* rice; winter crops doing well; coarse rice selling at from 18 to 24 seers per rupee; public health good.
		General Remarks.—No rain fell in any part of the province during the week; the rain of the previous week was very beneficial to the *rabi* crops, but was somewhat injurious to the rice in places in Eastern Bengal; in Behar the *rabi* crops are suffering much from want of rain; rain is also still required for these crops in a few other parts of the province; the harvesting of rice is in full progress, and the crop is generally expected to yield from four to eight annas, and in certain localities even less than four annas; in Orissa and Eastern Bengal alone the outturn, as was previously reported, will be a fair one; high prices continue to prevail throughout the province in spite of the new rice coming into the market; fever is still prevalent in several districts, but in some it is said to be decreasing.
N.-W. Provinces and Oudh—		
Benares (Dec. 18th)	No rain	Weather cold and seasonable; peas, mustard, and gram have flowered, and general prospects of the *rabi* crops are favourable; rain required somewhat in places where irrigation is impracticable; no sickness; bazars well supplied; prices fluctuating slightly.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
N.-W. P. & Oudh—*contd.*		
Allahabad .(Dec. 19th)	. . . .	Crops doing well on the whole, though rain much needed in unirrigated tracts; health generally good; prices stationary.
Gorakhpur .(„ 18th)	No rain	Irrigation actively carried on; a good deal of fever in the north, also small-pox; prices slightly rising.
Jhansi .(„ 17th)	No rain	Harvesting of *kharif* continues; *rabi* crops prospering, but rain is much wanted; prices of food grains almost stationary; health of people and cattle good.
Agra .(„ 18th)	No rain	Irrigation going on; health good; prices steady.
Bareilly .(„ „)	No rain	Irrigated crops doing well; prices steady; slight fever reported from 4 tahsils.
Meerut .(„ „)	. . . .	Rain much needed; health good; supplies sufficient; prices slightly fallen.
Kumaun .(„ „)	No rain	Sky cloudy on Sunday, and snow fell on some high hill ranges; general health good; cattle-disease continues; prices unchanged.
Lucknow .(„ „)	No rain	Weather clear; prospects good; rain very much wanted for the high land *rabi* crops; condition of people and cattle good; markets well supplied; prices steady.
Partabgarh .(„ „)	No rain	Irrigation of *rabi* crops going on; small-pox and fever in Kunda tahsil, otherwise public health good; prices almost unchanged.
Sitapur .(„ „)	No rain	Weather cloudy; wind variable; prospects fair; markets well supplied;
Fyzabad .(„ „)	No rain	*Rabi* and poppy crops are being watered; peas and mustard have flowered; prospects fair; general health good; condition of cattle fair.
Farukabad .(„ „)	. . . .	Weather seasonable, clouds now and again; cattle-disease in one pargana which has produced some mortality.
Rae Bareilly („ 17th)	No rain	Weather seasonable; *rabi* crops doing well on irrigated lands; rain much wanted; general health good; supplies abundant; prices almost steady.
Cawnpore .(„ 18th)	. . . .	Weather cold and occasionally cloudy; irrigation going on, and the *rabi* crops on irrigated land promising; general health of people good; small-pox decreasing; markets steady.
		General Remarks.—No rain has fallen; the *rabi* prospects are fair, but rain is generally required where irrigation is impracticable; small-pox and fever continue in a few districts, otherwise the public health is good; there is some cattle-disease in Farukabad and Kumaon; the markets are well supplied, and prices on the whole steady.
Punjab—(Dec. 19th)—		
Delhi	. . . .	Health good; prices fluctuating.
Hissar	. . . .	Health good; prices steady.
Umballa	. . . .	Health and *rabi* prospects good; prices stationary.
Jullundur	. . . .	Health good; sugarcane being pressed; prices falling.
Lahore	. . . .	Health and harvest prospects good; prices steady.
Ferozepur	. . . .	Health good; prices almost stationary.
Sialkot	. . . .	Health and harvest prospects good; prices stationary.
Rawalpindi	. . . .	Health good; *rabi* prospects good in four, and average in three tahsils; prices fluctuating.
Peshawar	. . . .	Small-pox prevalent; prices falling.
Mooltan	. . . .	Health good; prices stationary.
Dera Ismail Khan .	. . . .	Health and crop prospects good; prices falling.
Amritsar	. . . .	Health good; prices steady.
		General Remarks.—No rain during the week, but it is wanted; health good, except in the Peshawar district; *rabi* sowings completed.
Central Provinces (Dec. 19th)—		
Nagpur	. . . .	Weather clear and cold; prospects favourable; *kharif* crops being gathered; public health good; prices of wheat falling.
Jubbulpore	. . . .	Weather clear and cold; reaping of *kharif* crops approaching completion; cotton gathering continues; *rabi* sowings completed; prices stationary; health good.
Saugor . (Dec. 18th)	. . . .	Weather very cold; *kharif* harvesting continues; *rabi* prospects favourable; health good; prices stationary.
Seoni	. . . .	Weather very cold and frosty; threshing in progress; fever very prevalent; prices stationary.
Hoshangabad . . .	. . . .	Weather very cold; prospects fair; cotton picking in progress; fever prevalent; wheat 18, *juari* 24, and rice 11 seers per rupee.
Khandwa	. . . .	Weather clear and cold; prospects good; fever prevalent; prices steady; *juari* 18¾ seers per rupee.
Raipur	. . . .	Weather cold and pleasant; threshing of rice commenced; *rabi* prospects favourable; public health good; prices rising; common rice 25 seers, and wheat 25¼ seers per rupee.
Sambalpur . (Dec. 18th)	. . . .	Weather very cold and clear; rice threshing continues; prospects good; fever prevalent; common rice 31½ seers per rupee.
		General Remarks.—Weather clear and cold, and favourable to *rabi* crops; threshing continues; fever in some districts.
British Burma—(Dec. 15th)		
Akyab . . .	. . . .	Report not received.
Rangoon . . .	*Nil*	Total rainfall 84·23; four deaths from small-pox, otherwise public health good; paddy no supplies; prices nominal.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
British Burmah—*contd.*		
Bassein	*Nil*	Total rainfall 106·32; public health good; 44 deaths of cattle; reaping progressing; price of paddy Rs. 85 to 110 per 100 baskets.
Prome	*Nil*	Total rainfall 53·48; public health good; cattle healthy; crops reported in good condition everywhere except in Padoung township where 250 acres have been destroyed by floods, and in Mahathaman where 251 acres have been destroyed by drought; harvest going on well and most satisfactorily on the whole; price of paddy Rs. 85 per 100 baskets.
Thayetmyo	*Nil*	Total rainfall 48·65; public health good; great scarcity prevails in some places; reaping progressing; price of paddy Rs. 110 per 100 baskets.
Shweygyin	*Nil*	Total rainfall 139·68; public health and health of cattle good; harvesting progressing; price of paddy Rs. 100 per 100 baskets.
Kyoukphyu (Dec. 8th)	2·97	Total rainfall 163·82; public health and health of cattle good; reaping already commenced; paddy has suffered considerably from cyclone and heavy rain; price of paddy Rs. 25 per 100 baskets.
„ („ 15th)	*Nil*	Total rainfall 163·82; public health good; 74 deaths of cattle.
Sandoway	*Nil*	Total rainfall 222·86; public health good; agricultural prospects favourable; reaping later sowings continuing; no transactions in paddy at present.
Hanthawaddy	. . . .	Public health and health of cattle good; some of the crop in the Sumanaing township destroyed by inundation of salt water; price of paddy Rs. 75 to 100 per 100 baskets.
Pegu	. . . .	Report not received.
Tharrawaddy	*Nil*	Total rainfall 100·27; public health good; cattle healthy; about 180 acres in Gyobingouk township reported destroyed by drought and flood; main portion of crop unripe yet; condition of reaping crop good; about 15,844 acres reaped; reaping wages 8 annas per man daily.
Thonegwa	*Nil*	Total rainfall 94·64; public health good; slight cattle-disease in Pyapon and Thonegwa townships; considerable damage to crops in Pyapon by recent rain; price of paddy Rs. 85 to 100 per 100 baskets.
Henzada	*Nil*	Total rainfall 86·83; public health and health of cattle good; crops promise well where not destroyed by floods; reaping progressing.
Amherst (Moulmein)	*Nil*	Total rainfall 166·28; public health and health of cattle good; reaping about half finished; quality of grain good; prices nominal; in Moulmein public health and health of cattle good; about 400 acres reaped; price of paddy Rs. 90 per 100 baskets.
Toungoo	*Nil*	Total rainfall 79·88; public health and health of cattle good; prospect of crops good.
Tavoy	*Nil*	Total rainfall 195·44; public health and health of cattle good; reaping progressing
Mergui . (Dec. 1st)	0·10	Total rainfall 175·94; public health good; cattle healthy; one-third of crop reaped; price of paddy Rs. 80 per 100 baskets.
Do . („ 8th)	*Nil*	Total rainfall 175·94. *General Remarks.*—Public health good; health of cattle good, except in Kyoukphyu, Bassein and Thonegwa; harvest well advanced and prospect generally favorable, but crops damaged by rain and floods in Kyoukphyu, Hanthawaddy, Tharrawaddy, Prome, Thonegwa, and Henzada.
Assam—**(Dec. 19th)**		
Gauhati	0·75	Weather cloudy; mornings and nights foggy; reaping of *sali* crop in progress; public health fair.
Sylhet	*Nil*	Prospects of crops much injured by the late rains; small-pox reported from Karimganj and Sunamganj, and cattle-disease from South Sylhet.
Cachar	*Nil*	Weather cold; reaping of *sali* crops continues; common rice 13 3/16 seers per rupee; general health good.
Dibrugarh	0·32	Prospects of all crops good; public health fair.
Mysore and Coorg—		
Bangalore . (Dec. 19th)	2·0	Standing crops in good condition; prospects of season favourable and public health generally good; prices—rice from 14 to 20, *ragi* 37 to 60, horse gram 33 to 50 seers per rupee.
Mysore	2·96 Kolar 4·79 and general all over the Province.	(as above)
Mercara . (Dec. 19th)	2·80	Rain most unusual at this season of the year, has brought on backward rice crops, but has proved slightly injurious to paddy ripe for the sickle, and to the drying of coffee; it has caused also ripe berries to drop; paddy harvest has commenced in the Yelsavershime Taluk.
Berar & Hyderabad—		
Amraoti . (Dec. 19th)	. . . .	Weather clear and cold; cotton picking and *kharif* harvesting in progress; *rabi* prospects generally good; wheat 16 and *jowari* 26 seers per rupee.
Akola	. . . .	*Kharif* crops being harvested; *rabi* crops in excellent condition.
Hyderabad . (Dec. 19th)	*Nil*	Sowing of *rabi* and reaping of *abi* crops continue; public health generally good, but cholera prevails in one taluka; prices—wheat 15¼, coarse rice 9¾, pure wheat 22, yellow *juar* 27¼, and *tur* 33 seers per current sicca rupee.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Central India States—		
Indore . (Dec. 19th)	*Nil*	Health good; report same as last week.
Morar (Gwalior) . .	*Nil*	Health good; weather seasonable.
Neemuch . . .	. . . . .	Public health good; agricultural prospects fair; weather cold.
Goona . . .	. . . . .	Health and prospects good.
Sehore . . .	*Nil* .	Weather clear; crops and health good.
Agar	*Nil*	Agricultural prospects satisfactory; health good; 7 fatal cases of cholera occurred in Sailana district on 9th instant.
Nowgong . . .	*Nil*	*Kharif* prospects fair; health good; weather seasonable; prices steady.
Rajputana—		
Abu . (Dec. 19th)	. . . . .	Weather seasonable.
Sirohee . („ 16th)	. . . . .	Tanks and wells fair; health and crop prospects good; weather seasonable; mornings and nights cold.
Marwar . („ 14th)	. . . . .	Only two months' water in Jodhpur city; tanks and wells almost full; health good; crops good; cold sometimes intense and sometimes mild; prices stationary.
Meywar . („ 9th)	. . . . .	Tanks, wells, health, and crop prospects good; weather seasonable; slight clouds.
Harowtee . („ 15th)	. . . . .	Crops fair; weather colder; health good, some small-pox.
Jhallawar („ 14th)	. . . . .	Weather seasonable; health and prospects good.
Ajmere . („ 18th)	*Nil*	Health good; no increase of cattle-disease in Marwar.
Jeypore . („ „)	*Nil*	Prospects fair, but rain wanted; prices stationary; health good.
Ulwur . („ „)	. . . . .	*Rabi* sowing continues; rain wanted; health good.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House on Friday, the 14th December, 1883.

PRESENT:

His Excellency the Viceroy and Governor General of India, K.G., G.M.S.I., G.M.I.E., *presiding*.
His Excellency the Commander-in-Chief, G.C.B., C.I.E.
The Hon'ble J. Gibbs, C.S.I., C.I.E.
Lieutenant-General the Hon'ble T. F. Wilson, C.B., C.I.E.
The Hon'ble C. P. Ilbert, C.I.E.
The Hon'ble Sir S. C. Bayley, K.C.S.I., C.I.E.
The Hon'ble T. C. Hope, C.S.I., C.I.E.
The Hon'ble Sir A. Colvin, K.C.M.G.
The Hon'ble W. W. Hunter, LL.D., C.I.E.
The Hon'ble Durgá Charan Láhá.
The Hon'ble H. J. Reynolds.
The Hon'ble H. S. Thomas.
The Hon'ble Kristodás Pál, Raí Bahádur, C.I.E.
The Hon'ble Mahárájá Luchmessur Singh, Bahádur, of Darbhangá.
The Hon'ble J. W. Quinton.
The Hon'ble T. M. Gibbon, C.I.E.
The Hon'ble R. Miller.
The Hon'ble Amír Alí.

BENGAL REGULATION XIX OF 1810 REPEAL BILL.

The Hon'ble MR. ILBERT introduced the Bill to repeal Bengal Regulation XIX of 1810 within the territories administered by the Lieutenant-Governor of the North-Western Provinces, and moved that it be circulated for the purpose of eliciting opinion thereon.

The Motion was put and agreed to.

The Hon'ble MR. ILBERT also moved that the Bill and Statement of Objects and Reasons be published in the *North-Western Provinces and Oudh Government Gazette* in English and in such other languages as the Local Government might think fit.

The Motion was put and agreed to.

BURMA COURTS BILL.

The Hon'ble MR. ILBERT also introduced the Bill to amend the Burma Courts Act, 1875, and moved that it be referred to a Select Committee consisting of the Hon'ble Messrs. Gibbs and Quinton and the Mover.

The Motion was put and agreed to.

The Hon'ble MR. ILBERT also moved that the Bill and Statement of Objects and Reasons be published in the *British Burma Gazette* in English and in such other languages as the Local Government might think fit.

The Motion was put and agreed to.

INDIAN EMIGRATION BILL.

The Hon'ble MR. ILBERT also moved that the Report of the Select Committee on the Bill to amend the law relating to the Emigration of Natives of India be taken into consideration. He said:—

"This Bill proposes to re-enact, with numerous amendments, the existing Foreign Emigration Act (VII of 1871). It does not apply to the emigration which takes place from one part of British India to another, whether by sea, as from Madras to British Burma, or by land, as from Bengal and the North-Western Provinces to Assam. Emigration by sea to British Burma was until recently governed by a special Act, but that Act has been repealed by an Act of the present year, and that form of emigration is now entirely free. Emigration to Assam and the adjoining districts is, as the Council are aware, governed by Act I of 1882. With this form of emigration we are not concerned at all to-day. Accordingly, we are not called upon to consider the difficult, interesting and important questions which arise in connection with inland emigration, such as the conditions and restrictions which it may be necessary to impose on the emigration of labourers to, or on their employment in, such regions as Assam, or the mode and extent to which it may be practicable or desirable to regulate, to facilitate or promote that great movement of population from one part of the Empire to another which has, for centuries, been operating, and still operates, to fill up and bring under cultivation the waste places of India. The present measure deals only with emigration to places outside the limits of British India, and the term 'emigration' is defined by the Bill as meaning, for the purposes of the Act, the departure by sea out of British India of a Native of India under an agreement to labour for hire in some country beyond the limits of India other than the Island of Ceylon or the Straits Settlements. It will be observed that the measure does not affect emigration to Ceylon or to the Straits Settlements. Ceylon may, for emigration purposes, be dealt with as if it were part of British India, and it is not necessary to place any special restrictions on emigration to that island. The Straits Settlements are in a very similar position. The Indian emigration to that colony takes place, I believe, exclusively from the Madras Presidency, and is at present regulated by a special Act (V of 1877) which applies only to that Presidency. We are now engaged in negotiations with the Government of the Straits Settlements, which will, I hope, before long enable us to repeal this Act, and to make emigration to that colony entirely free. But in the meantime, and as a temporary measure, we have thought it expedient to take power to extend the Act to other parts of British India in case it should be found necessary to regulate emigration from Calcutta to the Straits. I do not in the least anticipate that the Act will be found necessary, because I believe that no such emigration takes place, or is likely to take place.

"What we are concerned with, then, to-day, is the emigration which goes on from India to certain British and Foreign colonies in the West Indies and elsewhere, and which is, as I have said, at present regulated by an Act of 1871. Proposals for amending this Act have for many years been before the Government of India, and at last resulted in the preparation of the present Bill, which was introduced into this Council in the year 1881, was circulated for opinion in the ordinary way, and was sent to England for consideration both by the India Office and by the Colonial Office. A number of objections were raised by the Agents and other representatives of the colonies to various provisions of the Bill; and the Government of India was asked by Her Majesty's Government to suspend legislation until the opinions of the Colonial Governments, to whom the Bill had been sent, should be received. I mention this circumstance in order to explain the delay which has taken place between the introduction of the Bill and the presentation of the Committee's report. The delay has not been unfruitful of good results. The Government of India thought that it afforded an excellent opportunity for ascertaining by local inquiry the way in which the system of recruiting emigrants is actually carried on in India, the respects in which the present system is capable of improvement, the attitude of the people towards emigration, and

the possibility of making it more popular. Accordingly, with the consent of the Government of the North-Western Provinces, Major Pitcher was directed to make an inquiry in those Provinces into the points to which I have referred; and a similar inquiry was subsequently made by Mr. Grierson in Bihár, at the wish of His Honour the Lieutenant-Governor of Bengal. To both those gentlemen—Major Pitcher and Mr. Grierson—we are deeply indebted for the admirable reports which they have sent in. Nothing is easier in this country than to collect opinions; nothing is more difficult than to get at facts; and it is as pictures of actual facts that these reports are so valuable. To quote the language of a Resolution which has been issued on the subject in the Revenue and Agricultural Department—

'They show in the clearest light the obstacles in the way of emigration, the difficulties with which even the most honest recruiter has to contend, and the extent to which popular prejudice can be allayed, or is unconsciously fostered by District-officers. Of such information there was much need. On the one hand, the Magistracy has been repeatedly charged with being hostile to emigration; on the other, grave accusations have been often brought against recruiters. Proposals, on the one hand, have been made to surround emigration with additional precautions, and have been objected to on the other as unnecessary and ruinously expensive. To arrive at the real condition of things was extremely difficult. Major Pitcher's and Mr. Grierson's reports have at least facilitated a decision. They show that the recruiter, though occasionally guilty of malpractices in the exercise of what is looked upon by a large number of people as a not very reputable calling, has to contend with many unnecessary difficulties; that he is frequently impeded in most objectionable ways by the police and the underlings of the Courts; that the registration of recruits is not unseldom perfunctorily performed; that unnecessary restrictions are sometimes imposed; and that generally a more friendly attitude on the part of the Government as represented by its local officers would lead to better results.'

"In addition to the inquiries made by these two officers, meetings were held in Calcutta in February, 1882, and in March last to consider the various suggestions which had been made for amending the emigration law. Mr. Buck, the Secretary of the Revenue and Agricultural Department, presided at these meetings, and they were attended by the local Agents for the different colonies. I believe I am right in saying that the proposals which we are now laying before the Council have, after careful examination, obtained the full approval of these gentlemen, as well as of the officers of the Indian Government who are charged with the care of emigrants. In fact, I may fairly say that few measures which have been laid before this Council have been made the subject of more minute and careful enquiries than the present Bill It is essentially a measure of details, and we have every reason for hoping that the machinery will work smoothly and well.

"I have said that this is essentially a measure of details. There is, however, one important question of principle, which is discussed in the two reports to which I have referred, and about which, although it is not necessarily raised by the Bill, it may be as well to say a few words. It is this. What should be the attitude of the Government of India towards emigration to foreign countries? Should they encourage it, discourage it, or remain neutral? Both Mr. Grierson and Major Pitcher urge in forcible language the expediency of the State taking a more active part than it has hitherto taken in the promotion of emigration. They consider that the people in the more closely populated districts should be encouraged to emigrate; that information about the colonies should be disseminated by Government officers; and that the advantages of emigration should be taught in village-schools. But Sir A. Lyall, the Lieutenant-Governor of the North-Western Provinces, whose opinion is entitled to the greatest weight, not only on personal grounds but because he is responsible for the government of the provinces from which the greatest flow of emigration takes place, is not prepared to go as far as this. He considers that measures such as have been suggested by Major Pitcher and Mr. Grierson might be misinterpreted, and he is doubtful whether emigration would benefit India as largely as is implied by their recommendations. He would, therefore, limit action for the present to removing all obstacles to emigration, to giving the people every facility to emigrate, and to strictly repressing the prejudiced opposition of the police and other Native subordinate officials. The question whether the one policy or the other should be adopted is not

definitely raised by the present Bill, because it depends much less on the way in which the measure is framed than on the way in which it is worked; and this is a matter which the Government of India are disposed to leave very much to the discretion of the Local Government. My own opinion, I must confess, coincides rather with that of Sir A. Lyall than with that of the advocates of a more active policy. I think our attitude towards emigration should be an attitude of benevolent and watchful neutrality, and that our great object should be to secure fair play to both parties,—the employers on the one side, and the emigrants and their friends on the other,—to take care that the former are not hampered by unnecessary and vexatious restrictions, or impeded by unreasonable prejudices, and to protect the latter, so far as we can, against being entrapped or deluded into unfair bargains or carelessly or oppressively dealt with after they have left their homes. This appears, I may add, to have been the view taken by the Famine Commissioners. The present measure has been framed, if not in affirmation of, at least in complete accordance with, this policy; and, whilst carefully providing for the protection of the emigrant, we have been equally careful not to throw any needless obstacles in the way of his employer.

"In order to explain the purpose and object of the several provisions which we have introduced into the Bill with this view, I must say something about the parties to the contract which is entered into by the person who emigrates within the meaning of this Act, that is to say, who departs by sea from British India under an agreement to labour for hire, and about the several stages in his progress from his home to his place of destination. The parties to the agreement are, of course, the employer on the one hand, and the emigrant or intending labourer on the other. But from the nature of the case, these two parties are not brought into immediate contact with each other at the stage with which alone our legislation is capable of dealing. The employer is represented by the Emigration Agent for the colonies and by the recruiters acting under him; the emigrant is assisted, and to some extent represented, by the officers of the Indian Government, who are specially charged with his protection against fraud, negligence or oppression. As to the employer's representative, it must, in the first place, be remembered that it is not every colony or foreign country that is permitted to receive emigrants from this country. Emigration within the meaning of the Bill is only allowed to certain countries, of which a list will be found specified in a schedule to the Bill, and to such other countries as the Government of India may choose to add to the list. The Government may not make any such addition unless it is satisfied that the Government of the country has made such laws and other provisions as the Governor General in Council thinks sufficient for the protection of emigrants to the colony during their residence there. Assuming that a colony is authorised to receive emigrants, it acts in this country through its Emigration Agent, who is appointed by the Government of the colony, but whose appointment is made subject to the approval of the Local Indian Government. Under the Bill as introduced, the Local Government was expressly empowered to revoke the approval; but this provision was strongly objected to by the Colonial Agents as derogatory to their position, and we have accordingly omitted it. Its insertion was perhaps due to excess of caution, for there is no reason to fear that any difficulty will arise from a Colonial Government insisting on the employment of an Agent whom our Government consider manifestly unfit to perform his duties.

"The Emigration Agent, then, is the principal official on the one side. The principal officials on the other are the Protector of Emigrants and the Medical Inspector of Emigrants, who are appointed by the Local Government and are stationed at the principal emigration-ports. The North-Western Provinces Government proposed that, with the view of securing uniformity of procedure in the various registering offices which are to be maintained under the Act, and of exercising a general supervision over recruiters, the Director General of Agriculture and Commerce and his assistants in these provinces should be appointed Sub-Protectors of Emigrants. We entirely concur in these proposals, but at the same time we do not think it is necessary to

make a special provision in the Bill for such appointments. We think that uniformity of procedure in the registering offices can be secured by executive order. We believe that the Director of Agriculture and Commerce and his assistants will be able to exercise the necessary supervision over the conduct of recruiters if they are invested—as a provision of the Bill enables them to be invested—with the powers of a Magistrate under the Act.

"Returning to the Emigration Agent. He conducts his local operations by means of persons called recruiters, who must on his application be licensed by the Protector of Emigrants. The license is good for a year, and, under the Bill as introduced, it restricted the operations of the recruiter to a particular specified area. This restriction has, however, been objected to by the Emigration Agents (whose objections are supported by the Secretary of State for the Colonies) as unnecessary, and as tending to increase seriously the cost of emigration. We admit the force of these objections, and, accordingly, under the Bill as it now stands, the recruiter's license extends to the whole area over which the Protector of Emigrants has authority, but it is not valid for any particular district until it has been countersigned by the Magistrate of the district. The Magistrate is empowered to refuse his countersignature if he has reason for believing that the recruiter is an unfit person, or that he has failed to perform any of the duties imposed on him under the Act. At the time when the Bill was prepared great complaints had been made of the malpractices of a class of persons who were described as sub-agents. We were informed that between the Emigration Agent and the recruiter there is almost always a third party, the sub-agent, who supervises the recruiter's operations, keeps his license, supplies him with funds, and generally keeps the depôt in the recruiting centre where the emigrants are collected together before being sent down to Calcutta. This person, we were told, was unknown to and unregulated by the law, and was sometimes of very doubtful character. Accordingly, in the first draft of the Bill, clauses were introduced specially providing for the appointment and remuneration of this sub-agent. However, when we went more closely into the matter, it appeared that these provisions were not really applicable to the facts as explained by Major Pitcher and Mr. Grierson. It turns out that the so-called sub-agent is not a recruiter of any distinct class at all, but is merely a head recruiter who sometimes recruits himself, and sometimes acts as an intermediate contractor between the Emigration Agent and the ordinary recruiters, and whose remuneration naturally takes the form of a commission. And the conclusion to which we came was that it would be impracticable to draw a legal distinction between these sub-agents and other recruiters, and that it would be preferable to continue treating them as recruiters, and to make them take out a recruiter's license. But we have added to the Bill a definition of 'recruiter' which makes it clear that the term includes head recruiters and others who collect emigrants, as well as those who personally engage in recruiting.

"Such being the recruiter, we have to take great care that he does not enlist his emigrants on false pretences. Accordingly, we provide that he must get from the Emigration Agent on whose application he is licensed a written or printed statement, signed by the Agent and countersigned by the Protector of Emigrants, and stating the terms of agreement which the recruiter is authorized to offer on behalf of the Agent to intending emigrants. This statement must be both in English and in the Vernacular, and the recruiter is bound to show it to any person whom he invites to emigrate, and also to a Magistrate or officer in charge of a police-station, if called upon to do so.

"Having provisionally enlisted his recruits, the first thing that the recruiter does with them is to house them temporarily in a place which I referred to just now as a depôt, but which does not go by that name in the Bill. The fact is that the term 'depôt' is confined by the existing law to the depôts which are established at the port of departure; and, as we considered it inadvisable to disturb the existing nomenclature, we thought it better not to give any specific name to these up-country depôts, if I may so call them. You will find them referred to in section 27 of the Bill as places for the accommodation of emigrants pending their registration or removal to the port of embarkation. Many complaints had been made about the way in which some of these places are kept and managed; and accordingly we have armed District Magis-

trates and other officers with extensive powers for their supervision and inspection.

"The mention of registration brings me to the next stage in the emigrant's career. Up to this point he is not under any contract binding him to emigrate. In order to become so bound, he must appear before a registering officer, have his name and certain particulars about him entered in a register, and then, and not till then, is he allowed to execute an agreement to emigrate. Until these formalities have been complied with, the recruiter is not allowed to carry him off to the port from which he is to emigrate. In the provisions relating to this branch of the subject, we have departed both from the existing law and from the proposals of the original Bill. Under the Bill as introduced, the work of registering had to be done by a Magistrate of a district or sub-division. The evidence collected by Major Pitcher and Mr. Grierson tends to show that these officers have not time to do the work thoroughly, and Major Pitcher has proposed Civil Surgeons, and Mr. Grierson the officers of the Registration Department, as appropriate registering officers. The Government of Bengal have accepted Mr. Grierson's proposals, and the Government of the North-Western Provinces is willing to give Major Pitcher's suggestion a trial whenever the Civil Surgeon is competent to do the work. The Bill does not decide the question either way, but merely gives the Local Government a general power to appoint persons to be registering officers, and places them under the control of the District Magistrate, or of such other officer as the Local Government may appoint on their behalf. I may explain that the reference to this 'other officer' is intended to cover the officials whom the North-West Government wished to appoint Sub-Protectors of Emigrants. I understand that there will be no difficulty in adjusting, by means of executive arrangements, their relation to the District Magistrate.

"So much as to the officers who are to do the work. Next, as to the way in which the work is to be done. Mr. Grierson has told us in his report a great deal about the way in which the present system of registering emigrants works, or rather fails to work, and he has drawn up a statement showing, in two parallel columns, the difference between what may be called the theory and the practice of registration. This statement is so instructive and so illustrative of the kind of way in which administrative provisions are apt to break down, that I will take the liberty of reading it to the Council. The present system of registration, and the practice, are here given in parallel columns:—

The system as ordained by law and by the Bengal Rules.	*The practice.*
1. The intending emigrant shall appear before a Magistrate, as defined in sections 3 and 85 of the Act.	The registering officer is rarely empowered under section 85.
2. The Magistrate shall examine the emigrant, and satisfy himself on three points, and on no more— (1) that he is of age; (2) that he understands the nature of his contract; (3) that he is willing to fulfil it.	The registering officer frequently rejects recruits for other reasons, such as, for instance, that he has not been medically examined, or that he is telling lies about his address.
3. The Magistrate shall enter certain particulars in a *book* kept for the purpose.	The Magistrate rarely, if ever, does so. The recruiter brings him an illegible, misspelt form, continually full of mistakes, which is kept in a bundle in the office. When, in rare instances, a book is kept, it is not kept "for that purpose," but inland and colonial registrations are kept mixed up together.
4. A copy of every registration, written on substantial paper, shall be furnished by the Magistrate to the emigrant registered.	A copy(?) is furnished, but it is not certified or compared. It is brought ready written by the recruiter, being frequently illegible, misspelt and full of mistakes. It is almost invariably on paper of the flimsiest description—the kind of paper used for cheap overland letters. In some cases the copy is not given to the coolie, but to the recruiter!!

5. *Authentic* copies of every such registration shall be *forthwith* forwarded by the Magistrate to the Emigration Agent.	This is hardly ever done. The recruiter brings another copy (?) similar to the above, which is signed by the Magistrate, but never compared. It is then usually returned to the recruiter.
6. And to the Protector of Emigrants.	Often not done. When it is, the copy (?) is another incorrect form filed by the recruiter.
7. A certain form of register is prescribed by the rules.	This form is sometimes not followed, and important columns, such as that for next-of-kin, are omitted.
8. Under the rules, monthly returns of emigration should be sent to the Protector.	In some cases these are not sent.
9. These returns should be correctly and intelligently filled up, as from them the figures for the Protector's annual report are drawn.	They are never correct. People are counted as emigrants who should not be counted, and *vice versâ*: hence the Protector's and the district figures never agree, *e.g.*, in Alipore, the district figures, quoted (I believe) in the Annual Administration Report, gave in one case 1,500 when the Protector's were only 700. The Protector's figures were correct.

"Now, I do not mean to say that our proposed system is certain to work quite smoothly and perfectly, nor can I feel sure that these, or indeed any other, legislative provisions will work precisely in the way in which we intend them to work. But at least we have done our best to take warning by what has been told us, and to devise a remedy for some of the most obvious defects in the existing system. In the first place, we propose to reverse the existing order of proceedings, and to make the registration come first and the execution of the emigrant's agreement afterwards We think that there is a better chance of the agreement being accurate and satisfactory in form and substance if it is drawn out in the office of the Magistrate or other registering officer after the intending emigrant has been passed and registered, than if it is drawn up, as it is under the present practice, by some illiterate person beforehand. The course of proceeding will be this. The recruiter will take his recruits before the registering officer, who in the Mufassal may or may not be the Magistrate of the district, and in the emigration-ports will be the Protector of Emigrants himself. The registering officer is to examine the recruit, apart from the recruiter, with reference to the agreement into which he proposes to enter, and is to satisfy himself that the recruit is competent and willing to enter into the agreement, that he understands its nature, that he has not been induced to enter by any coercion, undue influence, fraud, misrepresentation or mistake, that its terms are in conformity with law, that is to say, contain all the particulars which, as I shall presently explain, it is required by the Act or rules to embrace, and that it is in conformity with the statement which, as I have already explained, the recruiter is required to show the recruit. If he is satisfied on these points, he is to enter in a register-book the name of the recruit, and various particulars concerning him, including the name, sex, name of father, caste, occupation and age of the intending emigrant, and the name of the village or place of which he is a resident. It may be asked, what is the use of entering all these minute details? I will let Mr. Grierson answer.

'The objects,' he says, 'of a system of registration, I take it, are two-fold. One is to keep a record of the transaction, just as the record of any other contract is kept. This is a minor consideration. The other and more important object is to afford a connecting link between the coolie in the colony and his relations at home. A coolie communicates with his relations at home by means of letters and by means of remittances. His relations communicate with him by letter. Under a perfect system of registration a coolie ought to be able to send a remittance home to his friends, through the Emigration Agent and the Magistrate of his district, with the certainty of its reaching its destination; and a relation should be able to go to the Magistrate of a district and say, "My son emigrated in such-and-such a year; how can I send a letter to him?"'

"That is what we are anxious to do, to devise some means by which a coolie may be enabled to emigrate without being cut off completely from his relations and his home. And to this end we are endeavouring to supplement the improved system of registration, by giving effect to various suggestions which have been made for promoting a greater interchange of letters between the emigrants in the colonies and their friends at home, suggestions to which, I

need hardly say, full effect cannot be given without the co-operation of the Colonial Governments.

"When the intending emigrant has been duly registered, the next step is to execute the agreement, which is prepared in the office and executed both by the emigrant and the recruiter in the presence of the registering officer. It must contain on one side all necessary particulars as to the nature, duration and term of the emigrant's service, and, on the other, the particulars which have been already entered in the register. These will enable him to prove his identity if necessary. Three copies of the agreement are to be taken: one goes to the emigrant himself, the other to the recruiter, and the third is kept by the Protector of Emigrants. I need not follow in minute detail the subsequent movements of the emigrant. Suffice it to say that he is conducted to the emigration-depôt at the port of departure, which is supposed to be under the constant supervision and inspection of the Protector of Emigrants and Medical Inspector, and after a short stay there is duly shipped off in an emigrant-vessel. Every emigrant-vessel must be licensed, and the license must not be granted until the vessel has been surveyed and it has been ascertained that she is seaworthy, has proper and sufficient accommodation, is properly ventilated, has all the tackle, apparel and furniture requisite for her intended voyage, is properly manned and officered, and is, in fact, in all respects suitable for the carriage of emigrants. There is ample power to make rules as to the provisions, clothing, fuel and water which are to be supplied for the emigrants' use, and as to the staff of surgeons and attendants who are to be on board the vessel. And the Protector of Emigrants and the Medical Inspector are bound by the Act to see personally that these rules are complied with. The emigrant goes on board under their personal supervision, and the master of the vessel is required to execute a bond for the due performance during the voyage of the duties imposed on him by the Act. Thus every reasonable precaution is taken which our law can enforce that the emigrant shall be properly treated from the time when he leaves the place where he is recruited to the time when he lands in the colony for which he is bound. Further than this our law cannot follow him, and after this point we can only provide indirectly for his welfare by such influence as we can bring to bear on the Government of the country in which he has established himself. That influence is, however, of a very substantial kind, and may be enforced in extreme cases by the prohibition of emigration. There is a provision enabling the Governor General in Council to prohibit emigration to any particular country on certain grounds which are specified in the Bill and which are as follows:—

'(a) that the plague or any other epidemic disease dangerous to human life has broken out in the country;

'(b) that the mortality among emigrants in the country is excessive;

'(c) that proper measures have not been taken for the protection of emigrants immediately on their arrival in the country or during their residence therein;

'(d) that the agreements made with emigrants, as such, before their departure from India are not duly enforced by the Government of the country; and

'(e) that the Governor General in Council, having, either directly or through the Secretary of State for India in Council, addressed the Government of the country with a view to obtain information regarding the condition or treatment of emigrants therein, has not within a reasonable time received the information asked for.'

"Such are the general provisions of this measure. The differences between the first draft of the Bill and that which is now before the Council are very fully and minutely explained in the Report of the Select Committee, and I need not dwell on them further. It will be observed that the original draft of the Bill conferred on the Government extensive powers to make rules, and that we have in the present draft carried this power still further, by eliminating certain matters of detail from the Bill, and leaving them to be provided for by rule. I am sure that a measure of this kind, if it is to work well, must be made elastic, and that any attempt to fix and stereotype minute administrative details will probably produce either inconvenience or absurdities. Let me illustrate this from the English Emigration Law, of the working of which I happen to have some knowledge. The English Emigration Acts, or Passenger Acts as they are called, regulate with minute particularity the diet of the emigrant on board-

ship, even condescending to prescribe the precise amount of pepper which is to be served out to each emigrant every day. They were framed in the days of sailing-ships, when a voyage across the Atlantic was a long business, for which a considerable supply of salt-meat and other like provisions had to be laid in. A few years ago it was accidentally discovered that the steamers of one of the principal Atlantic lines, the *Cunard*, I think, were in the habit of complying with the requirements of the law by taking so many junks of salt-beef on each voyage from Liverpool to New York—and back again. Of course, nobody wanted it, nobody ate it, but there it was to satisfy the law. It is matters of this kind that we wish to leave to be regulated by rules which can be easily changed on being found to be unnecessary or unsuitable. The new Act will not be brought into operation until the rules are ready, but I believe that this will not involve very long delay. I understand that Mr. Grierson, to whom I have so often referred, is now engaged, under the instructions of the Bengal Government, in the preparation of an Emigration Manual, which will contain, not only the revised rules and forms, but also such information as may be requisite for explaining the emigration-system to those who have to work it and those who are to be brought under it."

The Motion was put and agreed to.

The Hon'ble KRISTODÁS PÁL said that the very full report of the Select Committee on this Bill, and the lucid statement made by the hon'ble member in charge of it, showed that it had received a careful revision at the hands of the Select Committee. It also evinced a benevolent solicitude on their part for the protection and welfare of the poor Native emigrant. The question of the policy of emigration was not before the Council, and he would not, therefore, touch upon it. But it might be well asked whether, when large tracts of land lay unreclaimed and uncultivated in many parts of the country, undue encouragement should be given to emigration to foreign countries; but, as far as he understood the Bill, it would not give undue encouragement to such emigration. If he had understood his hon'ble friend correctly, he understood him to say that the Government occupied a position of neutrality, giving fair play to all parties who would come under the operation of the Bill. That, he thought, was a fair position, but all that he, as a Native of the country, wished to see was that the labourer who hired himself to go to foreign parts should on the one hand be treated as a free agent, and on the other should be protected from fraud, misrepresentation and oppression; and, if the Bill should attain that object, he thought the Council would have no reason to complain. Following the principle of the Bill, he ventured to propose, with His Excellency's permission, a few small amendments. Care had been taken in the Bill to provide for the proper explanation to the intending emigrant of the nature of the agreement which he would be called upon to execute. He thought it was highly desirable that, in the initial stage of the engagement, the emigrant should have a clear idea of the nature of the life he was about to enter upon. As far as he could judge from the detailed provisions of the Bill, great precautions had been taken to explain fully to the intending emigrant the nature of the engagement. But at the most important moment, when he had to make up his mind, he was left almost in the dark. Section 26 of the Bill provided—

"The recruiter shall produce the statement for the information of every person whom he invites to emigrate, or when called upon to do so by any Magistrate or officer in charge of a police-station."

Now, it was well known to hon'ble members that the emigrant was often an ignorant, illiterate person, unable to read the statement produced before him, and, if he asked the recruiter to read it, that man, if he was inclined to deceive him, might read a version not contained in the statement itself. So that, at the most important moment, when an illiterate emigrant was called on to make up his mind, he would be almost entirely in the dark as to what the contents of the statement might be, as to the character of the agreement, and as to the nature of the life he would be called upon to lead. He thought that at this stage it was of the utmost importance that every facility should be given to him to understand the nature of his engagement; and in that

view he proposed that the recruiter should be required to furnish the intending emigrant with a copy of the statement, so as to enable the emigrant to take it home to show to his friends and relatives, or the village-headmen, and consult them about it before making up his mind. He would be then in a position to know what he should do, and to understand the nature of the service required of him. He (Raí Kristódás Pál) had heard some objections taken to his proposal. In the first place, it had been said that it would impose extra cost on the Emigration Agent. He believed that the statement would be a printed paper and the additional cost would be a trifle: if a hundred copies of the statement were struck off, it would entail only the cost of the paper and printing. Then he was told that the recruiter would have to carry a heavy bag of paper. Now, he did not know the exact number of emigrants recruited in each district, or in each sub-division, nor had he any idea of the exact number of recruiters employed in each district; but he could not believe that a recruiter on the average engaged more than 100 recruits; and, supposing that he did engage 200, his bag would not be at all heavy if he had to carry some 200 papers of this kind. But, even if the recruiter was put to some slight inconvenience, he thought it a question for grave consideration whether the emigrant should not have a fair opportunity of considering the nature of the connection he was about to form at the very outset of his new career—and surely this was of far more importance than the question of a little heavier bag on the back of a recruiter. Then he was told that this provision was not necessary and would impose an obstacle in the way of emigration. He, for one, did not see how this would prove an obstacle in the way of emigration. The more intelligently and knowingly the emigrant acted, the better would it be for the cause of emigration. He was aware that in section 37 there was a provision that a copy of the agreement when executed should be furnished to the emigrant. Now, this was an after stage. After the agreement had been executed it would be too late for the emigrant to recede, supposing that he wanted to change his mind, and supposing that he came to know what he did not know before. He humbly conceived that the proposal which he had submitted to the Council was calculated to give the intending emigrant an opportunity to understand his real position before he made up his mind, and it was therefore of great practical importance. Upon these grounds, he would move that for sub-section (3) of section 26 the following sub-section be substituted:—

"(3) The recruiter shall give a true copy of the statement to every person whom he invites to emigrate, and shall produce the statement for the information of any Magistrate or officer in charge of a police-station when called upon to do so by the Magistrate or officer."

The Hon'ble Mr. Quinton said: "While altogether sympathising in the anxiety of my hon'ble friend Raí Kristodás Pál Bahádúr that the intending emigrant should have full information as to the offers which the recruiter is authorised to make, and should not be led blindly into binding himself by a contract of such serious importance, I am unable to support the amendment.

"It appears to me that the provisions of the Bill are amply sufficient to secure the object we both have in view, and that the proposals of my hon'ble friend go far beyond what is reasonably required for that purpose.

"My hon'ble and learned friend Mr. Ilbert in his opening speech has pointed out that the recruiter under the Bill must be furnished with a written or printed statement, signed by the Emigration Agent and countersigned by the Protector of Emigrants, in English and in the Vernacular language of the local area to which the recruiter's license extends, of the terms which the recruiter is authorised to offer on behalf of the Agent to intending emigrants, and is also bound to produce the statement for the information of every person whom he invites to emigrate, or when called upon to do so by any Magistrate or officer in charge of a police-station.

"My hon'ble friend Raí Kristodás Pál is not satisfied with the production so enjoined, but would compel the recruiter to give to each person invited to emigrate a copy of the statement. Now, considering that probably not one per cent. of the persons likely to be so invited can read, this seems a very un-

necessary precaution. The intending emigrant can procure full information as to the recruiter's offers, by having the statement read and explained to him when he reaches the depôt; and section 31, as we have heard, strictly enjoins on the Registering Officer the duty of examining the intending emigrant, apart from the recruiter, as to his competence and willingness to make the agreement, as to his comprehension of the nature of such agreement and as to his not having been induced to enter into it by unfair means. The Registering Officer must further draw up the agreement containing the particulars specified in the Bill, and furnish the emigrant with a copy of it. My hon'ble friend says that this will be too late; but, considering that the Registering Officer must ascertain from the emigrant that he understands and consents to the particulars contained in the agreement before it is drawn up, I do not see how this objection applies. He further urges that, if the man invited to emigrate gets a copy of the statement, he can take it home with him and consult the headman of his village; to which I would answer that so long as their present attitude towards emigration is maintained by zamíndárs, they are the last persons whom an intending emigrant would wish to consult.

"The story told by my hon'ble and learned friend of the salt beef carried from Liverpool to New York, and back again from New York to Liverpool, in order to comply with the English Passenger Acts, furnishes a warning against overloading our Bill with minute regulations. In my time I have registered, I suppose, several hundred emigrants, and the cases in which I have had to tell one to stand aside, because he did not know where he was going or what he was to get, were quite exceptional.

"When reading and writing become more widely diffused, and broad sides and hand-bills are likely to prove effective, the agencies will no doubt in their own interests readily adopt the latter; but, as things are at present, it appears to me unfair to impose on Agents and recruiters an obligation attended with considerable trouble and expense and enforceable by legal penalties, which is of no practical use.

"I may add that I have consulted my friend Major Pitcher, whose thorough acquaintance with the working of the recruiting system renders his opinion of great value, and that he fully concurs in the views I have expressed."

The Hon'ble MR. ILBERT said that, when the Hon'ble Raí Kristodás Pál first gave him private notice of this amendment, he expressed his entire sympathy with the object the hon'ble member had in view, namely, to give the fullest possible information to the intending emigrant of the kind of bargain he was about to enter into; and said that he would be willing to accept the amendment, unless it appeared that there was any objection to it on administrative grounds. On a question of this kind the opinions of a gentleman like Mr. Quinton, who had taken a practical part in the work of registering emigrants, and of Major Pitcher, were entitled to considerable weight; and he was bound to say, after having heard what his hon'ble friend Mr. Quinton had said, and after taking into consideration Major Pitcher's opinion, that his own view was that the amendment which had been proposed was on the whole likely to cause greater inconvenience than would be justified by any good which was likely to follow from it, and that the best way of giving an intending emigrant full information of the bargain he was about to make was to be found in that provision of the Bill which imposed on the registering officer the duty of ascertaining whether he really knew where he was going, and what was the kind of undertaking upon which he was about to enter. For these reasons only, MR. ILBERT personally should vote against the amendment.

The Motion being put, the Council divided:—

Ayes.

The Hon'ble Amír Alí.
The Hon'ble Mahárájá Luchmessur Singh, Bahádúr, of Darbhangá.
The Hon'ble Kristodás Pál.
The Hon'ble H. S. Thomas.
The Hon'ble Durgá Charan Láhá.
The Hon'ble W. W. Hunter.
The Hon'ble T. C. Hope.
The Hon'ble Sir S. C. Bayley.
His Excellency the President.

Noes.

The Hon'ble R. Miller.
The Hon'ble T. M. Gibbon.
The Hon'ble J. W. Quinton.
The Hon'ble H J. Reynolds.
The Hon'ble Sir A. Colvin.
The Hon'ble C. P. Ilbert.
Lieutenant-General the Hon'ble T. F. Wilson.
The Hon'ble J. Gibbs.
His Excellency the Commander-in-Chief.

The numbers being equal, the President gave his casting vote with the ayes.

So the Motion was carried.

The Hon'ble Raí Kristodás Pál moved that in section 36, after the words "and term of service" the words "and the remuneration" be inserted. He said that his object in moving the amendment was this. When a man expatriated himself from his country for service in another country, he ought to know what he would earn there. The Bill gave him no information on that subject. It was true that the Bill provided for the passing of rules by Government, which, amongst other particulars, might include information as to the amount of wages; but he thought it was of the utmost importance that the Bill should specifically provide that the emigrant should be informed, even if approximately, of the wages he was to receive before he executed the agreement.

The Hon'ble Mr. Ilbert said he was quite willing to accept this amendment. The Bill as originally drawn provided that the agreement should specify the daily or monthly wages the emigrant was to receive. But when the Select Committee came to consider how the form provided for the purpose should be filled up, they found great difficulty in cases in which the labourer was paid by the piece or the job, and accordingly they omitted the reference to wages, and merely provided that the agreement should provide the nature and terms of the service to be performed, and they intended that the information on this point should include, as far as possible, the remuneration he was to receive.

The Motion was put and agreed to.

The Hon'ble Mr. Ilbert said that, with the permission of the Council, he would ask leave to move a small amendment in section 71 of the Bill. As he had not given notice of the amendment, he was entirely in the hands of the Council as to whether or not he should move it. The amendment was this, that in section 71, for the word "proceeding" the words "embarking at that port" be substituted. The Bill was framed on the assumption that all the emigrants who were to go by a particular emigrant-vessel would be shipped at the same port; but it had been brought to the notice of the Government that it might be convenient in some cases for a vessel proceeding from Calcutta to stop at Madras and ship emigrants there. So far as he could judge, none of the provisions of the Bill would prevent this being done. The only difficulty which he thought might arise was in connection with some of the terms of the certificate to be given under the Act. Section 71 required a certificate from the Protector of Emigrants and the Emigration Agent for the country to which the emigrants were to be conveyed, to the effect that they had, in respect of all the emigrants proceeding in the vessel, done all that was required by the provisions of the Act, or by the rules made under the Act, to be done by the Protector and Agent respectively; and a technical difficulty might arise as to compliance with this requirement of the law. Therefore, he proposed that the certificate should not be in respect of all the emigrants "proceeding in the vessel," but only in respect of the emigrants embarking at the port to which the Protector and Agent belonged.

The Motion was put and agreed to.

The Hon'ble Raí Kristodás Pál moved that for clause (*b*) of section 83 the following clause shall be substituted :—

"(*b*) fails to give a true copy of the statement with which he is provided under section twenty-six to any person whom he invites to emigrate".

He said that, as the first amendment imposed an obligation on the recruiter, it was necessary that there should be a penalty attached if the obligation was not fulfilled.

The Hon'ble Mr. Ilbert observed that he thought this amendment was a necessary consequence of the amendment which had already been carried, and he had, therefore, no objection to offer.

The Motion was put and agreed to.

The Hon'ble MR. ILBERT moved that the Bill as amended be passed.

The Hon'ble MR. AMÍR ALÍ expressed the satisfaction which was felt among all classes of the Indian community with this measure. The hardships to which emigrants were subjected, and the false representations of which they were very frequently victims, made some such measure absolutely necessary; and he had no doubt that, when this measure was passed, it would be regarded as a great boon by the classes which it would affect. There was, however, one point regarding which he entertained considerable doubts, and these doubts, he should also add, were to some extent shared by some of the leading members of the Native community. The point to which he referred was as to the limit of age contained in section 39 of the Bill. He mentioned his views to the hon'ble and learned member in charge of the Bill, and he learned from him that the matter had received careful consideration in the Select Committee, and therefore he was constrained to come to the conclusion that he would not be justified in raising a discussion on it at the present stage of the Bill.

The Motion was put and agreed to.

RANGOON TRAMWAYS BILL.

The Hon'ble MR. ILBERT also moved that the Report of the Select Committee on the Bill to authorize the making, and to regulate the working, of Street Tramways in Rangoon be taken into consideration. He said that this Bill was prepared for the purpose of giving effect to an agreement entered into between the municipality of Rangoon and Mr. Darwood, for the purpose of making street tramways in the town of Rangoon, on the understanding that all the roads were situated within municipal limits. But the Government had since been informed that part of one of these roads lay not within municipal limits but within the military cantonment. The simplest way to meet the difficulty, the Committee considered, was to add a section to the Bill providing that all the roads specified as roads over which tramways were to be constructed should, for the purposes of the Act and of the agreement, be deemed to be situate within the municipality, and they had accordingly added a section to that effect. The other amendments made by the Committee in the Bill were of a very trifling nature, and he need not allude to them.

The Motion was put and agreed to.

The Hon'ble MR. ILBERT also moved that, in section 16, for clauses (*b*) and (*c*), the following be substituted, namely:—

"(*b*) does anything in such a manner as to obstruct any carriage using any such tramway; or

"(*c*) abets, within the meaning of the Indian Penal Code, the doing of anything mentioned in clause (*a*) or clause (*b*)".

He explained that the amendment was of a merely formal character.

The Motion was put and agreed to.

The Hon'ble MR. ILBERT also moved that the Bill as amended be passed.

The Motion was put and agreed to.

SUNDRY BILLS.

The Hon'ble MR. ILBERT also moved that the Hon'ble Mr. Gibbs' name be substituted for Sir S. Bayley's as a member of the Select Committees on the following Bills:—

To amend the law relating to Local Self-government in British Burma.

To amend the Legal Practitioners' Act, 1879, and the Indian Stamp Act, 1879.

The Motion was put and agreed to.

SUCCESSION CERTIFICATES BILL.

The Hon'ble SIR A. COLVIN moved that the Hon'ble Mr. Gibbs' name be substituted for Sir S. Bayley's as a member of the Select Committee on the Bill to amend the law relating to certificates granted under Act XXVII of 1860 (*an Act for facilitating the collection of debts on successions, and for the security of parties paying debts to the representatives of deceased persons*).

The Motion was put and agreed to.

The Council adjourned to Friday, the 21st December, 1883.

D. FITZPATRICK,
Secretary to the Government of India,
Legislative Department.

FORT WILLIAM;

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House on Friday, the 21st December, 1883.

PRESENT:

His Excellency the Viceroy and Governor General of India, K.G., G.M.S.I., G.M.I.E., *presiding*.
His Excellency the Commander-in-Chief, G.C.B., C.I.E.
The Hon'ble J. Gibbs, C.S.I., C.I.E.
Lieutenant-General the Hon'ble T. F. Wilson, C.B., C.I.E.
The Hon'ble C. P. Ilbert, C.I.E.
The Hon'ble Sir S. C. Bayley, K.C.S.I., C.I.E.
The Hon'ble T. C. Hope, C.S.I., C.I.E.
The Hon'ble Sir A. Colvin, K.C.M.G.
The Hon'ble W. W. Hunter, LL.D., C.I.E.
The Hon'ble Durgá Charan Láhá.
The Hon'ble H. J. Reynolds.
The Hon'ble H. S. Thomas.
The Hon'ble G. H. P. Evans.
The Hon'ble Kristodás Pál, Raí Bahádur, C.I.E.
The Hon'ble J. W. Quinton.
The Hon'ble T. M. Gibbon, C.I.E.
The Hon'ble R. Miller.
The Hon'ble Amír Alí.

QUIETING OF TITLES (PANJÁB) BILL.

The Hon'ble MR. ILBERT moved for leave to introduce a Bill for the Quieting of Titles depending on Decisions passed on appeal by certain Settlement-officers in the Panjáb. He said that the object of the Bill was to remove doubts, which had been raised by a recent decision of the Panjáb Chief Court, as to whether certain Settlement-officers had been duly empowered to exercise appellate jurisdiction in suits and other proceedings relating to land-revenue.

The Motion was put and agreed to.

UNIVERSITIES HONORARY DEGREES BILL.

The Hon'ble MR. GIBBS presented the Report of the Select Committee on the Bill to authorize the Universities of Calcutta, Madras and Bombay to grant certain honorary degrees.

The Council adjourned to Friday, the 4th January, 1884.

D. FITZPATRICK,
Secretary to the Government of India,
Legislative Department.

GOVERNMENT ENGINEERING COLLEGE HOWRAH.

NOTICE.

Candidates for admission to the Engineer Classes should apply to the Principal before the 31st January 1884. The Session begins on Monday, the 4th February 1884. Candidates for this class must furnish proof that they have passed the Calcutta University Entrance Examination.

An examination for admission to the Mechanical Apprentice Classes will be held at this College on Wednesday and Thursday, the 30th and 31st January. The subjects for examination are—

Arithmetic (the whole).

Algebra (to Simple Equations, inclusive).

Euclid (Books I and II).

English (Grammar and Composition).

Applications for permission to appear at the examination should reach the Principal not later than the 25th January 1884.

Ten scholarships will be awarded to students entering the Engineer Class not being already holders of junior scholarships. The scholarships will be awarded with general reference to the place taken by candidates at the Entrance Examination.

Applications for scholarships will be received by the Principal up to the 30th January.

Every applicant, before admission to the College, will be examined by the College Surgeon as to his physical strength, fitness for manual labour, and eye-sight.

Further particulars will be supplied on application to the Principal.

G. BELLETT,
Officiating Director of Public Instruction.

HENRY F. BLANFORD,

Meteorological Reporter to the Government of India.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The "Indian Law Reports," published under the authority of the Governor General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Office of the Legislative Department at Calcutta, except the copies for officials in the Bengal Presidency, which are distributed by the Bengal Secretariat, and the copies for subscribers registered by Messrs. Thacker, Spink & Co., which are distributed by that firm; and the Madras, Bombay and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

On and from the 1st January, 1884, the terms of subscription and sale will be reduced as follow:—

Terms of subscription, payable annually in advance.

	Without postage.	With postage.
For the Calcutta Series	R10 0	R12 8
" Madras "	" 5 0	" 6 0
" Bombay "	" 7 8	" 8 8
" Allahabad "	" 5 0	" 6 0
Complete set	" 20 0	" 22 8

A part of any series purchased separately, R1.

Persons desiring to subscribe for or purchase the Reports should apply to—

Messrs. Thacker, Spink & Co., Calcutta.
" Thacker & Co., Bombay.
" Higginbotham & Co., Madras.
The Government Central Book Depôt, Bombay.
" " Book Depôt, Allahabad.

Orders and subscriptions for 1884 should be at once remitted.

THE BENGAL LAW REPORTS.

A few sets of the Bengal Law Reports (Volumes 1 to 15) are available at Messrs. Thacker, Spink & Co., Calcutta, at R375 a set.

For sale in Rajputana to Officers stationed there.

Moore's Manual of Family Medicine for India, 4th Edition. *Price*—

To Government Officers (except those mentioned below) and to the public at large, *R4*.

To all Officers employed in Government Departments who are in receipt of salaries under R500 per mensem, on a certificate being furnished declaring that the book is to be purchased only for the personal use of the officer, *R8; packing and postage, 8 annas.*

Apply to the Superintendent, Commissioner's Office, Ajmer.

☞ The following books may be purchased from the Office of Superintendent of Government Printing, India, No. 166 Dhurrumtollah Street, for private use only, which should be stated in the requisition.

No orders can be attended to unless accompanied by a remittance When postage stamps are forwarded, one anna additional should be sent for every Rupee's worth of stamps, for discount in exchanging them for cash. Service labels or Court Fee stamps are not received.

Books required for the public service cannot be supplied on payment; they are only issued on the authority of the Department to which the indenting officer is subordinate. Applications for them

should be made through the Local Government under which the applicant serves.

Just published.

101. Power for Governor General in Council to determine probable lengths of voyages for purposes of Act.
102. Emigration to Straits Settlements and adjoining Native States.
103. Application of Act to emigration from British ports to French and Dutch colonies.
104. Application of Act to proceedings in British India connected with emigration from French ports in India to French colonies.
105. Prohibition of departure by land of a Native of India under an agreement to labour for hire in some country beyond the sea.

SCHEDULE I.—COUNTRIES TO WHICH EMIGRATION IS LAWFUL.

SCHEDULE II.—FORM OF RECRUITER'S LICENSE.

SCHEDULE III.—PROBABLE LENGTHS OF VOYAGE UNDER THIS ACT.

Indian Emigration Act, 1883.
(Chapter II.—Ports from which, and Countries to which, Emigration is lawful.)

An Act to amend the law relating to the Emigration of Natives of India.

WHEREAS it is expedient to amend the law relating to the emigration of Natives of India; It is hereby enacted as follows:—

CHAPTER I.

PRELIMINARY.

Short title and extent.

1. (1) This Act may be called the Indian Emigration Act, 1883.

(2) It extends to the whole of British India.

Exemption of Government vessels.

2. Nothing in this Act or in any rule made under this Act shall apply to any vessel belonging to, or in the service of, Her Majesty or of the Government of India.

Commencement.

3. Except as to the power to make rules, this Act shall come into force on such day as the Governor General in Council, by notification in the *Gazette of India*, appoints.

Repeal of enactments.

4. On and from the day on which this Act comes into force, the Indian Emigration Act, 1871, and Act No. XIV of 1872 (*to exempt the Straits Settlements from the Indian Emigration Act, 1871*) shall be repealed.

Saving for proceedings under repealed enactments.

5. All notifications issued, contracts entered into, rules and appointments made, and licenses granted under any enactment hereby repealed, and in force on the day on which this Act comes into force, shall (so far as they are consistent with this Act) be deemed to have been respectively issued, entered into, made and granted under this Act.

Definitions.

6. In this Act, unless there is something repugnant in the subject or context,—

(1) "Emigrate" and "emigration" denote the departure by sea out of British India of a Native of India under an agreement to labour for hire in some country beyond the limits of India other than the island of Ceylon or the Straits Settlements:

Provided that a domestic servant when accompanying his employer shall not be deemed to emigrate within the meaning of the above definition:

(2) "Emigrant" means any Native of India who emigrates, or has emigrated, within the meaning of the above definition, or who has been registered under this Act as an emigrant, and includes any dependent of an emigrant:

(3) "Dependent" means any of the following persons accompanying any emigrant, namely:—

(a) any woman who has not entered into an agreement to emigrate under this Act;

(b) any child in whose name and on whose behalf any such agreement has not been entered into; and

(c) any aged or incapacitated relative or friend:

(4) "Magistrate" means, in the Presidency-towns, a Presidency Magistrate, and elsewhere a District Magistrate or a Sub-divisional Magistrate, and includes also any person appointed by the Local Government, by name or by virtue of his office, to perform in any local area the functions of a Magistrate under this Act:

(5) "Registering Officer" means any person appointed by the Local Government, by name or by virtue of his office, to perform in any local area the functions of a Registering Officer under this Act:

(6) "Recruiter" includes a head recruiter or other person who collects or receives emigrants recruited by other persons:

(7) "Vessel" includes anything made for the conveyance by water of human beings or property:

(8) "Emigrant-vessel" means a vessel the master of which is licensed under this Act to carry emigrants therein: and

(9) "Master" means any person (except a pilot or harbour-master) having for the time being control or charge of a vessel.

CHAPTER II.

PORTS FROM WHICH, AND COUNTRIES TO WHICH, EMIGRATION IS LAWFUL.

Ports from which emigration is lawful.

7. (1) Emigration shall not be lawful except from the ports of Calcutta, Madras and Bombay, and from such other ports as the Governor General in Council, from time to time, by notification in the *Gazette of India*, declares to be ports from which emigration is lawful.

(2) The Governor General in Council may at any time, by a like notification, revoke any notification issued under this section.

(3) The Local Government may, from time to time, by notification in the official Gazette, fix for the purposes of this Act the limits of any port from which emigration is lawful.

Countries to which emigration is lawful.

8. (1) Emigration shall not be lawful except to the countries specified in the first schedule hereto annexed, and to such other countries

Indian Emigration Act, 1883.
(Chapter IV.—Protectors of Emigrants and Medical Inspectors.)

as the Governor General in Council, from time to time, by notification in the *Gazette of India*, declares to be countries to which emigration is lawful.

(2) Every notification under this section must contain a declaration that the Governor General in Council has been duly certified that the Government of the country to which the notification refers has made such laws and other provisions as the Governor General in Council thinks sufficient for the protection of emigrants to that country during their residence therein.

Power for Governor General in Council to prohibit emigration to any country.

9. (1) Whenever the Governor General in Council has reason to believe that any of the grounds, hereinafter mentioned, for prohibiting emigration to any country to which emigration is lawful, exists, he may, by notification in the *Gazette of India*, declare that emigration to that country shall cease to be lawful from a day specified in the notification; and from that day emigration to that country shall accordingly cease to be lawful.

(2) The grounds referred to in sub-section (1) of this section are—

(a) that the plague or any other epidemic disease dangerous to human life has broken out in the country;

(b) that the mortality among emigrants in the country is excessive;

(c) that proper measures have not been taken for the protection of emigrants immediately on their arrival in the country or during their residence therein;

(d) that the agreements made with emigrants, as such, before their departure from India are not duly enforced by the Government of the country; and

(e) that the Governor General in Council, having, either directly or through the Secretary of State for India in Council, addressed the Government of the country with a view to obtain information regarding the condition or treatment of emigrants therein, has not within a reasonable time received the information asked for.

Power for Local Government to suspend emigration pending reference to Governor General in Council.

10. (1) Whenever the Local Government has reason to believe that, in any country to which emigration is lawful, the plague or other epidemic disease dangerous to human life has broken out, and that emigrants, if allowed to emigrate to that country, would be exposed to serious risk of life on arrival there, it may, by notification in the official Gazette, declare that emigration to that country from any port in the territories administered by it shall cease to be lawful pending a reference to the Governor General in Council.

(2) The Local Government shall at once report the publication of a notification under this section, with the reasons for it, to the Governor General in Council, who shall thereupon publish a notification in the *Gazette of India* confirming or cancelling the notification published by the Local Government.

Revocation of prohibition.

11. Whenever the Governor General in Council is satisfied that the ground on which a notification has been published by him under either of the two last foregoing sections with respect to any country has ceased to exist, he may, by notification in the *Gazette of India*, declare that emigration to that country shall again be lawful from a day to be specified in the notification.

Power for Local Government to prohibit emigration to specified country from the whole or any specified part of its territories.

12. (1) The Local Government may, with the previous sanction of the Governor General in Council, by notification in the official Gazette, prohibit, from a day specified in the notification, all Natives of India or any specified class of Natives, from emigrating from the whole or any specified part of the territories under its administration to any specified country.

(2) The Local Government may, with the like sanction, in like manner, vary or cancel any notification published under this section.

Saving for acts done before publication of notification.

13. The publication of a notification under any of the four last foregoing sections shall not affect any act done, offence committed or proceedings commenced before the publication.

CHAPTER III.

EMIGRATION AGENTS.

Appointment of Emigration Agents.

14. (1) The Government of every country to which emigration is lawful may, from time to time, appoint a person to be Emigration Agent in any port from which emigration is lawful, and may suspend or remove any person so appointed.

(2) An appointment under this section shall not take effect until the Local Government, by notification in the official Gazette, has declared its approval of the appointment.

Remuneration of Agents.

15. The remuneration to be given to an Emigration Agent shall not depend on, or be regulated by, the number of emigrants sent by him, but shall be in the nature of a fixed salary:

Provided that the Governor General in Council may, from time to time, authorize the payment to specified Emigration Agents of special fees for occasional work.

CHAPTER IV.

PROTECTORS OF EMIGRANTS AND MEDICAL INSPECTORS.

Appointment of Protectors of Emigrants.

16. (1) The Local Government may, from time to time, appoint a proper person to be the Protector of

Indian Emigration Act, 1883.
(Chapter V.—Recruiters.)

Emigrants for any port within the territories administered by it from which emigration is lawful.

(2) The Governor General in Council may, from time to time, define the local area to which the authority of any Protector of Emigrants so appointed shall extend.

(3) Every Protector of Emigrants may be suspended or removed by the Local Government which appointed him.

(4) Every Protector of Emigrants shall be a public servant within the meaning of the Indian Penal Code. XLV of 1860.

General duties of Protector.

17. Every Protector of Emigrants, in addition to the special duties assigned to him by this Act or the rules made under this Act, shall—

(*a*) protect and aid with his advice all emigrants;

(*b*) cause, so far as he can, all the provisions of this Act, and of the rules made under this Act, to be complied with;

(*c*) inspect, on arrival, all vessels bringing return-emigrants to the port for which he is Protector;

(*d*) enquire into the treatment received by the return-emigrants both during the period of their service in the country to which they emigrated, and also during the return voyage, and report thereon to the Local Government; and

(*e*) aid and advise the return-emigrants so far as he reasonably can.

Appointment of Medical Inspector.

18. (*1*) The Local Government may, from time to time, appoint a Medical Inspector of Emigrants at each port from which emigration is lawful, and may suspend or remove him.

(2) Every Medical Inspector of Emigrants shall be a public servant within the meaning of the Indian Penal Code. XLV of 1860.

Protector and Medical Inspector to have facilities for inspection.

19. Every Emigration Agent, and all persons in charge of, or employed in, any depôt established under this Act, or in charge of, or employed in, any emigrant-vessel, shall give the Protector of Emigrants and the Medical Inspector of Emigrants every facility for making such inspections, examinations and surveys as are required by this Act, or by the rules made under this Act, or as those officers may deem necessary or proper, and shall afford them all such information as they may reasonably require.

CHAPTER V.

RECRUITERS.

Protector of Emigrants to recruiters.

20. (*1*) The Protector of Emigrants at each of the ports from which emigration is lawful shall, on the application of the Emigration Agent for any country to which emigration is lawful, grant licenses to so many fit persons as the Protector seems necessary to be recruiters of emigrants within the local area to which the authority of the Protector extends.

(2) A person shall not, unless he holds a license granted under this chapter,—

(*a*) enter into, or attempt to enter into, any agreement with any person purporting to bind him to emigrate, or

(*b*) in consideration of any hire or reward, induce, or attempt to induce, any person to leave any place for the purpose of emigrating, or

(*c*) act or be employed in any other respect as a recruiter of emigrants.

(3) Every recruiter shall produce his license when called upon to do so by any Magistrate or officer in charge of a police-station.

Form of license.

21. Every license granted under this chapter shall specify the particular country for which, and the local area within which, the holder is licensed to recruit, and may be in the form set forth in the second schedule hereto annexed.

Duration of license.

22. (*1*) A license granted under this chapter shall not be in force for a longer period than one year from the day on which it comes into force.

(2) The Protector of Emigrants may, on the ground of misconduct, cancel any license granted by him under this chapter before the expiration of the period for which it is in force.

Countersignature of license.

23. (*1*) A recruiter shall not, in any place beyond the limits of a port from which emigration is lawful, enter, or attempt to enter, into any agreement with any person purporting to bind him to emigrate, or induce or assist, or attempt to induce or assist, any person to leave any place for the purpose of emigrating, or act or be employed in any other respect as a recruiter of emigrants, unless his license bears the countersignature of the District Magistrate.

(2) If a District Magistrate has satisfied himself, after such enquiry as he thinks necessary, that the licensee is, by character or from any other cause, unfitted to be a recruiter under this Act, he may refuse to countersign a recruiter's license.

(3) If a District Magistrate has satisfied himself, after such enquiry as aforesaid, that sufficient and proper accommodation has not been provided in a suitable place, or is not available, for such intending emigrants or emigrants as may be collected by the recruiter pending their registration or removal to the depôt at the port of embarkation, he may refuse to countersign a recruiter's license or to decide whether he will countersign his license until after the expiration of such time as may in his opinion be reasonable.

(4) Before a Magistrate refuses to countersign, or defers his countersignature of, a recruiter's license, he shall record in writing his reasons for so doing.

Indian Emigration Act, 1883.
(Chapter VI.—Registration of Emigrants and Execution of Agreements to emigrate.)

24. If any Magistrate, having countersigned a recruiter's license, afterwards finds reason to think that the licensee is, by character or from any other cause, unfitted to be a recruiter under this Act, or that the accommodation provided for intending emigrants or emigrants collected by him has become unsuitable or has ceased to be available, he may require the licensee to produce his license, and may cancel the countersignature on it, or may impound the license and send it for cancellation to the Protector of Emigrants who granted it.

Power for Magistrate to cancel countersignature in certain cases.

25. When a Magistrate countersigns, or refuses to countersign, a recruiter's license, or cancels the countersignature on it, he shall at once report the countersignature, or the refusal or cancellation, and the grounds of the refusal or cancellation, to the Protector of Emigrants who granted the license.

Notice to Protector of Emigrants of countersignature, refusal to countersign or cancellation of countersignature.

26. (*1*) The Emigration Agent on whose application any recruiter is licensed shall supply the recruiter with a written or printed statement, signed by the Agent, and countersigned by the Protector of Emigrants, of the terms of agreement which the recruiter is authorized to offer on behalf of the Agent to intending emigrants.

Recruiter to be supplied with statement of terms of agreement he is authorized to offer.

(*2*) The statement shall be both in English and in the Vernacular language or languages of the local area within which the recruiter is licensed to recruit.

(*3*) The recruiter shall give a true copy of the statement to every person whom he invites to emigrate, and shall produce the statement for the information of any Magistrate or officer in charge of a police-station, when called upon to do so by the Magistrate or officer.

27. (*1*) Every recruiter shall provide sufficient and proper accommodation in a suitable place for such intending emigrants or emigrants as may be collected by him pending their registration or removal to the port of embarkation.

Accommodation to be provided by recruiters.

(*2*) The place where the accommodation is provided shall have a board fixed in some conspicuous position specifying the purpose for which the place is used.

(*3*) Every District Magistrate, and any subordinate Magistrate or officer of Police authorised in this behalf by a rule made under this Act, shall have, for the supervision and regulation of the places where accommodation is provided under this section, the same powers as are by this Act conferred on a Protector of Emigrants in respect of depôts at the port of embarkation.

(*4*) All recruiters or other persons in charge of these places shall afford every Magistrate and any officer of Police authorised as aforesaid in this behalf every facility for visiting and inspecting them.

CHAPTER VI.

REGISTRATION OF EMIGRANTS AND EXECUTION OF AGREEMENTS TO EMIGRATE.

28. The Local Government may, from time to time, appoint any person, by name or by virtue of his office, to perform in a specified local area, but subject to the control of the District Magistrate or such other officer as the Local Government appoints, by name or by virtue of his office, in this behalf, the functions of a Registering Officer under this Act.

Power for Local Government to appoint Registering Officers.

29. Every agreement to emigrate entered into by any person must—

Execution of agreements.

(*a*) if executed within the limits of any port from which emigration is lawful, be executed in the presence of the Protector;

(*b*) if executed elsewhere, be executed in the presence of a Registering Officer.

30. Every recruiter who desires to engage any person to emigrate shall appear before a Registering Officer or the Protector of Emigrants (as the case may be) with that person, and with any persons intending to accompany that person as his dependents.

Appearance of intending emigrants before Registering Officer.

31. (*1*) The Registering Officer or Protector shall thereupon examine the person, apart from the recruiter, with reference to his intended agreement; and, if it appears that he is competent and willing to enter into the agreement and understands its nature, that he has not been induced to enter into it by any coercion, undue influence, fraud, misrepresentation or mistake, that its terms are in conformity with law, and are such as, according to the statement furnished to the recruiter under section twenty-six, he was authorized to offer, shall, subject to the provisions of section thirty-three, register in a book to be kept for the purpose, in such form as the Governor General in Council, from time to time, by rules made under this Act, prescribes, the name, sex, name of the father, caste, occupation and age of the intending emigrant, and the name of the village or place of which he is a resident, and such other particulars (if any) concerning him and his dependents (if any) as the Governor General in Council, from time to time, by rules made under this Act, prescribes.

Examination and registration of emigrant.

32. (*1*) Notwithstanding anything contained in the last foregoing section, the Registering Officer or Protector may refuse to register any married woman under that section if he finds that her husband does not consent to her emigrating.

Power to refuse registration in case of married women.

Indian Emigration Act, 1883.
(Chapter VII.—Emigration Depôts.)

(2) The Registering Officer or Protector may also, in the case of any woman whom he believes to be married, refuse to decide whether he will register her until after the expiration of such time, not exceeding ten days, as he thinks fit.

Examination of dependent.

33. (1) When any person appears before a Registering Officer or Protector under section thirty as a dependent of an intending emigrant, the Registering Officer or Protector shall, if the person is able to give intelligent answers to questions, examine him, apart from the recruiter, as to his dependence on the intending emigrant whom he is about to accompany and as to his willingness to emigrate.

(2) Where the Registering Officer or Protector sees reason to doubt the existence of the dependence or willingness, he may, if he thinks fit, refuse to register the intending emigrant unless the name of the dependent is omitted from the register.

Record of reasons for refusal to register.

34. Whenever the Registering Officer or Protector refuses to register any intending emigrant, he shall record his reasons for the refusal.

Execution and attestation of agreement.

35. (1) When the particulars concerning any intending emigrant and his dependents (if any) have been registered, the Registering Officer or Protector shall cause an agreement to be prepared in triplicate, and shall call on the recruiter and the intending emigrant to execute the agreement in triplicate in his presence, and, if they execute it, shall attest the execution with his signature.

(2) An agreement to emigrate shall not be of any effect until the particulars concerning the intending emigrant and his dependents (if any) have been registered, and the agreement has been executed and attested under this Act.

(3) When the particulars concerning any intending emigrant and his dependents (if any) have been registered, and an agreement has been executed and attested under this Act, the intending emigrant shall be deemed to be registered under this Act as an emigrant.

Contents of agreement.

36. Every agreement to emigrate shall contain a copy of the particulars registered concerning the intending emigrant and his dependents (if any) under section thirty-one, and on the reverse such particulars concerning the nature, duration and term of service and the remuneration of the emigrant, and such other matters (if any) as the Governor General in Council, from time to time, by rules made under this Act, prescribes.

Disposal of copies of agreement.

37. When the agreement has been executed and attested, one copy thereof shall be delivered to the recruiter for transmission to the Emigration Agent, another shall be delivered to the emigrant, and the third shall be retained by the Protector or sent by the Registering Officer to him.

Fee for preparation of agreement.

38. For the preparation of every agreement under this chapter the recruiter or Emigration Agent shall pay such fee as the Governor General in Council, from time to time, by notification in the *Gazette of India*, prescribes:

Provided that the Governor General in Council may at any time, by like notification, declare that the fee payable under this section shall be consolidated, either generally or in any specified local area, with the fee payable under section seventy-three.

Power to make agreement if over 16.

39. Notwithstanding anything to the contrary in the Indian Contract Act, 1872, it shall be lawful for any person of the age of sixteen years or upwards to enter in manner in this Act provided into an agreement to emigrate to any place to which emigration is lawful.

IX of 1872.

Power to make agreement on behalf of child or ward.

40. Any person entering into an agreement to emigrate, and being the parent or guardian of a child under the age of sixteen years and above the age of ten years, may, in the name of and on behalf of the child, enter into an agreement in manner in this Act provided binding the child to emigrate with him.

CHAPTER VII.

EMIGRATION DEPÔTS.

Depôts to be established at ports of embarkation.

41. Every Emigration Agent shall establish at the port for which he is appointed a suitable depôt for the reception and lodging of emigrants before embarkation for the country for which he is Emigration Agent, and shall provide all necessary food and clothing for all emigrants during their stay at the depôt.

Licensing of depôts.

42. (1) A depôt established under the last foregoing section shall not be used for the reception and lodging of emigrants until it has been inspected and approved by the Protector of Emigrants and the Medical Inspector of Emigrants, and a license for its use has been granted by the Protector.

(2) A license under this section shall not be granted for a longer period than one year from the day on which it comes into force.

(3) The Protector of Emigrants may at any time cancel a license under this section—

(a) if he considers that the depôt for which it was granted is unhealthy, or has in any respect become unsuitable for the purpose for which it was established, or

Indian Emigration Act, 1883.
(Chapter VIII.—Conveyance of Emigrants to Depôts and Procedure on Arrival).

(b) if the Emigration Agent fails, after reasonable notice, to comply with any of the requirements of this Act or of the rules made under this Act.

Inspection by Protector and Medical Inspector.

43. The Protector of Emigrants and the Medical Inspector shall, from time to time, and at least once in every week during which any emigrants may be kept in any depôt at the port for which they are Protector and Medical Inspector, respectively, inspect the emigrants in that depôt, and examine the state of the depôt, and the manner in which the emigrants therein are lodged, fed, clothed and otherwise provided for and attended to.

Report by Medical Inspector.

44. The Medical Inspector shall report to the Protector of Emigrants any circumstance that may come to his knowledge showing that any depôt is not suitable for its purpose, or that the emigrants lodged therein are treated with any oppression or neglect.

Treatment of emigrant suffering from disease.

45. (1) The Medical Inspector may, if he thinks fit, direct that any emigrant suffering from any disease likely to be dangerous to his neighbours shall be isolated or excluded from the depôt.

(2) The Medical Inspector may, if he thinks fit, order the removal of any emigrant so suffering to a proper hospital for treatment at the expense of the Emigration Agent; and the expense (if any) incurred by the Protector of Emigrants in respect of the removal of the emigrant and his treatment in the hospital shall be recoverable from the Emigration Agent by the Protector of Emigrants, with interest thereon at the rate of six per centum per annum from the date on which the expense was incurred.

CHAPTER VIII.

CONVEYANCE OF EMIGRANTS TO DEPÔTS AND PROCEDURE ON ARRIVAL.

Emigrant not to be removed before registration.

46. A recruiter shall not remove or attempt to remove any intending emigrant to a depôt, or induce or attempt to induce him to go to a depôt, or to leave the local limits of the jurisdiction of the Magistrate by whom the recruiter's license has been countersigned, or aid him in going to a depôt, or in leaving any such local limits, until the intending emigrant has been registered under this Act as an emigrant.

Conveyance of emigrant to depôt.

47. (1) Every emigrant must, after he has been registered under this Act, be conveyed with all convenient despatch, by or under the orders of the recruiter or Emigration Agent, to the depôt established at the port of embarkation by the Emigration Agent on whose application the recruiter has been licensed.

(2) When an emigrant has been registered at a place beyond the limits of the port of embarkation, he must, while proceeding to the depôt, be accompanied throughout the journey either by the recruiter himself, or by a competent person appointed by him with the approval of a Magistrate.

(3) The Magistrate shall give to the person so appointed a certificate signed by him stating that he has been appointed for the journey to the depôt.

(4) The recruiter or the person so appointed shall, throughout the journey, provide the emigrant with proper and sufficient food and lodging.

Report of arrival at depôt.

48. The arrival at a depôt of each emigrant must immediately be reported by the person in charge of the depôt to the Emigration Agent, and by the Agent to the Protector of Emigrants.

Examination by Medical Inspector.

49. (1) The copy of the agreement received by the recruiter from the Registering Officer or Protector must, as soon as conveniently may be after the arrival of the emigrant at the depôt, be shown by the Emigration Agent to the Medical Inspector of Emigrants.

(2) The Medical Inspector shall examine each emigrant entered in the agreement to ascertain whether he is fit, having regard to his age and state of health, to undertake the journey to the country to which he has agreed to emigrate.

(3) The Medical Inspector, if satisfied of his fitness, shall give a certificate to that effect to the Emigration Agent. If not so satisfied, he shall give a certificate to that effect to the Protector of Emigrants.

Power for Protector to order payment of expenses of return of emigrant in certain cases.

50. (1) In any of the following cases, namely:—

(a) if the Medical Inspector of Emigrants finds that an emigrant is, or has become, unfit to undertake the journey to the country to which he has agreed to emigrate, and if the Protector of Emigrants considers that the emigrant has not dishonestly represented himself as fit to undertake the journey, or

(b) if the Protector finds that any such irregularity has occurred in the recruitment or treatment by the recruiter of any emigrant as makes it just to rescind the agreement to emigrate, or

(c) if the Emigration Agent refuses to fulfil the agreement entered into with the emigrant,

the Protector may order the Emigration Agent to pay to the emigrant such sum as the Protector deems reasonable as compensation, and, when the emigrant has been registered at a place beyond the

Indian Emigration Act, 1883.
(Chapter IX.—Emigrant-vessels.)

limits of the port of embarkation, such reasonable sum as is necessary to enable him to return to the place at which he was registered, and may take any steps which he thinks necessary for the conveyance of the emigrant to that place.

(2) Any emigrant who has been registered at any place beyond the limits of the port of embarkation, and who from his state of health is, in the opinion of the Medical Inspector of Emigrants, unfit to undertake at once the return-journey to the place at which he was registered, shall be entitled to be fed, lodged, clothed and attended to at the depôt at the expense of the Emigration Agent until he is reported by the Medical Inspector fit to undertake the return-journey.

Payment of expenses of dependents and relatives.

51. (*1*) When any order is made under the last foregoing section with reference to any emigrant who was registered at any place beyond the limits of the port of embarkation, any emigrant who has been registered as his dependent,

or any emigrant who, not being a dependent, is the father, mother, wife, husband, son, daughter, brother, sister, guardian or ward of the emigrant, shall be entitled—

(*a*) to be conveyed at the expense of the Emigration Agent with the emigrant to the place at which he was registered; and

(*b*) if the emigrant is unable to travel, to be lodged, fed and clothed in the depôt at the expense of the Emigration Agent until the emigrant is able to travel.

(*2*) The Protector of Emigrants may include any expenses incurred under this section in an order made under the last foregoing section with respect to the emigrant.

Compensation to emigrant for ill-treatment on journey.

52. If it appears that during the journey to the depôt any emigrant has suffered any ill-treatment, or that, in the case of any emigrant who has been registered at a place beyond the limits of the port of embarkation, the provisions of section forty-seven have not been complied with, the Protector of Emigrants may order the Emigration Agent to pay—

(*a*) to the emigrant a reasonable sum by way of compensation, and

(*b*) if any expenses have been incurred by or under the orders of the Protector on behalf of the emigrant by reason of the neglect to comply with the provisions of section forty-seven, to the Protector the expenses so incurred.

Power for Protector to pay and recover expenses incurred on behalf of emigrant.

53. (*1*) On failure of the Emigration Agent for twenty-four hours to comply with an order of the Protector for the payment of any sum to an emigrant under any of the last three foregoing sections, the Protector may pay the same to the emigrant.

(*2*) Every sum paid by the Protector to an emigrant under sub-section (1), and, on failure of the Emigration Agent for twenty-four hours to comply with an order for payment thereof under the last foregoing section, every sum which the Protector may have ordered the Emigration Agent to pay to him under that section, shall be recoverable from the Emigration Agent with interest thereon at the rate of six per centum per annum from the date of payment.

(*3*) Further proof shall not be required by any Court in any such case than that the Protector gave the Emigration Agent an order to pay the sum, and that the Emigration Agent for twenty-four hours failed to comply with the order.

CHAPTER IX.

EMIGRANT-VESSELS.

Master of emigrant-vessel to be licensed.

54. It shall not be lawful to receive any emigrant on board any vessel unless a license to carry emigrants in the vessel has been obtained from the Local Government.

Application for license.

55. (*1*) When the master or owner of any vessel desires to obtain a license to carry emigrants in his vessel, he shall apply in writing through the Protector of Emigrants to the Local Government for the license.

(*2*) The application must state the number of emigrants which, according to the rules as to space contained in this chapter, the applicant deems the vessel capable of carrying, and the tonnage and such other particulars respecting the vessel as the Governor General in Council, from time to time, by rules made under this Act, prescribes.

Survey and licensing of vessel.

56. (*1*) The Protector of Emigrants shall cause the vessel to be surveyed by a competent person at the cost of the master or owner, with a view to ascertain her seaworthiness, and the extent and nature of her accommodation for emigrants, and to ascertain that she is properly ventilated, and is supplied with all the tackle, apparel and furniture requisite for her intended voyage.

(*2*) If the Local Government is of opinion that the vessel is in all respects suitable for the carrying of emigrants under this Act, and is properly manned and officered, it shall give to the master of the vessel a license to carry emigrants therein specifying the number of emigrants which may be received on board.

Accommodation required on board emigrant-vessel.

57. (*1*) A license shall not be granted under the last foregoing section unless—

(*a*) there is provided for the emigrants, either between-decks or, subject to the approval

Indian Emigration Act, 1883.
(Chapter X.—Embarkation and Departure.)

of the Protector of Emigrants and the Medical Inspector, in cabins on the upper deck, a space devoted to the exclusive use of the emigrants having in every part a height of not less than six feet;

(*b*) a separate place is fitted up for a hospital; and

(*c*) such arrangements are made for the separation of women (married or single) and children from the other emigrants as the Governor General in Council, from time to time, by rules made under this Act, prescribes.

(*2*) The cabins on the upper deck provided under clause (*a*) of this section must be firmly secured and entirely covered in.

Rules as to space on board emigrant-vessel.

58. Every emigrant-vessel must contain within the space referred to in clause (*a*) of the last foregoing section at least twelve superficial feet and seventy-two cubic feet of space for each emigrant:

Provided that two emigrants under the age of ten years shall for the purposes of this section count as one only.

Provisions, clothing, fuel and water.

59. There must be on board every emigrant-vessel, at the time of departure of the vessel from the port at which they embark, provisions, clothing, fuel and water for the emigrants (over and above the supply for the master, officers and crew, and of the cabin and other passengers, if any), in such quantity and of such description and quality as the Governor General in Council, from time to time, by rules made under this Act, prescribes.

Surgeons, attendants, medicines and stores.

60. Every emigrant-vessel must, at the time of departure of the vessel from the port at which the emigrants embark, have on board, and must carry with her, a properly qualified surgeon, and also such compounders, interpreters and attendants subordinate to the surgeon, and such medicines and other stores, in such quantity and of such quality as the Governor General in Council, from time to time, by rules made under this Act, prescribes.

Duty of Protector and Medical Inspector with respect to enforcement of foregoing sections.

61. The Protector of Emigrants and the Medical Inspector of Emigrants shall see personally that all the provisions of the last two foregoing sections are complied with.

Bond to be executed by master of emigrant-vessel.

62. (*1*) Every master licensed under this Act shall, on the requisition of the Protector of Emigrants, and before any emigrant embarks on board his vessel, execute to the Protector, in duplicate, a bond, in such form as the Local Government, from time to time, prescribes, binding himself and the owner of the vessel in a penal sum of ten thousand rupees, to perform the duties imposed by this Act or any rule made under this Act on a master and owner respectively.

(*2*) The Protector of Emigrants shall forward one copy of the bond to such officer as may be appointed in this behalf by the Government of the country to which the emigrants are to be conveyed, or, in the case of a foreign colony, to the British Consular Agent, and the other copy to the Local Government.

CHAPTER X.

EMBARKATION AND DEPARTURE.

Time of embarkation after arrival.

63. An emigrant shall not embark, except with the permission of the Protector of Emigrants, until seven days have elapsed from the date of his arrival at the depôt.

Time at which emigrant-vessels may leave India.

64. (*1*) An emigrant-vessel shall not sail from any port in British India—

(*a*) to any country west of the Cape of Good Hope, except at such seasons as the Governor General in Council, from time to time, by rules made under this Act, prescribes as seasons during which it shall be lawful for emigrant-vessels generally, or of a class to which the vessel belongs, to sail to that country;

(*b*) to any country during any season which the Governor General in Council, from time to time, by notification in the *Gazette of India*, declares to be a season during which the sailing of emigrant-vessels to that country is prohibited.

Procedure if emigrant refuses to embark.

65. If any emigrant without sufficient cause refuses or neglects to embark when called on by the Emigration Agent to do so, it shall not be lawful to compel the emigrant to embark; but nothing in this section shall affect the civil or criminal liabilities which an emigrant incurs by reason or in respect of any such refusal or neglect.

List of, and passes for, emigrants.

66. (*1*) When any emigrants are about to embark on board any vessel, the Emigration Agent shall supply the master of the vessel with four copies of a list, specifying, as accurately as may be, the names, ages and occupations of the emigrants, and the names of their respective fathers.

(*2*) The master shall not receive any emigrant on board unless he is provided with a pass, signed by the Emigration Agent, and countersigned by the Protector, stating the name and age of the emigrant, the name of his father, and the country to which he has agreed to emigrate, and certifying that he is in a fit state of health to undertake the voyage to that country.

Indian Emigration Act, 1883.
(Chapter X.—Embarkation and Departure.)

(3) Every emigrant shall on embarkation deliver the pass to the master.

(4) The master shall compare the emigrants who embark and the passes delivered by them with the list supplied by the Emigration Agent; and, if the list appears to be correct and to correspond with the passes delivered and with the emigrants embarked, the master shall sign the four copies of the list.

(5) The master shall not permit any emigrant to remain on board who has not delivered up his pass to the master, or is not mentioned in the list.

Disposal of the two copies of list to be given by master to Protector.

67. (1) When the copies of the list have been signed, the master shall give two of the copies to the Protector of Emigrants, who shall sign them if he believes them to be correct.

(2) The Protector shall send one of the copies so signed by him by the vessel which carries the emigrants to such officer as may be appointed in this behalf by the Government of the country to which the emigrants have agreed to emigrate, or, in the case of a foreign colony, to the British Consular Agent, and shall file the other copy in his own office.

Disposal of the two copies of list to be given by master to Emigration Agent.

68. (1) The master shall give to the Emigration Agent the two remaining copies of the list.

(2) The Emigration Agent shall thereupon sign the copies, and shall return one of them to the master.

(3) The master shall, on the arrival of the vessel at the country to which the emigrants have agreed to emigrate, and before their disembarkation, deliver the copy so returned to him to such officer as may be appointed in this behalf by the Government of the country, or, in the case of a foreign colony, to the British Consular Agent.

Examination of emigrants by Medical Inspector.

69. (1) The Medical Inspector shall be present at the embarkation of all emigrants, and shall examine each emigrant to ascertain if he is in a fit state of health to undertake the voyage to the country to which he has agreed to emigrate; and, if he finds that he is not fit to undertake the voyage, he shall inform the Protector accordingly.

(2) The Protector may thereupon refuse to permit the emigrant to embark; and any emigrant, registered as a dependent of an emigrant whom the Protector has refused to permit to embark, or any emigrant who, not being a dependent, is the father, mother, wife, husband, son, daughter, brother, sister, guardian, or ward of the emigrant, may, notwithstanding anything in this Act, refuse to embark.

(3) The provisions of sections fifty, fifty-one and fifty-three shall apply to emigrants who under this section are not permitted to embark, and to any emigrants who under this section refuse to embark, and to the recovery of expenses incurred under this Act in respect of them.

Emigration Agent to deliver agreements to emigrate to master.

70. The Emigration Agent shall, after all the emigrants have embarked, deliver to the master all the agreements made by the Emigration Agent or under his authority with the emigrants, and delivered or sent to him under this Act; and the master shall, on arrival at the country to which the emigrants are to be conveyed, deliver these agreements to such officer as may be appointed in this behalf by the Government of the country, or, in the case of a foreign colony, to the British Consular Agent.

Certificates from Protector of Emigrants and Emigration Agent.

71. Before any emigrant-vessel clears out of any port, the master of the vessel shall obtain from the Protector of Emigrants at the port, and from the Emigration Agent for the country to which the emigrants are to be conveyed, certificates, signed by the Protector and Emigration Agent, respectively, to the effect that the Protector and Agent have, in respect of all the emigrants embarking at that part in the vessel, done all that is required by the foregoing provisions of this Act, or by the rules made under this Act, to be done on the part of the Protector and Agent, respectively, and that all the directions for the security, well-being and protection of emigrants which are contained in this Act, or in the rules made under this Act, have in the case of that vessel been complied with.

Copies of Act and rules to be kept on board.

72. The master of every emigrant-vessel shall keep on board the vessel during the whole voyage two copies of this Act and of all rules made under this Act, and two copies of a translation of this Act, and of those rules, in such language or languages as the Local Government directs, and shall, on request made at any reasonable time, produce one of those copies to any emigrant for his perusal.

Fee for each embarked emigrant.

73. For each emigrant who embarks on board an emigrant-vessel the Emigration Agent shall pay to the Protector of Emigrants a fee of such amount as the Governor General in Council, from time to time, by notification in the *Gazette of India*, prescribes:

Provided as follows:—

(a) the fee payable under this section shall not be more than is, in the opinion of the Governor General in Council, sufficient to raise the total income from fees under this Act to an amount which will cover the cost of any establishment or supervision which the Governor General in Council thinks necessary to provide for the control of emigration:

(b) if it appears to the Governor General in Council expedient to provide, in the case of any country, any special establishment or

Indian Emigration Act, 1883.
(Chapter XI.—Rules.)

expenditure for the protection of Indian emigrants to that country, the Governor General in Council may increase the fee payable in the case of emigrants to that country to an amount sufficient, in his opinion, to cover the cost of the special establishment or expenditure.

Duty of master to see to observance of Act and rules on board his vessel.

74. It shall be the duty of every master licensed under this Act to see that all the provisions of this Act and the rules made under this Act are observed on board his vessel during the voyage from British India to the country to which the emigrants are to be conveyed.

Return of pass to emigrant.

75. The master shall return his pass to each emigrant before he disembarks in the country to which he has agreed to emigrate.

Special Provisions as to Vessels sailing from Calcutta.

Emigrant-vessel sailing from Calcutta to depart within 24 hours of embarkation.

76. The master of every vessel carrying emigrants from the port of Calcutta shall proceed on his voyage and depart with his vessel from Garden Reach within twenty-four hours after the embarkation of such of the emigrants as have first embarked.

Emigrant-vessel sailing from Calcutta to be towed to sea.

77. Every sailing-vessel leaving the port of Calcutta with emigrants shall proceed from Garden Reach to sea under tow of a steamer declared to be competent by such officer as the Local Government appoints in this behalf.

Power of surgeon of emigrant-vessel leaving Calcutta to require sick emigrants to be sent to hospital.

78. (*1*) When an emigrant-vessel leaves the port of Calcutta, if during her passage down the river, and while between Garden Reach and Diamond Harbour, the disease of measles, scarlet-fever or small-pox appears on board, the master shall, if so required by the surgeon in charge of the emigrants, send to the hospital at Diamond Harbour all emigrants suffering from the disease, with any emigrants registered as their dependents, and any emigrant who, not being a dependent, is the father, mother, wife, husband, son, daughter, brother, sister, guardian or ward of any such emigrant and who wishes to accompany him or her, and shall at once inform the Protector of Emigrants at Calcutta of the number and names of the emigrants so sent to hospital.

(*2*) The provisions of sections fifty, fifty-one and fifty-three shall, so far as may be, apply to emigrants landed under this section, and to the recovery of expenses incurred in respect of them.

Power of surgeon of emigrant-vessel leaving Calcutta to require all emigrants to be landed when cholera appears.

79. (*1*) In the event of cholera in an epidemic form appearing among the emigrants on board any such vessel carrying emigrants from the port of Calcutta, the surgeon in charge of the emigrants may require the master to land all the emigrants on board the vessel at Diamond Harbour.

(*2*) The master shall at once comply with the request of the surgeon, and shall immediately give notice of his having done so to the Protector of Emigrants at Calcutta, who shall take such action thereon as the Governor General in Council, from time to time, by rules made under this Act, prescribes.

CHAPTER XI.

RULES.

Power for Governor General in Council to make rules.

80. (*1*) The Governor General in Council may, from time to time, make rules consistent with this Act—

(*a*) to provide for the supervision and regulation of places of accommodation provided under this Act, and to define the classes of Magistrates and the officers of Police to be authorized to visit and inspect those places;

(*b*) to prescribe the form of the register required under this Act, and the particulars to be entered therein, and to regulate the control to be exercised over Registering Officers by the District Magistrate or officer (if any) appointed in this behalf under this Act;

(*c*) to prescribe the forms of the agreements to be made under this Act, and the particulars to be contained therein and the language or languages in which agreements must be expressed;

(*d*) to prescribe the conditions on which licenses for the establishment of depôts under this Act may be given, to provide for the supervision and regulation of depôts, and for the medical care of the emigrants during their residence there, and the measures to be taken on the outbreak of any epidemic or infectious disease there;

(*e*) to prescribe the forms to be supplied by Emigration Agents and recruiters for the purposes of this Act;

(*f*) to prescribe the particulars which the owner or master of a vessel applying for a license to carry emigrants in his vessel must state;

(*g*) to regulate the proportion of women to be ordinarily carried in any emigrant-vessel with male emigrants, and to prescribe the arrangements to be made for the separation of women (married or single) and children from the other emigrants on board an emigrant-vessel;

(*h*) to prescribe the description, quantity and quality of provisions, fuel and water to be taken by emigrant-vessels, the daily allowance of food and water to be issued, and the nature and amount of clothing to be supplied to each emigrant during the voyage;

(*i*) to fix the number of the compounders, interpreters and attendants subordinate to the surgeon to be carried for the care of the sick or weakly on board each emigrant-vessel;

Indian Emigration Act, 1883.
(Chapter XII.—Offences.)

(*j*) to prescribe the nature, quantity and quality of medicines and other stores to be carried on board emigrant-vessels;

(*k*) to provide for the ventilation and cleanliness of every emigrant-vessel during a voyage, and for its being furnished with a sufficient number of life-buoys, boats, water-buckets and other appliances to be used in case of shipwreck or fire;

(*l*) to prescribe the seasons at which alone emigrant-vessels or specified classes of emigrant-vessels may sail from any port in British India to any country west of the Cape of Good Hope to which emigration is for the time being lawful;

(*m*) to provide for the disposal of emigrants who may be landed under section seventy-nine;

(*n*) to provide for the medical care of the emigrants on the voyage, and to provide for the measures to be taken on the outbreak of any epidemic or infectious disease on a voyage;

(*o*) to provide for a journal being kept by the surgeon of every emigrant-vessel, recording the health of the emigrants, and his treatment of the sick, with full explanation of the causes of every death; and to define the duties and powers of the surgeon in respect of the emigrants committed to his care;

(*p*) to define and regulate the powers and duties of the several officers appointed by the Government under this Act; and

(*q*) generally to provide for the security, well-being and protection of emigrants:

Provided that the Local Government may, in special cases, notwithstanding anything contained in rules made under clause (*g*) of this section, permit an emigrant-vessel to sail though it does not carry the proportion of women required to be carried in ordinary cases.

(*2*) The power to make rules conferred by this section may be exercised at any time after the passing of this Act, but any rule made under this section shall not take effect until the Act comes into force.

Publication of drafts and rules.

81. (*1*) The Governor General in Council shall, before making rules under the last foregoing section, publish a draft of the proposed rules in such manner as may, in his opinion, be sufficient for the information of persons likely to be affected thereby.

(*2*) There shall be published with the draft a notice specifying a date at or after which the draft will be taken into consideration.

(*3*) The Governor General in Council shall receive and consider any objection or suggestion which may be made by any person with respect to the draft before the date so specified.

(*4*) Every rule made under the last foregoing section shall be published in the *Gazette of India*, and the publication in the *Gazette of India* of a rule purporting to be made under that section shall be conclusive evidence that it has been duly made.

CHAPTER XII.

OFFENCES.

Unlawful recruiting.

82. (*1*) Whoever, except in conformity with the provisions of this Act or of the rules made under this Act,—

(*a*) makes, or attempts to make, any agreement with any Native of India purporting to bind him to emigrate, or

(*b*) in consideration of any hire or reward, induces, or attempts to induce, any Native of India to leave any place for the purpose of emigrating, or otherwise acts or is employed as a recruiter of emigrants, or

(*c*) in consideration of any hire or reward, receives into or detains in any place, or, being a recruiter, in any place other than a place in which accommodation has been provided in accordance with this Act or the rules made under this Act, any person with a view to his being registered as an emigrant, or after his registration as an emigrant and before his departure for the depôt at the port of embarkation,

shall be punished with fine which may extend to five hundred rupees.

(*2*) If any person, other than a recruiter licensed under this Act, commits an offence under this section, any Police-officer may arrest him without warrant.

Recruiters removing unregistered emigrants to depôt.

83. Whoever, being a recruiter licensed under this Act,—

(*a*) removes, or attempts to remove, any intending emigrant to a depôt before he has been registered under this Act as an emigrant, or induces, or attempts to induce, him to leave the local limits of the jurisdiction of the Magistrate by whom the recruiter's license has been countersigned before he has been so registered, or aids, or attempts to aid, him in leaving any such local limits or going to any depôt before he has been so registered, or

(*b*) fails to give a true copy of the statement with which he is provided under section twenty-six to any person whom he invites to emigrate, or

(*c*) fails to provide any emigrant whom he has engaged, and who has been registered at a place beyond the limits of the port of embarkation, with suitable lodging and food, or otherwise ill-treats any emigrant on his journey to the depôt,

shall be punished with fine which may extend to five hundred rupees.

Fraudulently inducing Native to emigrate.

84. (*1*) Whoever, by means of intoxication, coercion or fraud, causes or induces, or attempts to cause or induce, any Native of India

Indian Emigration Act, 1883.
(Chapter XII.—Offences.)

to emigrate, or to enter into any agreement to emigrate, or to leave any place with a view to emigrating, shall be punished with imprisonment for a term which may extend to one year, or with fine, or with both.

False representation of Government authority.

85. Whoever, without lawful authority, issues any written order to the Police to assist himself or any other person to procure emigrants, or falsely represents that any emigrants are required by the Government or are to be engaged on behalf of the Government, shall be punished with imprisonment for a term which may extend to six months, or with fine which may extend to five hundred rupees, or with both.

Receiving emigrants on board vessel in contravention of Act.

86. If any master of a vessel—

(*a*) knowingly receives on board his vessel any emigrant who has not complied with the provisions of this Act, or the rules made under this Act, so far as they are binding on him, or

(*b*) not being licensed under this Act, knowingly receives any emigrant on board his vessel, or

(*c*) being licensed under this Act, knowingly receives on board his vessel any emigrant in excess of the number specified in his license,

he shall be punished with imprisonment for a term which may extend to one year, or with fine which may extend to one thousand rupees for each emigrant so received, or with both; and the vessel, her tackle, apparel and furniture, may be declared by the Court before which the master is tried to be forfeited to Her Majesty.

Fraudulent acts on part of master.

87. If any master licensed under this Act fraudulently does, or suffers to be done, any act or thing whereby the license becomes inapplicable to the altered state of the vessel or other matter to which the license relates, he shall be punished with fine which may extend to five thousand rupees;

and he may also be sued on any bond which he may have executed under section sixty-two.

Clearance without compliance with Act.

88. If any master of an emigrant-vessel clears, or attempts to clear, his vessel outwards when any of the provisions of section fifty-seven, fifty-nine or sixty have not been complied with in respect of his vessel, he shall be punished with fine which may extend to four thousand rupees.

Failure of master to comply with provisions as to lists and passes.

89. If any master receives on board his vessel any emigrants and fails to comply with the requirements of sections sixty-six, sixty-seven and sixty-eight in respect of those emigrants, he shall be punished with fine which may extend to two hundred rupees for each emigrant so received on board.

Master taking on board, after clearance, emigrants not entered in list.

90. If any master, having cleared his vessel, takes on board any emigrant not entered in the list mentioned in section sixty-six or not furnished with a pass required by that section, he shall be punished with fine which may extend to two hundred rupees for each emigrant so taken.

Master landing emigrant at other than specified country.

91. If any master lands any emigrant in any country other than the country for which he has been shipped by the Emigration Agent, he shall be punished for every emigrant so landed with fine which may extend to two hundred rupees, or with imprisonment for a term which may extend to one month, or with both, unless the landing has been caused by stress of weather or unavoidable accident, or has taken place under the provisions of section seventy-eight or seventy-nine.

Failure to comply with provisions as to leaving Calcutta.

92. If any master of a sailing-vessel leaving the port of Calcutta with emigrants on board—

(*a*) does not leave Garden Reach with his vessel within the time prescribed in section seventy-six, or

(*b*) without reasonable excuse, causes or allows his vessel to go below Garden Reach without being in tow of such a steamer as is referred to in section seventy-seven,

he shall be punished with fine which may extend to one thousand rupees.

Emigrant deserting or refusing to proceed to depôt.

93. (*1*) If any emigrant deserts before arrival at depôt, or refuses without reasonable cause to proceed to the depôt, he shall be punished with fine which may extend to twenty rupees, or to the cost incurred in entering into an agreement with, registering and conveying him to the depôt, whichever is greater, and, in default of payment of the fine, with imprisonment which may extend to one month.

(*2*) Any fine levied under this section may, in the discretion of the convicting Magistrate, be paid to the Emigration Agent or recruiter by whom the cost was incurred.

Emigrant deserting from depôt or failing to embark.

94. (*1*) If any emigrant—

(*a*) deserts from the depôt, or

(*b*) without reasonable cause, refuses or neglects to embark when called upon to do so by the Emigration Agent,

he shall be punished with imprisonment for a term which may extend to one month, or with fine which may extend to fifty rupees, or to double the amount of the cost incurred in entering into an agreement with, registering and conveying him to the depôt, and maintaining him therein, or with both.

(*2*) Any fine levied under this section may, in the discretion of the convicting Magistrate, be

Indian Emigration Act, 1883.
(Chapter XIII.—Supplemental.)

paid to the Emigration Agent or recruiter by whom the cost was incurred.

Causing, or permitting, embarkation of emigrant in contravention of section 68.

95. If any person causes, or if any master knowingly permits, any emigrant to embark contrary to the provisions of section sixty-three, he shall be punished with fine which may extend to two hundred rupees for each emigrant so embarked.

Institution of prosecutions.

96. (*1*) Prosecutions under sections eighty-six to ninety-five (both inclusive) shall not be instituted except as follows, namely:—

(*a*) Prosecutions under sections eighty-six to ninety-two, both inclusive, by the Emigration Agent, or by the Protector of Emigrants or by an officer appointed for the purpose by the Local Government.

(*b*) Prosecutions under section ninety-three, by or with the sanction of a Magistrate or Registering Officer or of the Protector of Emigrants at the port of embarkation.

(*c*) Prosecutions under section ninety-four, by the Emigration Agent with the sanction of the Protector.

(*d*) Prosecutions under section ninety-five, by the Protector of Emigrants or by an officer appointed for the purpose by the Local Government.

Defence to charges of desertion.

97. The following shall be good defences to charges under section ninety-three and ninety-four, respectively, namely:—

(*a*) to a charge under section ninety-three, that the accused person or other emigrants accompanying him has or have been ill treated, deceived or defrauded by the recruiter or any person under his control;

(*b*) to a charge under section ninety four, that the emigrant has suffered any ill-treatment or neglect in the depôt or on the journey thither.

Power for Customs-officers to search and detain for purposes of Act.

98. All the powers for the time being conferred by law on officers of sea-customs with regard to the searching and detention of vessels, or otherwise for the prevention of smuggling on board thereof, may be exercised by those officers for the prevention of offences against this Act.

CHAPTER XIII.

SUPPLEMENTAL.

Power for Local Government to appoint Magistrates for purposes of Act.

99. The Local Government may, from time to time, appoint any person, by name or by virtue of his office, to perform within a specified local area the functions of a Magistrate under this Act.

Suits against Emigration Agent for breach of duty.

100. (*1*) Whenever an Emigration Agent is chargeable with a breach of any duty to an emigrant arising from any agreement with the emigrant or imposed by this Act or the rules made under this Act, the Protector of Emigrants may, if he thinks fit, institute a suit on behalf of the emigrant against the Emigration Agent for the recovery of compensation for the breach.

(*2*) In awarding compensation under this section, all sums ordered to be paid under section fifty or section fifty-two shall be taken into consideration.

Power for Governor General in Council to determine probable lengths of voyages for purposes of Act.

101. (*1*) The Governor General in Council may, from time to time, by notification in the *Gazette of India*, determine what shall be held to be, for the purposes of this Act, the probable length of the voyages by sailing-vessels and vessels using steam-power, respectively, from any port from which, to any country to which, emigration is for the time being lawful.

(*2*) Until otherwise determined under this section, the probable length of the voyage by sailing-vessels from the ports mentioned in the third schedule hereto annexed to the countries mentioned in that schedule shall be deemed to be the lengths stated in that schedule.

Emigration to Straits Settlements and adjoining Native States.

102. (*1*) The Governor General in Council may, by notification in the *Gazette of India*, extend the Straits Settlements Emigration Act, 1877, to the whole or any part of British India.

(*2*) The Governor General in Council may also, from time to time, by a like notification, declare that all or any of the protected Native States adjoining the Straits Settlements shall, for the purposes of any law relating to emigration to those settlements, form part of those settlements.

(*3*) On and from the date of any notification published under sub-section (*2*), a Native of India who departs by sea out of British India under an agreement to labour for hire in the Native State or States to which the notification refers shall not be deemed to emigrate within the meaning of this Act.

Application of Act to emigration from British ports to French and Dutch colonies.

103. The provisions of this Act shall apply to emigration from British Indian ports—

(*a*) to the French colonies, under the terms of the Convention executed at Paris on the first day of July, 1861, and ratified at the same place on the 30th day of July, 1861, between Her Majesty the Queen of the United Kingdom of Great Britain and Ireland and His Majesty the Emperor of the French; and

(*b*) to the Netherlands colony of Dutch Guiana, under the terms of the Convention

executed at the Hague on the 8th day of September, 1870, and ratified at the same place on the 17th day of February, 1872, between Her Majesty the Queen of the United Kingdom of Great Britain and Ireland and His Majesty the King of the Netherlands:

Provided that, in any case in which there is any conflict between the provisions of this Act and those contained in either of those Conventions, the latter shall prevail.

Application of Act to proceedings in British India connected with emigration from French ports in India to French colonies.

104. The provisions of this Act shall, so far as they relate to proceedings which are to be conducted in British India, apply, in the case of Natives of India who depart by sea from a French port in India under an agreement to labour for hire in a French colony under the Convention between Her Majesty the Queen of the United Kingdom of Great Britain and Ireland and His Majesty the Emperor of the French referred to in the last foregoing section, as if such Natives were emigrants within the meaning of this Act:

Provided that, in any case in which there is any conflict between the provisions of this Act and those contained in that Convention, the latter shall prevail.

Prohibition of departure by land of a Native of India under an agreement to labour for hire in some country beyond the sea.

105. (*1*) The departure by land out of British India of a Native of India under a contract to labour for hire in some country beyond the sea other than the Island of Ceylon or the Straits Settlements is prohibited:

Provided that nothing in this section applies to the departure by land—

(*a*) of a domestic servant when accompanying his employer;

(*b*) of a Native of India, for the purpose of departing by sea from a French port in India under an agreement to labour for hire in a French colony in accordance with the Convention referred to in section one hundred and two.

(*2*) Whoever induces, or attempts to induce, any Native of India to depart by land out of British India in contravention of this section shall be deemed to have committed an offence under section eighty-two.

SCHEDULE I.

(*See Section 8.*)

COUNTRIES TO WHICH EMIGRATION IS LAWFUL.

I.—The British Colonies of Mauritius, Jamaica, British Guiana, Trinidad, St. Lucia, Grenada, St. Vincent, Natal, St. Kitts, Nevis and Fiji.

II.—The French Colonies of Martinique, Guadeloupe and its dependencies, and Guiana.

III.—The Netherlands Colony of Dutch Guiana.

IV.—The Danish Colony of St. Croix.

SCHEDULE II.

(*See Section 21.*)

FORM OF RECRUITER'S LICENSE.

OFFICE of the Protector of Emigrants at the Port of .

A. B., described in the descriptive roll annexed, is hereby licensed under the Indian Emigration Act, 1883, to be a recruiter of emigrants for [*here state the country for which the recruiter is licensed to recruit*] in [*here specify the local area within which the recruiter is licensed to recruit*].

This license will be in force until the of , unless previously cancelled.

To Fiji ...	Seventeen weeks.

D. FITZPATRICK,

Secretary to the Government of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

[Second publication.]

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 18th December, 1883, and is hereby promulgated for general information:—

ACT No. XXII OF 1883.

THE RANGOON TRAMWAYS ACT, 1883.

CONTENTS.

An Act to authorize the making, and to regulate the working, of Street Tramways in Rangoon.

WHEREAS the Municipal Committee of the town of Rangoon, by an agreement dated the 22nd day of June, 1882, a copy whereof is set forth in the schedule annexed to this Act, granted, for the considerations therein expressed, to John William Darwood, his heirs, executors, administrators and assigns, hereinafter called the Grantee, the right to construct, maintain and use a tramway or tramways in Rangoon upon the terms, subject to the conditions and in the manner mentioned in the said agreement, but the said agreement was made subject to the confirmation thereof by the Chief Commissioner of British Burma and to the recognition thereof by an Act of the Governor General in Council;

and whereas the said agreement was, on the 13th day of November, 1882, confirmed by the Chief Commissioner of British Burma; and it is now expedient to recognise it and give effect to it, subject to the provisions and limitations hereinafter contained; It is hereby enacted as follows:—

A.—Preliminary.

Short title.

Commencement.

1. This Act may be called the Rangoon Tramways Act, 1883; and it shall come into force at once.

Definitions.

2. In this Act, unless there is something repugnant in the subject or context,—

"Committee" means the Committee for the town of Rangoon appointed under the British Burma Municipal Act, 1874: VII of 1874.

"tramway" means a tramway, or any part of a tramway, or any siding, turnout, connection, line or track belong to a tramway:

"street" means the way of any street, road, thoroughfare, passage or place along or across which any tramway authorized by this Act is or is intended to be laid, and includes the surface-soil and sub-soil of any such street, and the footway and drains of any such street, and any bridge, culvert or causeway forming part of any such street.

B.—Powers of Grantee generally.

Powers to make, maintain and use tramways.

3. Subject to the provisions of this Act, and to the terms and conditions of the said agreement so far as the same are not inconsistent with this Act, the Grantee may make, maintain and use any of the tramways for the construction, maintenance and use of which provision is made in the said agreement:

Provided that any such tramway shall not be opened for public traffic until it has been inspected and certified by the engineer to the Committee to be fit for such traffic.

C.—Construction and Maintenance of Tramways and of Streets on which they are laid.

Power to Grantee to break up streets and lay rails, &c.

4. Subject to the terms and conditions of the said agreement, the Grantee may, from time to time, for the purpose of constructing, maintaining or renewing any tramway under this Act, open or break up any street, and therein or thereon lay sleepers and rails, and repair, alter or remove the same; and may, for the purposes aforesaid, do in and on any such street all other acts which may, from time to time, be necessary for constructing, maintaining or renewing the tramway:

Provided that he shall not, without the consent of the Committee, open or break up at any one time a greater length than one hundred yards of any street which does not exceed a quarter of a mile in length; and, in the case of any street exceeding a quarter of a mile in length, he shall leave an interval of at least a quarter of a mile between any two places at which he may open or break up the street, and shall not open or break up at any such place a greater length than one hundred yards.

Grantee to keep tramways and adjoining part of street in repair.

5. The Grantee shall, at his own expense, at all times maintain and keep in good condition and repair, in such manner as the Committee from time to time direct, all tramways constructed by him under this Act, and so much of any street as lies between the rails of any such tramway; and, in the case of double lines or turnouts or sidings, the portion of the road between the tramways, and in every case so much of the road as extends eighteen inches beyond the rails of and on each side of any such tramway.

Obligations of Grantee when he has broken up street.

6. When the Grantee has, for the purposes of section 4 or section 5, opened or broken up any portion of a street, he shall be under the following further obligations, namely:—

(a) he shall, with all convenient speed, and in all cases within six weeks at the most, unless the Committee otherwise consent in writing, complete the work for which the street has been opened or broken up, fill in the ground and make good the surface, and, to the satisfaction of the Committee, restore the street to as good a condition as that in which it was before it was opened or broken up, and clear away all surplus materials or rubbish occasioned thereby;

(b) he shall, in the meantime, cause the place where the street is opened or broken up to be fenced and watched, and to be properly lighted at night, and

(c) he shall make good all damage done to drains, sewers, water-pipes and gas-pipes, and to the wires or other materials or things used for any system of lighting, and whether belonging to the Committee, to the Government or to private persons, and shall make compensation for any other damage done in the execution of the powers granted to him.

Reservation of power of Committee and Government over streets.

7. (*1*) Nothing in this Act shall prevent the Committee or any Government officers from opening, breaking up, widening, altering, diverting or improving any street traversed by a tramway for the purposes for which they might otherwise under the law for the time being in force lawfully open, break up, widen, alter, divert or improve such street:

Provided that—

(a) they shall cause as little detriment or inconvenience to the Grantee as circumstances admit, and

(b) before they commence any work whereby the traffic on the tramway will be interrupted, they shall (except in cases of urgency, in which cases no notice shall be necessary) give to the Grantee not less than eighteen hours previous notice of their intention to commence the work, specifying the time at which they will commence it.

(*2*) The Committee or officers aforesaid or the Secretary of State for India in Council shall not be liable to pay to the Grantee any compensation for injury done to the tramway by the execution of any work referred to in sub-section (*1*), or for loss of traffic occasioned by the reasonable use of any power lawfully exercised in connection with the same.

D.—Rights over Tramways and Streets on which they are laid.

Grantee's exclusive right over tramways.

8. The Grantee shall, subject to the provisions of this Act and to the terms and conditions of the said agreement, have the exclusive use of his tramways for carriages with flange wheels or other wheels suitable only to run on a grooved rail:

Provided that nothing in this Act shall affect—

(a) the right of the public to pass along or across any part of any road along or across which any tramway is laid, whether on or off the tramway, with carriages not having flange wheels or wheels suitable to run on a grooved rail, or

(b) the right of the Commissioners for the port of Rangoon, or of any other body or person entitled at the time of the commencement of this Act to work and main-

tain a tramway, to pass across any tramway constructed under this Act with carriages having flange wheels or wheels suitable to run on a grooved rail.

Grantee to have right of user only.

9. Notwithstanding anything in this Act or in the said agreement, the Grantee shall not acquire any right other than that of user over any street along or across which he lays any tramway.

Power of Committee and Government officers to regulate traffic on streets.

10. Nothing in this Act shall affect the powers of the Committee or of any Government officers to regulate the passage of any traffic along or across any street along or across which any tramway is laid down, and the Committee or officers aforesaid may exercise their authority as well on as off the tramway, and with respect as well to the traffic of the Grantee as to the traffic of other persons.

E.—Traffic on Tramways.

Rates of fares and charges.

11. The Grantee may, from time to time, by a notice published in such languages and in such manner as the Chief Commissioner may prescribe, fix the rates of fares and charges for carrying passengers and goods in his carriages:

Provided that the rates of passenger fares shall not exceed one anna per mile for each passenger in the lower class and two annas per mile for each passenger in the higher or first class.

Mode of payment of fares and charges.

12. The fares and charges by this Act authorized shall be paid to such persons, at such places upon or near to the tramways, and in such manner and under such regulations as the Grantee may, by a notice published as aforesaid, from time to time prescribe.

Carriage of dangerous or offensive goods.

13. (*1*) No person shall be entitled to carry or to require to be carried on any tramway constructed under this Act any goods of a dangerous or offensive nature.

(*2*) Every person taking such goods with him on any such tramway shall, before entering the carriage, give notice of their nature to the servant of the Grantee in charge of the carriage.

(*3*) Every person sending such goods by any such tramway shall distinctly mark their nature on the outside of the package containing them, or otherwise give notice thereof in writing to the book-keeper or other servant of the Grantee with whom they are left at the time of such sending.

(*4*) The Grantee may refuse to take any parcel which he may suspect to contain goods of a dangerous or offensive nature, or require it to be opened to ascertain the fact.

F.—Offences and Penalties.

Penalty for failure of Grantee to comply with certain provisions of Act and agreement.

14. If the Grantee—

(*a*) constructs or maintains any tramway, or runs any car or carriage thereon, otherwise than in accordance with the said agreement;

(*b*) opens any tramway for traffic before it has been inspected and certified in manner required by section 3;

(*c*) opens or breaks up any street otherwise than as permitted by this Act, or having opened or broken up a street fails to discharge any of the obligations imposed on him by section 6, clauses (*a*) and (*b*); or

(*d*) fails to keep the rails of any tramway and the portions of the street adjoining the same in repair as required by section 5—

he shall (without prejudice to the enforcement of specific performance of the requirements of this Act or of the said agreement or to any other remedy against him), on complaint of the Committee or of any person injuriously affected thereby, be punished with fine which may extend to two hundred rupees, and in the case of a continuing offence to a further fine which may extend to fifty rupees for each day after the first day during which the offence continues to be committed.

Penalty for obstructing Grantee in the exercise of his powers.

15. Any person who without lawful excuse (the proof whereof shall lie on him) wilfully obstructs any person acting under the authority of the Grantee in the lawful exercise of his powers in constructing, repairing or renewing a tramway, or injures or destroys any mark made for the purpose of setting out the line of the tramway, shall be punished with fine which may extend to fifty rupees.

Penalty for interfering with tramway.

16. Any person who without lawful excuse (the proof whereof shall lie on him) wilfully does any of the following things, namely:—

(*a*) interferes with, removes or alters any part of a tramway constructed under this Act, or of the works connected therewith;

(*b*) does anything in such a manner as to obstruct any carriage using any such tramway; or

(*c*) abets within the meaning of the Indian Penal Code the doing of anything mentioned in clause (*a*) or clause (*b*),—

shall be punished with fine which may extend to one hundred rupees.

Penalty for taking or sending dangerous or offensive goods without giving notice.

17. Any person taking or sending by any tramway any goods of a dangerous or offensive nature without giving the notice required by section 13 shall be punished with fine which may extend to fifty rupees.

Penalty for avoiding payment of proper fare.

18. If any person travelling or having travelled in any carriage of the Grantee avoids or attempts to avoid payment of his fare, or if any person having paid his fare for a certain distance wilfully proceeds in any such carriage beyond that distance and does not pay the additional fare for the additional distance or attempts to avoid payment thereof, or if any person wilfully refuses or neglects on arriving at the point to which he has paid his fare to quit the carriage, he shall be punished with fine which may extend to ten rupees.

4 *f*

19. Any servant of the Grantee, and any person called in by him for his assistance, may arrest and take to the nearest police-station any person who is discovered either in or after committing or attempting to commit an offence punishable under section 18 and whose name and residence are refused by him and are unknown to such servant or person, and the police-officer in charge of the police-station, on receiving a complaint that such an offence has been committed, shall adopt such legal measures as may be necessary to cause the accused person to be taken before a Magistrate with the least possible delay.

Power of servant of Grantee to arrest persons avoiding payment of fare.

G.—Powers to make Rules.

20. (*1*) The Committee in special meeting may, with the sanction of the Chief Commissioner, from time to time, make such rules consistent with this Act as to the rate of speed, number of passengers and mode of use of the tramways, and as to the licensing and control of drivers, conductors and other persons having charge of the carriages of the Grantee, as the convenience and safety of the public may, in the opinion of the Committee, require.

Powers to make rules.

(*2*) The Grantee may, with the like sanction, from time to time, make rules consistent with this Act for preventing the commission of any nuisance in or upon any carriage, or in or against any premises belonging to him, and

for regulating the travelling in any carriage belonging to him.

(*3*) The authority making any rule under this section may prescribe as a punishment for the breach of it a fine which may extend to twenty rupees.

(*4*) All rules made under this section shall be published in the *British Burma Gazette*.

H.—Miscellaneous

21. For the purpose of clause 15 of the agreement set forth in the schedule annexed to this Act, the want of sufficient funds shall not be deemed to be a circumstance beyond the control of the Grantee.

Construction of clause 15 of agreement.

22. The plant, rolling-stock and other vehicles, yards, workshops, engine-sheds and depôts of the Grantee shall, for a period of five years from the passing of this Act, be exempt from all municipal taxation except such lighting and water-rates as may, from time to time, be payable in respect of the yards, workshops, engine-sheds and depôts.

Exemption from certain municipal taxation.

23. Nothing in this Act shall exempt the Grantee or any tramway constructed by him under this Act from the provisions of any general enactment relating to tramways now in force or which may hereafter be passed.

Provisions as to general Acts.

And whereas the agreement set forth in the schedule annexed to this Act was executed by the parties thereto under a belief that all the streets specified in the first article thereof as streets along which the construction of tramways was authorized were situate within the Municipality of Rangoon, and it now appears that some portion of those streets is not so situate; It is hereby enacted as follows:—

24. All streets specified in the first article of the said agreement as streets along which the construction of tramways is authorized shall, for the purposes of the agreement and of this Act, be deemed to be, and to have been, on and from the date of the agreement, situate within the limits of the Municipality of Rangoon.

Certain streets to be deemed within the Municipality.

SCHEDULE.

ARTICLES OF AGREEMENT made this 22nd day of June, 1882, BETWEEN THE MUNICIPAL COMMITTEE OF THE CITY OF RANGOON appointed under the British Burma Municipal Act, 1874, hereinafter called the said Committee, of the one part, and JOHN WILLAM DARWOOD, of Rangoon, hereinafter called the said Grantee, of the other part. WHEREAS the said Committee have, subject to the confirmation thereof by the Chief Commissioner of British Burma and to the recognition of this agreement by an Act of the Governor General of India in Council, agreed to grant to the said Grantee the right to construct, maintain and use a tramway or tramways in Rangoon upon the terms and conditions hereinafter contained, NOW THESE PRESENTS WITNESS that, in consideration of the covenants and agreements hereinafter contained, and on the part of the said Committee to be performed, the said Grantee for himself, his heirs, executors, administrators and assigns doth covenant with the said Committee, so far as the covenants and conditions hereinafter contained are to be performed by the said Grantee and his heirs, executors, administrators and assigns, and the said Committee, for and in consideration of the convenants and agreements hereinafter contained and on the part of the said Grantee, his heirs, executors, administrators and assigns to be performed, do hereby covenant with the said Grantee, his heirs, executors, administrators and assigns so far as the covenants and agreements hereinafter contained are to be performed by the said Committee in manner following, that is to say:—

VII

1. The said Committee grant to the said Grantee and his heirs, executors, administrators and assigns, all which persons are hereinafter included in the words "the said Grantee," the right to construct, maintain and use a tramway or tramways, with single or double tracks or lines, and with all necessary sidings, turnouts, connections and lines, or tracks of whatever nature which may be required to connect the said tramway or tramways with the depôts of the said Grantee (but in the case of sidings and turnouts, only in such places as the said Committee may sanction), on the following

routes and between such other places and by such other routes as may be hereafter approved of by the said Committee :—

The tramways referred to and now authorized for construction, subject to such confirmation as aforesaid, are :—

(i) A tramway with a double track or line along China Street and Pagoda Road from the Strand Road at its junction with China Street to the Shway Dagone Pagoda.

(ii) A tramway with a double track or line along the Strand Road from East Street to West Street.

(iii) A tramway with a double track or line along Dalhousie Street from East Street to the junction of Dalhousie Street with the Strand Road.

(iv) A tramway with a double track or line along Soolay Pagoda Road from the Strand Road to Montgomery Street and along Montgomery Street to the Phayre Street Railway Station and along Montgomery Road to the iron bridge near the bázár at Poozoondoung.

(v) A tramway with a double track or line from the Strand Road down Barr Street to Shafraz Road round the Public Buildings back into the Strand Road.

2. When approved of and desired by the said Committee, tramways with such tracks or lines as may be approved of by the said Committee from East Street to Monkey Point and along the Upper and Lower Poozoondoung Roads to Monkey Point, and along Merchant Street, Fraser Street and Canal Street, and along Lower Kemmendine Road from the Strand Road, Kemmendine, to the junction of West Street with the Strand Road.

3. The said tramway or tramways to be constructed and maintained in such form and manner and upon such gradient and with such gauge as the said Committee may approve, and the cars and carriages intended to run on the said rails shall be such as are approved of by the said Committee.

4. The cars and carriages of the Grantee on the tracks or lines of the said tramway shall, unless with the consent of the said Committee, be worked with steam power of the most approved engine of the time only, and the said Committee shall have power at all times to make such regulations as to the rate of speed and mode and use of the said tracks or lines as the convenience and safety of the public using the streets may require.

5. The said Grantee shall have power from time to time to fix the rate of fares for carrying persons and goods in the cars or carriages to be run on the said tramway or tramways : provided that the rates of fares shall for any distance not exceed the rate of one anna per mile for the lower class and two annas per mile for the higher or first class for each passenger.

6. The said Grantee may, for the purpose of constructing and maintaining such tramways under such superintendence as is hereinafter specified, open and break up the soil and metalled way of the several streets, roads and bridges in the city and thereon lay sleepers and rails, and from time to time repair, alter or remove the same, and may, for the purposes aforesaid, remove and use all earth and materials in such streets, roads and bridges, and the said Grantee may, in and on such streets, roads and bridges, do all other acts which he shall from time to time deem necessary for constructing and maintaining street tramways in the said city, doing as little damage as may be in the execution of the powers hereby granted, and shall make good all damage done to drains, sewers, water and gas-pipes, or to the wires or other materials or things used for any other system of lighting, and whether belonging to the said municipality or to private individuals, and shall make compensation for any other damage done in the execution of such powers.

7. Before the said Grantee proceeds to open or break up any street, road or bridge other than those referred to in sub-clauses from (i) to (v) in clause 1, he shall obtain the approval in writing of the said Committee to the tracks or lines of the said tramway being laid down on the said streets, roads or bridges, and the said Grantee, before opening or breaking up any street, road or bridge, shall give to the said Committee or their Executive Engineer, or other municipal officer duly appointed for that purpose, notice in writing of his intention to open or break up the same not less than three clear days before beginning such work, except in such cases of emergency arising from defects in any of the rails or other work, and then so soon as is possible after the beginning of the work or the necessity for the same shall have arisen.

8. No street, road or bridge shall, except in cases of emergency as aforesaid, be opened or broken up, except under the superintendence of the said Committee or of their Executive Engineer, or of some other municipal officer duly appointed for that purpose, and according to such plans as shall be approved of by him or them : provided always that, if the said Committee or their Engineer or other such officer as aforesaid fail to attend at the time fixed for the opening of any such street, road or bridge after having had such notice of the said Grantee's intention as aforesaid, or shall not propose any plan for breaking up or opening the same, or shall refuse or neglect to superintend the operation, the said Grantee may perform the work specified in such notice without such superintendence as aforesaid.

9. When the said Grantee opens or breaks up the roadway or pavement of any street, road or bridge, he shall with all convenient speed complete the work for which the same shall be broken up, and fill in the ground and make good the roadway or pavement so opened or broken up as aforesaid, and carry away the rubbish occasioned thereby and deposit the same for the use of the said Committee at such place as the Executive Engineer of the said municipality shall direct, and shall at all

times, whilst any such roadway or pavement shall be so opened or broken up, cause the same to be guarded, and shall cause a light sufficient for the warning of passengers to be set up and maintained against or near such roadway or pavement where the same shall be open or broken up every night during which the same shall continue open or broken up.

10. If the said Grantee opens or breaks up any street, road or bridge without giving such notice as hereinbefore mentioned, or in a manner different from that which shall have been approved of or determined as aforesaid, except in the cases in which the said Grantee is hereby authorized to perform such work without any superintendence or notice, or if the said Grantee shall make any unnecessary delay in completing any such work or in filling in the ground or reinstating and making good, so far as is consistent with the existence of the said tramway, the roadway or pavement so opened or broken up, or in carrying away the rubbish occasioned thereby, or if he neglect to cause the place where such roadway or pavement has been broken up to be guarded and lighted, he shall forfeit to the said Committee a sum not exceeding fifty (50) rupees for every such offence, and he shall forfeit an additional sum not exceeding fifty (50) rupees for each day during which any such delay or neglect as aforesaid shall continue after he shall have received notice thereof.

11. The said Grantee shall maintain and keep in repair such portion of the streets, roads and bridges in the city of Rangoon as shall be occupied by his tracks or lines, including therein, not only the space between his tracks or lines, but a space eighteen inches on either side thereof, and in consideration of the maintenance of such streets, roads and bridges as aforesaid, and of the yearly rent hereinafter mentioned to be paid by the Grantee, the plant, rolling-stock and other vehicles, yards, workshops, engine-sheds and depôts of the said Grantee shall be exempt from municipal taxation for a period of five years, except lighting and water-rates for such yards, workshops, engine-sheds and depôts.

12. The said Grantee shall be liable for any loss, damage or injuries that any person or persons may sustain by reason of any defect or want of repairs in any of the plant, rolling-stock or other properties of the said Grantee, or by reason of any carelessness, neglect or misconduct of his agents or servants in the management, construction or use of the said tramways or any portion thereof, or in the exercise of the power given by clauses 6, 7, 8, and 11; the same shall be made good by the said Grantee, and in the event of any suit being instituted against the said Committee in respect of any of the matters hereinbefore mentioned the said Grantee shall, within fourteen days from the receipt of a notice thereof from the said Committee, settle the same; but if the said Grantee choose to defend such suit he shall be at liberty to do so upon his undertaking to indemnify the said Committee against all losses, damages and expenses in respect thereof: provided always that, if the said Grantee fail to settle such suit or to indemnify the said Committee as is hereinbefore provided, it shall be lawful for the said Committee to settle the same without any consent or concurrence on the part of the said Grantee, and the sums which they shall have to pay in making such settlement, together with interest thereon at the rate of 8 per cent. per annum from the date of payment, and with all expenses which they may be put to, shall be recoverable as a debt from the said Grantee.

13. Nothing in this agreement shall be construed to prevent the said Committee from taking up any of the public streets or roads traversed by the said tramway for the purposes for which the said Committee may lawfully take up the same, and the said Grantee shall have no right to claim cost from the said Committee for obstructing the tramway or causing delay in the traffic so long as the delay shall not be unreasonable for the work to be performed.

14. If the said Committee shall hereafter alter the level of any street, road or bridge along or across which any tramway by this agreement authorized is laid or authorized to be laid, the Grantee shall alter or (as the case may be) lay his rails to suit the altered level of such street, road or bridge: provided always that any such alteration as aforesaid shall be so made as to interfere as little as possible with the safe and convenient working of the said tramways, and in any case so as not to stop or prevent the free use or working thereof.

15. If at any time after the opening of any tramway for traffic the said Grantee shall discontinue the working of such tramway or any part thereof for the space of six calendar months (such discontinuance not being occasioned by circumstances beyond the control of the said Grantee), it shall be lawful for the said Committee, without any previous notice to the said Grantee, to remove the tramway or part of the tramway so discontinued, and the said Grantee shall pay to the said Committee the cost of such removal and of the making good of the street, road or bridge, and the certificate of the said Committee or of their Engineer as to such cost shall be conclusive.

16. The provisions of this agreement shall remain and be in force for a term not less than twenty-one (21) years from the date thereof. The said Committee shall have the right of purchasing the said tramways, with the plant, stores, rolling-stock, sheds, depôts and yards, and everything connected therewith, after the expiration of the said twenty-one (21) years upon declaring its intention so to do within six months after the expiration of the said twenty-one (21) years; the amount to be paid in the event of such purchase shall be the actual *bonâ fide* value at the termination of this agreement, exclusive of any compensation for goodwill, premium on compulsory sale or other consideration whatever of the tramways and of the work and materials connected therewith, and of the lands and buildings and all the other property of the Grantee, such value to be decided by mutual agreement or by arbitration as hereinafter provided.

17. The provisions hereinbefore contained shall, so far as applicable, apply to all tramways to be constructed by the said Grantee by any route or routes to be hereafter sanctioned by the said Committee, and to the works connected with or incidental to such tramways, it being agreed that in the event of the municipality failing to declare its intention as above provided to purchase the property of the said Grantee the terms of this contract shall continue in force during the period of six months from the date of the determination of

these presents and for a further period of six months, and if the said Committee shall not within that time exercise the option of purchase hereby given, the said Committee and the said Grantee shall enter into a fresh agreement.

18. The said Grantee will, if required by the said Committee, before opening up the roadway of any street, road or bridge, deposit with the Bank of Bengal in the name of the said Committee the sum of rupees five thousand (5,000), or, in their option, promissory notes of the Government of India of the nominal value of rupees five thousand (5,000), and the same will remain so deposited until the completion by the said Grantee of the above mentioned lines of tramway herein sanctioned for construction. All interest accruing on the said sum, or the said notes, shall be credited to the said Grantee, and, subject as next hereinafter mentioned, be paid to him as the same accrues due. The said Committee shall be entitled to deduct all fines recoverable by the said Committee and all monies to which they may be entitled under any clause or clauses of these presents out of the sum so deposited, or the interest accruing on the said sum or notes, or out of the proceeds of sale of a portion of the said notes on completion of the tramways herein sanctioned for immediate construction.

19. In consideration of the concession herein granted, the said Grantee undertakes on behalf of himself, his heirs, executors, administrators and assigns that he will pay to the said Committee a yearly rent of rupees three thousand (3,000) per mile of double track or line and rupees two thousand (2,000) per mile of single track or line, payable half-yearly; the date on which such rent on each line of tramway shall begin to accrue shall be the date on which such line of tramways is open for public traffic.

20. It is agreed that the tramway or tramways from the Strand Road along Barr Street and Shafraz Road round the Public Buildings and back to the Strand Road should not be included, and that no sidings, turnouts or tracks necessary to connect the traffic lines with the carriage-sheds engine-sheds, factories, depôts, yards or other property or properties of the said Grantee shall be included in the mileage on which rent is to be paid, the tramway or tramways more particularly described in this paragraph, and such sidings, turnouts and necessary connecting tracks or lines, being free of rent.

21. The sleepers, rails, materials and implements and other erections placed and erected by the said Grantee on the streets, bridges or roads under the powers hereby granted shall be and remain the property of the said Grantee, and the said Grantee shall have the exclusive use of his tramway or tramways for carriages with flanged wheels or other wheels suitable only to run on the prescribed rail.

22. The prescribed rail is that known as the box-rail introduced by Mr. Robinson Souttar, to be made of Bessemer steel of the weight of sixty pounds to the yard, or such other rail of such weight as may be approved by the said Committee.

23. The said Grantee shall have the exclusive right of laying and using tramways within the limit of the Rangoon Municipality on the terms herein stated; but in the event of the said Grantee refusing to lay down any line when the said Committee may consider it necessary, the said Committee shall be at liberty to grant the right of laying and using such line to any other party.

24. Unless the said Grantee shall have commenced the work of laying down the said tramways within twelve months from the date of the execution of these articles of agreement, the said Committee shall be at liberty to cease and determine this contract and to enter into arrangements with any other person or persons for the construction of tramways; it being agreed, however, that these conditions of contract are subject to the sanction of Government, and that, in the event of their being executed prior to such sanction being given, the said 12 months shall date from the day on which notice of such sanction is given to the said Grantee: provided also that any delay in commencing the work beyond 12 months shall not have been due to any cause beyond the control of the said Grantee.

25. If any doubt, difference or dispute shall arise between the said Grantee and the said Committee touching the construction of these presents or anything herein contained, or touching or concerning any other matter or thing relating to these presents, then and in every such case such doubt, difference or dispute shall be referred to the arbitration of two persons, one to be chosen by the said Grantee and the other by the said Committee within one calendar month after either of them shall have made to the other a requisition to that effect, and should the arbitrators fail to agree they shall refer the question or questions at issue to the decision of an umpire to be chosen by the said arbitrators, and the decision of such arbitrators if they agree, or of such umpire if they disagree, shall be final; and in case either party shall neglect or refuse to appoint an arbitrator within the specified time, the arbitrator appointed by the other party shall make a decision alone, and the decision of such arbitrators, umpire or arbitrator, as the case may be, shall be effectual and binding upon both parties.

26. The said Grantee is to be at liberty to form a Company or Limited Liability Company for the purpose of constructing, maintaining and working the tramways authorized by or hereafter to be authorized under the terms of this agreement. The words "the said Grantee" used in this agreement shall include such Company or Limited Liability Company so formed as aforesaid.

27. The words "the said Committee" used in this agreement shall include the present Committee and their successors, and also persons empowered by the said Committee or their successors or by other duly constituted authority to do any act or thing or exercise any powers or authorities which the said Committee are hereinbefore authorized or empowered to do or exercise.

PART V.

Bills introduced into the Council of the Governor General for making Laws and Regulations, or published under Rule 22.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

[Third publication.]

The following Bill was introduced into the Council of the Governor General of India for the purpose of making Laws and Regulations on the 14th December, 1883:—

No. 24 OF 1883.

A Bill to repeal Bengal Regulation XIX of 1810 within the territories administered by the Lieutenant-Governor of the North-Western Provinces.

WHEREAS the provisions of Bengal Regulation XIX of 1810 (*for the due appropriation of the rents and produce of lands granted for the support of mosques, Hindu temples, colleges, and other purposes; for the maintenance and repair of bridges, serdis, kattras, and other public buildings; and for the custody and disposal of nazúl property or escheats,*) are, in so far as they are still in force within the territories administered by the Lieutenant-Governor of the North-Western Provinces, either obsolete or unnecessary, and it is therefore expedient entirely to repeal the Regulation within those territories; It is hereby enacted as follows:—

Repeal of Bengal Regulation XIX of 1810 in the North-Western Provinces.

1. Bengal Regulation XIX of 1810 is hereby repealed within the territories administered by the Lieutenant-Governor of the North-Western Provinces.

STATEMENT OF OBJECTS AND REASONS.

The object of this Bill, which has been prepared on the recommendation of the Local Government, is to repeal Bengal Regulation XIX of 1810 (*for the due appropriation of the rents and produce of lands granted for the support of mosques, Hindu temples, colleges, and other purposes; for the maintenance and repair of bridges, serdis, kattras, and other public buildings; and for the custody and disposal of nazúl property or escheats*) within the territories administered by the Lieutenant-Governor of the North-Western Provinces. So far as the Regulation vests the superintendence of serâis in the Board of Revenue, it is at variance with the existing practice, as serâis are now managed in the North-Western Provinces entirely by the executive authorities under the immediate orders of the Government, and the Local Government reports that the other provisions of the Regulation, which provide for the management of lands granted as charitable and educational endowments and the superintendence of escheats, are not required for the territories under its administration.

Though the Regulation, in so far as it relates to serâis, is obsolete also in the Lower Provinces, it is still in active operation in those Provinces with regard to a few trusts and small endowments administered by the Board of Revenue, and still governs the procedure there with regard to escheats. Under these circumstances it has been considered best to confine the Bill to the North-Western Provinces and leave it to the Bengal Legislature to legislate for the Lower Provinces if it thinks necessary.

C. P. ILBERT.

The 7th December, 1883.

D. FITZPATRICK,

Secretary to the Government of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

[Third publication.]

The following Bill was introduced into the Council of the Governor General of India for the purpose of making Laws and Regulations on the 14th December, 1883, and was referred to a Select Committee :—

No. 25 OF 1883.

A Bill to amend the Burma Courts Act, 1875.

WHEREAS it is expedient to amend the Burma Courts Act, 1875 ; It is hereby enacted as follows :— [XVII of 1875.]

Short title. Commencement.

1. (*1*) This Act may be called the Burma Courts Act, 1883 ; and

(*2*) It shall come into force at once.

Definition of "section."

2. In this Act, unless there is something repugnant in the subject or context, "section" means a section of the Burma Courts Act, 1875. [XVII of 1875.]

Alteration of names of certain Courts.

3. (*1*) In section 6, in clause (*a*), for the words "Extra Assistant Commissioner of the third class" the word "Myo-ôk" shall be substituted, and in clause (*b*) the words "of the second class, the Extra Assistant Commissioner of the first class" shall be omitted.

(*2*) In the table subjoined to section 12, in clause (*a*), for the words "Extra Assistant Commissioner of the third class" the word "Myo-ôk" shall be substituted, and in clause (*b*) the words "of the second class, the Court of the Extra Assistant Commissioner of the first class" shall be omitted.

(*3*) In section 13, the words "of the first or second class" shall be omitted.

(*4*) The substitutions and omissions made by this section shall be deemed to have been made from the thirty-first day of March, 1882.

Substitution of new section for section 8.

4. For section 8 the following section shall be substituted :—

"8. The Governor General in Council and the Chief Commissioner may, respectively, from time to time, vary the number of Courts mentioned in section six, in clauses (*c*), (*d*), (*e*) and (*f*), and in clauses (*a*) and (*b*)."

Substitution of new section for section 9.

5. For section 9 the following section shall be substituted :—

"9. The Chief Commissioner may, from time to time, vary the local limits of the jurisdiction of any Court mentioned in section six, clauses (*a*) and (*b*), and, with the previous sanction of the Governor General in Council, of any Court mentioned in section six, clauses (*c*), (*d*), (*e*) and (*f*)."

Insertion of section after section 9.

6. After section 9 the following section shall be inserted, namely :—

Validation of certain proceedings already taken.

"9A. Any order heretofore passed, or decree made or proceeding taken by any Civil Court in British Burma acting as if it had the jurisdiction of a Court mentioned in section six, clause (*a*) or clause (*b*), shall not be invalid merely because the Court was established by the Chief Commissioner instead of by the Governor General in Council or because the local limits of its jurisdiction were varied by the Chief Commissioner without the previous sanction of the Governor General in Council."

Amendment of section 23.

7. In section 23 the following amendments shall be made, namely :—

(*a*) after the word "Commissioner" each time it occurs, the words "or Deputy Commissioner,"

(*b*) after the words "Judicial Commissioner" the first time they occur, the words "or Commissioner respectively," and

(*c*) after the words "Judicial Commissioner," the second time they occur, the words "or Commissioner,"

shall be respectively inserted.

Insertion of section after section 23.

8. After section 23 the following section shall be inserted, namely :—

Power for Chief Commissioner to invest Assistant Commissioners with appellate powers.

"23A. The Chief Commissioner may invest any Assistant Commissioner with power to hear appeals from decrees and orders in original suits and proceedings of any Court mentioned in section six, clause (*a*) or (*b*).

"The Chief Commissioner may withdraw the power with which any Assistant Commissioner has been invested under this section."

Substitution of new section for section 38.

9. For section 38 the following section shall be substituted, namely :—

Appointment of officers.

"38. The presiding officer of the Court of the Judicial Commissioner shall be appointed by the Governor General in Council.

"The presiding officers of all the other Courts mentioned in section six may be appointed and may be removed by the Chief Commissioner."

STATEMENT OF OBJECTS AND REASONS.

THE object of this Bill is to make certain amendments in the Burma Courts Act, 1875 (XVII of 1875), which experience has shown to be required.

2. In the Act as it at present stands the presiding officers of the Courts of the lowest grades are termed Extra Assistant Commissioners of the 1st, 2nd and 3rd class respectively. In 1882 the Subordinate Executive and Judicial Service in British Burma was reorganized, and the designations of the service were changed. The term Extra Assirtant Commissioner was restricted to Extra Assistant Commissioners of the 1st and 2nd classes under the old system; and Extra Assistant Commissioners of the 3rd class were styled Myo-ôks. The result is that the present designations of the Subordinate Judicial Officers do not correspond with the designations given to the Subordinate Civil Courts by the Act. This difficulty has hitherto been ignored. Now, however, the Judicial Commissioner, Mr. Jardine, is of opinion that, as the law stands, the nomenclature used in the Courts Act should be adhered to as regards all officers of the Subordinate Judicial Service appointed to preside in Civil Courts. He advises the Chief Commissioner that questions of jurisdiction may arise and may cause inconvenience and loss to suitors; and he reports that a case of the kind has already occurred. This being the view taken by the Judge of the highest Appellate Court, the Chief Commissioner has addressed the Government of India on the subject. He wishes that all doubt on the point should be removed by substituting the words "Extra Assistant Commissioner" for the words "Extra Assistant Commissioner of the 1st and 2nd class," and the word "Myo-ôk" for the words "Extra Assistant Commissioner of the 3rd class" wherever they occur in the Courts Act. With this view section 3 of the Bill has been drafted. It gives the amendments made by the section retrospective effect from the 1st April, 1882, the date of the reorganization of the Subordinate Service.

3. Further difficulties have also arisen from the provisions of sections 8 and 9 of the Act. Under recent orders the Chief Commissioner has power to create additional Myo-ôkships; but in consequence of the provisions of section 8 of the Act additional Myo-ôks appointed by the Chief Commissioner can do no civil work unless the sanction of the Government of India is first obtained to the creation of an additional Civil Court. Again, the duties performed by Extra Assistant Commissioners and those performed by Myo-ôks are practically of the same description. The exigencies of the public service often render necessary the appointment of a Myo-ôk to succeed an Extra Assistant Commissioner or of an Extra Assistant Commissioner to succeed a Myo-ôk in the charge of a township; and the result is that an officer who should preside in a Court of grade (*a*) is appointed to preside in a Court which has hitherto been a Court of grade (*b*), or *vice versa*. Such changes have from time to time been made by the Chief Commissioner. The Judicial Commissioner is of opinion that, having regard to the provisions of sections 8 and 9 of the Act, such an interchange cannot legally be effected except by, or with the previous sanction of, the Governor General in Council. The inconvenience which would arise if it were held to be necessary to submit a reference to the Government of India on every occasion such as those described is apparent. The administration of the province, and particularly the administration of civil justice, would be seriously hampered. Sections 4 and 5 of the Bill therefore re-enact sections 8 and 9 of the Act in such a form that the Local Government is empowered to vary the number of Courts of grades (*a*) and (*b*), and to vary the local limits of the jurisdiction of these Courts without the previous sanction of the Government of India, and section 6 legalizes the variations in the numbers, and limits of the local jurisdictions, of these Courts, which have heretofore from time to time been made by the Chief Commissioner instead of by the Governor General in Council or by the Chief Commissioner without the previous sanction of the Governor General in Council.

4. The Chief Commissioner states that the Deputy Commissioners in certain districts are overburdened by the pressure of civil appellate duties to the detriment of their executive work, and that, in order to increase their efficiency as executive officers, it is necessary to relieve them of some portion of their appellate jurisdiction. With this object sections 7 and 8 of the Bill have been prepared. The latter section, which is based on the recommendation of the Chief Commissioner, gives him authority to invest an Assistant Commissioner with power to hear certain civil appeals which would ordinarily be heard by the Deputy Commissioner. The former section empowers the Chief Commissioner to transfer to Commissioners of Divisions all or any part of the appellate jurisdiction exercisable under the Act by Deputy Commissioners. It seems desirable to provide this second and additional mode of affording the proposed relief to Deputy Commissioners, as it is possible that the result of transferring civil appellate work from the Deputy Commissioner to the Assistant Commissioner may not always prove satisfactory.

Lastly, under section 38 of the Act, the Chief Commissioner is only empowered to appoint and remove the presiding officers of the Court of the Extra Assistant Commissioner of the 3rd class (now styled the Myo-ôk). The presiding officers of all the other Courts under the Act must be appointed by the Governor General in Council. These provisions have been found to cause practical inconvenience, and the Government of India see no reason why the Chief Commissioner should not have, in regard to civil jurisdiction, like powers to those which the Criminal Procedure Code gives him in regard to criminal jurisdiction. Accordingly, section 9 of the Bill amends section 38 of the Act, and confers power on the Chief Commissioner to appoint and remove the presiding officers of all the Courts mentioned in section 6 of the Act with the exception of the Court of the Judicial Commissioner; the power to appoint the presiding officer of that Court being reserved to the Governor General in Council.

C. P. ILBERT.

The 7th December, 1883.

D. FITZPATRICK,
Secretary to the Government of India.
